Area and Population.—Area, 97,914 square miles, of which 320 square miles are water. Of the total, about 3,300 square miles are comprised within the Yellowstone National Park, which since 1872 has been reserved for public uses. Public lands unappropriated on June 30, 1932, totalled 14,728,953 acres; national forest lands, 8,480,770 acres.

Census population on April 1, 1930, 225,565, an increase of 31,163, or 16 per cent. since 1920.

The Federal census results for various years (including distribution by sex in 1930) were as follows :—

Years	White	Negro	Mexican	Indian	Asiatic	Total	Per Sq. Mile
1870	8,726	183	— [1]	66	143	9,118	0·1
1910	139,990 [2]	2,235	328 [2]	1,486	1,926	145,965	1·5
1920	188,146 [2]	1,375	2,000 [2]	1,343	1,538	194,402	2·0
1930	214,067	1,250	7,174	1,845	1,229	225,565	2·3
Male .	117,703	699	4,582	982	819	124,785	—
Female	96,364	551	2,592	863	410	100,780	—

[1] Included in white.
[2] Adjusted by deducting the estimated number of persons who would have been classified as Mexican in 1930.
[3] Estimated.

In 1930, the foreign-born white population numbered 19,658 (8·7 per cent. of the total), of whom 2,105 (10·7 per cent.) were English, 1,783 (9·1 per cent.) Swedes, 1,714 Germans, 1,653 Italians, 1,424 Scotch, 1,375 Russians, 1,322 Jugoslavs, and 1,136 Canadians. Of the total population in 1930, 31·1 per cent. were urban, 0·6 per cent. Negro, and 41 per cent. (79,709 males and 12,739 females) gainfully employed. The 1930 census showed 1,611 men and 1,057 women divorced; the number of private families was 56,887 (of 3·79 persons). The State penal and reformatory system in 1932 held 420 men and no women. The Indian reservation covers 3,120 square miles, with a population (1930) of 2,014.

Old Age pensions (maximum 30 dollars a month) were established in 1929 for all those 65 years of age or older who have been American citizens and

residents of the State for 15 years (of the county for 5 years) with incomes not exceeding 360 dollars a year; number of pensioners on December 31, 1933, was 701, drawing an average of 11·69 dollars per month.

The largest towns are Cheyenne (capital), with census population in 1930 of 17,361; Casper, 16,619; Laramie, 8,609; Sheridan, 8,536; Rock Springs, 8,440.

Education.—In 1930, illiterates 10 years of age or older numbered 2,895 (1·6 per cent. of that age group); of persons between the ages of 5 and 20, 51,671 (73·7 per cent.) were attending school.

In 1933, 1,214 public schools had 2,140 teachers, and 42,214 enrolled pupils; 156 accredited high schools had 639 teachers and 14,211 pupils. The University of Wyoming, founded at Laramie in 1887, had in 1934, 121 professors and instructors and 1,102 students. There is also a State Agricultural College at Laramie. Expenditure on elementary and secondary schools in 1932–33 was 4,881,741 dollars.

The religious bodies with the most numerous membership are the Roman Catholic, with 18,772 members in 1926, Mormon (11,610), Methodist (6,923), and Presbyterian. Total, all denominations, 62,975.

Finance and Defence.—The cash receipts and disbursements (exclusive of trust funds) for the biennium ending September 30, 1934, were:—

	Dollars
Balance, October 1, 1932	3,063,288
Receipts for 1932–34	25,782,489
Total	28,845,777
Disbursements 1932–34	25,270,756
Balance, Sept. 30, 1934. . . .	3,575,021

On September 30, 1934, the bonded debt amounted to 3,725,000 dollars, and the assessed value of property in the State in 1929 to 447,954,091 dollars.

The National Guard on July 31, 1934, consisted of 52 officers, 1 warrant officer and 580 enlisted men.

Production and Industry.—Wyoming is semi-arid and agriculture is carried on by irrigation and by 'dry farming.' In 1930, there were 16,011 farms, with a total area of 23,525,234 acres, of which 2,293,000 acres were crop land; total value of farm land and buildings, 206,852,171 dollars. Gross income, 1932, from crops was 5,200,000 dollars; from livestock, 18,800,000 dollars. Crops include alfalfa (421,000 tons in 1934), sugar beets (434,000 tons), potatoes (1,000,000 bushels), as well as cereals. The wool-clip (1934) yielded 30,732,000 pounds of wool from 3,235,000 sheep. The domestic animals on January 1, 1933, were 154,000 horses, 89,000 milch cows, 906,000 all cattle, 3,893,000 sheep, and 98,000 swine.

In 1932, 4,765,854 acres in the State were national forest land. The State has numerous fish hatcheries and the largest elk herds in the world.

Wyoming is largely a coal-producing State. In 1933 the output of coal was 3,985,000 short tons; petroleum, 11,196,000 barrels; of natural gasoline, 35,273,000 gallons; natural gas (1930), 43,219 million cubic feet. Gold output, 1934, 4,726 ozs. The quarries yield limestone and sandstone, besides phosphate rock. Total mineral products in 1932 was 27,343,288 dollars.

Manufactures are mostly confined to production for local consumption. The 1931 Federal census showed 205 industrial establishments; the wage-

earners numbered 4,808, wages paid amounted to 7,879,166 dollars, the materials, containers, fuel and power used cost 37,255,548 dollars, and the output amounted to 52,743,934 dollars.

In 1932, the steam railways had a length of 2,037 miles. The State highway system comprises 3,231 miles, of which 1,971 miles are surfaced.

On June 30, 1934, Wyoming had 26 licensed national banks with deposits of 31,183,000 dollars and loans and discounts of 12,344,000 dollars; 37 licensed State banks and trust companies had deposits of 12,900,000 dollars and loans and discounts of 7,875,000 dollars.

OUTLYING TERRITORIES.

ALASKA.

Government.—Alaska was purchased by the United States from Russia under the treaty of March 30, 1867, for 7,200,000 dollars, but was not organized until 1884, when it became a "District" governed by the laws of the State of Oregon. By Act of Congress approved August 24, 1912, Alaska became a Territory, with a legislative assembly consisting of 8 senators, elected for 4 years, and 16 representatives, elected for 2 years. Congress reserved to itself the right to legislate on certain subjects, so that the Territory is now governed conjointly by Congress at Washington and by its local legislative assembly. Regular sessions are held biennially and last for 60 days. Special sessions may be called by the Governor. The latter is appointed for four years by the President.

To facilitate administration, Congress in 1927 authorized the appointment of 3 ex-officio Commissioners who enjoy large powers. The Territory is represented in Congress by one Delegate, elected biennially, who sits in the House of Representatives, but has no vote.

Governor.—John W. Troy, 1933-37 (10,000 dollars).
Secretary of Alaska.—Edward W. Griffin.

Area and Population.—The gross area (land and water) of the territory is 586,400 square miles. The census population from 1900 to 1930 is shown as follows:—

Year	Population	Per Sq. Mile	Year	Population	Per Sq. Mile
1900	63,592	0·1	1920	55,036	0·1
1910	64,356	0·1	1930	59,278	0·1

Of the population in 1930, 35,764 were males and 23,514 females; 28,640 were whites and 29,983 were Indians (of whom 19,028 were Eskimos and Aleuts), 26 Chinese, 278 Japanese, and 136 Negroes; 46·8 per cent. of the population was gainfully employed. About 20,000 people, employed in mines, canneries, and railway construction, spend a few months a year in Alaska, but these are not included in the enumeration; of the 28,640 whites, 10,180 are foreign-born.

The largest town is Juneau, the seat of Government, which had (census of 1930) a population of 4,043; the second largest is Ketchikan with a population of 3,796; other towns are Anchorage, 2,277; Fairbanks, 2,101; Petersburg, 1,252; Nome, 1,213 (but almost completely destroyed by fire in September, 1934); Sitka, 1,056; Cordova, 980; Wrangell, 948; Seward, 835; and Douglas, 593. There are altogether 18 incorporated towns. Alaska has one National Park, known as Mt. McKinley, embracing 1,939,493 acres.

Education and Justice.—In Alaska many religious missions are at work, representing the Russian Orthodox, Roman Catholic, Episcopalian, Presbyterian, Methodist, Baptist, Congregational and other denominations.

In 1934 there were 89 territorial white schools with 3,788 enrolled pupils and 169 teachers; 13 four-year high schools are maintained. Total cost of instruction (1933), 595,193 dollars. Percentage of illiterates, 1930, was 20·1; in 1920, 24·8 per cent.; 13·8 per cent. was unable to speak English. The Bureau of Education of the Federal government handles the education, hospitalisation and general care of the native population. There are 99 native schools in operation (219 teachers, 4,358 pupils), 3 industrial schools, 6 hospitals, and 1 medical boat. The Alaska Agricultural College and School of Mines is the only institution offering advanced instruction. For the administration of justice the territory is a judicial district with 4 subdivisions and 4 courts.

Finance.—Federal receipts and expenditures in the territory, administered by the various Federal Departments in Washington in recent years, have been as follows, in dollars:—

	Receipts	Expenditure		Receipts	Expenditure
1927	4,523 405	10,884,513	1929	5,474,888	11,433,967
1928	4,226,832	11,147,773	1930	4,846,276	12,331,647

Territorial receipts (largely from licences to conduct businesses) and expenditures for two bienniums are: 1929–31 (actual), receipts, 2,415,893 dollars; expenditures, 2,468,659 dollars; 1931–33 (estimated), receipts, 1,890,390 dollars; expenditures, 2,572,451 dollars. On January 1, 1934, the Territorial Treasurer had a balance of 381,525 dollars; previous year, 271,433 dollars.

The Territory has no funded debt.

Production and Industry.—In some parts of the territory the climate during the brief summer is not unsuitable for agricultural operations. In 1930, there were 500 farms with a total area of 525,942 acres, of which 8,825 acres was improved land. Total value of land and buildings in 1930 was 2,857,185 dollars. The 1930 census showed 37,287 dogs used as work animals and 463 horses. In Northern and Western Alaska are 200,000 square miles of treeless region worthless for agriculture but capable of furnishing pasturage for 4,000,000 reindeer. There were (in 1932) approximately 711,400 reindeer in the country distributed in 78 herds (of which 59, ranging in size from 200 to 30,000, are owned by natives) and valued at 9,000,000 dollars. During 1932, 246,927 pounds of reindeer, valued at 24,693 dollars, were shipped from Alaska. The Government-owned fur-seal herd of the Pribilof Islands, administered by the Department of Commerce, comprises about 85 per cent. of the fur seals of the world. This herd contained 1,318,568 animals on August 10, 1933; number of skins

shipped to the United States, 1933, 54,550. Proceeds from the sale of these skins are divided among the United States, Great Britain and Japan. About 275 blue fox ranches, stocked with 36,000 blue foxes, represent an investment of 6,850,000 dollars. Value of furs and fur skins (including seal skins) shipped to the United States in 1933, 2,024,514 dollars.

The southern coastal section of Alaska contains large and readily accessible timber resources which maintain a considerable sawmill industry and are capable of supporting an immense pulp and paper development. This timber is largely included in two National Forests aggregating 21,342,474 acres and officially estimated to contain 84,760 million board feet of timber, 74 per cent. western hemlock and 20 per cent. Sitka spruce.

The chief industries of Alaska are salmon fishing and mining. In 1933, all the fisheries of Alaska employed 21,695 persons ; the value of the products, exclusive of aquatic furs, was 32,126,588 dollars ; exports to United States in 1933, 29,563,282 dollars. Salmon canners in 1933 exported to the United States 259,184,164 pounds, valued at 25,620,856 dollars.

Gold is worked in South-East Alaska, where a low-grade ore is found ; in the interior on the Yukon river ; and at Nome and other places on the west coast. Output of gold in 1933 was 457,274 ounces (in 1934, 541,283 ozs.) ; of silver, 155,335 ounces ; and of copper, 1,575,936 pounds. Tin ore deposits near Cape Prince of Wales are of a high grade ; lead, coal, petroleum, marble, gypsum, quicksilver and lode platinum metals are found. Total value of mineral output in 1916, 48,000,000 dollars ; in 1933, 10,366,000 dollars.

Commerce and Communications.—The value of the Territory's commerce for six calendar years was as follows :—

Year	Imports from U.S.	Imports from others	Merchandise Exports to U.S.	Exports, gold and silver to U.S.	Total exports to others
1928	32,037,335	599,498	67,587,207	6,640,127	622,584
1929	33,219,565	1,436,158	63,567,177	7,887,544	607,952
1930	31,303,291	1,741,976	48,996,962	7,842,493	347,691
1931	22,483,601	791,149	43,276,364	9,258,388	315,908
1932	19,573,105	937,133	30,133,355	9,962,894	237,663
1933	20,685,622	131,245	33,131,447	9,899,153	232,978

In the calendar year 1933, 2,293 vessels of 602,724 tons entered the ports of Alaska in domestic and foreign trade, and 2,166 vessels of 594,338 tons cleared. The chief ports of shipment of the United States to Alaska are on Puget Sound.

There is a railway of 112 miles from Skagway to the town of White Horse (in the Canadian Yukon region) ; thence transport is by coach or airplane, or, in summer, by steamer. The Copper River and North Western Railway has completed a line (standard gauge) from Cordova to Kennecott, a distance of 197 miles. The Alaska railroad runs from Seward to Fairbanks, a distance of 467 miles (509 miles with branches). Total mileage, 1930, 914. Six aviation companies maintain services between 68 landing places throughout the year. Alaska (1934) maintains 1,543 miles of wagon roads, 74 miles of tramway, 573 miles of sled roads, and 5,032 miles of trails. The Alaskan towns are connected with the United States and with Canada by telegraph and by radio ; there are 3 broadcasting stations and wireless telephony is being extended. There are about 180 post-offices, and good mail services in the territory.

The territory had, on June 30, 1934, four National Banks with capital of 312,500 dollars, surplus and undivided profits of 252,082 dollars, and

total deposits of 4,374,604 dollars; 11 territorial banks had combined capital of 615,000 dollars and total deposits of 5,957,328 dollars.

British Consul.—At Seattle.

HAWAII.

The Hawaiian Islands lie in the North Pacific Ocean, between 18° 54′ and 22° 15′ north latitude, and 154° 50′ and 160° 30′ west longitude. They are about 2,020 miles south-west of San Francisco, and are in the line of steamer travel between San Francisco and the Orient, Victoria, B.C., Australia and New Zealand.

Government.—The Hawaiian Islands (20 in number and formerly known as the Sandwich Islands), celebrated in August, 1928, the 150th anniversary of their discovery by Captain James Cook, the English navigator. The islands formed during the greater part of the nineteenth century an independent kingdom, but in 1893 the reigning Queen, Liliuokalani (died November 11, 1917), was deposed and a provisional government formed; in 1894, a Republic was proclaimed, and in accordance with the request of the people of Hawaii expressed through the Legislature of the Republic, and a resolution of the United States Congress of July 6, 1898 (signed July 7 by President McKinley), the Islands were on August 12, 1898, formally annexed to the United States. On June 14, 1900, they were constituted as the Territory of Hawaii. The Organic Act has since been amended several times. There is a Legislature of two Houses, a Senate of 15 members elected for four years, and a House of Representatives of 30 members elected for two years. Sessions, limited to 60 days, are held biennially. In 1932 the registered voters numbered 63,831, including 21,582 Hawaiian and part Hawaiian, and 12,934 American. The Governor and Secretary are appointed for four years by the President of the United States.

Governor.—Joseph B. Poindexter (appointed January 20, 1934).
Secretary of the Territory.—Arthur A. Greene.

The Territory is represented in Congress by a delegate elected biennially to the House of Representatives.

Area and Population.—The area of the 8 principal islands is 6,449 square miles with population (census of 1930) of 368,336 (222,640 males and 145,696 females). Estimated population, June 30, 1934, was 378,948,

including 21,796 Hawaiians, 34,419 part-Hawaiians and 148,024 Japanese. The principal islands of the group are Hawaii, 4,015 square miles (population, 1930, 73,325); Maui, 728 (48,756); Oahu, 598 (202,887); Kauai, 547 (35,806); Molokai, 261 (5,032); Lanai, 140 (2,356); Niihau, 97 (136); Kahoolawe, 69 (2). The Capital, Honolulu, on the Island of Oahu, had a census population of 137,582, and Hilo, 19,468. The number of Hawaiians was 22,636, and part-Hawaiians, 28,224. There were 27,179 Chinese, 139,631 Japanese, 27,538 Portuguese, 63,052 Filipinos, 6,671 Porto Ricans, 1,219 Spanish, 44,895 Americans, British, Germans, and Russians, 6,461 Koreans, 780 others.

Religion and Education.—The Hawaiians are Christians. There is an American Protestant Episcopal bishop at Honolulu; also a Roman Catholic bishop, and ministers of various denominations.

Elementary education is free. The language in the schools is English. In 1934 there were 185 public schools with 2,536 teachers and 81,240 enrolled pupils; also 81 private schools with (1933) 550 teachers and 11,812 enrolled pupils. The pupils in public schools in 1934 were classed by ancestry as follows: Hawaiian, 2,833; part-Hawaiian, 8,906; Portuguese, 5,550; other Caucasians, 3,615; Porto Rican, 1,435; Spanish, 246; Filipinos, 4,500; Asiatic, 52,903; others, 1,252. There are a normal and training school, a reformatory industrial school for boys and one for girls, a territorial trade school, a school for the deaf and blind, a school for feeble-minded; also a territorial university (University of Hawaii, Honolulu), founded in 1907, with 117 instructors and 3,073 students in 1932 (including part-time summer session and extension students).

Justice.—Hawaii has a supreme court, circuit courts, a court of domestic relations, district courts, and a land registration court. The circuit judges sit also as juvenile courts. The judges of the supreme and circuit courts are appointed by the United States President; the district magistrates by the Chief Justice of Hawaii. There is also a United States District Court, the judges of which, and the U.S. Marshal, are appointed by the President.

Finance and Defence.—Revenue is derived mainly from taxation of real and personal property, income and inheritance taxes, licences, land sales and leases, waterworks and road, school and poll taxes. For the year ending June 30, 1934, the receipts in the general fund were 10,935,842 dollars and disbursements, 10,832,471 dollars.

On June 30, 1934, the bonded debt amounted to 32,059,000 dollars. In 1933 the assessed value of property was 395,561,897 dollars.

On June 30, 1934, the Hawaiian National Guard contained 1,534 men and 106 officers. The Federal Government, with a view to the protection of the Pacific coast and the control of the Panama Canal, has constructed extensive naval works at Pearl Harbour, about 7 miles from Honolulu, and military works at Honolulu and other places on the island of Oahu.

Production and Commerce.—In 1930, there were 5,955 farms with an acreage of 2,815,026, of which 440,579 acres were improved land. Total value of land and buildings in 1930 was 111,780,432 dollars. Sugar and pineapples are the staple industries, while coffee, hides, bananas, and wool are also exported. For the crop year ending September 30, 1934, the production of raw and refined sugar amounted to 1,035,543 short tons. The pineapple crop in 1934 totalled approximately 9,000,000 cases. The forest reserves in the Territory now number 64, aggregating 1,027,299 acres; public lands, 1,588,490 acres.

For the year ending December 31, 1933, the imports amounted to 63,127,987 dollars, and the exports to 94,317,696 dollars. The shipments of merchandise from the United States to Hawaii for the year ending Dec. 31, 1933, amounted to 57,894,488 dollars, and those from Hawaii to the United States to 93,641,887 dollars, of which 65,495,134 dollars were for sugar, 23,979,253 dollars for pineapples, 536,379 dollars for coffee. The imports from the United Kingdom (Board of Trade figures) in 1933 totalled £12,599, and the exports to the United Kingdom, £55,021.

Shipping and Communications.—Several lines of steamers connect the islands with the mainland of the United States, Canada, Australia, the Philippines, China, and Japan. During the year ending June 30, 1933, 1,156 vessels of 9,961,725 tons entered ports of the islands. An inter-island steam navigation company with 12 steamers provides communication between the different islands. There are about 1,038 miles of railway in the islands, including 667 miles of plantation railways. There are telephones on the islands of Oahu, Maui, Hawaii, Kauai, and Molokai, and a radio-telephone system connecting the four principal islands with the United States. Honolulu is lighted by electricity and has lines of electric tram ways. Wireless telegraphy is in operation between the islands for commercial purposes and for communication with vessels at sea and with the Pacific coast, and also with Japan. Hawaii is connected by cable with both shores of the Pacific. Commercial air services between the islands carried 8,812 passengers in the year ending June 30, 1934.

Thirty-one banks were in operation on June 30, 1934. Total deposits were 75,951,944 dollars, of which 35,082,104 dollars were time or savings deposits. Peak of total deposits was 83,805,596 dollars on June, 30, 1931.

PUERTO RICO.

Government.—Puerto Rico, by the treaty of December 10, 1898 (ratified April 11, 1899), was ceded by Spain to the United States. The name was

changed from Porto Rico to Puerto Rico by an Act of Congress approved May 17, 1932. Its constitution is determined by the 'Organic Act' of Congress (1917), known as the 'Jones Act.' Puerto Rico has representative government, the franchise being restricted to citizens twenty-one years of age or over, residence (one year) and such additional qualifications as may be prescribed by the Legislature of Puerto Rico, but no property qualification may be imposed. The executive power resides in a Governor appointed by the President of the United States. The legislative functions are vested in a Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). Puerto Rico is represented in Congress by a Resident Commissioner to the United States elected by the people for a term of four years.

There are seven heads of departments, who form a Council to the Governor, known as the Executive Council. The judiciary comprises an Attorney General and staff and a United States court appointed by the President; a Supreme Court of 5 members also appointed by the President; 8 District Courts with 11 Judges appointed by the Governor; and 35 municipal courts, the judges and officials of which, as well as the 57 justices of the peace, are appointed by the Governor.

Governor.—Major-General Blanton Winship, U.S.A., assumed office February 5, 1934 (10,000 dollars).

Executive Secretary.—Carlos Gallardo.

Area, Population and Education.—The Island has an area of 3,435 square miles, and a population, according to the census of April 1, 1930, of 1,543,913, or 449·5 per sq. mile. Males numbered 771,761; females, 772,152.

The population in 1930 was distributed as follows:—Native white, 1,141,114; coloured, 397,156; foreign-born white, 5,605; other races, 38. During the decade ending 1930 the white population increased by 20·9 per cent., and the coloured population by 13·1 per cent. Of the working population, 52·4 per cent. were engaged in agriculture, fisheries, and mining; 9·6 per cent. in domestic and personal service; 22·1 per cent. in manufacturing industries; 11·4 per cent. in trade and transportation.

Chief towns, San Juan, 114,715 inhabitants (1930); Ponce, 53,430; Mayaguez, 37,060.

Education was made compulsory in 1899. In 1934, there were 4,577 class-rooms in 2,075 school-buildings, with 239,495 pupils enrolled; and a well-distributed system of night schools. There are also a number of private schools. The University of Puerto Rico, established in Rio Piedras, 7 miles from San Juan, is open to both men and women. In 1930, the percentage of illiteracy was 41·4 of those 10 years of age or older.

Finance.—Receipts and disbursements for the year ending June 30, 1934:—

	Dollars.
Balance, July 1, 1933	601,506
Receipts, 1933–34	15,436,429
Total	16,037,935
Disbursements, 1933–34	15,893,164
Balance, July 1, 1934	144,771

The assessed value of property on June 30, 1934, was 297,119,629 dollars. The total outstanding bonded indebtedness is 27,875,000 dollars.

The police force consists of 816 men, and the National Guard (on June 30, 1934) of 89 officers and 1,410 enlisted men.

Production, Industry and Commerce.—The cultivated land in 1930 was divided into 52,965 holdings; value of land and buildings was 182,112,437 dollars. The chief products of the island are sugar, tobacco, coffee, pineapples, grapefruit, coconuts, honey, oranges, and other tropical fruits, sea island cotton, textile fibres, bat guano, phosphate, and vegetables, and the principal industries are manufactures of cigars, cigarettes, hats, embroideries, Irish linen suits, and the refining of sugar, distilling of alcohol and the canning of fruits and vegetables. The disastrous hurricane of September, 1928, destroyed millions of coffee trees, reducing exports of coffee from 19,354,000 pounds in 1927–28 to 2,969,859 pounds in 1933–34; it also damaged tobacco seed beds, reducing exports of tobacco and manufactures to one-fourth of normal. A second severe hurricane in September, 1932, caused further damage. Exports of tobacco and manufactures in 1933–34 were valued at 7,864,381 dollars. But sugar production flourishes. Sugar crops for three crop years: 1932, 992,335 tons; 1933, 816,337 tons; and 1934, 1,113,822 tons. The 1935 crop is limited to 744,000 tons. Raw sugar exported in 1933–34 amounted to 700,584 tons, valued at 44,443,769 dollars. Exports of refined sugar, 1933–34, amounted to 118,319 tons, valued at 9,823,272 dollars. In 1933–34 exports of fresh pineapples amounted to 1,056,673 dollars.

Gold, silver, iron, copper, bismuth, tin, mercury, platinum and nickel are found in the island, but the only established mining industry is that for manganese ore; exports, 1933–34, 1,961 tons (manganese content, 950 tons) valued at 80,900 dollars. Gold output, 1932, 229,728 ounces, valued at 4,748,900 dollars. There are very productive salt works.

In the fiscal year ending June 30, 1934, imports into Puerto Rico amounted to 63,924,883 dollars (United States merchandise amounting to 57,503,315 dollars); exports were valued at 85,971,974 dollars (83,214,473 dollars to the United States). Imports from the United Kingdom (Board of Trade figures) for calendar year 1933, £110,231; exports to United Kingdom, £72,255.

Shipping and Communications.—In 1933–34, 1,628 American and foreign vessels of 2,713,833 gross tons entered and cleared Puerto Rico from the United States and foreign countries.

There are 1,143 miles of road in the island, and about 307 miles of railway. The railway system connects towns on the west coast and now almost encircles the island, and penetrates the interior. There are 33,531 miles of telephone, and 1,077 miles of telegraph wire. There are 97 post offices, 85 telegraph stations and six wireless stations.

The Puerto Rican island of Vieques, 13 miles to the east, is about 21 miles long and 6 miles broad, and has 10,582 inhabitants, who grow sugar and rear cattle. The island is fertile and healthy. The island of Culebra, between Puerto Rico and St. Thomas, has a good harbour.

VIRGIN ISLANDS OF THE UNITED STATES.

Government.—The Virgin Islands of the United States, formerly known as the Danish West Indies, were purchased by the United States from Denmark, for 25,000,000 dollars, in a treaty ratified by both nations and proclaimed January 25, 1917. Under an Act of Congress, approved March 3, 1917, known as the Organic Act, all military, civil, and judicial powers were vested in a Governor, appointed by the President of the United States, with the advice of the Senate; the Danish code of laws, dated April 6, 1906 (along with Tax and Customs laws) was continued in effect except where incompatible with the new sovereignty. Danish citizens residing in the islands were permitted to declare their Danish citizenship before a court of record; failing to do that, they were held to have accepted citizenship in the United States. On February 25, 1927, full American citizenship was granted to the natives resident in the islands, and on June 28, 1932, to those natives residing elsewhere in American territory. St. Thomas is the capital.

The islands comprise two municipalities, viz.: the Municipality of St. Thomas and St. John, and the Municipality of St. Croix. The legislative functions are vested in the Colonial Council of each Municipality, that of St. Croix being composed of 13 members elected by popular elections and of 5 members appointed by the Governor; and that of St. Thomas and St. John consisting of 11 elected members and 4 appointed by the Governor. The members serve for 4 years. The franchise is vested in every man of unblemished character who has resided in the islands for 5 years, who has attained the age of 25 years, and has an income of at least 300 dollars a year. The Government is now strictly civil, having been transferred in 1931 from the U.S. Navy Department to the Department of the Interior.

There are six heads of Departments, who form the Governor's cabinet. There is one Judge of the District Court for the Virgin Islands, and four Police Courts, presided over by magistrates.

Governor.—Paul M. Pearson, assumed office March 18, 1931.
Government Secretary.—Robert Herrick.

Area, Population and Education.—The Virgin Islands group, lying about 60 miles due east of Porto Rico, between the Atlantic Ocean and Caribbean Sea, comprises the Islands of St. Thomas (32 square miles), St. Croix (82 square miles), St. John (19 square miles), and about 50 small islets or kays, mostly uninhabited and unnamed. The total area of the three principal islands is 133 square miles.

The population, according to the census of April 1, 1930, is 22,012, com-

pared with 26,051 in 1917, a decrease of 4,039 or 15·5 per cent. Population has slowly declined since 1835 when it stood at 43,178. Of the present total, 61·3 per cent. is urban, 9·1 per cent. is white, 78·3 per cent. Negro and 12·4 per cent. mixed; 16·1 per cent. are illiterates. The populations of each of the islands are 9,834, 11,413, and 765. The islands contain 3 towns, St. Thomas (formerly Charlotte Amalie), on the island of St. Thomas, with a population of 7,036; and Christiansted and Frederiksted, on the island of St. Croix, with populations of 3,767 and 2,698 respectively. Education is compulsory. In St. Thomas there are 9 public and 5 private and parochial schools, 2,376 pupils and 74 teachers; and in St. John there are 5 public schools with an enrolment of 143 pupils and 7 teachers. In St. Croix there are 10 public schools and 4 private and parochial schools; total enrolment, 2,243 with 72 teachers. There are churches of the Protestant, Roman Catholic, and Jewish faiths in St. Thomas and St. Croix.

Finance.—Revenues are derived from customs, export tax on sugar, income tax, real and personal property tax, trade tax, pilotage charges, &c. Estimated revenue for fiscal year ending June 30, 1933: 1,100,845 francs. Expenditures are estimated at 2,244,783 francs (1 franc = 19¼ cents, U.S.). The annual deficit in the operation of the government is met by appropriations by the Congress of the United States.

Production and Industry.—The census of 1930 shows 193 farms in St. Croix, 81 in St. Thomas and 55 in St. John, a total of 329; value of land and buildings was 2,400,711 dollars. St. Thomas is the leading port in the Virgin Islands with coaling and oil-fuelling stations. The Island of St. John is noted for its bay oil, extracted from the leaves of the bay tree, and St. Thomas for the finished product of bay rum. Production of St. Croix rum was resumed with the repeal of Prohibition in the United States. Exports in 1931–32, 69,000 gallons compared with the average annual export, 1920–29, of 82,000 gallons. St. Croix is the largest and most fertile of the islands, and its industries are mainly sugar cane (output, 4,500 tons in 1933) and cattle-raising, the latter utilising 80 per cent. of the land. Tomato-growing for New York winter markets is profitable.

Total exports in the fiscal year 1932–33 were 597,146 dollars; imports, foreign and domestic, 1,350,319 dollars. Exports to United Kingdom (Board of Trade figures) for 1933, 703*l.*; imports from United Kingdom, 55,271*l.*

Communication.—The Bermuda and West Indies Steamship Co., Ltd., maintains regular bi-weekly passenger and freight services from New York to St. Thomas, St. Croix and lower islands. The Ocean Dominion Steamship Co. operates a monthly service from New York to St. Thomas, St. Croix and Leeward Islands. Several companies operate regular service from New York to San Juan, Puerto Rico, whence frequent steamer service may be had to ports in the Virgin Islands. There is a weekly air-mail service with continental United States. There is a powerful radio station at St. Thomas and cable offices in St. Thomas and St. Croix.

Money and Banking.—United States currency became legal tender on July 1, 1934, succeeding that formerly issued by the National Bank of the Danish West Indies in the form of the franc valued at 19·3 cents United States money; the dollar (U.S.) is worth 1·04 Danish West Indian dollars. The United States Government is retiring the Danish West Indies currency. The charter of the National Bank of the Danish West Indies expired in

July, 1934. The bank has its head office in St. Thomas, with a branch in Christiansted and one in Frederiksted. Efforts to establish an American bank are being made.

PHILIPPINE ISLANDS.

These islands, ceded by Spain to the United States by the treaty of peace concluded between the United States and Spain on April 11, 1899, form the largest island group of the Malay Archipelago, and extend almost due north and south from Formosa to Borneo and the Moluccas, embracing an extent of 16° of latitude and 9° of longitude.

Governor-General.—Frank Murphy, assumed office June 15, 1933.

Government.—The Governor-General is appointed by the President of the United States, with the consent of the Senate. Under him are the secretaries of seven executive departments, who, with the exception of the Vice-Governor (appointed by the President) who acts as Secretary of Public Instruction, must all be Filipinos. The Governor-General may veto any appropriation Bill; if passed again over his veto, the bill goes to the President of the United States for final action. Congress has power to annul any Act of the Legislature, but has never exercised it.

The legislature consists of the Senate (24 members) and the House of Representatives (with 96 members). All are elected by popular vote, with the exception of nine representatives and two senators, who are appointed by the Governor-General to represent certain districts. Suffrage is enjoyed by all males 21 years of age or older who formerly exercised the right or, failing that, have property of at least 500 pesos value, or can read or write Spanish, English, or a native language. Payment of a poll tax of 1 dollar is required. Women 21 years of age or over were enfranchised by a law adopted in November, 1933, to take effect January 1, 1935. They are exempt from the poll tax. Registered voters (1931) number 1,489,693.

Congress on January 17, 1933, passed over the President's veto the Philippine Independence Bill, submitting to a referendum of the Philippine voters (within 2 years) a proposal for independence, effective 10 years thereafter on lines laid down by Congress. But the Philippine legislature rejected the Bill. [For details of it see THE STATESMAN'S YEAR-BOOK, 1933, p. 628.] On March 24, 1934, Congress enacted the Tydings-McDuffie Law, which was free from various features to which the Philippine Legislature had objected, and the latter accepted it on May 1, 1934, and in January, 1935, a convention in the Philippines drafted the constitution of the 'Philippine Commonwealth,' to provide for the government of the Islands during the 10 years period. This must be approved by the President of the United States and ratified at a plebiscite.

The provincial and municipal governments are directly supervised by the Department of the Interior, except the specially organized provinces and municipalities, which are supervised by it through the Bureau of Non-Christian Tribes. Each province has a provincial governor and a provincial board, usually filled by popular vote. Each town or municipality has a president and a municipal council of from four to eight councillors, elected by popular vote except in some special instances. On December 31, 1933, there were 370 Americans and 20,725 Filipinos in Government civil service.

Area and Population.—The group is composed of 7,083 islands and islets, of which only 466 have areas of one square mile or over. Total area, 114,400 square miles. The eleven most important islands with their areas are: Luzon, 40,814 square miles; Mindanao, 36,906; Samar, 5,124; Negros, 4,903; Palawan, 4,500; Panay, 4,448; Mindoro, 3,794; Leyte, 2,799; Cebu, 1,695; Bohol, 1,534; and Masbate, 1,255 square miles.

The total population was estimated in 1931 at 12,420,927 and in 1934 at 13,055,220 or 114 per square mile. Philippine Census of 1918 gave 10,314,310, chiefly of Malay race, 91 per cent. of whom are Christians, and only 932,953, or 9 per cent., are Moros and Pagans, though these are fast taking advantage of the all-pervading system of public schools. About 1,500,000 have some knowledge of English and about 660,000 some knowledge of Spanish; for Government and commercial purposes these two languages are used. The population of Manila, the capital and the leading commercial and industrial centre, was estimated in June, 1932, at 341,034.

Other towns with their estimated present population, including suburbs, are: Iloilo on Panay, 43,913; Cebu on Cebu, 79,008; Legaspi (formerly Albay), 34,560; Laoag, 42,046; Vigan, 19,285 (all on Luzon); and Zamboanga on Mindanao, 24,548. Baguio, in the Mountain Province, is the summer capital, corresponding to Simla in India, and has a population of 9,472.

Justice and Defence.—The judiciary consists of a supreme court, with a chief justice (a Filipino) and 10 associate justices (4 Filipinos); 27 judicial districts, each with a judge of first instance, except 12 districts which have 2 judges each, and one, covering the city of Manila, which has 5 judges. In addition there are 8 judges-at-large of first instance. There are justices of the peace for the various municipalities and municipal districts. Manila has a municipal court of 3 judges.

Public order is maintained through the municipal police and the Philippine Constabulary, latter consisting of 394 officers (13 Americans) and 4,839 enlisted men, distributed at 117 stations throughout the Archipelago. Expenditures on the Constabulary totalled 2,055,112 dollars in 1933. The United States maintains a force of about 11,000 troops of the United States Army, including 6 regiments of Filipino soldiers.

Religion.—The dominant religion of the islands is the Roman Catholic (9,925,479 adherents). In 1902, an independent Filipino Church was founded which adheres to modern science, proclaims that science is superior to Biblical tradition, denies the possibility of miracles, and conceives God as an invisible Father with one essence and a single person. The ritual resembles somewhat that of the Roman Church. Latin was originally prescribed, but the Spanish language is now the official tongue, and encouragement is given to the vernacular dialects. Marriage is allowed to its apostles. According to the Government Census of 1918, the Independent Filipino Church had 1,417,448 followers, but in the last Church Census its followers numbered 4,000,000. Several Protestant denominations have extensive organisations and probably more than 150,000 communicants. Some of them co-operate in maintaining a Union Theological Seminary, the Philippine Council of Religious Education, and a National Christian Council, which forwards reform movements, evangelistic campaigns, etc. The Buddhist religion is professed by 24,263 men and women, while the Mahommedans number 443,037, and are chiefly to be found in the districts of Mindanao and Sulu.

Education.—Education in the public schools of the Philippines is free, secular, and co-educational, its principal aim being the spread of literacy on

the basis of a common language, English. In 1933–34, there was an enrolment of 1,173,735 pupils (35·0 per cent. of those of school age) in the 7,671 public schools, with 188 American and 26,769 Filipino teachers. The expenditure on public-school education for 1931 was 17,027,378 dollars (insular only, excluding provincial and municipal). There are a number of special schools, including the Philippine Normal School, and 7 provincial normal schools; the Philippine School of Arts and Trades, and 27 provincial trade schools; the Central Luzon Agricultural School and 26 provincial agricultural schools, together with some 179 farm settlement schools. For higher education there is the State-supported University of the Philippines, with 499 professors, 1932, and 7,597 students; and 35 accredited private institutions of higher learning—among them the University of Sto. Tomas, founded in 1611, the oldest university under the American flag—giving collegiate instruction in liberal arts, sciences and in professional courses. There are in all 404 separate private schools of all grades of instruction accredited by the Government. The total enrolment in these approved private schools and colleges in 1934 was over 96,000, and the total number of instructors and teachers was about 3,749.

There are 195 newspapers and periodicals published in English and other languages.

Finance.—The revenues and expenditures of the central government for five fiscal years were:—

—	1930–31	1931–32[1]	1932–33[1]	1933–34[1]	1934–35[1]
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenues	34,712,795	29,919,888	24,000,000	26,320,000	27,508,495
Expenditure . . .	38,320,732	32,845,225	27,277,346	26,320,000	26,998,725

[1] Estimates.

The total bonded debt on June 30, 1933, amounted to 87,182,500 dollars, including provinces and municipalities. Sinking fund, 34,541,367 dollars.

Production and Industry.—The areas of uncultivated land are very considerable. The Archipelago has a total area of 73,214,700 acres, of which 39,657,600 acres or 54 per cent., are suitable for cultivation; only 15,557,800 acres, or 21·0 per cent., were cultivated in 1932. The principal products are rough rice ('palay'), Manila hemp ('abacá'), largely produced and controlled by the Japanese, coconut, sugar cane, corn, tobacco and maguey. There are 46 sugar centrals; output in 1933–34, 1,580,433 short tons. A law adopted November, 1933, restricts annual production for 3 years beginning 1932–33 to 1,400,000 short tons of raw sugar and 80,000 tons of refined sugar. In 1933 the United States took all the sugar exported, 1,078,652 metric tons. Tobacco output in 1933 was about 42 million kilos, of which half was exported in manufactured form. The principal fruit is the banana; there are also mangoes, papaya, anonas, pilinut (*Canarium commune*), and mandarin and oranges. Production of cleaned rice in 1933 was 1,363,525 metric tons. The cultivation of rubber is increasing yearly, especially in the southern provinces where the large plantations are located; output, 1933, 258 tons. About 96 per cent. of the total cultivated area is owned by Filipinos whose farms average 3 acres.

In the production of copra and coconut oil the Islands are classed among the foremost countries in the world. During the year 1933, there were exported 408,670 metric tons of copra and copra cake, and 159,621 tons of coconut oil.

The live-stock industry is increasing steadily. On December 31, 1932, there were: 2,192,904 carabaos (water buffaloes); 1,320,970 cattle; 337,669 horses and mules; 2,594,620 hogs.

The commercial forests furnish chiefly cabinet and construction timber, but also gums and resins, vegetable oils, rattan and bamboo, tan and dye barks and dye woods. About 97·5 per cent. of this belongs to the Government. Exports of logs and sawn timber, 1932, totalled 50,595,904 board feet.

Gold is the principal mineral produced in commercial quantities, chiefly from the Baguio district. Output in 1933, 296,298 ounces valued at 8,095,397 dollars. Some silver and a small amount of platinum are recovered from the gold mining operations. Chromite has been discovered in Zambales and Paugasinam. The small iron production is consumed entirely in the manufacture of native agricultural implements. Two cement factories have a combined output of 600,000 barrels a year. The total value of mineral production in 1932 was 18,500,000 dollars.

Manufacturing is largely carried on in homes or in small factories; the principal exceptions are 45 sugar centrals, 3 sugar refineries, 9 chocolate and coffee factories, 9 coconut oil mills, 5 desiccated cocoa factories and 30 large cigar and cigarette factories.

Total value of production, 1932, is estimated at 1,082,866,080 pesos, including manufactured goods, 393,957,650 pesos; agriculture, 301,164,930 pesos; fishing, 200,000,000 pesos; lumber, 150,000,000 pesos; and live-stock, 19,293,800 pesos.

Commerce.—Free trade nominally exists between the United States and the Philippines, but the American Congress has placed a tariff of about 20 per cent. on foreign imports into the Philippines, and the Tydings–McDuffie Independence Act of 1934 restricts by quotas the export of sugar, copra and hemp to the United States and places a gradually increasing American duty upon them. The values of imports and exports for recent calendar years are stated as follows in U.S. dollars (50 cents U.S. currency = 1 peso):—

	1929	1930	1931	1932	1933	1934
Imports	147,160,275	123,092,954	99,178,719	79,395,085	74,680,761	83,607,000
Exports	164,446,843	133,167,128	103,972,074	95,338,081	105,771,052	110,403,500

In the calendar year 1933, the commerce was distributed principally as follows (in Philippine pesos, 1 peso = 50 cents U.S. currency):—

Countries	Imports	Exports	Countries	Imports	Exports
	Pesos	Pesos		Pesos	Pesos
United States	87,080,813	182,626,053	France	1,191,932	4,295,839
Hawaii	489,288	581,911	Belgium	1,550,302	649,134
Japan	19,190,666	5,921,782	Italy	214,671	748,371
Great Britain and Ireland	5,361,265	3,716,213	Switzerland	1,139,354	6,465
China	10,292,090	1,684,343	Netherlands	1,288,306	842,664
Germany	5,489,948	1,854,289	French E. Indies	1,444,371	136,847
Spain	1,099,144	4,419,367	Australia	3,254,910	288,293
Dutch E. Indies	2,600,317	223,561	Japanese China	868,580	35,738
British E. Indies	3,715,508	452,347	Hong Kong	358,221	682,468
			Canada	679,213	456,334

The principal articles of commerce in the calendar years 1932 and 1933 were:—

Imports			Exports		
Articles	1932	1933	Articles	1932	1933
	Pesos	Pesos		Pesos	Pesos
Cotton goods	33,523,243	31,157,651	Sugar	119,603,769	128,666,851
Iron and steel manufactures	19,977,574	17,891,509	Coconut oil	15,302,287	18,339,645
Meat and dairy products	8,128,254	7,622,467	Hemp	10,031,204	13,747,719
Wheat flour	4,903,878	4,770,990	Copra	10,266,454	17,912,057
Automobiles, and parts of	6,623,963	5,446,664	Tobacco products	12,800,118	10,225,787
Naphthas, and all lighter products of distillation	5,831,565	4,929,147	Embroideries	6,699,649	3,798,631
Paper and its manufactures	5,529,333	4,860,537	Desiccated and shredded coconuts	3,233,402	3,365,609
Silk goods	4,901,256	4,770,357	Lumber	1,679,450	2,537,214
Illuminating oil	2,272,457	2,053,4[illegible]3	Hats	1,187,180	1,532,111
Tobacco, and its manufactures	5,386,143	4,234,596	Maguey	279,904	397,678

Exports to United Kingdom (Board of Trade figures) for calendar year 1934, £733,052; imports from United Kingdom, £385,729; re-exports to Philippine Islands from U.K., £7,530.

Shipping and Communications.—The overseas trade of the Philippine Islands during 1933, was carried mainly by 497 American vessels aggregating 2,647,471 net tons, 914 British with 3,588,478 net tons, 535 Japanese with 1,921,673 net tons, and 327 Dutch with 1,279,224 tons. The coastwise trade of the islands is carried exclusively by domestic vessels.

On January 1, 1934, there were in operation, 988 post-offices, 643 money-order offices, 8,624 miles of insular telegraph lines, and 462 miles of cable, with 520 telegraph offices, including 85 radio stations, with 488 combined telephone-telegraph stations; there were 983 postal savings banks in operation, with 320,032 accounts, amounting to 5,708,540 pesos (Philippine currency).

When the United States entered the islands in 1898 there was but a single line of narrow gauge track running between Manila and Dagupan, a distance of about 120 miles. At the end of 1931, the Manila Railroad Co. had 705 miles on Luzon, and the Philippine Railroad Co. had 132 miles on Panay and Cebu. The Government has taken over the former of these companies. Total railway mileage, about 837. Total length of roads, 9,453 miles of which 5,284 miles are first-class, 2,865 second-class and remainder third-class. January 1, 1934, there were 24,865 motor cars and 15,237 trucks registered.

Banking and Coinage.—There are ten banks doing business in the Islands. Four are foreign: the National City Bank of New York, the Hong-Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia, and China and the Yokohama Specie Bank. Combined resources of all banks on December 31, 1933, was 130,393,000 dollars; capital and surplus, 17,186,000 dollars. The Philippine National Bank was inaugurated, under a special charter granted by the Philippine Legislature, on May 2, 1916. On December 31, 1933, the bank had a capital of 10,000,000 pesos; surplus

and undivided profits of 6,470,407 pesos; reserves, 6,469,168 pesos; deposits, 56,646,487 pesos. The Government has now purchased almost all the privately-owned shares of stock of the bank and guarantees the final redemption and payment of the circulating notes of the institution. Since July 1, 1916, the Bank has been the sole Government depository. This bank and the Bank of the Philippine Islands, founded 1852, are the only ones that have the privilege of issuing notes.

The Philippines is on the gold-exchange standard, except as modified by the currency legislation adopted by the United States in 1933 and 1934.

The Philippine peso is equivalent to fifty cents of the United States money. The maintenance of the parity of the peso with gold is provided for by the Gold Standard Fund Act of June 13, 1922. The peso contains twenty grammes of silver, 800 fine. The coins used in the Philippine Islands are of the following decimal denominations: Peso, one-half peso, peseta (20 centavos), media peseta (10 centavos), all in silver; five centavo, in cupro-nickel; and one centavo, in bronze. Treasury certificates and bank notes are issued in one, two, five, ten, twenty, fifty, one-hundred, two-hundred, and five-hundred peso denominations. The Philippine coins are now coined at the Mint in Manila. Gold coins of the United States are legal tender for all debts, public and private, unless otherwise provided in the contract.

GUAM

The Island of Guam, situated at the southern extremity of the Mariana Archipelago, in latitude 13° 26′ N., longitude 144° 43′ E., is the largest island of that group. It was ceded by Spain to the United States by the Treaty of Paris (December 10, 1898). It is a Naval Station and saluting port under the jurisdiction of the Navy Department of the United States. A garrison of marines and a shore naval force are maintained here.

The length of the island is 32 miles, the breadth from 4 to 10 miles, and the area 206 square miles. Agaña, the seat of Government, is about eight miles from the anchorage in Apra Harbour. The port of entry is Piti. The number of inhabitants (including the military establishment and non-native residents) on June 30, 1934, was 20,391, of whom 18,994 were classed as 'natives.' The census of April 1, 1930, showed a population of 18,509. The native language is Chamorro, but Spanish and English are also spoken. English is the official language.

The Governor of the island, a naval officer appointed by the President, takes precedence over and is entitled to the honours due to an Admiral. The Governor is also the Military Commander of the island, Commandant of the naval station, and combines the functions of the executive, legislative and judicial power of the Government. The judiciary system comprises one Court of Appeal, an Island Court, a Justice Court and a police court.

Elementary education is compulsory. There are 4,085 pupils registered. English, handicrafts and agriculture are taught.

There is a Government radio station on the island, which is also in cable telegraphic communication with all parts of the world. There is an irregular mail service per westbound U.S. army and navy transports, from San Francisco, via Honolulu, and to Manila.

A line of commercial steamers, with scheduled sailings from San Francisco every 90 days, stops at Guam westbound en route to Manila. The station ship makes about four trips a year to Manila, China, and Japan for freight and coal.

The port is closed to foreign vessels of war and commerce except in

special cases. Permission to visit the island must be obtained of the Navy Department in each case.

The products of the island are maize, copra, rice, sweet potatoes, coffee, alligator pears, and sugar, besides valuable timber. Copra (exports, 1933–34, 1,774 tons) and coconut oil are the principal exports. There are 6,209 head of cattle, including 300 water buffaloes. The imports into the island in the year ending June 30, 1934, amounted to 345,943 dollars, and the exports to 44,454 dollars.

The official currency is that of the United States.

Governor.—George A. Alexander, Captain U.S. Navy (appointed June 21, 1933).

SAMOAN ISLANDS.

(American Samoa.)

The history of American Samoa commenced in the year 1872, when the harbour of Pagopago, in Tutuila, was ceded to the United States for a naval and coaling station. In 1878 rights of freedom of trade and extra-territorial jurisdiction in Samoa were granted. On June 14, 1889, a treaty between the United States, Germany, and Great Britain proclaimed the Samoan Islands neutral territory, with an independent government, the natives being allowed to follow their own laws and customs, while for civil and criminal causes involving foreigners a Supreme Court of Justice, with an American citizen as presiding judge, was established. This arrangement continued till 1899, when owing to disturbances, the kingship was abolished, and, by the Tripartite Treaty of November 14 of that year, Great Britain and Germany renounced in favour of the United States all rights over the islands of the Samoan group east of 171 degrees of longitude west of Greenwich, the islands to the west of that meridian being assigned to Germany.

The total area of American Samoa is 76 square miles and according to the 1930 census, contained 10,055 inhabitants. The Island of Tutuila 70 miles from Apia, has an area of about 40·2 square miles, with a population of 7,809 (including the island of Aunu'u) according to the 1930 census. Ta'u has an area of 14 square miles, and the other islets (Ofu and Olosega) of the Manu'a group have an area of about 4 square miles with a population of 2,147. Swain's Island, annexed in 1925, is from a mile and a half to two miles in diameter. Population (1930) is 99. The harbour at Pagopago, which penetrates the south coast like a fiord, is the only good harbour in Samoa. It is a United States naval station.

The Commandant is also the Governor of American Samoa by commission from the President of the United States. He appoints officers and frames laws or ordinances, but native customs (not inconsistent with United States laws) are not changed without the consent of the people.

The islands are organised in three political divisions corresponding to the old Samoan political units. In each District there is a Native Governor, County Chiefs and Village Chiefs. All of these officials are appointed by governmental authority although the District Governor has indirect control of the County Chiefs, and the County Chiefs of the Village Chiefs. Judicial power is vested in village courts, in six judicial district courts, and in a High Court. There is a native guard (known as the Fitafitas) of 76.

There are no public lands in American Samoa. Nearly all the land is

owned by natives. The soil is fertile; the fruits comprise orange, lime, banana, mangoes and alligator pears. Copra of excellent quality is abundant.

The Government (1933) maintains 20 public schools, giving every child over 6 years of age the opportunity of an elementary English education: 2,186 pupils are enrolled. All private schools must teach English a percentage of the time. There are five parochial schools under missionary auspices having, in all, 8 white and 9 Samoan teachers and about 480 children of all ages; instruction is chiefly in Samoan.

The native taxes, both poll and school, are fixed by the Fono, Advisory Council to the Governor, in November, payable before the following June 30. The average annual output of copra is between 1,000 and 1,500 tons. The chief island products, besides copra, are taro, breadfruit, yams, coconuts, pine-apples, oranges, and bananas. Chief exports are copra, reed mats and curios. Imports: 1933, 127,613 dollars; exports: 22,218 dollars.

About 30 miles of public roads have been constructed. There is a United States Naval high-powered radio station (open to commercial traffic) on Tutuila, which reaches New Zealand, Australia, Honolulu, the United States, and the islands of the Pacific. The fast mail steamers of the Matson Navigation Company touch here on their regular trips between the United States, Hawaii, Fiji, New Zealand and Australia.

ABYSSINIA.

(ETHIOPIA.)

THE ancient Empire of Abyssinia, or 'Ethiopia,' includes the former Kingdoms of Tigré, in the north-east; Amhara and Gojjam, in the centre, and Shoa in the south; together with the modern acquisitions to the south, Harrar, and the Galla, Shankalla and Dankali territories. The following are the principal provinces into which the country is divided: Tigré, Southern Tigré (Agamie), Wolkaït-Simyen, Kwara-Begemdir-Lasta, Wollo-Shoa-Danakil, Agaumedir, Gojjam, Salale, Beni-Shangul, Nekempti-Leka-Sibu, Gurage, Arussi, Harar, Bali, Jimma, Kambata, Ilu Baboor (Gore) Sayo, Gimira, Wallega, Kaffa-Maji, Bako-Gofa, Wallamo, Sidamo-Borana. The whole area is 350,000 sq. miles. For treaties relating to the boundaries of Abyssinia *see* THE STATESMAN'S YEAR-BOOK for 1907, p. 667, and for 1923, p. 677.

By the convention of Addis Ababa of October 26, 1896, between Italy and King Menelik, the independence of Abyssinia was recognized.

Under an Agreement signed December 13, 1906, on behalf of Great Britain, France, and Italy, the three Powers undertake to respect and endeavour to preserve the integrity of Abyssinia; to act so that industrial concessions granted in the interest of one of them may not injure the others; to abstain from intervention in Abyssinian internal affairs; to concert together for the safeguarding of their respective interests in territories bordering on Abyssinia; and they make agreements concerning railway construction in Abyssinia and equal treatment in trade and transit for their nationals. By an exchange of Notes dated December 14–20, 1925, Great Britain and Italy more specifically defined their respective spheres of interest in Abyssinia, as indicated in the above agreement; in particular Italy recognised the exclusive right of Great Britain to deal with the waters of Lake Tsana, while Great Britain agreed not to oppose any Italian scheme for railway development in the hinterland of Eritrea or Italian Somaliland, which may affect Abyssinia.

On August 2, 1928, Italy and Abyssinia signed a treaty of friendship and arbitration (the first of the kind ever made by Abyssinia), providing for arbitration in all disputes for a period of 20 years. A further agreement was signed at the same time whereby Abyssinia was granted a free zone at the port of Assab in Eritrea; provision was also made for the construction of a motor road from that port to Dessie in Abyssinia.

Government.

Emperor.—**Haile Silassie I.**, born July 17, 1891; crowned King (Negus) on October 7, 1928, proclaimed Emperor, after the death of the Empress Zauditu, on April 3, 1930, and crowned Emperor, November 2, 1930. Married Waizeru Menen in 1912, and has 3 sons and 3 daughters. On January 25, 1931, the eldest son, Asfaou Wosan was proclaimed Crown Prince and heir to the throne; he was married on May 9, 1932, to the daughter of Ras Sayoum.

After the overthrow of the Emperor Theodore by the British in 1868, the suzerain power passed to Prince Kassai of Tigré, who assumed the old title of Negusa Nagast ('King of Kings'), and was crowned in 1872 as John IV., Emperor of Ethiopia. After the death of this potentate in 1889, Menelik II., King of Shoa (born 1844), became the supreme ruler of Abyssinia.

Menelik died in December, 1913, and was succeeded by Lij Yasu, born in 1896, son of his second daughter, Waizeru Shoaragga and Ras Mikael, the chief of the Wollo Gallas.

On September 27, 1916, Lij Yasu was deposed by public proclamation, and Zauditu, another daughter of Menelik, was nominated Empress and 'Queen of Kings of Ethiopia,' and Ras Taffari, son of Ras Makonnen, and great-nephew of Menelik, proclaimed heir to the throne.

On July 16, 1931, a constitution was proclaimed. This provides for a unified state under the government of the Emperor advised by two nominated chambers. All are equal before the law and succession to the Throne is reserved to the present dynasty. The first Parliament was opened on November 2, 1934.

Abyssinia was admitted into the League of Nations on September 28, 1923.

Population.

No reliable figures of population exist, but recent estimates indicate a figure of about 5,500,000. The Abyssinians, properly so called, number rather less than 3 millions, and inhabit the provinces of Tigré, Amhara, Gojjam, and Shoa (in part), covering an area of over one-third of the whole country. They are Christians, and are of Hamitic origin, semiticized by waves of Semitic invasion from Arabia and adulterated by intermarriage with Negro and other conquered races. The Gallas, some of whom are Christian, some Moslem, and some Pagan, comprise more than two-thirds of the entire population, and are a pastoral and agricultural people of Hamitic origin. Ogaden, Issa and other Somalis inhabit Harrar, the Somaliland plateau, and the south-east. The Danakil are Mohammedans, and are still somewhat turbulent. There are also Negroes (in the South-West), and the Falashas (of Jewish religion), in the N.-E. centre with a growing number of foreigners (Indians, Arabs, Armenians, Europeans) in the towns.

There are few towns in Abyssinia in our sense of the word—Addis Ababa, Dire Dawa and Harrar being the most important. Addis Ababa, the capital, has 60,000 to 70,000 inhabitants with a foreign population of several thousands, of whom the majority are British Indian and British Arab subjects, Greeks and Armenians. Dire Dawa contains about 30,000 people, of whom about 300 are Europeans, and the old walled city of Harar has a population of about 40,000, with about 100 foreigners, mostly Indians and Arabs. Other important towns, politically or commercially, are: Debra Markos, capital of Gojjam, 5,000; Gondar, capital of Amhara, 3,000; Adua, capital of Tigré, 5,000; Axum, ancient capital of Ethiopia, 5,000; Antalo, former capital of Tigré, 1,000; Ankober, former capital of Shoa, 2,000; Debra-Tabor and Makallé; Gore, Saiyu, Nekemti, Sameré, 3,000–4,000, and Sokoto, 1,500, important trading centres. Gambeila, in Western Abyssinia, is a trading station leased to the Sudan Government. It is an important outlet for the trade in the West. A service of steamers is maintained from June to November with Khartum.

Domestic slavery is a recognized institution, but slave trading, by an ancient law renewed by a decree issued in June, 1923, is punishable by death. A comprehensive edict of 45 clauses was issued in March, 1924, providing for the gradual emancipation of slaves, beginning with the children born of slaves. In July, 1931, a further edict was published whereby *inter alia* slaves regain their freedom immediately on the death of their master. In August, 1932, a new Slavery Department, independent of the Ministry of the Interior, was constituted by decree.

Religion and Education.

Since the conversion of the Abyssinians to Christianity in the fourth century they have retained their connection with the Alexandrian Church through the Abuna, or head bishop, who is always a Copt, and who is appointed and consecrated by the Coptic Patriarch of Alexandria. Under the Abuna is the Itchege, a native ecclesiastical dignitary, who presides over the spirituality, numbering about 100,000 ecclesiastics. In addition to the Itchege, who was consecrated bishop in January, 1930, there are four other Abyssinian bishops, who were consecrated as such by the Coptic Patriarch in 1929. Their consecration was a great innovation, as hitherto no Abyssinian priest had been consecrated a bishop. The priestly class is very numerous and the Church holds a considerable proportion of the land. Both Copts and Abyssinians are monophysite, rejecting the decrees of the Council of Chalcedon (A.D. 451).

Education is mostly in the hands of the priests and monks, but a number of secular schools have been founded in recent years. There are 4 at Addis Ababa, 2 at Harar, and others at Jijiga, Gore, Sidamo, and Dessie. In addition, a few foreign missions, Swedish, American, French, Italian, German and British, carry on a limited amount of educational work. The Greeks and Armenians have their own schools.

Justice.

Justice is administered by the provincial governors, and *shums*, or petty chiefs, with the right of appeal to the Emperor. The *Fetha Nagast*, or Code of Laws, deals with ecclesiastical, civil and penal law. The legal system is said to be based on the Justinian Code. The penal code is based on the Mosaic law. Foreigners are subject to the jurisdiction of a special ('mixed') court or to their own consular Courts according to circumstances. Administration of Justice is very defective, but punishments for crimes are less barbarous than formerly.

Defence.

The Abyssinian Army in the field consists of two main parts. The standing army composes the nucleus, and the remainder of the forces are drawn from the chiefs and their retainers summoned in time of war, a sort of militia. Besides the above, a varying number of irregulars join the army on the outbreak of war, every man, except the priests, being an actual or potential soldier. The standing army, instituted by Menelik, forms in effect the paid standing garrison of each province, and amounts altogether to something under 100,000 men. Both they and the militia, amounting to perhaps 300,000–400,000 men, are very loosely organized, and have nothing in the shape of transport, and little modern equipment. A Belgian military mission was engaged in 1929 and is now at work training some 2,500 men of the Royal Bodyguard. The latter is armed with a certain amount of modern armament, including a 5-ton tank given to the king by the Duke of Abruzzi during his visit to Abyssinia in May, 1927. An Air Force has been organized under French auspices.

Agriculture and Industry.

The chief industries are pastoral and agricultural. Cattle, sheep, and goats are numerous. The horses of the country are small but hardy, and make excellent polo ponies; mules are bred, being used as pack animals; donkeys are also small and serve for baggage animals. Cotton, the sugar-cane, date-palm, coffee, and vine thrive well in many districts, but, except coffee, are nowhere extensively cultivated. The production of Harari coffee (long berry Mocha)

is on the increase. Besides this, which is cultivated, there grows more especially in southern and western Abyssinia a wild coffee plant, yielding a berry known as Abyssinian coffee, which grows in extensive forests. The supply is said to be unlimited. The native produce includes hides and skins, wax, barley, millet (dhurra), wheat, gesho (which serves as a substitute for hops), and tobacco; but, with the exception of hides, skins, wax, grain and coffee, not in sufficient quantities for export. Manufacturing industries are practically non-existent. The forests abound in valuable trees including rubber. Iron is found in some districts and is manufactured into spears, knives, hatchets, &c. Placer gold mining and washing are carried on in the western districts; coal, copper and sulphur have been found, also platinum. There are said to be valuable deposits of potash salts in the Asal salt plains in the north-eastern part of the country, and their exploitation has been carried on with the aid of Italian capital.

Foreign enterprise has begun to establish itself in the country; two Belgian companies are working coffee plantations.

Commerce.

The total trade of Abyssinia (export and import) in 1933 is estimated at between 1,500,000*l.* and 2,000,000*l.* Of this trade some 60 per cent. passes through French Somaliland.

The principal artery of trade is the Franco-Ethiopian railroad, the traffic along which amounted to 28,111 metric tons (imports) in 1933, and 23,180 metric tons (exports). But caravans also do a large trade in the interior, and carry goods into limitrophe countries along well-defined routes. The chief trade routes besides the railway are the following:—(1) Khartum-Gambeila, Khartum-Gallabat, and Sudan; (2) Mombasa-Nairobi-Moyale (British East Africa); (3) Zeila Jijiga, Hargeisa-Ogaden (British Somaliland); (4) Massawa-Asmara-Gondar-Assab-Dessie (Italian Eritrea); (5) Mogadishu-Lugh-Dolo-Arusi (Italian Somaliland).

The exports consist mainly of hides and skins (cattle, goat, sheep, leopard and monkey), coffee, grain, wax, civet, and native butter. The imports are salt (from French Somaliland and Sudan), grey sheetings and other cotton piece-goods (from England, India, Japan, Italy), cotton yarns (from England, India, Japan, Italy, France), building materials, petrol and kerosene (from England, U.S.A. and Russia), sugar, glass, soap. Leading importing countries in 1933, on a tonnage basis, were French Somaliland (salt), Japan, Belgium, England, India, U.S.A. Sudan trade with Ethiopia was £E.161,065 in 1931 and £E.260,417 in 1932. Trade via Gambeila, the Sudan trading station in S.W. Ethiopia, was valued at £E.165,507 in 1932 as against £E.76,512 in 1931. The approximate value of goods and merchandise imported into the Sudan in 1932 from Ethiopia was £E.171,484. British Somaliland transit trade with Ethiopia (imports and exports) was valued in the last three years as follows:—1931, rupees 1,242,200; 1932, rupees 1,077,347; 1933, rupees 1,154,051.

The total trade between Abyssinia and Great Britain for 5 years (according to Board of Trade Returns) was as follows:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Abyssinia	229,032	216,517	138,651	191,624	165,123
Exports to Abyssinia .	33,343	22,636	18,772	38,907	48,858
Re-exports to Abyssinia	953	662	761	596	806

Communications.

Roads in Abyssinia are mere tracks, and transport is effected by means of mules, pack-horses, donkeys, and, in some places, camels. In the capital and its vicinity several miles of metalled road were constructed in 1926. In 1896 the Franco-Ethiopian Railway Co. was formed for the construction of a line from Jibuti in French Somaliland, which reached the capital in 1917. The line is of metre gauge, with a total length of 486½ miles. Trains run twice weekly in each direction, covering the distance in three days, but running by day only. In the dry season a weekly express is also run, which does the journey in 36 hours. The railway is under French management, and depends financially on a subvention from the French government. By the Franco-Italian agreement of 1935, twenty per cent. of the shares of the railway were handed over to Italy.

Considerable interest is now being taken in road construction. Chief among the roads now under consideration are the following: Dessie-Assab, Addis Ababa-Jimma, Jijiga-Hargeisa, Gore-Gambeila, Addis Ababa-Lake Tsana. The total road mileage of all kinds is estimated at about 2,615 miles, of which about 1,615 miles are dirt trails, and 1,150 miles earth and gravel. There are also about 65 miles of macadam roads.

There are telegraph lines under Italian control (about 1,229 miles) connecting Addis Ababa with Massawa in Eritrea. Telephone lines connect Addis Ababa with Harrar, and Jibuti in French Somaliland, also with Gore and Gambeila (in the west), Jimma and Sharada (south-west), Dessie (north), and Debra Tabor and Gojjam, and with Ankober, and Asmara with Adua and Borromeida. Length of line is estimated at 5,113 miles. In 1933, there were 31 post offices.

Money and Credit.

The Bank of Abyssinia, which held a banking monopoly in the country since its institution in 1905, was bought in 1931 and replaced by a State Bank named the Bank of Ethiopia, with an initial nominal capital of 15 million English shillings or their equivalent in a new Ethiopian gold currency, in shares of 500 shillings, 50 per cent. paid up. No other bank is permitted in the country without special Government sanction.

The current coin of Abyssinia is the Maria Theresa dollar (nominally worth about 2*s.*, but greatly depreciated as a result of the fall in the value of silver) weighing 28·0668 grammes, ·8333 fine, and the Menelik dollar, weighing 28·075 grammes, ·835 fine. It has nominally the same value as the Maria Theresa dollar, but in some places it is not taken at all. Other silver coins are the half, quarter, sixteenth (guerches, makeliks, tamoous, or piastres) of a dollar, and there is also a copper coin, the *besa* (= one thirty-second of a dollar). The number of piastres or besa obtainable for a dollar although fixed by law, is in fact liable to constant fluctuation. Various articles, however, are used as medium of exchange; bars of salt are accepted as money in many parts of the country, at a fluctuating rate according to supply and cost of transport. Cartridges are also currency, although to a diminishing extent; and in most places barter prevails. A new Currency Law was promulgated in 1933.

The Maria Theresa dollar was originally minted in Vienna in the middle of the 18th century.

Weights and Measures.

The metric system of weights and measures is used to a certain extent in the capital and district bordering the railway line. The principal native

weights and measures, which are also used in trade with foreigners, are as follows:—

WEIGHTS.

Ookia = weight of Maria Theresa/Menelik dollar = 28·067 grammes, approximately 1 oz. avoirdupois.
Natr = 30 *ookiat*, approximately 1 lb. 14 ozs. avoirdupois.
Farasula = approximately 37½ lbs.
Kantar = 100 lbs.
1 *Waggia* (for ivory) = 480 dollars' weight.
1 ,, (for rubber) = 640 dollars' weight.

LINEAL MEASURES.

Kund = French Coudée (length of forearm and hand) = cubit = 50 centimetres = 19⅝ inches.
Khalad = 130 kunds = 65 metres = 213½ feet, say 71 yards.

LAND MEASURE.

The measure is a *Gasha*, which varies according to the quality of the land, and ranges between 15 *khalads* by 25 *khalads*, and 7 *khalads* by 11 *khalads*, the latter equalling roughly 80 acres.

GRAIN MEASURES.

10 *kounna* = 1 *ladan*.
2 *ladan* = 1 *dawala* = 80 kilos.

MEASURE FOR HONEY AND CIVET.

10 *wanche* (horn cups) = 1 *goundo* = about 3 litres.

Diplomatic Representatives.

1. OF ABYSSINIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Bajirond Tekla Hawariat (appointed May, 1933).
Secretary.—Ato Ephrem Tewolde Medhen.

2. OF GREAT BRITAIN IN ABYSSINIA.

Minister.—Sir Sidney Barton, K.C.V.O., K.B.E., C.M.G. (appointed May 21, 1929).
First Secretary.—P. S. Scrivener.
Oriental Secretary—N. Mayers.
Consul at Addis Ababa.—W. L. Bond.
Vice-Consul (Acting)—A. S. G. R. Trapman.

There are Consuls also at Harrar, Goré, Maji, and Mega.

AFGHÁNISTÁN.

AFGHÁNISTÁN is a country of Asia lying between parallels 29° and 38° 35′ of north latitude, and 60° 50′ and 74° 50′ of east longitude, with a long narrow strip extending to 75° east longitude (Wákhán). For the boundaries, *see* THE STATESMAN'S YEAR-BOOK for 1925, pp. 654–55; for the treaty of November, 1921, *see* THE STATESMAN'S YEAR-BOOK 1928, p. 642; and for earlier British relations with Afghánistán, *see* THE STATESMAN'S YEAR-BOOK for 1916, pp. 662–3.

Government.—The government of Afghánistán is a constitutional monarchy, in which the supreme legislative power is vested in the Parliament consisting of the King, a Senate and a National Assembly. The Senate consists of a maximum of 40 members, who are nominated for life by the King. In 1933 there were 38; they sit throughout the year. The National

Assembly consists of 120 elected members. It is in session between May and October, and may be summoned at any time. There is yet a Grand Assembly (*Loe Jirgeh*), which is summoned at irregular intervals of about four years to consider major questions of policy referred to it by the King. The title of King instead of Amir was adopted in 1926. The country is divided into five major provinces of Kábul, Mazar, Kandahár, Herat, and Kataghan-Badakhshán; and four minor provinces: Simat-i-Mashriqi (i.e. Eastern Province), Simat-i-Janubi (Southern Province), Farah, and Maimana. Each province is under a governor (called in major provinces *Naib-ul-Hukumeh* and in minor provinces *Hakim-i-'Aala*).

There are separate departments of War, Foreign Affairs, Internal Affairs, Education, Commerce, Justice, Public Works, and Revenue, each in charge of a Minister, and two departments (1) Health, (2) Posts and Telegraphs, under director-generals.

Reigning King.—**Mohammed Zahir Shah**, born at Kábul in 1914; married on November 7, 1931, to his cousin, daughter of Sirdar Ahmed Shah Khan; succeeded his father, Mohammed Nadir Shah, who was assassinated on November 8, 1933.

Area and Population.—The extreme breadth of Afghánistán from north-east to south-west is about 700 miles; its length from the Herát frontier to the Kháibar Pass, about 600 miles; the area is about 245,000 or 270,000 square miles. Population, according to the latest estimate, about twelve millions. The languages spoken are Persian and Pushtoo, and Turki in Turkistan and parts of Badakhshán. The pre-dominant religion is Islam.

The largest towns are Kábul, the capital (population about 80,000), Kandahár (population with suburbs 60,000), Herát (population 30,000), and Mazar-i Sharif (20,000).

Education.—Elementary and secondary schools exist throughout the country. Both elementary and secondary education are free. There are at present 27 primary schools and one normal school for teachers in Kábul. In addition there are four secondary schools. Technical, art, commercial and medical schools exist for higher education. The Kábul University was established in 1932.

Justice.—The law is based on the *Shara'* or Islamic law. Lower Courts (*Mahakima-i-Ibtidaia*) are established in each seat of government, and Higher Courts (*Mahakima-i-Murafiaah*) may have appeals from the former brought before them. A High Court in Kábul is the supreme judicial authority. In many instances efforts are made by litigants to compose their differences by the aid of unofficial juries in each locality.

Finance.—The revenue of Afghánistán is sometimes subject to fluctuations. The Government share of the produce recoverable is said to vary from one-fifth to one-tenth, according to the advantages of irrigation. The total revenue is estimated at about one hundred and fifty million (Afghani) rupees, a considerable portion of which is found from Customs.

Defence.—The peace strength of the army is 72,000. It is organized in 7 mixed divisions: 4 infantry divisions, 1 independent artillery division, 1 independent mixed infantry brigade and 1 cavalry brigade. There is also a small air force with a personnel of 400, officered by Afghans trained in Europe.

Production and Industry.—Although the greater part of Afghánistán is more or less mountainous, and a good deal of the country is too dry and rocky

for successful cultivation, yet there are many fertile plains and valleys, which, with the assistance of irrigation from small rivers or wells, yield very satisfactory crops of fruit, vegetables, and cereals. The castor-oil plant, madder, and the asafœtida plant abound. Fruit, *viz.* the apple, pear, almond, peach, quince, apricot, plum, cherry, pomegranate, grape, fig, mulberry, is produced in profuse abundance. They form a staple food of a large class of the people throughout the year, both in the fresh and preserved state, and in the latter condition are exported in great quantities. The fat-tailed sheep is native to Afghánistán. These sheep furnish the principal meat diet of the inhabitants, and the grease of the tail is a substitute for butter. The wool and skins not only provide material for warm apparel, but also furnish the country's main article of export.

Northern Afghánistán is reputed to be tolerably rich in copper, and lead and iron are found in many parts. Coal is found in the Ghorband Valley and near the Khurd Kábul Pass. Crude petroleum has been discovered near Herat. Silver mines exist in Panjsher Valley. Iron is smelted in Katghan and Parmal. Other minerals of commercial value are to be found widely in the country; and none have been properly exploited so far. Gold in small quantities is also brought from the Laghmán Hills and Kunar. Badakhshan is said to be the only country in the world to produce first-quality lapis lazuli.

At Kábul there are factories for the manufacture in small quantities of matches, buttons, leather and boots. There is also a 'Machine-Khana' where arms and ammunition, boots and clothing, etc., for the army are manufactured. It also includes a mint. All these factories are owned and supervised by the State.

Commerce.—Of the exports from India to Afghánistán the chief items are cotton goods, indigo and other dyeing materials, sugar, hardware, leather and silver treasure. The imports into India include timber, fruits, skins, carpets and raw wool.

Imports from Afghánistán into U.K. in 1934 (Board of Trade figures), 2,743*l.*; exports to Afghánistán, 28,570*l.*; re-exports, 201*l.*

Communications.—Afghánistán joined the Postal and Telegraphic Unions in 1928.

The trade routes of Afghánistán are as follows:—From Persia by Meshed to Herát; from Bokhára by Merv to Herát; from Bokhára by Karshi, Balkh, and Khulm to Kábul; from East Turkistán by Badakhshán and Nuristan (formerly Kafiristan) to Kábul; from India by the Kháibar road to Kábul; from India by the Gomál Pass to Ghazní and Kelat-i-Ghilzai; from Chaman, the terminus of the North-Western Railway beyond Quetta, to Kandahár and thence to Kábul or Herát; from Parachinar (Kurram) via Peiwar and Shutargardan Passes to Logar and Kábul.

There are no railways in the country. The following roads are fit for motor traffic, except after snow or heavy rain, but are mostly unmetalled: Kháibar–Kábul, Kábul–Kandahár, Kábul–Gardez, Kandahár–Farah–Herat (sometimes impassable owing to lack of bridges), Kandahár–Chaman, Kábul–Bamian, Kábul–Mazar-i-Sharif (opened in 1933), and Mazar-i-Sharif–Maimana–Herat. In addition there are some 200 miles of minor roads fit for motor traffic, mostly in the vicinity of Kábul. Merchandise, however, is still transported chiefly on camel or pony back. There are practically no navigable rivers in Afghánistán, and timber is the only article of commerce conveyed by water, floated down stream in rafts. Telephones are installed in a few of the larger towns. There is telegraphic

communication between Peshawar–Kábul, Kábul–Kandahár, Kandahár–Chaman. A wireless installation connects Kábul with Eastern Europe and India.

Banking and Currency.—The monetary system is on the silver standard. The unit is an *afghani*, weighing 10 grammes of silver ·900 fine, which is subdivided into 100 *puls*. The currency consists of:—(*a*) afghani rupee (silver); (*b*) kran ($\frac{1}{2}$ rupee) (silver); (*c*) pul ($\frac{1}{100}$ rupee) (copper); (*d*) 2 puls ($\frac{1}{50}$ rupee) (copper); (*e*) 5 puls ($\frac{1}{20}$ rupee) (copper); (*f*) 10 puls ($\frac{1}{10}$ rupee) (copper); (*g*) 20 puls ($\frac{1}{5}$ rupee) (copper); (*h*) 25 puls ($\frac{1}{4}$ rupee) (copper). One Indian rupee = 1*s.* 6*d.* = 3·70 Afghani rupees at present rate of exchange.

The National Bank of Afghánistán, with branches both in Asia and Europe, was recently established.

Weights and Measures.—The metric system has now been adopted. The old measures were:—Weights:—16 khurds = 1 charak (3·922 English pounds); 4 charaks = 1 seer (15·688 English pounds); 8 seers = 1 man (125·5 English pounds); 10 mans = 1 kharwar (1,255 English pounds). Long Measure:—1 gaz, shahi = 1 yard; 1 kroh = 1½–2 miles. Land, or Square Measure:—1 jarib = 1 square tanab (0·479 acres); 1 zauj (or jaur) = 80 jaribs (59·504 acres); 1 kubla (30,000 acres).

Diplomatic Representatives.

1. Of Afghánistán in Great Britain.

Envoy and Minister.—Sirdar Ali Mohamed Khan. Appointed November, 1933.

First Secretaries.—Juma Khan Siddiqi and Mohamed Sarwar Khan.

There is an Afghán Consul-General at the headquarters of the government in India, Consuls at Bombay and Karachi, and *visa* officials at Peshawar and Quetta.

2. Of Great Britain in Afghánistán.

Envoy and Minister.—Major William Kerr Fraser-Tytler, C.M.G., M.C. (appointed December 14, 1934).

Counsellor.—Captain C. C. L. Ryan.

Military Attaché.—Bt. Lt.-Col. R. M. M. Lockhart, M.C.

Secretary.—Captain E. W. Fletcher.

Oriental Secretary.—K. B. Sikandar Khan.

There are Consuls at Jalalabad and Kandahár.

ALBANIA.

(SHQIPERIA.)

THE territory known as Albania is made up of parts of the old Turkish Provinces of Scutari, Yanina, Kosova and Monastir. The Albanians, from the point of view of their language, are divided into two principal groups—the Ghegs, who live to the north of the river Shkumbi, and the Tosks in the south.

The early history of the Albanians is complicated and local. The Illyrian kingdom in the north and Epirus in the south waged long wars to defend their independence against Roman invasions. They finally became parts of the Roman Empire. Later they fell under the rule of the Byzantine Empire, and after that their territories were invaded by the Slavs. After the war of Kossovo in 1389, most of Albania was overrun by the Turks, and after the death of George Kastriota—nicknamed and popularly known as Skanderbeg—in 1479, under whom the Albanians had united and heroically resisted the Turks for a quarter of a century, Albania passed under Turkish suzerainty, and thus remained—nominally or actually according to the locality and period—until 1912. At the beginning of the eighteenth century Ali Pasha of Tepelen established a virtually independent Albanian State with Janina as its capital, and waged war against his Albanian rivals the Pashas Bushati (1750–1831) of Shkodër (Scutari), who had temporarily thrown off Turkish control in the north and Pashas of Vlora in Berat. Between 1878 and 1880 an Albanian League unsuccessfully attempted to establish Albanian autonomy.

The independence of Albania was proclaimed at Vlonë (Valona) on November 28, 1912, and on December 17, 1912, the London Conference of Ambassadors agreed to the principle of Albanian autonomy. Subsequently that Conference decided upon the frontiers of the new country, and agreed that a European Prince be nominated to rule it. Prince William of Wied, having accepted the crown of the Principality from an Albanian deputation at Neuwied, on February 21, 1914, arrived at Durrës (Durazzo) on March 7,

1914. Previously, an International Commission of Control had been constituted to control the administration of Albania.

Prince William's reign was foredoomed to failure. Intrigue and treachery were followed by revolt in central Albania. After the outbreak of the European War in 1914, the Prince and nearly all the members of the International Commission on September 3 left Albania, which fell into a state of anarchy. By the secret Pact of London of April 26, 1915, provision was made for the partition of Albania; but this arrangement was repudiated by Italy on June 3, 1917, when the Italian Commander-in-Chief in Albania, proclaimed at Gjinokastër (Argirocastro) the independence of Albania. After the Armistice there was fighting between the Albanians and both the Italians and Yugoslavs; but eventually foreign forces were withdrawn beyond the Albanian frontier, and the independence of the country confirmed. On December 17, 1920, Albania became a member of the League of Nations. In January, 1925, the country was proclaimed a Republic, which continued until 1928. A Constituent Assembly for the purpose of changing the Albanian Republic into a Monarchy was opened on August 25, 1928, and on September 1, the necessary amendments to the Constitution were voted and Ahmed Beg Zogu, President of the Republic since January 31, 1925, was proclaimed King. The new régime was generally recognised by the European Powers.

According to the constitution of 1928, Albania is a democratic, parliamentary, independent monarchy, without any state religion and with only one elected Chamber.

On November 22, 1927, a defensive alliance for a period of twenty years was signed between Albania and Italy.

Reigning King.—**Zog I.**, born October 8, 1895, a Moslem by religion and hereditary chieftain of the Mati clan, proclaimed King September 1, 1928. The King is assisted in the administration by a council of ministers appointed by him.

Area and Population.—The area of the country is 10,629 square miles, while the population, according to the Census held on May 25, 1930, was 1,003,124.

The country is divided into 10 prefectures, named after the principal towns, which with the population in 1930 are as follows:—

Prefectures	Population in 1930		Prefectures	Population in 1930	
	Prefecture	Town		Prefecture	Town
Berat . .	142,616	10,403	Korçe (Koriza) .	147,536	22,787
Dibër (Dibra) .	86,992	—	Kosova (Kossovo)	49,081	—
Durrës (Durazzo)	77,890	8,739	Shkodër (Scutari)	132,334	29,209
Elbasan . .	111,480	13,796	Vlonë (Valona)	53,461	9,100
Gjinokastër (Argirocastro) .	143,926	10,836	Tirana (Capital)	57,808	30,806

Religion and Education.—There is no State religion. The population is distributed according to the following estimates:—Moslems, 688,280; orthodox Christians (National Albanian Church), 210,313; Roman Catholics, 104,184. The Gheg Christians in the north are for the most part Roman Catholics under two Archbishops, three Bishops, and one Mitred

Abbot (there is also an Apostolic Delegate), and the Tosk Christians in the south are members of the Albanian Autocephalous Church, which is under the rule of the Holy Synod (constituted February 18, 1929) and four bishops.

Primary education is nominally compulsory for children between the ages of 6 and 13, but owing to the shortage of schools this cannot be thoroughly enforced. There are 505 State primary schools with 1,120 teachers, 228 women teachers, 45,187 boy pupils and 12,479 girls; there are 14 State secondary schools, which are classified as follows:—4 high schools, 1 vocational school, 1 commercial school, 1 agricultural school with two sections for boys and for girls; 2 training colleges for teachers for boys and one for girls; 3 colleges for boys (gymasiums—that of Shkodër with lower classes for girls also), 1 college for girls. In these 14 secondary schools there are 210 teachers, 25 women teachers, 4,277 pupils and 709 girls. In infant schools there are 20 teachers (women), 1,884 boys and 956 girls. About 300 Albanians are studying at different universities abroad.

Justice is administered by the Pretor, the tribunal of first instance and the collegiate tribunal. There is no special court of appeal. At Tirana there is a court of cassation. On January 1, 1928, the new Albanian Penal Code, which is based on that of Italy, and the new Civil Code (April 1, 1929), based on that of Italy, France and Switzerland, came into force, to take the place of the Ottoman laws previously imposed. According to the new Code polygamy is abolished, although Islam is the dominant religion in Albania. The new Albanian Commercial Code came into force on April 1, 1932.

Finance.—The revenue and expenditure for five years ending March 31 is as follows:—

—	1930–31[1]	1931–32[1]	1932–33[1]	1933–34[1]	1934–35[1]
	gold francs	gold francs	gold francs	gold francs	gold francs
Expenditure .	31,385,000	29,097,000	28,500,000	27,527,000	18,888,000
Revenue . .	31,385,000	31,533,422	31,588,395	24,527,000	18,507,000

[1] Estimates.

In May, 1925, Albania obtained a foreign loan to be used exclusively in carrying out public works. The loan was for the nominal amount of 50,000,000 gold francs in Italian lire, and by the rise in value of the lira the Government made a profit of 15,000,000 gold francs. Thus the sum to be expended was 65,000,000 gold francs. The loan, administered by the Italian Company for the Economic Development of Albania (S.V.E.A.), and guaranteed by the yield of the Albanian Customs, and of the Albanian Monopolies on salt, matches, cigarette papers and playing cards, is also guaranteed by the Italian Treasury. The loan has been almost entirely spent; on September 30, 1934, there was a balance, available for expenditure, of about 2·9 million gold francs. This loan proving inadequate, the Italian Government agreed in June, 1931, to subsidise the Albanian revenues to a maximum annual amount of 10,000,000 gold francs. These additional facilities have been in operation only for the three financial years 1931–32, 1932–33, 1933–34, and the amounts drawn under them have never reached the above stated maximum. The loan bears no interest; but, on the instance of the Albanian Government, repayment is to be considered when the Albanian revenues amount to 50,000,000 gold francs, provided such repayment does not effect the economic development of the country. Expenditure is to be controlled by a commission of two Italian and two Albanian members, one of whom is chairman having equal vote with the

other members; but decisions are by majority vote. The Commission has the right to scrutinise all accounts regarding only the loan of 10,000,000 gold francs and to make such recommendations for economy as it thinks fit for the above accounts.

Defence.—Military service is compulsory between the ages of 19 and 50. Service with the colours is for 18 months. The strength of the army in 1934 was 812 officers and 12,941 other ranks, organized in 12 infantry battalions, 22 batteries of artillery, 9 engineer companies, and 1 section of armoured cars. The army estimates (September, 1933), amounted to 7,000,000 gold francs.

The nucleus of a navy has been formed by the purchase of two patrol vessels, and four motor boats for coastguard purposes.

Production and Industry.—The Albanian economic system is very primitive; each family provides for its own needs. Great tracts of the country remain uncultivated, and the areas at present under cultivation (about 926 square miles) are dealt with in a primitive way. A number of agrarian reforms were initiated in 1930, including the formation of an Agricultural Bank. The State owns some 125,000 acres of the best land in the plain between the rivers Shkumbi and Vjosa. The country for the greater part is rugged, wild, and mountainous, the exceptions being along the Adriatic littoral and the Korçë (Coriza) Basin, which are fertile. Tobacco, timber, wool, hides, furs, cheese and dairy products, fish, olive oil, corn, cattle and bitumen are the principal products of the country. Cattle-breeding receives special attention. The wool is made up into coarse and heavy native cloth and exported. There are vast tracts of forest land composed of oak, walnut and chestnut trees, as well as beeches, pines and firs. The mineral wealth of Albania is considerable but undeveloped. The copper mines in the Puka district are being exploited. The salt-pits at Vlonë (Valona) are said to be of commercial importance, and Selenizza Bitumen mines are also worked successfully. The principal industries in the country are those connected with agriculture, such as flour-milling, olive-pressing and cheese-making.

Commerce.—Imports and exports for 5 years are shown as follows (in gold francs):—

—	1929	1930	1931	1932	1933
Imports .	38,643,900	33,288,900	29,513,300	22,814,500	15,938,221
Exports .	14,682,608	12,352,063	7,509,000	4,500,360	5,746,476

The distribution of trade in 1933 was as follows (in gold francs):—Imports from Italy, 6,675,655; United Kingdom, 1,438,222; Czechoslovakia, 1,078,134; Yugoslavia, 967,817; Greece, 823,150; United States, 1,012,842 Exports to Italy, 4,574,384; to United States, 503,280; to United Kingdom, 25,506; to Greece, 361,158; to Yugoslavia, 158,306.

The principal imports in 1933 were: cotton and cotton textiles, 3,898,000 gold francs; sugar, 731,000 gold francs; coffee, 532,000 gold francs; benzine, 970,000 gold francs; petroleum, 574,000 gold francs; the principal exports: olives, 2,045,000 gold francs; cheese, 692,000 gold francs; hides and furs, 684,000 gold francs; fish, 529,000 gold francs; bitumen, 508,000 gold francs.

Total trade between Albania and Great Britain (according to Board of Trade Returns) was as follows:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Albania	2,544	469	953	87	622
Exports to Albania .	22,531	29,775	33,685	44,808	37,772
Re-exports to Albania	150	208	384	275	167

Communications.—All the principal towns of Albania are connected by passable roads which compare very favourably with those in other Balkan countries. The mountain districts of the north are still, however, mostly inaccessible with wheeled vehicles, and communications are still by means of pack ponies or donkeys. The total length of roads suitable for motor traffic in the country at the end of 1933 was 1,118 miles. The ports are four in number, viz. Shengjin (San Giovanni di Medua), Durrës (Durazzo), Vlonë (Valona), and Sarandë (Santi Quaranta). Durrës is being fully equipped; but the others remain primitive. Number of post and telegraph offices, 55. There are seven regular air routes in service: Tirana–Rome, Tirana–Salonica, Tirana–Shkodër, Tirana–Korçë, Tirana–Vlonë, Tirana–Peshkepijë and Tirana–Kukës; and 3 wireless stations.

Banking and Currency.—On September 2, 1925, the National Bank of Albania was established in Rome, with branches in Tirana, Durrës, Korçë, Vlonë, Shkodër, Sarandë and Gjinokastër. It has a capital of 12,500,000 gold francs. Albanian participation was to have amounted to 5,625,000, but owing to the failure of Albanians to subscribe, almost the whole of the Albanian quota was eventually taken up by Italians. The remainder of the capital was subscribed by an international financial group headed by the Credito Italiano. The Bank has the exclusive right of issuing paper money and metal coinage. A new currency based on notes freely convertible into gold coin, gold exchange, or foreign bank notes convertible into gold has been established. The monetary unit chosen is the (Franka ari) gold franc (5 *lek*) (·3225806 gr. 900 fine), with a parity of 25·2215 to the gold £.

The Bank has issued Bank notes of 100, 20, 5 gold francs, and metallic currency as follows:—gold, 100, 20 and 10 franc pieces; nickel, 1, ½ and ¼ *lek*. On September 30, 1934, there were in circulation notes amounting to 11,444,000 francs and coin to the value of 2,213,000 francs, of which 1,287,000 francs were gold, and 917,000 francs nickel coins. The cover for the note circulation on that date consisted of 18,665,000 francs, of which 7,121,000 francs were in gold.

Diplomatic Representatives.

1. Of Albania in Great Britain.

Envoy and Minister.—Dr. Fuad Aslani.
Secretary.—Çatin-Pascal Saraci.
Consul-General in London.—Edwin Cripwell.

2. Of Great Britain in Albania.

Envoy Minister and Consul-General.—Sir Robert Macleod Hodgson, K.B.E., C.M.G. (appointed June 12, 1928).
Naval Attaché.—Capt. H. Pott, M.V.O., R.N. (Resident in Athens.)
Military Attaché.—Col. H. R. G. Stevens, D.S.O. (Resident in Rome.)
Air Attaché.—Group Captain T. G. Hetherington C.B.E.. (Resident in Rome.)
Vice-Consul.—W. B. C. W. Forester.

ARABIA.

ARABIA is essentially a desert country comprising an area of roughly 1,000,000 square miles and inhabited for the most part by nomadic Beduin tribes eking out a precarious pastoral existence by the breeding of camels, sheep and goats. Bounded on the north by Iraq and Transjordan (Palestine), it is enclosed on the other three sides by the sea—the Red Sea on the west, the Arabian Sea on the south and the Persian Gulf on the east. The land-surface of the peninsula enclosed within these limits slopes down steadily from the elevated mountain barrier, which runs down the whole length of its western side parallel with the Red Sea, to sea-level on the Persian Gulf, and the uniformity of this slope is only interrupted in the extreme south-eastern corner of the peninsula, where the mountains of the Oman district rear their crests to an elevation of 10,000 feet above sea-level. With the exception of this mountainous district and the similar district of the Yemen, Arabia is a barren country consisting of vast tracts of steppe-desert, sand-waste and mountainous wilderness. It is a country of insignificant rainfall (the Yemen and Oman excepted); here and there, scattered oases, or oasis-groups, are formed. The Taif district, for instance, in the Hejaz mountains above Mecca, the Qasim and Jebel Shammar provinces in Central Arabia and the Hasa province near the Persian Gulf are among the best examples of such districts, while Medina, Taima, Riyadh, Jauf and Wadi Dawasir are but a few among the many large oases which occur frequently throughout the country.

The population of Arabia cannot be estimated with any certainty, but would seem to be about 10 millions.

The inhabitants of Arabia are at present found in every degree of transition from the purely nomadic life of the Beduin to the simple civic life of towns in the interior like Anaiza or Buraida and the more highly developed civilization of Mecca, Medina and Jedda. Political changes have contributed to a development whereby the patriarchal, tribal organisation of the Beduin has weakened steadily before a natural tendency to communal organisation into States and principalities imposed on the people by the development of civic life. The introduction of modern fire-arms and the growth of an Arab nationalist spirit (directed against Turkish domination) in the borderlands of Syria and Iraq tended to encourage this process during the first decade of the present century, and the rise to power of Abdul Aziz ibn Sa'ud, the present Wahhabi King, gave it a further impetus. Ibn Sa'ud set to work to organise the unsettled Bedouin into civic communities under cover of a great Wahhabi

revival, and in the spring of 1913 struck the first blow for the Arabs against the Turks by capturing the Hasa province from the latter. The Great War completed and stereotyped the process of political organisation in Arabia, and the ejection of the Turks from the Hejaz, Asir and the Yemen left the Arabs to work out their own salvation unchecked by foreign control. Internecine warfare not unnaturally followed, and the result of a six years' struggle was that a single power (the Ibn Sa'ud dynasty of Nejd) achieved a paramount position throughout the peninsula beyond the southern coastal fringe, where the States of Yemen and Oman are the most important of those which maintain an independent existence together with the lesser principalities of Kuwait and Bahrain, the trucial chiefs of the Oman coast, the Hadramaut and the Aden hinterland, all of which enjoy in a greater or less degree the protection of Great Britain. The principality of Asir (capital Sabya), reduced in extent to a mere strip of the coast, maintained a precarious independence between Ibn Sa'ud and the Imam of Yemen (capital Sana') until October, 1926, when it accepted the suzerainty of Ibn Sa'ud. In 1930 it was practically annexed to the Hejaz and it was formally incorporated completely in Ibu Sa'ud's dominions in 1933 as a result of an abortive rising under its titular ruler, the Idrisi, in October, 1932. These events were the principal causes of a war which broke out between Ibn Sa'ud and the Imam of Yemen in March, 1934. It led to the conclusion on May 20, 1934, of a peace treaty to remain in force for 20 years, which defined the boundary so as to leave Asir and the inland region of Najran to Ibn Sa'ud. The northern province of Aqaba-Maan was annexed by the British Government to the Trans-Jordan mandated area in July, 1925.

THE KINGDOM OF SAUDI ARABIA.

(AL-MAMLAKA AL-'ARABIYA AS-SA'UDIYA.)

The Kingdom of Saudi Arabia (*al-Mamlaka al-'Arabiya as-Sa'udiya*) is now a single kingdom under the rule of Abdul-Aziz ibn Abdur-Rahman Al-Faisal Al Sa'ud, G.C.I.E., who had been proclaimed King of the Hejaz on January 8, 1926, and had in 1927 changed his title of Sultan of Nejd and its dependencies to that of King, thus becoming "King of the Hejaz and of Nejd and its Dependencies." The unification of his dominions under their joint name was effected by a decree of September 22, 1932. On May 20, 1927, a treaty was signed at Jedda between Great Britain and Ibn Sa'ud, by which the former recognized the complete independence of the dominions of the latter.

For a short account of the rise of the Wahhabis under Ibn Sa'ud, and of the latter's conquest of Hejaz, see THE STATESMAN'S YEAR-BOOK, 1929, pp. 645-47.

Ibn Sa'ud has placed his State in a dominant position among the States of Arabia. The dual character of his realm is maintained provisionally, and there are still two capitals at Mecca and Riyadh. His administration as regards the kingdom of Nejd and its dependencies is simple and of a patriarchal character, without ministers of State or other imitations of Western Europe. The king's eldest son, the Amir Sa'ud, who was formally declared heir apparent on June 15, 1933, normally resides in Nejd and exercises there the functions of Viceroy. It was proposed in 1932 to provide a single constitution for the whole country. This has not yet been done, and the Hejaz is still technically governed under a 'Constitution' issued on August 29, 1926, and subsequently amended. In its present form this Constitution provides for a Council of Ministers under the Presidency of the Amir Feysal,

the King's second son, who is also Minister for Foreign Affairs, and in whose office the Ministry of the Interior has been merged. He acts as Viceroy of the Hejaz in his father's absence. The religious law of Islam is the common law of the land, and is administered by religious courts at the head of which is a Chief Judge who is responsible for the Department of Sharia (legal) Affairs. The Constitution also provides for the setting up of certain advisory Councils, comprising a consultative Legislative Assembly in Mecca, Municipal Councils in each of the towns of Medina and Jedda, and Village and Tribal Councils throughout the provinces. The members of these Councils consist of chief officials and of notables nominated or approved of by the King.

The Government has adhered to the seven International Postal Conventions, the Public Health Treaty of Rome of 1907, the International Treaty of Public Health of 1926, which is not yet ratified and the Treaty of Paris of 1928 for the Renunciation of War, and is in treaty relations with the British Empire, Iraq, Transjordan, Syria, Persia, Germany, Turkey, France, Italy, Afghanistan, the United States of America and Yemen.

The total population of Nejd is estimated at about 3,000,000. Towns with a population exceeding 10,000 inhabitants are: (1) Hufuf; (2) Mubarraz; (3) Riyadh; (4) Shaqra; (5) Anaiza; (6) Buraida; (7) Haïl; (8) Jauf; (9) Sakaka; and (10) Hauta. Of these Hufuf and Riyadh have populations of about 30,000, but none of the others exceed 20,000.

The products of Nejd are dates, wheat, barley, fruit of various kinds, hides, wool, clarified butter (*saman* or ghi) and abas (Arab cloaks), besides camels, horses, donkeys and sheep. The export trade is still insignificant, though capable of considerable development, especially as regards dates, hides and clarified butter. The export of Arab horses to Bombay is not as active as it was in the past, and the annual export of camels to Syria and Egypt, formerly a steady source of income to the Beduin, is now much reduced owing, *inter alia*, to the rapid development of motor transport in those countries. The chief imports of Nejd are piece-goods, tea, coffee, sugar and rice.

The frontiers of the Hejaz are not sufficiently definite to allow of anything like an accurate estimate of its area, which probably does not exceed 150,000 square miles. The population is probably about 1,500,000, of whom Mecca, the capital, accounts for some 130,000, Medina for 30,000 and Jedda for 40,000, while the great majority of the rest are Beduin. The chief port is Jedda, the seaport of Mecca; Yanbu, next in importance, occupies a similar position in relation to Medina; while ports of less importance are Aqaba (now annexed to Transjordan), Muwaila, Wajh, Rabigh, Lith and Qunfuda. Medina produces excellent dates in abundance; Taif and other oases in the mountains and valleys produce honey and a fair variety of fruit; while Beduin products are hides, wool and clarified butter. But the exports of the Hejaz are insignificant, and the country depends for existence almost entirely on the annual pilgrimage which brings large numbers of pilgrims from abroad each year.

For defence Ibn Sa'ud depends mainly on levies of various kinds, but the elements of a small regular army, not numbering more than about 1,000 men, have recently been brought together in the Hejaz.

There are no roads, properly so called, in the Hejaz. From Jedda to Mecca (45 miles), a track across the desert is in some parts metalled. There is also a track from Mecca eastward through Riyadh to Ukair on the Persian Gulf, a distance of 829 miles, which is used for motor transport. A similar route connects Jedda with Medina via Rabigh and Yanbo. Motor cars can now travel between Riyadh and Kuwait and between Riyadh and Hail, Jawf

and the Northern Frontier Towns and also between Jedda and Duba and Mowailih and between Jedda and Jizan and Sabya.

That section of the Hejaz Railway which is in Wahhabi territory is not now in working order. Construction of the railway to connect Jedda and Mecca was to be begun in April, 1934. At present several lines of motor omnibuses ply between Jedda and Mecca.

The English gold sovereign is the basis of the currency. On January 22, 1928, a new silver currency, the *Riyal*, weighing 24·055 grammes, ·830 fine, was introduced in place of the Turkish *Mejidie* currency. Ten *Riyals* = £1 (gold) at par, but the *Riyal*, in December, 1933, was quoted at 23 to the £ sterling. The *Riyal* is subdivided into 11 *Qarsh* (piastres) *Miri*, and each Q.M. contains 2 *Qarsh Darij*. The Q.D., ½ and ¼ Q.D. are nickel coins. Branches of the Netherlands Trading Society of Amsterdam and Messrs. Gellatly, Hankey & Co. (Sudan), Ltd., conduct banking business in Jedda.

Seven powers viz.: Great Britain, Soviet Russia, Italy, Iraq, Turkey, Persia and Holland maintain legations at Jedda, with Ministers in the first three cases and Chargés d'Affaires in the other four. France is represented by a Chargé d'Affaires but has not changed the status of her Consulate. Egypt maintains, unofficially, a consular representative. Germany and Afghanistan have discontinuous consular representation. The Czecho-Slovak Consul at Jerusalem is also Consul for Sa'ûdi Arabia.

Envoy Extraordinary and Minister Plenipotentiary.—Sir Andrew *Ryan*, K.B.E., C.M.G. (appointed January 31, 1930.)

Envoy Extraordinary and Minister Plenipotentiary (in London).—Sheikh Hafiz Wahba. (November 10, 1930.)

Yemen.—In the Treaty of San'a of February 11, 1934, with the United Kingdom and India, of which the ratifications were exchanged on September 4, 1934, the Zaidi Imam Yahya b. Muhammad b. Hamid ed Dín is styled "His Majesty the King of the Yemen, the Imam," and his dominions, which lie to the north-west of Aden and the Aden Protectorate, contain some 75,000 square miles with a population of three and a half millions. His territories include the area to the north of the Anglo-Turkish boundary drawn in 1902–4 (accepted by the Treaty of San'a, of February 11, 1934, as the boundary between the Aden Protectorate and the kingdom of Yemen). In the north the boundary between the Yemen and Saudi Arabia has been defined by the Treaty of Taif concluded in June, 1934. To the north of San'a are the Imamic large towns of Amran, Tawila, Al Khamr, Al Suda, Sada (Lat. 16° 47′ N., Long. 43° 43′ E.), Qufiat Al Udhr, and also the region of Al Jauf, Upper, Middle and Lower, with their capitals respectively at Al Matamma, Al Hazm, and Al Ghail, where live the 'Shawaf,' clansmen of the influential Bakil tribe, all of which tracts, watered by the River Kharid, own the Imam's suzerainty. To south of Al Jauf, and to east by north of San'a at a distance of six days' journey, lies the district of Marib, or Saba, whose ruler is subject to the King. Other large towns in the Yemen are Taizz (alt. 4600 ft.), Ibb (6275 ft.), Yerim (8600 ft.), Dhamar (7650 ft.). The altitude of San'a is 7260 ft. The three principal ports are Mocha, Hodeida, and Loheiya.

The population of San'a, a walled city with eight gates, is between 20,000 and 25,000. The old-time granaries of the Upper Yemen still exist, and lie chiefly between the towns of Ibb and Al Jibla, and in the Wadi Sahul below Ibb and to its north though indeed the agricultural products are widely distributed throughout the country and comprise barley, wheat, and millet,

together with coffee—the finest berries coming from Menakha. Hides also are largely exported.

The Imam has nine sons, the eldest of whom, Seif al Islām, is the Amīr of Hajja and the Commander-in-Chief of the King's forces.

The Hadramaut is a considerable tract of fertile valleys forming the eastern part of the Aden Protectorate. The greater part of it owes allegiance to the Qa'aiti dynasty, whose representative is the present Sultan of Makalla. A rival dynasty, the Kathiri, rules a number of towns and villages inland. The whole area is loosely under British protection and control.

Oman.—Muscat is the capital of the independent Sultanate of that name situated at the easterly corner of Arabia. Its seaboard is nearly 900 miles long and extends from near Sha'am on the west side of Cape Mussandam round Ras Darbat Ali, rather over 200 miles due north of the Island of Socotra, with the exception of a small strip of the east coast of the Mussandam peninsula from Dibah to Khor Kalba, which is in the administration of the minor chiefs of Trucial Oman. The Sultanate extends inland to the borders of the Great Desert, but of late years the Omanis have become virtually autonomous. The interior is for the most part mountainous, the high country extending down to the sea-coast in a series of arid rocky heights, though vegetation exists on the higher mountains. North-west of Muscat the sea-coast littoral tract is fertile and prosperous, and date groves extend along it for over 100 miles. This strip is known as the Batineh Coast. The remainder of the coast, with one notable exception, is barren and forbidding and rarely visited by Europeans. The exception is Dhofar, which is the name of a small fertile district, comprising a group of villages, at the south-west corner of the Sultanate. Gwadur, a port on the Mekran coast, and a small tract of country round it also own allegiance to Muscat. It is the last remnant of the Omani possessions on the Persian side of the Gulf.

The town of Muscat, once so important and prosperous, has been falling into decay for years now. Most of the trade goes to the sister port of Matrah, which is the starting point of the trade route to the interior, but Muscat still remains the capital and seat of government.

Area, 82,000 square miles; population, estimated at 500,000, chiefly Arabs, but there is a strong infusion of negro blood, especially along the coast The towns of Muscat and Matrah hardly contain an Arab, being inhabited almost entirely by Baluchis and Negroes. The capital, Muscat, has a population of 4,500, and the adjacent town of Matrah 8,500.

The present Sultan is His Highness Saiyid Said bin Taimur (born August 13, 1910), who succeeded his father Saiyid Sir Taimur bin Feisal, K.C.I.E., C.S.I., as the 14th of his dynasty to be Imam or Sultan of Oman.

A sister of Saiyid Feisal bin Turki was married to the father of Saiyid Ali II, 9th Sultan of Zanzibar (1902–11), of the other branch of the dynasty which has been reigniug there since the separation of the crowns on the death of Saiyid Said bin Sultan Imam of Oman and 1st Sultan of Zanzibar, October 19th, 1856.

The revenue of the Sultan from all sources varies between six and seven lakhs of rupees yearly. The population is poor. In the valleys of the interior, date cultivation has reached a high level, and there are possibilities of agricultural development were the water supply more certain. Inland camels are bred in large numbers by the tribes.

Trade is mainly in the hands of British Indians, and imports and exports are mainly from and to India. The chief imports in 1932–33 were: rice, Rs. 11,26,291; coffee, Rs. 3,72,274; sugar, Rs. 1,29,320. Dates are the principal export, Rs. 8,28,650 in 1932–33. (Rs. 13–12–0 per £ average

for 1932–33.) Pomegranates, fresh and dried limes, and dried fish are the only other exports of any note. There are no industries of any importance. Total imports for 1932–33 amounted to Rs. 34,71,618, and total exports to Rs. 20,27,334.

The only port of call for steamers is Muscat where, in 1932–33, 123 steamships of 454,936 tons and 131 sailing vessels of 17,167 tons entered and cleared. It is one of the ports on the subsidiary mail route between Bombay and Basra. The mail service is a weekly one in both directions. The Indian Government maintains a post office and the Imperial and International Communications, Ltd., a telegraph office at Muscat.

Inland transport is by pack animals. The motor road between Muscat and Matrah has been extended for about 30 miles beyond Matrah, thus facilitating communication by car with the Batinah Coast. There is a daily motor service between Muscat and Sib.

The common medium of exchange is the Maria Theresa dollar (*see* p. 655). On the coast, but not in the interior, the rupee circulates. There is one Omani copper coin, which fluctuates in value. The muhammadi of 20 *gaj* (1 dollar = 11½ muhammadi) is only money of account. The weights in use are 1 Kiyas = the weight of 6 dollars or 5·9375 oz.; 24 Kiyas = 1 Maskat Maund; 10 Maunds = 1 Farásala; 200 Maunds = 2 Bahár. Rice is sold by the bag; other cereals by the following measures:—40 Palis = 1 Farrah; 20 Farrahs = 1 Khandi.

Political Agent and H.B.M.'s Consul.—Major C. E. U. Bremner, M.C.

The State of Kuwait is situated on the north-western coast of the Persian Gulf. The reigning dynasty was founded by Subah abu Abdullah, who ruled from 1756 to 1762. The present Sheikh, Ahmed ibn Jabir al Subah (b. 1885), succeeded his uncle, the 9th Sheikh Salim ibn Mubarak, on February 23, 1921. Although His Highness has two sons by his first marriage—Abdullah (b. 1905) and Mohamed (b. 1909)—and one by his present consort, the daughter of the late Sheikh Salim ibn Mubarak Jabir (b. June 29, 1926)—the Heir Presumptive according to the Koweiti rule of succession is the Sheikh's uncle, Hamad ibn Mubarak (b. 1894), who has a son Mubarak.

Estimated population, 50,000, to which an indeterminate number of Bedouins must be added.

Indian rupees and annas are legal tender in Kuwait town, and the post office, which is administered by the Iraqi postal department, issues Indian stamps overprinted 'Kuwait.' Maria Theresa dollars are still used in the interior.

Political Agent.—Lieut.-Col. H. R. P. Dickson, C.I.E.

The Trucial Sheiks.—From Khor Khalba, on the Gulf of Oman, 90 miles south of Ras Musandam, for nearly 50 miles to Dibah, the coast of the Gulf of Oman is attributed to the Sheikhdom of Shargah, but is to some extent under the local control of various petty Sheikhs. The capital of the Sheikhdom is on the Persian Gulf side of the Musandam peninsula which runs up to the Strait of Ormuz. The tip of the Musandam peninsula, from Dibah on its east side to near Sha'am about 35 miles from Ras Musandam on its west side, forms part of the Sultanate of Muscat, and is peopled by the Shihuh tribe. From Sha'am for nearly 400 miles to Khor el Odeid at the south eastern end of the peninsula of Qatar the coast, formerly known as the Pirate Coast, of the Persian Gulf belongs to the Trucial Sheikhs who in 1820, after hostilities with the Honourable East India Company, signed a

general treaty prescribing peace with the British Government, and perpetual abstention from plunder and piracy (specifically including the slave trade) by land and sea. This treaty was followed by further agreements providing for the suppression of the slave trade and for the search and, if necessary, seizure by British warships of any vessels belonging to the Trucial Sheikhdoms suspected of engaging in this trade, and by a series of other engagements of which the most important are the Perpetual Peace Treaty of May, 1853, and the Exclusive Agreement of March, 1892. Under the latter, the Sheiks, on behalf of themselves, their heirs and successors, undertook that they would on no account enter into any agreement or correspondence with any power other than the British Government, receive foreign agents, or cede, sell or give for occupation any part of their territory save to the British Government. The area of these Sheikhdoms is not defined, but the total population of the six was estimated in 1916 at about 80,000, of whom some 8,000 were nomads. Relations with the Trucial Sheikhs are normally conducted through the British Residency Agent on the Trucial Coast, at present Khan Bahadur Isa bin Abdul Latif, O.B.E., under the control of the Political Resident in the Persian Gulf at Bushire, at present the Hon. Lieutenant-Colonel T. C. W. Fowle, C.B.E.

The six Trucial Sheikhs are :—

Shargah . .	Muhammad Sultan bin Saqar.	Succeeded 1924.
Ras al Khaimah .	Sultan bin Salim.	,, 1919.
Umm ul Qawain .	Ahmad bin Rashid.	,, 1929.
Ajman . .	Rashid bin Humaid.	,, 1928.
Debai . . .	Said bin Maktum.	,, 1912.
Abu Dhabi . .	Shakput bin Sultan.	,, 1928.

Qatar.—This Sheikhdom, which includes the whole of the Qatar peninsula, extends along the coast of the Persian Gulf from Khor el Odeid to the boundaries of Hasa. Its settled population was estimated in 1916 at about 25,000. The relations of the Sheikh of Qatar with the British Government are similar to those of the Trucial Sheikhs, and are regulated by a Treaty of November 3, 1916.

Sheikh of Qatar.—Abdullah ibn Jasim eth Thani, C.I.E., succeeded in 1913.

The British Protectorate of Aden (*see* p. 97).

The Emirate of Bahrein (*see* p. 98).

ARGENTINE REPUBLIC.

(REPÚBLICA ARGENTINA.)

Constitution and Government.

ARGENTINA was discovered in 1516 by Juan Díaz de Solís. In 1535 Don Pedro de Mendoza was sent out by the King of Spain, and in 1536 founded the town of Buenos Aires. On May 25, 1810, the population rose against the Spanish rule, and on July 9, 1816, Argentine independence was proclaimed. Between 1816 and 1852 was a period of anarchy, and in 1853 stable government was once more established.

The following is a list of Presidents from 1898 onwards:—

Gen. Don Julio Argentino Roca, Oct. 12, 1898—Oct. 12, 1904.
Dr. Don Manuel Quintana, Oct. 12, 1904—Mar. 12, 1906.[1]
Dr. Don José Figueroa Alcorta (Acting), Mar. 12, 1906—Oct. 12, 1910.
Dr. Don Roque Saenz Peña, Oct. 12, 1910—Aug. 9, 1914.[1]
Dr. Don Victorino de la Plaza (Acting), Aug. 9, 1914—Oct. 12, 1916.
Dr. Don Hipólito Irigoyen, Oct. 12, 1916—Oct. 12, 1922.
Dr. Don Marcelo Torcuato de Alvear, Oct. 12, 1922—Oct. 12, 1928.
Dr. Don Hipólito Irigoyen, Oct. 12, 1928—Sep. 6, 1930.[2]
Gen. Don José Félix Uriburu (Provisional), Sep. 6, 1930—Feb. 20, 1932.
Gen. Don Agustín P. Justo, Feb. 20, 1932.

[1] Died. [2] Deposed.

The Constitution of the Argentine Republic bears date May 25, 1853, with modifications in 1860, 1866 and 1898; extensive modifications were being discussed in 1934. The President is elected for six years by 376 electors appointed by the fourteen provinces and the capital, equal to double the number of senators and deputies combined. A Vice-President, elected at the same time, presides over the Senate, but has otherwise no political power. The President is commander-in-chief of the army and navy, and appoints to all civil, military, naval, and judicial offices, in certain cases with the approval of the Senate, and has the right of presentation to bishoprics; he is responsible with the Ministry for the acts of the executive; both President and Vice-President must be Roman Catholics, Argentine by birth, and cannot be re-elected, unless a period of six years intervenes. The President has a salary of 96,000 paper pesos (£8,800 at par), and 28,800 paper pesos for official expenses. The National Congress consists of a Senate and a House of Deputies. The Senate numbers 30, two from the capital and from each province, elected for nine years (one-third retiring every three years) by a special body of electors in the capital, and by the legislatures in the provinces. The Chamber of Deputies has 158 members elected by the people. The deputies are elected for four years, one-half retiring every two years. The two chambers meet annually from May 1 to September 30; the lower house receives the budget and initiates fiscal legislation.

President of the Republic.—General Agustín P. *Justo.* Elected November 8, 1931. Assumed office, February 20, 1932.

Vice-President and President of the Senate.—Dr. Julio A. *Roca.*

The Ministry, appointed by and acting under the orders of the President, consists of eight Secretaries of State—namely, of the Interior, Foreign Affairs, Finance, War, Justice and Public Instruction, Agriculture, Marine, and Public Works.

Local Government.

The Constitution, with certain small exceptions, is identical with that of the United States. Such matters as affect the Republic as a whole are under the Central Government. The governors of the various provinces, elected by the people of each province for a term varying between three and four years, are invested with very extensive powers, and are independent of the central executive. The provinces elect their own legislatures, and have complete control over their own affairs. The territories are under the supervision of governors appointed by the President. In Buenos Aires the 'Intendente' or Mayor is appointed by the President with the approval of the Senate. He is assisted by a deliberative council of 30 elected by the male inhabitants over 18 years including foreigners who comply with certain conditions. Registered voters, June 30, 1933, numbered 2,570,103. Voting is compulsory under penalty of a fine. The deliberative council votes on measures relating to city finance, works, and general administration, and its decisions are carried out by the Mayor. Other municipalities have constitutions of a similar character.

Area and Population.

The Argentine Republic consists of fourteen provinces, ten territories and one federal district, containing the land area and population shown below:—

Federal District, Provinces and Territories[1]	Area: English sq. miles	Population: Census 1914	Estimated population Jan. 1, 1934	Pop. per sq. mile 1934
Federal District.				
Buenos Aires (the Federal Capital)	71	1,576,597	2,230,946	31,421·7
Provinces.				
Buenos Aires (La Plata)	118,467	2,066,165	3,243,121	27·3
Santa Fe	52,056	899,640	1,420,042	27·2
Córdoba	64,924	735,472	1,149,707	17·7
Entre Ríos (Paraná)	30,243	425,373	656,385	21·7
Corrientes	34,325	347,055	466,294	13·6
Tucumán	8,817	332,933	483,229	54·8
Mendoza	57,445	277,535	460,830	8·1
Santiago del Estero	53,451	261,678	421,977	7·8
Salta	48,872	140,927	189,373	3·8
San Juan	34,432	119,252	189,483	5·4
San Luis	29,700	116,266	176,327	5·9
Catamarca	30,178	100,391	135,626	4·4

Jujuy	16,705	76,631	102,066	6·1
Territories.				
La Pampa (Santa Rosa)	55,669	101,338	216,312	3·8
Misiones (Posadas)	11,749	53,563	90,371	7·6
Chaco (Resistencia)	37,930	46,274	86,146	2·2
Río Negro (Viedma)	77,610	42,242	65,674	0·8
Chubut (Rawson)	87,152	23,065	57,717	0·6
Neuquén	37,245	28,866	42,251	1·2
Formosa	29,143	19,281	32,300	1·1
Santa Cruz (Gallegos)	93,952	9,948	29,551	0·3
Los Andes (San Antonio de Los Cobres)	28,091	2,487	2,848	0·1
Tierra del Fuego (Ushuaia)	8,344	2,504	3,822	0·5
Total	1,079,965	7,885,237	12,055,469	11·1

[1] The Capitals are given in brackets. Where no name appears in brackets, the capital bears the same name as the province or territory.

The population is overwhelmingly European in origin (principally from Italy and Spain) with practically no mixture with the aborigines.

The Ministry of War's estimate of the population for January 1, 1933, was 13,712,742, of whom 2,827,990 were foreigners.

The dwindling Indian population is estimated at from 20,000 to 30,000.

The movement of population for five years is given as follows (excluding territories):—

	Marriages	Births	Deaths	Immigrants[1]	Emigrants[1]
1929	79,738	312,621	141,657	148,916	82,805
1930	77,876	313,881	134,912	133,183	67,504
1931	77,934	319,317	137,171	63,665	59,706
1932	69,808	311,757	152,0 4	37,554	48,926
1933	70,357	293,728	133,207	29,903	40,285

[1] Excluding first-class passengers.

Population of the capital, Buenos Aires, on January 1, 1934, was 2,230,946. Others, estimated, in 1934: Rosario (Santa Fe). 500,000; Córdoba, 280,000; La Plata, 200,000; Avellaneda, 160,000; Tucumán, 130,000; Bahía Blanca, 100,000; Santa Fe, 135,000; Mendoza, 80,000; Paraná, 70,000. Others, estimated in 1932, are: Lomas de Zamora, 80,300; Río Cuarto, 89,600; Quilmes, 55,309; Corrientes, 53,209; Mar del Plata, 50,084; Chivilcoy, 52,487; and Tandil, 52,647.

Religion and Education.

There is no State religion, though the Roman Catholic religion is supported by the State; all other creeds are tolerated and freedom of conscience prevails. There are 1 archbishop (Buenos Aires) and 10 suffragan bishops. For the clergy there are 8 seminaries. In 1888 civil marriage was established in the Republic.

Illiteracy among the voters has fallen from 35 per cent. in 1916 to 21·98 per cent. in 1930; in the Federal capital, to 2·6 per cent. Primary education is free (subsidised by the General and Provincial Governments), secular and compulsory for children from 6 to 14 years of age. In 1932 the primary schools numbered 11,545 with 55,938 teachers and an enrolment of 1,607,547; there were also 232 secondary, normal and special schools with 89,595 pupils under the Ministry of Public Instruction, and 241 provincial secondary schools with 13,709 pupils. National schools throughout the Republic in 1931 numbered 4,786, with 23,330 teachers and 638,306 students. Private schools numbered 1,360, with 169,598 pupils. There are national universities at Córdoba (founded 1613), with 2,742 students; Buenos Aires (1821), with 11,242 students; La Plata (1897), with 1,880 students; Tucumán (1912), with 600 students; the National University of the Litoral, in Santa Fe, with branches in Rosario (1920), and in Corrientes (1922), with 3,533 students. In 1931, 20,175,312 paper pesos were spent on university education, and a total of 209,906,903 paper pesos on all forms of educational activity. The National Library (1932) held 276,477 volumes and 1,495 periodicals.

Justice.

Justice is administered by Federal and by Provincial Courts. The former deal only with cases of a national character, or in which different provinces or inhabitants of different provinces are parties. The Federal Courts are the Supreme Courts, with 5 judges at Buenos Aires; 5 Appeal Courts, one with 5 judges at Buenos Aires, and with 3 each at La Plata, Paraná, Córdoba, and Rosario (Santa Fe), and courts of first instance in each of the provinces and territories. Each province has its own judicial system, with a Supreme Court (generally so designated) and several minor courts. Trial by jury is established by the Constitution for criminal cases, but never practised, except in the province of Buenos Aires.

Finance.

Total ordinary and extraordinary receipts and expenditures for recent years have been as follows, in paper pesos.

Year	Receipts	Expenditure	Year	Receipts	Expenditure
	Paper pesos	Paper pesos		Paper pesos	Paper pesos
1930	644,310,205	1,029,082,503	1933[1]	953,654,451	947,016,713
1931	675,655,[illegible]	869,782,160	1934[2]	983,640,59[illegible]	979,817,911
1932	748,363,545	870,830,292	1935[3]	905,000,000	905,000,000

[1] Includes loans of 166,4[illegible]0,020 pesos. [2] Includes loans of 174,361,425 pesos.
[3] Budget; includes loans of 127,000,000 pesos.

Of the 1934 revenue, customs furnished 264,727,703 paper pesos; inland revenue, 134,757,547 pesos; land taxes, 120,242,680 pesos, income tax, 63,462,657 pesos; of expenditures, 344,455,088 pesos were for salaries, and 285,984,767 pesos for public debt.

On June 30, 1934, according to the Corporation of Bondholders, the national consolidated debt amounted to 2,961,690,873 paper pesos; national floating debt, 1,059,919,000 paper pesos; total, 4,021,609,873 paper pesos. Debt of the Provinces amounted to 1,195,183,090 paper pesos, and the Municipalities to 471,985,653 paper pesos; grand total, 5,688,678,616 paper pesos. National Mortgage bonds outstanding June 30, 1934, totalled 1,360,043,750 paper pesos out of a total of 2,000,000,000 authorized.

For the Niemeyer figures for the public debt from 1921 to 1932 inclusive, see THE STATESMAN'S YEAR BOOK for 1934, p. 672.

Defence.

ARMY.

The army of the Argentine Republic is a National Militia, service in which is compulsory for all citizens from their 20th to their 45th year. Naturalised citizens are exempt for a period of 10 years. For the first 10 years the men belong to the 'active' army, or first line (Permanent Forces). After completing 10 years in the first line, the men pass to the National Guard and serve in it for another 10 years, finishing their service with 5 years in the Territorial Guard; the latter is only mobilised in case of war. The period of continuous service, or training in the ranks with the Permanent Forces, is for 1 year. The reservists can be called out for training periodically.

The territory of the Republic is divided into 5 military districts for administrative purposes. The strength of the army in 1934 was 33,104 all ranks. The army is organised in 5 divisions, 3 cavalry brigades and 2 mountain detachments.

There is a trained reserve numbering 300,000 men, of whom 150,000 men are of the first line, and 150,000 of the special reserve. The territorial reserve numbers 100,000 men.

The weapon of the Argentine infantry is at present the Mauser magazine rifle. The cavalry have a carbine of the same pattern. The artillery are armed with a Krupp 7·5 cm. Q.F. gun.

The estimated military budget for the year 1934 was 82,500,000 paper pesos.

There is a Military Aviation Training School at El Palomar. The air force is organised in 4 aviation groups, each comprising 1 bombing flight and 1 observation flight; one group has in addition 1 fighting flight; each group has a photographic and a training centre. In 1933 Argentina had 108 aeroplanes.

NAVY.

Laid down	Name	Displacement Tons	Armour		Principal Armament	Torpedo tubes	Indicated Horse Power	Nominal speed
			Belt	Guns				
	BATTLESHIPS		in.	in.				knots.
1910	Moreno Rivadavia	27,940	10	12	12 12-in., 12 6-in., 4 3-in. A.A.	—	45,000	23
	CRUISERS							
1927	Almirante Brown 25 de Mayo	6,806 standard	1	2	6 7·5-in., 12 4-in.	—	85,000	
1896	Pueyrredón Belgrano	6,100	6	6	2 10-in., 8 6-in. 2 10-in., 8 4·7-in.	—	13,000	20
	COAST DEFENCE VESSELS							
1889	Independencia Libertad	2,336	8	8	2 9·4-in., 4 4·7-in.	—	3,000	14

There are also 5 modern flotilla leaders, 4 destroyers, 3 submarines, and some training and miscellaneous craft.

The battleships *Moreno* and *Rivadavia*, the coast defence ironclads *Independencia* and *Libertad*, 2 cruisers of the *Belgrano* type and 4 destroyers have been converted to oil burning and otherwise modernized. The *Belgrano* is at present employed as a submarine depot ship. A naval programme, to involve the expenditure of 75,000,000 gold pesos, spread over a period of ten years, was approved in 1926. It provided for extension of the present dockyard accommodation in the River Plate and at Puerto Belgrano, and the construction of a new yard at Mar del Plata. New construction covered by this legislation included the cruisers *Almirante Brown* and *25 de Mayo*, and 3 submarines, built in Italy, as well as the 5 flotilla leaders mentioned above, three of which were built in England. Two British-built surveying vessels were delivered in 1928. Further orders are to be placed when funds become available.

The active personnel of the navy comprises 337 officers, 130 engineers, 27 electrical engineers, and about 11,000 men (including about 5,000 conscripts), who have to serve two years. There is a corps of coast artillery of 450 men, a naval school, a school of mechanics, a school for artillery, and a school for torpedo practice. The training of officers and men has recently been placed on a much higher scientific level.

Production and Industry.

Argentina has an area of about 689,436,900 acres, of which about 197,688,000 acres may be used for agriculture, 269,349,900 acres for cattle raising, 123,555,000 acres are woodland, and the remainder, 98,844,000 acres, are mountain, lake, river, or arid regions. Of the cultivable portion, about 10,000,000 acres require irrigation. In the territories the Federal Government has wide tracts of land amounting to 237,768,000 acres suitable in general for pastoral colonisation, and these lands are conditionally offered free, or for sale or on lease.

The area and produce of principal crops are shown as follows for recent years :—

	Acreage			Produce (Metric Tons)		
	1932–33	1933–34	1934–35	1932–33	1933–34	1934–35
Wheat .	19,221,600	19,145,520	17,952,000	6,405,993	7,787,000	6,860,000
Oats .	3,547,200	3,463,920	3,240,000	1,010,000	835,000	1,130,000
Maize .	14,533,000	15,6[illegible],600	—	6,700,000	5,500,000	—
Linseed .	7,188,500	6,566,472	7,008,000	1,455,193	1,440,000	1,330,000

The total grain and meat exported for three years, in metric tons, is shown as follows:—

Year	Wheat	Maize	Linseed	Oats	Meat
1931	3,638,682	9,767,201	1,880,274	644,766	628,723
1932	3,441,882	7,055,387	2,027,609	715,621	574,226
1933	3,929,223	5,018,861	1,392,315	429,019	570,732

Alfalfa, on about 14 million acres, for feeding livestock, is Argentine's most successful crop. Cotton, potatoes, sugar, vine, tobacco, rice, and yerba maté (Paraguayan tea) are also cultivated. About 352,342 acres, chiefly in Tucumán, Jujuy, and Salta produced in 1934, 332,002 tons of sugar. Potato crop for 1933–34 was 919,360 metric tons, of which 32,465 tons were exported. The total vine area is about 323,800 acres, chiefly in Mendoza and San Juan; production of wine, in 1932, 207,106,380 gallons; in 1933, 147,400,000 gallons. The area under tobacco, 1934, 19,279 acres; output, 8,574,421 kilos; Yerba maté, 92,580 acres, producing 38,506 tons. Production of raw cotton from 332,400 acres in 1932–33, 113,318 tons; of ginned cotton, 32,511 tons (equal to 147,727 bales); of cotton seed, 78,144 tons; exports of cotton, 1932, 28,272 tons. Crushings of vegetable oils, principally from peanuts, totalled 13,685,000 kilos in 1933. About 75,000,000 dollars (U.S.) has been invested in 23 mills extracting the tannin content of quebracho logs. Export of quebracho-extract in 1933 totalled 211,048 tons; export of logs for treatment abroad, 101,377 metric tons.

In the provinces of Buenos Aires, Santa Fe, and Entre Rios 463,000 acres of agricultural lands have been acquired by the Jewish Colonisation Association; 158,000 acres are under cultivation. In 1931 there were 156 rural co-operative societies in Argentina.

The live-stock census (July 1, 1930) showed cattle, 32,211,855; horses, 9,858,111; sheep, 44,413,221; goats, 5.647,396; pigs, 3,768,738. The Province of Buenos Aires contains one-third of the sheep within the Republic. Argentine wool exports in 1933 were 144,000 tons, compared with 131,488 tons the previous year. Exports of butter, 1933, 13,907 metric tons; in 1932, 25,363 tons; of casein (nearly 75 per cent. of the world's output), 23,039 tons (1932); cheese, 941 tons (1933).

The principal industry is meat refrigeration. In 1933, 350,046 metric tons of chilled, 31,549 metric tons of frozen beef, 54,997 tons of tinned meat, and 62,649 metric tons of mutton were exported. Meat exports, 1933, to Great Britain were valued at 164,462,043 paper pesos compared with 4,584,608 paper pesos to France, the next largest consumer. The largest refrigerating plant in the world, with a daily capacity of 5,000 cattle and 10,000 sheep, is at Buenos Aires. Cattle killed in Argentine in 1933, 3,272,179 head; sheep, 5,193,640; hogs, 1,047,405. Exports in 1933 of hides, 126,585 tons.

Flour milling ranks second to refrigeration. In 1933 176 mills ground 1,899,287 tons of wheat, producing 1,340,036 tons of flour and 538,383 tons of by-products. Exports of flour, 1933, 98,949 tons. Near Bahia Blanca is being constructed the largest grain elevator in the southern hemisphere, with capacity of 81,000 tons. In 1934 there were 22 woollen mills; 6 cotton-spinning mills; 20 cotton textile mills with 3,000 looms; 300 hosiery and knitted wear makers; and 79 silk manufactories. Mining is of no great importance. Gold, silver, and copper are worked in Catamarca, where there are also two valuable tin mines, and gold and copper in San Juan, La Rioja and the south-western territories. Coal is found in the Andine Provinces, in the Cordillera region of Patagonia and in Northern Patagonia. Tungsten is also an important mineral, others being borate, salt, and limestone. During 1933 the crude-oil production in the State-owned oil-fields in Argentina amounted to 5,575,146 barrels; from private oil-fields, 7,428,545 barrels. In addition, she imported 1,299,039 barrels of petroleum and 5,094,628 barrels of fuel oil and other products.

Commerce.

Agriculture accounts for from 50 to 65 per cent. of total exports. Real values of foreign trade in paper pesos, exclusive of coin and bullion:—

—	1930	1931	1932	1933	1934
	Paper Pesos	Paper Pesos	Paper Pesos	Paper Pesos	Paper Pesos
Imports . .	1,679,960,782	1,173,828,311	836,264,536	897,148,929	1,110,000,000
Exports . .	1,395,691,317	1,455,814,660	1,287,782,498	1,120,841,512	1,438,028,969

Gold exports in 1933, 10,080,000 gold pesos; in 1932, 4,989,542 gold pesos; gold imports in 1933, 104,800 gold pesos; in 1932, 98,456 pesos.

Imports and exports 1934. Imports are stated in their 'tariff' or customs values; exports in their 'real' values.

Imports	Paper Pesos	Exports	Paper Pesos
Foodstuffs	81,050,746	Live-stock products:	
Tobacco	15,095,565	Meat & living animals .	208,823,107

Total trade (Board of Trade returns) between Argentina and the United Kingdom for 5 years:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Argentina into U.K..	56.665,769	52,714,214	50,885,373	41,647,818	47,045,712
Exports to Argentina from U.K	25,234,173	14.785,467	10,660,386	13,073,149	14,661,073
Re-exports to Argentina from U.K.	442,006	270,023	202,272	214,107	249,378

Shipping and Navigation.

The total shipping in the foreign trade entering Argentine ports in the twelve months to June 30, 1932, was 12,069,000 tons; cleared, 17,364,000 tons. The total gross tonnage of the mercantile marine (June 30, 1934) was 310,195 (including 304 steamers of 316,153 tons).

Internal Communications.

The first railway concession dates from 1854. Railways open, December 31, 1933, 24,675 miles, of which 5,570 miles belong to the State, and 19,105 miles to private companies. Operating receipts in 1933 of both the State and private railways were 199,360,000 gold pesos as against 211,193,240 gold pesos in 1932. Passenger traffic in 1933 was 140,070,000; freight traffic, 38,500,000 tons. Length of good motor roads in 1932, 6,733 miles (4,233 miles maintained by the National Government); of unsurfaced roads, 133,861 miles. In January, 1934, there were 243,000 motor vehicles in use compared with 435,000 in January, 1931.

Aviation, under the auspices, chiefly, of foreign companies, has developed rapidly in the Republic. Aerial routes for mail and passengers have been

organised from Buenos Aires to numerous points within the Republic and abroad, and from Bahia Blanca to the South coast.

National post office in 1932 handled 691,582,758 letters and (1933) received 7,311,297 telegrams and dispatched 6,547,244 telegrams. National telegraph lines, 29,250 miles in 1933. Number of telephone exchanges in Argentina in 1931, 537, with 250,286 subscribers. Telephone service is operated mainly by the United River Plate Telephone Company and by the Compania Telefonica Argentina in Buenos Aires, both connecting with Chile and Uruguay; they have been absorbed by the International Telephone and Telegraph Company. There are 19 broadcasting stations. Wireless telephony between Buenos Aires, Chile, the United States and Europe is in general use; there are 2 wireless telegraph companies.

International cable service to other Latin American countries and the United States is provided by All America Cables.

Banking and Credit.

According to the First Banking Census taken by the National Bureau of Statistics, on December 31, 1925, there were 112 banks in Argentina with 1,033,946,000 paper pesos of capital and reserves; 91 (1 State Bank—*Banco de la Nacion*—77 other Argentine banks, and 13 foreign banks) were ordinary Discount and Deposit Banks with capital and reserves amounting to 710,228,000 paper pesos, 15 were Mortgage Banks with 310,264,000 paper pesos of capital and reserves and 6 were Pignorative Banks whose capital and reserves amounted to 13,454,000 paper pesos.

The Banco de la Nacion (founded in 1905) reported August 31, 1934, capital of 165,409,286 paper pesos; reserves of 31,025,493 gold pesos (apart from the three special Conversion Funds totalling 30,000,000 gold pesos); cash, 143,685 gold pesos, and 252,768,482 paper pesos; deposits, 1,458,673,846 paper pesos, and 52,776 gold pesos. It has 237 branches. Legislation was adopted in 1935 converting it into a Central Bank on the usual lines; in the past its volume of commercial banking has been nearly as great as that of all the other banks combined.

On April 5, 1915, a national postal savings bank (Caja Nacional de Ahorro Postal) was incorporated. On September 30, 1934, 5,311 branches had 1,578,864 depositors with total deposits amounting to 96,465,687 paper pesos; 3,868 of the branches were in schools. The bank is also patronized largely by married women, who are given, by the law, exclusive control of their accounts.

On December 26, 1934, total stock of gold was 246,842,667 gold pesos; total circulation, 1,187,165,967 paper pesos. In October, 1931, control of purchases and sales of foreign exchange was placed in hands of the Exchange Control Office. By rigid control of the country's purchases of foreign exchange, the New York value was pegged in 1934 between 33 cents and 35 cents. London value, 1934, was between 30⅝*d.* and 24*d.*; in 1933, between 45½*d.* and 35½*d.* The Conversion Office is permitted to issue notes to the Banco de la Nacion, re-discounting prime commercial bills, providing that such notes do not reduce the gold cover below 40 per cent.

Money, Weights, and Measures.

The monetary system of the Republic is nominally on a gold exchange standard, the unit for foreign transactions being the *peso oro* (gold peso)

and for domestic transactions, the *peso moneda nacional* (paper peso). But the Niemeyer report of April 3, 1933, urged the abandonment of this dual system and during the year the Government discontinued the use of the gold peso in foreign exchange and customs.

The gold peso weighs 1·6129 grammes of gold $\frac{9}{10}$ fine; it is divided into 100 *centavos*. The par value 47·62*d*; one pound sterling (at par) = 5·04 gold pesos. Figures in gold pesos are followed by the abbreviation o/s (*oro sellado*, minted gold). The monetary law of November 5, 1881, authorizes the coinage of five and two-and-a-half gold peso pieces. The 5-peso gold piece (the *Argentino*) weighs 8·0645 grammes, ·900 fine, and therefore contains 7·25805 grammes of fine gold. But gold is not widely in circulation.

The paper peso is equal to ·44 gold peso, which makes it worth 1*s.* $8\frac{4}{11}$*d.* (11·45 to the £). To convert paper pesos into gold pesos, multiply by ·44. To convert gold pesos into paper pesos, multiply by 2·2727. Figures in paper pesos are usually followed by the abbreviation m/n (*moneda nacional*, national money). The bulk of the currency in circulation consists of paper notes ranging from 1,000 pesos down to 50 centavos. Five, ten and twenty-centavos pieces of nickel are coined to meet the demand for small currency.

Since January 1, 1887, the use of the metric system is compulsory.

Diplomatic Representatives.

1. Of the Argentine Republic in Great Britain.

Ambassador Extraordinary and Plenipotentiary.—Dr. Manuel Malbran, G.B.E. (Appointed June 5, 1931.)

Counsellor.—Carlos Miguens, C.B.E.

Secretaries.—Dr. Pablo Santos Muñoz; and Dr. Mariano A. Barrenechea.

Commercial Counsellor.—Rodolfo Garcia Arias.

Consul-General in London.—Mario Molina Salas.

There are Consular representatives at Aberdeen, Birmingham, Bradford, Bristol, Cardiff, Dublin, Dundee, Glasgow, Hull, Liverpool, Manchester, Middlesbrough, Newcastle, Newport, Plymouth, Southampton, Swansea.

2. Of Great Britain in the Argentine Republic.

Ambassador Extraordinary and Plenipotentiary.—Sir Henry Getty Chilton, G.C.M.G. (Appointed August 31, 1933.)

Counsellor.—J. H. Leche, O.B.E.

First Secretary.—D. F. Howard, M.C.

Naval Attaché.—Captain R. H. Hallifax, R.N.

Air Attaché.—Wing-Commander K. R. Park, M.C., D.F.C.

Commercial Counsellor.—S. G. Irving, C.M.G.

Commercial Secretary.—E. R. Lingeman.

Consul-General (at Buenos Aires).—Victor H. St. John Huckin.

There are Consuls at Rosario and Port Madryn, and Vice-Consuls at Bahia Blanca, La Plata, Mendoza. Rio Gallegos, San Julian, Santa Cruz, Santa Fe, Villa Constitución and Tucumán.

AUSTRIA.

(DER BUNDESSTAAT ÖSTERREICH.)

Constitution and Government.

THE Republic of Austria was proclaimed on November 12, 1918. The Government was taken in hand by a National Assembly which appointed a temporary cabinet and proceeded to pass laws. The present constitution, which came into force on May 1, 1934, begins with the statement:—"In the Name of God the Almighty, from Whom all right proceeds, the Austrian people receives this Constitution for its Christian, German, Federal State on a corporative foundation." Austria is declared to be a Federal State (*Bundesstaat*), corporatively ordered, consisting of the federal (*Bundesunmittelbare*) City of Vienna and the eight provinces (*Länder*). All citizens are equal before the law: they may be treated unequally in the laws, only so far as objective grounds afford justification. Privileges of birth, estate, and class are excluded. Women have the same rights and obligations as men, except when the law decrees otherwise. Public offices are open equally to all loyal, patriotic citizens who answer statutory requirements. General legislation is performed by the Federal Diet (*Bundestag*), the deciding organ, after previous deliberation of draft laws by the State Council (*Staatsrat*), the Federal Cultural Council (*Bundeskulturrat*), the Federal Economic Council (*Bundeswirtschaftsrat*), and the Provincial Council (*Länderrat*), which are the advisory organs. The State Council will consist of 40 to 50 citizens of merit and character who, from their past conduct and services, may be expected to have a full understanding of the needs and duties of the State, and who will be appointed for 10 years by the President with the Chancellor's countersignature. The Cultural Council will consist of 30 to 40 representatives of the Churches and religious communities, of education, learning, and the arts, who have reached the age of 26. The Economic Council will consist of 70 to 80 representatives delegated by the professional corporations who must also be at least 26 years old and loyal patriots. The seven corporative professions are here enumerated. The Provincial Council will consist of the eight provincial Governors and eight finance members of provincial Governments, together with the Burgomaster of Vienna and his finance member.

The Federal Diet will consist of 20 members of the State Council, 10 members of the Cultural Council, 20 members of the Economic Council, and nine members of the Provincial Council. The State Council will be obliged to report on all Bills presented to it by the Government within a fixed period—the Government alone having legislative initiative—the Cultural Council to report on Bills of cultural importance and the Economic Council to report on Bills of ecomomic importance. Councils may make voluntary reports when obligatory reports are not required of them. These consultative meetings must be held in private.

The Federal Assembly (*Bundesversammlung*), consisting of the entire membership of the four Councils, will meet in public when required to elect three candidates for the Presidency, to attest a new President, to authorize a declaration of war, or to perform other stated functions.

The President may order a popular referendum, in which all citizens of 24 or over may vote *Yes* or *No*—the absolute majority of valid votes to decide—when the Government resolve to submit a rejected Bill, a new Bill, or a question of legislative principle to the people.

The President will be elected by the burgomasters of Austria meeting in Vienna from the three candidates chosen in secret ballot by the Federal Assembly. Candidates must be 35 or over. The presidential term of office is for seven years. Retiring Presidents are eligible for re-election. The President will appoint and dismiss the Chancellor at his discretion; he will appoint and dismiss other Ministers on the proposal and with the counter-signature of the Chancellor or a competent Minister, the counter-signature denoting the assumption of responsibility. The judicial power will be Federal, and separate in all instances from the Administration. No person will be withdrawn from the jurisdiction of his statutory Judge. All Judges will be independent in the exercise of their office, but must retire on reaching an age to be fixed by law.

President of the Republic.—Dr. Wilhelm *Miklas*. Born October 15, 1872. Elected December 5, 1928. Re-elected October 9, 1931.

The Ministry, constituted on July 30, 1934, is as follows:—

Federal Chancellor, Minister of Defence, Education and Justice.—Dr. Kurt *Schuschnigg*.
Vice-Chancellor and Minister of Security.—Ernst Rüdiger *Starhemberg*.
Minister of Finance.—Dr. Karl *Buresch*.
Minister of Commerce and Communications.—Fritz *Stockinger*.
Minister of Social Administration.—E. *Neustädter-Stürmer*.
Minister of the Interior.—Emil *Fey*
Minister of Agriculture and Forestry.—Josef *Reither*.
Minister of Foreign Affairs.—Egon *Berger-Waldenegg*.

Local Government.

The Federal State of Austria comprises 9 provinces, viz., the City of Vienna, Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Tyrol, Vorarlberg, and Burgenland. There is in every province a Provincial Assembly (*Landtag*), consisting of representatives of legally recognized churches or religious groups, educational and school authorities, the arts and sciences, and of the corporations in the province. The executive power in each province rests in the hands of a *Landeshauptmann*, or Governor, nominated by the President from three candidates proposed by the Provincial Assembly. He is assisted by the *Landesstatthalter* and at most by 5 Provincial Councillors (*Landesräte*). The *Landesstatthalter* and the Councillors are nominated by the Provincial Governor.

Every commune has a Diet (*Gemeindetag*) and a Burgomaster, who may be assisted by a Municipal Council. The Communal Diet is composed on the same lines as the Provincial Assembly. The Burgomaster is elected by the Communal Diet.

Area and Population.

For the boundaries of Austria according to the Treaty of St. Germain, signed on September 10, 1919, *see* The Statesman's Year-Book for 1920, pp. 674–5.

The area and population of Austria (census taken on March 22, 1934) are shown as follows:—

Provinces	Area, English square miles	Population (1934)	Percentage of Population 1934	Population per square mile 1934
Vienna	107	1,861,856	27·78	17,400
Lower Austria	7,452	1,512,011	22·33	202·9
Upper Austria	4,626	906,025	13 35	195
Salzburg	2,762	248,188	3 64	89
Styria	6,323	1,016,585	15·00	160
Carinthia	3,680	407.529	6·01	110
Tyrol	4,882	351,888	5·17	72
Vorarlberg	1,005	157.338	2·30	156
Burgenland	1,532	297,642	4·42	194
Total	32,369	6,759 062	100·00	209

Compared with the total population in 1923, the total for 1934 shows an increase of 224,818, or 3·4 per cent.

Movement of population in 1933:—Marriages, 43,925 (6·5 per mille); living births, 96,403 (14·3 per mille); deaths, 88,918 (13·2 per mille); divorces, 6,318 (0·94 per mille). Emigrants, 1932, 2,129; 1933, 1404. Of the emigrants in 1933, 178 went to United States, 32 to Canada, 228 to Brazil, 123 to Argentina, 180 to other American countries, and 6 to Australia.

Principal Towns.

The population (Census 1934, provisional figures) of the principal towns on March 22, 1934, was as follows:—Vienna, 1,874,581 (850,019 males and 1,024,562 females); Graz, 152,627; Linz, 108,854; Innsbruck, 61,003; Salzburg, 40,364; Wiener Neustadt, 36,812; St. Pölten, 36,283; Klagenfurt, 29,847; Baden, 22,253; Steyr 20,471; Villach, 23,965; Mödling, 18,744; Wels, 16,288; Dornbirn, 16,661; Donawitz, 16,685.

Religion.

Religious liberty is one of the fundamental laws of the Republic, and the principle is embodied in the Treaty of St Germain (article 63). In 1910 there were (including Burgenland), 6,225,843 Catholics (93·68 per cent.), 206,505 Protestants (3·11 per cent.), 194,584 Jews (2·93 per cent.), and 19,052 'others' (0·28 per cent.). The Catholic Church has 2 archbishoprics and 4 bishoprics.

Education.

The educational organisation of Austria comprises: (1) elementary schools; (2) middle schools; (3) schools for special subjects; and (4) universities.

Attendance is compulsory at the elementary schools from 6 to 14 in Austria generally, but there are far-reaching facilities for exemption for pupils of 12 years and upwards. The cost of elementary education is borne in the first instance by the communes and provinces. In 1933–34 there were in the Republic 5,335 public and private elementary schools, with 28,480 teachers and 886,505 pupils.

Secondary education is provided in the Gymnasia, Real-Gymnasia, Real-Schools for women, 'Oberlyceum' and High Schools for women. These institutions are maintained by the State, the provinces, the towns, or private individuals. Of all kinds of secondary schools there were (1932–33) 169 with 62,599 pupils, and 4,741 teachers.

There are also 8 Commercial Academies.

Austria has three universities maintained by the State, viz., Vienna (in 1932–33, 749 teachers and 12,870 students), Graz (310 teachers and 2,608 students), and Innsbruck (169 teachers and 3,121 students); and there are

also two technical high schools at Vienna (331 teachers and 3,195 students) and Graz (119 teachers and 764 students); technical high schools and high schools for other special subjects, and a theological high school (Fakultät) at Salzburg for Roman Catholics (number of teachers, 1932–33, 17; students, 198). (It is intended in the near future to turn this into a Catholic University.) There are also 13 other theological colleges, of which 11 are Roman Catholic, 1 Armenian Catholic, and 1 Jewish. In 1933 there were also 36 training colleges for teachers, with 704 lecturers and 5,006 students.

Justice and Crime.

The Supreme Court of Justice (Oberster Gerichtshof) in Vienna is the highest court in the land. Besides there are 3 higher provincial courts (Oberlandesgerichte), 20 provincial and district courts (Landes- und Kreisgerichte). In Vienna is a court for young criminals. There are likewise 242 county courts (Bezirksgerichte), and 1 special court for commercial affairs, 1 federal court, and 11 for industry.

In 1932, 120,826 persons were tried for criminal offences (116,039 in 1931).

Pauperism

Poor relief in Austria is based on regulations dating back to December 3, 1863, according to which the poor, if they cannot obtain assistance from any other source, may claim relief from their native parish. Relief consists of the means of subsistence, medical aid and nursing service during sickness. In every municipality there is a fund for poor relief, derived from endowments, voluntary contributions and certain legal sources, such as fines, contributions from intestate estates of secular priests, etc. If these amounts do not suffice, the municipality must provide for the balance in its budget.

The law for unemployment insurance bears date March 24, 1920. The means for unemployment relief are contributed as to one-half by the employers, and as to the other half by the workers.

Finance.

The budgets for five years provided revenue and expenditure as follows, in thousands of schillings:—

	1931[1]	1932[1]	1933[3]	1934[2 3]	1935[3]
Revenue	2,172,492	1,964,098	1,308,547	1,301,081	1,880,650
Expenditure	2,425,408	1,966,682	1,486,145	1,404,040	1,994,000

[1] Estimated budget as passed by the Legislative Assembly.
[2] Fixed by the Government.
[3] In the budget for 1933, for the first time under social assurance, the sum was shown which the State had to pay, and not the total revenue and expenditure. Monopolies and other undertakings were also shown with actual surplus or deficit.

The following are some of the details of the budget for 1934 in thousands of schillings:—

Revenue	Thousands of Schillings	Expenditure	Thousands of Schillings
Direct Tax Revenue	268,500	Interest on Debt	240,889
Turnover Tax	248,260	Subventions to Provinces and Municipalities	1,958
Customs	232,170	Pensions	210,000
Monopolies (surplus)	229,518	Social welfare	194,703
Telegraphs, Telephones and Post Office (surplus)	—	Justice	50,353
Excise	162,760	Railways (deficit)	119,111
		Army	94,000

The public debt of the Republic of Austria was composed as follows on December 31, 1933 (in schillings):—

Pre-War Debt	348,017,339
War Debt	97,400
Debts incurred by the Republic	3,312,411,145
Total	3,660,525,884

Defence.

1. Army.

By the terms of the Treaty of St. Germain, universal compulsory military service is abolished in Austria, and the total number of military forces in the Austrian Army is limited to 30,000 men, including officers and depôt troops. The effective strength on October 31, 1934, was 1,379 officers, 1,371 non-commissioned officers, and 18,996 men.

Austria is permitted at her own discretion to organise this number of troops either in divisions or in mixed brigades.

The latter organisation has been chosen, and the army has been organised in 6 mixed brigades and 1 independent artillery regiment.

The maximum authorised armaments and stocks of munitions are per 1,000 men:—

Rifles or carbines	1,150	500	rounds of ammunition per arm.
Machine guns	15	10,000	,, ,, ,, ,,
Trench mortars, light	2	1,000	,, ,, ,, ,,
,, ,, medium		500	,, ,, ,, ,,
Guns, field or mountain Howitzers	3	1,000	,, ,, ,, ,,

All officers must be regulars. Officers now serving retained in the army must serve to the age of 40. Officers newly appointed must serve on the active list for 20 consecutive years.

The period of enlistment for non-commissioned officers and privates must be for a total period of not less than 12 consecutive years, including at least six years with the colours. The proportion of officers and men discharged for any reason before the expiration of their term of enlistment must not exceed one-twentieth of the total strength. All measures of mobilisation are forbidden.

The number of gendarmes, customs officers, foresters, and members of police forces must not exceed the number employed in a similar capacity in 1913. Educational establishments and all sporting and other clubs are forbidden to occupy themselves with any military matters. Within two months of the final ratification of the Treaty the air forces of Austria were demobilised. The armed forces of Austria therefore do not include any military or naval air forces. The manufacture, importation, and exportation of aircraft, and parts of aircraft, are forbidden.

The military budget for 1934 amounted to 94,000,000 schillings.

2. Navy.

Austria now has no war fleet.

Production and Industry.

Agriculture forms the main occupation of the country. In 1933 the total acreage sown amounted to 4,926,084 acres. Of the total in 1933, 2,122,992 acres were in Lower Austria, and 1,004,688 acres in Upper Austria.

The size of farms in Austria is as follows: under 0·5 hectare (1·2 acre), 2·91 per cent.; from 0·5 to 5 hectares (1·2 to 12·3 acres), 9·13 per cent.; from 5 to 20 hectares (12·3 to 49·4 acres), 30·68 per cent.; from 20 to 50 hectares (49·4 to 123·5 acres), 17 98 per cent.; from 50 to 200 hectares (123·5 to 494 acres), 15·92 per cent.; over 200 hectares, 23·38 per cent.

The chief products are shown as follows for two years:—

Crop	1932		1933	
	Acreage	Yield (metric tons)	Acreage	Yield (metric tons)
Wheat	534,521	331 848	542,703	397,771
Rye	956,625	615,407	957,663	686 961
Barley	422,697	274,097	422,699	332,930
Oats	758,964	389,813	755,487	502.778
Potatoes	500,074	2,666,069	504,028	2,354,938
Turnips	234,335	2,157,412	242,825	2,296.387
Sugar beet	105,499	1,020,374	114,874	1,067,494

Production of raw sugar in 1930–31 was 150,252 metric tons; in 1931–32, 162,559 metric tons; in 1932–33, 164,898 metric tons; in 1933–34, 170,459 metric tons.

The foodstuffs produced do not suffice for the population. Forests abound and timber forms an appreciable asset of Austria. The number of farm animals on June 14, 1930, was: horses, 247,727; cows, 1,207,137; oxen, 259,847; bulls, 78,764; and calves, 767,101.

In 1933 the production of lignite was 3,014,471 metric tons (3,104,045 metric tons in 1932), and of anthracite, 238,923 metric tons (221,314 metric tons in 1932). There were 4 anthracite mines worked in 1933, and 41 lignite mines. The output of iron ore was 267,032 tons in 1933 (306,796 tons in 1932); lead and zinc ores, 82,672 tons (56,226 tons); copper ore, 32,695 tons (9,044 tons); copper, 4,626 tons (1,987 tons); crude graphite, 14,771 tons (10,598 tons); and salt, 82,400 tons (78,257 tons).

The output of pig iron in 1934 was 133,567 tons as against 87,949 tons in 1933; the output of raw steel was 225,796 tons in 1933 and 204,514 tons in 1932.

According to the industrial census of June 14, 1930, there were in Austria 367,652 industrial establishments employing 1,438,967 people. Of the total the clothing industry was the most important, with 64,271 establishments and 153,436 employees. The 9 factories of the Austrian tobacco monopoly in 1933 made 124,964,000 cigars, 5,409,640,000 cigarettes, and 38,081 metric quintals of smoking tobacco.

Commerce.

Imports and exports for 5 years (in 1,000 schillings) were as follows:—

	1930	1931	1932	1933	1934
Imports	2,738,929	2,209,983	1,399,697	1,191,317	1,154,200
Exports	1,879,614	1,326,758	786,440	815,477	863,000

The following table shows the values of the chief trading groups during 1932 and 1933 in thousands of schillings:—

Group	Imports		Exports	
	1932	1933	1932	1933
Livestock	122,284	100,680	8,586	6,564
Foodstuffs	346,639	268,916	30,956	19,834
Mineral Fuel	140,073	119,864	717	198
Raw material and semi-manufactured goods	301,991	311,538	168,971	193,537
Manufactured goods	472,496	348,249	555,010	552,515
Gold and silver	16,214	42,070	22,200	42,829

The trade in 1933 was distributed among principal countries as follows:

Country	Imports	Exports	Country	Imports	Exports
	1000 Schillings	1000 Schillings		1000 Schillings	1000 Schillings
Czechoslovakia	157,617	63,105	Yugoslavia	105,516	56,951
Germany	233,680	127,985	Hungary	134,963	81,092
Poland	77,740	52,062	Great Britain	37,067	35,275
United States	62,009	19,025	Switzerland	43,648	62,631
Italy	50,429	86 853	Rumania	53,030	45,465

The total trade between England and Austria (Board of Trade returns) for five years were as follows:—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Austria to U.K.	3,389,520	2,729,792	1,091 147	1,265,562	1,664,937
Exports to Austria from U.K.	2,039,555	1,317,918	944,574	878,825	1,060,126
Re-exports to Austria from U.K.	455,516	412,731	226,958	223,886	321,386

Internal Communications.

Austria had in 1933, 4,174 miles of railway lines, of which 2,382 miles were operated by the State, 943 miles were private railways operated by the State on its own account; 286 miles, private railways operated by the State on account of their owners, and 541 miles were private railways operated by private interests. There were also 287 miles of tramways, etc., privately owned. At the end of 1933, 539 miles of the State railways had been electrified. The amount of freight carried by the Federal Railways in 1933, was 18,510,294 metric tons, the number of passengers, 59,997,000. Gross earnings in 1933 were 439,263,425 schillings and expenditure, 465,042,440 schillings.

There were 8,632 miles of road at the end of 1932, of which 1,399 miles were first-class; 3,226 miles second-class; and 4,007 miles third-class.

In 1933 number of pieces of mail handled: internal, 206.968,000 letters, 97,006,000 post-cards, 213,615,000 printed packets. Received from abroad, 35,650,000 letters, 20,857,000 post-cards; sent abroad, 53,093,000 letters and 25,754,000 post-cards.

Length of telegraph line 1933, 4,398 miles; length of wire, 22,820 miles; number of offices, 3,750; number of inland telegrams, 847,874, of foreign telegrams, 1,577,222

At the end of 1933 there were 239,870 telephones in use on the principal systems in the country. Length of line (1933), 20,945 miles; length of wire, 467,562 miles; inter-urban cables, lines 30,246 miles; wire 123,485 miles.

An Austrian Air Transportation Company (Oesterreichische Luftverkehrs A.G.) is subsidised by the State (1,680,000 schillings in 1934), and runs a series of regular services.

Banking and Credit.

A new National Bank for Austria was opened on January 1, 1923. It has capital of 43,200,000 schillings. It is a private, not a State institution. The note circulation on February 7, 1935, was 848,487,000 schillings. Gold and bullion amounted to 242,075,000 schillings. Savings banks deposits amounted to 1,418,038,000 schillings in Dec. 1933.

According to the Treaty of St. Germain the Austro-Hungarian Bank was liquidated on July 29, 1923.

Money, Weights and Measures.

The Austrian unit of currency was the krone. But as from June 30, 1925, there came into general use a new unit, the gold *schilling*, made up of 100 *groschen*. The *schilling* contains 0·21172086 grammes of fine gold. It was equivalent to 10,000 kronen. The National Bank issues token coins as follows:—5 schilling pieces (1934), silver; 2 schilling pieces, silver; 1 schilling pieces, silver; 1 schilling pieces (1934), copper and nickel; half-schilling pieces, silver; half-schilling pieces (1934), copper and nickel; 10 groschen pieces (copper and nickel), 5 groschen pieces (copper and nickel), 2 groschen pieces (copper) and 1 groschen pieces (copper). Since July, 1926, 100 schilling pieces, gold, and 25 schilling pieces, gold, have also been issued.

The metric system of weights and measures is in use.

Diplomatic Representatives.

1. Of Austria in Great Britain.

Minister Plenipotentiary.—Georg Franckenstein. Appointed October 6, 1920.

Counsellors of Legation.—Ludwig Blaas and Dr. Max Attems.

Consul-General in London.—Charles Seligmann.

2. Of Great Britain in Austria.

Minister Plenipotentiary.—Sir Walford Harmood Montague Selby, K.C.M.G., C.B., C.V.O. (appointed July 6, 1933).

First Secretary.—W. H. B. Mack.

Second Secretary.—W. H. Montagu-Pollock.

Commercial Secretary.—R. M. A. E. Turner, O.B.E.

Military Attaché.—Major K. V. B. Benfield, D.S.O., M.C.

Consul at Vienna.—J. W. Taylor, M.B.E.

BELGIUM.

(ROYAUME DE BELGIQUE—KONIGLIJK BELGIE.)

Reigning King.

Leopold III, born November 3, 1901, son of the late King Albert (died February 17, 1934), and of Princess *Elizabeth of Bavaria*; succeeded his father, February 23, 1934; married on Nov. 4, 1926, to Princess *Astrid of Sweden.*

Children of the King.—(1) Josephine Charlotte, born October 11, 1927. (2) Prince Baudouin, born September 7, 1930. (3) Prince Albert, born June 6, 1934.

Brother and Sister of the King.—(1) Prince *Charles*, Count of Flanders, born Oct. 10, 1903. (2) Princess *Marie-José*, born Aug. 4, 1906, married to Prince Umberto, heir-apparent to the crown of Italy, on January 8, 1930.

Aunts of the King.—(1) Princess *Henriette*, born Nov. 30, 1870; married Feb. 12, 1896, to Prince Emmanuel of Orleans, Duke of Vendôme. (2) Princess *Josephine*, born Oct. 18, 1872; married May 28, 1904, to Prince Charles of Hohenzollern.

The King has a civil list of 12,000,000 francs and the Queen-Mother, of 2,000,000 francs.

The Kingdom of Belgium formed itself into an independent State in 1830, having from 1815 been a part of the Netherlands. The secession was decreed on October 4, 1830, by a Provisional Government, established in consequence of a revolution which broke out at Brussels, on August 25, 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on June 4, 1831; he ascended the throne July 21, 1831. On his death in 1865 he was succeeded by his son, Leopold II., who reigned until 1909.

By the Treaty of London, Nov. 15, 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It was not until after the signing of the Treaty of London, April 19, 1839, which established peace between King Leopold I. and the King of the Netherlands, that all the States of Europe recognised the Kingdom of

Belgium. In the Treaty of Versailles (June 28, 1919), it is stated that as the treaties of 1839 'no longer conform to the requirements of the situation,' these are abrogated and will be replaced by other treaties.

Constitution and Government.

According to the Constitution of 1831 Belgium is 'a constitutional, representative, and hereditary monarchy.' The legislative power is vested in the King, the Senate, and the Chamber of Representatives. The royal succession is in the direct male line in the order of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the two Chambers. No act of the King can have effect unless countersigned by one of his Ministers, who thus becomes responsible for it. The King convokes, prorogues, and dissolves the Chambers. In default of male heirs, the King may nominate his successor with the consent of the Chambers. If the successor be under eighteen years of age, the two Chambers meet together for the purpose of nominating a regent during the minority.

Those sections of the Belgian Constitution which regulate the organisation of the legislative power were revised in October, 1921. For both Senate and Chamber all elections are held on the principle of universal suffrage.

The Senate consists of members elected for four years, partly directly and partly indirectly. The number elected directly is equal to half the number of members of the Chamber of Representatives. The constituent body is similar to that which elects deputies to the Chamber; the minimum age of electors is fixed at twenty-one years, and the minimum length of residence required is six months. In Belgium only the following women may vote in parliamentary elections: (1) Widows, not re-married, of soldiers killed in the Great War; widows of Belgian citizens killed by the enemy during the War, or failing them, their mothers, if the latter are widows; (2) Widowed mothers of bachelor soldiers killed in the War: (3) Women condemned to imprisonment or subjected to preventive detention, for political reasons, during the enemy occupation of Belgium. In the election of members both of the Senate and Chamber of Representatives directly, the principle of proportional representation of parties was introduced by Law of December 29, 1899. Senators elected indirectly are chosen by the provincial councils, on the basis of one for 200,000 inhabitants. Every addition of 125,000 inhabitants gives the right to one senator more. Each provincial council elects at least three senators. There are at present forty provincial senators. No one, during two years preceding the election, must have been a member of the council appointing him. Senators are elected by the Senate itself in the proportion of half of the preceding category. The senators belonging to these two latter categories are also elected by the method of proportional representation. All senators must be at least forty years of age. They receive 28,000 francs per annum. Sons of the King, or failing these, Belgian princes of the reigning branch of the Royal Family are by right senators at the age of eighteen, but have no voice in the deliberations till the age of twenty-five years.

The members of the Chamber of Representatives are all elected directly by the electoral body. Their number at present, 187 (law of March 6, 1925), is proportioned to the population, and cannot exceed one for every 40,000 inhabitants. They sit for four years. Deputies must be not less than twenty-five years of age, and resident in Belgium. Each deputy has an annual indemnity of 42,000 francs, and a free pass all the year over Government and Companies' railways.

The Senate and Chamber meet annually in the month of November, and must sit for at least forty days; but the King has the power of convoking them on extraordinary occasions, and of dissolving them either simultaneously or separately. In the latter case a new election must take place within forty days, and a meeting of the Chambers within two months. An adjournment cannot be made for a period exceeding one month without the consent of the Chambers. Money Bills and Bills relating to the contingent for the army originate in the Chamber of Representatives.

Parties in the Chamber elected November 27, 1932:—Catholics, 79; Socialists, 73; Liberals, 24; Communists, 3; Flemish Nationalists, 8.

Parties in the Senate elected November 30, 1932:—Catholics, 74; Liberals, 21; Socialists, 63; Flemish Nationalists, 1.

The Executive Government, appointed March 25, 1935, is composed as follows:—

Prime Minister and Minister of Foreign Affairs.—M. Paul *Van Zeeland* (Catholic).
Minister of Economic Affairs.—M. Van *Isacker* (Catholic).
Minister of the Colonies.—M. *Rubbens* (Catholic).
Minister of Interior.—M. du Bus *de Warnasse* (Catholic).
Minister of Agriculture.—M. *de Schryver* (Christian Democrat).
Minister of National Defence.—M. Albert *Devèze* (Liberal).
Minister of Education and Fine Arts.—M. François *Bovesse* (Liberal).
Minister of Finance.—M. Max Leo *Gerard* (Liberal).
Minister of Justice.—M Eugène *Foudan* (Socialist).
Minister of Transport, Posts and Telegraphs.—M. Paul *Spaak* (Socialist—Left Wing).
Minister of Public Works and Unemployment.—M. *de Man* (Socialist).
Minister of Labour.—M. Achille *Delattre* (Socialist).
Ministers Without Portfolio.—Vicomte *Poullet* (Catholic); M. Emile *Vandervelde* (Socialist); M. Paul *Hymans* (Liberal).

Local Government.

The provinces and communes (2,670 in 1933) of Belgium have a large measure of autonomous government.

In regard to the communal electorate, the law of April 15, 1920, definitely lays it down that all Belgians over 21 years of age without distinction of sex, who have been domiciled for at least six months, have the right to vote. Proportional representation is applied to the communal elections, and communal councils are to be renewed every six years. In each commune there is a college composed of the burgomaster, the president, and a certain number of aldermen.

Area and Population.

Belgium (including the districts of Eupen and Malmédy) has an area of 30,506 square kilometres, or 11,775 English square miles. The following table shows the population at various dates:—

Census Years	Population	Total Increase	Increase per cent. per annum	Census Years	Population	Total Increase	Increase per cent. per annum
1876	5,336,185	508,352	1·05	1910	7,423,784	730,236	1·09
1890	6,069,321	549,312	0·99	1920	7,465,782	41,998	0·06
1900	6,693,548	624,227	1·03	1930	8,092,004	626,222	0·84

Area and population of provinces :—

Total .	11,775	8,092,004	8,247,950	700

[1] The cantons of Eupen and Malmédy, ceded to Belgium by the Treaty of Versailles were joined to the province of Liége by a decree of March 6, 1925.

According to the Census of 1920, 477,658 people were engaged in agriculture, 2,906 in fishing, 1,466,646 in industry, 566,340 in commerce and transport, 116,017 in the liberal professions, 173,037 in the civil service, and 160,081 in domestic service.

In 1932 there were 4,067,056 males and 4,146,393 females; in 1933, 4,082,973 males and 4,164,977 females.

In 1930 the foreigners in Belgium were: Germans, 12,749 (7,960 in 1920); French, 70,201 (67,309 in 1920); Dutch, 64,079 (39,051 in 1920); British, 11,532 (6,246 in 1920); Polish, 48,840 (5,329 in 1920); Italian, 34,890 (3,723 in 1920); total, all nationalities, 316,982 (149,677 in 1920).

Vital statistics for 4 years :—

—	Marriages	Births	Deaths	Excess of births over deaths
1930	71,624	151,406	107,468	+ 43,938
1931	66,168	148,538	108,017	+ 40,521
1932	62,186	144,835	108,226	+ 36,609
1933	65,098	135,769	108,377	+ 27,392

Of the living births in 1933, 4,274 were illegitimate. There were also 4,674 still-births.

Divorces in 1931, 2,531; in 1932, 2,522; in 1933, 2,616.

Emigration in 1932, 18,286 (16,508 to European countries and 1,778 to extra-European countries); in 1933, 16,229 (14,344 to European countries and 1,885 to extra-European countries). Immigration in 1932, 26,212; in 1933, 19,325.

The most important towns, with estimated population on December 31, 1933 :—

Brussels and suburbs[1] .	891,422	Mechlin (Malines) . .	61,757
Antwerp (Anvers) . .	279,478	Borgerhout . . .	55,970
Ghent (Gand) . . .	168,319	Bruges (Brugge) . .	52,289
Liége (Luttich) . .	164,908	Deurne	51,110

[1] The suburbs comprise 15 distinct communes, viz., Anderlecht, Etterbeek, Forest Ixelles, Jette, Koekelberg, Molenbeek St. Jean, St. Gilles, St Josse-ten-Noode, Schaerbeek, Uccle, Woluwe St. Lambert, Auderghem, Watermael-Boitsfort, Woluwe-St. Pierre.

Ostend (Ostende)	48,050	Hoboken	32,854
Seraing	44,847	Namur	31,664
Berchem	43,654	Jumet	29,806
Verviers	43,542	Roulers	28,774
St. Nicolas	40,215	Lierre	28,329
Alost	39,770	Turnhout	27,941
Courtrai	39,728	Charleroi	27,875
Louvain (Loewen)	38,433	Mons	26,752
Tournai	36,214	Herstal	27,024
Mouscron	35,433	Merscem	27,056

Religion.

Of the inhabitants professing a religion the majority are Roman Catholic; but no inquiry as to the profession of faith is now made at the censuses. There are, however, statistics concerning the clergy, and according to these there were in 1932:—Roman Catholic higher clergy, 87; inferior clergy, 6,206; Protestant pastors, 34; Anglican Church, 9 chaplains; Jews (rabbis and ministers), 17. The State does not interfere in any way with the internal affairs of either Catholic or Protestant Churches. There is full religious liberty, and part of the income of the ministers of all denominations is paid from the national treasury.

In 1920 there were six Roman Catholic dioceses, 204 deaneries, 3,679 Catholic churches and chapels, 6 large and 11 small seminaries.

The Protestant (Evangelical) Church is under a synod.

Education.

There are universities at Brussels, Louvain, Ghent, and Liége, the two latter being State institutions. In October, 1930, Ghent University became a Flemish University. In 1932–33 Brussels had 2,828 students; Ghent, 1,851; Liége, 2,812; and Louvain, 3,965. On November 11, 1923, the Colonial School at Antwerp (founded January 11, 1920) and the School of Tropical Medicine were constituted a Colonial University.

There were also 31 technical and commercial high schools, the Royal Academy of Fine Arts at Antwerp, 2 State agricultural institutes (at Gembloux and Ghent), and a State veterinary school at Cureghem, 65 schools of design, and 4 royal conservatoires at Brussels, Liége, Ghent, and Antwerp. *Higher Education* (Dec. 31, 1932): 24 royal athenæums, with 8,750 pupils; 23 *sections d'athenée* with 2,033 pupils (1,141 boys and 892 girls); 5 communal and provincial colleges with 1,900 pupils, and 10 private colleges with 2,282 pupils. There were also 8 lycées for girls with 2,184 pupils. The next grades of schools are the higher grade schools, of which there were 148 State schools (98 for boys and 50 for girls) with 38,136 pupils (26,311 boys and 11,825 girls), 14 communal and provincial (7 for boys and 7 for girls) with 4,652 pupils (2,512 boys and 2,140 girls), and 5 private higher-grade schools with 1,260 pupils (2 for boys with 382 pupils, and 3 for girls with 878 pupils). *Elementary Education* (December 31, 1933): there were 8,587 primary schools, with 973,989 pupils; 4,057 infant schools with 257,747 pupils; and 1,135 adult schools with 30,030 pupils. *Normal Schools*: there are (1933) 7 for training secondary teachers (483 students) and 81 for training elementary teachers (9,720 students).

There are many private or free schools, mostly under ecclesiastical care. No statistics are available for these.

Each commune must have at least one primary school. The cost of

primary instruction devolves on the communes, with subsidies from the State and provinces.

In 1932, there were 2,388 libraries, with 4,330,782 volumes and 649,558 readers; number of volumes borrowed, 8,207,433.

French and Flemish are both spoken.

Justice and Crime.

Judges are appointed for life. There is one Court of Cassation, three Courts of Appeal, and Assize Courts for criminal cases. There are 26 judicial districts, each with a Court of first instance. In each of the 230 cantons is a justice and judge of the peace. There are, besides, various special tribunals. There is trial by jury.

Pauperism.

Apart from private charity, the poor are assisted by the communes through the agency of the *bureaux de bienfaisance* whose duty it is to provide outdoor relief, and by the governing bodies of the *hospices civils*. Provisions of a national character have been made for looking after war orphans and men disabled in the war. Certain other establishments, either State or provincial, provide for the needs of deaf-mutes and the blind, and of children who are placed under the control of the courts. Provision is also made for repressing begging and providing shelter for the homeless.

Finance.

Budget estimates (ordinary) for 5 years :—

	1931	1932	1933	1934	1935
	1,000 francs	1,000 francs	1,000 francs	1,000 francs	1,000 francs
Revenue . . .	11,685,000	9,091,194	10,330 044	10,366,306	9,842,454
Expenditure .	11,976,546	12,117,408	10,451,785	10,427,775	9,902,584

Ordinary budget estimates of revenue and expenditure for 1934 :—

Revenue	1,000 francs	Expenditure	1,000 francs
Direct taxes	3,057,250	Public debt	4,147,792
Customs and excise . .	2,868,295	Civil List	41,393
Stamp duties	2,836,600	Foreign affairs . . .	75,834
Other ordinary receipts and taxes	1,391 618	Justice	291,577
Postal	400,000	Education	1,041,751
		Public Works . . .	239.588
		Social Insurance . . .	894,512
		National defence . . .	869,356
Total of all ordinary receipts . . .	9.863.360	Total of all ordinary expenditure . .	10,384,206

On September 30, 1934, the Belgian public debt amounted to 56,715,000,000 Belgian francs. Internal long term debt was 28,474,000,000 francs; internal short debt, 1,630,000,000 francs; total internal debt, 30,104,000,000 francs. External long term debt was 26,611,000,000 francs.

On October 25, 1926, a debt of 20,000,000*l.* was contracted, for 30 years, for the purpose of stabilising the franc.

Defence.

Army.

According to the Military Law passed in 1923, the Belgian Army is recruited by means of annual calls to the Colours and by voluntary enlistments. Military service is compulsory for those called to the Colours.

Voluntary enlistment is 5 years (for youths less than 17), 4 years (for youths less than 18), and 3 years (for youths over 18).

By the law of 1928 the period of service of 21,000 of the annual contingent is 14 months in the supplementary orders, 13 months for cavalry, horse artillery, and the routine troops of Liége, 12 months for the remainder. The rest of the annual contingent, about 23,000, does 8 months active service. The duration of military obligation is 25 years, of which 15 are in the Regular Army and reserve, and 10 years in the Territorial Army.

Military expenditure, 1934, 885,500,000 francs.

The strength of the army with the Colours for 1934, exclusive of forces overseas, was 4,236 officers and 63,610 other ranks, organised as follows:

	Army Corps	Divns.	Brigades	Regts.	Btns.	Coys.	Squadrons			Batteries	Air Crafts	
	Regular	Regular		Regular	Regular	Regular	Cavalry	Cyclist	M. gun	Regular	B'floons	Flights
Infantry	3	6	—	18	60[1]	234[2]	—	—	—	—	—	—
Cavalry	1	2	—	8[3]	—	—	24	8	16	—	—	—
Artillery—												
Field	—	—	—	9	—	—	—	—	—	82	—	—
Horse	—	—	—	1	—	—	—	—	—	6	—	—
Heavy	—	—	1	2	—	—	—	—	—	14	—	—
Engineers	—	—	—	3	—	53	—	—	—	—	—	—

Air Force	—	—	—	2	—	—	—	—	—	—	7	—
Tanks	—	—	—	—	1	—	—	—	—	—	—	13

[1] Includes 6 Machine gun Battalions. [2] Includes 72 Machine gun Companies.
[3] Including 2 cyclist regiments.

The number of aeroplanes in service was 195.

In 1934 an elaborate scheme of fortification of the Eastern frontier was begun.

Navy.

On grounds of economy, the small Navy formerly maintained by Belgium has been abolished. The *ex*-British sloop *Zinnia*, of 1,200 tons, is still employed on fishery protection service.

Production and Industry.

I. Agriculture.

Of the total area of 3,044,400 hectares, there were in 1933, 1,832,463 hectares under cultivation, of which 39·80 per cent. were under cereals, 1·25 per cent. vegetables, 4·02 per cent. industrial plants, 13·85 per cent. root crops and 41·08 per cent. forage. In 1932, 1,835,466 hectares were under cultivation. The forest area covers 18 per cent. of the land surface.

The following figures show the yield of the chief crops for three years:—

Crop	Acreage			Produce in metric tons.		
	1931	1932	1933	1931	1932	1933
Wheat	381,182	385,784	412,043	376,051	418,466	416,054
Barley	82,579	88,537	91,570	87,472	102,349	100,430
Oats	728,465	712,170	737,591	702,293	760,376	830,404
Rye	543,588	561,836	553,685	520.277	601,042	566,694
Potatoes	425,124	435,283	403,701	3,576,860	4,439,008	3,689,339
Beet (sugar)	128,321	132.051	129,314	1,465,541	1,736,057	1,515,795
Beet (fodder)	207,888	208,371	210,518	5,327,674	6,183,061	5,271,691
Tobacco	6,999	6,594	6,639	6,563	6,209	6,385

On December 31, 1933, there were 233,289 horses, 1,812,607 horned cattle (including 946,515 dairy cows), and 1,352,526 pigs.

II. Mining and Metals and other Industries.

Coal production (in metric tons):—

Year	Coal	Briquettes	Coke	Workpeople
1930	27,414,730	1,875,210	5,285,610	162,470
1931	27,042,440	1,850,360	4,876,850	159,132
1932	21,413,550	1,316,990	4,410,950	143,723
1933[1]	25,277,700	1,384,000	4,544,900	134,479
1934[1]	26,365,800	1,350,800	4,363,200	125,114

[1] Provisional.

The following table summarises the production of iron and steel and crude zinc:—

Products	1913	1932	1933	1934
	Metric tons	Metric tons	Metric tons	Metric tons
Pig-iron	2,484,696	2,748,740	2,744,600	2,907,300
Wrought iron	304,350	35,400	38,800	57,500
Steel	2,466,630	2,751,590	2,688,700	2,900,100
Wrought steel	1,796,010	2,048.190	2,087,600	2,174,700
Crude zinc	204,228	96,330	—	—

In 1931, the value of the pig-iron was 1,372,672,000 Belgian francs; of wrought steel 2,971,260,000 francs; and of zinc 268,206,000 francs. In 1932, the production of lead amounted to 70,850 metric tons, value 151,527,000 francs.

In 1933, there were 38 sugar factories, output 229,829 metric tons of raw sugar; 13 white sugar refineries, output 194,175 tons; 21 distilleries, output 322,873 hectolitres of potable and industrial alcohol; 1,457 breweries, output 14,666,688 hectolitres of beer; 18 margarine factories, output 34,700 tons; 46 vinegar factories, output 184,369 hectolitres; 11 match factories, output 42,428 million matches.

According to an industrial census taken on December 31, 1930, the number of people engaged in industry was 1,938,118 (1,592,351 men and 345,767 women); of these, 222,535 were employers, 49,980 managers, 184,850 clerical employees and 1,480,753 operatives. The industries with the largest number of workers were: metals, 292,200; textiles, 225,650; building, 159,597; transport, 109,658; mining, 160,964; timber and furniture, 101,362. In commercial life there were 564,577 (321,022 men

and 243,555 women); of these 186,871 were engaged in the provision of food and 106,855 in the hotel industry.

Commerce.

By the Convention concluded at Brussels on July 25, 1921, between Belgium and Luxemburg and ratified on March 5, 1922, an Economic Union was formed by the two countries, and the Customs frontier between them was abolished on May 1, 1922.

The following table shows imports and exports for 6 years (in thousands of paper francs):—

Year	Imports	Exports	Year	Imports	Exports
	1000 francs	1000 francs		1000 francs	1000 francs
1929	35,623,791	31,879,905	1932	16,424,375	15,130,450
1930	31,047,016	26,151,571	1933	15,242,863	14,288,246
1931	23,964,566	23,235,797	1934[1]	14,021,271	13,698,285

[1] Provisional.

The imports and exports, special trade, for 1934[1] were made up as follows:—

—	Imports		Exports	
	Metric tons	1000 francs	Metric tons	1000 francs
Live animals	10,502	39,745	6,121	49,741
Foodstuffs and beverages	3,783,912	2,896,350	551,991	776,552
Raw materials	27,265,276	6,863,362	14,216,336	5,257,548
Manufactures	666,426	3,902,617	5,211,308	7,359,551
Gold and Silver (bullion and coin)	52	319,197	251	254,893

[1] Provisional figures.

Trade by principal countries:—

	Imports from		Exports to	
	1933	1934	1933	1934
	1000 francs	1000 francs	1000 francs	1000 francs
France	2,580,562	2,336,868	2,933,727	2,409,358
United States	1,200,897	1,010,359	719,798	594,452
United Kingdom	1,372,359	1,097,928	1,791,593	1,847,734
Netherlands	1,741,773	1,436,643	1,767,322	1,548,262
Germany	2,462,905	1,998,413	1,386,678	1,559,250
Argentine Republic	909,830	948,928	330,574	452,462
Italy	189,422	162,109	350,124	335,455
Switzerland	192,343	171,745	547,219	484,260
Belgian Congo	639,401	754,466	148,986	134,114

In 1933 the principal articles imported into the United Kingdom from Belgium (according to Board of Trade returns) were:—cement, 107,833*l.*; glass and glass ware, 1,107,496*l.*; cotton piece goods, 332,660*l.*; zinc manufactures, 290,196*l.*; iron and steel bars, etc., 846,622*l.*; billets, etc., 376,194*l.* The principal exports to Belgium were:—cotton piece goods, 359,219*l.*; iron and steel manufactures, 436,604*l.*; machinery, 605,076*l.*; coal, 926,520*l.*; chemicals, 144,015*l.*; cotton yarns, 414,213*l.*; woollen piece goods, 510,109*l.*

The total trade between England and Belgium for 5 years was as follows:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Belgium to U.K. .	38,015,736	33,189,870	16,022,688	12,918,076	14,531,155
Exports to Belgium from U.K. .	15,035,266	10,025,509	8,678,094	8,833,744	8,801,505
Re-exports to Belgium from U.K.	6,543,682	4,547,126	4,131,112	4,107,132	4,110,601

Shipping and Navigation.

On January 1, 1934, the Belgian merchant fleet was composed of 138 ships of 311,009 tons, among which were 119 steamers of 269,712 tons.

There were 36 Belgian shipping companies at the beginning of 1931, of which the most important were the Compagnie Maritime Belge, with 44 ships, and the Adolf Deppe, with 35 ships.

The navigation at Belgian ports was as follows:—Number of vessels entered, 1934, 16,609; tonnage, 26,033,102; 1933, 15,583; tonnage, 25,395,675. Number of vessels cleared, 1934, 16,615; tonnage, 26,072,066; 1933, 15,508; tonnage, 25,396,034. In 1934, 11,917 vessels of 21,202,581 tons entered the port of Antwerp; in 1933, 11,166 vessels of 20,823,580 tons.

Internal Communications.

The total length of the roads in Belgium (1933) was as follows:—State roads, 5,468 miles; provincial roads, 980 miles; conceded roads, 17 miles; total, 6,465 miles. The majority of the roads are paved with stone.

The total length of navigable waterways (rivers and canals) in 1932 was 1,036 miles.

In September, 1926, the State handed over its control of the railways to a private company, the Société Nationale des Chemins de Fer Belges for a period of 75 years. The length of railway operated on January 1, 1934, was 3,201 miles of main line, of which 3,019 miles were operated by the Société Nationale and 182 miles by 4 other companies. There were also 3,171 miles of provincial lines. It is proposed to electrify the railway system of the country. Receipts in 1934 were 2,216,000,000 francs, and expenditure was 2,261,000,000 francs. Traffic on the main lines was as follows in 1933: passengers, 202,858,000; goods, 74,872,000 metric tons. On the provincial lines: 161,000,000 passengers and 4 million metric tons of goods.

In 1933 the Post Office in Belgium handled 288,941,000 private letters, 71,344,000 official letters, 83,395,000 post-cards, 401,671,000 packets of printed matter, and 426,488,000 newspapers. On December 31, 1933, there were 1,697 post offices in Belgium. The gross revenue of the Post Office in the year 1933 amounted to 401,727,200 francs, and the expenditure to 389,300,000 francs (in 1932, 420,724,300 and 426,400,000 respectively).

A Régie of telegraphs and telephones for running the services on business lines was created by the law of July 19, 1930, effective Nov. 1, 1930. In 1933 the telegraph system carried 7,589,554 dispatches, of which 1,265,926 were official. Total length of public telegraph wires was 35,327 miles, and of line 6,455 miles. There were 1,532 telegraph offices. Receipts for 1933 were 57,756,400 francs; expenditure, 66,267,214 francs (1932: 60,419,957 and 78,278,929 francs respectively).

In 1933 there were 232 radiograph stations and 25,133 radiotelegrams were despatched.

In 1933, the telephone service comprised 480 exchanges, connecting 536 public telephone stations and 234,223 subscribers. There were

1,793,930 miles of telephone line in service, including 1,454,624 miles of local line and 339,306 miles of inter-urban and international lines, and the total number of calls, including 2,919,298 international calls, was 241,318,051. Receipts in 1933: 296,829,000 francs; expenditure: 280,113,000 francs (1932: 295.776,900 and 287,012 000 respectively).

The following are some traffic figures relating to Belgian Air Service (Brussels, Ostend, Antwerp, Liége and Le Zoute):—

	General Traffic				Belgian Traffic (ton. kilometres)			
	1930	1931	1932	1933	1930	1931	1932	1933
Passengers . .	31,767	27,701	26 262	34,304	180,594	223,648	264,428	356,274
Freight (kilos) .	1,391,114	1,389,799	1,103,870	1,243,208	100,571	122,772	86,842	107,264
Mails (kilos) .	173,852	154,686	90,082	82,503	15,202	21,688	15,073	12,318

Money and Credit

The *franc*, containing 0·0418422 gramme of fine gold, is the unit of currency.

No gold had been minted since 1882 (save only 5,000.000 francs struck in 1914), and no silver 5-franc pieces since 1876, but in Dec. 1934 new 20 franc gold pieces were issued

On October 26, 1926, the Belgian franc was stabilised and the paper currency relinked to gold, when all notes of the National Bank of Belgium became payable in gold or its equivalent in foreign currency. A new currency unit—called the *Belga*, with a weight of 0·20921 grammes of fine gold—has been introduced. One belga equals five paper francs and 35 belgas equal £1 gold. The franc, however, remains the basis of the monetary system, and will continue to circulate in the country, and is the medium of exchange in all domestic business. New nickel coins of the value of 5 francs or 1 belga were put into circulation in 1930; 20-franc nickel pieces were recently minted. The use of the belga is compulsory in all foreign exchange transactions. To provide the necessary funds, a stabilisation loan for the equivalent of 100,000,000 dollars was floated abroad.

The one bank of issue in Belgium is the National Bank, instituted 1850. By law of March 26, 1900, its constitution was modified, and its duration extended to January 1, 1929. In 1926 its privileges were prolonged for a further 25 years. Its capital and reserve amounted in 1927 to 264,063,000 francs. It is the cashier of the State, and is authorised to carry on the usual banking operations. Its reserve, in gold or foreign gold securities, must be equal to 40 per cent. of its right engagements, 75 per cent. of which must be in gold. Its position on February 7, 1935, was (in thousands of belgas):—

—	1000 belgas	—	1000 belgas
Gold and silver . . .	2,625,699	Notes in circulation . .	3,623,113
Securities	638,196	Current accounts . .	210,699

There are joint-stock and private banks, also agricultural banks, credit unions, and popular banks.

The popular savings bank in Belgium is mainly concentrated in the Caisse Générale d'Epargne et de Retraite, at Brussels. The Caisse d'Epargne is a private company with legally regulated functions and operates under the

supervision of the Minister of Finance. It co-operates with the Belgian postal service, thus obviating any need of a postal-savings system. On December 31, 1933, this institution had 5,358,267 accounts, with deposits amounting to 10,054,255,000 francs.

The weights and measures are those of the metric system.

Diplomatic Representatives.

1. Of Belgium in Great Britain.

Ambassador.—Baron de Cartier de Marchienne, G.C.V.O. (appointed in 1927).

Counsellor of Embassy.—Robert Silvercruys.

First Secretary.—Comte Antoine de Laubespin.

Military Attaché.—General Major A. Nyssens.

Commercial Counsellor.—Charles Bastin.

Vice-Consul in London.—Jules Wuidart.

2. Of Great Britain in Belgium.

Ambassador.—Sir Esmond Ovey, K.C.M.G., M.V.O. (appointed March 19, 1934).

First Secretary.—D. Mackillop.

Third Secretary.—R. E. Barclay.

Commercial Secretary.—N. S. Reyntiens, O.B.E.

Naval Attaché.—Capt. C. F. Hammill, R.N.

Military Attaché.—Brevet-Major D. K. Paris, M.C.

Air-Attaché.—Group-Capt. R. M. Field.

There is a Consul-General at Antwerp, Consuls at Liége, Leopoldville and Elizabethville (Congo), and Vice-Consuls at Brussels, Ghent, Ostend, Charleroi, Matadi and Stanleyville (Congo).

Statistical and other Books of Reference concerning Belgium.

BELGIAN CONGO.

(CONGO BELGE.)

Constitution and Government.—The Congo Independent State was founded in 1885 by Leopold II., King of the Belgians, and the State was placed under his sovereignty.

The annexation of the State to Belgium was provided for by treaty of November 28, 1907, which was approved by the chambers of the Belgian Legislature in August and September and by the King on October 18, 1908. The Minister for the Colonies is appointed by the King, and is a member of

the Council of Ministers. He is President of the Colonial Council, consisting of 15 members, 8 of whom are appointed by the King, and 3 chosen by the Senate and 3 by the Chamber of Representatives. One of those appointed by the King, and one chosen by the Legislative Chambers, retire annually, but may be re-appointed. The King is represented in the Colony by a Governor-General, assisted by a Vice-Governor-General, one or more State-Inspectors, and six Provincial Commissioners. The budget is presented to the Chambers, and voted by them; the financial accounts have to be verified by the Court of Accounts. An annual report on the Congo Administration has to be presented to the Chambers.

The Annexation has been recognised by all the Powers.

Governor-General.—Lieut.-General Tilkens (appointed December 27, 1927).

The precise boundaries of the Congo Colony were defined by the neutrality declarations of August, 1885, and December, 1894, and by treaties with Germany, Great Britain, France, and Portugal.

The Colony is divided into six Provinces and sixteen administrative districts. Each district is divided into administrative territories, of which there are 104 in the whole country. The capital of each province bears the name of the province itself. *The Elisabethville Province*; districts: Haut-Katanga, Lualaba, Tanganyika. *The Léopoldville Province*; districts: Bas-Congo, Léopoldville, Kwango, Lake Léopold II. *The Coquilhatville Province*; districts: Congo-Ubangi, Tshuapa. *The Lusambo Province*; districts: Sankuru, Kasaï. *The Costermansville Province*; districts: Kivu, Maniéma. *The Stanleyville Province*; districts: Uélé, Kibali-Ituri, Stanleyville. The capital of the Colony, formerly Boma, was, by royal decision (1923), changed to Léopoldville. At the head of each Province there is a Provincial Commissioner.

The districts of **Ruanda and Urundi** (formerly in German East Africa) have been ceded to Belgium as mandatory of the League of Nations. Both districts were united administratively with the Congo, under the direction of a Vice-Governor, by a law of August 21, 1925. Ruanda-Urundi is populated by three races—the Wa-tusi, the Wa-hutu, and the Batwa. Both districts are rich in cattle. The frontier was formally ratified on October 20, 1924. Usumbura is the capital.

Area and Population.—The area is 53,200 square kilometres, or 20.535 square miles. Native population (December 31, 1933), 751,869 adult males. Estimated total population, 3,025,130. European population, 803 (511 Belgians). Asiatics numbered 664, and native population not subject to the chiefs, 17,175.

Education.—Catholic Mission Schools, 358; pupils, 23,185; native teachers, 617. Protestant Mission Schools, 103; pupils, 11,959; teachers, 252 (31 Europeans). Expenditure on education, 1,436,860 francs.

Finance.—For 1934, ordinary and extraordinary revenue was estimated to be 42,328,900 francs, and expenditure, 40,513,800 francs.

For 1933 ordinary revenue was 40,528,751 francs; expenditure, 34,243,007 francs. Extraordinary revenue, 190,903 francs; expenditure, 10,938,610 francs. Public debt, 145,500,000 francs.

Defence.—Military force consisted on January 1, 1934, of 4 officers, 4 non-commissioned officers and 680 other ranks. The police force numbered 200.

Commerce.—Imports: 1932, 23,343,380 francs; exports, 13,096,556 francs. 1933: imports, 23,279,166 francs; exports, 11,838,277 francs.

Communications.—Total length of principal roads open to traffic, 131 miles.

On July 22, 1927, a convention was signed between Belgium and Portugal by which the former ceded to the latter territory in the extreme south-west portion of the Belgian Congo, having an area of 3,500 square kilometres (480 square miles), in return for a cession by Portugal of an area in the estuary of the Congo, near Matadi, of three square kilometres.

Belgium further undertook to commence the construction of a railway to link up with the Portuguese railway (the Lobito Bay–Katanga line). This railway was opened on July 1, 1931.

Area and Population.—The area of Belgian Congo is estimated at 918,000 square miles. The black population of the Belgian Congo is chiefly of Bantu and Sudanese origin with some niloties and pygmies. According to the latest census the native population numbered 9,467,503. The white population on January 1, 1934, numbered 17,588. Of these, 11,423 were Belgians, 23 Germans, 581 Americans, 805 British, 32 Canadians, 19 Danes, 28 Spaniards, 334 French, 172 Luxemburgers, 578 Greeks, 354 Dutch, 1,164 Italians, 23 Norwegians, 26 Poles, 1,177 Portuguese, 10 Rumanians, 109 Russians, 12 Yugoslavs, 118 Swedes, 160 Swiss, 216 South Africans, 26 Turks and 198 others.

Kiswahili is the language spoken by the natives who have been under Arab influence. Bangala is the commercial language on the Upper Congo; Fiote is used near the coast, Erhiluba in the southern part.

Religion and Education.—The religion of the natives consists of a gross fetichism; mission work is actively carried on. There were, on January 1, 1934, 2,823 missionaries, of whom 2,063 were Catholic and 760 Protestant, with 406 centres (230 Catholic and 176 Protestant). In education they co-operate with the Government. In 1933 there were 11 State schools with 5,649 pupils and 4,096 subsidised schools with 202,425 pupils. State schools for boys are at Boma, Léopoldville, Coquilhatville, Lusambo, Kabinda, Stanleyville, Buta, La Kafubu and Bunia; and those for girls at Léopoldville and Elisabethville. In 1934 the Government grant to the missionaries for education of native children amounted to 9,288,248 francs, while the total expenditure on education was 16,889,281 francs. An organised medical service exists. The income from a special fund of 150 million francs as well as a Government grant are applied to the medical service.

Justice.—There are 6 courts of first instance, 16 district courts, 16 prosecutors' courts, 104 police courts, and 2 courts of appeal (one at Léopoldville and the other at Elisabethville).

Finance.—Estimates of ordinary revenue and expenditure for five years (in francs):—

—	1931	1932	1933	1934	1935
Revenue .	541,856,000	434,671,475	522,736,580	531,626,230	529,459,675
Expenditure .	705,705,000	608,666,921	725,757,940	723,428,763	681,667,000

For 1935 the ordinary receipts and expenditure were estimated as follows:—

Receipts	Francs	Expenditure	Francs
Duties and taxes . . .	274,173,545	Institutions and services acting in Belgium . . .	324,501,000
Domanial receipts . . .	5,479,650	Expenses of general administration in Africa, those of the Public Force included .	159,778,000
Judicial receipts and receipts of the administrative services	37,863,261	Expenses for the social and humanitarian works . .	80,464,000
Proceeds of capital & revenues	46,943,219	Expenses of economic order .	116,924,000
Extraordinary receipts . .	165,000,000		
Total	529,459,675	Total	681,667,000

Debt, December 31, 1934, 3,785,500,383 francs, of which 2,363,218,883 francs were Consolidated Debt and 1,422,281,500 francs Floating Debt.

Defence.—The Colony possesses a force of native troops amounting to 131 European officers, 132 European non-commissioned officers and 13,254 natives, including the recruits and about 5,550 men of the territorial police. The force is recruited by conscription and voluntary enlistment. The term of service does not exceed seven years, and the recruits are trained in three camps of instruction before being drafted to their units.

Production.—The yield of the chief products in 1933 was as follows (in metric tons):—palm-oil, 95,322; cotton, 15,063; palm-nuts, 58,542; rice, 49,685; coffee, 9,828; cacao, 1,109; rubber, 164; copal gum, 14,355; sugar, 5,735; and ivory, 96. Cattle thrive only in the districts where there is no tsetse fly, notably in the highlands of Katanga, Ituri and Kivu. Mining flourishes, the chief minerals being copper, diamonds, gold, tin, cobalt, uranium, radium, and iron. The gold mines in 1933 produced 9,853 kilos, chiefly from the Kilo-Moto mines. The most important mines in the Congo are the copper mines near Kambove, Musonoï and Elisabethville in Haut Katanga, operated by the Union Minière du Haut Katanga. The total output in 1934 was 110,000 metric tons, and in 1933 66,596 metric tons of copper. The Union Minière produces radium from the Chinkolobwe mines. The output of diamonds (chiefly from the mines of the Forminière company in the Kasai district) in 1933 amounted to 1,737,021 carats, of radium 6 gr., of tin ore, 2,290 tons. In 1934, 6,428 tons of cassiterite (tin content, 4,500 tons) were produced.

Commerce and Shipping.—The value of the commerce for six years was as follows (in francs):—

Years	Imports	Exports	Years	Imports	Exports
	Francs	Francs		Francs	Francs
1928	1,624,498,658	1,227,867,419	1931	961,891,851	1,104,015,231
1929	1,943,192,906	1,444,266,477	1932	464,631,939	667,922,436
1930	1,581,315,177	1,511,490,871	1933	389,358,885	658,348,150

The chief imports and exports were:—

—	Imports		—	Exports	
	1932	1933		1932	1933
	Francs	Francs		Francs	Francs.
Arms, ammunition, &c.	1,638,968	1,903,270	Rubber	459,376	365,031
Steamers and ships	4,999,127	5,353,641	Ivory	15,679,168	11,868,388
Machinery	68,454,766	41,908,651	Palm-nuts	59,673,668	63,958,684
Wines, spirits, beer	33,252,115	21,826,076	Palm-oil	51,557,749	69,764,357
Provisions	75,262,577	77,481,378	Copal	15,140,553	16,208,868
Cottons	49,579,447	52,174,811	Gold, crude	156,454,226	179,693,090
Mineral oils, petrol, &c.	34,489,258	30,264,200	Copper, crude	102,396,433	102,140,542
			Diamonds	130,414,940	57,790,646
			Tin ore	—	18,025,405
			Cotton	37,343,360	60,604,104
			Coffee	23,162,169	36,481,874

The special trade was distributed as follows:—

Imported from	Imports			
	Quantity		Value	
	In metric tons 1932	In metric tons 1933	In francs 1932	In francs 1933
Belgium	73,002	52,395	215,840,092	168,488,603
United Kingdom	2,979	3,636	52,471,103	52,560,939
Germany	4,007	3,073	33,282,598	25,263,754
United States	6,901	10,020	30,861,455	30,767,340
Rhodesia	53 916	30,943	19,339,881	11,932,501
Angola	9,861	6,804	16,479,972	9,512,183
France	1,280	997	15,119,634	12,255,719
South Africa	1,434	636	9,116,035	3,380,775
Netherlands	1,034	609	7,116,035	6,612,859
Russia	5,844	2,599	4,733,947	1,642,150
Japan	578	1,617	6,765,594	22,018,920

Exported to	Exports

Netherlands	16,359	12,909	20,785,706	16,119,879

According to the Board of Trade Returns the imports into the United Kingdom from the Belgian Congo in 1934 amounted to the value of 22,100*l.*; and the exports of British produce and manufactures to the Belgian Congo to 391,982*l.*; re-exports from U.K. were 16,676*l.*

At the port of Matadi, the most important harbour of Belgian Congo, in 1933 there entered 114 sea-going vessels of 410,274 tons. In the coasting trade there entered 13 sailing ships, of 5,542 tons. The two other ports are Banana and Boma.

Internal Communications.—The Congo is navigable for 95 miles from its mouth to Matadi, and on this section ply 15 steamers belonging to the State. Above Matadi, for over 249 miles, numerous rapids render the river unnavigable as far as Stanley Pool (Léopoldville). Above the Pool are 1,068 miles of navigable water, reaching Stanley Falls, while several of the great tributaries are navigable over a considerable extent of their course (total, 6,279 miles). Above the Stanley Falls the Congo is called Lualaba and navigable for 585 miles, from Ponthierville to Kindu and from Kongolo to Bukama (Katanga).

There were (January 1, 1934) 26,573 miles of road. The total length of railways on January 1, 1934, was 2,894 miles. New railway lines are planned

between Zobia and Isiro, and between Kamaniola and Costermansville (Kivu).

An important development in 1911 was the construction of a pipe line from Matadi to Léopoldville, 246 miles long, for the purpose of transporting crude oil for the use of river steamers. It has a diameter of 4 inches, with 8 pumping stations delivering 50,000 tons of oil at Léopoldville, the terminus. The concession is for 70 years, at the expiration of which period all the pipe lines, with the material, except the vessels and stores of petroleum, will become the property of the Congo Government.

The river steamers run from Léopoldville to Stanleyville and the tributaries of the Congo; they belong to different companies, of which the Unatra Company is the most important. The fleet of the various companies consists of 264 steamers and 531 barges. Powerful tugboats hauling four to eight barges of 800 tons each afford cheap transportation on the Congo river and the largest tributaries.

There is a regular air service between Léopoldville and Lusambo with intermediate stages at Banningville, Port Francqui, Luebo and Luluabourg. The distance is 806 miles. A regular service runs between Léopoldville and Boma, a distance of 217½ miles; and between Léopoldville and Stanleyville (1,062 miles) with stages at Banningville, Inongo, Coquilhatville, Basankusu, Lisala, Bumba and Basoko. The service between Port Francqui and Lusambo was restarted in August, 1933.

In 1933 there were 74 post offices, and 66 special telegraph offices. In the internal service 1,730,586 letters, papers, &c., were transmitted; and in the external, 3,183,206 were handled (873,665 sent and 2,309,541 received). The use of the air mail is increasing. In 1933, 453,530 postal packets were carried. The Congo is included in the Postal Union. Total length of telegraph lines 4,209 miles. In 1933, 77,607 private telegrams and 31,978 official telegrams were handled in inland service, while 30,482 foreign telegrams were sent and 19,859 received; there were also 1,106 on transit service. There are 29 stations of wireless telegraphy, 62 telephone offices and 15 central stations serving 1,420 subscribers, 4,000 miles of telephone lines, and 5,540 miles of telephone wire. Number of calls in 1933, 2,600,000.

Money and Credit.—The monetary unit is the *franc* equivalent to one-fifth of the *belga* and containing 0·0418422 gramme of fine gold. This value was fixed by an agreement with the Banque du Congo Belge on October 10, 1927, approved by Royal Decree on November 14, 1927, authorising the Bank to issue notes in Belgian Congo and Ruanda-Urundi. The notes at present in circulation are of a nominal value of 1,000, 500, 100, 20, and 5 francs. By Royal Decree of December 28, 1920, the Government was authorised to issue copper-nickel coins in denominations of 1 franc and 50 centimes. There are also perforated coins, also in copper-nickel, of 20, 10, 5, 2 and 1 centimes. The notes and coins in circulation in the Colony are not legal tender in Belgium. Eight banks are in existence, of which the three most important are the 'Banque du Congo Belge,' the 'Banque Commerciale du Congo,' and the 'Banque Belge d'Afrique,' all three with branches in all the important commercial centres.

Weights and Measures.—The Metric System was introduced by law on August 17, 1910.

British Consul.—H. C. Swan (at Léopoldville).

There are British Vice-Consuls at Elisabethville and Stanleyville.

BHUTÁN.

STATE in the Eastern Himálaya, between 26° 45′ and 28° N. latitude, and between 89° and 92° E. longitude, bordered on the north and east by Tibet, on the west by the Tibetan district of Chumbí and by Sikkim, and on the south by British India. Extreme length from east to west 190 miles; extreme breadth 90 miles. Area about 18,000 square miles; population estimated at 300,000.

The original inhabitants of Bhután, the Tephús, were subjugated about two centuries ago by a band of military colonists from Tibet. In 1774 the East India Company concluded a treaty with the ruler of Bhután, but repeated outrages on British subjects committed by the Bhután hill men led from time to time to punitive measures, usually ending in the temporary or permanent annexation of various *duars* or submontane tracts with passes leading to the hills. In November, 1864, the eleven western or Bengal *duars* were thus annexed. Under a treaty signed in November, 1865, the Bhután Government was granted a subsidy of Rs. 50,000 a year on condition of good behaviour. By an amending treaty concluded in January, 1910, the British Government undertook to exercise no interference in the internal administration of Bhután. On its part the Bhutanese Government agreed to be guided by the advice of the British Government in regard to its external relations. The treaty also provided for the increase of the subsidy to Rs. 1,00,000.

The form of Government in Bhután, which existed from the middle of the sixteenth century until 1907, consisted of a dual control by the clergy and the laity as represented by Dharma and Deb Rajás. In 1907 the Deb Rájá, who was also Dharma Rájá, resigned his position, and the Tongsa Penlop, Sir Ugyen Wangchuk, G.C.I.E., K.C.S.I., was elected as the first hereditary Maharaja of Bhután. He died on August 21, 1926, and was succeeded by Maharaja Jig-me Wang-chuk, K.C.I.E.

Chief fortresses or castles: Punakha, a place of great natural strength: Tashi-Cho-dzong, Pàro, Angduphodang (Wangdupotrang), Tongsa, and Byaka.

The people are nominally Buddhists, but their religious exercises consist chiefly in the propitiation of evil spirits and the recitation of sentences from the Tibetan Scriptures. Tashi-Cho-dzong, the chief monastery in Bhután, contains 300 priests.

Beyond the guards for the defence of the various castles, there is no standing army.

The chief productions are rice, Indian corn, millet, lac, wax, different kinds of cloth, musk, elephants, ponies, chowries, and silk. Extensive and valuable forests abound. Muzzle-loading guns and swords of highly-tempered steel are manufactured.

His Highness keeps an Agent at Kalimpong who is also Assistant to the Political Officer in Sikkim for Bhutanese affairs.

BOLIVIA.

(República Boliviana.)

Constitution and Government.

The Constitution of the Republic of Bolivia (so named in 1825) bears date October 28, 1880, with amendments adopted January 11, 1931. Executive power is vested in a President, elected for four years by direct popular vote, and not eligible for re-election until eight years after his term has ended. A Vice-President is elected to succeed him in case of resignation, death, illness, or on his becoming commander-in-chief of the army in the event of war. There is a Congress of two chambers, called the Senate and the Chamber of Deputies, which sits at La Paz. The suffrage is possessed by all unmarried males over 21 years of age who can read and write, and have an 'assured income,' and by all married males over 18 who are similarly qualified. There are 16 Senators (2 for each Department) elected for six years (one-third retiring every two years), and 70 Deputies elected for four years (one-half retiring every two years); both by direct vote of the people, but in the future Senators are to be elected by the Departmental Assemblies. Senators receive a salary of 900 bolivianos (45*l.*) per month; Deputies, 40 bolivianos for the session. Sittings, as a rule, last for 60 days, but may be extended to 90 days. Extraordinary sessions may be held for special purposes when convoked by the Executive, or by a majority of both Chambers. The President's Cabinet consists of the Ministers of seven departments—Foreign Relations and Worship; Finance and Industry; Government and Justice; Public Works and Communications; War and Colonisation; Education and Agriculture; and Defence (created 1933). In addition, a National Economic Council, composed of representatives of mining, commerce, agriculture, banking, labour and other interests, passes upon public contracts, railway concessions, and projects affecting the credit and economic welfare of the country; their recommendations are transmitted to Congress.

The following is a list of Presidents since 1899 and the dates on which they took office:—

General José Manuel Pando, Aug. 6, 1899.
General Israel Montes, Aug. 6, 1904.
Dr. Eliodoro Villazon, Aug. 6, 1908.
General Israel Montes, Aug. 6, 1912.
Dr. José Gutierrez Guerra, Aug. 6, 1917 (deposed July 12, 1920).
—— Provisional Junta, under Dr. Saavedra, July 12, 1920—Jan. 10, 1921.
Dr. Bautista Saavedra, Jan. 10, 1921 (resigned).
Dr. Felipe Guzman, Sept. 1, 1925 (provisional).
Dr. Hernando Siles, Jan. 10, 1926 (deposed June 22, 1930).
——Provisional Junta, under General Blanco Galindo, June 22, 1930—Mar. 5, 1931.
Dr. Daniel Salamanca, Mar. 5, 1931.

President of the Republic.—Sr. don Luis Tejada *Sorzana*, Vice-President, assumed office on resignation of Dr. Salamanca in November, 1934.

The Republic is divided into 8 departments and 3 territories, with 71 provinces administered by sub-prefects, and 630 cantons (the number varies) administered by corregidores. The supreme political, administrative, and military authority in each department is vested in a prefect, but under an arrangement pending (1934) legislative matters will be under a Departmental Assembly composed of the Senators and Deputies from that department and of delegates elected by the various provinces and the capital. Budgets will be prepared and considerable financial power will be enjoyed, though public order, education and roads will remain under national control. The territories in the north-west of the Republic and in the Chaco and Oriente are governed by three officials, called *delegados nacionales*. Prefects will be appointed by the President of the Republic, from lists presented by the

Departmental Assembly; sub-prefects (virtually chief constables) will be appointed by the Prefects; corregidores and village alcaldes are appointed annually by the sub-prefects of the provinces. The capital of each department has its municipal council; the subdivisions have municipal boards, and the still smaller subdivisions have municipal agents.

Bolivia's most serious boundary difficulty is with Paraguay, its eastern neighbour, and grows out of a long-standing dispute as to where the frontier line crosses the Gran Chaco. Bolivia claims all the Chaco between the Pilcomayo and Paraguay rivers, whereas the Paraguayan claim would cut her off from the Paraguayan River. Fighting began in July, 1932, and continued on an increasing scale until a state of war was formally declared by Paraguay in May, 1933. Efforts at mediation were made in turn by the Commission of Neutral Nations at Washington, the so-called A.B.C.P. countries (Argentine, Brazil, Chile and Peru), and the League of Nations. An armistice at the end of 1933 was shortlived and no agreement has yet been reached.

The boundary line between Bolivia and Peru in the peninsula of Copacabana, from the River Suches to the north of Lake Titicaca, has been delimited by a joint commission, and awaits ratification. That between Argentine and Bolivia, as determined by treaty ratified in 1889, was re-examined in 1925; Bolivia ratified the new agreement in 1929, but Argentine has not yet done so.

The following table shows area and population of the different political divisions (the capitals of each are given in brackets):—

Departments and Territories	Area: square miles	Census 1900	Estimated 1932	Per square mile 1932
La Paz (La Paz) .	40,687	450,616	776,358	19·1
Cochabamba (Cochabamba) . . .	25,288	326,163	571,730	22·6
Potosí (Potosí) . .	45,032	325,615	567,291	12·6
Santa Cruz (Santa Cruz) . . .	146,045	189,592	365,154	2·5
Chuquisaca (Sucre) .	36,332	196,434	356,167	9·8
Tarija (Tarija)[1] . .	78,128	77,887	179,251	2·3
Oruro (Oruro) . .	20,657	86,081	149,972	7·3
El Beni (Trinidad) .	95,355	21,180	56,064	5·9
Colonial Territories (Riberalta) . .	27,939	16,883	55,548	1·9
Total . . .	514,465	1,675,451	3,077,533	5·9

[1] Including 46,561 square miles in the El Chaco region.

Boundary disputes make exact calculations of area impossible; one official estimate puts the area at 506,467 square miles, exclusive of the area disputed by Paraguay.

The 1929 estimate showed 1,586,649 Indians, 426,212 whites and 898,429 mixed races. Other estimates (1930) distribute the population thus: Indians, 54·5 per cent.; mixed, 30·9 per cent.; white 14·6 per cent.; there are 6,000 Chinese, Negroes, etcetera.

The language of the educated classes is Spanish, that of the natives Qūechūa and Aymara.

The estimated population (1932) of the principal towns: La Paz (the actual seat of government, though Sucre is nominally the capital), 150,165;

Cochabamba, 49,000; Potosí, 35,900; Sucre (the legal capital and the actual seat of the Judiciary, the University, and the Archbishop), 26,113; Tarija, 11,950; Oruro, 30,000; Santa Cruz, 31,300.

Religion, Education, and Justice.

The Roman Catholic is the recognised religion of the State; the exercise of other forms of worship is permitted. The religious orders have 17 convents (9 for males and 8 for females); the male members number about 230, the female 280; there are about 567 secular clergy. In 1900 the non-Catholic population numbered 24,245. The Church is under an archbishop (resident in Sucre) and 6 bishops (La Paz, Cochabamba, Santa Cruz, Oruro, Potosí, and Tarija). The maintenance of the Church cost the State 108,271 bolivianos in 1932. By a law of March 19, 1912, all marriages must be celebrated by the civil authorities. Divorce was permitted by a law enacted in April, 1932; 821 divorces were granted that year.

Primary instruction, free and obligatory, is under the care of the municipalities and the State. In 1933 there were 2,033 elementary schools with 1,242 teachers and 161,380 pupils. For secondary instruction there were 29 colleges (19 national), 5 clerical institutions, and 5 private schools with, in all, 298 teachers and 4,480 pupils. For special instruction there are 22 establishments with 3,104 students. By a reform in the constitution the universities are made autonomous, with full control of all appointments and large powers over their finances. At Sucre and La Paz are the only two universities which possess more than one faculty. The University at Sucre, known as the St. Xavier University, is one of the oldest in America, having been founded in 1624. There are also a number of training colleges for teachers, including two for Indians. There are 18 institutions offering university instruction; they have 141 teachers and 1,682 students.

The judicial power resides in the Supreme Court, in superior district courts (of 5 judges) and in the courts of local justices. The Supreme Court, with headquarters at Sucre, is divided into two sections of 4 justices each, with the Chief Justice presiding over both. Members of the Supreme Court are chosen on a two-thirds vote of Congress. They nominate the district judges and largely administer the judiciary budget. The district courts have each 5 judges; there are local tribunals and parish alcaldes. Public justice, supervised by commissions appointed by the Chamber of Deputies, is directed by an Attorney-General and by district and local attorneys.

Finance.

The revenue of Bolivia is derived mainly from customs duties, spirit duties, export duties on tin, silver, gold, wolfram, antimony, lead and other minerals, rubber export, patents, and stamps. Tin is the chief single source of revenue.

Ordinary and extraordinary revenues and expenditures for 6 years were as follows:—

—	Revenue	Expenditure	—	Revenue	Expenditure
	Bolivianos	Bolivianos		Bolivianos	Bolivianos
1929	48,942,327	53,181,231	1932	19,870,557	33,503,017
1930	36,247,829	49,133,758	1933[1]	19,964,481	21,049,572
1931	22,629,611	32,336,328	1934[1]	22,919,886	35,383,905

[1] The 1933 and 1934 budgets were presented to Congress, but not passed when the session closed. The President by decree extended the validity of the preceding budget with certain modifications through the next financial year.

The principal items of expenditure in the 1934 budget as decreed were (in bolivianos): public debt, 6,651,827; instruction, 3,429,956; interior, 2,129,850; communications, 2,497,621; peace time expenditures of the War Ministry, 11,399,985. The extraordinary expenses of the war with Paraguay are met by loans from the Central Bank of Bolivia, forming a special war budget.

The public debt of Bolivia on March 31, 1933, amounted to 316,028,338 bolivianos, being principal of external debt, 172,743,487 bolivianos; external debt service, 35,496,592 bolivianos; internal, 86,358,843 bolivianos; and floating, 21,429,416 bolivianos. Service on the foreign debt is in default, but as it is all issued in U.S. dollars, the devaluation of the dollar in 1933 has greatly reduced it.

Defence.

The territory of the Republic is divided into 3 military districts, the Northern, the Central, and the Southern, and 3 'military commands' formed of the departments Santa Cruz, El Beni, Tarija, and the Territories.

The law of December 15, 1915, provides for a permanent force of 3,577 men, to which is added an annual contingent of conscripts divided into two categories, the total number of effectives being about 8,000. Military service is compulsory for all males from the 19th to the 50th year. Those from 19 to 25 years of age serve not more than 2 years with the standing army; those from 25 to 30 years of age, 'the ordinary reserve,' return at some time for 3 months' service. After this the men pass to the 'extraordinary reserve' for 10 years, and finally complete their service by 10 years' enrolment in the Territorial Guard.

The permanent army consists of 12 infantry regiments, each of 2 battalions; 6 cavalry regiments, each of 4 squadrons; 3 mountain artillery regiments, each of 2 batteries; a field artillery regiment of the same strength; 6 battalions of engineers; 1 aviation corps of 2 flights.

In addition to the above troops there are small bodies of infantry of from 100 to 200 men (called *columnas*) at the chief towns of departments, which can be expanded to battalions, if necessary. There also exist other units, for garrisoning the North, the North West, the South West, and the East, consisting of 300 men each.

The infantry armament has been modernized.

Production and Industry.

The extensive and undeveloped region of Bolivia lying east of the Andes comprises about three-quarters of the entire area. It is estimated that about 4,940,000 acres are under cultivation, but bark and hides are the principal products and agriculture is in a backward condition. Irrigation by means of artesian wells is being attempted in some regions. Potatoes, cacao, coffee, barley, coca, highland rice, and rubber are produced. Bolivia ranks as the second rubber-exporting country of South America, coming next to Brazil. Tropical forests with woods ranging from the 'iron tree' to the light palo de balsa await exploitation. The public lands of the State have an area of about 245,000 square miles, of which 104,000 square miles are reserved for special colonisation. In 1931 it was estimated that there were 1,854,915 cattle, 5,552,074 sheep, 747,581 goats, 1,882,000 llamas and alpacas, 335,580 pigs, and 375,738 equines.

Although the war with Paraguay has greatly stimulated industry, mining is still easily the most important industry, and Oruro is its principal

centre. The mineral wealth of Bolivia includes tin, silver, copper, lead, zinc, antimony, bismuth, wolfram, gold, and borate of lime. Bolivia produces one quarter of the total tin output of the world, standing next to the Malay Peninsula in the production of this metal. Practically all the tin ore is shipped to Great Britain, where it is reduced to tin in pigs and reshipped to the United States, which is the ultimate consumer of the bulk of Bolivian tin. Under the International Tin Restriction scheme, Bolivia, June 1, 1932, accepted a quota of 14,687 tons per annum for 1932 and 1933. Production of minerals in 1932 was, in metric tons: Tin (metal equivalent), 21,400; silver, 128; lead, 5,448; copper, 2,016; zinc, 12,968; antimony (metal equivalent), 1,469; bismuth, 2; wolfram, 411. Output of gold, 1932, was 12,281 ounces. Bismuth is mined in La Paz and Potosí by an international company which adjusts production to market demand. Next to China, Bolivia is the world's chief source of antimony. Large deposits of common salt are found near Lake Poopó and in the south of Bolivia. Surface indications of petroleum and gas abound in the whole territory between the Argentine frontier and the north-west territory bordering Peru; the Standard Oil Company with 16 wells is developing production at Chaco Oriental. But output is small, only 44,000 barrels in 1932.

Commerce.

The value of imports and exports for five years are given as follows (13·33 bolivianos = 1*l.* or 1 boliviano = 36·5 cents (U.S.)) at par:—

—	1929	1930	1931	1932	1933
	Bolivianos	Bolivianos	Bolivianos	Bolivianos	Bolivianos
Imports . . .	71,417,273	58,134,613	29,821,019	22,351,535	41,255,550
Exports . . .	140,007,039	101,561,417	60,613,624	48,903,564	75,743,865

Tin ore has usually constituted in value about 90 per cent. of Bolivia's exports since 1920, but in 1933, owing to the continued decline in prices, export of tin (55,634,022 bolivianos) constituted only 73 per cent. of the value of total exports. Other principal exports in 1933 were silver, 6,583,465 bolivianos; copper, 951,096 bolivianos; lead, 1,474,225 bolivianos; tungsten (or wolfram), 223,986 bolivianos; antimony, 800,050 bolivianos; and zinc, 3,865,916 bolivianos. In 1933 the United States furnished 30·0 per cent. of imports and Great Britain 22 per cent.; of exports (1932), Great Britain took 82·7 per cent., and the United States 3·6 per cent.

Bolivia having no seaport, imports and exports pass chiefly through Arica, Mollendo, Antofagasta, La Quiaca, and river-ports on the rivers flowing into the Amazon. The chief imports are sugar, flour, wheat, coal, petroleum, iron and steel products, mining machinery, rice, wines and spirits, textiles, and ready-made clothes.

Total trade between U.K. and Bolivia (Board of Trade figures) for 5 years:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Bolivia to U.K. .	3,391,748	2,278,771	1,877,005	1,680,849	3,369,100
Exports to Bolivia from U.K. .	346,813	170,118	194,174	420,328	260,603
Re-exports to Bolivia from U.K.	17,972	20,610	10,548	3,597	7,333

Communications.

The total length of railway open in Bolivia is about 1,384 miles; 175 miles are under construction from Cochabamba to Santa Cruz. The principal line is the Antofagasta and Bolivian Railway. Total length in Bolivia, 744 miles. Under the Bolivian–Chilian treaty of October 24, 1904, the Arica–La Paz line (276 miles, of which 151 miles are in Bolivia) was built from La Paz via Lluta with Taregra and to Corocoro.

The Lloyd Aero Boliviano, under the supervision of the War Ministry, has established a number of routes since 1927; principal one is from Cochabamba to Santa Cruz.

Traffic on Lake Titicaca is carried on by the steamers of the Peruvian Corporation. About 12,000 miles of rivers, in three systems, are open to navigation by light-draught vessels.

Of main highways there were (1934) one of 166 miles from La Paz through Puno into Peru, another from La Paz, via La Quiaca, into Argentine of 749 miles, passable throughout the year, and others from Villaron to Villa Montes via Tarija, and from Potosí to Sucre; similar roads in the interior totalled 2,337 miles, besides 3,875 miles of secondary roads passable during the dry season; 527 miles were under construction.

In Bolivia there were, in 1929, 454 post offices. Number of pieces of mail handled, domestic, 2,251,500; foreign, 2,505,695 pieces.

There are (1930) about 5,627 miles of telegraph lines. Number of telegrams dispatched, 1929, 855,876; received, 964,468. There are 318 telegraph, telephone and wireless offices. The Bolivian Power Co. was given in 1928 a concession to build and operate a countrywide telephone system; an exchange was opened in Oruro in 1930.

Banking, Money, Weights, and Measures.

On July 1, 1929, on the recommendation of the Kemmerer Mission, the Banco Central de Bolivia was inaugurated at La Paz, taking over the assets of the Banco de la Nación Boliviana; it acts as a Central Bank of issue. On December 31, 1933, the bank's reserves were 14,866,629 bolivianos (legal reserve, 8,069,252 bolivianos); note circulation, 53,774,031 bolivianos; deposits, 53,965,107 bolivianos.

On July 11, 1928, the gold exchange standard was adopted for the currency. Notes of the Banco Central de Bolivia (which has a monopoly of the note issue) were convertible on demand into gold or gold exchange. The unit of account is the gold boliviano containing 0·54917 grams of fine gold and equal in U.S. money to 36·5 cents, but on September 25, 1931, gold payments were suspended. Foreign exchange rates are controlled by the Banco Central and are based largely on the London price of tin. Official rates of exchange in 1934, ranged between 15·40 and 20·10Bs. = £1. The law provides for the minting of coins of ten and twenty bolivianos, the former to be called a 'Bolivar' and the latter a 'Double Bolivar,' the 'Bolivar' to weigh 6·10189 grams of 900 fine. There is no Bolivian gold yet in circulation. Gold is legal tender up to any amount, and silver up to 10 bolivianos. Silver coins are minted in denominations of 1 boliviano (15 grams 800 fine), one-half, and one-fifth bolivianos. But paper notes in denominations of 1, 5, 10, 20, 50 and 100 bolivianos are the chief circulating medium.

The metric system of weights and measures is used by the administration and prescribed by law, but the old Spanish system is also employed. The quintal is equal to 101½ lbs.

Diplomatic and Consular Representatives.

1. Of Bolivia in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Carlos Victor Aramayo (appointed March 25, 1926).

Counsellor.—Mamerto Urriolagoitia.

Secretary.—Eduardo Aramayo.

Attaché.—Pastor Llobet.

Consul-General (in London).—Mamerto Urriolagoitia.

2. Of Great Britain in Bolivia.

Minister and Consul-General.—Thomas Joseph Morris, C.M.G. (appointed January 12, 1934).

Second Secretary and Vice Consul.—G. E. Vaughan.

There are Consular representatives at Oruro, Sucre, Potosí, and Cochabamba.

BRAZIL.

(Estados Unidos do Brasil.)

Constitution and Government.

Brazil was discovered on May 3, 1500, by the Portuguese Admiral Pedro Alvares Cabral, and thus became a Portuguese settlement; in 1815 the colony was declared 'a kingdom,' and on May 13, 1822, Dom Pedro, eldest surviving son of King João VI. of Portugal, was chosen 'Perpetual Defender' of Brazil by a National Congress. He proclaimed the independence of the country on September 7, 1822, and was chosen 'Constitutional Emperor and Perpetual Defender' on October 12, 1822. On November 15, 1889, his only son, Dom Pedro II. (born 1825, died 1891), was dethroned by a revolution, and Brazil declared a Republic under the title of the United States of Brazil.

The following is a list of Presidents since the establishment of the Republic:—

Marshal Deodoro da Fonseca, Nov. 15, 1889—Nov. 23, 1891.[1]
Marshal Floriano Peixoto (Acting), Nov. 23, 1891—Nov. 15, 1894.
Senhor Prudente de Moraes Barros, Nov. 15, 1894—Nov. 15, 1898.
Dr. Manuel Ferras de Campos Salles, Nov. 15, 1898—Nov. 15, 1902.
Dr. Francisco de Paula Rodrigues Alves, Nov. 15, 1902—Nov. 15, 1906.
Dr. Affonso Penna, Nov. 15, 1906—June 14, 1909.[2]
Dr. Nilo Peçanha (Acting), June 14, 1909—Nov. 15, 1910.
Marshal Hermes da Fonseca, Nov. 15, 1910—Nov. 15, 1914.
Dr. Wenceslãs Braz, Nov. 15, 1914—Nov. 15, 1918.
Dr. Francisco de Paula Rodrigues Alves.[3]
Dr. Delphim Moreira (Acting), Nov. 15, 1918—July 28, 1919.
Dr. Epitacio da Silva Pessoa, July 28, 1919—Nov. 15, 1922.
Dr. Arthur Bernades, Nov. 15, 1922—Nov. 15, 1926.
Dr. Washington Luiz Pereira de Souza, Nov. 15, 1926—Oct. 25, 1930.[4]

[1] Resigned. [2] Died.
[3] Owing to illness did not take office—Nov. 15, 1918; died Jan. 16, 1919. [4] Deposed.

A new constitution was adopted on July 16, 1934, inaugurating the Second Republic after 4 years of a Provisional Government. The Second Republic differs from the First chiefly in the very large powers given the State to regulate industry, gradually to nationalize the banks and insurance companies, and to monopolize, subject to compensation, any forms of industrial activity thought desirable. Power is concentrated in a Chamber of Deputies of 300 members, of which 250 are elected by direct vote of the people and 50 are chosen by professional syndicates representing agriculture industry, commerce and transport, and the liberal professions, including Government service. Except for the liberal professions, both employers and employees are separately represented in the 'corporative' deputies. Legislative power is shared with a Senate of 42 members (2 from every State), elected for 8 years.

The United States of Brazil consists of twenty States, the Federal Territory of the Acre, and one Federal District. Each State is administered at its own expense without interference from the Federal Government save for defence, for the reorganization of the State finances when the latter are in disorder, and for the execution of the Federal laws and judgments.

The President of the Republic must be a Brazilian by birth, over thirty-five years of age. His term of office is four years, and he is not eligible for the succeeding term.

The franchise extends to all citizens, both men and women, not under eighteen years of age. Voting is secret.

President of the Republic.—Dr. Getulio *Vargas*. Assumed office November 3, 1930, after a military uprising in various states and the capital had forced the resignation of President Washington Luis Pereira *de Souza* and

prevented the installation of Dr. Julio *Prestes*, elected March, 1930. Elected Provisional President by the Constituent Assembly in November, 1933, and Constitutional President by the same body on July 18, 1934.

There were, under the old constitution, 7 Secretaries of State at the head of the following Departments:—1. Finance, 2. Justice and Interior, 3. War, 4. Marine, 5. Foreign Affairs, 6. Communications and Public Works, 7. Agriculture. In addition President Vargas established ministries of: 8. Labour, Industry, and Commerce, and 9. Instruction and Public Health.

I. Local Government.

Each State is organised under the republican form of government, with distinct administrative, legislative, and judicial authorities. Each State has its own Constitution and laws which must, however, agree with the constitutional principles of the Union. Taxes on inter-state commerce, levied by individual States, which previously flourished, are limited to 10 per cent. *ad valorem*. The governors and members of the legislatures are elected, but magistrates are appointed and are not removable from office save by judicial sentence.

Area and Population.

Following are the census returns of 1920 and estimate for December 31, 1933 (capitals of States in brackets):—

States	Area: sq. miles	Population		
		1920 (Census)	Per sq. mile 1920	1933 (Estimated)
Alagôas (Maceió)	22,577	978,748	43·3	1,292,744
Amazonas (Manáos)	731,363	363,166	0·5	468,098
Bahia (São Salvador)	164,601	3,334,465	20·2	4,535,857
Ceará (Fortaleza)	40,241	1,319,228	32·7	1,778,461
Espirito Santo (Victoria)	17,308	457,328	26·0	774,723
Goyaz (Goyaz)	288,462	511,919	1·9	820,479
Maranhão (S. Luiz)	177,515	874,337	4·9	1,287,299
Matto Grosso (Cuyabá)	532,210	246,612	0·4	406,427
Minas Geraes (Bello Horizonte)	221,894	5,888,174	26·5	8,228,097
Pará (Belém)	443,789	983,507	2·2	1,682,847
Parahyba (Parahyba)	28,846	961,106	33·3	1,515,723
Paraná (Curytiba)	93,269	685,711	7·3	1,132,539
Pernambuco (Recife)	49,560	2,154,835	43·4	3,244,779
Piauhy (Therezina)	116,494	609,003	5·2	914,521
Rio de Janeiro (Nictheroy)	26,627	1,559,371	58·5	2,220,177
Rio Grande do Norte (Natal)	22,189	537,135	24·2	847,100
Rio Grande do Sul (Porto Alegre)	91,310	2,182,713	22·6	3,372,184
Santa Catharina (Florianopolis)	20,785	668,743	32·1	1,101,587
São Paulo (S. Paulo)	112,278	4,592,188	40·9	7,377,077
Sergipe (Aracajú)	15,089	477,064	31·6	581,491
Federal District (Rio de Janeiro)	431	1,157,873	2,686·4	1,626,128
Acre Territory	58,672	92,379	1·6	124,322
Total	3,275,510	30,635,605	9·3	43.323.660

In 1920 the population consisted of 15,443,818 males and 15,191,787 females. Of these 1,565,961, or 5 per cent., were foreigners, viz., 558,405 Italians, 433,575 Portuguese, 219,142 Spaniards, 52,870 Germans, 50,251 from Asiatic Turkey, 33,621 Uruguayans, 27,976 Japanese, 26,354 Austrians, 22,117 Argentinians, and 141,650 other nationalities. Some 100,000 Indians are to be found in the Amazon area. The language is Portuguese, though Italian and German are widely used in the Southern States.

In 1933 the estimated population of Rio de Janeiro was 1,500,000; São Paulo, 1,052,541; S. Salvador, 852,081; Recife, 438,159; Belem, 300,233; Curitybe, 110,851; Porto Alegre, 293,820; Manáos, 87,936; Nictheroy, 119,297; Bello Horizonte, 145,206; Fortaleza, 136,386; Maceió, 120,098; São Luiz, 67,722; Joao Pessao, 94,256.

The number of immigrants between 1820 and 1930 was 4,518,558, including 1,480,000 Italians, 1,288,000 Portuguese, 574,000 Spaniards, 198,000 Germans, 110,000 Russians and 89,000 Austrians. In 1933 the number of immigrants was 46,081; departures, 16,987.

Religion.

The population is overwhelmingly Roman Catholic, but in 1889 connection between Church and State was abolished, and absolute equality declared among all forms of religion. The Government left to the Church all religious buildings and their properties and income; religious orders are allowed and are prosperous. They maintain 6 seminaries; there is a Cardinal whose seat is at Rio de Janeiro and who acts as an Archbishop, and there are besides 14 archbishops, 44 suffragan bishops, 7 prelates, and 3 apostolic prefects. There are 20 seminaries. There are eight leading Evangelic sects (and innumerable small ones), while Judaism, Buddhism, Mahometanism, Spiritualism, and Positivism have many followers. Evangelic sects maintain 10 seminaries.

Education.

Education is free but not compulsory, except in some States (*e.g.* Ceará, Maranhão, Alagôas, Matto Grosso, Minas Geraes, S. Paulo, Santa Catharina). The Union Government undertakes to provide, in part, for higher or university instruction within the Union, but there are institutions of this nature maintained, some by the States, and some by private associations, while primary schools are chiefly maintained and supervised, either by the States or by the municipalities and private initiative. There is one official university in Brazil, the University of Rio de Janeiro (Federal District), founded on September 7, 1920, and two private universities, at Bello Horizonte (Minas Geraes) and Curityba (Paraná); there are moreover 56 faculties which confer degrees. At the Capital are maintained by the Federal Government a school for the blind; another for deaf and dumb; a School of Fine Arts; and a National Institute of Music, there being similar private institutions in the Federal District and some States. There are seven engineering and mining polytechnics at Rio de Janeiro (University), S. Paulo, Rio Grande do Sul, Bahia, Minas Geraes, and Pernambuco; 19 schools of medicine, pharmacy and dentistry; 12 schools of law and social sciences; and 97 industrial schools, 41 agricultural, and 48 commercial schools. The Oswaldo Cruz Institute, in Rio de Janeiro, is devoted to experimental medicine, and the Butantan Institute, in S. Paulo, to the preparation of anti-ophidic serum.

There were in January, 1931, 3,973 boys' schools, 2,167 girls' schools and 29,295 co-educational schools (total 35,435) of which 426 were Federal,

17,965 State, 6,655 municipal, and 10,389 were private ; these were divided into 33,049 primary schools, 1,145 high schools, 87 colleges, 211 teachers' colleges, and 943 special schools. Teachers numbered 73,555 ; total enrolment, 2,284,883.

Justice.

There is a supreme Federal court of Justice at Rio de Janeiro, which celebrated its centenary on January 20, 1929. There are also Regional Tribunals in each State as well as in the Federal District and the Territory of Acre. Justice is administered in the States in accordance with State law, by State courts, but in Rio de Janeiro Federal Justice is administered. Judges are appointed for life. There are also municipal magistrates and justices of the peace, who are elected for four years, and whose chief function is to settle cases up to a certain amount. Capital punishment has been abolished. There is no divorce.

Finance.

Receipts and expenditures in recent years have been as follows (1 gold milreis = 4·567 paper milreis = at par about 6*d*. sterling = 12 cents. U.S.):—

—	Revenue		Expenditure	
	(Gold) Milreis	(Paper) Milreis	(Gold) Milreis	(Paper) Milreis
1931	107,902,000	1,264,364,000	89,742,545	1,335,073,728
1932 [1]	109,556,000	1,392,751,000	34,406,000	1,894,285,000
1933 [1]	87,756,000	1,502,678,000	34,264,855	1,861,975,603
1934	—	2,086,231,000	—	2,354,976,001
1935 [1]	—	2,169,557,000	—	2,691,684,487

[1] Budget estimate.

The consolidated Federal foreign debt of Brazil on March 31, 1934, amounted to 104,475,895*l*. (British), 227,152,216 paper francs, 231,439,015 gold francs and 166,049,239 dollars (United States). External debt of the States on March 31, 1934, was 51,861,749*l*., 171,314,075 dollars (United States), 368,420,629 paper francs and 8,582,668 florins ; external debt of the municipalities, 19,103,387*l*., 73,455,571 dollars (United States) and 45,866,112 paper francs. The entire external debt was equal to 16,810,085 contos. Internal funded debt, December 31, 1933, was 3,016,096 contos paper ; in addition, inconvertible Treasury notes in circulation December 31, 1933, totalled 3,004,095 contos paper, while the floating debt was 1,563,756 contos paper. Inability to secure sufficient foreign exchange for service on this foreign debt forced Brazil in October, 1931, to tender 5 per cent. scrip as interest payments on all but three of her foreign loans. On February 6, 1934, a decree was published establishing new conditions for the service of the external debt, to be in operation from April 1, 1934, to March 31, 1938. It applies to all loans of the Federal Government, of the States, and of municipalities. Altogether the annual debt service is reduced to 8,000,000*l*. The total debt has been divided into 8 categories with varying percentages of service moneys.

Defence.

Army.—Under the military law of 1923 military service is obligatory on every Brazilian from 21 years of age to 44. The terms of service are 9 years

(from the 21st to the 30th years of age) in the army 'first line' (1 in the ranks, the rest in the reserve), and 14 years (from the 30th to the 44th years of age) in the army 'second line' (7 in the 'second line' and 7 in the reserve of the same). The reservists are called up for training annually for 4 weeks, besides which there is rifle practice once a month. The men in the territorial army also have an annual training of 2 to 4 weeks. The total peace strength for 1933 was 5,546 officers and 42,200 other ranks, organized in 4 divisions, 3 cavalry divisions, 1 mixed brigade, and 1 coast defence district. There is an air force of 3 companies and 1 group with a personnel of 2,000 and 41 aeroplanes.

Mobilisation would yield about 120,000. The military police under the War Office number 33,450, capable of expansion to 180,000. Infantry are armed with the Mauser rifle, the field and horse artillery with 75 mm. guns.

Navy.—The principal ships of the Brazilian navy are as follows:—

Laid down	Name	Displacement	Armour		Principal Armament	Torpedo Tubes	H.-P.	Nominal speed
			Belt	Gun				
	BATTLESHIPS.							
1907	Minas Geraes São Paulo	19,281	9	9	12 12-in., 16 4·7-in., 4 3-in. A.A. 12 12-in., 12 4·7-in., 2 3-in. A.A.	—	23,500	21
	PROTECTED CRUISERS.							
1907	Bahia Rio Grande do Sul	3,150	—	—	10 4·7-in., 4 3-in. A.A.	4	22,000	27
	COAST DEFENCE VESSEL.							
1898	Floriano	3,200	14	8	2 9·4-in., 4 4·7-in.	—	3,400	15

There is 1 river monitor (*Pernambuco*), 2 river gunboats, 10 destroyers, 4 submarines (of which only one is of an ocean-going type), and a submarine depôt and salvage vessel. The battleship *Minas Geraes* and cruisers *Bahia* and *Rio Grande do Sul* have been extensively refitted, oil-fired boilers being installed. A British-built four-masted training ship with auxiliary Diesels, the *Almirante Saldanha*, was delivered in 1934. A sum of about 6,600,000*l.* was set aside in 1933 for modernizing the fleet. Nine 1,500-ton destroyers are to be ordered in the first instance. Tenders have also been received for the construction of two 8,000-ton cruisers and six 900-ton submarines.

There are three naval arsenals—at the Ilha das Cobras (Rio de Janeiro), Pará, and Ladario de Matto Grosso (this latter a river arsenal).

Rio de Janeiro (Federal District) is the seat of the military college, the general staff school, the military school, the veterinary school, the school of aviation, the improvement school for officers, the naval school of war, and the professional schools of the navy. In the State of Rio de Janeiro is the naval school. A new flying school for the naval air service was opened in 1934.

Production and Industry.

Brazil is an agricultural country, though only a small portion is under culture, and she is a heavy importer of wheat and flour. The cultivated area covers about 17,387,000 acres, of which 4,133,000 acres are in coffee, 6,919,000 in maize, 1,500,000 in cotton, and 1,315,000 in

rice. Brazil ranks first in the production of coffee, second in the production of cocoa, and third in that of sugar and tobacco. Coffee, the chief product cultivated, accounts annually for from 60 to 75 per cent. of Brazil's total exports. The four States of São Paulo, Rio de Janeiro, Espirito Santo, and Minas Geraes are the principal districts for coffee growing. Brazil, with 2,967,600,000 coffee trees, has two-thirds of the world total and three-fourths of the coffee. Exports of coffee in 1933 constituted 72·7 per cent. of the total exports. Sales since February, 1931, have been controlled by the Federal Government; stocks purchased by the Government and the Coffee Council up to June 30, 1933, totalled 37,572,714 bags, of which 34,298,022 bags had been incinerated by January 15, 1935. Output in 1933–34, 29,880,000 bags; exports, 1934, 14,146,820 bags (1 bag = 132 pounds). Exports of oranges are growing—in 1933, 2,554,258 boxes, of which Great Britain took 70 per cent. Cotton output, 1932–33, 75,367 tons.

Indiarubber is another great natural product of the country, the principal rubber-growing districts being the Acre Territory and the States of Amazonas and Pará. The best rubber to be found on the world's markets, the '*fine hard Pará*,' comes from Pará, but production has declined. Brazil is the chief source of carnauba wax, used for electric insulation, phonograph records, etc.; exports in 1933, 6,875 metric tons.

The chief crops, with production and value for 1931–32 were:—

Crops	Amount	Value	Crops	Amount	Value
	(Metric tons)	Contos of reis		(Metric tons)	Contos of reis
Coffee	1,561,604	1,405,444	Maté	167,900	92,345
Maize	5,083,853	1,372,640	Potatoes	494,566	98,913
Sugar	936,938	468,469	Wheat	135,547	54,218
Rice	1,048,076	586,922	Cocoa	91,623	69,633
Tobacco	84,982	212,455	Rubber	17,294	19,023
Mandioc	762,730	244,074	Brazil nuts	23,840	21,470
Beans	674,428	236,050	Wine (gallons)	31,915,300	99,950
Cotton	119,802	176,706	Bananas(bunches)	53,907,592	107,815

The census of cattle for 1932 showed that there were in Brazil 42,539,200 cattle; 21,614,622 swine; 10,660,598 sheep; 5,231,455 goats; 6,573,329 horses; 2,745,021 asses and mules.

Both the forests and mines of Brazil are important. Total exports of timber 1933, 101,967 metric tons, chiefly to Argentine. Manganese ores, found in Minas Geraes, are the principal mineral export; exports in 1933, chiefly to Belgium and the United States, were 24,893 metric tons. Coal deposits exist in Rio Grande do Sul, Santa Catharina, Paraná, and São Paulo. Total reserves are estimated at about 5,000 million tons, and the annual output, from 7 mines, about 370,000 tons. Iron is found chiefly in Minas Geraes. At Itabira foreign capital is now opening up what is believed to be one of the richest iron ore deposits in the world. Output of pig iron (1933) about 50,000 tons; of rolled steel products, about 45,000 tons. There are 10 mills. Gold is found in practically every State, though large scale mining is confined to a single mine in Minas Geraes; the production in 1934 was 6,103,904 grammes. Alluvial deposits were discovered in Maranho in 1933. Export of gold has been forbidden since 1918; the output is used to guarantee the inconvertible Treasury and Bank notes. Diamond districts are Diamantina, Grão Mogol, Chapada Diamantina, Bagagem, Goyaz, Matto Grosso, and other States. Exports have declined from 384,000*l.* in

1928 to 2,000*l.* in 1933. A great part of the world's supply of monazite comes from Brazil, chiefly from Bahia and Espirito Santo.

The most important manufacturing industry in Brazil is cotton weaving (largely in Sao Paulo and Minas Geraes). There were in 1929, 347 cotton factories with 2,620,471 spindles and 78,910 looms. There are also 13 silk mills, 35 woollen mills, 16 jute mills, 18 paper mills (output, about 70,000 metric tons annually), over 2,000 tobacco factories, and approximately 216 sugar factories. In Rio de Janeiro flour milling is important, wheat being imported chiefly from the Argentine and Uruguayan Republics and the United States. There are 15 packing houses. There are about 500 hydro-electric plants, with a combined capacity of 700,000 horse-power.

Commerce.

Imports and exports (excluding specie) for 5 years :—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports . . .	53,618,511	28,755,694	21,744,297	28,131,911	25,467,306
Exports . . .	65,745,925	49,543,866	36,629,594	35,790,080	35,441,373

Exports in 1934, excluding specie, totalled 2,200,333 metric tons ; imports, 3,969,971 metric tons. Exports, 1933, 1,910,772 metric tons ; imports, 1933, 3,935,735 metric tons.

Principal exports in 1934 and 1933 were (metric ton = 2,204·6 lbs.):—

—	Quantities		Value	
	1934	1933	1934	1933
			Milreis	Milreis
Coffee . . . (Bags)	14,147,000	15,459,309	2,114,512	2,050,084,358
Rubber . .(Metric tons)	11,124	9,453	33,534,000	21,687,209

Italy	86,206	61,657	91,629	94,981

The chief articles of commerce between the United Kingdom and Brazil (Board of Trade statistics) in two years were :—

Imports into U.K. from Brazil	1932	1933	Exports from U.K. to Brazil	1932	1933
	£	£		£	£
Nuts	370,142	474,048	Coal	694,842	629,056
Beef	1,220 615	1,019,162	Cottons (piece goods)	100,661	185,375
Bananas	325,478	519,555	Machinery	395,456	542,108
Oranges	832,142	1,032,710	Iron and steel	602,695	887,286

Total trade between United Kingdom and Brazil (according to Board of Trade returns) for 5 years :—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Brazil into U.K.	8,111,092	5,702,797	4,049,445	4,806,960	8,466,488
Exports to Brazil from U.K.	7,970,173	4,063,428	4,679,059	6,165,293	5,748,482
Re-exports to Brazil from U.K.	171,879	105,912	151,579	152,521	140,889

Shipping and Navigation.

Inland waterways, mostly rivers, are open to navigation over some 40,300 miles. By means of its waterways Brazil is connected with the neighbouring States. All coasting and river vessels must be Brazilian. Merchant shipping on June 30, 1933, included 29 sailing vessels of 50,107 tons, and 266 power-driven vessels of 438,781 gross tons. Rio de Janeiro and Santos are the two leading ports. The largest shipping company, the Lloyd Brasileiro with 73 vessels of 270,623 gross tons, is owned and subsidized by the Government.

Internal Communications.

Railway history in Brazil begins in 1854 with 89 miles. On December 31, 1931, the total length of railways 22,279 miles, with 3,395 locomotives, 45,078 freight waggons and 3,888 passenger cars. Of this total 13,153 miles were the property of the Union, 3,319 were operated under Federal concessions, 1,588 miles belonged to the States, and 4,219 miles were privately owned. The Central Brazil Railway (2,082 miles) is the principal

railway in Brazil, and is owned by the State, and joins up the railways of Brazil with those of Uruguay, Argentina and Paraguay. The Paulista railway is electrified from Jundiahy to Rincao (177 miles), and the Oeste de Minas railway from Barra Mansa to Augusto Pestana, a length of 44 miles. The total length of highways in 1932, was 90,644 miles, of which 20 per cent. were first-class roads. Motor cars, 1932, totalled 224,820.

Of the telegraph system of the country about half, including all inter-State lines, is under control of the Government. There are 75,000 miles of line, including 46,291 miles of Government property, 7,516 miles of railway property and 21,196 miles of submarine cables. In 1928 there were 5,115 telegraph offices. Three submarine cables connect Brazil with Europe, 2 with the United States, and 3 with the River Plate. All-America Cables operates land lines between Sao Paulo and Santos, and submarine cables from Rio de Janeiro and Santos, linking those points with all Latin America and the United States. Telephone service in the State of Rio Grande do Sul as well as point-to-point radio telegraph service between the cities of Rio de Janeiro, Porto Alegre, Sao Paulo, Florianopolis and Curityba are furnished by the Companhia Telefonica Rio Grandense.

Forty-two long-wave and two short-wave wireless stations have been established; there are 485 wireless land stations. Radio telephonic communications with the United States was opened in December, 1931.

Brazilian Post-office, with 4,870 offices, during 1931 handled 1,506,259,574 letters and post-cards; air-mails handled 3,324,884 pieces of mail.

Seven companies, especially the Compagnie Generale Aeropostale, the Kondor Syndicate and the Pan American Airways, furnish air-mail and passenger services; in 1933 54 planes were in service, covering 12,468 miles of route.

A decree was issued in 1913 adopting the standard time and longitude of Greenwich (instead of that of Rio de Janeiro) as from January 1, 1914.

Money, Credit, and Banking.

Brazil has long had a dual currency, with a gold milreis (1,000 reals or reis) for foreign trade and a paper milreis for domestic trade. But a presidential decree of November 21, 1933, abolished the gold milreis and authorised the collection of customs at a new rate of 8 milreis paper to 1 milreis gold. Another decree of November 27 made the paper milreis legal tender for all debts, public or private, whether stated in gold milreis or not.

The law of December 18, 1926, attempted to fix the gold milreis as equal to 4·567 paper milreis = $5\frac{5}{64}d.$ (sterling at par) = 11·96 cents (U S.). But in its 1931 finances, the Government reckoned 1 gold milreis = 6·75 paper milreis = 4*d.* sterling, and in 1933, as stated, reduced the nominal gold value still further. The exchange value of the gold milreis in London in 1934 ranged between $3\frac{11}{16}d.$ and $2\frac{3}{8}d.$; in New York between 8·75 cents and 8·25 cents. The currency in use is chiefly paper, of the following denominations: 1, 2, 5, 10, 20, 50, 100, 200, 500 and 1,000 milreis. The last-named is always called '1 conto of reis.'

The law passed December 18, 1926, set up a new unit of account called the *cruzeiro*, a gold coin to contain 2 grammes of gold ·900 fine. Gold coins of 2, 5 and 10 *cruzeiro* were eventually to be minted, along with subsidiary token coinage.

A law of April, 1927, placed the volume of currency under control of the *Caixa de Estabilizacdo*, but the Provisional Government on November 22, 1930, abolished the bureau and transferred its functions, with certain restrictions, to the Bank of Brazil. The latter controls the purchase and sale of all foreign exchange.

Total paper currency in circulation, December 31, 1930, had been reduced to 2,713,600,000 milreis (about 56,500,000*l.*), but its convertibility into gold had been suspended by the decree of November 22, 1930, which transferred the entire gold reserve abroad to protect the foreign exchange value of the milreis. The rebellion in Sao Paulo in July, 1932, resulted in an increase of about 400,000 contos in the circulation, which stood on December 31, 1933, at 2,982,352,000 milreis.

The Bank of Brazil (founded in 1808 and reorganized in 1906) with an authorised capital of 100,000 contos of reis) has 83 branches throughout the Republic, and does a general banking business. Its reserves, December 31, 1932, stood at 220,185 contos; total deposits, 2,647,019 contos; current loans, 1,502,739 contos; cash on hand, 458,206 contos; own notes in circulation, 170,000 contos. During 1933 note circulation was reduced to 40,000 contos.

Commercial banks on June 30, 1934, had cash on hand of 905,334 contos and total advances of 7,014,399 contos out of total resources and liabilities of 29,036,855 contos.

Weights and Measures.

The metric system has been in use in all official departments since 1862. It was made compulsory in 1872, but the ancient measures are still partly employed in certain rural districts of the interior. They are:—

The *Libra*	=	1·012 lbs. avoirdupois.	
,, *Arroba*	=	32·38	,, ,,
,, *Quintal*	=	129·54	,, ,,
,, *Alqueire* (of Rio)	=	1 imperial bushel, or 40 litres.	
,, *Oitava*	=	55·34 grains.	

Diplomatic and Consular Representatives.

1. Of Brazil in Great Britain.

Ambassador Extraordinary and Plenipotentiary.—Dr. Raul Régis de Oliveira, G.B.E. (appointed December 13, 1924).

Counsellor.—Carlos Taylor.

Secretary.—Deico H. de Moura, O.B.E.

Commercial Attaché.—Julio Augusto Bardoza Carneiro.

Consul-General in London.—A. de Maya Monteiro.

There are Consul-Generals also at Liverpool and Southampton, Consuls at Manchester, Cardiff, Swansea, and Glasgow, and Consular representatives at Belfast and Dublin.

2. Of Great Britain in Brazil.

Ambassador Extraordinary and Plenipotentiary.—Sir William Seeds, K.C.M.G. (appointed April 11, 1930).

Third Secretary.—A. A. F. Haigh.

Commercial Secretaries.—E. Murray Harvey, O.B.E., M.C. and J. G. Lomax, M.B.E., M.C.

Naval Attaché.—Captain R. H. C. Hallifax, R.N.

Military Attaché.—Major R. H. Smith, O.B.E., R.A.S.C.

Air Attaché.—Wing-Commander K. R. Park, M.C., D.F.C.

There are Consular representatives at Rio de Janeiro (C.G.), Bahia, Pará, Pernambuco, Rio Grande do Sul, São Paulo, Santos, Ceará, Maceió, Maranhão, Porto Alegre, Manáos, Morro Velho, Ilheos, and other towns.

Reigning King (Tsar)

Boris III, eldest son of King Ferdinand (of Saxe-Coburg and Gotha), and of the late Marie Louise (died January 31, 1899), eldest daughter of Robert the last reigning Duke of Parma, born January 30, 1894, succeeded to the throne on the abdication of his father, October 3, 1918, married October 25, 1930, Princess *Giovanna* of Savoy (Queen Ioanna), daughter of King Victor Emanuel III of Italy.

Offspring.—Princess *Marie Louise*, born January 13, 1933.

Brother and Sisters of the King.—(1) Prince *Cyril*, born November 17, 1895; (2) Princess *Eudoxia*, born January 17, 1898; and (3) Princess *Nadejda*, born January 30, 1899; m. January 24, 1924, to Duke Albert Eugène of Württemberg.

According to the Constitution the Sovereign and the heir to the throne must profess the Orthodox religion, and must reside permanently in the country. The royal title is hereditary.

The civil list is fixed (1934) at 5,000,000 leva, besides 29,170,000 leva for the maintenance of palaces, &c.

Constitution and Government.

The Principality of Bulgaria and the Autonomous Province of Eastern Rumelia, both under Turkish suzerainty, were constituted by the Treaty of Berlin, July 13, 1878. The former was a revival of the ancient kingdom of Bulgaria which, in the reign of King Ivan Shishman III became tributary to Turkey in 1366 and was annexed in 1393. Prince Alexander of Battenburg was elected Prince of Bulgaria on August 29, 1879. On September 18, 1885, a *coup d'état* effected the union of Eastern Rumelia with Bulgaria, and this was recognized by the Porte on April 5, 1886, when Prince Alexander was appointed Vali Pasha, or Governor General for the Sultan, of the Province which had, however, merged its autonomy in the constitution of Bulgaria. As the result of a domestic *coup d'état* and the hostility of the Emperor Alexander III of Russia, Prince Alexander abdicated on September 7, 1886. After a Regency Prince Ferdinand of Saxe-Coburg and Gotha, sometimes described as of Saxe-Coburg-Kohary, was elected Prince of Bulgaria July 7, 1887, but it was not until March 14, 1896, that the Porte recognized him as Prince and went through the form of appointing him Vali Pasha of Eastern Rumelia. On October 5, 1896, Bulgaria declared her independence of Turkey and Prince Ferdinand assumed the title of Tsar of the Bulgarians. This was recognized by the Porte and the Powers in April 1909.

On September 30, 1912, Bulgaria allied with Serbia, Greece and Montenegro commenced war on Turkey (First Balkan War), which was ended by the Treaty of London on May 30, 1913, by which Turkey ceded to the Allies all its European territory west of a line drawn from Midia on the Black Sea to Enos on the Aegean, and also Crete. Crete was eventually ceded to Greece.

The Balkan League broke up almost immediately after the signing of the Treaty of London, owing to disagreements among the allies as to the division of the territory ceded to them, and on June 29, 1913, war broke out among the allies (Second Balkan War). On July 10, 1913, Rumania intervened to impose peace on the allies and to exact for herself from Bulgaria an extension of her frontier. Peace came finally on August 10 (July 26 old style), 1913, by the Treaty of Bukarest, between Bulgaria on the one hand, and Rumania, Serbia, Greece and Montenegro on the other.

By the Constitution of 1879, amended May, 1893, and June, 1911, the legislative authority was vested in a single Chamber, called the Sobranye or National Assembly, composed of 227 members. The members were elected by universal manhood suffrage at the rate of one member to every 20,000 of the population. On April 13, 1927, the Sobranye agreed to adopt the principle of proportional representation.

On May 19, 1934, after a *coup d'état*, arranged by Colonel Damian Veltcheff, who had arranged the *coup d'état* of June 8, 1923, and the Zveno Club led to the formation of a Cabinet under Colonel Kimon Gheorghieff and the dissolution of the twenty-third Sobranye. It was announced that the Constitution was to be profoundly modified so as to provide for the creation of a corporative state, somewhat on the Italian model, and pending the establishment of this new regime the administration would be carried on by decree-laws. Colonel Gheorghieff's Cabinet was overthrown by a *coup d'état* on January 22, 1935, and the following Cabinet took office the same day:—

Premier and Minister of War.—General Peter *Zlateff.*
Minister of Interior.—Colonel Krum *Koleff.*
Minister of Foreign Affairs.—Kosta *Batoloff.*
Minister of Finance.—Mihail *Kalandaroff.*
Minister of Education.—General *Radeff.*
Minister of National Economy.—Professor Yanaki *Moloff.*
Minister of Communications.—Nikola *Zaharieff.*
Minister of Justice.—Professor *Dikoff.*

For local administration the country was divided in 1934 into 7 counties, each under a local governor. The counties are divided into districts, each under a district governor, and the districts into municipalities, each under a mayor. The county governors, district governors, and mayors are appointed by the Minister of the Interior.

Area and Population.

The area of Bulgaria is 103,146 square kilometres, or 39,825 English square miles, and the census population on December 31, 1934, was 6,090,215 (3,058,392 males and 3,031,823 females), as against 5,478,741 (2,743,025 males and 2,735,716 females) in the census of 1926. Population on December 31, 1933, was estimated at 6,038,000 (3,033,800 males and 3,004,200 females); 20·6 per cent. of the population was urban and 79·4 per cent. rural.

By the Peace Treaty of Neuilly, signed on November 27, 1919, Bulgaria ceded Thrace to the Allied and Associated Powers and the Strumnitza line and a strip of territory on the north-west frontier to Serbia.

Bulgaria was deprived of its Aegean littoral, but an efficient economic outlet to the same sea was promised to her by the Treaty, but has not yet been put into effect.

Population of counties, according to census of December 31, 1934 :—

Counties.	Area in sq. miles.	Population.	Per sq. mile.
Burgaz	5,258	555,300	105
Plovdiv	6,115	803,720	131
Pleven	5,960	999,181	167
Shumen	5,690	1,022,384	177
Sofia	6,502	1,154,956	177
Stara Zagora	6,602	814,024	135
Vratza	4,298	740,650	172
Total	39,825	6,090,215	153

According to the census of 1926, there were 4,455,355 Bulgarians, or 81·32 per cent. of the total population, and 128,747 belonging to other Slav races.

The capital is the city of Sofia, with a population (census, 1934) of 287,976. The other principal towns, with population in 1934, are Philippopolis (Plovdiv), 100,485; Varna, 70,183; Ruschuk (Ruse), 49,388; Slivno (Sliven), 30,683; Plevna (Pléven), 31,764; Stara Zagora, 29,857; Shumen, 25,734; Burgaz, 36,099; Jambol, 25,125; Haskovo, 26,622; Pazarjik, 23,387; Vidin, 18,599; Vratza, 16 477; Kustendil, 16,386.

The movement of population in four years has been :—

Years	Marriages	Living Births	Still-births	Deaths	Surplus of Births
1930	54,483	179,973	1,451	92,771	+ 87,202
1931	55,667	171,180	1,390	98,469	+ 72,711
1932	56,515	185,578	1,482	96,180	+ 89,398
1933[1]	55,886	174.095	1,547	92,561	+ 81,534

[1] Preliminary figures.

Religion and Education.

The national faith is that of the Orthodox Church, though, in 1870, in consequence of its demand for and acceptance of religious autonomy, the Bulgarian Church was declared by the Patriarch of Constantinople to be outside the Orthodox Communion. The Church is governed by the Synod of Archbishops. There are 11 Dioceses, viz., Sofia, Plovdiv, Stara Zagora, Sliven, Varna, Ruse, Tirnovo, Vratza, Lovetch, Vidin and Nevrokop, in addition to 4 in Macedonia and 1 in Thrace (suspended at present). In addition to the Archbishops in charge of these dioceses there are Bishops of Bregalnitza, Dragovitza, Nichava, Velitza, Vranitza and Znepolye. The clergy, both Orthodox and of other religious bodies, are paid by the State and also receive fees for services at burials, marriages, &c. There were, according to the last census of 1926, 4,568,773 members of the Orthodox Church of Bulgaria, 789,296 Moslems and 40,347 Catholics, 6,735 Protestants, 46,431 Jews, 25,402 Armenian-Gregorians, and 1,757 others.

Elementary education is obligatory and free for children between the ages

of 7 and 14. The census of 1926 showed that 26·53 per cent. of the male population and 53·60 per cent. of the female population were illiterate.

The following are the educational statistics of Bulgaria for 1932–33 :—

Schools		Number	Teachers			Attendance		
			Male	Female	Total	Male	Female	Total
Elementary	National	4,709	7,679	8,928	16,607	327,537	307,743	635,280
	Private	800	1,318	517	1,835	36,351	31,435	67,786
Pro-Gymnasia	National	1,882	3,349	3,648	6,997	117,942	86,890	204,832

Justice.

With Royal Decree No. 174 of November 10, 1934, and in conformity with Article 47 of the Bulgarian Constitution, the following judicial institutions were established: District and County courts, Courts of Appeal, and the Supreme Court of Cassation. The seats of the District Courts are located in the chief district towns, and those of the County Courts in the chief county towns. There are three Courts of Appeals, namely: (1) Sofia—for the Sofia and Vratza administrative counties; (2) Rusé—for Pleven and Shaumen administrative counties; (3) Plovdiv (Philippopolis)—for Plovdiv, Stara Zagora and Bulgas administrative counties. There is only one Supreme Court of Cassation, sitting at Sofia.

Finance.

The revenue and expenditure of Bulgaria for 5 years were as follows (in thousands of leva) :—

—	1930-31 [1]	1931-32 [1]	1932-33 [2]	1933-34 [2]	1934-35 [2]
Revenue . . .	5,597,403	5,211,870	4,743,230	5,221,222	5,330,000
Expenditure . .	6,375,408	5,822,041	5,271,577	5,221,222	5,330,000

[1] Final figures. [2] Provisional final. Estimates.

Estimated revenue and expenditure for 1934-35 [1]:—

Revenue	Thousand Leva	Expenditure	Thousand Leva
Direct taxes . . .	470 000	Administration . .	46,459
Indirect taxes .	2,172,000	Audit Office . . .	13,804
Duties . . .	505,000	Ministry of Foreign Affairs . . .	154,165
Fines and requisitions .	73 000	Ministry of Interior .	384,728
Railways, harbours, post, telegraphs, and telephones . . .	335,000	,, ,, Education	741,490
State property . .	285,500	,, ,, Finance .	2,060,647
Various (including balance from previous budget and untransferred sums in connection with Public Debts service) . .	1,489,500	,, ,, Justice .	159 598
		,, ,, War . .	927,185
		,, ,, Communication . .	319,251
		,, ,, National Economy.	522,673
Total . .	5,330,000	Total . . .	5,330,000

[1] The sums indicated refer to the whole fiscal year—1934-35. The present Budget, however, will be exercised only for nine months—up to December 31, 1934, after which date the new Budget will be effective. Beginning with the present year the fiscal and calendar years will coincide.

On June 30, 1934, the total debt of Bulgaria was given as follows: Foreign debt: consolidated, 567,575,065 gold francs, 259,961,645 French francs, 4,008,360*l.* sterling, 16,983,500 dollars, 3,618,250 paper roubles, total equivalent to 19,090,328,735 leva; non-consolidated, 8,193,750 French francs, 2,583,162 dollars, 471,473 gold Italian lire, 55,000,000 lei, total equivalent to 321,070,956 leva, or a grand total of consolidated and non-consolidated foreign debt of 19,441,399,691 leva. Internal debt: 7,070,978,365 leva (consolidated, 2,545,826,640 leva; non-consolidated, 4,525,826,640 leva).

Defence.

The pre-war peace strength of the Bulgarian army was about 3,900 officers and 56,000 other ranks. Its war strength was approximately 500,000 men.

Under the terms of the Treaty of Neuilly of November 27, 1919, the total military forces of Bulgaria must not in the future exceed 20,000 men, enrolled by voluntary system. The strength on December 31, 1932, was 966 officers, 17,652 other ranks. The obligatory military service is abolished. All measures of mobilisation are prohibited and, in order to prevent the formation of a reserve, service in the ranks is to be for a minimum period of 12 years. Officers serving at the time when the treaty was signed must undertake to serve at least till the age of 40 and newly appointed officers serve for at least 20 years.

A frontier guard of 3,000 men voluntarily enlisted is permitted (strength in 1932, 2,960); and in addition the number of armed gendarmes, police, customs officials and forest guards must not exceed 10,000 (strength in 1932, 6,643).

The maximum authorised armaments and munition supplies are :—

	Per 1,000 men.	Munitions per arm.
Rifles or carbines . .	1,150	500 rounds
Machine guns . . .	15	10,000 ,,
Trench mortars, light .	2	1,000 ,,
,, ,, heavy . .	2	500 ,,
Guns or howitzers . .	3	1,000 ,,

No military or naval aircraft is permitted.

The manufacture of arms, munitions and war material is only to be carried out at one factory under State control. The importation and exportation of arms and munitions are prohibited.

In 1934 the strength of the active army was 999 officers, 20,042 other ranks, organised in 8 infantry regiments each of 3 battalions, 3 cavalry regiments each of 4 squadrons, 8 artillery groups each of 3 batteries, 3 battalions of engineers and auxiliary services. The gendarmerie and the frontier guards numbered 9,798 all ranks.

The military budget for 1934–35 amounted to 963,005 leva.

Under the terms of the treaty Bulgaria has surrendered all warships and submarines, but is permitted to maintain on the Danube and along the coast 4 torpedo boats and 6 motor boats, now of little value, all without torpedoes and torpedo apparatus, for police and fishery protection duties.

Production and Industry.

Agriculture is the chief occupation of the people. Land is held in absolute freehold by the owners and there is a land tax. The communes hold pasture-land and wood-land in perpetuity and pay no rent, and over such lands the members of the communes have grazing and wood-cutting rights.

According to the census of 1926, 80·02 per cent. of the active population (2,464,421) were engaged in agriculture, most of them being small proprietors holding from one to six acres. The methods of cultivation are primitive, but machinery is being gradually introduced.

The total area of Bulgaria is 10,314,617 hectares, or 25,786,550 acres; of this the cultivated area is (1932) 4,137,121 hectares, or 10,218,689 acres, and the forest area (1933) 2,970,536 hectares, or 7,426,340 acres (682,384 hectares belonging to the State, 1,678,699 hectares to the municipalities, and 609,453 hectares to others).

The area and yield of cereals for 2 years are given as follows :—

Cereals	1932		1933[1]	
	Area	Yield	Area	Yield
	Acres	Metric tons	Acres	Metric tons
Wheat	3,120,977	1,309,758	3,097,465	1,540,905
Rye	542,572	229,376	518,009	241,353
Barley	570,127	295,500	595,424	351,557
Oats	287,945	100,576	326,573	129,876
Maize	1,838,741	886,489	1,795,823	951,028
Total	6,360,362	2,821,699	6,333,294	3,214,719

[1] Provisional.

Fruit grows in abundance, especially in the neighbourhood of Kustendil. The area under vines was 230,789 acres in 1932, and the vintage about 47,504,183 gallons. Cotton in 1932 yielded 13,021 quintals, and in 1933, 23,950 quintals from19,860 acres and 50,736 acres respectively. Sugar production in 1931 was 24,954 metric tons, the area under beet being 29,915 acres; production in 1932, 27,820 metric tons; 16,801 acres were under rose cultivation in 1932, producing 2,029 kilogs of essence. Tobacco area in 1932, 50,715 acres, yield, 17,353 metric tons; 1933 yield 24,456 metric tons from 67,206 acres. In 1931, the production of silkworm cocoons was 1,109,589 kilos valued at 38,835,615 leva; in 1932, the production was 1,304,487 kilos valued at 39,136,610 leva; and in 1933, the production was 1,364,000 kilos valued at 38,181,000 leva.

Industry is not much developed, though the State encourages industrial enterprise. On January 1, 1934, there were 1,184 'encouraged' undertakings in operation. Mining development has been slow. The country is rich in coal; there are three State mines (at Pernik, Bobovdovl and Maritza), and several privately-owned mines. Total coal production in 1933, 1,573,394 metric tons, of which 1,318,824 tons came from State mines and 254,570 tons from privately-owned mines, compared with 1,761,149 tons (1,488,847 tons from state mines and 272,302 tons from private mines) in 1932. In 1933 there were mined the following minerals (in metric tons):—lead, 117; aluminium, 2,659; and salt, 5,680.

Commerce.

Imports and exports for 5 years:—

—	1930	1931	1932	1933	1934
	1,000 leva	1,000 leva	1,000 leva	1,000 leva	1,000 leva
Imports . . .	4,589,725	4,660,063	3,471,233	2,202,256	2,229,483
Exports . . .	6,191,140	5,934,174	3,382,845	2,846,849	2,584,630

The following table shows the trade by principal countries for 2 years:—

Country	Imports		Exports	
	1933	1934	1933	1934
	1,000 leva	1,000 leva	1,000 leva	1,000 leva
United Kingdom .	152,208	142,869	49,805	52,803
Austria . . .	137,074	107,114	277,074	134,888

Machinery	299,246	229,677	Sugar	11,856	7,638
			Wheat	195,776	51,811

Total trade between United Kingdom and Bulgaria (Board of Trade Returns) for 5 years:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Bulgaria into U.K.	88,966	53,408	94,789	73,971	107,970
Exports to Bulgaria from U.K.	433,843	546,449	562,516	268,464	268,039
Re-exports to Bulgaria from U.K.	4,410	18,423	16,143	5,595	20,235

Shipping and Communications.

Mercantile marine, June 30, 1934, comprises 14 vessels of 17,476 tons.

The number of vessels entered at all the Black Sea ports of Bulgaria in 1933 was 5,838 of 2,204,576 tons; number of vessels cleared, 5,808 of 2,192,343 tons. At all the Danube ports there entered, in 1933, 10,270 vessels of 1,844,204 tons; and cleared, 10,247 vessels of 1,834,810 tons.

In 1933, there were in Bulgaria 4,651 miles of State roads, and 6,205 miles of communal roads; total: 10,856 miles of road.

In 1933, Bulgaria had 1,655 miles of railway of ordinary gauge and 262 miles of narrow gauge; total, 1,917 miles. All the lines belong to the State, which works them. Railways connect Sofia with the general European system. In 1933, there were 40 miles of electric tramways.

There were, in 1933, 583 post offices. Total correspondence handled, 32,221,100 letters and postcards, 616,292 parcels. Length of telegraph line (excluding line belonging to the railways) in 1933, 1,457 miles; number of offices, 576; number of messages, 2,146,873. In 1933 there were 568 telephone stations; length of line, 10,456 miles, number of conversations, 67,653,556, of which 48,402 were international.

Money and Credit.

The National Bank of Bulgaria, with headquarters at Sofia and branches in the different towns of Bulgaria, has a capital of 500,000,000 leva, provided by the State. It has the sole right of note issue. On January 23, 1935, it had in hand 1,546,675,120 leva in gold, and reserves of 1,256,235,000 leva. The note circulation on the same date was 2,257,416,000 leva. There is also a State Agricultural Bank for the purpose of providing cheap credit for the agricultural community. Its capital is 760,209,882 leva. The Bulgarian International Bank for facilitating and encouraging international trade was established on January 11, 1922. The original capital of this bank was 75,000,000 leva, of which 30,000,000 leva were apportioned to the Bulgarian National Bank and the Bulgarian Agricultural Bank, and the

remainder to foreign banks and organisations. The Bulgarian Co-operative Bank is another State bank founded in 1910. By order of the government on October 18, 1934, the Agricultural Bank of Bulgaria and the Bulgarian Central Co-operative Bank were fused as from December 31, 1934, under the name of Bulgarian Agricultural and Co-operative Bank.

Deposits in the 556 Postal Savings Banks of Bulgaria at December 31, 1933, amounted to 1,662,000,000 leva.

Coins in circulation: gold pieces of 100, 20, and 10 leva; silver pieces of 100, 50, and 20 leva; copper-nickel pieces of 10, 5, 2, and 1 leva; nickel pieces of 20, 10, 5, and 2½ stotinki (centimes); and zinc pieces of 20, 10, and 5 stotinki (centimes); the notes of the National Bank circulate at par. The *leva* has been stabilised at 92 leva to 1 gramme of fine gold, or 673·659 leva = 1*l* (gold).

The metric system is in general use. On April 1, 1916, the Gregorian Calendar came into force in Bulgaria.

Diplomatic and Consular Representatives.

1. Of Bulgaria in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Pantcho Hadji-Misheff. Appointed October 16, 1924.

First Secretary.—Ilia Boyadjieff.

Military Attaché.—Major Cyrille Jantchouleff.

2. Of Great Britain in Bulgaria.

Envoy Extraordinary and Minister Plenipotentiary.—Charles Henry Bentinck, C.M.G. (appointed January 17, 1934).

First Secretary.—J. Balfour.

Consul and Commercial Secretary.—R. B. B. Tollinton.

Naval Attaché.—Capt. H. Pott, M.V.O., R.N.

Military Attaché.—Major F. A. Sampson.

There are Consular representatives at Sofia, Varna, and Bourgas.

CHILE.

(REPÚBLICA DE CHILE.)

Constitution and Government.

THE Republic of Chile threw off allegiance to the Crown of Spain, constituting a national government on September 18, 1810, finally freeing itself from Spanish rule in 1818.

The following is a list of the Presidents since 1896 :—

Don Federico Errázuriz, Sept. 18, 1896—Sept. 18, 1901.
Don Germán Riesco, Sept. 18, 1901—Sept. 18, 1906.
Don Pedro Montt, Sept. 18, 1906—Aug. 16, 1910.[1]
Don Elias Fernandez Albano (Acting), Aug. 16, 1910—Sept. 6, 1910.[2]
Don Emiliano Figueroa Larrain (Acting), Sept. 6, 1910—Dec. 23, 1910.
Don Ramón Barros Luco, Dec. 23, 1910—Dec. 23, 1915.
Don Juan Luis Sanfuentes, Dec. 23, 1915—Dec. 23, 1920.
Don Arturo Alessandri, Dec. 23, 1920—Sept. 10, 1924.[2]
Gen. Don Luis Altamirano (Acting), Sept. 10, 1924—Jan. 23, 1925.[3]

Junta appointed.

Don Emilio Bello Codecido (Acting), Jan. 27, 1925—Mar 21, 1925.
Don Arturo Alessandri (restored), March 21, 1925—Oct. 1, 1925.[4]
Don Luis Barros Borgoño (Acting), Oct. 1, 1925—Dec. 23, 1925.
Don Emiliano Figueroa Larrain, Dec. 23, 1925—May 6, 1927.[4]
Gen. Don Carlos Ibañez (Acting, then elected), May 6, 1927—July 26, 1931.[4]
Don Pedro Opazo (Acting), July 26, 1931—July 27, 1931.[4]
Don Juan Esteban Montero (Acting), July 27, 1931—Aug. 18, 1931.[4]
Don Manuel Trucco (Acting), Aug. 18, 1931—Nov. 15, 1931.
Don Juan Esteban Montero, Nov. 15, 1931—June 4, 1932.[3]

Junta appointed.

Don Carlos Davila (Acting), July 8, 1932—Sept. 13, 1932.[3]
Gen. Don Bartolome Blanche (Acting), Sept 13, 1932—Oct. 1, 1932.[4]
Don Abraham Oyanedel (Acting), Oct. 1, 1932—Dec. 24, 1932.

[1] Died. [2] Left Chile. [3] Deposed. [4] Resigned.

By the Constitution of October 18, 1925, legislative power is vested in the National Congress, consisting of the Senate and the Chamber of Deputies, both of which are elected by direct popular vote. The Senate consists of 45 members, elected for eight years, who represent 9 provincial groups of departments. Each group elects five senators. One-half the Senate is renewable every four years. The Chamber of Deputies consists of 143 members elected for four years by departments or groups of departments, one member for every 30,000 inhabitants or fraction of not less than 15,000. The Belgian system of proportional representation prevails. For presidential and congressional elections electors are all male citizens of 21 years of age or over, who are able to read and write; electorate (1934) numbers 468,830. For municipal elections women and foreigners (of 5 years' residence) are eligible to vote. All voting is by ballot. Congress sits from May 21 to September 18. The President of the Republic is elected for a term of six years, by direct

popular vote. A retiring President is not re-eligible. In legislation the President has a modified veto; a bill returned to the Chambers with the President's objections may, by a two-thirds vote of the members present (a majority of the members being present), be sustained and become law. The validity of all elections of President, Deputies and Senators is determined by a special body called *Tribunal Calificador*, consisting of five members chosen by lot from among the following: One each from past-presidents or vice-presidents of the Chamber and Senate; two from members of the Supreme Court; and one from members of the Court of Appeal of the city where Congress meets. The capital is Santiago.

President of the Republic.—Don Arturo *Alessandri.* Elected October 30, 1932; assumed office, December 24, 1932.

The salary of the President is fixed at 84,000 pesos.

The President is assisted by eight Ministers of State, who constitute a Cabinet and who are responsible to him. Ministers may speak in Congress but do not vote.

Local Government.

For the purposes of local government the Republic is divided into Provinces, presided over by *Intendentes*; and the Provinces into Departments, with *Gobernadores* as chief officers, appointed by the President. The Departments constitute one or more municipal districts each with a council or municipality of 5 to 15 members, elected for three years. The Government in 1934 took over control of the finances of the 70 Departments, to safeguard a loan made to them in New York of 15 million dollars.

Area and Population.

Chile is divided into 19 provinces. All provinces except 2 extend from the Pacific to the international boundary, while the inter-provincial boundaries in most cases now follow watersheds instead of rivers, thus confining within one province the waters of a single system and avoiding jurisdictional disputes.

For an account of the dispute between Chile and Peru regarding the provinces of Tarapacá and Tacna-Arica, see the Statesman's Year-Book for 1931, p. 718.

The present areas of the various provinces and their populations, as determined by the census of 1920 and that of November 27, 1930, are as follows:—

Provinces	Area: Sq. Miles (1930)	Population 1920[1] (Census)	Pop. 1930 (Census)	Provinces	Area: Sq. Miles (1930)	Population 1920[1] (Census)	Population 1930 (Census)
Tarapacá .	21,252	117,239	113,331	Concepción .	2,212	229,419	268,421
Antofagasta	47,305	172,330	178,765	Arauco .	2,209	61,652	61,074
Atacamá .	31,409	48,413	61,098	Bio-Bio .	6,129	164,362	180,688
Coquimbo .	15,833	176,041	198,336	Cautín .	10,472	312,466	383,791
Aconcagua	5,774	422,160	463,544	Valdivia .	10,686	185,410	236,115
Santiago .	6,530	718,211	967,603	Chiloé . .	12,680	179,507	183,499
Colchagua .	3,421	126,159	125,435	Aysen . .	38,351	1,660	9,711
O'Higgins .	2,745	158,783	170,586	Magallanes .	52,054	28,960	37,913
Talca. .	5,911	200,665	218,227				
Maule .	5,937	203,155	197,468	Total .	285,133	3,731,573	4,287,445
Ñuble .	5,462	229,981	231,890				

[1] Population in 1920 of the present areas as revised in 1927.

Many islands to the north, west, and south belong to Chile. The coast-line is about 2,485 miles in length; the average width of the country, 110 miles.

In the census of 1930, 2,122,709 were males and 2,164,736 females, and 49·4 per cent. were urban; 1,337,814 or 31 per cent. were gainfully employed. Estimated population on June 30, 1934, was 4,446,617. The great majority of the population is of European origin. The indigenous inhabitants are of three branches, the *Fuegians*, mostly nomadic, living in or near Tierra del Fuego; the *Araucanians* (98,703) in the valleys or on the western slopes of the Andes; the *Changos*, who inhabit the northern coast region and work as labourers. Foreigners included in the census of 1930 numbered 105,463, of whom Spaniards, with 23,439, formed the largest group.

The two leading cities, with census population in 1930, are Santiago, 696,231, and Valparaiso, 193,205. Other towns with census population in 1930 are:—Concepción, 77,589; Antofagasta, 53.591; Viña del Mar, 49,488; Iquique, 46,458; Talca. 45,020; Chillán, 39,511; Temuco, 35,748; Valdivia, 34,296; Talcahuano, 27.594; Magallanes, 24,307.

Births in 1933, 147,733; marriages, 29,562; deaths, 118,432; passengers arriving, 25,396; departing, 23,671. There is no divorce.

Religion.

The Roman Catholic religion was maintained by the State, but in 1925 the church was disestablished. There is one archbishop (Santiago), 12 bishops, and three vicars apostolic. There were in 1931, 1,239 churches and chapels.

Education.

Education is gratuitous and at the cost of the State, and since August 26, 1920, compulsory for at least six years in the cities and four years in the rural districts. A decree issued February, 1928, makes it compulsory for all children between the ages of 7 and 15. There were in 1933, 4,060 public and private primary schools with 487,751 pupils and 12,434 teachers; 7 public normal schools with 950 pupils and 105 teachers; 206 public and private secondary schools with 37,505 pupils and 3,263 teachers; 11 public commercial schools with 211 teachers and 3,517 pupils. Professional and secondary instruction is provided in the State University of Chile, with 4,421 students in 1933, the Catholic University at Santiago (958 students in 1933), the National Institute of Santiago, the University of Concepción, and in the lyceums and colleges established in the capitals of provinces, and in some departments. A school of technology was opened at Valparaiso (Universidad Industrial de Valparaiso). There are besides agricultural schools, schools of mines, and professional schools. Education expenditures in 1929 took 160,546,991 pesos.

There are 930 newspapers and journals published in Chile, including 93 dailies and 213 weeklies.

Justice and Crime.

There are, in addition to a High Court of Justice in the capital, eight Courts of Appeal distributed over the Republic, Tribunals of First Instance in the departmental capitals, and second class judges in the subdelegations. The police force has (1934) 14,820 officers and men; it is organised and regulated by the President of the Republic at the charge of the national treasury.

Finance.

In recent years the revenue and expenditure were as follows (40 pesos = £1 at par; 1 peso = 12 cents, U.S.):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Pesos	Pesos		Pesos	Pesos
1930	1,055,189,133	1,131,490,628	1933	945,959,200	944,127,500
1931	782,484,002	1,027,115,597	1934 [1]	830,499,000	830,493,995
1932	514,756,934	703,609,112	1935 [1]	1,013,630,000	1,013,555,654

[1] Estimates.

Customs revenue in 1935 is estimated at 346,622,000 pesos.

The principal items of expenditure in the 1935 budget are: National Defence, 284,782,950 pesos; Ministry of Interior, 205,843,909 pesos; Education, 168,267,548 pesos.

On December 31, 1933, funded external debt in default amounted to 28,677,762*l.*, 139,551,286 dollars, U.S., and 83,546,000 Swiss francs; in addition external debt guaranteed by the National Government amounted to 1,193,509*l.*, 128,124,214 dollars, U.S., and 37,081,000 Swiss francs. Funded internal debt was 1,196,891,561 pesos, and guaranteed funded internal debt was 61,869,000 pesos. Total debt, external and internal, was equal to 4,138,000,000 gold pesos.

Defence.

Army.

The Chilian Army is a national militia in which all able-bodied citizens are obliged to serve. Liability extends from the 20th to the 45th year, inclusive. Recruits are called up in their 20th year, and are trained mostly for one and a half years. Afterwards they serve for 12 years in the reserve of the active army, after which they belong till the completion of their 45th year to the second reserve. The latter is organised as a second-line army.

Chile is divided into 3 zones or military districts, each of which furnishes a complete division on mobilisation. The army is organised in 3 divisions, comprising: 9 regiments and 3 mountain infantry battalions, 6 cavalry regiments, 4 field artillery regiments, 3 heavy artillery groups and 3 mountain artillery groups, 1 engineering regiment, 1 battalion of railway troops and 2 aviation groups. The total strength of the active army in 1933 was 1,325 officers and 6,735 other ranks.

The infantry are armed with the Chilian Mauser rifle (1895), calibre 7 mm., and the cavalry with a carbine of similar pattern and lance. The field artillery are armed with Q.F. Krupp guns.

In December, 1918, an Air Force was formed under British instruction, and comprised in 1933 11 flights with 105 aeroplanes.

Navy.

The principal vessels of the Chilian fleet are as follows:—

Name	Launched	Displacement, Tons	Extreme Armouring, Inches	Main Armament	Torpedo Tubes	Indicated Horse-Power	Nominal Speed
Battleship:							
Almirante Latorre . .	1913	28,000	10	10 14-in.; 14 6-in.; 44-in.	4	37,000	23
Coast Defence Vessel:							
Capitan Prat	1890	6,900	12	4 9·4-in.; 8 4·7-in . .	2	12,000	18
Armoured Cruiser:							
O'Higgins	1897	8,500	7	4 8-in.; 10 6-in.; 12 3-in.	2	16,000	21·5
Protected Cruisers:							
Blanco Encalada . .	1893	4,420	—	2 8-in.; 10 6-in. . .	5	14,500	22
Chacabuco	1898	4,500	—	2 6-in.; 10 4·7-in.; 5 3-in.	5	15,500	24

The *Almirante Latorre* served in the British Fleet during the war as the *Canada*, and in 1930–31 was refitted and modernised at Devonport Dockyard under a contract between the Chilian Government and the Admiralty. Owing to financial stringency, she has since been laid up. There are 11 large destroyers, all built in England, 9 submarines, and various training and auxiliary vessels. A submarine depot ship, the *Araucano*, and two oil tankers were completed in British yards in 1930. The general efficiency of the personnel of the Navy appears to be high; the active strength, normally about 8,000, has been considerably reduced as a measure of economy.

Agriculture and Industry.

There are three zones in Chile—the arid zone in the north, which for many years has furnished the world's entire supply of natural nitrate of soda, 90 per cent. of its iodine and 18 per cent. of copper consumed; the agricultural zone in the centre; and the forest zone in the south. Mining in the north and agriculture in the centre are the principal occupations. Total area of agricultural land (1930) was 67,494,000 acres; of forest land, 5,080,000 acres; of fruit trees and vines, 293,600 acres; of meadows, 37,087,000 acres. Number of farms in 1930, 210,736 with an average value of 28,800 pesos. Chile produces annually large quantities of cereals, besides excellent wine (8,126,289 gallons in 1933 of which 1,663,700 gallons were exported in 1933, chiefly to Germany and Belgium), fruit, and vegetables. Capital invested in vineyards is about 414,000,000 pesos. Tobacco output from 4,625 acres in 1932 was 10,212,140 lbs. The principal crops of the harvest for 3 years are shown as follows:—

—	Acreage			Produce in Metric Cwts.		
	1933–34	1932–33	1931–32	1933–34	1932–33	1931–32
Wheat .	2,128,215	1,482,807	1,535,052	9,609,126	7,822,618	5,766,243
Barley .	237,927	156,622	107,582	1,463,753	1,441,895	674,272
Oats .	266,670	173,287	168,270	1,143,920	1,028,652	714,560
Maize .	119,487	165,557	111,490	673,754	825,443	749,611
Haricots .	233,395	251,165	174,815	847,264	982,819	636,842
Peas .	86,472	72,920	48,567	295,044	242,058	169,413
Potatoes .	134,152	138,875	105,025	6,112,954	4,783,426	4,078,356

The live stock census of June 30, 1930, showed 441,027 horses, 37,455 asses, 31,414 mules, 2,387,940 cattle, 6,263,482 sheep, 788,831 goats, and 331,156 pigs.

Dairy farms and the production of butter and cheese are on the increase. In Patagonia and Tierra del Fuego large tracts of country are devoted to sheep-farming, largely by British subjects; wool exports, 1933, 10,956 tons. Extensive natural forests are found, the largest in the provinces of Valdivia, Llanquihue and Chiloé. Exports of soap bark (*quillaya*) amount to about 700 tons, principally to Germany.

The wealth of the country, however, consists chiefly in its minerals,

especially in the northern provinces of Atacama and Tarapacá. The metals obtained are gold, silver, copper (Chile is the world's second largest producer of copper, with 1934 production of 273,300 tons), cobalt, zinc and manganese; the non-metallic substances being coal, nitrate, borate, salt, sulphur (about 15,500 tons per year), and guano. Production of gold, principally from 'washings' is increasing; output in 1933 was 4 573,939 grammes; of silver (1932), 182,800 ounces. Iron-ore deposits are found in the provinces of Atacama and of Coquimbo, estimated at over 1,000,000,000 tons; output, 1933, 565,172 tons. Coal production in 1932, 1,085,005 tons. Reserves total 2,000,000,000 metric tons, partly low in thermal units.

Nitrate of soda, or 'salitre,' is Chile's most important article of export and usually a substantial source of governmental revenue. It is found in the section of the desert of Atacama known locally as the 'pampa salitrera,' a territory comprising an area of some 500 miles in length, lying between latitude 15° and 26° south, and situated at an elevation above sea level of from 2,000 to 6,000 feet. There are 152 nitrate works or oficinas with a productive capacity of 58,136,000 quintals; 16 were in operation in 1933–34, producing 538,520 tons; 1,064,170 tons were exported. About 90 per cent. of the world's supply of iodine is a by-product of the Chilean nitrate oficinas.

In 1930 census, 92,719 were returned as owners of manufacturing establishments, with 296,201 employees. Electric power is abundant.

Commerce.

Imports and exports (including re-exports and including bullion and specie). 1 peso = 6*d.* at par or 12.17 cents, U.S.:—

—	1929	1930	1931	1932	1933
	Pesos	Pesos	Pesos	Pesos	Pesos
Imports . .	1,617,563,791	1,460,124,721	705,902,012	213,785,818	181,815,170
Exports . .	2,293,726,135	1,328,122,967	824,738,960	290,493,965	343,770,769

The following table shows in pesos the principal imports and exports for recent years (1 peso = 6*d.*):—

Imports	1932	1933	Exports	1932	1933
	Pesos	Pesos		Pesos	Pesos
Coal and coke . .	332,365	261,503	Nitrate . .	44,051,373	84,754,612
Petroleum . . .	12,239,936	11,206,844	Iodine	13,057,392	2,229,115
Sugar	17,354,812	17,075,191	Wool	24,710,903	19,916,948
Paper	9,688,771	4,709,834	Copper, in bars.	120,022,100	126,572,782
Automobiles . . .	1,592,081	855,046	Iron ore . . .	3,876,531	5,708,673
Coffee, tea and maté	14,563,102	6,891,417	Meats (fresh and		
Textiles . . .	37,622,110	128,927,020	frozen) . . .	11,297,573	5,785,792

In 1933, the imports of gold and silver currency and bullion amounted to 38,191 pesos. Exports of currency and bullion in 1933 totalled 12,856,482 pesos.

Foreign trade of Chile in gold pesos equal to 6*d.* :—

	Imports from		Exports to	
	1932	1933	1932	1933 [1]
Great Britain	27,534,839	22,063,862	91,419,988	83,548,481
Germany	31,540,463	20,675,581	39,985,120	22,331,624
United States	49,413,405	40,748,727	76,809,942	68,611,262
France	10,055,884	11,307,954	13,486,353	6,936,535
Belgium	5,201,903	4,802,094	7,521.676	11,764,360

Holland	3,909,843	1,705,674	10,171,013	6,449,786
Japan	1,204,005	1,991,045	253,495	4,355,328
India	2,971,752	5,181,784	12,669	22,085

[1] Exclusive of much of the Chilean nitrates which are shipped largely subject to edirection as to destination.

The chief imports into, and domestic exports from, the United Kingdom (Board of Trade Returns) from and to Chile in two years, were as follows (but of the metal imports here given large quantities are really from Bolivia) :—

Imports	1932	1933	Exports	1932	1933
	£	£		£	£
Nitrates	66,633	6,275	Cottons	66,913	147,056
Frozen Mutton	563 597	505,102	Woollens	32,449	25,881
Copper	1,346,938	1,589,002	Iron and Steel	114,496	81,248
Tin ore	387,934	396,416	Cotton thread	61,056	120,093
Wool	769,949	627,441	Machinery	41,524	32,347
Barley	102,747	143,981	Rayon Goods	12,029	6,639

Total trade between Chile and United Kingdom for 5 years (Board of Trade figures) :—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Chile to U.K.	7,271,652	4,482,578	3,895,564	3,755,841	5,238,800
Exports to Chile from U.K	5,962,671	1,932,479	662,607	731,065	1,448,926
Re-exports to Chile from U.K.	321,409	216,132	106,261	25,687	43,189

Shipping and Navigation.

The commercial shipping of Chile consisted, on June 30, 1934, of 101 steamers, motor-driven vessels and sailing vessels of 157,048 tons gross. The shipping entered and cleared at the ports of Chile in foreign trade in 1933 was as follows: Entered, 1,611,152 tons ; cleared, 1,566,162 tons.

Communications.

In 1931, there were in Chile 25,106 miles of highways, of which 18,938 miles were earth roads, 4,960 miles of sand and clay or gravel, 866 miles of macadam and 340 miles of concrete or asphalt. About 18,530 are fit for motor traffic. There were (1932) 22,659 automobiles and 10,671 trucks and motor-buses. There are 851 miles of navigable river, and 497 miles of navigable lakes.

The length of State Railway lines amounted in 1931 to 3,574 miles; private railway lines, principally British-owned, to 1,928 miles. State Railway lines are:—Arica-La Paz Railway, (Chilean section) 128 miles; North Longitudinal Railway, 442 miles; Central North Line, 1,078 miles; Central South Line, 1,770 miles; and Puente Alto-Valcan Railway, 38 miles. The Chilean Transandine Line has (1934) been transferred to the State railway system. State-owned lines produced an operating profit in 1932 of 12,600,000 pesos. Electrification of the railways was commenced in 1921 on the line between Valparaiso and Santiago, a distance of 115 miles. Aviation is highly developed between interior points and abroad; a plant for the manufacture of airplanes was established in 1930.

The 890 post-offices and agencies dispatched in 1932, 77,348,628 postal pieces. The length of telegraph lines at the end of 1932 was 19,727 miles (10,555 miles Government and 9,172 miles private). In 1930, there were 430 Government offices, and 532 private offices. There were (1931) 305 telephone exchanges with 33,689 subscribers. The largest telephone company is the American-owned Chile Telephone Company which operates in Santiago, Valparaiso and other cities, with 249 exchanges and 30,967 subscribers.

A chain of wireless stations along the coast for shore-to-ship transmission is operated by the Navy; stations are at Arica, Antofagasta, Coquimbo, Valparaiso, Talcahuano, Valdivia, Puerto Montt, Magallanes (formerly known as Punta Arenas), and Quilicura (near Santiago). The first international radio station was opened at Quilicura in 1928. A wireless station is also being erected on the Juan Fernandez Islands, about 400 miles west and south of Valparaiso. There are 3 large broadcasting stations.

Banking and Credit.

In August, 1925, the Government established at Santiago the Central Bank of Chile, with (1933) 10,000,000 pesos paid up capital, which should have the right of issuing a new peso, value 6*d.*, to be the basis of a new national currency. The Central Bank commenced operations on January 11, 1926, and gold payments were re-established. On December 31, 1934, the Central Bank had paid-up capital and reserves of 202,566,019 pesos, cash 101,451,089 pesos and sight deposits, 416,410,035 pesos.

The paid-up capital and reserve funds of 12 leading Chilean and 7 foreign banks amounted on June 30, 1933, to 549,000,000 pesos; total loans and investments, 1,148,000,000 pesos. The Caja Nacional de Ahorros (founded in 1884) has a monopoly of savings accounts; on June 30, 1934, its 114 branches had savings deposits amounting to 601,411,497 pesos.

Money, Weights, and Measures.

The monetary unit is the gold *Peso*, containing 0·183057 gramme of fine gold, with, originally, a par value of 6*d.* sterling or 12.17 cents, U.S. £1 sterling therefore equalled at par, 40 gold pesos. Only gold coins of 20, 40 (called, officially, the 'libra Chilena' and equal to the £ sterling), 50 and 100 pesos are minted. But no gold circulates. The silver coinage is mainly one coin, the peso, with formerly a fine silver content of 2·4 grammes, but in 1934 pesos of nickel (25 per cent.) and copper (75 per cent.) replaced the silver pesos. In April, 1932, the convertibility of the currency was suspended, and the gold value of the peso was fixed, nominally, at 0·091529 grammes of fine gold, equal to 3*d.* gold; on December 31, 1934, it was further devalued to 1½*d.* gold, equal to 96 pesos to the paper pound. The exchange value of the peso is controlled by the Central Bank, which promotes barter when exchange is not available; in 1934 the rate on

London ranged from 115¼ to 127⅛ pesos to the £; in New York it ranged from 10·34 cents, U.S. to 9·44 cents. There are nickel coins of 1, 0·20, 0·10 and 0·05 peso. Actually the currency in circulation is chiefly paper issued by the Central Bank in lieu of gold, in denominations of 10,000, 5,000, 1,000, 500, 100, 50, 10, 5, and 1 pesos.

The metric system has been legally established in Chile since 1865, but the old Spanish weights and measures are still in use to some extent. Greenwich time has been adopted in place of Chilian time.

Diplomatic and Consular Representatives.

1. Of Chile in Great Britain.

Ambassador.—Señor Don Augusto Vicuña Subercaseaux. (Appointed December 4, 1934.)
Counsellor.—Luis Adolfo Renard.
Secretary.—C. Manuel Pereira.
Commercial Counsellor.—Julio Bittencourt.
Commercial Attaché.—Santiago Monk.
Consul-General in London.—Tomás de la Barra Fontecilla.

There are Consular representatives at Belfast, Cardiff, Dublin, Edinburgh Glasgow, Hull, Liverpool (C.G.), Nottingham, Queenstown, Sheffield, Southampton and many other places.

2. Of Great Britain in Chile.

Ambassador.—Sir Robert Michell, K.C.M.G. (Appointed December 18, 1933.)
First Secretary.—V. F. W. Cavendish-Bentinck.
Commercial Secretary.—A. J. Pack, O.B.E.
Naval Attaché.—Captain R. H. C. Hallifax, R.N.
Military Attaché.—Major R. H. Smith, O.B.E., R.A.S.C.
Air Attaché.—Wing Commander K. R. Park, M.C., D.F.C.
Consul-General at Valparaiso.—H. H. Cassells, M.V.O.

There are Consular representatives at Coquimbo, Antofagasta (C.), Arica (V.C.), Coronel (C.), Iquique (V.C.), Magallanes (C.), Santiago (V.C.), Talcahuano (V.C.), Tocopilla, and other centres.

CHINA.

(CHUNG-HUA MIN-KUO, *i.e.* REPUBLIC OF CHINA.)

Government.

ON February 12, 1912, China, one of the oldest of Monarchies, became a Republic.

The Chinese Imperial family was of Manchu origin, dating from 1644, and was styled *Ta Ch'ing Ch'ao* ('Great Pure Dynasty'). The last Emperor, P'u-yi, was the tenth of the line; but the official genealogy is carried back six generations earlier than the real founder, and P'u-yi's will be the sixteenth name in the canonised series of Ta Ch'ing Emperors. He was born on February 11, 1906, succeeded his uncle, the Emperor Kuang-Hsü, on November 14, 1908, and abdicated on February 12, 1912. On December 1, 1923, he was married. He retained the title of Emperor of the Manchu Imperial House up to November 5, 1924 (when it was abolished), together with other rights of preferential treatment secured under the Abdication Agreement, making P'u-yi an ordinary citizen of the republic. For account of the Revolution of 1911, *see* STATESMAN'S YEAR-BOOK for 1912, pp. 699-701, and for later developments, *see* STATESMAN'S YEAR-BOOK for 1919, pp. 740-41, and the STATESMAN'S YEAR-BOOK, 1928, p. 734.

The National Government at Nanking (March, 1935) is a Committee form of Government, appointed by, and responsible to, the Kuomintang, or National People's Party (of China), acting, during the period of Educative Government (or Political Tutelage), in theory at least, as trustees of the people. According to the 'Law Governing the Organisation of the National Government of the Republic of China,' commonly but inaccurately known as 'Organic Law of China,' which the Kuomintang promulgated on October 4, 1928, and vitally amended in December, 1931, the National Government is composed of the National Government Council, sometimes also known as State Council, which is now a more or less ornamental body, the Chairman of which is known as President of the National Government and occupies the position of Head of State without any political responsibility. The members of this Council are disqualified from holding any concurrent posts, and, in practice, are retired high officials or politicians in disfavour. From the more strictly political point of view, the National Government means the five *Yuan* (Councils) under the National Government Council—Executive, Legislative, Judicial, Examination, and Supervisory. The President of the National Government and the from 24 to 36 National Government Councillors, the President and Vice-President of each *Yuan*, are to be elected by the Central Executive Committee of the Kuomintang, either in Plenary Session assembled or, on its behalf, by its Standing Committee. The Executive, Legislative, Judicial, Examination, and Supervisory *Yuan* shall be responsible to the Central Executive Committee of the Kuomintang, constituted as the Central Political Council—the organ of the Kuomintang which forms the link between the Party and the Government. Decrees, decisions, and commands of military mobilisation shall be signed by the President of the National Government, and counter-signed by the President of the appropriate *Yuan*, and by the Minister of the appropriate Ministry. The Executive Council shall be the highest executive organ of the National Government. It shall establish Ministries to which will be entrusted various executive duties, and it may appoint commissions for specified executive matters. It may introduce in the Legislative Council Bills on matters within its competence. Budgets, amnesties, declarations of war, peace negotiations, conclusions of treaties, and other important international matters are to be submitted to the Legislative Council. The Executive Council or *Yuan* thus occupies a similar position as the Cabinet in Western countries, its Chairman being virtually a Prime Minister—the Head of the Government of the day.

The Legislative Council shall be the highest legislative organ. It shall have power to decide upon legislation, budgets, amnesties, declarations of war, negotiations for peace, the conclusion of treaties, and other important international matters. It shall have a President and Vice-President, and shall be composed of between 49 and 99 members to be appointed by the National Government at the instance of the President of the Legislative Council. The term of office shall be two years, and members shall not concurrently be non-political administrative officials of the various organs of the Central or local Governments.

The Judicial Council shall be the highest judicial organ, and shall take charge of judicial trial, judicial administration, disciplinary punishment of officials and trial of administrative cases. The granting of pardons, reprieves, and restitution of civil rights shall be submitted by the President of the Judicial Council to the National Government for approval and action.

The Examination Council shall be the highest examination organ, and shall take charge of examinations and determine qualifications for the public service. All public functionaries shall be appointed only after they have

passed an examination and their qualifications for the public service have been determined by the Examination Council.

The Supervisory Council shall be the highest supervisory organ, and shall, according to law, exercise the powers of impeachment and auditing. It shall have a President and Vice-President, and shall be composed of from 19 to 29 members who are to be appointed by the National Government at the instance of the President of the Control Council. The security of tenure of office by members shall be determined by law, and members shall not concurrently hold any office in any organs of Central or local Governments.

President of the National Government of China.—Mr. *Lin* Shen (February, 1932; re-elected January, 1934).

There is also a Cabinet of Ministers, appointed in January, 1932, as follows:—

President of the Administrative Council.—*Wang* Ching-wei.
Minister of Finance.—H. H. *Kung* (October 29, 1933).
Minister of Foreign Affairs.—*Wang* Ching-wei.
Minister for War.—General *Ho* Yin-chin.
Minister of the Navy.—Admiral *Chen* Shao-kuan.
Minister of Industry.—*Chen* Kung-po.
Minister of Education.—*Wang* Shih-chieh.
Minister of Railways.—*Ku* Meng-yu.
Minister of the Interior.—General *Huang* Shao-shan.
Minister of Communications.—*Chu* Chia-hua.
Minister of Justice.—Dr. *Lo* Wen-kan.

Local Government.

In July, 1928, six special municipalities were organized at Nanking, Shanghai, Tsingtao, Tientsin, Hankow and Canton, and several new ordinary municipalities were also established, but in May, 1930, the distinction between special and ordinary municipalities was revoked. There is still a difference between municipalities under the direct control of the Executive *Yuan* and those under provincial control. The Mayor of a city of the former type is appointed by the Government, while in the other case a Mayor is recommended by the Provincial authorities, for approval by the Central Government, or else is directly appointed by the local authorities. In municipalities under Executive *Yuan* control, the heads of the different bureaux are either directly appointed by Government or are recommended by the Mayor for subsequent approval by the Government. Bureau heads in municipalities under provincial control are either directly appointed by the provincial authority or are recommended by the Mayor for approval by the Provincial Government.

Area and Population.

According to statistics compiled by the Ministry of the Interior (1932), the total population of China is 474,787,386. The most recent estimate of the area of the country (including Manchuria) is 4,278,352 sq. miles.

The following table gives a statement of the area and population of the Chinese Republic according to the estimate of the Post Office in 1926:—

The 18 Provinces of China Proper	Area: English square miles	Population (Estimated)	Population per square mile	Capital
Chile	115,830	38,905,695	335	Peiping
Shantung	55,984	34,375,849	614	Tsi-nan
Shansi	81,853	12,153,127	149	T'ai-yuan
Honan	67,954	35,289,752	522	K'ai-fêng
Kiangsu	38,610	34,624,433	896	Chinkiang
Anhwei	54,826	20,198,840	368	Anking
Kiangsi	69,498	27,563,410	395	Nanch'ang
Chêkiang	36,680	24,139,766	657	Hangchow
Fukien	46,332	14,329,594	309	Foochow
Hupeh	71,428	28,616,576	400	Wuchang
Hunan	83,398	40,529,988	486	Ch'angsha
Shensi[4]	75,290	17,222,571	228	Sian
Kansu	125,483	7,422,818	59	Lanchow
Szechwan	218,533	52,063,606	238	Ch'êngtu
Kwangtung	100,000	36,773,502	368	Canton
Kwangsi	77,220	12,258,335	159	Kueliñ
Kweichow	67,182	11,291,261	168	Kuei-yang
Yünnan	146,714	11,020,591	75	Yünnan
New Dominion:—				
Sinkiang	550,340	2,688,305	—	Urumchi (Tihwafu)
Manchuria[3]	—	—	—	—
Liaoning	363,700	24,040,819	66	Shenyang
Kirin				Kirin
Heilungkiang				TsitsiharHeilung(Hsien)
Total	2,446,855	485,508,838		
Dependencies:—				
Mongolia	1,367,600	1,800,000	—	Urga[1]
Tibet	463,200	2,000,000	—	Lhasa[2]

[1] The seat of the Bogdo Khan.
[2] The seat of the Dalai Lama.
[3] The three eastern provinces.
[4] Population of Shensi in 1928: 11,665,191.

Estimates prepared by the Chinese Maritime Customs in 1929 gave the total of 438,933,873, inclusive of 19,290,000 for Manchuria. The figures for Mongolia and Tibet are rough estimates, and a certain amount of reserve should be maintained in regard to all these figures.

The Island of Formosa was ceded to Japan in accordance with the terms of the Treaty of Shimonoseki, ratified and exchanged at Chefoo on the 8th of May, 1895. The formal transfer of the Island was effected on June 2, 1895.

By agreement with the Chinese Government, dated March 27, 1898, Russia took possession of Port Arthur and Talienwan (called Dalny by Russia and Dairen by Japan) and their adjacent territories and waters, on lease for the term of 25 years, with option of extension by mutual agreement. In 1900, in consequence of the 'Boxer' uprising, Russia occupied Manchuria. Japan, after long and unsuccessful efforts to induce Russia to withdraw, broke off diplomatic relations, and on February 8, 1904, commenced hostilities. The war, in the course of which Japan proved victorious both on land and at sea, was brought to an end by the Treaty of Portsmouth, signed September 5, 1905. Under this Treaty Russia and Japan agreed to evacuate Manchuria, except the territory affected by the lease of Kwantung (or the Liao-tung Peninsula), where Japan succeeds to the leasehold and other rights of Russia. The exclusive administration of Manchuria (with the exception mentioned) was to be restored to China. By treaty of December 22, 1905, China agreed to the transfer to Japan from Russia of the lease of the Liao-tung Peninsula and the control

of the railway from Port Arthur to Ch'ang-chun (Kwan-ch'êngtzu), and conceded to Japan the right to construct a railway from Antung to Mukden, and agreed to open 16 Manchurian ports and cities to foreign commerce.

The Chinese Government granted to the French in April, 1898, a 99 years' lease of the Bay of Kwang-Chau-Wan, on the coast of the peninsula, between Hong Kong and the Island of Hainan, and in November, 1899, the possession of the two islands commanding the entrance of the bay. This territory has been placed under the authority of the Governor-General of French Indo-China.

In accordance with a Convention signed between the British Government and the National Government of China on April 18, 1930, the rendition of Wei-hai-Wei to China took place on October 1, 1930.

The Belgian concession at Tientsin was formally restored to China on January 15, 1931.

Peiping (formerly called Peking), the capital of China until 1928, has a population of 811,138 according to the 1926 census of the Municipal Bureau. According to the Census of the Metropolitan Police Administration, taken in 1927, the population of Peking and its suburbs is close on 1,297,718 (779,704 males and 518,014 females). The population of the treaty ports was given as follows for 1931 by the Chinese Maritime Customs: Aigun, 38,112; Harbin, 330,436; Hunchun, 39,000; Lungchingtsun, 4,059; Antung, 91,015; Dairen, 282,665; Newchwang, 106,040; Chinwangtao, 20,020; Tientsin, 1,387,462; Lungkow, 10,676; Chefoo, 131,659; Tsingtao, 390,337; Chungking, 635,000; Wanhsien, 210,837; Changsha, 606,972; Yochow, 4,800; Ichang, 107,940; Shasi, 113,526; Hankow, 777,993 (including Wuchang and Hanyang); Kiukiang, 80,166; Wuhu, 135,385; Nanking, 633,452; Chinkiang, 199,776; Shanghai (including neighbouring districts), 3,259,114 (the International Settlement at Shanghai has a total of 1,007,868 inhabitants, of which 971,397 are Chinese and 36,471 foreigners); Soochow, 260,000; Hangchow (municipal area), 506,930; Ningpo, 218,774; Wenchow, 631,276; Santuao, 9,000; Foochow, 322,725; Amoy, 234,159; Swatow, 178,636; Canton, 861,024; Kongmoon, 32,200; Samshui, 9,160; Kiungchow, 45,757; Pakhoi, 36,000; Wuchow, 90,000; Nanning, 68,110; Lungchow, 13,600; Mengtsz, 193,004; Szemao, 20,000; Tengyueh, 19,000. In addition, there are also a number of other places open to international trade; these are called commercial ports or marts, and were opened at the instance of the Chinese Government. Nanking is the present capital.

The total number of Chinese abroad was estimated in January, 1934, to be about 11,393,636 persons, including 3,400,000 in Formosa, 2,000,000 in Malay and Borneo, 1,233,855 in Dutch East Indies.

Until 1929 there were 23 Treaty Powers in China, as follows: Great Britain (1842), United States (1844), France (1844), Norway and Sweden (1847), Denmark (1863), Netherlands (1863), Spain (1864), Belgium (1865), Italy (1866), Peru (1874), Brazil (1881), Portugal (1887), Japan (1895), Mexico (1899), Chile (1915), Switzerland (1918), Bolivia (1919), Persia (1920), Germany (1921), Soviet Russia (1924), Austria (1926), and Finland (1927). Of these powers, Germany, Bolivia, Persia, Chile, Austria, Mexico, Soviet Russia, and Finland have renounced the privilege of consular jurisdiction. Fixed Customs Tariff Conventions were definitely renounced by all powers except Japan in 1928. Italy, Belgium, Denmark, Spain and Portugal signed treaties with China in 1928 and on certain conditions agreed to submit to Chinese jurisdiction after January 1, 1929.

During 1928 the National Government announced that treaties that had lapsed, or were about to lapse, would be abrogated and new treaties negotiated on a basis of 'equality.' Treaties of a commercial character have been made with the principal nations. As from January 1, 1930, the Chinese

Government declared the withdrawal of extra-territorial privileges from foreigners in China. In an Aide Mémoire from the British Government on December 20, 1929, however, it was stated that 'His Majesty's Government are willing to agree that January 1, 1930, should be treated as the date from which the process of the gradual abolition of extra-territoriality should be regarded as having commenced in principle.' This date was later extended to January 1, 1932, but at the end of December, 1931, the Chinese Government announced that the proposal to abandon extra-territorial rights on January 1, 1932, had been postponed.

Religion.

Three religions are acknowledged by the Chinese as indigenous and adopted, viz. Confucianism, Buddhism, and Taoism.

With the exception of the practice of ancestral worship, which is everywhere observed throughout the Republic, and was fully commended by Confucius, Confucianism has little outward ceremonial.

Buddhism and Taoism present a very gorgeous and elaborate ritual in China, Taoism—originally a pure philosophy—having abjectly copied Buddhist ceremonial on the arrival of Buddhism 1,800 years ago. Most Chinese (not Mohammedans or Christians) profess and practise all three religions. The bulk of the people, however, are Buddhist.

Mohammedans are found in every province of China, being most numerous in Kansu, Sinkiang, Shansi, Shensi, Chihli, and Yunnan. There are 30,000 in Peking, with 30 mosques. Estimates for all China vary widely, from 3,000,000 to 80,000,000; 20,000,000, however, is generally favoured.

Roman Catholicism has had a footing in China for more than three centuries. In 1929 it had 76 bishoprics and 3,616 foreign missionaries, and counted 2,486,841 native Christians. Protestant Missions date from 1807. In 1922, native Christians numbered 806,926 (366,524 communicants). Attached to Protestant Missions in 1920 were 27 colleges of university standing, 256 middle schools, and 581 higher elementary schools. Under Christian instruction were 189,794 pupils. The Russian Orthodox Mission dates from 1685. In 1923, the Church counted 5,000 baptised Chinese adherents.

Most of the aboriginal hill-tribes are still nature-worshippers, and ethnically are distinct from the prevailing Mongoloid population. There is also a colony of Chinese Jews in K'aifêng, capital of Honan.

Education

Primary education is the function of provincial and district authorities. There are two kinds of primary schools, the higher lasting two years, and the lower four years. The period of compulsory education is six years, from the age of 6 to 12. But provinces in the country differ widely in carrying out compulsory education. Shansi ranks first, where nearly 80 per cent. of children of school age attend school. The cities of Shanghai and Weihaiwei rank next with 60 per cent.; the rest of the country from 30 to 40 per cent. The figures for primary education in China available for 1930–1931 are 250,840 primary schools, with 10,948,979 scholars and an expenditure of 89,416,977 Mexican dollars.

Secondary education comprises the middle school, of two grades, the junior middle school and the senior middle school, each of three years; the normal school and the vocational school. Present laws governing these date from 1932. Figures available for 1930–1931 are respectively 1,320 junior middle schools with 217,867 pupils; 554 senior middle schools with 179,081

pupils; 846 normal schools with 82,809 students; 272 vocational schools with 34,852 pupils; making a total of 2,992 schools with 514,609 pupils in all. Secondary education is a function of the provincial governments, under the supervision of the Ministry of Education. The provincial authorities are required to apportion their educational budgets so that not less than 35 per cent. will be devoted to vocational schools, 25 per cent. to normal schools, and 40 per cent. to middle schools. The total expenditure for 1930–1931 is, in round numbers, 48,000,000 Mexican dollars.

The present law governing higher education in China dates from 1929, under which a university must contain at least three colleges, one of which must be of science, natural or applied. Other institutions of higher education are the colleges and the technical schools. In 1934 the total number of institutions of higher education in China was 110, of which 41 were universities, 38 colleges and 31 technical schools; 28 of them are supported by the National Government, 31 by provincial governments, and 51 by private funds. North China contains 35 of these institutions, including The National Peking University, the National Peiping University, the National Tsing Hwa University, the National Normal University, Yenching University which is carried on by missionaries, and the Union Medical College, at Peiping; Nankai University at Tientsin. South China contains 10, including National Chung San University and Lingnan University at Canton. East China has 43, including the National Central University, Nanking University, Ginling Girls' College, at Nanking; Chiaotung University, Tungtsi University, Tsinan University, Shanghai University, Futan University at Shanghai; Chekiang University at Hangchow; Central China has 15, including National Wu-Han University, the Hwa Chung University at Wuchang; the Provincial University of Hunan at Changsha; the Provincial University of Honan at Kaifeng. West China contains 7, including National University of Szechuan at Chengtu. The total number of students for the whole country in 1934 was 44,000 (5,200 women).

There are many institutes of research in the country. Notable among them may be mentioned Academia Sinica, with headquarters at Nanking, carrying out original research in physics, chemistry, psychology, geology, botany and zoology, history and philology, technology, and the social sciences. There are also the National Academy of Peiping at Peiping, and the Geological Research Institute at Peiping.

The figures of Chinese students studying abroad in 1933 were as follows: England 75, France 45, Germany 68, Japan 219, America 186, other countries 28, totalling 621.

Justice.

A provisional Criminal Code was drawn up in the closing year of the Tsing dynasty, and proclaimed on March 10, 1912, the first year of the Republic. The code was framed after the Continental system, and adopts the most modern legislation in regard to conditional release and postponement of punishments. There are special provisions for the treatment of youthful offenders and insane persons. As regards the power of inflicting penalties, the arbitrary use of power by the court is guarded against by fixing a maximum and minimum sentence for each case. A second draft of this code was completed in 1919. Texts in both English and French have also been published. Altogether, three codes have been drawn up and revised —the Code of Civil Procedure, the Commercial Code, and the Code of Criminal Procedure. The work of drawing up and revising the new Codes is undertaken by the Law Codification and Compilation Commission, which is also engaged in the drafting of commercial laws.

The Judicial Yuan, the highest judicial authority of the land, was established on November 16, 1928. This Yuan is composed of the Supreme Court, the Administrative Court, the Commission of the Disciplinary Punishment of Officials, and the Ministry of Justice. The last mentioned has charge over all matters relating to the administration of justice. It has established over 50 new courts throughout the country, carried out vast improvement of prisons, and drafted many codes and laws.

There are at present 308 courts and procuratorates, with the Supreme Court and the Procuratorate-General at the head of all. The modern courts consist of (1) District Courts, (2) High Courts, and (3) the Supreme Court. The Supreme Court of China may be likened to the House of Lords or the Judicial Committee of the Privy Council of Great Britain. As its name implies, it is the highest tribunal in the land. It was reorganised in 1912 into two divisions—Criminal and Civil—since increased to seven, four Civil divisions and three Criminal divisions. In each division there is a presiding Judge with four other judges. The cases handled by the Supreme Court in 1926 were: Civil, 5,430; Criminal, 1,953.

Great Britain and the United States have special courts in China, the one, His Majesty's Supreme Court for China at Shanghai (established 1865), and the other, the United States Court for China (established 1906).

Finance.

Receipts and disbursements (ordinary revenue and expenditure) of the National Government, for 4 years, from July 1 to June 30 are shown as follows:—

	1930–31	1931–32 [1]	1932–33 [1]	1934–35 [1]
	Dollars	Dollars	Dollars	Dollars
Revenue	560,926,199	708,352,865	686,545,738	773,470,091
Expenditure	714,468,144	868,919,492	736,325,552	751,687,124

[1] Estimates.

Estimated revenue and expenditure for 1934–35:—

Revenue	Dollars	Expenditure	Dollars
A. Ordinary:		A. Ordinary:	
Salt Gabelle	190,353,851	Party	5,660,700
Customs	366,413,791	National Government	12,295,580
Tobacco and Wine Tax	23,104,873	Military	293,014,600

Grand Total of Estimated Revenue	918,111,034	Grand Total of Estimated Expenditure	918,111,034

Likin (local customs dues on internal transit) was abolished on January 1, 1931.

The collection of the revenue on the Chinese foreign trade and the administration of the lights on the coast of China are under the management of the Chinese Maritime Customs, an institution in the organisation of which Sir Robert Hart played an important part, which has a large staff of foreign and Chinese subordinates. By agreement, dated February 13, 1898, China undertook that the post of Inspector-General should be held by a British subject so long as British Foreign Trade predominated in China.

According to the revised regulations for the Chief Inspectorate of Salt Revenue authorized by the National Government and promulgated by the Ministry of Finance in January 1929, a Chief Inspectorate of Salt Revenue under a Chinese Chief Inspector and a foriegn Associate Chief Inspector was established by the Ministry of Finance, who are, under the direct control of the Minister, to take charge of the collections of salt revenue, the issue of salt-release permits, the compilation of reports and returns of salt revenue, and the repayment of foreign loans secured on salt revenue.

By exchange of Notes effected on September 19 and September 22, 1930, it was agreed that Great Britain should return her share of the Boxer Indemnity as from December 1, 1922, to the control of the Chinese Government which would apply the bulk of the funds thus remitted to the creation of an endowment to be devoted to the rehabilitation and building of railroads in China and to educational purposes. The funds to which the agreement refers amounted, in April 1931, when the Board of Trustees for the administration of these funds was first instituted, to 3,442,731*l.*, while the future instalments payable by the Chinese Government from April 1931, to December 1946, when all payments are due to cease (originally payments are due to cease in December 1945, but now changed to 1946, due to a year of postponement of payments from 1932–1933) will amount to 7,709,388*l.*

The customs receipts for 4 years were (in Haikwan taels):—

Year	Foreign Trade	Home Trade	Total	Equivalent in Standard Dollars
	Taels	Taels	Taels	Dollars
1931	230,205,063	16,908,334	247,113,397	385,002,672
1932	184,310,890	15,930,580	200,241,470	311,976,210
1933	—	—	—	339,524,490
1934	—	—	—	334,600,000

The public debt on January 1, 1931, amounted to the equivalent of about 152,900,000*l.*, and the internal loans on June 1, 1931, to 741,640,699 dollars, of which 191,558,860 were Peking issues and 550,081,839 were Nanking issues. Of the former, arrears of capital and interest to January 1, 1931, amounted to some 19,989,000*l.*; and of the internal loans, 488,413,139 dollars were secured on customs revenue.

Defence.

Army.

The organisation of the national army is based on a system of compulsory citizen service. Service is normally voluntary for three years with the active army and six years in the reserve. Recruits must be between the ages of 20 and 25. In 1929 the National Government produced a paper organisation of the national army in 114 infantry divisions, 8 cavalry divisions, 13 artillery regiments and 15 engineer battalions. This is being reduced to 90 infantry divisions of approximately 8,000 each, 15 N.O. brigades, 18 brigades, 8 independent artillery regiments, 9 railway artillery corps, 2 regiments of railway transport troops, 7 air force squadrons and a cavalry of 23,500 men. These are all under the direct control of the National Government. The strength is 1,869,460.

Navy.

The weakening of the central power had seriously affected the efficiency of the Navy, but this has been restored to some extent since the Nanking Government was established. In July, 1929, the Government requested the services of a British Naval Mission to reorganise the training of the Fleet; the services of a naval officer have since been lent. A number of Chinese junior naval officers are under training in the British Navy.

The largest vessel is the cruiser *Hai Chi*, of 4,300 tons displacement and 24 knots, carrying a main armament of 2 8-in. guns, 10 4·7-in. guns and 5 above-water torpedo tubes. The *Ying Swei* and the *Chao Ho* were built in England (1911), mainly for training purposes, each having a displacement of about 2,600 tons and a contract speed of 20 knots. The main armaments consist of 2 6-in. and 4 4-in. guns. There are also three 3,000-ton cruisers, *Hai Yung*, *Hai Chou*, and *Hai Shen*, built 1897-98, of 19·5 knots speed, armed with 3 6-in. and 8 4·1-in. guns; the *Ning Hai* and *Ping Hai*, built 1931-32 of 2,500 tons, armed with 6 5·5-in and 6 3-in. guns; and the *Yat Sen*, built 1930, of 1,650 tons, armed with 1 6-in., 1 5·5-in., and 4 3-in. guns. In addition there are 20 steel gunboats of over 400 tons, 23 smaller river gunboats and patrol vessels, 3 destroyers, 8 torpedo-boats, and various other vessels, many of which, as the result of neglect, are believed to be without fighting value.

There are no naval bases of any importance. Existing dockyards are: Foochow, Taku, Kiangnan (Shanghai), and Amoy (Fukien).

Production and Industry.

Agriculture.—China is essentially an agricultural country, and the land is mostly freehold held by families on the payment of an annual tax. Total arable land in China is estimated at about 192,060 square miles. The holdings are in general small; irrigation is common. Chinese agriculture is intensive rather than extensive. Rotation of crops is practised. Horticulture is a favourite pursuit, and fruit trees are grown in great variety. Indeed the Chinese are gardeners rather than farmers. Vegetable culture has reached a high state of perfection. Wheat, barley, maize, and millet and other cereals, with peas and beans, are chiefly

cultivated in the north, rice, sugar, and indigo in the south. In 1932, the estimated cultivated area under wheat was given as 57,049,000 acres, and the yield 487,877,000 *piculs*; that under rice was 53,427,000 acres yield 983,157,000 *piculs*. Treaties forbid the export of grain with the exception of wheat, soya beans, kaoliang, indian corn, buck-wheat, and barley from Manchuria. An embargo may be applied in case of a famine in China. China's fibre crops are also important: chief are abutilon, hemp, jute, ramie and flax.

Cotton is grown widely even as far north as the southern and central part of Chihli, the chief area of production being the Yangtse valley. In 1934 the area under cotton in the 12 principal cotton producing provinces (Liaoning, Hopei, Shangtung, Shansi, Honan, Shensi, Kiangsu, Chekiang, Anhwei, Kiangsi, Hupeh, and Hunan) was estimated at 44,807,579 *mow* or 7,467,929 acres, and the yield 1,172,553 *piculs* of ginned cotton. The final estimate for 1933 is 40,454,023 *mow* (6,742,337 acres) and 9,774,207 *piculs*. Tea is cultivated exclusively in the west and south; silk culture is one of the most successful industries of China; about 25 per cent. of the world's supply of raw silk is from China. The production of silk cocoons is estimated at 3,300,000 *piculs*, of which about 40 per cent. is produced in the central provinces of Kiangsu, Chekiang and Anhwei.

Pigs are raised everywhere in China, and pigs' bristles have become an important article of export. The annual output is over 100,000 *piculs*, valued at about 10,000,000 Hk. Tls.; about two-thirds are exported. In Mongolia, camels are raised solely for the hair they produce. The Ministry of Industry estimates that in 1933 the total number of cows and buffaloes in the country was 22,246,555; goats and sheep, 19,418,241; pigs, 94,343,894; horses, 6,089,463; donkeys and mules, 7,889,487; chickens, 338,672,158; ducks and geese, 70,122,199.

Manufacture.—An important feature in the development of Chinese industries is the erection of cotton and wool mills, and of silk filatures in Shanghai, Canton and elsewhere, while native looms are found in most dwellings. The production of cotton yarn in China during the year ended December 31, 1932, totalled 8,069,000 *piculs*, of which 5,389,000 *piculs* were produced in Chinese, and about 2,680,000 *piculs* in foreign-owned mills. The production of cotton piece goods for the year amounted to 20,233,710 *piculs*, of which 10,190,970 *piculs* were manufactured in Japanese, 8,242,740 in Chinese, and 1,800,000 bales in British mills. In 1933, 133 cotton mills in China had 5,019,917 spindles and 39,564 looms distributed as follows: 41 Japanese-owned mills (2,063,448 spindles and 17,592 looms); 89 Chinese-owned (2,773,273 spindles and 19,081 looms); 3 British-owned (183,196 spindles and 2,891 looms). At the large centres flour and rice mills are beginning to supersede native methods of treating wheat and rice. The flour milling industry has been suffering from serious depression. In 1934 there were 91 mills in China distributed as follows:—Kiangsu, 36; Chekiang, 4; Anhui, 4; Hupeh, 7; Hunan, 1; Honan, 7; Shantung, 17; Hopei, 11; Shansi, 4. Their total annual capacity is put at 102,470,100 bags. Manchuria possesses about 50 flour mills. At Hanyang, near Hankow, are large Chinese iron-works, supplied with ore from mines at Tayeh, about 60 miles distant. There are also 400 glass factories. Electrical enterprises are making good progress. There are 518 establishments, 497 being Chinese-owned, with a capital of 111,665,470 dollars, producing capacity being 271,000,000 watt. Waterworks have been established in most of the big cities. Tanning industry has 104 factories principally found in Kiangsu, next in Hopei and Shantung. Cement works number 11, having an annual product of 7,000,000 barrels. Match manufacturing centered in Kwantung —with 37 establishments; 27 in Shantung and 26 in Kiangsu respectively.

Mining.—Most of the 18 provinces and the 3 provinces of Manchuria contain coal, and China may be regarded as one of the first coal countries of the world. The coal-fields, authorised by the Ministry of Industries in 1933, cover an area of 133,513 acres and the average annual coal output is estimated at 27,244,674 metric tons, of which 9 to 10 million metric tons are from native coal mines, over 7½ million metric tons from semi-modern mines, and 11,196,100 metric tons from the Fushun and Kailan coal mines. The coal resources of China have been estimated at 248,287,000,000 metric tons. Iron ores are abundant in the anthracite field of Shansi, where the iron industry is the oldest in the world, in Hopei, in Shantung and other provinces, and iron (found in conjunction with coal) is worked in Manchuria. Three hundred million tons of ore are estimated to be in Shansi; the principal iron ore reserves total about 1,000,194,000 tons. The Tayeh iron deposits, near Hankow, are among the richest in the world. They have an ore reserve of 17,000,000 tons. On the Upper Yangtse and in Shensi Province petroleum is being worked; there are 91 wells in the country. Oil is also being extracted from shale beds in South Manchuria and Shensi Province, the total product being 458,456 barrels. Tin ore is plentiful in Yunnan where the tin-mining industry has long existed. Tin is the most important mineral export; about 8,639 tons are produced annually. It is mined extensively in Yunnan, and through Mengtsz it reaches Hong Kong, whence it is shipped to foreign countries. In antimony China occupies a unique position; since 1908 the country has produced more than 60 per cent. of the world's total production. More than 90 per cent. comes from Hunan; the output in 1933 was 11,755 tons. Mining for wolfram is being carried on at Swatow, and in the Kiangsi and Hunan Provinces; molybdenum ore has been found at Yungtaih-sien, in Fukien, and Kiangsi; bismuth has also been worked. The total output of salt in 1933 was 2,492,866 short tons.

Commerce.

Foreign trade of China (exclusive of bullion), in standard dollars:—

—	1930	1931	1932	1933[1]	1934[1]
	Dollars	Dollars	Dollars	Dollars	Dollars
Net Imports . .	2,041,000,000	2,234,000,000	1,632,000,000	1,345,567,188	1,029,665,224
Net Exports . .	1,394,000,000	1,416,000,000	768,000,000	611,827,990	535,214,279

[1] Excluding Manchuria.

Trade by principal countries in 1933 and 1934 in thousands of standard dollars.

—	Imports		Exports	
	1933	1934	1933	1934
	1,000 Standard dollars	1,000 Standard dollars	1,000 Standard dollars	1,000 Standard dollars

			Paper	6,115,232	5,118,681

Of the tea in 1933, 40,229 piculs were exported to Hong Kong, 58,946 to Great Britain, 18,098 to France, 63,516 to the United States, and 212,715 to Russia. The total export of tea to foreign countries has been as follows (in lbs.):—1895, 248,757,333; 1905, 182,573,064; 1915, 237,647,066; 1931, 93,760,800; 1932, 86,140,800; 1933, 92,500,933.

Total export of raw silk for past five years: 1928, 176,039 piculs; 1929, 180,034 piculs; 1931, 133,047 piculs; 1932, 76,670 piculs; 1933, 77,075 piculs.

The following figures give the import and export of gold and silver through the Maritime Customs :—

Year	Gold		Silver	
	Imports	Exports	Imports	Exports
	Go'd units	Gold units	Standard dollars	Standard dollars
1933	137,335	35,673,746	80,134 677	94,288,936
1934	5,856	26.222,399	7,414,009	267,355,423

In addition to her overseas trade China has an extensive coast and river trade, in which under 'Inland Waters Steam Navigation Regulations,' steamers under foreign flags are allowed to participate. At the end of 1931, 3,430 vessels were on the register, of which 519 were foreign, and 2,911 Chinese; at the end of 1930, the figures were 544 and 2,676 respectively.

In recent years the quantities and value of the imports of tea into the United Kingdom from China, including Hong Kong, Macao, and Weihaiwei were (according to the Board of Trade returns) :—

Year	Quantities	Value	Year	Quantities	Value
	lbs.	£		lbs.	£
1928	6,580,893	525,719	1931	8,616,116	640,806
1929	9,209,619	629,931	1932	4,850,151	341,033
1930	8,740,961	529,479	1933	8,028,709	443,120

Other important articles of trade between Great Britain and China according to the Board of Trade returns) in two years were :—

Imports into U.K.	1932	1933	Exports from U.K.	1932	1933
	£	£		£	£
Raw and waste silk .	115,474	122,512	Cottons . . .	2,639,200	1,201,467

Internal Communications.

China is traversed in all directions by numerous roads, and, though few are paved or metalled, and most are badly kept, a vast internal trade is carried on partly over them, but chiefly by means of numerous canals and navigable rivers. At the end of 1932 there were 1,801,434 miles of roads in China, and 2,040,347 miles under construction.

Chinese railway history began in 1876 when the Woosung line, built by foreign enterprise, was opened. At the end of 1930, there were 6,614 miles of railway in China (excluding 2,166 miles in Manchuria), of which about 1,300 miles have been constructed by British enterprise and British capital.

The principal railways in China are :—(1) South Manchuria Railway, from Changchun to Dairen, 696 miles [*see* also under Manchuria] ; (2) Peiping-Mukden line, 832 miles, including 305 miles of branch line ; (3) Peiping-Suiyuan Railway, 540 miles ; (4) Peiping-Hankow Railway, 814 miles ; (5) Lung Hai Railway, 557 miles ; (6) Shanghai-Nanking Rail-

way, 203 miles; (7) Tientsin-Pukow Railway, 686 miles; (8) Shanghai-Hangchow-Ningpo Railway, 179 miles; (9) Hupeh-Hunan Railway, 315 miles; (10) Kiaochou-Tsinan Railway, 285 miles; (11) Yunnan Railway, from the Tonkin border to Yunnanfu, 288 miles; and (12) the Chinese Eastern Railway running eastward from Manchuli through Northern Manchuria to Suifeñho (Russian name, Pogranichnaya), the last station in Chinese territory, where it joins the Ussuri Railway, and then runs due east to Vladivostok, and southerly from Harbin to Changchun, joining the South Manchuria Railway. This line was built by the Russians, and under agreements dated August 2, 1896, and March 6, 1898, is operated by Russians and Chinese. It runs for 1,470 miles in Chinese territory. The gauge is the Russian standard of 5 feet, whilst that of all the other railways is 4 feet 8½ inches, with the exception of the Yunnan Railway, which has a gauge of 1 metre. The total revenue of the Government railways in 1932 amounted to 137,400,147 dollars, and total expenditure 150,584,756 dollars.

China has a fairly well developed telegraph service. Telegraphs connect all the principal cities in the country, and there are lines to all the neighbouring countries. The telegraph lines in 1933 had a length of 63,678 miles. Number of inland telegrams in 1932 was 3,076,616, including 29,042 relayed by the Post-office. Wireless Telegraph Stations have been installed at many centres.

Telephones are in use in the main cities of China, and long distance telephone communication has been introduced along the railways and in the trade areas. Wireless telephone services have also been established.

The postal work of China, formerly carried on by the Government Courier service and the native posting agencies, was gradually taken in hand by the Chinese Imperial Post Office, begun in 1897 under the management of the Maritime Customs. By Edict of November 6, 1906, the control of the Postal Service was transferred to the Ministry of Communications, and the transfer was actually effected in July, 1911. The Postal Service with Tibet has been temporarily suspended. In the fiscal year 1932–33 there were 12,828 post offices open, and the number of letters posted was 439,129,800; of postcards, 39,069,500; of newspapers, 59,593,700; of printed matter, 72,557,100; of commercial papers, 3,046,000; of samples of merchandise, 1,183,500; of trade circulars, 3,333,100; grand total (including all others), 738,978,500. The number of parcels posted in 1932–33 was 5,930,100. The revenue of the post office in 1932–33 was 33,373,684 dollars, and the expenditure 37,559,157 dollars. On June 30, 1933, the postal staff numbered 42 foreigners and 36,101 Chinese. The value of the international money orders issued in 1932–33 was 1,431,660 dollars, and of those cashed, 1,979,886 dollars. Domestic money orders issued in 1932–33 amounted to 164,849,000 dollars, and those cashed to 165,278,400 dollars. The administration is now completely under Government control. China in 1914 joined the Postal Union.

Since the opening of the Kaolan (Lanchow)–Tihwa section of the Shanghai–Sinkiang line during the fiscal year 1932–33, with Kiuchüan and Hami as two additional ports of call, the total lengths of lines operated by the Eurasia Aviation corporation increased to 4,242 kilometres (2,634 miles). The Shanghai–Peiping line with Tunghai, Ku., Tsingtao, and Tientsin as ports of call was inaugurated, and with the opening of the Pahsien (Chungking)–Chengtu section of the Shanghai–Chengtu line, the total length of lines operated by the China National Aviation Corporation reaches 3,397 kilometres (2,109 miles). The total length of the air-mail lines at the close of the fiscal year is 7,639 kilometres (4,744 miles), showing an increase of 3,279 kilometres (2,036 miles), due to the extension of the Shanghai–

Pahsien (Chungking) line to Chengtu, Shanghai–Kaolan (Lanchow) to Tihwa, and the inauguration of the Shanghai–Peiping route. Closed air-mails for Königsberg, Berlin, and all countries in Western Europe, were forwarded by the U.S.S.R. air-mail service from May 15, 1932, and were suspended from July 23, 1932, when the postal services in the three Eastern Provinces were withdrawn. Saigon–Marseilles air-mail line has been utilised to forward air-mails for Southern Asia and all places in Europe. The number of the articles of mail matter and parcels posted for air transmission during the fiscal year 1932–33 were as follows: letters and postcards, 3,576,300; newspapers, 8,400; other articles, 8,800; parcels, 1,390; total weight, 46,336 kilogrammes.

Banking and Credit.

Banking on modern lines dates from the end of the Ching Dynasty, when the people began to realise its importance in the development of industry. In 1897 Shen Hsuan-Hwei first organised the Commercial Bank of China in Shanghai. This was followed by the establishment of the Board of Finance Bank in 1904, with a capital of 4,000,000 Kuping taels. It was authorised to issue convertible notes. The name was changed to the Ta Ching Bank in 1908, the capital being increased to 10,000,000 taels. In 1907 the Board of Posts obtained imperial sanction to establish the Bank of Communications to handle funds for the posts, railways, steamships, and telegraphs. Other commercial banks organised about the same time were the National Commercial Bank (1906), the Ningpo Commercial Bank (1908), and the Commercial Guarantee Bank of Chihli (1910). The Government promulgated the Banking Ordinance in 1908.

Since the foundation of the Republic, many banks have come into existence. The Central Bank of China was opened on November 1, 1928, with a capital of 20,000,000 dollars supplied by the Ministry of Finance. It has the right to issue bank notes, to mint and issue coins, to serve as the National Treasury, and to direct the flotation of national loans and treasury notes. Numerous branches have been established at different ports and cities. In 1934 its capital was increased to 100,000,000 dollars.

After the Revolution the Ta Ching Bank was re-organised as the Bank of China. In 1928 the Bank of China Regulations further made it an international exchange bank. Its capital was 25,000,000 dollars, the Government subscribing 5,000,000 dollars. It has 157 branches in the country and abroad. In that same year the Revised Regulations made it the function of the Bank of Communications to develop the industries of the country. It was capitalised at 10,000,000 dollars, the Government providing 2,000,000 dollars. It has 71 branches.

Commercial banks have increased; up to June, 1934, there were 120 banks registered with the Ministry of Finance. The Banking Law was promulgated in 1931.

Savings banks originated with the Savings Department of the Ta Ching Bank organised in 1908, in which year the first Savings Banks Ordinance was proclaimed. In 1914 the Bank of China and the Bank of Communications established the Hsin–Hua Savings Bank. The Yien Yieh Commercial Bank, the Kincheng Banking Corporation, the Continental Bank, and the China and South Sea Bank organised the Joint Savings Society in 1923. Many commercial banks operate savings departments, with separate capitals and independent managements.

In 1934 the Government promulgated the Savings Banks Law, fixing the

method of investment and requiring the deposit with the Central Bank one-fourth of the total savings of each bank in the form of government bonds and other securities.

In the reign of Hsuan-Tung, the Board of Finance established Official Money Firms in and out of Peking to issue silver and copper notes. They were, however, not banks. After the Revolution the several provinces changed them into provincial banks; the Central Government now exercises a control over them.

Trust companies were first opened in 1921, among which the Central Trust Co. and Tung-Yi Trust were most prominent.

Sino-foreign banking institutions began with the establishment of the Russo-Asiatic Bank in 1896, the Chinese Government subscribing 5,000,000 Kuping taels. In 1926 it was closed and liquidated. The Sino-French Bank was established in 1912. The capital was fixed at 250,000,000 francs, the Chinese Government subscribing 50,000,000 francs. It was closed in 1921 and re-organised in 1923 as la Banque Franco-Chinoise pour le Commerce et l'Industrie. The Exchange Bank of China was established in 1918 with Chinese and Japanese capital. In 1919 the Chinese-American Bank of Commerce was organised with Chinese and American capital. But it was liquidated in 1929.

Post Office savings banks at 11 district head offices were opened on July 1, 1919. By June 30, 1933, there were 586 establishments with savings facilities, with 151,565 depositors, and total deposits amounting to 25,397,058 dollars.

Money, Weights, and Measures.

Money.

The currency of China is on a silver basis, and consists of taels, dollars, copper cash, and bank notes. The *tael* is really a weight of silver (about an ounce) of a certain degree of fineness. Theoretically it is divided into 10 *mace*; 1 *mace* = 10 *candareens*. The denominations of the dollar are: 1 dollar = 100 coppers; 1 copper = 10 cash. The *tael* varies in different parts of the country, the principal taels being (1) the *haikwan* or customs *tael*, weighing 583·3 grains (for average sterling equivalent during recent years, see above under Commerce, p. 755), (2) the *K'up'ing tael*, weighing 575·8 grains, (3) the *Tsaoping tael*, weighing 565·65 grains. These are all called treasury taels. The principal local taels are: (1) Peking or *Kungfah* tael; (2) Tientsin or *Hang P'ing Hwa Pao* tael; (3) Canton tael; (4) Newchwang tael (nominal); (5) Shanghai tael. Different taels, about 170 altogether, are in use in every province in the country.

There is unparalleled currency confusion. Although a dollar should be equal to 100 coppers, in fact it is worth almost 350 coppers in some parts of the country, varying from day to day. In the treaty of September 5, 1902, China agreed with Great Britain to take the necessary steps to provide a uniform national coinage which should be legal tender for all purposes throughout the Empire, and an Imperial Decree was issued in October, 1908, commanding the introduction of a uniform tael currency, of which the unit must be a silver tael coin of ·98 touch weighing 1 K'up'ing or Treasury-scale tael or ounce. This decree was cancelled by a further decree of May 25, 1910, establishing the silver dollar (yuan) of ·90 touch and weighing ·72 Treasury-weight tael as the unit of currency. The touch and weight of the silver subsidiary coins (50*c.*, 25*c.*, 20*c.*, and 10*c.*) were also definitely specified, while provision was made for further subsidiary coins (5*c.* nickel, 2*c.*, 1*c.*, ½*c.*, and $\frac{1}{10}$*c.* copper) of touch and weight to be laid down later. The

minting of these silver coins has begun, but as they are at a discount in every province other than the one in which they are minted, confusion has been rendered more confounded. There are ten different varieties of dollars in circulation.

As from April 6, 1933, the tael was officially abolished as the commercial unit of exchange, and the silver dollar became the official currency, the rate of exchange being fixed at 1 dollar = 0·715 tael. The new dollar is 800/1000 fine, has a gross weight of 26·971 grammes, and a fine silver content of 23·493448 grammes. It will be minted at the new Central Mint established in Shanghai by the National Government.

In China, standards of weights, measures and length vary all over the country. Generally speaking, two kinds of standards are now in use, namely, the old and the new. The old standard was formulated from the Weights and Measures Law promulgated in 1914, establishing a double system, the standard metric unit and that based on *ying tsao ch'ih*, or 'builder's foot' for length and Kuping tael or *liang* for weight. The law governing the new standard was promulgated by the National Government on February 6, 1929, and it is intended to be the legal standard of weights and measures throughout China. For convenience' sake and customary usage it also established a double system; one is the standard metric unit, which came into operation in the Custom's service on February 1, 1934, and the other, which is temporary in nature and to be abolished as soon as the people are accustomed to the use of standard units, is designed only for market use. The latter is derived from the former by taking one litre of Kung Sheng as one Shih Sheng, which is nearest to the Chinese customary unit of capacity '*Sheng*'; one-half kilogramme as one *Shih Chin*, which is the average weight of the different varieties of '*Chin*' in different localities; and one-third of a metre or *Kung Ch'ih* as one *Shih Ch'ih*, which is the average length of different varieties of Chinese 'Foot' in different localities, thus constituting the so-called 1-2-3-system of Chinese weights and measures based on International metric standard. Such a system as devised by the Ministry of Industry, Commerce and Labour and proclaimed by the National Government to be put into force may also have great bearing on the users of British 'Foot-Pound' system by taking the following approximate value: 1 quart equals to 1 litre, 1 pound equals to ½ kilogramme and 1 yard equals to 1 metre. The Russian and Japanese system can also be thus varied accordingly so as to fit themselves to the International System. The following table shows the old units of weight, capacity and length :—

WEIGHT.

10 *Ssŭ*	= 1	*Hao*.
10 *Hao*	= 1	*Li*.
10 *Li*	= 1	*Fên* (Candareen).
10 *Fên*	= 1	*Ch'ien* (Mace).
10 *Ch'ien*	= 1	*Liang* (Tael) = 37·301 grammes.
16 *Liang*	= 1	*Chin* (Catty) = 596·816 ,,

CAPACITY.

10 *Sho*	= 1	*Ko*.
10 *Ko*	= 1	*Sheng*.
10 *Sheng*	= 1	*Tou* = 10·354688 litres.
5 *Tou*	= 1	*Hu*.
2 *Hu*	= 1	*Tan*. Commodities, even liquids, such as oil, spirits, &c., are commonly bought and sold by *weight*.

LENGTH.

10 *Fen* . . = 1 *Ts'un* (inch).
10 *Ts'un* . . = 1 *Ch'ih* (foot) = ·32 metre.
10 *Ch'ih* . . = 1 *Chang* = 3·2 metres.
180 *Chang*. . = 1 *Li* = 576 metres = ⅓ mile.

By treaty between Great Britain and China, the *Ch'ih* of 14$\frac{1}{10}$ English inches has been adopted as the standard, the Tael, Catty, and Picul have been fixed at 1⅓ oz., 1⅓ lb., 133⅓ lb. avoirdupois respectively. 1 *Mow* = ⅙ of an acre.

Diplomatic Representatives.

1. OF CHINA IN GREAT BRITAIN.

Envoy and Minister.—Quo Tai-chi. (Appointed August 1, 1932.)
Counsellor.—Chen Wei-cheng (W. C. Chen).
First Secretaries.—Tan Pao-shen and Liu Chieh.
Second Secretary.—Chiu Tsooming.
Third Secretary.—Li Tieh-tseng.
Attachés.—Loh Ming-sin, Tien Fang-cheng and Wu Tien-hwei.
Naval Attaché.—Tseng Yeo-chu.
Consul-General in London.—W. C. Chen.

2. OF GREAT BRITAIN IN CHINA.

Envoy and Minister.—The Hon. Sir Alexander Montagu George Cadogan, K.C.M.G., C.B. (Appointed September 4, 1933.)
Counsellor (Acting).—R. G. Howe.
Secretaries.—A. Holman, M.C., J. N. Behrens, and H. A. Caccia.
Chinese Secretary.—Sir Eric Teichman, K.C.M.G., C.I.E.
Commercial Counsellor.—L. B. Beale, C.B.E. (at Shanghai).
Commercial Secretaries.—A. H. George (Shanghai), J. C. Hutchison, O.B.E. (Peking), and G. C. Pelham (Hong Kong).
Naval Attaché.—Captain J. G. P. Vivian, R.N. (Headquarters in Tokyo).
Military Attaché.—Major W. A. Lovat-Fraser, O.B.E.
Air Attaché.—Group Capt. R. P. Willock.
Judge—His Honour Sir P. Grain, Kt. (at Shanghai).

There are British Consular representatives at Peking, Amoy, Canton (C.G.), Changsha, Chefoo, Chung-king (C.G.), Foochow, Hankow (C.G.), Harbin, Ichang, Mukden (C.G.), Newchwang, Nanking (C.), Shanghai (C.G.), Swatow, Teng-Yueh, Tien-tsin (C.G.), Yunnan-fu (C.G.), Kashgar (C.G.), Tsinanfu, and Tsingtao.

Chinese Outer Territories.

Manchuria.

Manchuria, lying between the province of Chihli and the Amur river, and extending from the Hingan mountains eastwards to Korea and the Ussuri river, has an area of about 399,729 sq. miles and a population, according to the latest investigation, of 29,606,000 (16,332,000 males and 13,273,000 females) at December 31, 1930. Manchuria consists of 3 provinces:—Liaoning (Sheng-King or Feng-tien) (area, 71,489 sq. miles; population, 15,000,000), capital Mukden; Kirin (103,352 sq. miles; population, 9,200,000), capital Kirin; and Heilung-chiang or the Amur province (224,887 sq. miles; population, 5,200,000) with Tsitsihar (Heilung Hsien) for its capital. The chief towns are Mukden, the capital, with about 421,000 inhabitants, Kirin (814,600), Harbin (332,700), Antung (15,800), Changchun (133,700), Liaoyang (91,600), Yingkow (111,000), Tsitsihar (63,700), Tiehling (55,000).

There is no longer a Manchu population in Manchuria. A few scattered communities alone remain. Manchuria is primarily an agricultural country, the arable land is estimated at about 82,992,000 acres, or more than 28 per cent. of the total area. The area under cultivation is about 38,038,000 acres. Beans, millet, wheat and rice are the principal crops. In 1930 the area under wheat was 2,125,000 acres (1,552,470 tons); millet, 2,890,000 acres (3,692,000 tons); soya-beans, 7,000,000 acres (5,351,000 tons); kaoliang, 3,060,000 acres (5,136,000 tons). Formerly the whole of the wheat yield was exported, but of late years the flour industry has been growing with the increase in the wheat production. There are now some 40 mills in Manchuria, which turn out about 15,000,000 sacks annually. Extensive forests also abound; their estimated extent is 28,756,000 acres. The soil of certain districts—especially in the vicinity of Mukden and Harbin—is suitable for beet and flax growing, and the industry is slowly developing. The number of live-stock in 1930 was 1,605,000 cattle, 2,437,000 horses, 2,640,000 sheep, 7,507,000 pigs. Manchuria is rich in minerals, the output of which in 1930 was as follows (in metric tons):—coal 10,040,652, limestone 688,489, iron ore 889,421, magnesite 29,016; the output of pig iron in 1930 was 373,493 metric tons, and of coke, 485,321 metric tons.

The Russian lease of Port Arthur and Talien-wan (called Dalny by the Russians and Dairen by the Japanese), and the southern extremity of the Liao-tung peninsula and the South Manchuria Railway were transferred to Japan by the Portsmouth Peace Conference, September 5, 1905. On December 22, 1905, China gave official recognition to this transfer and granted Japan the right to extend the railway from Mukden to Antung at the mouth of the Yalu river, where it connects with the Korean railway. In 1912 a branch line (78 miles) from Changchun, the northern terminus of the Japanese South Manchuria Railway to Kirin, constructed by joint Japanese and Chinese enterprise, and operated under special convention by the South Manchuria Railway, was opened to traffic. The total length of the South Manchuria Railway is 1,122 miles (1933). On August 1, 1917, the whole of the railway system of Korea (some 1,000 miles in length) passed under the management of the South Manchuria Railway, giving the latter a through line under its own management from Fusan, the Korean port nearest Japan, to Changchun, where connection with the railway system to Harbin and thence to Leningrad is effected. Besides the South Manchuria Railway, Manchuria is traversed by the Chinese Eastern Railway (2,301 miles), the Peiping-Mukden Railway (929 miles), the Ssupingkai-Taonan Railway (312 miles), and a number of smaller lines; total length, 7,413 miles. There are 265 post offices and 550 postal agencies.

In January, 1935, the Japanese Government completed the purchase from the U.S.S.R. of the Soviet portion of the Chinese Eastern Railway for 170,000,000 yen.

On September 18, 1931, the Japanese army occupied Mukden. A series of military operations continued, and on February 18, 1932, the three north-eastern provinces of China, Fengtien, Kirin and Heilungchiang, together with Jehol, were, with the assistance of Japan, proclaimed an independent state under the style of Manchukuo, with the capital at Changchun, renamed Hsinking. Japan has formally recognised Manchukuo, and a *modus vivendi* has been established with the Soviet Union. The League of Nations in 1932 sent a commission of inquiry, under the chairmanship of Lord Lytton, to inquire into the formation of Manchukuo, and in February, 1933, adopted the Lytton report. Only Japan and San Salvador have recognised the new Manchurian Free State.

The total area of Manchukuo is given at 460,381 sq. miles and its population at 34,244,980. The Organic Law of March 9, 1932, provides for a Chief Executive, a Privy Council, and a Cabinet. In January, 1933, it was decided to make Mr. Henry Pu the Chief Executive, hereditary Emperor of Manchukuo. He was crowned on March 1, 1934.

Tibet

Tibet, extending from the Pamir region eastwards between the Himalaya and Kwen-lun mountains to the borders of Chinghai and Sikong, has an area of 463,200 square miles with a population estimated at between 1,500,000 and 6,000,000. Probably 3,000,000 is near the mark. Lhasa, the capital, has from 15,000 to 20,000 inhabitants. The country being bleak and mountainous and strangers having been jealously excluded, wide regions are still unexplored.

Chinese authority was in the past represented by two *Ambans* who had charge, respectively, of foreign and military affairs. There were three Chinese commandants of troops at Lhasa, Shigatse, and Dingri where the permanent military force of about 4,600, provided by China, were mostly quartered. There were a few other Chinese officials, but the civil and religious administration of the country was left almost entirely to Tibetans. The head of the government is the Dalai Lama, who resides at the Po-ta-la (or palace) near Lhasa. He acts through a minister or regent appointed from among the chief Tibetan Lamas and assisted by five ministers. Early in 1908 the territory of Western Szechuen and the adjoining territory of Eastern Tibet were united into a new 'special administrative area,' known as the Province of Sikang, with Batang, re-named Baanfu, as capital.

The prevailing religion is Lamaism, a corrupt form of Buddhism, but along with it there exists the Bon, or Shamanistic, faith. In some places agriculture is carried on, barley and other cereals as well as pulse and vegetables being grown. In some favoured regions fruits, including peaches and even grapes, are produced. In other places the pursuits are pastoral, the domestic animals being sheep and yak (often crossed with Indian cattle), while in some regions there are buffaloes, pigs, and camels. Wool-spinning, weaving, and knitting are common, and there are many hands skilful in making images and other decorations for religious edifices. The chief minerals worked are gold, borax, and salt. There is a large trade with China and considerable traffic across the Indian frontier. A telegraph line, 144 miles long, connects Lhasa with Gyantse.

The trade between India and Tibet has to be carried through lofty passes between 14,000 and 18,000 feet high, most of which are practically impassable during seasons of heavy rain and snow. Sheep and also crosses between yaks and ordinary cattle are used as beasts of burden. The most important route into Tibet from India is from Siliguri, near Darjeeling in northern Bengal, and across the small Frontier State of Sikkim to Gyantse and Yatung in Tibet, the two leading trade marts authorised by the existing Convention. The other chief means of access to Tibet are from Almora in the northern part of the United Provinces, and from Simla over the Simla–Tibet road to Gartok in western Tibet, which is at about 14,200 feet elevation above the sea. From Almora to Gartok the direction is almost due north, and from Simla to Gartok is almost due east.

For the removal of hindrances to the Indian trade a treaty was made with China in 1890, supplemented by a second treaty in 1893, but the hindrances still remained. Consequently, in 1904, the Indian Government sent a mission with an escort to arrange matters directly with

the Tibetan Government. The mission met with a good deal of armed opposition, but at length, on September 7, a convention was executed at Lhasa. The convention provides for the re-erection of boundary stones (alluding to former pastoral disputes) on the Sikkim frontier; for marts at Yatung, Gyangtze, and Gartok for Tibetan and British merchants; for the demolition of forts on the trade routes; for a Tibetan commissioner to confer with British officials for the alteration of the objectionable features of the treaty of 1893; for the settlement of an equitable customs tariff; for the repair of the passes and the appointment of Tibetan and British officials at the trade marts. China paid an indemnity of 2,500,000 rupees (166,666*l.*), and the evacuation of the Chumbi valley by the British began in February, 1908. Further, no Tibetan territory may be sold, leased or mortgaged to any foreign Power, nor may Tibetan affairs be subject to foreign management or interference without the consent of the British. The adhesion of China to this convention was secured by an agreement signed at Peking on April 27, 1906. Under the Convention of August 31, 1907, Great Britain and Russia agree not to enter into negotiation with Tibet except through the Chinese Government, nor to send representatives to Lhasa. But this engagement does not affect the provisions of the British-Tibetan convention of September 7, 1904, ratified by China in 1906. Negotiations were begun at Simla in Sept. 1907, for the conclusion of Trade Regulations between India and Tibet, and were brought to a satisfactory conclusion in April, 1908.

Sin-Kiang consists of Chinese Turkestan, Kulja, and Kashgaria, and comprises all Chinese dependencies lying between Mongolia on the north and Tibet on the south. It is now regarded as a separate province, its Governor residing at Urumchi, or Tihwafu, the capital. Its area is estimated at about 550,340 square miles and population at about 1,200,000. The inhabitants are of various races, known as Turki (Kashgari, Kalmuk, Khirghiz, Taranchi, etc.), mostly Mohammedan and Chinese, who have of recent years greatly increased in numbers. The chief towns are Ili, Kashgar, Yarkand, Khotan, and Aksu. The country is administered under Chinese officials, residing at Urumchi, the subordinates being usually natives of the country. In regions about the Kashgar and Yarkand rivers the soil is fertile, irrigation is practised, and cereals, fruits and vegetables are grown. Other productions of the country are wool, cotton, and silk. Jade is worked, and in some districts gold is found. The whole territory is yearly increasing in population and prosperity. A trade agreement with Soviet Russia was signed in 1924.

In 1927, imports from India totalled 11,86,848 rupees, and exports to India 28,14,568 rupees; trade with Afghanistan in the same year was: imports, 8,30,500 rupees; exports, 5,47,540 rupees; with China: imports, 19,39,850 rupees; exports, 7,37,250 rupees.

British Consul-General at Kashgar.—Lieut.-Colonel R. A. *Lyall.*

Mongolia.

The vast and indefinite tract of country called **Mongolia** stretches from the Khinghan mountains on the east to the Tarbagatai mountains on the west, being intersected towards its western end by the Altai mountains and the Irtish river. On the north it is bounded by Siberia and on the south by the outer Kan-su and other regions which are united into Sin-Kiang. The area of Mongolia is about 1,875,000 square miles, and its population about 750,000 Mongols and about 100,000 other nationalities,

principally Chinese and Russians. The monks (lamas) are the most important element in the population, forming 15 per cent. of the total, and over 30 per cent. of the male population. A wide tract in the heart of this region is occupied by the Desert of Gobi which extends south-westwards into Chinese Turkestan. The inhabitants are nomadic Mongols and Kalmucks who range the desert with camels, horses, and sheep. Even in fertile districts they are little given to agriculture. But of recent years there has been a great extension of Chinese immigration, and a large area of what was known as Mongolia, extending from China proper and Manchuria to the Gobi Desert, is now indistinguishable from Chinese territory, and has in fact been absorbed within Chinese administration in Manchuria. Chinese settlers are gradually invading the Gobi Desert. Irrigation alone is needed. Inner Mongolia and portions of the adjacent provinces in China proper are now divided into three provinces, Jehol, Chahar, and Suiyuan, each of which is governed by a provincial committee, appointed by the Chinese Government. The chief town or centre of population is Urga (which, since 1924, is known as Ulan Bator Hoto, *i.e.* 'Town of the Red Heroes'), 170 miles due south of Kiakhta, a frontier emporium for the caravan trade carried on with China across the Gobi Desert. Urga has some 100,000 inhabitants. Kiakhta is a Siberian frontier town, and stands about 100 miles from the south end of Lake Baikal. The chief exports are livestock and animal products. The following quantities were exported in 1930: sheep's wool, 8,770 tons; pigs, 1,200,000; sheep and goats, 2,000,000.

The foreign trade of Mongolia in recent years has been handled by Government organisations backed by Soviet capital. The chief trading concern is the Mongo Central Co-operative Society.

During the summer months motor-car services cross the Gobi desert, the journey between Kalgan and Urga (1,160 road miles) occupying 4–6 days. It was inaugurated in 1917. During 1930 work was commenced on the new railway line from Tao An to Solun.

For a history of political events in Mongolia from 1912 to 1923, see THE STATESMAN'S YEAR-BOOK for 1923, p. 794.

Inner Mongolia is still part of China.

Outer Mongolia.—In 1924, on the death of the last Hutukhtu or theocratic ruler of Outer Mongolia, there was a revolution, as a result of which the Mongolian People's Revolutionary Government, run on Soviet lines, was established. According to the constitution adopted in November, 1924, which follows the Soviet model, the highest power is vested in a parliament (the *Great Huruldan*) which is elected by universal suffrage, male and female, over 18 years of age. It has to meet once a year at least, and alone has the power to amend the constitution. It elects from its number 30 members who form the executive committee (the *Little Huruldan*) which is responsible to it. This committee elects five of its members to a board which carries on current state affairs.

In 1932 the population of Outer Mongolia was estimated at 540,000, of whom about one-sixth were Russians and some 5,000 Chinese. The Mongols are mainly herdsmen, and in 1928 were estimated to have 1,340,000 horses, 270,000 camels, 1,500,000 oxen, and 10,600,000 sheep.

There are some gold mines in the country, as well as other mineral deposits of unascertained value. Wool, skins and furs are exported, chiefly to the Soviet Union. In 1925 exports from Outer Mongolia were estimated at 24,500,000 Mexican dollars; and imports at 24,000,000 Mexican dollars. A tannery, a brick-works, and a sawmill are the only industries.

Communications are chiefly by caravan route. In 1926 an agreement

was reached between the Soviet Union and Outer Mongolia for the construction of a railway between Urga and Chita, but, according to the latest information, has not yet been implemented. An air service has been established between Verkhneudinsk and Urga, and there are steamer services on the Selenga and Orkhon rivers. There is telegraphic communication with the Soviet Union, and a wireless station has been established at Urga.

Since March, 1915, Mongolia has had a legal currency of its own. The present currency, introduced in 1925, is based on the *Tukhrik*, a silver coin equivalent theoretically to half an American gold dollar, and divided into 100 *Mongo*. In 1924 a state note-issuing bank, the Commercial and Industrial Bank (Mongolbank), was founded, with a capital of 175,000 Mexican dollars, which has since been increased to 3,000,000 Mexican dollars. The Soviet State Bank holds fifty per cent. of the capital.

Buddhist Lamaism is the prevalent form of religion, the Lamas having their residence at Urga and other centres.

Tannu-Tuva (Tuvinian People's Republic) is an independent republic, under Soviet protection, to the north-west of Mongolia, between 50° and 53° N. lat., and between 90° and 100° E. long. It is bounded to the East, West and North by Siberia, and to the South by Outer Mongolia.

As Uryankhai the territory now known as Tannu-Tuva was considered part of Outer Mongolia until the Mongolian insurrection of 1911. Russian colonists had been settled there since 1870, and consequently the Imperial Russian Government at this time made claims to the territory. It was not included in autonomous Mongolia, and after a period of nominal independence, it was proclaimed a Russian protectorate on the outbreak of the Great War in 1914, and became virtually a department of the Ussinsk district of the Altai Province of Siberia.

During the Russian Civil War Uryankhai came again under Chinese jurisdiction, but after the Soviet occupation of Urga it was proclaimed an independent republic under the name of Tannu-Tuva. The Chinese Government and the Government of the Mongol Republic set up under Soviet influence protested against its separation from Outer Mongolia, and a mixed commission was appointed to settle its status. In 1926 a Treaty of Friendship was signed by Outer Mongolia and Tannu-Tuva.

According to the Constitution adopted in 1924 supreme power is vested in the *Great Huruldan*, which is composed of district representatives elected by all citizens of 22 years of age excepting those belonging to high noble and priestly families. The *Great Huruldan* meets once a year and elects a *Little Huruldan* of 30 members, which in turn elects a President and the members of the Government, who are responsible to it. The *Little Huruldan*, which is the legislative body, meets four or five times a year.

President of the Little Huruldan.—M. Tonduk.

The area of Tannu-Tuva is about 64,000 square miles. The total population is about 65,000, of whom some 50,000 are Tuvinians, 12,000 Russians, and the rest Chinese and Mongols. The Tuvinians are a Turki people, formerly ruled by hereditary or elective tribal chiefs.

Tannu-Tuva is well-watered and has much good pastoral land. The Tuvinians are mainly herdsmen and cattle farmers, and the Russians in Tannu-Tuva merchants, farmers, and gold prospectors. There are deposits of gold and asbestos. The main exports are hair, hides and wool, and the imports manufactured goods and iron. The capital city is Kysylchoto (in Russian Krasny), formerly known as Khem-Belder (Russian Bielotsarsk). It has some 10,000 inhabitants.

A Soviet steamer service along the river Yenisei maintains communication with Minussinsk, in Central Siberia. There is a telegraph line connecting Kysylchoto with Soviet Russia.

COLOMBIA.

(La República de Colombia.)

Constitution and Government.

The Republic of Colombia, which in colonial days was called 'Vice-royalty of New Granada,' gained its independence of Spain in 1819, and was officially constituted December 17, 1819, together with the present territories of Panama, Venezuela and Ecuador, the State of 'Greater Colombia,' which continued for about twelve years. It then split up into Venezuela, Ecuador, and the Republic of New Granada in 1830. The Constitution of May 22, 1858, changed New Granada into a confederation of eight States, under the name of Confederation Granadina. May 8, 1863, saw another Constitution, and the adoption of the name of the United States of Colombia. The revolution of 1885 led the National Council of Bogotá, composed of two delegates from each State, to promulgate the Constitution of August 5, 1886, which abolished the sovereignty of the States, converting them into departments, with governors appointed by the President of the Republic, though they retained some of their old rights, such as the management of their own finances. A decree of May, 1928, abolished their right to borrow abroad without the sanction of the central Government.

The legislative power rests with a Congress of two Houses, the Senate, of about 58 members, elected for 4 years, and the House of Representatives, of about 131 members, chosen for 2 years. By the Act of 1930 the Senators are elected indirectly by departmental assemblies, at least 3 senators for each department and more according to population; the Representatives are chosen by the people in each department (one for every 50,000). Congress meets annually at Bogotá on July 20.

The President is elected by direct vote of the people for a term of 4 years, and is not eligible for re-election until 4 years afterwards. Congress elects, for a term of one year, two substitutes, one of whom occupies the presidency in the event of a vacancy during a presidential term. Public expenditures are supervised by the Controller General, who is responsible, not to the President, but to Congress.

The following is a list of Presidents since 1898:—

Dr. Manuel Antonio Sanclemente, Aug. 7, 1898—July 31, 1900.
Dr. José Manuel Marroquin, July 31, 1900—Aug. 7, 1904.
General Rafael Reyes, Aug. 7, 1904—April, 1909. Went abroad April, 1909, and resigned on his return July 29, 1909.
General Jorge Holguin, April, 1909—Aug. 7, 1909.
Dr. Ramon Gonzalez, Valencia, Aug. 7, 1909—Aug. 7, 1910.
Dr. Carlos E. Restrepo, Aug. 7, 1910—Aug. 7, 1914.
Dr. José Vicente Concha, Aug. 7, 1914—Aug. 7, 1918.
Dr. Marco Fidel Suarez, Aug. 7, 1918—Nov. 11, 1921.
General Jorge Holguin, Nov. 11, 1921—Aug. 7, 1922.
General Pedro Nel Ospina, Aug. 7, 1922—Aug. 7, 1926.
Dr. Miguel Abadia Mendez, Aug. 7, 1926—Aug. 7, 1930.
Dr. Enrique Olaya-Herrera, Aug. 7, 1930—Aug. 7, 1934.

President of the Republic.—Don Alfonso *Lopez.* Elected February 11, 1934; holds office from August 7, 1934, to August 7, 1938.

The ministries are those of the Interior, Foreign Affairs, Finance, War, Public Instruction, Industry and Labour, Public Works, Agriculture and Commerce, and Posts and Telegraphs.

On November 3, 1903, Panama asserted its independence and was formed into a separate Republic. On April 6, 1914, Colombia signed a treaty with the United States, at Bogotá, agreeing to recognise the independence of Panama and receiving as indemnity for the Panama Canal zone 25 million dollars (5 millions sterling) and certain rights in the zone. (*See* Introduction of THE STATESMAN'S YEAR-BOOK, 1915.) This Treaty was ratified by both countries in 1921. A mixed Commission is (1934) determining the boundary between the two.

A boundary dispute with Peru, which has lasted for over 100 years, was settled in 1928; but broke out again in 1932 with the seizure by Peruvian volunteers of the town of Leticia which had been incorporated in Colombia. Fighting broke out in 1933, but on May 25, 1934, a treaty was signed in Rio de Janeiro by which it is hoped the differences between the two countries will be adjusted; that treaty has not yet been approved by the respective parliaments. A Commission from the League has in the interim restored to Colombia the Amazon region.

Area and Population.

The area of the Republic is estimated at about 447,536 square miles. It has a coastline of about 2,046 miles, of which 868 miles are on the Caribbean Sea and 1,178 miles on the Pacific Ocean. The area and population of the 14 departments, 4 intendencies and 6 commissaries were, according to the census of November 16, 1928, as follows (the capitals in brackets).

—	Area sq. miles	Census Population, 1928			Est. pop. June 30, 1933
		Males	Females	Total[1]	
Departments.					
Antioquia (Medellín)	25,516	490,664	520,660	1,011,324	1,152,059

Grand Total . . .	447,536	3,899,923	3,881,210	7,851,000	8,893,030

[1] Totals include Indians, where present, in addition to the whites and other non-Indians listed under 'Males' and 'Females.'

Of the total population (including 69,867 Indians) in 1928, 3,937,892, or 50·16 per cent., were males, and 3,913,108, or 49·84 per cent., were females. Immigration is almost negligible; foreigners in 1928 numbered 35,251, including: German, 1,682; English, 1,436; United States, 1,607; Italian, 1,916; Syrian, 2,967; and Venezuelan, 14,743. Urban population totalled 2,437,848, or 31 per cent.; for every 1,000 townspeople there are 2,200 country people. Population over 10 years of age numbers 5,610,715, of whom 51·57 per cent. are literate. Illiterate men number 23·12 per cent., and illiterate women 25·12 per cent. of those over 10 years of age. Illiterates were 68 per cent. of the population at the 1918 census.

The bulk of the population lives at altitudes of from 4,000 to 9,000 feet above sea level.

The capital, Bogotá (estimated population, 1933, 264,607), lies 8,600 feet above the sea. The chief commercial towns, with their estimated population in 1933, are Medellin (145,880); Barranquilla (129,715), connected with the coast at Puerto Colombia by 17 miles of railway and by road; Cartagena (122,944); Cali (104,232), a coffee and mining centre; Manizales (100,645); Ibague (71,370); Cúcuta (64,372); Bucaramanga (59,429); Pasto (55,718). Buenaventura, the principal port on the Pacific, was destroyed by fire in 1931; it is being rebuilt.

The language spoken is Spanish—the purest Spanish spoken in South America.

Religion, Education and Justice.

The religion of the nation is Roman Catholicism. There are 4 Catholic archbishops, viz. of Bogotá, Cartagena, Medellin, and Popayán, the first having 4 suffragans and the other three 2 each. One of the suffragan sees is Panamá, belonging to ecclesiastical province of Cartagena, and now also to the Republic of Panamá. Other forms of religion are permitted, so long as their exercise is 'not contrary to Christian morals nor to the law.'

Primary education is free but not compulsory. In 1931–32 there were 7,495 primary and secondary schools with 447,946 pupils; in 1930–31 there were 25 industrial schools with 1,392 children; 6 art schools with 399 pupils; 17 normal schools with about 1,000 pupils. The oldest University is that of Bogotá (founded 1572). This and the School of Mines at Medellin are national institutions. The other Universities are maintained by Departments; they are the Universities of Antioquia at Medellin (founded 1822), with 1,000 students, of Bolivar at Cartagena, of Cauca at Popayan, and of Narino at Pasto.

A new judicial code, published in the Diario Official, October 24, 1931,

went into effect January 1, 1932. The Supreme Court, at Bogotá, is divided into 4 chambers—civil cassation, criminal cassation, general business and civil 'de unica instancia.' Each judicial district has a superior court of 3 judges or more. By a decree of November 12, 1932, married women were granted full control of their property, and a share of property jointly acquired since marriage.

Finance.

Ordinary revenue and expenditure for 6 calendar years in gold pesos (normally 1 gold peso = 97 cents, U.S.):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1930	49,357,917	55,379,232	1933	39,787,459	33,019,593
1931	43,694,101	41,788,344	1934[1]	36,428,464	36,428,464
1932	35,522,954	34,803,640	1935[1]	44,140,000	42,844,365

[1] Estimates.

The Extraordinary Budget for 1934, covered by special taxes, was 1,110,000 pesos. The main items of ordinary expenditure in 1934 were: Interior, 6,621,956 pesos; Public Debt, 8,750,530 pesos (of which 1,843,923 pesos were for External Debt); War, 6,000,000 pesos; National Education, 1,422,367 pesos; Public Works, 2,388,703 pesos; Posts and Telegraphs, 3,746,000 pesos; Hygiene, 2,150,000 pesos.

On June 30, 1934, the external debt of the Central Government was 66,299,578 pesos; internal debt was 55,526,443 pesos, plus 29,095,502 owed to the banks, and a current budget deficit of 19,384,151 pesos. The Government continued interest transfers on the national and the bank debts until they were suspended on March 28, 1933, due to the heavy expenditure entailed by national defence; in 1934, interest payments were resumed to the extent of one-third in cash and the balance in 4 per cent. funding certificates redeemable by 1946. The external debts of Departments and Municipalities are in default.

Defence.

Military service is compulsory between the years of 21 and 45. Service with the colours is for 1 year. The permanent army consists of 3 divisions of 2 brigades of 2 regiments of infantry; total 12 infantry regiments; 2 cavalry regiments, each of 4 squadrons; 1 artillery regiment; 1 engineer battalion; 1 transport battalion of 3 companies. An aviation corps is being built up. The peace effective in 1933 was 499 officers and 8,000 other ranks. In war time every fit Colombian is compelled to serve, and the war effective is about 50,000. The infantry are armed with rifles of the improved Remington pattern, with the French Gras rifle, and with the 88 pattern Mauser.

Colombia has 2 modern destroyers, the *Antioquia* and *Caldas*; 1 seagoing gunboat; 3 coastguard patrol vessel; 5 river gunboats, and several motor launches for customs services. In 1934 the services of a number of retired British naval officers and men were engaged with a view to reorganising the Colombian Navy.

Production and Industry.

Very little of the country is under cultivation but much of the soil is fertile, and is coming into use as roads improve. Colombia is the largest producer of mild coffee, demand for which is unaffected by over-production in Brazil. Crops are grown by smallholders, and are picked all the year round. Quality is carefully guarded; the coffee census of 1932 showed 149,527 plantations with 462,773,975 producing

trees. Exports, 1934, 3,142,886 bags of 60 kilos, of which 2,612,455 bags went to the U.S., 479,481 bags to Europe and 50,950 bags to other countries. Rice, for domestic consumption, is increasingly important; output, 1933, 51,000 tons. Tobacco is also grown. Cotton output, 1932, 9,238 tons. Cocoa, sugar (about 40,000 metric tons annually), tagua (or vegetable ivory nut), and dyewoods are produced, besides wheat, maize, plantains, &c. Banana cultivation is extending; exports, 1934, 7,668,347 stems. About one-third of the bananas imported into the United Kingdom are from Colombia. The rubber tree grows wild, and its cultivation has begun. Tolu balsam is cultivated, and copaiba trees are tapped but are not cultivated. Dye and cedar woods are abundant on the Magdalena River, but little or no wood of any sort is exported. Forest lands total 150 million acres.

Colombia is rich in minerals, and gold is found in all the departments; output in 1933, 298,242 fine ounces; in 1934, 344,310 fine ounces. The richest mines are in Antioquia, Cauca, Caldas, Tolima, Nariño, Choco, and Cundinamarca. Other minerals are copper, lead, mercury, cinnabar, manganese, emeralds, and platinum (first discovered in Colombia in 1735), which was long abundant in the alluvial deposits of the Choco River but exports (5,426 ozs. in 1934) are dwindling. The working of the emerald mines is a Government monopoly or Government-controlled; exports are rigidly controlled, only the finest stones being sent abroad. The chief mines are those of Muzo (Government-owned) and Chivor (American-owned). The country also has coal, iron, limestone, sand, and fireclay deposits, so that in some parts it is highly favourable for the development of metallurgical industries. The extraction of salt from the mines in Zipaquira and the evaporation at the numerous natural salt pans along the Caribbean coast are a Government monopoly, leased to the Banco de la República; annual revenue is about 1,500,000 gold pesos. There are extensive deposits of coal of high quality, especially near Cali. Petroleum has recently been found; production has risen from 447,744 barrels in 1924 to 16,417,000 barrels in 1932, and 13,500,000 barrels in 1933. Exports in 1934, 16,530,950 barrels.

Commerce.

Exports and imports were placed in 1931 under Government control, to protect the foreign exchange value of the gold peso.

Imports and exports for 6 years (5 gold pesos = 1*l.*):—

Year	Imports	Exports	Year	Imports	Exports
	Gold pesos	Gold pesos		Gold pesos	Gold pesos
1929	126,376,990	126,871,945	1932	30,649,188	70,332,552
1930	62,841,092	113,288,027	1933	49,666,527	72,689,892
1931	41,056,784	98,427,236	1934	87,559,696	123,839,234

Trade by principal countries (1933) in pesos gold:—

Imports	1933	Exports	1933
United States	18,286,392	United States	49,105,953
United Kingdom	10,803,109	United Kingdom	7,086,708
Germany	8,835,184	Canada	3,927,002
France	2,410,612	Germany	3,354,539
Italy	1,457,476	France	2,848,310
Belgium	1,148,406	Holland	3,017,902

Important articles of export (1934) were, in pesos:—Coffee, 82,459,232; petroleum, 28,161,875; bananas, 6,122,277; platinum, 2,720,650; hides, 2,870,380. The chief imports were, in pesos:—Cotton, wool and silk yarns, 22,000,000; cotton thread, 1,050,000; cotton textiles, 12,714,000; woollen goods, 2,777,000; machinery, 7,500,000.

Total trade between United Kingdom and Colombia for 5 years (Board of Trade figures):—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Colombia into U.K.	1,397,085	764,126	824,473	974,785	1,115,604
Exports to Colombia from U.K.	1,552,756	1,352,245	1,528,841	2,214,132	1,864,917
Re-exports to Colombia from U.K.	31,060	25,532	18,006	22,153	15,234

Shipping and Communications.

Owing to the mountainous character of the country, the construction of arterial roads and railways is both costly and difficult. The roads are generally simple mule tracks, though some progress has been made by the Government in the construction of main roads, railways and ropeways. The overhead ropeways connecting Mariquita with Manizales is the longest in the world. Total length of motor highways, 4,114 miles; a new road is now under construction; 988 miles are in use. Of the 2,300 mile Simon Bolivar highway which runs from Caracas in Venezuela to a point near Guayaquil in Ecuador, the Colombian portion is complete.

In Colombia there are 15 lines of railway (11 national, and 3 British companies), with a total length (1933) of 1,980 miles; about 1,400 miles are under construction. Of the total, 614 miles have a gauge of 3 ft.; the rest a metre gauge. The national lines were placed in 1931 under the administration of a non-political council. Most of them are small disconnected lines serving principally as feeders to the Magdalena river, which is the main traffic route between the Caribbean and the interior.

A daily airplane service connects Bogotá with Barranquilla on the Atlantic coast; from there a bi-weekly service (mail and passengers), reaches New York in 2½ days. Three companies with 10 air-lines now cover 2,395 miles of routes.

The Magdalena river is subject to drought and despite possible minor improvements, navigation is always impeded during the dry season. That river is navigable for 900 miles; steamers ascend to La Dorada, 592 miles from Barranquilla. The Bocos de Cenezia in 1935 will be opened to navigation by ocean steamers, converting Barranquilla into an ocean port.

In 1930, the post-office handled 15,286,583 letters and post-cards and 15,659,322 packets of printed matter, samples, and business papers. Number of offices, 1,075. There are 25,027 miles of Government telegraph lines; number of offices, 897. Telephone system is being extended; wireless telephony is utilized between Colombia, Central and South America, North America and Great Britain. The Marconi Wireless has a station in Bogotá covering points in the interior as well as abroad.

International cable service to all Latin America and the United States is furnished by the lines of All-America Cables which touch Colombia at Cartagena, Barranquilla and Buenaventura.

Money, Weights, and Measures.

Under the Law of June 12, 1907, the monetary unit was a gold peso equal to one-fifth of a pound sterling and of proportionate weight, the fine-

ness being the same; it equalled 97·3 cents, U.S. After Great Britain's departure from the gold standard, the gold peso was linked to the dollar (U.S.) at the rate of 1 peso = 95·01 cents (U.S.). In 1934 the foreign exchange value ranged between 69·9 cents and 55·1 cents. Gold coins are 2½, 5, and 10 pesos. Silver coins are (900 fine) the half-peso, and 20 and 10 centavos. Nickel coins for 1, 2, and 5 centavos are legal tender. There are also notes representing gold pesos of 1, 2, 5, 10, 20, 50, 100, 500 and 1,000 pesos respectively.

On June 30, 1934, the total currency of Colombia consisted:—gold coinage, 6,910,000 pesos; bullion, 6,459,000 pesos, nearly all in the Banco de la República; central bank notes, 39,643,000 pesos; Treasury notes, 7,931,000 pesos; silver and nickel coinage and certificates, 13,811,000 pesos; Treasury bonds, 28,000 pesos; other domestic specie, 49,000 pesos; foreign specie, 12,000 pesos, making a total of 74,843,000 pesos.

On July 23, 1923, the Banco de la República was inaugurated as a central bank. The capital amounts to 11,735,800 pesos. It has the exclusive privilege until 1943 of issuing banknotes in Colombia. Its note issues must be covered (law of December 1, 1931) by a reserve in gold or foreign exchange of 50 per cent. of their value (later reduced to 30 per cent.); deposits are to be covered by a special currency reserve up to 25 per cent. of their total. Other banks are required to turn their gold over to the Central Bank, which has sole power, through a Central Exchange Board, to buy and sell gold and foreign exchange. Gold reserves on June 30, 1934, were 13,368,361 pesos held at home and 6,747,773 held abroad by the Banco de la República. Note issue totalled 39,643,561 pesos.

The Agricultural Mortgage Bank of Bogotá, formed by the consolidation of the mortgage departments of 5 principal banks in 1925, was supplemented in 1931 by the Agrarian Credit Bank with capital of 10 million pesos subscribed by Government, Departments, Municipalities and others.

There are 23 commercial banks with total paid-up capital and reserves (June 30, 1932) of 36,013,000 pesos, including 6 foreign (2 English, 1 Canadian, 1 American, 1 French and 1 Italian) commercial banks and 2 native mortgage banks. This does not include the Banco de la República.

The metric system was introduced into the Republic in 1857. In custom-house business the kilogramme, equal to 2·204 avoirdupois pounds, is the standard. In ordinary commerce the arroba, of 27·5 pounds, or 12½ kilos; the quintal, of 4 arrobas, or 50 kilos; and the carga, or "mule load," of 2½ quintals, or 125 kilos, are generally used. The Colombian libra is equal to 1·102 pound avoirdupois. The Colombian vara, or 80 cm., is still in some cases the measure of length used for retailing purposes, but in liquid measure the French litre is the legal standard.

Diplomatic and Consular Representatives.

1. Of Colombia in Great Britain.

Chargé d'Affaires, ad. int.—Saturnino Restrepo.
Counsellor.—Jorge Garcés.
Secretary.—Manuel Aya.

There are consuls or vice-consuls at Liverpool, Bristol, Glasgow and Hull.

2. Of Great Britain in Colombia.

Envoy Extraordinary and Minister Plenipotentiary.—Spencer Stuart Dickson. Appointed February 12, 1930.
Consul.—T. J. Anderson.

There are vice-consuls at Barranquilla, Bogotá, Cartagena, Pasto, Medellin, Manizales, Santa Marta and Cali, and consular agents at Buenaventura and Mariquita.

Statistical and other Books of Reference concerning Colombia.

COSTA RICA.

(REPÚBLICA DE COSTA RICA.)

Constitution and Government.

THE Republic of Costa Rica (literally the 'Rich Coast'), an independent State since the year 1821, and forming from 1824 to 1829 part of the Confederation of Central America, is governed under a Constitution promulgated on December 7, 1871, and modified very frequently since that date. Practically there was no constitution, but only dictatorships, between 1870 and 1882. The legislative power is now vested in a single chamber called the Constitutional Congress, and made up of 43 deputies, one for every 8,000 inhabitants. The members of the Chamber are elected for the term of four years, one-half retiring every two years. The President is elected for four years. By the Election Law of August 18, 1913, universal suffrage was adopted for all male citizens who are of age and able to support themselves, except those deprived of civil rights, criminals, bankrupts and the insane. Voting for President, Deputies and Municipal Councillors is, by the Law of July 26, 1925, secret, direct and free. Diplomatic relations with Panama, severed since 1921, were resumed October, 1928. On December 23, 1932, Costa Rica denounced the Central American Treaty of Peace and Amity signed February 7, 1923, with El Salvador, Guatemala, Honduras and Nicaragua.

President of the Republic.—Dr. Ricardo *Jiménez* Oreamuno, elected on February 7, 1932; assumed office May 8, 1932.

The administration normally is carried on by seven Secretaries of State, appointed by the President, who direct the departments of: Interior and Police; Foreign Affairs; Justice, and Public Worship; Education; Public Security; Finance and Commerce; Public Works, Hygiene and Public Health.

Area and Population.

The area of the Republic is estimated at 23,000 English square miles, divided into seven provinces, San José, Alajuela, Heredia, Cartago, Guanacaste, Puntarenas, and Limón. The last Census, taken in May, 1927, showed a population of 471,525, made up as follows:—

Province	Population	Province	Population
San José	153,183	Guanacaste	51,142
Alajuela	97,577	Puntarenas	28,739
Heredia	38,407	Limón	32,278
Cartago	70,199	Total	471,525 [1]

[1] There are about 3,500 aborigines (Indians).

Estimated population on January 1, 1934, was 551,541.

The vital statistics for four years were as follows:—

	Marriages	Births	Deaths	Increase	Immigration	Emigration
1930	2,975	23,650	11,225	12,425	6.707	6,957
1931	2,933	23,888	12,567	11,262	5,247	4,850
1932	3,250	23,661	11,843	11,818	3,677	3,531
1933	3,103	23,543	11,486	12,057	4,178	4,348

The population of European descent, many of them pure Spanish blood, dwell mostly around the capital, the city of San José (population, 1934, 58,242, with suburbs, 68,724), and in the towns of Alajuela (9,782), Cartago (17,890), Heredia, with suburbs (14,318), Liberia (8,875), Puntarenas (8,127), and Limón (16,203). The last-named, on the Caribbean coast, is the country's chief seaport. There are some 18,000 coloured British West Indians, mostly in Limón Province, on the banana farms. The native Indian population is dwindling.

Spanish is the language of the country.

Religion and Education.

The Roman Catholic is the religion of the State, but there is entire religious liberty under the Constitution. The Archbishop of Costa Rica has under him the Bishop of Alajuela.

Elementary instruction is compulsory and free. Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In September, 1933, there were 579 elementary schools with 2,265 teachers and 53,707 enrolled pupils. For secondary instruction there are at San José a lyceum for boys with 730 pupils and 42 instructors, and a college for girls with 499 pupils and 37 teachers. A normal school established in 1915 at Heredia has 389 pupils and 32 teachers. The towns of Cartago and Alajuela have each a college. Expenditure on education, 1933, 4,095,043 colones.

Justice.

Justice is administered by the Supreme Court of Justice, two Appeal Courts, and the Court of Cassation. There are also subordinate courts in the separate provinces, and local justices throughout the Republic. Capital punishment cannot be inflicted. In 1933 there were 3,277 criminal cases, and 5,681 cases of misdemeanour, including 2,663 drink convictions.

Finance.

The revenue and expenditure for five years have been as follows (nominally, £1 sterling = 10·45 colones; 1 colon = 46½ cents, U.S., but since 1926 it has been stabilized at 25 cents, U.S.):—

—	1931	1932	1933	1934[1]	1935[1]
	colones	colones	colones	colones	colones
Revenue . . .	24,750,462	23,095,877	23,884,005	24,282,575	25,430,000
Expenditure . . .	27,570,946	25,024,853	24,569,408	24,101,714	25,340,000

[1] Estimates. Excluding provision for amortizing the public debt.

Revenue in 1933, included customs revenue, 11,658,048 colones; liquor monopoly, 2,627,664; and Pacific Railway, 2,647,075 colones (gross); fixed export taxes, 3,372,659 colones. The largest items of expenditure were public debt service, 5,294,770 colones; public instruction, 4,095,043 colones; and public works and agriculture, 4,754,406 colones.

The foreign debt of the Republic outstanding on January 1, 1934, was 114,511,575 colones, made up of gold refunding bonds, 1911, 1,404,960*l.*; conversion bonds, ditto, 1933, 245,860*l.*; 57,151*l.* due to an English con-

struction company; the French Loan of 1191 (in liquidation), 5,811,000 (pre-War gold) francs; a U.S. loan of 1926, 7,198,000 dollars; conversion bonds, ditto, 1932, 1,597,956 dollars (U.S.); Pacific Railway bonds, 1,589,000 dollars (U.S.); conversion bonds, ditto, 1933, 474,900 dollars (U.S.). Moratoriums are in force with regard to all except the various Conversion Bonds. The internal debt amounted to 30,064,928 colones.

Defence.

Costa Rica has an army, including reserve and national guard, of 150,485 officers and men, of whom in 1929, 50,485 were enrolled and organized in 33 battalions to be called out on mobilization. The standing and active army is limited to 500 by a convention reached in 1923 by the States of Central America. Its strength in 1932 was 58 officers and 260 other ranks. The Republic has also 1 motor launch on the Atlantic side and 1 on the Pacific side for Revenue purposes.

Production and Industry.

Agriculture is the principal industry. The cultivated area is about 1,039,883 acres; grass lands cover 6,552,000 acres. There are thousands of square miles of public lands in Costa Rica that have never been cleared, on which can be found quantities of virgin rosewood, cedar, mahogany, and other cabinet woods. The principal agricultural products are coffee (output, 1932–33, 36,268 metric tons), bananas, 4,293,379 stems, and cocoa, 6,813 metric tons. Coffee and bananas account for nine-tenths of the exports. Maize, sugar-cane, rice, and potatoes are commonly cultivated. About 5,000 acres are under tobacco. The distillation of spirits is a government monopoly. The live-stock, in 1929, consisted of 398,737 cattle, 84,563 horses, 83,174 pigs and 8,177 mules. The second industry of importance is that of gold and silver mining on the Pacific slope. Gold and silver output, 1933, was valued at 42,285*l*. There are also deposits of quartz, alabaster, granite, oil, alum, slate, onyx, and mercury; and sulphur and copper also exist, but mining in the Republic is not very fully developed.

There were (1929) officially enumerated 6,532 factories and industries in the Republic, all small, including 144 cigar and cigarette factories, 308 cheese-making establishments, 151 hydraulic sawmills, 68 candle-making factories and many coffee-drying establishments, starch, broom and wood-work factories. The most important industries are shoes, soap, and candles. Electricity, derived from water power in the highlands, is widely used as motive power; it was nationalized in 1928. The first census taken of unemployed in 1933 showed 8,863.

Commerce.

The value of imports into and exports from Costa Rica in 5 years (including coin and bullion) was as follows (at par 10·45 colones = £1, and 1 colon = 46·5 cents, U.S., but from 1926 to 1932 it was stabilized at 25 cents, U.S.; average rate, 1933, was 19·17 to the £):—

—	1929	1930	1931	1932	1933
	Colones	Colones	Colones	Colones	Colones
Imports . . .	79,171,543	43,386,360	34,723,124	23,995,307	38,874,978
Exports . . .	72,671,543	65,333,000	57,116,888	37,535,817	48,571,775

The value of the chief imports for 1932 and exports for 1933 was as follows (19·17 colones = £):—

Chief Imports	1932	Exports	1933
	£		£
Cotton	163,257	Coffee	1,891,942
Iron and steel other than machinery	21,977	Bananas	470,323
Flour	97,100	Cacao	102,352
Mineral oil and derivatives	101,131	Gold and silver bullion	42,285
Motor cars and trucks	13,160	Timber	3,390
Silk goods	23,543	Fruit and vegetables	5,810
		Hides and skins	3,167

Of the import value in 1933, 47·7 per cent. was from the United States, 12·5 per cent. from Germany, 13·4 per cent. from the United Kingdom, 5·5 per cent. from Central and South America. Of the value exported in 1933, 43·8 per cent. went to the United Kingdom, 34·5 per cent. to the United States, 15·6 to Germany, and 2·2 per cent. to Latin America.

Total trade between the United Kingdom and Costa Rica (Board of Trade Returns) for 5 years:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Costa Rica into U.K.	2,796,234	2,384,834	1,321,840	1,293,735	1,268,831
Exports to Costa Rica from U.K.	162,341	135,021	138,730	161,321	182,886
Re-exports to Costa Rica from U.K.	4,905	4,036	4,254	3,103	1,997

Shipping and Communications.

No official figures are available as regards Costa Rican shipping. On the Atlantic coast there are several small sailing vessels and power launches, and on the Pacific coast some motor launches.

In 1932, there entered and cleared the ports of the Republic 502 ships of 1,459,389 tons.

The railway system connects San José with Limón, the Atlantic port, and has been extended to connect the capital with Puntarenas, the Pacific port. The length of railway is 413 miles—the Costa Rica Railway, 189 miles (main line and branches; San José to Limón, 103 miles); the Pacific Railway (state owned), 81 miles (San José to Puntarenas, 73 miles); the Northern Railway, 75 miles, and the United Fruit Co. Railway, 67 miles. When the railway system is completed, through rail communication will be established between Port Limón and the new port of Almirante in Panama. About 130 miles of motoring roads are now open.

In 1932 there were 211 post offices; air mail service between San José and Puntarenas, and with Central America and the United States was established in 1930.

There are about 3,000 miles of telegraph lines, with 205 telegraph offices. In 1932 there were about 2,560 telephones; the telephone lines had a length of about 1,387 miles. Wireless telegraphy is working from Limón to Bocas del Toro (Panama) 60 miles, and to Bluefields, in Nicaragua, and to Colon, in Republic of Panama. The Government has a large wireless station at San José, and a small one at Colorado (mouth of R. San Juan, near Nicaraguan border). There are 13 long-wave and 2 short-wave broadcasting stations.

Banking and Credit.

In October, 1914, the Banco Internacional de Costa Rica was established as a Government Bank of Issue. It was authorised (January, 1932) to issue up to 25,000,000 colones in notes to bearer (guaranteed by Government 6 per cent. Bonds, un-issued balance of Costa Rica Gold Refunding Bonds of 1911, and other Government securities). The Exchange Control Department, founded in November, 1922, was authorised to purchase and sell New York Bank drafts at a fixed rate of 400 per cent. (4 to 1), and to issue and to receive in exchange for such drafts its own notes. On May 31, 1933, the Department practically suspended operations with balances at New York bankers or in hand of 112,073 U.S. dollars gold. It was succeeded by the Exchange Control Board, created January, 1932; the average rate in 1933 was 4·29 colones = 1 dollar (U.S.), and 18·09 colones = £1. The total circulation of the country on August 31, 1934, was: Banco Internacional de Costa Rica, 22,816,000 colones; Exchange Control Department, 352,233 colones; silver certificates, 531,020 colones; silver coins, 962,693 colones; copper, 735,000 colones. Total, 25,396,946 colones.

The National Insurance Bank—a Government bank which has a monopoly of new insurance business—reported August 31, 1934, total insurance written amounting to 57,539,549 colones. The Mortgage Loan Bank is being liquidated by the Banco Internacional.

Money, Weights, and Measures.

On October 26, 1896, an Act was passed for the adoption of a gold standard, the monetary unit to be the gold *colon*, weighing 778 grammes, ·900 fine (value about 22·9*d.* at par or 46·5 cents, U.S.). The average exchange value of the colon in 1933 was 19·17 colons = £; 1 colon = 38·34 cents (U.S.). Gold coins have, however, disappeared from circulation. Silver coins are: 1 colon, 50 centimos, 25 centimos. There are copper coins of 10 centimos, 5 centimos, 1 centimo, and a nickel coin of 2 centimos.

The metric system is legally established and now in use; but in the country districts the following old Spanish weights and measures are found:—

The *Libra*	= 1·014 lbs. avoirdupois.
,, *Quintal*	= 101·40 ,,
,, *Arroba*	= 25·35 ,,
,, *Fanega*	= 11 bushels (imperial bushel).

On January 15, 1921, the Republic adopted as its standard time that of the meridian 90 degrees west of Greenwich.

Diplomatic and Consular Representatives.

1. Of Costa Rica in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary for Europe.—Vacant.
Consul-General.—José Vargas Porras.

There are Consular Representatives at Birmingham, Cardiff, Glasgow, Manchester, Southampton and Swansea.

2. Of Great Britain in Costa Rica.

Envoy Extraordinary and Minister Plenipotentiary and Consul-General.—Frederick Edward Fox Adams (who is also Minister at Panama, where he resides). Appointed June 16, 1934.
Consul.—F. N. Cox, M.B.E. (San José).

Statistical and other Books of Reference concerning Costa Rica.

CUBA.

Constitution and Government.

Cuba, except for a brief period of British occupancy in 1762–63, remained a Spanish possession from the date of its discovery by Columbus until December 10, 1898, when the sovereignty was relinquished under the terms of the Treaty of Paris which ended the armed intervention of the United States in the struggle of the Cubans against Spanish rule. Cuba thus became an independent State. A convention which assembled on November 5, 1900, drew up a constitution which was adopted February 21, 1901, under which the Island assumed a republican form of government, with a President, Vice-President, a Senate and a House of Representatives. A law (the Platt Amendment) was passed by the U.S. Congress authorising the return of their government to the Cuban people upon the undertaking that they should conclude no treaty with a foreign power that would endanger the independence of Cuba, that no debts should be contracted for which the current revenue would not suffice, that the United States should have certain rights of intervention, and be granted the use of Naval Stations. On June 12, 1901, these conditions were accepted, and remained in force until the U.S. Congress repealed the Platt Amendment in May, 1934. On February 24, 1902, the election of the President and Vice-President took place, and the control of the Island was formally transferred to the national government on May 20. The coaling station of Guantanamo Bay was leased to the United States for 2,000 dollars annually, on July 2, 1903. A reciprocal commercial treaty, December 27, 1903, strengthening the ties between Cuba and the United States, was renewed in a modified form in 1934. After political disturbances, an American Commission formed a provisional government in August, 1906, which was continued until January 28, 1909, when the national government was resumed after the institution of electoral reforms. A constitutional convention was convened March, 1928, and approved various changes in the constitution including a proposal to increase the President's term to 6 years without right of re-election. These changes came into effect on May 11, 1928, and, among other things, conferred upon women over 21 years of age the right to vote. A military *pronunciamento* on August 11, 1933, led to the

resignation and flight of President Machado on August 12, and the seizure of power by the Opposition parties, which named as Provisional President Dr. Carlos Manuel de Céspedes; the Constitutions of 1901 and 1928 were declared null, and Congress dissolved. On September 5 Dr. Céspedes was forced to resign and Dr. Ramon Grau San Martin was named by the Junta of Five to succeed him. He resigned on January 15, 1934, and was eventually succeeded by Colonel Carlos Mendieta, whose government was recognized by Great Britain, the United States and the other powers.

Provisional President.—Colonel Carlos *Mendieta.* Appointed January 18, 1934, to serve until a National Convention has been elected and has met.

The President has a Cabinet consisting of the Secretaries of State, of Justice, of War and Marine, of the Interior, of Finance, of Agriculture, of Commerce, of Labour, of Education, of Public Works, Sanitation and Charity, and of Telegraph and Posts.

The Constitution, or 'Ley Constitucional,' was drafted by President Mendieta and his Cabinet and proclaimed on February 3, 1934. It has been amended by executive order many times. Under it the provincial and municipal councils have been suppressed, and the Governors and Alcades (Mayors) are appointed by the President. The country is divided into six provinces and 119 municipalities.

Area and Population.

Cuba has an area of 44,164 square miles (41,634 square miles for the island of Cuba, 1,180 square miles for the Isle of Pines, and 1,350 square miles for the other islands), with an estimated population, on June 30, 1933, of 4,011,088. About 68 per cent. are white. The area, population, and density of population of each of the six provinces, on that date, were as follows:—

Province	Area	Population (June 30, 1933)	Pop. per sq. mile
	Square miles		
Havana	3,170	992,397	313·0
Pinar del Rio	5,206	347,664	66·7
Matanzas	3,256	344,020	105·6
Santa Clara	8,257	827 312	100·1
Camagüey	10,064	414,074	40·9
Oriente	14,211	1,085,621	76·3
Total	44,164	4,011,088	90·8

The language is Spanish, though English is widely understood.

The chief towns (with population, 1933) are Havana, 543,600; Cienfuegos, 87,970; Camagüey, 131,583; Santiago de Cuba, 103,497; Guantánamo, 66,059; Santa Clara, 97,181; Manzanillo, 63,211; Pinar del Río, 63,213; Sancti Spiritus, 86,495; Trinidad, 62,370; Cárdenas, 41,070.

Marriages in 1933, 10,760; births, 66,922; deaths, 48,628.

Justice and Religion.

There is a Supreme Court in Havana and a Court of Appeal in each of the Provinces. The Provinces are divided into judicial districts, with courts for civil and criminal actions, with municipal courts for minor offences. The Civil Code guarantees aliens the same property and personal rights as are enjoyed by natives. There is no State Church, though Roman Catholics predominate.

Education.

Education is compulsory and free. In the year ending June 30, 1932, the 3,816 public schools had 7,573 teachers, and 434,279 children. There were also 67 travelling teachers who taught, in 145 communities, 3,089 children; 94 night schools for working people with 7,393 pupils. There were also 364 private schools with 1,483 teachers and 26,622 pupils. In each province the Government maintains a special Institute for advanced education, and normal schools for training teachers. Near Havana there is a special school with a staff drawn from English public schools, on which the school is modelled. University instruction is given at the University of Havana (founded on September 12, 1721). In 1929–30, it had 4,795 students, of whom 2,303 were studying medicine; it was closed in 1931, on account of political disorder.

Finance.

Revenue and expenditure (budget estimates) for 5 years:—

	1930-31	1931-32	1932-33	1933-34	1934-35
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue . .	76,790,000	60,381,494	51,850,000	44,142,000	56,200,000
Expenditure . .	76,777,530	60,381,494	51,848,421	41,915,592	55,394,704

The principal items of income anticipated in the budget for 1934–35 were:—Customs Revenue, 18,560,400 dollars; land duties, 21,913,500 dollars; National Lottery, 1,200,000 dollars; posts and telegraphs, 1,500,000 dollars. The principal items of expenditure were: Debt interest, 2,506,008 dollars (external) and 639,940 dollars (internal); War and Marine, 12,201,182 dollars; Instruction, 10,105,631 dollars; public works, 2,195,606 dollars.

The debt of the Republic of Cuba on December 31, 1933, amounted to:—Foreign debt, 159,880,478 dollars, and internal debt, 7,766,500 dollars. On April 10, 1934, payments toward the redemption of the external debt were suspended until such time as the Government revenues reach 60,000,000 pesos. On June 10, 1934, a Government commission pronounced 'invalid' certain loans for public works totalling 60,000,000 dollars which had been floated by the Machado régime, principally in New York and Chicago.

Defence.

The army is composed of 860 officers and 13,000 men, organized in 6 cavalry regiments, 4 infantry battalions and 3 batteries with auxiliary services. The navy consists of 2 cruisers (*Cuba* and *Patria*), 5 gunboats, an armed transport, and about a dozen coastguard vessels of small size. The strength of the navy is 1,000 men, 150 officers and 25 cadets. The air force consists of 116 men. Unofficial estimates place the personnel of the Army, Navy and police at 200,000 men.

Production and Industry.

The staple products of Cuba are tobacco and sugar, but coffee, cocoa, cereals, and potatoes are grown, and a considerable trade is done in fruits and minerals. Cuba is the second largest producer of sugar in the world. In 1933 there were 125 sugar mills. The sugar crop was in 1930–31, 3,120,796 tons; in 1931–32, 2,593,361 tons; and in 1932–33, 2,588,850 tons. Exports in 1932 (raw and refined), 2,608,470 tons; in 1933, 2,292,114 tons. By the 'Chadbourne Agreement' of December 8, 1930, Cuba agreed to segregate its surplus stocks of 1,434,076 tons and to market for five years no more than 3,400,000 tons annually, plus 20 per cent. of its surplus. Production of raw sugar in recent crop years has

been limited by presidential decree; for 1935, to 2,315,000 tons. The production of molasses in 1932–33 amounted to 112,448,133 gallons; exports, chiefly to the United States, 130,112,450 gallons. Tobacco production in 1933, 36,350,032 lbs.; exports in 1933:—cigars, 37,452,000; cigarettes, 30,792,000; leaf tobacco, 26,890,480 lbs. Total value of all tobacco exports in 1933, 13,395,306 dollars; in 1932, 12,926,270 dollars. Tobacco is grown principally in the famous Vuelta-Abajo district, near Pinar del Rio. Coffee production, chiefly from the Province of Oriente, is reviving; output, 1933, 51,480,100 lbs.; exports, 1933, 7,069,856 lbs. The principal fruits exported are pineapples, bananas, citrus fruit, and coconuts. Output of sponges, 1933, 243,992 dozen.

In 1933, the live stock in the island included 4,316,862 head of cattle, 585,739 horses, 77,990 mules, 102,000 sheep and 591,000 pigs.

Cuba has forest lands, many of which are in private ownership; State forests total about 1,250,000 acres. These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins, and oils. Cedar is used locally for cigar-boxes, and mahogany is exported; hard woods are used for railway sleepers, carts, ploughs and other local purposes.

Iron ore abounds; total exports 1932, 35,601 tons. Copper (21,607 short tons produced in 1932), manganese (exports, 9,177 tons in 1932) and gold are also worked. Cuba has had for years a small output of petroleum, around 11,000 barrels. Six salt deposits yield about 50,000 tons annually.

Commerce.

The value of the imports and exports (including bullion and specie) for 5 years were as follows (the Cuban peso = the U.S. dollar):—

—	1929	1930	1931	1932	1933
	Dollars	Dollars	Dollars	Dollars	Dollars
Imports . .	216,215,113	162,452,268	80,111,592	52,712,259	42,365,520
Exports . .	241,622,760	167,410,669	118,865,553	82,712,015	84,390,541

The imports and exports were distributed as follows:—

Countries	Imports from		Exports to	
	1932	1933	1932	1933
	Dollars	Dollars	Dollars	Dollars
United States	27,653,060	22,674,245	57,482,050	57,112,095
Other American countries .	3,657,879	2,608,186	3,389,013	2,109,617
Germany	2,133,882	1,897,926	657,048	818,220
Spain	2,979,092	2,612,861	1,487,780	2,180,575
France	1,688,000	1,250,919	2,040,000	3,398,320
United Kingdom . . .	2,985,260	2,428,339	12,444,418	16,325,905
Other European countries .	5,313,049	2,769,197	4,052,693	1,166,603
All other countries . . .	6,302,037	6,119,347	1,159,013	1,279,206
Total . . .	52,712,259	42,365,520	82,712,015	84,390,541

The principal exports are sugar (in value about 70 per cent. of total exports) and tobacco; the principal imports foodstuffs, earths and ceramic products, machinery, metals and metal manufactures, and chemicals.

In 1933, the United Kingdom imported from Cuba 3,644,270*l.* worth of sugar, and 565,565*l.* worth of cigars; and exported to Cuba 101,802*l.* worth of cotton piece goods, and 54,327*l.* worth of coal.

Total trade between Cuba and the United Kingdom (Board of Trade returns) for five years:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Cuba into U.K.	6,872,033	4,292,075	5,384,373	4,279,608	3,787,587
Exports to Cuba from U.K.	1,232,796	655,821	700,873	596,374	918,735
Re-exports to Cuba from U.K.	31,883	18,525	22,994	7,704	9,920

Shipping and Communications.

In 1933, 6,209 vessels of 32,603,429 gross tons entered and cleared the ports of the Republic in the foreign trade. In the coastwise trade (1933) 10,177 vessels of 4,320,155 gross tons entered and cleared.

In Cuba there were in 1933, 3,043 miles of railway—the United Railways of Havana, 1,393 miles and the Cuba Railway, 785 miles, being the greatest systems. The lines now connect the principal towns and seaports from Pinar del Rio in the west, to Santiaga de Cuba in the east. The larger sugar estates have extensive private lines connecting them with the main lines.

There were 1,990 miles of Government highways open to traffic in 1930, of which 846 miles are first-class. The new and impressive Central Highway, traversing the island for 706 miles from Pinar del Rio to Santiago and costing 101,123,000 dollars, was opened February 24, 1931. There are (1933) 588 post, 345 telegraph offices, and 150 radio and radio-telegraph stations; there are 12 wireless stations operated by the Government. There are 10,939 miles of telegraph wires. Cuba has 52 long-wave and 2 short-wave broadcasting stations. The telephone system (1932) had 32,769 instruments and 273,985 miles of wire. Direct telephone connection with American and European cities has been maintained since 1921. Air mail service between Cuba and Mexico, and between Cuba and New York, was established in 1930; air service between domestic points is highly developed.

Currency and Banking.

By the law of November 7, 1914, the monetary unit was a gold peso (equal to the U.S. gold dollar) of 1·6718 grammes (1·5046 grammes fine) as the monetary unit. On May 22, 1934, the peso (following the devaluation of the dollar to 59·06 per cent. of its former value) was reduced to 0·9873 gramme of gold (0·8886 gramme fine). The gold coins are the 20, 10, 5, 4, 2 and 1 peso pieces; the 20, 10 and 5 pesos pieces are of the same weight and value as the corresponding United States gold coins. Silver is coined in pieces of 1 peso, 40 cents, 20 cents, and 10 cents, while nickel coins of 5, 2, and 1 cent pieces are also issued.

The coinage of gold is unlimited; the law limiting the coinage of silver to a maximum of 12,000,000 pesos was repealed in March, 1934.

The old gold pesos and U.S. gold coins are no longer legal tender, but may only be sold to the Government at the rate of 35 silver pesos per oz. troy. Ten million silver pesos were minted in 1935 to serve as backing to silver certificates of the same amount to be issued in denominations of 1, 5, 10, 20 and 50 pesos.

Banking is largely in the hands of the Royal Bank of Canada, the National City Bank of New York, the Chase National Bank of New York, the Bank of Nova Scotia, and the Banco del Comercio. Total number of banks and branches is 169.

The metric system of weights and measures is in use.

Diplomatic and Consular Representatives.

1. Of Cuba in Great Britain.

Envoy and Minister.—(Vacant.)
Counsellor.—Dr. G. S. Solar.
Secretaries.—Dr. Robert G. González and Dr. J. Meyer.
Commercial Attaché.—Luis M. Perez.
Consul (in London).—Raoul Aeulle.

There is a Consul-General in Liverpool, and Consuls in London, Birmingham, Glasgow, Hull, Belfast, Cardiff, and other towns.

2. Of Great Britain in Cuba.

Envoy and Minister.—Thomas Maitland Snow, C.M.G. (Appointed March 15, 1935.)
Naval Attaché.—Captain A. R. Dewar, R.N.
Military Attaché.—Brevet Lt.-Col. W. W. T. Torr, D.S.O., M.C.
Consul-General.—T. I. Rees.

There are Vice-Consuls at Cienfuegos, Havana and Santiago de Cuba.

CZECHOSLOVAKIA.

(ČESKOSLOVENSKÁ REPUBLIKA.)

THE term Czechoslovaks comprises two branches of the same Slav nation: the Czechs (pronounced Tchechs) of Bohemia, Moravia, and Silesia, and the Slovaks of Slovakia.

The Czechoslovak State came into existence on October 28, 1918. On that day the *Národní Výbor* (National Council) took over the government of the Czechoslovak countries, including Bohemia, Moravia, Silesia, and Slovakia, which had hitherto belonged to the former Austro-Hungarian Monarchy. On November 14, 1918, the Czechoslovak National Assembly met in Prague, and formally declared the Czechoslovak State to be a Republic, with Professor T. G. Masaryk as its first President.

By the Treaty of Peace of September 10, 1919 (the Treaty of St. Germain), the Allied and Associated Powers formally recognized the Czecho-Slovak Republic, declaring that 'the peoples of Bohemia, of Moravia, and of part of Silesia, as well as the peoples of Slovakia, have decided of their own free will to unite . . . for the purpose of forming a single sovereign independent state under the title of the Czecho-Slovak Republic.' For the sake of brevity the Czecho-Slovak Republic is designated Czechoslovakia.

Constitution and Government.—The Constitution of the Czecho-slovak Republic was passed by the National Assembly on February 29, 1920.

According to the terms of the Constitution, the Czechoslovak State is a democratic Republic having an elected President at its head. The territory of the Republic forms a single and indivisible unity. The National Parliament, which constitutes the only legislative body for the whole of the Republic, is composed of a Chamber of Deputies elected for a period of six years and containing 300 members, and of a Senate comprising 150 members to be renewed every eight years. The two Chambers in joint congress elect the President of the Republic for seven years. The President, as head of the State, is supreme commander of the armed forces, and can declare war with the consent of Parliament. He appoints the higher officers and officials, exercises the right of reprieve, and is himself amenable to the laws only on a charge of high treason. He also appoints and recalls Ministers. The Constitution guarantees freedom of the Press and of speech, and safeguards racial minorities, to whom it assures the maintenance of their schools. Privileges derived from sex, birth or calling are not recognised. Marriage, the family and motherhood are placed under the special protection of the law. All these guarantees and rights are protected by the Supreme Administrative Court, which sees to the legality of the public administration.

In principle the two Chambers are equal in so far that they both enjoy the right of initiative, and that even Government Bills may be first introduced in either house. Only in the case of the Budget and Army Bills must the measures first pass through the Chamber of Deputies. It is also the Chamber of Deputies alone that by a vote of non-confidence can compel the resignation of the Government. A measure passed by the Chamber of Deputies becomes law, despite an adverse decision of the Senate, if the Chamber of Deputies adheres to its first decision by an absolute majority of all its members.

The franchise for the Chamber of Deputies is open to all citizens, without distinction of sex, who are over 21, while all citizens over 30 are eligible for election. The franchise for the Senate is open to all citizens who are over 26; and all citizens over 45 are eligible for election. The electoral system is based on proportional representation.

The Constitution regulates the parliamentary elections on a 'closed scrutiny' basis, the votes being in favour of parties, not of candidates. The allocation of electoral areas is as follows:—Bohemia, 9 (for Chamber of Deputies), 5 (for Senate); Moravia and Silesia, 6 and 3; Slovakia, 7 and 4; Carpathian Ruthenia, 1 and 1.

At the elections held on October 31, 1929, the political parties were returned as follows:—

Senate (150 members):—Czechoslovak Coalition, 88 (Agrarians, 24; Clericals, 13; Social Democrats, 20; Czechoslovak Socialists, 16; National Democrats, 8; Middle Class Party, 6; League for Election Reform, 1); Slovakian Clericals, 9; German Social Democrats, 11; German Christian Socialists, 8; German National Socialists, 4; German Agrarian and Middle Class Parties, 9; Hungarian Christian Socialist, 6; Communists, 15.

Chamber of Deputies (300 members) at the elections held on October 31, 1929, is as follows:—Czech Agrarian, 46; Czech Socialist Democrats, 39; Czech National Socialists, 32; Communists, 30; Czech Clericals, 25; German Social Democrats, 21; Slovak Clericals, 19; German Agrarian and Middle Class Parties, 16; Czech National Democrats, 15; German Christian Socialists, 14; Czech Small Traders, 12; Hungarian Christian Socialists, 9; German National Socialists, 8; German Nationals, 7; Poles and Jews, 4; League for Election Reform, 3.

President.—Thomas Garrigue *Masaryk* (born in 1850 in Hodonín, in Moravia). Elected May 28, 1920; re-elected (for the fourth time) May 24, 1934, for a period of 7 years.

According to the Constitution, no one may be elected for more than two successive terms, but an exception has been made in the case of President Masaryk.

The Czechoslovak Government, appointed on October 30, 1932, and reorganized on February 14, 1934, consists of the following Ministers:—

Prime Minister.—J. *Malypetr* (Czech Agrarian).
Minister of Foreign Affairs.—Dr. Edvard *Beneš* (Czech National Socialist).
Minister of National Defence.—Bohumil *Bradáč* (Czech Agrarian).
Minister of Finance.—Karel *Trapl* (Non-parliamentarian).
Minister of the Interior.—Dr. Joseph *Černý* (Non-parliamentarian).
Minister of Health.—Dr. Franz *Spina* (German Agrarian).
Minister of Railways.—Rudolf *Bechyně* (Czech Social Democrat).
Minister of Social Welfare.—Dr. Ludwig *Czech* (German Social Democrat).
Minister of Education.—Dr. John *Krcmar*.
Minister of Agriculture.—M. *Hodža* (Czech Agrarian).
Minister of Justice.—Dr. Ivan *Dérer* (Czech Social Democrat).
Minister of Posts and Telegraphs.—Dr. Emil *Franke* (Czech National Socialists).
Minister of Commerce.—Jan *Dostálek* (Czech Clerical).
Minister for the Unification of Laws.—Dr. Jan *Šrámek* (Czech Clerical).

Area and Population.—The Czechoslovak Republic consists of Bohemia, Moravia and Silesia, Slovakia, and Ruthenia (Sub-Carpathian Russia). Its frontiers have been defined by the Peace Treaties with Germany, Austria, and Hungary. The area and population of the various provinces, according to the census of 1921, and the census of December 1, 1930, are as follows:—

—	Area in square kilometres	Area in English sq. miles	Population Feb. 15, 1921	Population per square mile, 1921	Census Dec. 1, 1930	Population per square mile, 1930
Bohemia .	52,062	20,101	6,670,582	331·8	7,109,376	353·7
Moravia & Silesia	26,808	10,351	3,335,152	322·2	3,565,010	344·5
Slovakia .	49,006	18,921	3,000,870	158·8	3,329,793	176·2
Ruthenia .	12,617	4,871	606,568	124·4	725,357	148·8
Total .	140,493	54,244	13,613,172	251·1	14,729,536	271·6

Of the Czechoslovak citizens 9,688,770 are Czechoslovaks, 3,231,688 Germans, 691,923 Hungarians, 549,169 Russians, 81,737 Poles, 186,642 of Jewish nationality, and 49,636 others. There were besides 249,971 aliens.

The population of the principal towns with more than 20,000 inhabitants at December 1, 1930 (preliminary census figures), was :—

Prague	848,081	Chomutov (Komotau)	33,266	Aš (Asch) . . .	22,943
Brno	263,646	Cheb (Eger) . . .	31,549	Varnsdorf . . .	22,793
Ostrava, Moravská .	125,347	Jihlava	31,031	Podmokly (Bodenbach)	22,648
Bratislava	123,852	Teplice-Šanov (Teplitz-Schönau) . .	30,911	Přerov	22,362
Plzeň	114,150	Pardubice	28,841	Karvinná	22,330
Košice	70,232	Most	28,211	Ostrava Slezská .	22,239
Olomouc	65,989	Užhorod	26,669	Zámky Nové . . .	22,141
Rudějovice České .	43,886	Mukačevo	26,123	Prešov	21,870
Ústí n/L (Aussig) .	43,802	Znojmo	25,832	Zlín	21,584
Liberec (Reichenberg)	38,525	Vary Karlovy Karlsbad)	24,029	Nitra	21,259
Opava	36,083	Trnava	23,971	Komárno	21,187
Jablonec n/N (Gablonz a.d. Neisse) .	33,855	Krnov (Jägerndorf) .	23,465	Kladno	20,671
Prostějov	33,487				

Movement of population is shown as follows for 3 years.

Year	Births	Marriages	Divorces	Deaths	Surplus of births over deaths
1931	318,452	129,909	5,082	212,301	106,151
1932	312,643	127,977	5,002	210,403	102,240
1933	287,454	124,264	—	205,077	82,377

Religion.—The majority of the population is Catholic. In 1930 the division of the population according to religion was :—Roman Catholics, 10,831,696 ; Greek and Armenian Catholics, 585,041; Protestants, 1,129,758; Orthodox, 145,598 ; Jews, 356,830 ; Old Catholics, 22,712 ; other faiths, 9,878 ; and without any religion, 854,638.

In January, 1920, the reformed clergy of Czechoslovakia decided to withdraw from the jurisdiction of the Pope and to found a Czechoslovak Church, which had, according to the Census of 1930, 793,385 adherents.

Education.—Instruction is compulsory between the age of 6 and 14. The schools may be divided as follows : (1) National Schools (Elementary and Advanced Public Schools) ; (2) Secondary Latin and Technical Schools (Gymnasia and Real-Schools) ; (3) Universities and Higher Technical Schools ; and (4) Trade and Arts, Commercial, Mining and Agricultural, and other special schools. There are practically no illiterates except in Slovakia.

The following table contains the data for elementary and advanced schools (public and private) in Czechoslovakia as at October 31, 1933.

	Elementary Schools (public and private)			Higher Grade Schools (public and private)		
	No. of Schools	No. of Pupils (boys)	No. of Pupils (girls)	No. of Schools	No. of Pupils (boys)	No. of Pupils (girls)
Bohemia .	6,702	362,309	368,196	1,095	123,368	110,854
Moravia & Silesia	3,628	212,999	218,257	631	64,246	55,404
Slovakia	4,160	281,023	279,221	167	28,863	26,283
Ruthenia .	746	66,666	64,405	18	4,427	4,370
Total .	15,236	922,997	930,079	1,911	220,904	196,911

Of the 15,236 elementary schools, 10,385 (68·2 per cent.) were Czechoslovak; 3,298 (21·6 per cent.) German; 548 (3·6 per cent.) Ruthenian; 806 (5·3 per cent.) Magyar; 91 (0·6 per cent.) Polish, and 108 (0·7 per cent.) other and miscellaneous schools. Of the 1,911 higher-grade schools, 1,409 (73·8 per cent.) were Czechoslovak; 445 (23·3 per cent.) German; 4 (0·2 per cent.) Ruthenian; 11 (0·6 per cent.) Magyar; 11 (0·6 per cent.) Polish, and 31 (1·5 per cent.) miscellaneous schools. There were 3 foreign national (elementary) schools with 371 pupils, including 1 Russian school with 79 pupils, 1 French with 209 pupils, and 1 English with 83 pupils.

During the school-year 1932–33 there were in Czechoslovakia 349 secondary Latin and technical schools (gymnasia and real-schools) with 117,319 pupils. Of these 244 were Czech or Slovak, 90 German, 6 Magyar, 8 Ruthenian, and 1 Polish. There were 5 foreign Latin and technical schools (gymnasia and real-schools) with 769 students, including 2 Russian with 343 pupils, 1 Ukrainian with 99 pupils, 1 French with 215 pupils, and 1 English with 112 pupils. The public, or state-aided, schools of commerce numbered, during the school-year 1932–33, 201, with 30,459 pupils.

There are 4 universities in Czechoslovakia, and 4 technical high schools with students as follows (winter term 1932–33):—

Universities	Number of Students		Technical High Schools	Number of Students	
	Total	Females		Total	Females
Prague, Czech (1348)	10,681	2,099	Prague, Czech .	5,207	196
Prague, German	5,286	758	Prague, German	1,893	65
Brno, Czech (1918)	3,144	523	Brno, Czech . .	1,627	19
Bratislava, Slovak (1919)	2,395	322	Brno, German .	1,646	48
	21,506	3,702		10,373	328

There are, moreover, 2 faculties not comprised in the University Association (in Prague and Olomouc); a Ukrainian University at Prague; and a Ukrainian agricultural academy in Poděbrady; a higher veterinary academy (429 students); a mining academy (174 students); a higher agricultural college (279 students); an academy of arts (180 students); and a high commercial school (in Prague).

Justice.—The courts of the Republic are :—The Supreme Court of Justice and Court of Cassation sitting in Brno; 4 High Courts of Justice (Prague, Brno, Bratislava, Košice); 39 County Courts (besides the Commercial Court and the Penal Tribunal in Prague); and 419 District Courts.

There are also special courts for commercial, industrial, revenue and other matters.

A special Administrative High Court decides matters in dispute affecting the administration, *e.g.*, appeals against illegal decisions and regulations made by State authorities ; in cases of conflict between the central State authorities and the organs of the provincial local government ; in cases of claims made against the State or the local administration which have been vetoed by the administrative authorities.

Finance.—Budget estimates for five years in thousands of crowns :—

	1931	1932	1933	1934	1935
	1000 crowns	1000 crowns	1000 crowns	1000 crowns	1000 crowns
Revenue . .	9,843,827	9,323,376	8,634,170	7,631,840	7,985,256
Expenditure .	9,838,525	9,318,708	8,632,538	7,630,666	7,983,298

The following are some of the details of the budget for 1934 :—

Revenue	Millions of Crowns	Expenditure	Millions of Crowns
Finance	6,998	Foreign Affairs . .	122
Public Works . . .	127	National Defence . .	1,227
Pensions	140	Interior	657
Health	35	Justice	286
Education	32	Education . . .	925
Railways	21	Agriculture . . .	182
Posts and Telegraphs . .	11	Social Services . .	748
		Finance	1,996
		Pensions	890
		Public Works . . .	439
Total (including all other items)	7,632	Total (including all other items)	7,681

According to the budget for 1934, the national debt is as follows (in million crowns) :—

	Million Crowns
Internal debt	28,684
Foreign debt	7,453
Note-Debt	2,600
Total	38,737

A Board of Audit and Control was constituted by an enactment of March 20, 1919. It is charged with the superintendence of State economy, the State property and the national debt. This Board has an equal standing with the Ministries and is independent of them. Its president is nominated, at the request of the Government, by the President of the Republic.

Defence.—Service in the army is regulated by the law of March 19, 1920. Liability to service lasts from the ages of 17 to 60, but begins normally at the age of 20. Service in the active army is for 2 years, after which the soldier passes to the first reserve until he attains the age of 40, when he passes to the second reserve, where he remains until 50. By the law of April 8, 1927, the peace strength of the army, beginning with October 1, 1927, has been fixed permanently as follows : for the period

from October 1 up to March 31 at 140,000, and for the period from April 1 up to August 30 at 100,000, military persons. By the law of April 8, 1927, as from October 1, 1928, there must be elected from the recruits fit for military service a number of 70,000, with due regard to the probable decrease and increase during the first months after entering the active service. The average strength of the army in 1934 was 10,059 officers and 111,915 other ranks, with 12,262 gendarmerie. The air force numbered 6,482 all ranks, with 546 aeroplanes. The army is organised in 4 military commands, comprising 12 infantry divisions of 24 brigades, 2 mountain infantry brigades, 3 cavalry brigades, 13 light artillery brigades and administrative services.

In the 1934 budget, 1,227 million crowns were allocated for the army.

There is a small defensive force consisting of the 200-ton patrol vessel *President Masaryk* and 22 armed motor launches and tugs for river service.

Production and Industry.—The Czechoslovak territory is one of the richest in Europe, both as regards natural resources and industrial development. Agriculture is highly developed and intensive farming is carried on. About 40 per cent. of the population are engaged in agriculture and forestry.

For the years 1932 and 1933, the area and the yield of the crops were as follows :—

Crops	Area (in acres)		Yield (in metric tons)	
	1932	1933	1932	1933
Wheat	2,064,391	2,270,575	1,462,486	1,983,911
Rye	2,568,993	2,583,821	2,175,888	2,085,537
Barley	1,758,657	1,638,918	1,504,900	13,505,402
Oats	2,019,669	1,976,274	1,663,828	1,577,130
Potatoes	1,807,377	1,819,392	9,276,322	8,202,110
Sugar-beet	360,002	357,964	3,961,423	2,913,502
Maize	331,248	316,286	309,283	1,528,634

In 1932–33, there were 126 sugar factories in the country, which produced 637,112 metric tons of sugar. Hops of excellent quality are also grown, both for export and beer production (Pilsener). In 1933, Czechoslovakia produced 5,858 metric tons of hops. The agricultural industries include also flourishing beer, spirit, malt and foodstuffs industries. In 1933, the Republic had 421 breweries producing 7,951,514 hectolitres of beer. In 1932–33, there were 924 distilleries with an output of 957,607 hectolitres of spirits.

On January 1, 1934, the number of live-stock was: Cattle, 4,404,796 (including cows, 2,516,905); horses, 700,658; pigs, 3,429,919; sheep, 475,881, and goats, 929,631.

In 1933, the fruit crop yielded 1,708,269 tons of apples, 1,297,936 tons of pears, and 1,558,802 tons of stone fruit.

Czechoslovakia ranks among the most richly wooded countries in Europe. The forests comprise 33 per cent. of the whole area (about 11,346,734 acres).

The mineral production of the Czechoslovak Republic comprises both soft and hard coal (chief coalfields Most, Chomutov, Teplice, Moravska Ostrava, and Falknov), iron, graphite, and garnets, silver (in Bohemia), copper and lead (in Slovakia), and rock-salt (in Eastern Slovakia and Ruthenia).

Coal production in 1933, 15,063,095 tons of lignite and 10,531,993 tons of hard coal. In 1933, there were 265 coal mines, employing 78,450 persons. The output of pig-iron in 1933 was 498,980 metric tons; raw steel, 748,914 metric tons.

The number of factories in 1932 was 11,822. Of these, 1,822 were textile mills, 2,244 glass works and stone factories, 1,832 for food production, 1,396 for furniture and bent wood manufacture, 966 machine factories, 934 for metal manufacture, 386 paper mills, 631 chemical factories.

Commerce.—Imports and exports for 5 years are shown as follows (in thousands of crowns):—

	1930	1931	1932	1933	1934
Imports . . .	15,714,503	11,800,535	8,157,914	6,124,668	6,406,276
Exports . . .	14,473,732	13,149,393	7,391,890	5,922,412	7,296,275

Principal articles of import and export in 1933 and 1934:—

Imports	1933	1934	Exports	1933	1934
	1,000 Crowns	1,000 Crowns		1,000 Crowns	1,000 Crowns
Cereals . . .	392,205	244,423	Woollen Goods	421,051	539,509
Cottons . . .	559,478	679,265	Cottons. . .	590,933	603,321

Chemicals . .	187,344	—			

Imports and exports 1932 and 1933 were distributed among the principal countries as follows:—

Country of Origin or Destination	Imports		Exports	
	1932	1933	1932	1933
	1,000 Crowns	1,000 Crowns	1,000 Crowns	1,000 Crowns
Austria	453,376	298,645	1,031,197	720,330
Belgium	120,858	122,293	182,169	147,605
France	319,632	381,393	358,929	323,666
Germany	1,972,873	1,209,158	1,198,474	1,170,743
Great Britain . . .	338,786	280,127	406,464	359,789
Holland	179,626	187,350	294,980	266,232
Hungary	120,784	166,959	202,055	190,145
Italy	253,229	236,263	198,709	163,368
Poland	374,472	189,983	180,445	157,333
Rumania	334,481	176,642	301,589	221,465
Switzerland . . .	217,766	179,096	308,908	269,794
United States of America .	927,016	464,125	505,575	428,034
Yugoslavia	388,715	230,868	404,106	197,157
Other Countries . . .	2,156,270	2,002,264	1,823,340	1,306,862
Total . . .	8,157,914	6,125,196	7,391,890	5,923,023

The chief imports into the United Kingdom from Czechoslovakia in 1933 were, according to the Board of Trade returns: sugar, refined, 111,010*l.*; hats and caps, 234,123*l.*; fancy goods, 297,626*l.*; boots and shoes, 154,256*l.*; glass, 542,407*l.* The chief exports from the United Kingdom to Czechoslovakia in 1933 were cotton yarns, 137,725*l.*; woollen goods, 137,873*l.*

Total trade between the United Kingdom and Czechoslovakia for 5 years (according to Board of Trade returns) :—

	1930	1931	1932	1933	1934
Imports from Czechoslovakia into U.K.	£ 6,402,617	£ 6,619,588	£ 3,041,121	£ 2,894,623	£ 3,676,086
Exports to Czechoslovakia from U.K.	1,730,693	1,337,433	961,919	860,179	1,246,868
Re-exports to Czechoslovakia from U.K.	115,508	127,030	117,086	150,881	240,033

Communications.—On December 31, 1932, there were 13,917 kilometres or 8,649 miles of railway in the Republic, of which 7,079 miles are owned by the State, 1,458 miles privately owned, 46 miles owned by foreign States, and 66 miles owned by foreign railways. Of the State railways 1,067 miles are double-tracked, and of the privately owned lines 67 miles.

In 1932, the total number of passengers carried on all Czechoslovak railways was 265,800,800 ; on the State railways, 215,176,862. Total quantity of freight, 62,639,438 tons ; on State railways only, 50,065,586 tons ; the earnings of all railways amounted to 3,792,674,429 crowns, of that on State railways, 3,490,352,901 crowns. Total expenses, 4,490,741,614 crowns, of which on State railways, 4,043,030,886 crowns.

In 1933, there were nearly 43,420 miles of road in the Republic, of which 5,410 miles are maintained by the State, 4,136 by the provinces, the remainder being interregional roads, for the upkeep of which the district authorities are responsible.

The Peace Treaty vested the Czechoslovak State with the right to use certain wharves in the ports of Hamburg and Stettin, and a strip of land on the River Elbe was, in Nov. 1929, leased to the Czechoslovakian Government for 99 years. Of the waterways of the country, the Danube is the most important ; its chief port is Bratislava (Pressburg). On the Labe (Elbe) the two main ports are Ústí, n/L (Aussig) and Děčín (Teschen). On the Vltava and Elbe in 1933, 625,150 tons were loaded to be transported abroad, and 646,362 tons were unloaded from abroad. The inland traffic amounted to 477,540 tons. By way of the Danube 145,710 tons were loaded to be transported abroad, and 369,542 tons were unloaded from abroad. The inland traffic amounted to 46,504 tons.

In 1933 there were 14 air routes operating in the international service, and 8 in the national service. The former connect Prague with Paris, Warsaw, Constantinople, Vienna and Berlin.

In 1933, there were 4,588 post offices and 4,055 telegraph offices, and 81,807 miles of telegraph wire ; 9,946,303 telegrams were despatched and received. Number of letters handled, 940,368,400. In 1933, there were 144,799 telephone stations and 565,231 miles of telephone wire.

Banking and Currency.—In 1932 there were 22 joint-stock banks in Bohemia, Moravia, and Silesia with a total paid-up share capital of 1,284,200,000 crowns and with reserve funds of 1,169,100,000 crowns ; 6 Land-banks issuing their own bonds, which at the beginning of 1932 amounted to 5,333,859,000 crowns. In 1932, there were 72 small joint-stock banks in Slovakia and Podkarpatská Rus with a share capital of 291,604,000 crowns and reserve funds of 201,434,000 crowns. In 1932, there were 366 savings banks with 21,904,634,000 crowns of deposits. In 1932, there were in Bohemia, Moravia and Silesia 4,384 Reiffeisen banks with deposits amounting to 5,196,886,000 crowns. On December 31, 1932,

the deposits in the Czechoslovak banks amounted to 55,658,100,000 crowns.

The monetary unit is the *Koruna* or Crown of 100 *haleru* or heller.

In October, 1929, the value of the Czechoslovak crown was fixed at 44·58 milligrammes of fine gold, and the currency placed on a gold basis. On February 17, 1934, the gold content of the crown was reduced to 37·15 milligrammes, a depreciation of 16·66 per cent. The cover of notes was also reduced from 30 per cent. to 25 per cent. and to consist only of gold. The share capital of the National Bank, which was set up in 1926, was fixed at 405,000,000 Czechoslovak crowns instead of 12,000,000 dollars as hitherto.

The note circulation on February 7, 1935, amounted to 5,177,006,000 crowns; the metallic reserve was 2,682,204,000 crowns.

On June 30, 1934, there were in circulation 18,090,392 twenty-crown pieces, 31,325,516 ten-crown pieces, 24,278,826 five-crown pieces, 90,834,601 crown pieces, 47,888,197 fifty-heller pieces, 12,443,611 twenty-five-heller pieces, 112,747,106 twenty-heller pieces, 130,039,538 ten-heller pieces, and 95,956,479 five-heller pieces, of the total value of 954,697,945 crowns.

Diplomatic Representatives.

1. Of Czechoslovakia in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Jan G. Masaryk, C.B.E. (appointed June 1925).

Counsellor.—Vilém Černý.

Secretaries.—Maximilian Lobkowicz and Jan Gerke.

Military and Air Attaché.—Lieutenant-Colonel Zdeněk Vltavský.

Consul.—Karel Bujňák.

2. Of Great Britain in Czechoslovakia.

Envoy Extraordinary and Minister Plenipotentiary and Consul-General.—Sir Joseph Addison. K.C.M.G. (appointed April 7, 1930).

Secretary.—R. H. Hadow, M.C.

Military Attaché.—Lieut.-Col. T. D. Daly, M.C.

Commercial Secretary.—H. Kershaw, O.B.E.

There are Consular Representatives at Prague, Bratislava, Brno, Liberec (Reichenberg), and Karlovy Vary (Carlsbad).

DANZIG.

(Die Freie Stadt Danzig.)

By Article 102 of the Treaty of Versailles, the Principal Allied and Associated Powers undertook to establish the Town of Danzig with the surrounding territory as a Free City, to be placed under the protection of the League of Nations. The League of Nations also appoints a High Commissioner.

High Commissioner.—Sean *Lester*. Appointed October 26, 1933.

The proclamation of the Freedom of the City and adjacent territory, as well as the coming into force of the Danzig-Polish Treaty, in accordance with Article 104 of the Treaty of Versailles, took place on November 15, 1920. According to this Treaty Danzig and Poland form a single customs territory. Since January 1, 1922, the Polish-German customs frontier extends to the sea, *i.e.*, Danzig is a unit in the Polish customs administration.

The Constitution provides for a *Volkstag* or Diet of 72 members elected for 4 years and a Senate. This Senate consists of a President, a Vice-President and 10 Senators, whereof the President the Vice-President and 4 Senators receive salaries. The members of the Senate are elected by the Parliament (*Volkstag*) for an indefinite period. Election is by majority of votes. Any citizen over 25 years of age is eligible. The salaried members of the Senate may hold no other public office, nor may they without the approval of the Senate follow any other profession; the unpaid members hold no public office except with the approval of the Senate. No member may serve on a board of managers or of directors of a commercial company without the consent of the Senate. The President of the Senate directs and exercises general supervision over the work of the Administration. The Senate is the highest State authority, and its meetings are not public. Plebiscites take place if demanded by a tenth of the voters. Any alteration of the Constitution by the *Volkstag* can only be effected by a two-thirds majority, with at least two-thirds of the Deputies present.

Elections are universal, direct, equal, and secret on the basis of proportional representation, suffrage being granted to all men and women belonging to the State of Danzig who have attained 20 years of age. The elections for the Parliament (*Volkstag*) held on May 28, 1933, resulted in the return of the following parties: National Socialists, 38; Social Democrats, 13; Centre, 10; Communists, 5; German Nationalists, 4; Poles, 2; total, 72.

Area and Population.—The area of the Free City of Danzig is about 754 square miles, and population 407,517 (August, 1929).

The territory contains a total of 264 localities, of which 258 are rural communes, 2 forest-estate districts, and 4 cities. In addition to the municipality of Danzig, whose administrative district had a population in September, 1933, of 262,600, the following localities are cities:—Zoppot, 30,835 inhabitants; Neuteich, 3,160; and Tiegenhof, 3,252.

Births 1933, 7,719; marriages, 3,769; deaths (excluding still-births), 4,671.

Education.—In May, 1934, Danzig had the following schools:—8 high schools for boys, 7 for girls, and 2 for boys and girls; 10 middle schools and 293 elementary schools. In the high schools there were 5,319 pupils (2,365 girls); in the middle schools, 4,198 pupils (1,839 girls); in the elementary schools, 53,548 pupils (26,434 girls). Teachers in high schools, 210, and middle schools, 110; in elementary schools, 1,278.

The Technical University had in the winter term of 1933–34, 82 teachers and 1,548 students.

Finance.—For 1928, the Budget of the Free City of Danzig balanced at 117,028,590 gulden; for 1929, at 128,000,410 gulden; for 1930 at 134,842,600 gulden; for 1931 at 142,896,050 gulden; for 1932 at 128,911,640 gulden; and for 1933 at 124,812,460 gulden.

Commerce and Shipping.—For centuries Danzig has been famous as a centre for trade and shipping. Danzig's development as a fountain-head for the trade with Eastern Europe has been largely due to the exceedingly favourable situation at the mouth of the Weichsel (Vistula) River.

The most important items of export through Danzig are grain (397,030 tons in the year 1933; 286,500 tons in 1932), sawn timber, of which the largest purchaser is Great Britain (725,859 tons in 1933; 507,118 tons in 1932), and sugar (5,238 tons in 1933; 141,692 in 1932); the principal imports in 1933 were salt herrings, 36,118 tons (49,950 tons in 1932), and coffee, cocoa and tea, 6,511 tons (8,554 tons in 1932). In 1933, 3,141,417 tons of coal (3,705,250 tons in 1932) were exported, and 111,960 tons of ores and sulphates (93,023 tons in 1932) were imported through Danzig. Sea-borne goods traffic in 1933: imports, 493,167 tons, exports, 4,659,808 tons; in 1934, imports, 655,762 tons, exports, 5,713,181 tons.

Shipping in 1933: entered, 4,278 vessels of 2,762,616 tons, and cleared 4,266 vessels of 2,734,104 tons, German shipping predominating, followed by Swedish, Danish, Polish, Norwegian, Latvian and English.

In accordance with Article 19 of the Polish-Danzig Convention of November 9, 1920, a Danzig Port and Waterways Board, composed of 5 Danzig and 5 Polish Commissioners with a President (at present, Dr. Nederbragt, a Dutchman), has been formed to administer and exploit the Port of Danzig.

Communications.—Danzig is connected with Germany by four main railway lines:—Danzig to Koenigsberg, 130 miles; Danzig (via Kreuz-Schneidemuehl) to Berlin, 299 miles; Danzig to Stettin, 241 miles; Danzig to Breslau (via Posen) 297 miles. Danzig is connected with Poland by three main lines:—Danzig to Warsaw, 241 miles; Danzig to Lodz, 240 miles; and Danzig to Posen, 194 miles. Besides these railway-lines there are regular connections by aeroplanes to Berlin (3 hours), to Königsberg (1 hour), to Warsaw (3 hours), to Marienburg (25 minutes), to Stolp (1 hour), to Stettin (2 hours, 20 minutes). A regular passenger-steamer service is carried on between Danzig (Zoppot) and Swinemünde, Pillau (Königsberg), and Memel. Other shipping-lines have arranged a regular passenger-service to Libau (weekly), to London–Hull (weekly), to Reval–Leningrad (weekly), to Riga and Helsingfors (weekly), to America and Canada (every third week), to Kalmar and Stockholm (every tenth day), to Copenhagen (every tenth day).

The Berlin–Königsberg air line and the Polish mail air line serves Danzig. There is also a freight air service between Danzig and Warsaw.

On January 1, 1933, there were 10,289 principal and 8,139 branch telephone connections in Danzig, or a total of 18,428. Telephone calls in 1933 numbered 16,595,000, of which 728,000 were toll calls, the remainder being local calls.

The metric system is the sole legal system of weights and measures in Danzig.

Banking and Currency.—Since December 18, 1923, the sole legal currency in the territory in the Free City of Danzig has been the Danzig *gulden*, with a comparative fine gold value of 0·292895 grammes. After the separation from the German currency, the Bank of Danzig, with a paid-up share capital of 7,500,000 gulden, was founded on February 5, 1924, for the purpose of carrying out the monetary reform. The Government of the Free City of Danzig exercises State control over the bank. By the Note Bank Law, dated November 20, 1923, the Bank of Danzig has the exclusive right of issuing banknotes. The Danzig Government also has the right to issue silver and nickel coinage up to 30 gulden, and aluminium-bronze and copper coinage up to 3 gulden per head of the population for circulation. The standard of the Danzig silver currency (500/1000) corresponds to that of the German and British silver currencies.

The Bank of Danzig was legally obliged to redeem its notes at any time on presentation by cheque on the Bank of England. When the Bank of England suspended the gold basis of payment, the Danzig Government severed the connection of the Danzig currency with the £ sterling and placed the Danzig currency, on September 21, 1931, on the gold standard. Since that time the Danzig currency has been a free gold currency. The Bank of Danzig is obliged to redeem its notes in either gold or currency. Bank of Danzig Return, dated June 30, 1934, in Danzig gulden: Assets: Gold in coin or bullion, 26,983,929; currencies redeemable in gold, 17,572,678; discounts, 16,906,283; loans under securities, 55,578; Danzig current coin, 3,537,320; foreign exchanges (not redeemable in gold), 2,962,160; other balances, 100,720. Liabilities: Capital paid up, 7,500,000; reserves, 4,009,698; notes in circulation, 41,675,060; deposits on demand, 8,968,583; liabilities in foreign currencies, 2,962,160; other liabilities, 31,446.

At the end of 1933, there were 79,985 depositors in the Savings Banks with deposits amounting to 48,328,600 gulden, compared with 60,825 depositors with deposits of 47,620,577 gulden at the end of 1932.

British Consul General.—L. M. Robinson. (Appointed Feb. 28, 1934.)
Polish Diplomatic Representative.—Dr. K. Papée.

DENMARK.

(KONGERIGET DANMARK.)

Reigning King.

Christian X., born September 26, 1870; son of King Frederik VIII. and Queen Louisa; married April 26, 1898, to Princess *Alexandrine* of Mecklenburg; succeeded to the throne on the death of his father, May 14, 1912.

Children of the King.

I. Prince Christian *Frederik*, born March 11, 1899.

II. Prince Knud, born July 27, 1900; married September 8, 1933, Princess Caroline Mathilde of Denmark.

Brothers and sisters of the King.

I. Prince *Carl*, born August 3, 1872; elected King of Norway, under the title of Haakon VII., November, 1905; married July 22, 1896, to Princess Maud Alexandra of Great Britain; offspring Prince Alexander (now Crown Prince Olav of Norway), born July 2, 1903.

II. Prince *Harald*, born October 8, 1876; married April 28, 1909, to Princess Helena of Sonderborg-Glücksborg; offspring Princess Feodora, born July 3, 1910; Princess Caroline Mathilde, born April 27, 1912; married September 8, 1933, to Prince Knud, second son of King Christian; Princess Alexandrine Louise, born December 12, 1914; Prince Gorm, born February 24, 1919.

III. Princess *Ingeborg*, born August 2, 1878; married August 27, 1897, to Prince Charles of Sweden.

IV. Princess *Thyra*, born March 14, 1880.

V. Prince *Gustav*, born March 4, 1887.

VI. Princess *Dagmar*, born May 23, 1890; married November 23, 1922, to Lieutenant Jörgen Castenskiold.

The crown of Denmark was elective from the earliest times. In 1448 after the death of the last male scion of the Princely House of Svend Estridsen the Danish Diet elected to the throne Christian I., Count of Oldenburg, in whose family the royal dignity remained for more than four centuries, although

the crown was not rendered hereditary by right till the year 1660. The direct male line of the House of Oldenburg became extinct with the sixteenth king, Frederik VII., on November 15, 1863. In view of the death of the king without direct heirs, the Great Powers of Europe, 'taking into consideration that the maintenance of the integrity of the Danish Monarchy, as connected with the general interests of the balance of power in Europe, is of high importance to the preservation of peace,' signed a treaty at London on May 8, 1852, by the terms of which the succession to the crown of Denmark was made over to Prince Christian of Schleswig-Holstein-Sonderburg-Glücksburg, and to the direct male descendants of his union with the Princess Louise of Hesse Cassel, niece of King Christian VIII. of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction July 31, 1853.

King Christian X. has a civil list of 1,000,000 kroner. Annuities to other members of the royal house amount to 72,000 kroner.

Subjoined is a list of the Kings of Denmark, with the dates of their accession, from the time of election of Christian I. of Oldenburg:—

House of Oldenburg.

	A.D.		A.D.
Christian I.	1448	Christian V.	1670
Hans	1481	Frederik IV.	1699
Christian II.	1513	Christian VI.	1730
Frederik I.	1523	Frederik V.	1746
Christian III.	1533	Christian VII.	1766
Frederik II.	1559	Frederik VI.	1808
Christian IV.	1588	Christian VIII.	1839
Frederik III.	1648	Frederik VII.	1848

House of Schleswig-Holstein-Sonderburg-Glücksburg.

Christian IX., 1863. Frederik VIII., 1906. Christian X., 1912.

Constitution and Government.

The present Constitution of Denmark is founded upon the 'Grundlov' (charter) of June 5, 1915, as amended on September 10, 1920. This may in many respects be said to be a further development along the lines laid down in the 'Grundlov' of June 5, 1849, the charter which introduced the Constitution in Denmark. The amendments of September 10, 1920, are mostly of a formal character, necessitated by the incorporation of parts of Slesvig in 1920.

According to the present 'Grundlov,' the legislative power lies with the King and the 'Rigsdag' (Diet) jointly. The executive power is vested in the King, who exercises his authority through the ministers. The judicial power is with the courts. The King must be a member of the Evangelical-Lutheran Church, the official Church of the State. The King has not the right of declaring war or signing peace without the consent of the 'Rigsdag.' The 'Rigsdag' is composed of two bodies: the 'Folketing' (House of Commons) and the 'Landsting' (Senate). All men and women 25 years of age and with a fixed place of abode possess the franchise and are eligible for election. The 'Folketing' is at present composed of 149 members; 117 members are elected by the method of proportional representation in 23 districts. In order to attain an equal representation of the different parties, 31 'Tillægsmandater' (additional seats) are divided among such

parties not having obtained sufficient returns at the district elections. One member is elected for the Faroe Islands by simple majority. The term of the Legislature is four years, but the King has power to dissolve the 'Folketing' before the end of the four years. The members of the 'Landsting' are elected indirectly by the 'Folketing's' voters of 35 years of age in the following way. In every 'Folketing's' district electors in a number corresponding to the population are elected by the method of Proportional Representation. The whole country is divided into six 'Landsting's' districts. In each of these the electors elect a number of members of the 'Landsting,' between 10-12. In this way 56 members are elected; one is elected in the Faroe Islands. Moreover, there are 19 members elected by the former 'Landsting,' according to the system of Proportional Representation. The members of the 'Landsting' sit for a term of eight years. There are elections every fourth year for the half of those elected by the electors, while those elected by the 'Landsting' go out all at once after an eight years' term.

The members of the 'Rigsdag' receive 5,600 kr. or 7,200 kr. a year, according to whether their homes are in or outside the capital.

The Rigsdag must meet every year on the first Tuesday in October. To the Folketing all money bills must in the first instance be submitted by the Government. The Landsting, besides its legislative functions, has the duty of appointing from its midst every four years judges who, together with the ordinary members of the Höiesteret, form the Rigsret, a tribunal who can alone try parliamentary impeachments. The ministers have free access to both of the legislative assemblies, but can only vote in the chamber of which they are members.

The executive (appointed April 29, 1929), acting under the king as president, and called the State Council—Statsraadet—consists of the following departments:—

The Presidency of the Council and Ministry of Defence.—Th. *Stauning.*
Minister of Agriculture and Fisheries.—K. M. *Bording.*
Ministry of Foreign Affairs.—P. *Munch.*
Ministry of the Interior.—B. *Dahlgaard.*
Ministry of Social Affairs.—K. K. *Steincke.*
Ministry of Justice.—C. Th. *Zahle.*
Ministry of Public Instruction.—F. *Borgbjerg.*
Ministry of Ecclesiastical Affairs.—N. P. L. *Dahl.*
Ministry of Public Works.—J. F. N. *Friis-Skotte.*
Ministry of Finance.—H. P. *Hansen.*
Ministry of Commerce, Industry and Navigation.—C. N. *Hauge.*

The ministers are individually and collectively responsible for their acts, and if impeached, and found guilty, cannot be pardoned without the consent of the Folketing.

State of parties in the Landsting, after the election of September 6, 1932:—28 Liberals, 27 Socialists, 13 Conservatives, and 8 Radicals.

Folketing, elected November 16, 1932:—62 Socialists, 39 Liberals, 27 Conservatives, 14 Radicals, 2 Communists, 1 German Party.

In the year 1920 there were incorporated into Denmark parts of Slesvig which voted for Denmark at the plebiscite held in accordance with the Versailles Treaty of June 28, 1919 (made effective Jan. 10, 1920). The Northern Zone voted on Feb. 10, 1920, and 75,431 votes were cast for Denmark, and 25,329 votes for Germany. The Southern Zone voted on March 14, 1920, and 12,800 votes were given for Denmark, and 51,724 votes for Germany. The new Slesvig territories were incorporated on July 9, 1920, being officially named 'Sønderjydske Landsdele' (South Jutland Provinces).

For administrative purposes Denmark is divided into 21 counties (Amter), each of which is administered by a Governor (Amtmand). Moreover, the county is a municipal division with a county council superintending the rural municipalities (about 1,300). There are 88 urban municipalities with a mayor and a town council. Rural as well as urban municipal councils are elected direct by universal suffrage and Proportional Representation. Copenhagen forms a district by itself, and has its own form of administration.

Area and Population.

According to the census held on November 5, 1930, the area of Denmark is 16,576 square miles (42.931 square kilometres), and the population 3,550,656, including North Slesvig with 1,500 square miles (3,882 square kilometres) and 177,696 inhabitants.

The following table gives the area and population of Denmark in 1930:—

Divisions	Area 1930 English sq. m.	Population 1930	Population 1930 per sq. m.
City of Copenhagen (Kjöbenhavn) without suburbs	28	617,069	22,038
Islands in the Baltic	5,136	1,310,225	255
Peninsula of Jutland	11,412	1,623,362	142
Total	16,576	3,550,656	214

The area of the Faroe Islands is 540 square miles, and the population in 1930 was 24,200.

The population (excluding the Faroes) consisted of 1,736,306 males and 1,814,350 females in 1930. The total population at the census of 1925 was 3,434,555, showing an increase during 1925–30 of 0·67 per cent. per annum. In Denmark the town population has increased from 1,482,297 in 1925 to 1,558,910 in 1930; while the rural population has increased from 1,952,258 in 1925 to 1,991,746 in 1930. The population is almost entirely Scandinavian; in 1921, of the inhabitants of Denmark proper, 96·57 per cent. were born in Denmark.

Estimated population on July 1, 1934, 3,656,000.

The population of the capital, Copenhagen (Kjöbenhavn), in 1930 was 617,069, or with suburbs, 771,168; Aarhus, 81,279; Odense, 56,759; Aalborg, 44,365; Horsens, 28,363; Randers, 27,722.

The following table gives the total number of births, deaths, and marriages with the surplus of births over deaths, for three years:—

Years	Total Births (living)	Still Births	Marriages	Deaths	Surplus of Births over Deaths
1931	64,266	1,574	29,027	40,578	23,688
1932	64,650	1,523	28,133	39,701	24,949
1933	62,780	1,663	31,958	38,294	24,486

Of the births in 1931, 10·70 per cent. were illegitimate; in 1932, 10·56; in 1933, 10·22. In 1932, there were 2,514 divorces; in 1933, 2,762.

Emigrants, chiefly to the United States and to Central and South America, in 1931, 1,186; in 1932, 768; in 1933, 624.

Religion.

The established religion of Denmark is the Lutheran, which was introduced as early as 1536. The affairs of the National Church are under the superintendence of nine bishops, who have no political character. Complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters.

According to the census of 1921 there were 3,221,843 Protestants, 22,137 Roman Catholics (under a Vicar Apostolic resident in Copenhagen), 535 Greek Catholics, 5,947 Jews, 17,349 other or of no confession.

Education.

Elementary education has been widely diffused in Denmark since the beginning of the last century, and in 1814 it was made compulsory. The school age is from 7 to 14. In 1933 Denmark had 4,504 lower schools; of these 34 were maintained by the Government, 3,892 by the local communities and 578 were private institutions. The instruction in the public schools is mostly gratuitous. The number of pupils in the 4,504 schools was on January 1, 1933: 501,054. In 1933, 1,724 students were admitted to the university; of these 633 were women. For higher instruction there are furthermore (1933): a veterinary and agricultural college at Copenhagen with 70 professors and teachers and about 700 students; 303 technical schools with about 30,000 pupils; 19 training colleges for teachers with about 1,600 students; a high school of commerce with about 600 pupils; 95 commercial schools with about 14,000 pupils; 21 agricultural or horticultural schools and 60 *folkehöjskoler* or popular high schools (adult schools with about 6,500 pupils); a college of pharmacy (founded 1892) with 10 teachers and about 100 students; a school for dentists with 18 teachers and about 160 students; a Royal academy of arts (founded 1754) with 22 teachers and about 300 students; a Polytechnic Institution (founded 1829) with 110 professors and teachers and about 1,000 students. The *folkehöjskoler* are all private, but to them and the agricultural schools the State annually makes a grant of about 1,400,000 kroner. The University of Copenhagen, founded in 1479, has about 130 professors and teachers, and about 5,500 students. The University of Aarhus, founded in 1928, and opened on September 11, 1933, has about 120 students.

Pauperism and Old Age Pensions.

Ordinary *poor relief* is regulated by the poor relief law of April 9, 1891 (and its amendments), under which in the financial year 1932–33, 126,545 (3·5 per cent. of the population) were relieved at a cost of approximately 47 million kroner.

A law of July 1, 1927, entering into force on October 1, 1927, grants an annual sum of money as old age pension (*Aldersrente*) to any person being 65 years of age and fulfilling certain conditions. The old age pension, which does not involve the loss of civil rights, is granted according to the principle of fixed rates, the law stating the sums which have to be paid under the various circumstances. The pension varies according as the commune of domicile is a town commune or a rural one, and certain deductions are made for self-earned incomes. In Copenhagen, for example, the old age pension of a married couple, both 65 years of age, without any earned income, is 1008 kroner per annum. The subvention is paid by the commune of domicile and seven-twelfths of it is refunded by the State. For the financial

year ending March 31, 1933, 102,452 persons were relieved. The total expenditure was 62·2 million kroner.

According to a law of 1913, assistance without the loss of civil rights is granted to children living with their widowed mothers. The expenditure (divided between the municipalities and the State) amounted in the financial year 1932–33 to 2,123,000 kroner.

In 1933 the above laws were co-ordinated into four Acts ('The Social Reform'), dated May 20, and put into force on October 1, 1933. It was the intention to make these enactments integral parts of a common system, and to obviate every kind of double relief by means of co-operation between the various administrative units. The Social Reform comprises three insurance Acts—regarding (1) Labour Exchanges and Employment Insurance, (2) Accident Insurance, and (3) Sickness, Invalidity and Old-Age Insurance, and also an Act regarding Public Assistance.

Justice and Crime.

The lowest courts of justice in Denmark are organized in 99 tribunals where cases of only small consequence are dealt with by a single judge. Cases of greater consequence are dealt with by the superior courts (*Landsretterne*); these courts are also courts of appeal for the above-named minor cases. Of superior courts there are three: *Ostre Landsret* in Copenhagen with 17 judges, *Vestre Landsret* in Viborg with 12 judges, and *Sondre Landsret* in Sonderborg with 4 judges. From this an appeal lies to the supreme court (*Höjesteret*) in Copenhagen, composed of 13 judges. Judges under 65 years of age can be removed only by judicial sentence.

In 1931, 4,127 men and 441 women were convicted of crimes and delicts. On March 31, 1932, 1,339 men and 29 women were in the penitentiaries of Denmark.

Finance.

By the terms of the Constitution of Denmark the annual financial budget, called the 'Finanslovforslag,' must be laid on the table of the Folketing at the beginning of each session, *i.e.* at the beginning of October. As to the annual financial accounts, called 'Statsregnskab,' the Constitutional Charter prescribes them to be examined by four paid revisers, two of whom are elected by the Folketing and two by the Landsting. Their report is submitted to both Chambers which, after due consideration, pass their resolution generally to the effect that they have no remarks to make on the balance-sheet.

The following shows the actual revenue and expenditure for two years ending March 31 and the estimates for three years:—

Year ending March 31	Revenue		Expenditure	
	Current	From State Capital	Current	For increase of State Capital
	Kroner	Kroner	Kroner	Kroner

[1] Budget estimates.

The following is an abstract of the Budget estimates for 1935–36 for current revenue and expenditure:—

Current revenue	Kroner	Current expenditure	Kroner
Debit balance of domain revenues	÷ 661,213	Civil list and appanages	1,072,000
Debit balance of State undertakings	÷15.249,999	Rigsdag	2,020,000
Interest (net)	÷ 9,403,587	Council of State	537,290
Balance of funds, etc.	611,478	Ministry of Foreign Affairs	5,919,433
Direct and indirect taxes	404,482,673	Ministry of Ecclesiastical Affairs	2.461,493
Balance of lotteries	3,150,164	Ministry of Public Works	15,022,482
Separate revenues	2,190,352	Ministry of Public Instruction	66,114,826
		Ministry of Justice	18,826,428
		Ministry of Interior	28,989,773
		Ministry of Social Affairs	131,824,780
		Ministry of Agriculture	10,617,778
		Ministry of War	31,643.795
		Ministry of Marine	21,551,741
		Ministry of Finance	24,207,324
		Ministry of Commerce and Industry	4,361,771
		Ministry of Navigation and Fishing	2,799,677
		Pensions	14,270,805
Total current revenue	385,119,868	Total current expenditure	382,241,396

The public debt of Denmark on March 31, 1934, amounted to 71,172,000*l.* The total foreign debt was 36,910,000*l.*

Defence.

The Danish army is a *national militia*, resembling in some respects the Swiss army. Every able-bodied Danish subject is liable to serve in the army or navy, except the inhabitants of the Faroe Islands. Exemptions in Denmark are few, even clergymen having to serve.

Service commences at the age of 20 and lasts for 16 years. For the first 8 the men belong to the active army, and for the second 8 years to the reserve. At the time of joining, the recruits are continuously trained for 150 days in the infantry, 215 days in the field artillery, 245 days in the coast artillery, and 425 days in the cavalry. The engineers have 200 days, and the train 60 days' continuous training. In the case of about one-fourth of the men, their initial training is prolonged by periods ranging from 2½ to 8½ months, according to the arm of the service to which they belong. Subsequent training for all arms only takes place twice in the remaining eight years of army service, and then only for 28 days on each occasion.

The country is organised in one territorial command.

Infantry and mounted troops are armed with the Krag-Jorgensen 8 mm. rifle or carbine and the Madsen machine gun, field artillery with a Krupp gun, firing a 14·88-pound shell.

The number of recruits called up annually for training is 8,625, which with the permanent establishment, armed police and air force, made up a total of 14,136 all ranks. The military budget for 1935–36 was 45,547,550 kroner.

The naval forces have been reconstructed pursuant to the law of National Defence of August 8, 1922. The Navy, as well as the Army, is under the direction of the Minister of Defence.

The fleet is for purposes of coast-defence. It now includes two coast defence ironclads of 3,650–3,800 tons, *Peder Skram*, *Olfert Fischer*, each carrying a pair of 9·4-inch and four 6-inch guns, and one of 4,300 tons, *Niels Juel*, with ten 6-inch guns; 5 fishery patrol vessels (*Hvidbjornen*, *Ingolf*, *Islands Falk*, *Beskytteren* and *Diana*), 23 torpedo boats, 8 submarines, the repair ship *Henrik Gerner*, and the minelayer *Lossen*.

Production and Industry.

The soil of Denmark is greatly subdivided, owing partly to the state of the law, which interdicts the union of small farms into larger estates, but encourages, in various ways, the parcelling out of landed property, and leaves the tenant entire control of his land so long as the rent is paid.

According to the census of July 15, 1933, the extent of the cultivated area in Denmark was as follows (in thousand acres):—grain areas, 3,255; root crop, 1,285; other crop, 71; green fodder and grass, 3,108; fallow land, 120; total cultivated area, 7,849. The acreage and production of the chief crops for two years were as follows:—

Crops —	Area		Production	
	1932	1933	1932	1933
	Acres	Acres	Tons	Tons
Wheat . . .	245,000	260,900	299,300	314,200
Rye	297,000	353,400	221,900	251,400
Barley . . .	853,000	864,600	1,009,100	958,500
Oats	984,000	943,000	1,055,300	926,600
Mixed grain . .	787,000	822,400	793,900	795,600
Potatoes . .	172,000	189,500	1,304,400	1,327,100

On July 15, 1934, there were in Denmark 506,000 horses, 3,059,000 head of cattle, 3,057,000 swine, and about 26,000,000 hens.

According to statistics collected on July 15, 1925, there were 89,175 industrial factories and shops in Denmark, employing altogether 392,000 persons, of whom 270,000 were actual labourers. Of the total establishments 26,300 factories used mechanical power. In 1933, there were in Denmark 4 distilleries whose output of brandy reduced to 100° amounted to 7,300,000 litres. In 1933, there were produced 1,320,000 hl. of strong beer, and 704,000 hl. small beer. In the same year 243,756 tons of beet-sugar were produced at 9 sugar factories, and 74,304 tons of margarine were manufactured at 124 factories.

In the Danish fisheries the total value of the fish caught was, 1929, 2,097,000*l.*; 1930, 2,234,000*l.*; 1931, 1,890,000*l.*; 1932, 1,832,000*l.* The fleet in 1931 consisted of 15,740 boats.

Commerce.

The following table shows the value, according to official returns, of the imports and general exports (excluding precious metal) for six years (18.16 kroner = 1*l.*):—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1929	98,698,000	94,064,000	1932	62,895,000	62,599,000
1930	95,217,000	88,985,000	1933	69,702,000	66,769,000
1931	80,661,000	73,397,000	1934	74,512,000	67,914,000

In 1933, the general imports and exports, and the special imports and exports (imports for consumption and exports of Danish produce or manufacture) were as follows:—

1933	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)
	1,000 kroner	1,000 kroner	1,000 kroner	1,000 kroner
Food substances	244,276	235,092	953,861	943,835
Personal and domestic	153,062	146.911	13,660	5,399
Fuel	99,935	99,061	260	1
Fodder, manure, seeds	115,646	114,194	34,450	32,784
Raw products	279,823	270,030	111,162	98,657
Industrial products	315 310	305,941	77,677	64,702
Other goods	57,743	53,769	21,461	17,996
Total	1,265,795	1,224,998	1,212,531	1,162,774

The principal articles of import and export, with their respective values, were as follows :—

—	1932				1933			
	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)
	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner

Animals	762	746	23,306	23,288	1,634	1,623	18,752	18,733
Provisions eggs, &c.	14,452	10,863	865,803	861,986	14,142	11,063	915,632	912,298
Cereals, &c.	161,950	160,247	6,544	4,721	123,698	122,283	8,024	6,485

The following table shows the distribution of Danish foreign trade :—

Countries	Imports (General).		Exports (General).	
	1933	1934	1933	1934
	Kroner	Kroner	Kroner	Kroner
Germany	287,195,000	288,559,000	153,134,000	188,066,000
United Kingdom	355,660.000	407,286,000	777,823,000	736,514,000
Sweden	88,710,000	102,485,000	57,982,000	74,826,000
Norway	28,517,000	27,885,000	30,668,000	41,389,000
United States	76,004,000	82.155,000	7,6:9,000	11,140,000
Rest of America	59, 0 ,000	64,748,000	13,175,000	13,984,000
Nether ands	48,283.000	48,557,000	16,321,000	12,628,000
France	35,709,000	40,689,000	13,913,000	15,404,000
Faroe Islands and Greenland	3,348,000	3,369,000	7,342,000	7,489,000

The chief imports into and domestic exports from the United Kingdom from and to Denmark in two years (Board of Trade Returns) were :—

Imports into U.K.	1932	1933	Exports to Denmark	1932	1933
	£	£		£	£
Butter . . .	13,432,387	10,696,219	Coal	1,399,147	1,851,981
Eggs . . .	2,970,200	2,551,726	Cottons (piece goods)	876,132	1,189,328
Bacon . . .	20,941,299	19,123,919	Woollen Goods .	692,736	855,952

Total trade (Board of Trade returns) between Denmark and the United Kingdom for 5 years :—

—	1930	1931	1932	1933	1929
	£	£	£	£	£
Imports from Denmark to U.K.	54,117,596	46,695,558	40,569,635	35,428,306	32,875,273
Exports to Denmark from U.K.	10,248,522	8,656,592	9,852,636	11,797,463	13,354,024
Re-exports to Denmark from U.K.	741,668	556,834	498,544	476,948	729,867

Shipping and Navigation.

On December 31, 1933, Denmark possessed 2,060 vessels (above 20 registered tons gross) of 1,192,400 registered tons gross in her mercantile marine, of which 591 of 672,330 tons gross were steamers, and 184 motor ships of 440,300 tons gross, 1,226 sailing vessels with motor of 71,900 tons gross, and 59 sailing vessels of 7,900 tons.

Internal Communications.

Denmark proper (exclusive of Copenhagen) has (March 31, 1934) 7,691 kilometres or 4,779 miles of road, besides about 27,000 miles of by-ways. There are (1934) railways of a total length of 3,326 miles open for traffic in the kingdom. Of this total, 1,665 miles belong to the State. The total value of the State railways (road, buildings, cars, etc.) up to March 31, 1934, was 481,068,000 kroner.

The Post Office in the year 1933–34 carried 284,411,000 letters and post-cards, and 237,360,000 samples and printed matter. There are 1,439 post-offices. The State telegraphs in 1933–34 carried 3,432,000 messages, of which 935,000 were internal. The length of State telegraph lines (March 31, 1934) was about 11,400 miles ; number of offices 571. At the same date the railway telegraphs had 429 offices. On Dec. 31, 1933, the length of telephonic wires of the State and the private companies was 1,191,000 miles. In the year 1933 there were 575,353,000 telephonic conversations.

Banking and Credit.

On December 31, 1934, the accounts of the National Bank balanced at 724,296,000 kroner. The assets included 133,118,000 kroner in bullion and specie. The liabilities included 386,209,000 kroner note issue, 27,000,000 kroner of capital, and 12,028,600 kroner reserve fund. In Denmark there are 171 other banks for commercial, agricultural, industrial, and other purposes. On March 31, 1933, there were 531 savings banks, with 2,070,000 depositors, and deposits amounting to 2,161,800,000 kroner, or about 1,044 kroner to each account.

The nominal value of the coin minted (including recoinage of worn pieces) in Denmark since 1873 is given as follows :—

Years ending March 31	Gold	Silver, nickel, aluminium-bronze, bronze and iron	Total
	Kroner	Kroner	Kroner
1873–1932	182,063,040	51,142,102	233,205,142
1933	—	—	—
Total (1873–1933) . .	182,063,040	51,142,102	233,205,142

Money, Weights, and Measures.

The monetary unit, the *Krone* of 100 öre, is of the value of 1s. 1½d., or about 18 kroner to the pound sterling. The krone contains 0·403226 gramme of gold.

Gold coins are 20- and 10-kroner pieces. The 20-kroner piece weighs 8·870 grammes ·900 fine, and thus contains 8·0645 grammes of fine gold. Small change: 2 kroner, 1 kroner and ½ kroner pieces of aluminium-bronze; 25 öre and 10 öre pieces of nickel, and 5 öre, 2 öre and 1 öre pieces of iron and of bronze.

The standard of value is gold.

The use of the metric system of weights and measures, under the law of May 4, 1907, became obligatory in Denmark in public offices on April 1, 1910, and generally on April 1, 1912.

Diplomatic and Consular Representatives.

1. Of Denmark in Great Britain.

Envoy and Minister.—Count Preben Ferdinand Ahlefeldt-Laurvig, G.C.V.O. (October 9, 1921).

Counsellor.—Poul Scheel.

Secretary.—Frantz Hvass.

Honorary Attaché.—Baron Paul J. Bertouch-Lehn.

Agricultural Adviser.—Soren Sorensen.

Press Attaché.—C. E. Aagaard.

Consul-General, Counsellor of Legation and Commercial Adviser.—C. M. Rottböll.

There are Consuls at Belfast, Falmouth, Hull, Leith, Liverpool, London (C.G.), Manchester, Newcastle, and Vice-Consuls in several other towns.

2. Of Great Britain in Denmark.

Envoy and Minister.—Hugh Gurney, C.M.G., M.V.O. (Appointed January 2, 19[illegible].

Second Secretary.—Commander H. F. B. Maxse, R.N.

Commercial Secretary.—E. G. Cable.

Naval Attaché.—Capt. G. C. Muirhead-Gould, D.S.C., R.N.

Military Attaché.—Lt.-Col. F. E. Hotblack, D.S.O., M.C.

Air Attaché.—Group-Captain F. P. Don, O.B.E.

There are Consuls at Copenhagen, Thorshavn (Faroe Islands), and Vice-Consuls in 14 other towns.

Colonies.

Greenland is the only colonial possession of Denmark. Its total area is 36,518 English sq. miles, made up as to 705,234 sq. miles of Ice cap and 31,284 sq. miles of Ice free land. The population in 1930 numbered 16,630.

Of the total 408 were Danes and 16,222 natives; the latter numbered 7,694 men and 8,528 women. West Greenland had a population of 15,744 inhabitants, East Greenland 886 inhabitants. In the settlement Kap York (Thûle) lived 266 natives. The imports from Greenland into Denmark in 1933 amounted to 4,064,000 kroner, and the exports from Denmark to 2,143,000 kroner. The trade of Greenland is a State monopoly.

DOMINICAN REPUBLIC.

(REPÚBLICA DOMINICANA.)

Columbus in 1492 discovered the island of Santo Domingo which he called La Española, and the city of Santo Domingo, founded by his brother, Bartholomew, in 1496, was for long the centre of Spanish power in America. The country declared its independence of Spain in 1821, was invaded and held by the Haitians from 1822 to 1844 when the Dominican Republic was founded and a Constitution adopted. The country was occupied by American marines from 1916 to the adoption of a new constitution in 1924.

Constitution and Government.—The Republic is governed in general under the Constitution of 1844, and the Revised Constitution proclaimed on June 20, 1929, and modified June 9, 1934.

Congress is composed of a senate of 12 members (1 from each of the 12 provinces, chosen by direct popular vote for 4 years) and a chamber of 33 deputies (1 for every 30,000 inhabitants or fraction above 15,000 in each province), also chosen for 4 years. A "National District," established from January 1, 1935, returns 1 senator and 2 deputies. Senators and deputies receive 300 dollars (U.S.) per month. At the general elections held in May, 1934, women were allowed, as an experiment, to vote and nearly 100,000 did so.

The executive functions of the Republic are vested in the President, elected for 4 years, by direct vote, who may be succeeded by the Vice-President in case of death or disability. There are 7 Secretaries of State, who are the heads of the departments of: the Presidency; Interior, Police, War and Marine; Foreign Relations; Finance; Labour and Communications; Agriculture and Commerce; Health, Social Services and Public Works.

President of the Republic.—General Rafael Leonidas *Trujillo* Molina. (Assumed office, for a second term, on August 16, 1934.)

Area and Population.—The Dominican Republic occupies the eastern portion (about two-thirds) of the island of Hispaniola, Quisqueya or Santo Domingo, the western division forming the Republic of *Haiti*. Area is estimated at 19,332 square miles, with 1,017 miles of coast line, 193 miles of frontier line with Haiti, and a population, according to the census of 1920, of 894,665. Total population (1932) is estimated at 1,200,000. The boundary with Haiti, long in dispute, was resurveyed under a treaty signed in 1929, but a final adjustment of points in dispute has not yet been reached. The population (1921) of the 12 provinces was as follows: Santo Domingo, 146,446; Macoris, 43,612; Seybo, 58,408; Azua, 100,577; Barahona, 48,180; Samaná, 16,915; La Vega, 105,820; Duarte, 77,620; Espaillat, 50,956; Santiago, 122,773; Puerto Plata, 59,025; and Monte Cristi, 67,073. Immigrants, 1933, 5,596; emigrants, 4,481.

The population contains some creoles of Spanish descent, but is mainly composed of a mixed race of European, African and Indian blood; there

are, however, many Syrians, especially in Santo Domingo City, engaged chiefly in the drapery trade. The language is Spanish, but many educated Dominicans speak English. The Haitian patois is spoken to a considerable extent along the frontier.

The capital, Santo Domingo, on the left bank of the river Ozama, was destroyed in 1502 by a hurricane, and subsequently rebuilt on the right bank of the same river. It was again practically destroyed, except for a few historic buildings, by another disastrous hurricane on September 3, 1930. It has been rebuilt. According to the census of 1920, the City of Santo Domingo had 30,957 inhabitants (between 40,000 and 45,000 in 1932) and the City of Puerto Plata 7,807; Santiago de Los Caballeros 17,152; San Pedro de Macoris, 13,802; La Vega, 6,564; Samaná, 1,656; Sanchez, 3,075; Azua, 4,797; Monte Cristy, 2,580; San Francisco de Macoris, 5,188; and Moca, 3,994.

Religion and Education.—The religion of the State is Roman Catholic; other forms of religion are permitted. There is a Papal Nuncio with residence at Port-au-Prince (Haiti) as well as an Archbishop, known as the Primate of the Indies, in Santo Domingo City.

Primary instruction is gratuitous and obligatory, being supported by the State and by communal contributions. Schools are official (maintained wholly by State funds), semi-official (receiving State aid), and private. The Professional Institute was formed into a University by Presidential decree on November 29, 1914; it has 43 professors and 340 students. The 6 normal or secondary schools have 81 professors and 1,326 students. Primary schools number 698 with 1,475 teachers and 68,011 pupils (1933). There are 30 technical schools of various kinds with 110 teachers and 2,298 pupils. Schools are increasing rapidly.

Justice.—The judicial power resides in the Supreme Court of Justice, the Courts of Appeal, the Courts of First Instance, the Communal Courts and other tribunals created by special laws, such as the Land Courts. The Supreme Court consists of a president and 6 justices chosen by the Senate, and the Solicitor-General, appointed by the executive; it supervises the lower courts. The Republic is divided into 3 departments and, in all, 12 judicial districts, each having its own Fiscal Attorney and Court of First Instance (that of Santo Domingo has 2 courts); these districts are subdivided, in all, into 72 communes, each with a local justice (alcalde), a secretary and bailiff (alguacil). Each department has a Court of Appeal of 4 magistrates, appointed by the Senate, and a departmental Solicitor-General appointed by the President; these courts sit at Santo Domingo City, Santiago, and La Vega. The death penalty was abolished in 1924.

Finance.—The receipts and disbursements for 6 years, in U.S. dollars (adopted in 1897 as the monetary standard; 5 pesos = 1 dollar) were :—

—	Revenue	Expenditure	—	Revenue	Expenditure
	Dollars	Dollars		Dollars	Dollars
1928 . .	19,289,420	19,692,129	1931 . .	7,311,418	7,920,120
1929 . .	13,984,860	15,385,844	1932 . .	7,421,652	7,880,678
1930 . .	9,975,674	10,642,189	1933 . .	8,415,432	8,333,365

Chief sources of revenue, 1933: Customs, 2,999,578 dollars; Lottery, 272,000 dollars.

In accordance with the American-Dominican Convention of 1924, which provided for a loan up to 25,000,000 dollars, an American Receiver-General of Customs supervises customs collections and controls the payment of interest and amortization of the three Dominican Bond issues. This arrangement, which dates back to the first American intervention in 1905, is to last until the loans are repaid. The total customs collected by the American Receiver-General from April, 1905, to December 31, 1933, was 112,518,179 dollars.

The bonded debt of the Republic on December 31, 1933, was 16,320,500 dollars; internal or floating debt was about 2,300,000 dollars. On November 11, 1931, the Government announced a 2-years' moratorium on annual payments of principal, though declaring that interest will be maintained. The step was attributed to lower income due to the hurricane of 1930 and the general depression. The arrears (December 31, 1933) amount to 3,981,825 dollars; in 1934 arrangements were made for amortization payments on a reduced scale.

Defence.—The National Military Force consists of a native foot constabulary comprising, 2,500 men and 200 officers.

The Republic has 1 armed transport of 1,668 gross tons and 2 coast patrol motor boats.

Production and Industry.—Agriculture is the chief source of wealth, sugar cultivation being the principal industry. Of the total area, 9,900 square miles are cultivable, and about 6,600 are under cultivation. The remainder is forest land, mostly pine-groves, and is useless for agriculture. The largest sugar estates are in the southern part of the Republic. Exports of raw sugar in 1932, 439,541 metric tons; in 1933, 293,786 metric tons. There are 21 sugar 'centrals,' mostly owned and operated by American companies, although very little of the sugar is sold to the United States. The other principal exports in 1933 were: cocoa beans, 19,900 tons; coffee, 11,794 tons; leaf tobacco, 5,659 tons; sugar cane, 193,073 tons; and molasses, 102,789 tons.

Various minerals are found, principal among which are gold and copper. Iron is found in the form of black magnetic oxide of iron, and petroleum has been found in the Azua region. Coal of the lignite variety of little commercial value is known to exist in small quantities. Silver and platinum have been found, and rock salt near Neiba exists in large quantities, there being several hills of native salt covered with only a thin layer of soil. The mining laws were suspended recently by Congress and no mining is in progress.

Commerce.—The total imports into and exports from the Dominican Republic for 5 years were valued as follows in dollars (5 pesos, by law = 1 dollar U.S.):—

—	1929	1930	1931	1932	1933
	Dollars	Dollars	Dollars	Dollars	Dollars
Imports	22,729,444	15,229,219	10,151,762	7,794,343	9,322,688
Exports	23,736,497	18,551,841	13,067,162	11,164,271	9,625,473

The foreign trade for 2 years was distributed as follows (in U.S. dollars):—

Country	Imports				Exports			
	1931		1932		1931		1932	
	Dollars	Per cent.	Dollars	Per cent.	Dollars	Per cent.	Dollars	Per cent.
United States	5,882,655	57·95	4,595,541	58·96	3,427,767	26·23	1,907,992	17·09
United Kingdom	503,480	4·96	379,645	4·87	4,045,556	30·95	4,840,791	43·36
France	204,688	2·02	195,321	2·51	3,091,168	23·66	2,110,577	18·90
Italy	123,688	1·22	104,191	1·34	143,627	1·10	236,212	2·12
Puerto Rico	29,196	0·29	28,363	0·36	458,462	3·51	933,910	8·37
Germany	466,332	4·59	323,269	4·15	195,344	1·49	137,992	1·24
Canada	323,630	3·19	261,426	3·35	502,784	3·85	91,746	0·82
British India	558,644	5·50	473,753	6·08	—	—	—	—

In 1933, the chief imports were (in dollars): cotton goods, 1,863,894; jute bags, 336,685; rice, 430,465; chemical and pharmaceutical, 414,408; petrol, 367,521; machinery, 396,490; wheat flour, 237,580. Principal exports in 1933 were (in dollars): raw sugar, 4,397,544; cocoa beans, 1,274,096; tobacco leaf, 352,540; coffee, 1,832,469; molasses, 510,774; sugar cane, 350,755. Of the export of raw sugar in 1933, 2,689,510 dollars went to the United Kingdom and Ireland, and 1,183,850 dollars to France.

Total trade between the Dominican Republic and the United Kingdom for 5 years (Board of Trade Returns):—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Dominican Republic to U.K.	1,851,296	1,019,166	1,694,576	878,357	774,879
Exports to Dominican Republic from U.K.	152,687	103,938	97,516	128,944	152,840
Re-exports to Dominican Republic from U.K.	731	967	1,407	464	515

Shipping and Communications.—The merchant marine of the Republic consists of 95 vessels, 2 of which are steamers with a tonnage of 430, 1 motor ship of 200 tons and 92 sailing vessels of 2,066 tonnage.

In 1933, 1,332 vessels of 1,900,856 tons entered the ports of the Republic and 1,293 with a tonnage of 1,884,645 cleared.

Three main trunk highways, with branches, now extend eastward from Santo Domingo City to Higuey (105 miles), northward to Santiago and Monte Cristi (180 miles), and westward to Commendador (on the Haitian border), and San Juan (161 miles). At Commendador the road joins the Haitian road to Port-au-Prince. The journey between the Haitian and Dominican capitals is now possible by motor in 12 hours. Total first-class highway mileage in 1932 was 700 miles. There are also about 600 miles of inter-communal roads.

There are two small railway lines in the Republic: (1) Samaná-Santiago line, belonging to an English company, which runs from Sanchez on the Bay of Samaná to La Vega, Moca and San Francisco de Macoris (total, 87 miles); (2) a Government line, the Dominican Central railway, which runs from Puerto Plata to Santiago and Moca (60 miles). Total length of line (1930) 147 miles. There are, besides, about 255 miles of private lines on the large estates.

Postal and telegraphic services are united; number of post offices, 1933, 120; telephone or telegraph offices, 112.

The telegraph has a total length of about 1,034 miles, and has been leased to the All-America Cables, Incorporated, which also controls submarine cables connecting, in the north, Puerto Plata with Porto Rico and New York, and in the south, Santo Domingo with Porto Rico, Cuba and Curaçao.

The telephone system, owned by the Dominican Government, has been leased to an American Company which has installed modern apparatus. There are wireless stations in Santo Domingo City, Santiago and four other towns. Radio telegraph service with the United States was opened in 1931.

Money, Weights, and Measures.—On July 1st, 1897, the United States gold dollar was adopted as the standard of value. A small amount of debased silver coin circulates as small change at the ratio of 5 to 1, viz, 1 peso = 20 cents United States currency. On December 31, 1933, the coinage and currency held by the public and the banks was estimated as follows: gold, 150,000 dollars; Dominican silver, 200,000 dollars; U.S. silver, 275,000 dollars; notes, 2,000,000 dollars.

The metric system was adopted on August 1, 1913, but English and Spanish units are quite common in ordinary commercial transactions.

Diplomatic and Consular Representatives.

1. Of the Dominican Republic in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Señor Virgilio Trujillo.

Consul-General.—Señor Ruben Brache.

There are consular representatives at London, Southampton, Grimsby Liverpool, Glasgow, Manchester, Nottingham, Cardiff, Leeds and Birmingham.

2. Of Great Britain in the Dominican Republic.

Minister and Consul in Santo Domingo.—Alexander Swinton Paterson. (Appointed January 30, 1935.)

Military Attaché.—Lieut.-Col. W. W. Torr.

There is also a Vice-Consul at Santo Domingo City, San Pedro de Macoris, Sanchez, Puerto Plata, and La Romana.

ECUADOR.

(REPÚBLICA DEL ECUADOR.)

Constitution and Government.

THE Republic of Ecuador is situated in the north-west of South America, with more than one-third of its area lying on both sides of the Equator. It is bounded on the north by Colombia, on the south by Peru and Brazil, on the east by Colombia and Brazil, and on the west by Peru and the Pacific Ocean. Was constituted May 11, 1830, following the war of independence against the Spanish power in South America. Known originally as the Presidency of Quito, it withdrew from the original Republic of Colombia, founded by Simon Bolivar by uniting the Presidency of Quito to the Vice-Royalty of New Granada (now Colombia) and the Captaincy-General of Venezuela. The Presidency of Quito became the Republic of Ecuador.

Under the present Constitution, promulgated March 26, 1929, the President is elected directly by the people for a term of four years; there is no Vice-President, but the Minister of the Interior succeeds in the event of a vacancy. The cabinet consists of six ministers, enjoying considerable power, both collectively and individually.

Congress consists of two Houses; the Upper has 32 senators (chosen for four years) elected in the following manner: one for each of the 15 well-settled provinces of the Interior and Coast; one for the 2 provinces of the 'Regional Oriental'; one representative for the Universities; one for Secondary and Special Education; two for Primary and Normal Education; one for the Press, Academies and Scientific Societies; two for Agriculture; two for Commerce; one for Industry; two for Labour; two for the country folk; one for the Army and one for the defence of the Indian race. The Chamber of Deputies (56, serving for two years) has one deputy for every 50,000 inhabitants for provinces with a population of over 100,000, and two deputies for provinces with less than 100,000 inhabitants. The Oriental provinces elect one deputy each. Electors are adults, of either sex, who are at least 21 years old and can read and write. Congress meets for a 90-day session on the 10th of August every year at Quito, the capital, without being summoned by the Government; the President may call an extraordinary session.

Privileges of rank and race are forbidden under the Constitution. Peonage, which had prevailed on many landed estates, was abolished on October 20, 1918. Since 1896 the Indians have been exempted from paying tribute, and have been admitted to citizenship, provided they could read and write.

The following is a list of the Presidents since 1897, with the date on which they took office:—

Gen. Don Eloy Alfaro, Jan. 17, 1897.
Gen. Don Leonidas Plaza G., Sept. 1, 1901.
Don Lizardo Garcia, Sept. 1, 1905.[1]
Gen. Don Eloy Alfaro, Jan. 15, 1906.
Gen. Don Emilio Estrada, Sept. 1, 1911.
Gen. Don Leonidas Plaza G., Sept. 1, 1912.
Dr. Don Alfredo Baquerizo Moreno, Sept. 1, 1916.
Dr. Don José Luis Tamayo, Sept. 1, 1920.
Dr. Don Gonzalo S. Córdova, Sept. 1, 1924.[1]
Provisional Juntas July 9, 1925—Apr. 1, 1926.
Dr. Don Isidro Ayora, Apr. 1, 1926.[4]
Col. Don Luis A. Larrea Alba, Aug. 25, 1931.[2]
Dr. Don Alfredo Baquerizo Moreno, Oct. 15, 1931.[3]
Period of revolutions Aug. 27—Sept. 2, 1932.
Dr. Don Alberto Guerrero Martinez, Sept. 2, 1932.[4]
Don Juan de Dios Martinez Mera, Nov. 1, 1932.[3]
Dr. Abelardo Montalvo, Oct. 20, 1933.[4]

[1] Deposed. [2] Deposed Oct. 15, 1931. [3] Deposed Aug. 27, 1932. [4] Provisional.

President.—Senor Dr. José M. Velasco *Ibarra,* elected December 16, 1933, following the impeachment and removal of President Martínez; assumed office September 1, 1934, to serve until August 31, 1938.

The Provinces are administered by Governors, appointed by the Government, and by elected provincial councillors; their subdivisions, or cantons, by political chiefs and elected cantonal councillors; and the parishes by political lieutenants. The Galapagos Archipelago is under the administration of a Territorial Chief.

Area and Population.

Since the frontiers of Ecuador have not been settled, no definite figure of the area of the country can be given. One official estimate shows 873,844 square kilometres (337,304 square miles), including the Archipelago of Colon (the 13 Galapagos Islands) with 7,844 square kilometres (3,028 square miles). Calculations of the geographer Wolf, also officially adopted, show 714,860 square kilometres (275,936 square miles). The country is divided into 17 provinces (two comprising the 'Region Oriental') and one territory —the Archipelago of Galapagos—officially called 'Colon,' situated in the Pacific Ocean about 600 miles to the west of Ecuador; there are 69 cantons, 109 urban parishes and 414 rural parishes.

So far no exact census has been taken. It was estimated (1929) that of the total the whites are 10 per cent.; Indians, 38 per cent.; mixed, 41 per cent.; lowland Indians, 1 per cent.; Negroes, 5 per cent.; others, 5 per cent. The foreign community is composed of about 12,000 persons. The language of the country is Spanish.

The estimated population of the Republic (December 31, 1933) was distributed as follows among the provinces (capitals in brackets):—

Provinces	Area in Square Miles (Wolf's estimates)	Population (Est. 1933)	Population per Square Mile
Esmeraldas (Esmeraldas)	5,464	43,383	8·0
Manabi (Puertoviejo)	7,891	235,077	29·7
Los Rios (Babahoyo)	2,295	104,547	45·5
Guayas (Guayaquil)	8,331	351,438	42·1
El Oro (Machala)	2,338	64,969	27·7
Carchi (Tulcán)	1,495	64,836	43·3
Imbabura (Ibarra)	2,414	129,872	53·7
Pichincha (Quito)	6,218	261,902	42·1
Leon (Latacunga)	2,595	176,831	68·1
Tungurahua (Ambato)	1,685	184,752	109·6
Chimborazo (Riobamba)	2,989	223,988	74·9
Bolivar (Guaranda)	1,159	82,513	71·1
Cañar (Azogues)	1,521	107,691	70·8
Azuay (Cuenca)	3,873	222,717	57·5
Loja (Loja)	3,705	156,847	42·3
Napo Pastaza and Santiago Zamora [1]	219,095	186,272	0·8
Galapagos Islands (San Cristobal)	2,868	2,031	0·7
Totals	275,936	2,600,116	9·4

[1] These two provinces, formed in 1925, together constitute the 'Region Oriental'; of their combined areas only about 110,000 square miles have any inhabitants.

The chief towns are the capital, Quito (about 107,192 in 1933), Guayaquil (126,717), Cuenca (43,542), Riobamba (22,427), Ambato (17,674), Loja (17,566), and Latacunga (16,051).

In 1933 there were 103,525 births, 58,175 deaths and 14,270 marriages.

Religion and Education.

The State recognises no religion, but grants freedom of worship to all. The Catholic Church has one archbishop (Quito) and six suffragan bishops. Since 1895 all State appropriations for the benefit of the Church have ceased. All members of the Episcopate are required to be Ecuadorian citizens. A decree of September 24, 1927, forbade the entry into the country of all foreign clergymen of whatever faith. Civil marriages are obligatory.

Primary education is gratuitous and obligatory. Secondary education is carried on in 21 secondary schools or colleges (6 private) and higher education in the Universities at Quito (founded in the eighteenth century by the Dominicans), Guayaquil, Cuenca, and the Law College at Loja. Private schools, both primary and secondary, are under some state supervision. Estimated expenditures for public education in 1934 are: superior education, 1,048,450 sucrés; secondary, 1,408,182; primary, 4,841,374; special education, 1,044,356; others, 280,080 sucrés; total, 8,718,222 sucrés. Actual expenditures, 1933, totalled 7,627,978 sucrés. There were (1934) 2,336 primary schools in the Republic, including 1,818 Government schools, 221 municipal, 71 farm schools, and 226 private schools. Enrolment at the primary schools (1934) was 172,046; at the 18 secondary schools, 3,663; at the Universities, 1,051; at the 4 training colleges for teachers, 2,466.

Justice and Crime.

The Supreme Court in Quito is the highest tribunal and consists of 11 justices elected by Congress for a term of 6 years. Of the eight superior courts two are composed of 6 judges, the remainder of 3 judges each, all elected by Congress for 6 years. There are 1,047 parochial justices. The popular jury was abolished in 1928; criminal and civil cases are heard before a 'special jury' consisting of 3 members of the Ecuadorean bar, or 'three citizens of recognised integrity' appointed annually by the superior courts. Capital punishment and all forms of torture are prohibited under the Constitution. Likewise imprisonment for debt and contracts involving personal servitude or slavery.

Finance.

The national budget estimates of revenue and expenditure for recent years are given as follows (at par 24·3 sucrés = £1 and 5 sucrés = 1 dollar U.S.; average, 1933, 25·39 sucrés = £1; for 1934, 30·56 sucrés = £1 or 6 sucrés = 1 dollar, U.S.).

—	1931	1932	1933	1934	1935
	Sucrés	Sucrés	Sucrés	Sucrés	Sucrés
Revenue . . .	61,476,500	49,115,440	49,220,000	48,970,000	50,160,000
Expenditure . . .	61,476,500	49,115,440	49,220,000	48,970,000	50,160,000

Customs receipts for year ending December 31, 1933, 11,490,838 sucrés.

The public debt on Jan. 2, 1934, was:—Foreign debt, including a small loan from the Swedish Match Company of 10,000,000 sucrés obtained in 1928, 25,749,425 dollars (U.S.); internal debt, 33,369,310 sucrés.

Defence.

The Ecuadorean regular army had a strength in 1934 of 583 officers and 4,224 men. This force is composed of 3 regiments of artillery, 10 battalions of infantry, 1 regiment and 3 squadrons of cavalry, 2 battalions of sappers, and 1 aviation company, which form the army. Military service was made

compulsory on May 24, 1921, but is not enforced. The regular infantry have the Mauser rifle; the artillery have Vickers Maxim, Z.B. machine guns, old-fashioned Krupps and new Ehrards. The country is divided into 4 military districts. A military school is established at Quito.

The Government has established at Quito an aviation school with Ecuadorean personnel. Flying fields have been established at Guayaquil, Quito, Latacunga, Loja, Manta and Riobamba.

Production and Industry.

Ecuador is divided into two agricultural zones: the coast regions and the lower river valleys, where tropical farming is carried on in an average temperature of 22° C.; and the hill country, the foothills, and the mountain valleys, adapted to grazing, dairying, and the production of cereals, potatoes, and the fruits and vegetables suitable to temperate climes, with an average temperature of 16° C. Only about 11,480,000 acres are actually cultivated, rendering an annual gross production of 416,000,000 sucrés. The staple produce of Ecuador is cocoa; a decline in output owing to the disease known as 'witch-broom,' has been checked. The production of cocoa was, in 1933, 23,922 metric tons (exports, 10,580 metric tons); in 1932, 30,047 metric tons (exports, 15,429 metric tons). Cocoa furnished, in value, 19·69 per cent. of total exports in 1933. Coffee is also grown; 7,007,224 kilos were exported in 1933. Rice production is increasing; output, 1933, 30,105,050 kilos; exports, 6,488,897 kilos. Wild rubber is abundant, but output has suffered from the competition of plantation rubber in the Orient. Mangrove bark (for tanning), alligator skins, and kapok (silk cotton tree fibre, *Bombax ceiba*) are exported in small quantities. Considerable attention is being paid to the cultivation of cotton, especially in the province of Manabí, and to sugar; ivory nuts, or *tagua*, are produced and exported in large quantities (24,497 metric tons in 1933).

Ecuador is auriferous. In 1933, 16,943 kilos of gold (cyanide ore) were exported. At Pillzhum in Cañar rich silver ore is found, but is not now worked. Output of petroleum in 1933 was 1,619,902 barrels; exports, 1,070,605 barrels. The area of oil concessions in exploitation in the Republic is 245,419 acres, located in the Santa Elana Peninsula, in the Province of Guayas. The country is known to be also rich in copper, iron, lead and coal; and sulphur exists in great quantities in the Chimborazo district and in the Galapagos Islands. All salt mined must be sold to the Government, which has a monopoly of imports, exports and sales.

Excepting the inter-Andean plateau and a few arid spots on the Pacific coast, Ecuador is a vast forest. Roughly estimated, 10,000 square miles on the Pacific slope extending from the sea to an altitude of 5,000 feet on the Andes, and the Amazon Basin below the same level containing 80,000 square miles, nearly all virgin forest, are rich in dyewoods, cinchona trees, and other valuable timber. The 'balsa wood,' renowned for its lightness and strength, is widely used in airplane construction.

Panama or 'Jipijapa' hats, made of *Toquilla* straw, are made very largely in Ecuador, the principal centres being Jipijapa, Montecristi, Tabacundo and Cuenca. The Government of Ecuador attempted to monopolise the hat business for its own people by placing a heavy export duty on 'paja toquilla,' but large quantities of the material still go to Peru; both Peru and Japan have become strong competitors of Ecuador in the manufacture of Panama hats. Exports in 1933 were 1,654,283 hats. In 1932 there were 628 operating flour mills, 20 sugar works, 8 breweries, and 29 textile factories, with capitalization of 11,500,000 sucrés.

Commerce.

The value of imports and exports for five years is given as follows in sucrés:

	1929	1930	1931	1932	1933
	Sucrés	Sucrés	Sucrés	Sucrés	Sucrés
Imports .	84,835,263	63,981,106	44,076,122	34,710,009	31,862,299
Exports .	86,036,822	80,646,539	56,660,170	49,297,809	44,281,761

Value of the principal imports and exports in 1932 and 1933 were:—

Imports			Exports		
—	1932	1933	—	1932	1933
	Sucrés	Sucrés		Sucrés	Sucrés
Cotton Goods .	5,687,368	5,738,052	Cocoa . . .	11,267,325	8,720,347
Metals, Jewellery	11,910,459	4,510,873	Petroleum . .	14,480,929	11,466,751
Foodstuffs . .	2,. 88,161	1,429,892	Coffee . . .	8,048.379	5,579,574
Machinery . .	1,830,290	3,209,221	Panama Hats .	2,714,903	2,438,353
Drugs, Chemicals	2,217,137	2,748,138	Ivory Nuts. .	1,126,403	2,962,922
Woollen Goods .	817,546	1,088,531	Gold Ore . .	6.799,299	7,530,250
Vehicles . .	1,020,2 4	1,138,285	Rice . . .	936,289	1,505,403
Silk & RayonGoods	840,717	1,179,222	Fruit . . .	373,057	492,527
Paper & Cardboard	1,297,193	1,362,835	Sugar . . .	1,642,322	559,427

The chief articles of import from Ecuador into Great Britain (according to Board of Trade returns) in 1933 consisted of cocoa of the value of 33,093*l.*; hides, 2,989*l.* The chief exports of British produce to Ecuador in 1933 were, cotton goods to the value of 52,578*l.*; chemicals, 14,237*l.*; iron and steel, 19,284*l.*

Total trade between Ecuador and the United Kingdom for five years (according to Board of Trade returns):—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Ecuador into U.K. .	165,063	109,375	127,799	69,405	209,837
Exports to Ecuador from U.K. .	392,280	260,676	198,873	208 208	191,679
Re-exports to Ecuador from U.K..	7,012	4,645	4,174	2,964	2,748

Shipping and Internal Communications.

Ecuador has 9 seaports, of which Guayaquil is the chief. During 1933, 275 steam and motor vessels entered, and 273 cleared from, Guayaquil.

Considerable progress in road improvement is being made. A motor road, 375 miles long, from the Colombian border to Babahoyo, a river town near Guayaquil, was opened in 1930. There are now 1,591 miles of main trunk roads, 1,121 miles of branch roads and 2,227 miles of bridle paths. There is river communication, improved by dredging, throughout the principal agricultural districts on the low grounds to the west of the Cordillera by the rivers Guayas, Daule, and Vinces (navigable for 200 miles by river steamers in the rainy season), and other small affluents thereof.

A railway is open from Durán (opposite Guayaquil) to Quito (287 miles). The total length of the 9 Ecuadorean railways actually in operation is 700 miles. The journey from Guayaquil to Quito takes two days, with a stop at

Riobamba. Railways for the development of local trade have been undertaken by several local authorities.

Quito is connected by telegraph with Colombia and Peru, and by cable with the rest of the world. Wireless telegraphy has been installed for domestic use; there are 17 stations in Quito, Guayaquil, Cuenca, Loja, Esmeraldas and other principal towns, as well as in the Galapagos.

In 1933 there were 317 post offices in the country and 4,221 miles of telegraph wires.

Banking and Credit.

Ecuador having no mint, the coin of the country is minted in England and the United States.

On March 4, 1927, a decree was issued establishing at Quito the 'Central Bank of Ecuador,' with a capital of 10,000,000 sucrés, the only body authorised to issue currency. It is organised to protect the country's gold reserves and its general functions resemble those of the Federal Reserve Banks of the United States. On December 31, 1933, the Central Bank had gold in its vaults, 14,347,572 sucrés; assets abroad, 4,749,553 sucrés; other reserves, 1.861,253 sucrés; total reserves, 20,958,378 sucrés; note circulation was 35,584.705 sucrés.

The 16 member banks affiliated with it had an aggregate capital and reserves (November 30, 1933) of 52,175,041 sucrés. A superintendent of Banks supervises commercial banks, which are required to have cash reserves equivalent to at least 25 per cent. of their demand deposits and to 10 per cent. of their time deposits.

Money, Weights, and Measures.

A new Monetary Law, prepared by the Kemmerer Financial Mission, was decreed on March 4, 1927. Under this law Ecuador returned to the gold standard with its currency stabilized at the rate of 24·3 sucrés to the £ or 5 sucrés per American dollar, the previous legal par value of the sucré having been 10 sucrés = £1 or 1 sucré = 48·665 cents U.S. But on February 8, 1932, when the gold holdings of the Central Bank had declined to 14,000,000 sucrés, the Government was forced to suspend the gold backing of the sucré, and on May 2, strict control of foreign exchange was instituted and not relaxed until December 4, 1933. The new gold sucré (named after the national hero, Marshal Antonio José de Sucre) contains 0·300933 grammes of pure gold, instead of the previous weight of 0·73224. It is divided into 100 centavos. Gold coins known as 'condors' (25 sucrés with a fine gold content of 7·523325 grammes), and 'double condors' (50 sucrés), are minted. Also silver 2 sucré (with a fine silver content of 7·02 grammes), 1 sucré and ½ sucré pieces, as well as 10 centavos, 5 centavos, 2½ centavos in nickel, and 1 centavo in copper. The currency consists almost entirely of the notes of the Central Bank in denominations of 5, 10, 20, 50 and 100 sucrés.

By a law of December 6, 1856, the metric system of weights and measures was made the legal standard of the Republic; but the Spanish measures are in general use. The quintal is equivalent to 101·47 pounds.

The meridian of Quito has been adopted as the official time.

Diplomatic and Consular Representatives.

1. Of Ecuador in Great Britain.

Consul-General and Chargé d'Affaires.—Senor Don Eduardo Wright.
First Secretary.—Senor Don Hernán Pallares Zaldumbide.
Honorary Attaché.—Francisco Cousiu.

2. Of Great Britain in Ecuador.

Envoy Extraordinary and Minister Plenipotentiary.—Victor Courtenay Walter Forbes (who is also Minister at Lima, Peru, where he resides), appointed October 9, 1933.

Chargé d'Affaires and Consul-General at Quito.—Hugh Stanford London.

There is a consular representative at Guayaquil.

EGYPT.

(Misr.)

Egypt was originally part of the Turkish Empire. On December 18, 1914, a British Protectorate over Egypt was declared, and the next day a Proclamation was issued deposing 'Abbâs Hilmi, lately Khedive of Egypt, and conferring the title of Sultan of Egypt upon Hussein Kamil, eldest living prince of the family of Muhammad Ali. The British Protectorate was recognised by France, Russia, Belgium, Serbia, Greece, Portugal, and the United States of America. Sultan Hussein Kamil died in 1917, and was succeeded by his brother. The Protectorate terminated on February 28, 1922, and the Sultan was proclaimed King on March 15, 1922.

King.

Fuad I. Ahmed Fuad, G.C.B., was born on March 26, 1868, son of the Khedive Ismail; succeeded his brother as Sultan on October 9, 1917; took title of King on March 15, 1922; married (1) Princess Chivekar, daughter of his cousin, Prince Ibrahim Ahmed, on May 30, 1896; divorced in 1898; (2) Queen Nazli on May 24, 1919; offspring (first marriage) Princess Fewkieh, born Oct. 6, 1897; married May 12, 1919, to Mahmud Pasha Fakhry; (second marriage) Prince Faruk, created Emir es Said, or Prince of Upper Egypt, December 13, 1933, born February 11, 1920; Princess Fawzieh, born November 5, 1921; Princess Faiza, born November 8, 1923; Princess Faika, born June 8, 1926 and Princess Fathia, born December 17, 1930.

According to Article 150 of the Constitution, the King's Civil List is fixed at £E150,000, and the Royal Family's Allowances at £E111,512.

The present sovereign of Egypt is the ninth ruler of the dynasty of Muhammad Ali, appointed Governor of Egypt in 1805, who made himself, in 1811, absolute master of the country by force of arms. On April 13, 1922, the King issued a Rescript fixing the order of succession to the Kingdom of Egypt and declaring the Throne hereditary in the dynasty of Muhammad Ali. The Rescript confirms the King's son, Prince Faruk, as Heir Apparent, and establishes the succession of Kings in the direct male line by primogeniture. Failing such direct line, it provides that the Throne shall pass first to the King's brothers and their direct descendants by right of age, whom failing to the King's uncles and their direct descendants by right of age, it being laid down that each new King establishes a new house and that the succession is vested in his direct line. Ex-Khedive Abbas Hilmy is expressly excluded from the throne of Egypt; however, such exclusion does not apply to his direct and legitimate descendants if they eventually acquire any right to the Throne.

Female members of the house and their descendants are excluded, also anyone who is not in possession of full mental powers, who is not a Moslem, or who is not the son of Moslem parents. The King's majority is fixed at 18 years, and in the event of his being a minor when he succeeds a Regency Council will be appointed either by his predecessor under a secret seal to be opened after his death and ratified by Parliament, or in default by Parliament. This Council will consist of three members chosen from Princes, ex-premiers, ministers and ex-ministers, and Presidents and ex-Presidents of whatever Houses of Parliament may exist.

Constitution and Government.

For an account of the government before 1922, *see* THE STATESMAN'S YEAR-BOOK, 1924, pp. 834–5. For an account of the Constitution which was promulgated on October 22, 1930, *see* THE STATESMAN'S YEAR-BOOK, 1934, pp. 827–828.

The 1930 Constitution was abrogated by royal decree on November 30, 1934, and Parliament was dissolved. A new Constitution was promised in the royal decree. Until after the establishment of a new Constitution the legislative and other powers of Parliament are vested in the Sovereign, governing through his Ministers. Government will be by decrees subject to subsequent ratification by a future Parliament.

The Cabinet, which was appointed on November 15, 1934, is as follows:—

Prime Minister and Minister of Interior.—Tewfik Pasha *Nessim.*
Minister of Foreign Affairs.—Aziz Pasha *Izzet.*
Minister of Agriculture.—Kamel Bey *Ibrahim.*

Minister of Finance.—Ahmed Pasha Abdel *Wahab.*
Minister of Justice.—Amin Pasha *Anis.*
Minister of Public Works and of Communications.—Abdel Meguid Bey *Omar.*
Minister of Education.—Neguib Bey *Hilali.*
Minister of Waqfs.—Abdel Aziz Bey *Mohamed.*
Minister of War.—Major-General Tewfik Bey *Abdullah.*

Local Government.

The Provincial Councils were endowed in 1909 with the powers of applying bye-laws, authorising public-markets, fixing the number and pay of ghaffirs (village watchmen), and authorising the creation of ezbas (hamlets). They are the local authorities in connection with elementary vernacular education and trade schools. They consist of two elected representatives from each Markaz. The Mudîr is the *ex-officio* President of the Council.

Egypt Proper is administratively divided into 5 governorships (muhâfzas) of principal towns, and 14 mudirias or provinces, subdivided into districts or Markazes.

In fourteen towns (Alexandria, Mansûra, Medînet el-Faiyûm, Tanta, Zagazig, Damanhûr, Beni Suêf, Mahalla el-Kubra, Minya, Mît Ghamr, Zifta, Kafr el-Zayât, Benha, and Port Said), Mixed Commissions composed of both Europeans and Egyptians in equal numbers have been formed to govern locally the towns and look after their interests.

With the exception of Alexandria, all Mixed Commissions have the power to impose taxes on all residents in the town alike, but in case of non-Egyptian residents taxes can only be obtained from those who have already given their express consent to be taxed for municipal purposes.

The Municipal Commission of Alexandria obtained in 1890 from European Powers full power to impose local taxation on all residents in the town.

In 56 other towns, another form of local commission exists with four elected members only. Foreign members, not to exceed two in number, can be nominated at the discretion of the Central Government.

These local commissions have practically the same taxing powers as the Mixed Commissions mentioned above.

A third form of local commissions was formed in 1918 under the name of Village Council and exists now in 39 towns in Egypt. This is composed of four elected members only, but without any power of nomination of Foreign members. It has more or less the same taxing power as the Mixed Commissions.

The Central Government has complete power of Veto on all decisions of every form of Commission in Egypt.

Area and Population.

The total area of Egypt proper, including the Libyan Desert, the region between the Nile and the Red Sea, and the Sinai Peninsula is about 383,000 square miles; but the cultivated and settled area, that is, the Nile Valley, Delta and Oases covers only about 13,600 square miles. Canals, roads, date plantations, &c., cover 1,900 square miles; 2,850 square miles are comprised in the surface of the Nile, marshes, and lakes. Egypt is divided into two great districts—'Wagh-el-Bahri,' or Lower Egypt, and 'El-Said,' or Upper Egypt.

The following table gives the area of the settled land surface, and the results of the census taken in 1917 and on February 18–19, 1927:—

Administrative Divisions	Area in sq. miles (approx.)	1917 Census	1927 Census			Population per sq. mile 1927
		Total	Males	Females	Total	
Cairo	62	790,939	558,742	505,825	1,064,567	17,170

Nomads (estimated)	—	32,663	—	—	40,000	—
Grand Total	—	12,750,918	—	—	14,217,864	—

In 1925, Egypt ceded to Italian Cyrenaica the oasis of Gaghbub. (For the new frontier between Egypt and Cyrenaica, see map in the 1927 edition of the STATESMAN'S YEAR-BOOK.)

Births registered, 1931, 664,631; deaths, 397,706; 1932, births, 642,597; deaths, 431,148; 1933, births, 667,063; deaths, 420,755.

The principal towns, with their populations, according to the census of 1927, are:—Cairo, 1,064,567; Alexandria, 573,063; Port Said, 104,603; Tanta, 90,016; Mansûra, 63,676; Asyût, 57,136; Faiyûm, 52,863; Zagazig, 52,839; Damanhûr. 51,709; Mahalla el Kubra, 45,642; Minya, 44,325; Suez, 40,523; Beni Suêf, 39,595; Damietta, 34,907; Benha, 28,626; Qena, 27,658; Shibîn el-Kôm, 27,440; Gîza, 26,921; Sohâg, 25,289; Rosetta, 23,048; Aswân, 16,458.

Religion and Education.

In 1927, the population (excluding 40,000 Nomads) consisted of 12,929,260 Moslems; 999,170 Orthodox; 66,080 Protestants; 116,660 Latins and Uniats; 63,550 Jews; 3,144 others and unknown. Thus Moslems formed 91·19 per cent. of the population; Christians, 8·34 per

cent.; Jews, 0·45 per cent.; others, 0·02 per cent. The principal seat of Koranic learning is the Mosque and University of El-Azhar at Cairo, founded in the year 361 of the Hegira, being 972 of the Christian era. Other centres of higher learning (Islamic Religious Institutions) are the Institutes of Alexandria (Mashiakhet 'Ulamâ el Iskandarîya), Tanta (Ahmadi Mosque), Asyût, Dîsûg (Mosque of El Dîsûgi), Dămietta (Ashrafîya Institute and El Bahr Mosque), and Zagazig. All these institutions are under the supervision of the Council of the University of El-Azhar.

There are in Egypt large numbers of native Christians connected with the various Oriental churches; of these, the largest and most influential are the Copts, the descendants of those ancient Egyptians who adopted Christianity in the first century of the Christian era. Their head is the Coptic Patriarch Mgr. Yoannes XIX, who was consecrated on December 16, 1928. There are three metropolitans and twelve bishops in Egypt, one metropolitan and five bishops in Abyssinia, and one bishop for Khartum; there are also archpriests, priests, deacons, and monks. Priests must be married before ordination, but celibacy is imposed on monks and high dignitaries. The Copts use the Diocletian (or Martyrs') calendar, which differs by 284 years from the Gregorian calendar.

Scattered throughout the country there have existed from time immemorial a number of indigenous schools called 'Maktabs.' In 1897, the Ministry of Education endeavoured to bring these independent 'Maktabs' voluntarily under Departmental supervision by means of a system of inspection and reward. Government aid was made dependent upon daily instruction being given in reading, writing, and arithmetic, apart from any religious teaching, and upon the school reaching a satisfactory level of efficiency. The extent to which the scheme has developed is shown in the following table :—

Year	Maktabs awarded grants-in-aid and under inspection				
	Number of Maktabs	Attendance			Grant-in-aid £E
		Boys	Girls	Total	
1928–29	2,271	166,628	32,168	198,796	18,648

Education was made compulsory for all children between the ages of 7 and 12 by a law passed in April, 1933.

The following table gives statistics concerning the schools under the immediate direction of the Egyptian Government in 1932–33. The schools marked with an asterisk are administered by the Provincial Councils or by Departments other than the Ministry of Education.

Justice.

Before 1883 the only native tribunals in the country were the *Mehkemas*, presided over by the *Qâdis*. At the present time, they retain jurisdiction only in matters of personal law (marriage, succession, &c.), and *wakfs*—the latter being either charitable foundations, or family settlements with an ultimate remainder in favour of a charitable foundation—and also in certain non-religious cases (*e.g.* succession) between non-Moslem natives. Other Courts of Personal Status, the *Magalis Hasbya* (reorganised by a Law of October, 1925), deal with the appointment of tutors; the interdiction of incapable persons and the nomination of guardians for them; the nomination of mandatories for the absent, and the control of the persons so appointed or nominated. In matters of personal law other than intestate succession, non-Mussulmans are, however, in general subject to their own Patriarchate, or other religious authority. In other matters, natives are justiciable before the so-called Native Tribunals established in 1883. These now consist of 93 Summary Tribunals and of four Judicial Delegations, each presided over by a single judge, with civil jurisdiction in matters up to

£E250 in value, and criminal jurisdiction in offences punishable by fine or by imprisonment up to three years, except in cases relating to the trafficking in narcotics where the period rises up to 5 years and a fine not exceeding £E1,000. That is, police offences and misdemeanours; ten Central Tribunals, each of the Chambers of which consists of three judges; and two Courts of Appeal, one at Cairo and the other at Asyût. Under a law of 1904, there are also weekly sittings of the Markaz Tribunals (to the number of 29) in the Governorates of Cairo, Alexandria, Port Said, Suez, and Ismailia for the disposal of petty offences, the judge having powers up to three months' imprisonment or fine of £E10, and the prosecution being conducted by the police. Civil cases not within the competence of the Summary Tribunals are heard in first instance by the Central Tribunals, with an appeal to one of the Courts of Appeal. The Central Tribunals also hear civil and criminal appeals from the Summary Tribunals. Since 1905 serious crimes (and, under a law of 1911, and a decree of 1925, all press offences) are tried at the Central Tribunals by three judges of the Court of Appeal sitting as an Assize Court, assizes being held monthly. By a law of 1931 a separate Court of Cassation over and above the Courts of Appeal was set up. The new Court of Cassation is composed of ten Judges divided into two Chambers of 5 Judges each, one for Civil and the other for Criminal cases. The prosecution before Summary Tribunals and Assize Courts is entrusted to the *Parquet*, which is directed by a *Chef de Parquet*, having under him a Substitut or Substitut-Adjoint at each Summary Tribunal of the circumscription; the investigation of crime is ordinarily conducted by the *Parquet*, or by the police under the direction of the *Parquet*: cases going before an Assize Court are further submitted to a special committing judge. Offences against irrigation laws, &c., are tried by special administrative tribunals.

The so-called 'Cantonal' Courts (numbering approximately 240) composed of village notables, created in 1912, with a general civil jurisdiction in suits up to £5 in value and a petty criminal jurisdiction were suppressed by Law No. 34 of 1930, their jurisdiction being transferred to the Summary Tribunals.

Owing to the Capitulations, which still apply to Egypt, foreigners who are nationals of Powers possessing capitulatory rights are exempted from the jurisdiction of the local tribunals. Mixed tribunals were instituted in 1875, consisting partly of native and partly of foreign judges, with jurisdiction, in civil matters, between natives and foreigners and between foreigners of different nationalities, or even between foreigners of the same nationality if the dispute relates to land in Egypt. These Tribunals have, also, a limited penal jurisdiction, notably in cases of police offences, offences against the bankruptcy laws, and misappropriation of property seized by order of the tribunal. There are three Mixed Tribunals of First Instance, with a Court of Appeal sitting at Alexandria.

Finance.

Revenue and expenditure for six years :—

Years	Revenue	Expenditure	Years	Revenue	Expenditure
	£E	£E		£E	£E

Total	37,139,881	31,661,500	Total	37,139,881	31,661,500

[1] The budget for the railways, telegraphs and telephones are now separated from the general budget. For 1934–35 receipts for the former were £E4,910,000; expenditure, £E5,313,000; receipts for the latter, £E816,500; expenditure, £E900,500.

[2] Including interest on railways, telegraphs, and telephones funds.

[3] Including frontiers administration.

The foreign debt of Egypt began in 1862, when loans amounting to 3,292,800*l.* were issued for the purpose of extinguishing the floating debt. Other issues followed in rapid succession. The dual control by England and

France began in 1879. In January, 1880, the two Controllers-General reported that Egypt could not possibly meet her engagements in full, and in July the Liquidation Law, in accordance with the recommendation of an International Commission of the Great Powers, was promulgated. By this law the Unified Debt was reduced to 4 per cent. interest; further conversions were made, and the Unified Debt thus increased to 57,776,340*l.*; certain unconsolidated liabilities were added to the Preference debt, which thus rose to 22,587,800*l.*; and the Daira Sania debt was increased to 9,512,900*l.*, the interest being reduced to 4 per cent. In 1885 and subsequent years further loans and conversions were entered into.

The Daira Sania and the Domains loans were paid off on October 15, 1905, and June 1, 1913, respectively. The amount and the charge of the various debts in April, 1934, were as follows:—

—	Debt	Charge
	£ sterling	£ sterling
Guaranteed Loan, 3 per cent.	3,071,000	315,000
Privileged Debt, 3½ per cent.	30,623,980	1,072,189
Unified Debt, 4 per cent.	55,250,460	2,210,018
Total	88,955,440	3,597,207

The charges on account of debts of all kinds (including tribute), as shown in the estimates for 1934–35, amount to £E4,195,205.

In 1888 and 1890, reserve funds were established, the balances of which, in virtue of the Anglo-French Convention of April 4, 1904, were placed at the disposal of the Egyptian Government in 1905, less certain sums remaining in the hands of the Caisse de la Dette Publique for the service of the debt. The amount received by the Egyptian Government was carried to a General Reserve Fund. In this Fund on April 30, 1933, there was a balance of £E31,440,929. Of this amount £E13,099,419 represents the engaged Reserve.

Defence.

Egyptian Army.

By the terms of the British recognition of the independence of Egypt defence is for the present reserved and remains under British control. Service in the army is compulsory, but, owing to the small contingent required, only a fraction (approximately 4 per cent.) of the men who are liable actually serve. Service is for five years with the colours and five years in the reserve. The army consists of 2 squadrons of cavalry, 4 batteries and 1 garrison company of coast-guards and artillery, 1 motor machine gun battery, 11 battalions of infantry, and various departments. A few of the higher posts are held by British officers. The strength of the army was 11,638 in 1933–34, of which 568 Egyptian officers and 13 British officers, excluding coast-guards and His Majesty's Body-guard. The strength of the latter is approximately 40 officers and 1,100 other ranks. The air force consists of: 18 aeroplanes, 4 British officers, 14 Egyptian officers and 116 other ranks.

Army of Occupation.

In 1934, the normal British garrison consisted of 3 regiments of cavalry, 3 batteries R.H.A., 3 batteries Light Brigade R.A., 2 companies of engineers and 6 battalions of infantry in Egypt and 2 in the Sudan, and 2 armoured car companies (as well as companies of medical, ordnance, Pay, Service, Signal, and Veterinary departments), the strength being 11,900. Egypt is also the Headquarters of the Middle East Air Command, and contains four squadrons of aeroplanes and a number of air depôts.

Navy.

There are two patrol vessels, *El Amir Farouq* and *El Amira Fawzia*, and the fishery research vessel *Mabahiss*, maintained by the Coastguard and Fisheries Department; the transport *Sollum* (ex-British sloop *Syringa*) and some smaller vessels, under the Ports and Lighthouses Department; and the Royal yacht *Mahroussa*.

Production and Industry.

The cultivable area of Egypt Proper was reckoned in 1932–33 at 8,308,698 feddâns (1 feddân = 1·038 acre), and of this 825,930 were taken up for public utility purposes and 2,119,085 were uncultivated for want of reclamation. The *corvée*, or forced labour, has been abolished, but the inhabitants are still called out to guard or repair the Nile banks in flood time. The agricultural population (Fellahîn) forms about 62 per cent. of the whole. A large proportion of them are small landholders with under 51 feddâns, while others, almost or altogether landless, are labourers, the relation between the employers and the employed being mostly hereditary. The following table shows, on December 31, 1933, the number of landholders and the distribution of the land among foreigners and natives :—

Extent of holding in feddâns	Foreigners		Natives		Total of area		Total of Landowners	
	Area in feddâns	Land-owners	Area in feddâns	Land-owners	Feddâns	Per-centage	Land-owners	Per-centage
Up to 1	961	2,081	619,851	1,584,528	620,812	10·7	1,586,609	68·9
From 1-5	4,199	1,691	1,149,293	553,034	1,153,492	19·8	554,725	24·2
,, 5-10	4,347	594	370,016	84,332	574,363	9·9	84,926	3·7
,, 10-20	7,411	526	527,816	39,243	535,227	9·2	39,769	1·7
,, 20-30	8,314	336	279,424	11,598	287,738	4·9	11,934	0·5

Over 50	478,932	1,161	1,806,373	11,438	2,285,305	39·3	12,599	0·6
Total .	519,592	6,775	5,298,798	2,293,204	5,818,390	100·0	2,299,979	100·0

Extensive reservoir works, consisting of a dam at Aswân, a barrage at Esna, a barrage at Nag' Hammâdi (completed in October, 1930), a barrage at Asyût, and a barrage at Zifta, have been completed. The original storage capacity of the Aswân reservoir was 1,065,000,000 cubic metres. The level of the dam has been raised by 6 metres and the capacity of the reservoir increased to 2,423,000,000 cubic metres. Another heightening by 7 metres was completed in 1933; and the capacity of the reservoir finally increased to 5,670,000,000 cubic metres. The Nag' Hammâdi barrage secures the irrigation of Girga Province and part of Qena Province regardless of low flood. The barrage at Esna ensures adequate irrigation to a large area of basin land even in a year of low Nile.

The area and production of cotton in six years were :—

Season	Area. Feddâns	Crop. Qantârs	Season	Area. Feddâns	Crop. Qantârs
1929-30	1,841,478	8,531,172	1932-33	1,093,701	4,956,047
1930-31	2,082,420	8,275,749	1933-34	1,804,209	8,575,112
1931-32	1,682,938	6,357,000	1934-35 [1]	1,731,958	8,216,701

[1] Estimates.

In 1933–34, the area and yield of wheat were 1,388,673 feddâns and 6,763,408 ardebs; barley, 274,061 feddâns and 1,638,876 ardebs; beans, 431,590 feddâns and 1,766,096 ardebs; lentils, 87,636 feddâns and 305,561 ardebs; onions, 39,273 feddâns and 5,688,355 ardebs; maize, 1,578,214 feddâns and 10,541,525 ardebs; millet, 263,454 feddâns and 2,167,142 ardebs; rice, undecorticated, 422,000 feddâns and 1,828,931 ardebs; sugar-cane, 70,799 feddâns and 51,248,248 ardebs.

In 1933, there were in Egypt 33,988 horses, 753,346 donkeys, 18,789 mules, 912,018 cows, 856,610 buffaloes, 1,314,681 sheep, 679,749 goats, 153,898 camels, and 13,205 pigs.

The principal mineral products in 1933 were (in metric tons): phosphate rock, 740,632; petroleum, 237,725. Other products are: Ochres, sulphate of magnesia, talc, building stones, clay, gypsum, natron, nitrate of soda, salt, and turquoise. The following minerals are also known to exist, namely, alum, copper ore, beryl, granite, ornamental stones, and sulphur.

The fishing industry is of some importance. The catch of the Egyptian sea and lakes fisheries in 1933 amounted to 37,638 metric tons, and 4,395 metric tons Nile fisheries. On January 1, 1934, there were 8,750 boats licensed for fishing.

Commerce.

Total (including all others)	27,425,691	26,766,991	26,987,417	28,846,258

[1] The cotton piece goods imported amounted in 1933 to £E3,524,601; in 1932 to £E3,491,896. The quantity of raw cotton exported was, in 1933, 7,854,101 qantârs, valued at £E21,379,646; in 1932, 6,698,545 qantârs, valued at £E17,366,694.

Of the total imports in 1932, the value of £E21,501,982 and of the exports, £E23,789,660 passed through the port of Alexandria and Western Land Frontier; in 1933, the corresponding figures were £E20,460,934 and £E26,361,058 respectively.

Principal imports into the United Kingdom from Egypt, and the principal exports from the United Kingdom to Egypt, according to British Board of Trade returns :—

Year	British Imports from Egypt				Exports of British Produce to Egypt			
	Raw Cotton	Cotton Seed	Onions	Oil Seed Cake	Cotton Goods	Coal.	Iron & Steel and Manufactures	Woollen Goods
	£	£	£	£	£	£	£	£
1929	17,768,068	3,091,181	578,091	968,345	3,434,862	1,869,395	948,925	526,671
1930	9,328,944	2,230,406	273,709	873,158	2,417,229	1,540,798	812,429	395,347

Total trade between Egypt and U.K. (in thousands of pounds sterling) for 5 years (Board of Trade returns) :—

	1930	1931	1932	1933	1934
Imports from Egypt into U.K.	13,908	10,841	10,388	12,387	11,500
Exports to Egypt from U.K.	9,803	6,650	6,510	6,260	6,533
Re-exports to Egypt from U.K.	192	158	122	184	2 6

Shipping and Navigation.

In 1933, excluding warships and vessels requisitioned by the military authorities, 8,202 steamers of a net registered tonnage of 30,433,376 entered at, and 8,201 steamers of a net registered tonnage of 30,442,084 departed from, all the Egyptian ports (Alexandria, Port Said, Suez, Tor, El Qoseir, Safâga, Hurghada, Abu Zenima, Sidi Barrani, Marsa Matrûh and Sollûm).

Suez Canal.

The Suez Canal is 103 miles long (including 4 miles of approach channels for the harbours), connecting the Mediterranean with the Red Sea. It was opened for navigation November 17, 1869. The concession to the Suez Canal Company expires on November 17, 1968.

The following table shows the number and net tonnage of commercial vessels (excluding vessels requisitioned by the military authorities) of all nationalities that passed through the Canal in 1933.

Nationality	No. of transits	Suez Canal net tonnage	Nationality	No. of transits	Suez Canal net tonnage
British . .	2,902	16,482,159	Greek . .	83	274,439
American . .	71	473,548	Italian . .	323	1,754,722
Danish . . .	79	436,004	Japanese . .	251	1,382,935
Dutch . . .	349	2,407,351	Norwegian . .	283	1,439,659
Belgian . .	2	12,836	Swedish . .	106	510,316
French . . .	311	2,050,638	Russian . .	75	285,648
German . .	465	2,755,629	Other nationalities	22	97,274
			Total . .	5,322	30,363,158
			Total (1934) .	5,663	31,750,802

[1] Including Anglo-Egyptian Sudan.

The number of Government vessels (war ships and transports) that passed through the Canal in 1933 was 94 of 310,982 Suez Canal net tonnage (including 73 British of 259,478 net tonnage).

The number and net tonnage of vessels that have passed through the Suez Canal (including warships), and the gross receipts of the company, have been as follows in six years :—

Year	No. of Transits	Net Tonnage	Receipts	Year	No. of Transits	Net Tonnage	Receipts
			Frs.				Frs.
1929	6,274	33,466,014	1,189,958,441	1932	5,029	28,353,859	795,920,000
1930	5,761	31,668,759	1,098,547,510	1933	5,416	30,677,140	851,910,000
1931	5,366	30,027,966	979,877,487	1934	5,663	31,750,802	856,410,000

The number of passengers (civil and military) who went through the canal was, in 1930, 305,202; 1931, 270,657; 1932, 263,838; 1933, 249,041.

Internal Communications.

In 1933, there were 3,422 miles of rails belonging to and worked by the State, including 2,489 miles of main line, 155 miles of branch line, and 778 miles of sidings. There were also 883 miles of rails of agricultural light railways owned by private companies besides 103 miles of sidings. The State railways have a gauge of 4 ft. 8½ in. inside rails (the line, 124 miles in length, from Luxor to Assuan being opened on wide gauge in Dec. 1926), except that to the Western Oases, which is 2 ft. 5½ in.

The number of passengers carried in 1932–33 was 32,221,296; weight of goods carried, excluding service transports, 4,773,000 tons; and the net receipts, £E1,469,343. The working expenses, £E3,273,530 in 1932–33, represent an average of 69 per cent. of the gross receipts, which were £E4,742,873

The telephones have belonged to the Egyptian Government since April,

1918. On April 30, 1933, the telegraphs had a length of 54,712 miles of wire, telephones and trunks 248,977, and railway telephones 4,175. The Eastern Telegraph Company, by concessions, have telegraph lines across Egypt from Alexandria via Cairo to Suez, and from Port Said to Suez, connecting their cables to England and India. The number of telegrams in 1932–33 was: local, 2,104,374 commercial and 1,911,801 service; foreign, 404,003 forwarded and received. The number of telegrams forwarded and received by wireless stations in 1932–33 was 27,662, and by Marconi Radio Telegraph Co., 466,100.

There were, in 1933, 4,205 post offices and stations. In the inland service (1933) there passed through the post-office 106,789,000 ordinary and registered articles of correspondence; 11,258,264 ordinary and registered articles of correspondence, and 18,205,385 were despatched and received to and from abroad respectively. Receipts £E676,287; expenses £E657,934.

There are two regular weekly air mail services between Egypt and Europe, between Egypt and India, and also one regular weekly air mail service between Cairo, the Sudan, and South Africa.

Banks and Credit.

The National Bank founded in 1898 has the privilege of bank-notes issue. It has a capital of 3,000,000*l.* with reserve funds amounting to 3,000,000*l.* Le Crédit Agricole d'Egypte was founded in November, 1930, with a capital of £E1,000,000 (half subscribed by the Government).

On December 31, 1931, there were six mortgage banks and nine ordinary banks working chiefly in Egypt with a total paid up capital of £E16,819,183, *i.e.*, £E9,856,923 for the former, and £E6,962,260 for the latter. Debentures of the mortgage banks amounted to £E34,789,687. The reserve funds (including profits carried forward) of these two groups of banks amount to £E6,274,170 and £E4,533,807 respectively.

In 1901, a Post-Office Savings Bank was opened, and on December 31 of that year, it had 6,740 depositors with balances amounting to £E47,492. On December 31, 1933, the depositors numbered 365,477, and their balances amounted to £E4,491,161.

In April, 1912, a rural savings bank service was inaugurated. At the end of that year the balance of deposits in the new branch amounted to £E25,413, and the number of accounts to 127,927. On December 31, 1928, the balance amounted to £E5,983, and the number of accounts to 517. At the beginning of 1929, this service was cancelled. The balance of deposits in the savings banks of the foreign banks at the end of 1933 amounted to £E2,503,970 and the number of depositors to 33,335.

Money, Weights, and Measures.

Money.

By decree of October 18, 1916 (20 Zi-l-Higga 1334), the monetary unit of Egypt is the gold Egyptian pound of 100 piastres. It weighs 8·5 grammes ·875 fine, and therefore contains 7·4375 grammes of fine gold. Its value in sterling is £1 0*s.* 6½*d.* A new coinage was introduced at the same time in which the *Tughra* of the Sultan of Turkey was superseded by that of the ruler of Egypt.

The 10-piastre silver piece weighs 14 grammes ·833 fine, and therefore contains 11·67 grammes of fine silver. The piastre is worth 2·46*d.* in English money. It is subdivided into tenths (ushr el girsh or millièmes).

Coins in circulation are the Egyptian pound (100 piastres) and half pound

in gold; 20, 10, 5, and 2 piastre pieces in silver; 1, ½, ⅕ piastre pieces in nickel, $\frac{1}{10}$ and $\frac{1}{20}$ pieces in bronze. Silver coin is legal tender only up to £E2, and nickel or bronze coins up to 10 piastres. For some years gold coins have not been issued, and the gold circulating in Egypt and the Sudan is almost exclusively British sovereigns, which are legal tender at the rate of 97½ piastres. The gold pieces of the former Latin Monetary Union equivalent to the French 20 franc piece are permitted to circulate at a uniform rate of £E0·7715.

Bank notes are issued by the National Bank in various denominations: £E1, 5, 10, 50, 100. They are in principle not legal tender, but since the war they have been made legal tender and inconvertible. The amount in circulation at the end of December, 1933, was £E21,600,000, for which the gold cover was £E6,240,583. In 1918 the Government issued currency notes of 10 piastres and 5 piastres, but these have now been withdrawn, and the amount of currency notes in circulation has shrunk from £E1,715,000 in September, 1920, to £E50,588 at the end of December, 1933.

The principal units of Egyptian weights and measures are defined in terms of the metre of the 'Commission Internationale du mètre' by the Law No. 9 of September 26, 1914. The equivalents remain the same as were defined by the Decree of April 28, 1891.

Measures of length:	*Diraa baladi*	=	0 metre 58 centimetres.
,, ,,	*Diraa mi' mâri*	=	0 metre 75 centimetres.
,, weight:	*Dirhem*	=	3 grams 12 centigrams.
,, capacity:	*Ardeb*	=	198 litres.

Measure of Capacity.

The *Ardeb* is equal to 43·555 gallons, or 5·44439 bushels.

The approximate weight of the ardeb is as follows:—Wheat, 334 rotls; beans, 345 rotls; barley, 267 rotls; maize, 312 rotls; cotton seed, 270 rotls.

Weights.

Oqîa		=	1·3207 ounce.
Rotl		=	·99049 lb.
Oke		=	2·7513 lbs.
Qantâr	or 100 Rotls or 36 Okes	=	99·0493 lbs.

Length Measures.

		Inches
Diraa Baladi (for textiles)	=	22·8347
Diraa Mimâri (for building, &c.)	=	29·5276
Qasaba (for agricultural land) = 3·8823 yards	=	139·7639

Measures of Surface.

Feddân, the unit of measure for land, = 7,468·148 sq. pics = 1·03805 acres.
1 sq. pic = 6·0547 sq. ft. = 0·5625 sq. metre.

Diplomatic Representatives.

1. Of Egypt in Great Britain.

Envoy and Minister.—Hassan Sabry.
Counsellor.—A. R. Hakki.
Secretary.—Hassan Moharram.

2. OF GREAT BRITAIN IN EGYPT.

His Majesty's High Commissioner for Egypt and the Sudan.—Sir Miles Wedderburn Lampson, K.C.M.G., C.B., M.V.O. (Entered on his duties January 7, 1934.)

Counsellor.—D. V. Kelly, M.C.

Secretaries.—A. F. Yencken, M.C., H. L. d'A. Hopkinson and G. P. Labouchère.

Oriental Secretary.—W. A. Smart.

Assistant Oriental Secretaries.—L. B. Grafftey-Smith, O.B.E., and T. C. Ravensdale.

Commercial Secretaries.—G. H. Selous, O.B.E., and S. R. Jordan.

There are Consuls General at Alexandria and Cairo, a Consul at Port Said, and a Vice-Consul at Suez.

ESTONIA.

(Eesti Vabariik.)

The Estonian Republic is situated on the Eastern shore of the Baltic Sea. South of the Gulf of Finland between 57° 27′ and 59° 42′ North Latitude and 21° 46′ and 28° 21′ Longitude (Greenwich), and includes the Baltic Islands Saaremaa (Oesel), Hiiumaa (Dagö), and Muhumaa (Moon). The Eastern border towards Russia is formed by Lake Peipsi and the Southern by the Republic of Latvia.

In 1721, the country, which had belonged to Sweden since the early part of the seventeenth century, was handed over by Sweden to Russia, and remained under the rule of the latter until 1917. In 1917, after the outbreak of the Russian Revolution, Estonia regained her independence, which was declared on February 24, 1918. By the Treaty of Tartu, of February 2, 1920, Soviet Russia recognised the independence of Estonia. On January 26, 1921, the Supreme Council accorded the Republic *de jure* recognition.

The national flag of Estonia is blue, black and white in horizontal stripes.

Constitution and Government.—The first Constitution of the Estonian Republic was passed by the Constituent Assembly on June 15, 1920, and has been in force since December 21, 1920.

The second Constitution, which came into force on January 24, 1934, provides for the election by the people every 5 years of a President, who is given wide powers, including those of conducting internal and foreign policies, legislating by decree, drafting the budget, dismissing ministers, and dissolving the Diet. This Assembly is composed of 50 members, elected every 4 years on the basis of proportional representation, and by universal, direct, equal, and secret suffrage.

The elections for the Estonian State Assembly were held on May 20–22, 1932, and resulted in the return of the following parties:—Agrarians and Settlers, 42; National Middle Party, 23; Socialists, 22; Left Workers, 5; Russian Minority, 5; German and Sweden Minorities, 3.

Pending the election of the President, according to the new constitution, his duties and rights are exercised by the Prime Minister.

A third Constitution is in contemplation which will be Corporative in character, will abolish all political parties and will replace the Diet by Corporations.

Pro-President and Prime Minister.—Konstantin *Päts*, appointed October 21, 1933.

Since March 12, 1934, an 'authoritarian' government, virtually a dictatorship directed against Fascism, has been ruling the country, the Diet being prorogued.

Area and Population.—The boundary line between Estonia and Russia is defined by the Peace Treaty of February 2, 1920. The boundaries between Estonia and Latvia were settled on November 1, 1923. The total area is about 47,548 square kilometres, or 18,353 square miles.

The population of 1,126,383 (according to the census of March 1, 1934) is composed as to 87·7 per cent. of Estonians, 1·7 per cent. of Germans (Balts), and 10·6 per cent. of Russians and other nationalities.

The Republic is divided into eleven districts, as follows (the capitals are given in brackets :—Harju (Tallinn), Viru (Rakvere), Järva (Paide), Lääne (Haapsalu), Tartu (Tartu), Võru (Võru), Viljandi (Viljandi), Pärnu (Pärnu), Saaremaa (Kuresaare-Arensburg), Petseri (Petseri), and Valga (Valk). The capital, Tallinn, was founded in 1219 at the mouth of the Gulf of Finland, and in 1934 had 135,738 inhabitants. The university town of Tartu had 76,000 inhabitants. The population of the port of Pärnu, on the Gulf of Riga, was 20,000, and that of the manufacturing town of Narva 24,000.

Religion and Education.—There is no State religion in Estonia. Five-sixths of the population are Lutherans, the rest Greek Orthodox, Catholics, &c.

Elementary education is obligatory and gratuitous. In 1932-33, there were 1,253 elementary schools in the Estonian Republic. Of this number 1,229 were supported by local authorities and 24 were private schools. The number of middle schools for general education, gymnasiums, and so on, was 69, of which number 25 were private schools.

For special or professional education there are 2 teachers' seminaries, 2 navigation schools, commercial schools with three years' course, agricultural schools with a 1-3 years' course and industrial schools with a 3-6 years' course.

The minority nationals (Germans, Russians, Swedes, Jews, and Letts) receive education in their mother tongue.

For higher education there are the Tartu (Dorpat) University (founded in 1632), which on December 1, 1919, was re-opened as an Estonian seat of learning maintained by the Government; number of students (1933), 2,842 (1,996 men and 846 women).

Justice.—The supreme judicial power is invested in the State Court of Justice, which is elected by the State Assembly and sits in Tartu (Dorpat).

The laws are being gradually revised by the State Assembly.

Finance.—Revenue and expenditure for five years were as follows (in thousand Estonian kroons):—

	1931-32	1932-33	1933-34 [3]	1934-35 [3]	1935-36 [3]
Revenue [1]	85,059	66,119	61,955	64,000	69,500
Expenditure [2] ...	87,086	68,509	61,955	64,000	69,500

[1] Including receipts from loans (1929-30, 1,367, 4,600; 1930-31, 7,215; 1931-32, 3,900).
[2] Including expenditure from loans. [3] Estimates.

The foreign debt of Estonia (January 1, 1934) was as follows:—17,787,280 dollars to the United States, 1,278,262*l.* to United Kingdom, 8,141,289 kronor to Sweden. Financial reform loan (1927), 3,696,500 dollars and 656,200*l.*

Defence.—Military service is compulsory. The period of service in the active army is 1 year. The army is organised in 3 divisions. The peace strength in 1931 was 1,290 officers and 12,245 other ranks, and the mobilizable strength 90,000. Military aeroplanes, 74. The military budget for 1932–33 was 16,475,907 kroons; for 1933–34, 12,300,000 kroons.

The naval forces consist of one torpedo boat, four gunboats, and over a dozen smaller craft. A small submarine was acquired in 1933.

Production.—Agriculture and dairy farming are the chief occupations. There are 133,357 allotments on which about 70 per cent. of the total population is engaged. The total area is about 10,851,648 acres, divided as follows: forest land, 2,337,324 acres (21·5 per cent.); fields, 2,549,046 acres (23·5 per cent.); meadows, 2,249,686 acres (20·7 per cent.); pastures, 1,754,174 acres (16·2 per cent.); untillable land, 1,631,978 acres; (15·0 per cent.), including a peat bog of 329,440 acres.

The principal crops, with acreage and yield, are shown as follows:—

	Acreage		Yield in metric tons.	
	1932	1933	1932	1933
Rye	363,617	373,375	180,670	221,189
Wheat	127,882	155,406	56,743	66,700
Barley	265,783	255,897	101,317	80,240
Potatoes	165,517	168,935	782,789	949,044
Oats	356,414	342,750	130,140	116,351

The yield of flax in 1933 was 5,157 metric tons from an area of 41,012 acres as against 3,832 metric tons and 36,222 acres in 1932.

In 1934, Estonia had 646,250 head of cattle, 552,070 sheep, 281,660 pigs, 215,510 horses, and 1,194,470 poultry.

In 1933, there were in Estonia 318 dairy factories, of which 91·2 per cent. were co-operative. Butter is the chief article of export and already represents 27 per cent. of the total exports.

On July 1, 1934, Estonia had 40,821 employees engaged in industry. The most important industries of the country are: textile, paper, cement and oil shale industries, forestry, timber, flax and leather industries. There are about 100 tanneries in operation. Oil shale output in 1933 was about 500,000 metric tons, the output of crude oil being 37,617 metric tons.

Commerce.—Trade for 5 years is shown as follows in Estonian kroons:—

	1930	1931	1932	1933	1934
Imports	98,369,500	61,224,000	36,860,200	39,029,900	55,275,400
Exports	96,433,800	71,073,300	42,576,900	45,557,700	69,146,900

Principal imports in 1933 (thousand Estonian kroons) were: raw cotton, 3,197; sugar, 2,388; textile products, 4,716; metals, 2,745; machinery, 1,272. Principal exports in 1933 (thousand Estonian kroons): dairy produce, 17,322; timber, 5,494; textile products, 5,049; paper, 1,299; cellulose, 5,711.

The distribution of trade in 1934 was as follows (in thousand kroons):—Imports, Germany, 11,706; United Kingdom, 9,071; United States, 5,766; Soviet Russia, 2,387; France, 3,272. Exports, United Kingdom, 27,894; Germany, 15,450; Latvia, 4,066; France, 2,914.

Total trade between the United Kingdom and Estonia for 5 years (according to Board of Trade returns):—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Estonia into United Kingdom	1,991,592	1,908,066	1,260,258	1,216,978	1,998,340
Exports to Estonia from United Kingdom . .	388,479	212,680	358,532	365,925	441,435
Re-exports to Estonia from United Kingdom	124,313	50,476	61,090	92,489	192,543

Shipping and Communications.—During 1933, 2,394 vessels of 885,866 tons entered and 2,496 vessels of 897,715 tons cleared the ports of Estonia. The principal port is Tallinn (Reval). On January 1, 1934, the merchant marine consisted of 110 steamers of 103,060 tons, 22 motor ships of 3,555 tons, and 240 sailing vessels of 24,000 tons, with a total tonnage of 130,615 tons.

Estonia had a total railway mileage in 1934 of 1,447 kilometres, or 899 miles.

In 1932–33 the post office handled 15,478,596 letters and 4,625,408 postcards in the internal service; received 2,947,780 letters and 831,261 postcards from abroad and sent 2,143,586 letters and 905,912 postcards abroad.

In 1933 there were 148 kilometres of telegraph lines, 606 offices. The number of telegrams sent (1932–33), 83,248 internal and 61,894 foreign. Number of telephone circuits, 423; length of telephone line, 11,722 kilometres; number of inter-urban conversations, 2,491,979 (1932–33).

Banking and Currency.

The Bank of Estonia (*Eesti Pank*) was founded on February 24, 1919, and began operations on May 3, 1919. Its capital was 10,000,000 Estonian marks, increased in 1921 to 250,000,000 marks. The functions of the Bank, the management of which was controlled by the Government, were to issue and regulate currency and transact ordinary banking business.

It was only on January 1, 1928 that the Bank on reorganisation, obtained the sole right of issue when the existing treasury notes were merged with the bank notes of the Bank of Estonia, and the currency placed on a gold standard.

Three institutions supply the long-term credit needs of agriculture and industry: the Estonian Hypothecary Bank, the Land Bank of Estonia (Maa Pank) and the National Mortgage Bank (Pikalaenu Pank).

A State Savings Bank was established on January 1, 1928. On December 31, 1933, total deposits amounted to 6,125,268 kroons, the number of depositors being 13,082.

There are two central institutions for co-operative banks: the Estonian People's Bank and the Farmers' Central Bank.

There are besides the above 12 joint stock and 2 municipal banks.

Since January 1, 1928, the unit of currency is the *Kroon*, which is the same as a Swedish gold *krona*, and has a gold content of 0·403226 gramme of pure gold. This is subdivided into 100 *sents*, each sent being equivalent to one of the old Estonian marks. Abbreviation for internal use Kr. for

'Kroon,' for international use Ekr. for 'Estonian Kroon,' and 'S.' for internal and international uses for 'sent.'

On June 28, 1933, by a decision of the Government, the Estonian kroon was devaluated to a level not below that of the Swedish krona, *i.e.* to 66·5 per cent. of its former exchange value. Since September 1, 1933, the Estonian kroon has been pegged to the £ (£=18.11 Ekr., buying).

On January 31, 1935, there were in circulation 35,984,000 kroons in bank notes; at the same date the bank held 27,700,000 kroons of coin and bullion. The denominations of the currency are: paper notes, 50, 10, 5, 1 kroon; nickel and copper coins, 25, 10, 5, 3, 2 and 1 *sent* pieces; silver coins, 2 kroon and 1 kroon.

The metric system of weights and measures has been in force since January 1, 1929.

Diplomatic and Consular Representatives.

1. Of Estonia in Great Britain.

Envoy and Minister.—August Schmidt (appointed December, 1934).
Consul-General and Counsellor of Legation.—O. A. Grant.
Secretary.—Reinhold Kask.
Agricultural Attaché.—Villibald Raud.

There are Consular Representatives in London, Aberdeen, Hull, Dover, Belfast, Leith, Bo'ness, Liverpool, Methill, Alloa, Glasgow, Manchester, Dundee, Cardiff, Southampton, Dublin, Newcastle, Sydney, Gibraltar, Malta, Fowey, Burntisland, Grangemouth, Swansea, Montreal, Jaffa, Sydney.

2. Of Great Britain in Estonia.

Envoy and Minister.—E. Monson, also Minister to Latvia and Lithuania, residing at Riga.
Naval Attaché.—Capt G. C. Muirhead-Gould, D.S.C., R.N.
Military Attaché.—Major R. C. W. G. Firebrace, R.A.
Chargé d'Affaires and Consul at Tallinn.—A. J. Hill.

FINLAND.

(SUOMEN TASAVALTA.)

Constitution and Government.

CENTRAL GOVERNMENT.

Finland is a Republic according to the Constitutional Law of July 17, 1919.

From 1809 Finland was united to the Russian Empire as an autonomous Grand-Duchy. On December 6, 1917, the House of Representatives unanimously proclaimed Finland an independent and sovereign State, and she has been recognised as such by the Powers. According to the Constitutional Law of 1906, the House of Representatives consists of one Chamber of 200 members chosen by direct and proportional election, in which all who are entitled to vote have an equal vote. The suffrage is possessed, with the usual exceptions, by every Finnish citizen (man or woman) who has reached his or her 24th year. There are 16 electoral districts with a representation proportioned to the population, a rearrangement being required every 10 years. Each district is divided into voting circuits. The voting system, devised with a view to proportional representation, provides for the formation of voters' associations which prepare lists of candidates, the votes for whom are in a falling scale according to the order in which the voter has placed them on the list voted for. There may, within limits, be compacts between associations, and joint candidates may be entered in competing lists, while any voter may either support an association list or vote for any candidate he pleases. Every citizen entitled to vote is eligible to the House of Representatives, which is elected for 3 years.

The President is elected for 6 years by the votes of the citizens. He receives a salary of 700,000 marks and 200,000 marks for allowances. The Council of State (Ministry), appointed by the President, must enjoy the confidence of the House of Representatives.

At the elections held on July 1 and 2, 1933, the following parties were returned: Social-Democrats, 78; Agrarian, 53; Swedish People's Party, 21; Finnish Coalition Party, 18; Patriotic National Movement, 14; Finnish Progressive Party, 11; Small Farmers' Party, 3; National Party, 2.

President of Finland.—Dr. Pehr Evind *Svinhufvud* (born 1861; elected February 16, 1931).

The Council of State, appointed on December 14, 1932, is composed as follows:—

Prime Minister.—Prof. T. M. *Kivimäki* (Progress Party).
Minister for Foreign Affairs.—A. V. *Hackzell* (Coalition Party).

Minister of Finance.—Dr. H. M. J. *Relander* (Coalition Party).
Minister of the Interior.—Dr. Y. W. *Puhakka* (Coalition Party).
Minister of Defence.—A. A. *Oksala* (Coalition Party).
Minister of Justice.—E. *Serlachius* (Swedish People's Party).
Minister of Education.—Dr. O. *Mantere* (Progress Party).
Minister of Agriculture.—Prof. K. T. *Jutila* (Agrarian)
Minister of Commerce and Industries.—F. *Killinen* (Coalition Party).
Minister of Communications.—K. E. *Linna* (Progress Party).
Minister of Social Affairs.—Dr. E. *Hynninen* (Agrarian).

Local Government.

For administrative purposes Finland is divided into nine departments. The provincial administration is entrusted in each of the departments to a prefect, who is appointed by the President. The unit of local government is the commune. Each rural parish and each town forms a commune in which all men and all women of 21 years of age who have paid the local taxes for the preceding two years are voters. In all communes a communal council is elected to decide questions of administration and local economy. The executive power is vested in rural communes in a college formed by the head of the commune and four or more aldermen elected by the council. In towns the executive authority is the magistrates with the burgomaster as president and other members elected by the council. There were, in 1934, 38 towns, 25 boroughs, and 538 rural communes in Finland. As executive officers of the Prefects there are the bailliffs of 54 and sub-bailliffs of 302 districts.

The department of Aland has a county council (*landsting*) consisting of one chamber which is elected on the basis of the same suffrage as the Parliament. The county council settles the internal affairs of the government. The executive authority is with an executive council, of which the *lantråd* is president.

Area and Population.

The area and population of Finland, according to the census taken on December 31, 1920, and that taken on December 31, 1930, were as follows (Swedish names are given in brackets):—

Departments	Area[1] English sq. miles	Population Dec. 31. 1920	Population Dec 31, 1930	Population per sq. mile 1930
Uusimaa (Nyland)	4,435	446,329	507.708	114·5
Turku-Pori (Åbo-Björneborg)	8,519	495,561	522.222	61·3
Ahvenanmaa (Åland)	572	26.911	27,375	47·9
Häme (Tavastehus)	7.120	360 528	3 9.056	54·6
Viipuri (Viborg)	12.408	558,202	622.553	50·2
Mikkeli (St.-Michel)	6,728	204 425	208.901	31·0
Kuopio	14.584	355,701	381,100	26·1
Vaasa (Vasa)	15,063	548,055	582,874	38·7
Oulu (Uleåborg)	65,130	369,095	425,278	6·5
Total	134.559	3,364,807	3,667,067	27·3

[1] Excluding water area, which amounts to an additional 17,314 square miles.

Of the total on December 31, 1930, 1,809,068 were males and 1,857,999 females. In 1930, 3,022,257 spoke Finnish, 342,916 Swedish 8,216 Russian, 3,719 German, 2,113 Lapponic.

The growth of the population is shown as follows:—

Years	In Towns	In Country	Total	Percentage in towns
1800	46,604	786,055	832,659	5·60
1900	339,613	2,372,949	2,712,562	12·52
1931	707,159	2,990,346	3,697,505	19·13
1932	725,855	2,994,897	3,720,752	19·51
1933	754,649	2,983,883	3,738,532	20·19

According to the census of December 31, 1930, the population was divided according to occupations as follows: agriculture, 2,014,788 (60 per cent.); industry, 569,505 (17 per cent.); communications, 127,995 (4 per cent.); commerce, 145,361 (4 per cent.); public administration, 67,526 (2 per cent.); professions, 71,201 (2 per cent.); others, 384,372 (11 per cent.).

The movement of the population for four years was as follows:—

Year	Living Births	Of which illegitimate	Stillborn	Marriages	Deaths (exclusive of stillborn)	Excess of Births
1930	75,236	6,228	2,086	24,841	48,240	26,996
1931	71,866	6,003	2,051	23,856	48,968	22,898
1932	69,352	5,574	1,864	23,029	46,700	22,652
1933	65,047	4,977	1,701	24,472	47,960	17,087

Emigration: 1927, 6,088; 1928, 5,055; 1929, 6,383; 1930, 3,964; 1931, 741; 1932, 1,161; 1933, 677.

The principal towns, with the number of their inhabitants at end of 1933, are: Helsinki (Helsingfors), 268,592; Turku (Abo), 69,041; Tampere (Tammerfors), 58,220; Viipuri (Viborg), 71,817; Vaasa (Vasa), 27,364; Oulu (Uleåborg), 25,419; Kuopio, 24,202; Pori (Björneborg), 19,256; and Kotka, 19,184.

Religion and Education.

The National Church is Evangelical Lutheran religion, but entire liberty of conscience is guaranteed to the members of all religions and confessions. Ecclesiastically (the Evangelical Church of) Finland is divided into 5 bishoprics (Turku being the archiepiscopal see), 56 provostships, and 601 parishes.

Of the total population there were at end of 1933: Lutherans, 3,594,289; Greek-Catholics and Raskolnics, 68,772; Roman Catholics, 1,419; Baptists, etc., 10,029; Jews, 1,752; Mohammedans, 317; belonging to the civil-register, 61,954. The Greek-Catholics are under an archbishop, resident at Sortavala.

Finland has 3 universities: at Helsinki (founded in 1640 at Turku, and removed to Helsinki after having been burned down in 1827), with (1934) 349 teachers and 6,645 students (2,512 women); at Turku (Swedish, opened 1919), with 45 teachers and 258 students (64 women); and at Turku (Finnish, opened 1922), with 30 teachers and 400 students (207 women). In 1934, there were also 1 technical school at Helsinki, with 93 teachers and 869 students (81 women), and 3 commercial schools, one Finnish with 21 teachers and 254 students, and the others Swedish with 32 teachers and 255 students.

For secondary education there were, in 1933, 136 lyceums, leading to university, 2,488 teachers and 39,985 pupils (20,003 girls); 80 middle schools (with a curriculum of 5 years), with 708 teachers and 9,509 pupils. There were 8 training colleges for elementary school teachers, with 103 teachers

and 1,215 students; and 4 for infant school teachers, with 264 students. There were also 57 high schools for the people, with 416 teachers and 2,713 pupils (1,839 females). For elementary education (1933) there were in the country 5,337 elementary schools, with 228,168 pupils (112,361 girls); 4,991 lower elementary schools, with 110,442 pupils. In the towns there were (1933) 1,462 classes of higher elementary schools, with 47,959 pupils (23,261 girls). There were besides 6 navigation schools, with 213 pupils; 42 commercial schools, with 2,901 pupils; 11 industrial schools, with 1,293 pupils; 2 technical schools, with 232 pupils; 155 schools for arts and crafts, with 8,303 pupils; 52 agricultural schools, with 1,989 pupils; 4 dairy schools, with 111 pupils; 43 cattle-management schools, with 1,609 pupils; 42 household schools, with 2,128 pupils; 6 horticultural schools, with 99 pupils; and 5 forestry schools, with 151 pupils. The school age in primary schools is from 7 to 15 years.

In 1930, only 0·9 per cent. of persons who have completed their 15th year could neither read nor write.

In 1933, there were published 518 newspapers and reviews in Finnish, 107 in Swedish, 70 in Finnish and Swedish, and 8 in other languages.

Justice and Crime.

The administration of justice is independent of the Government. The lowest courts of justice in Finland are those of the District. In towns these district courts are held by the burgomaster and his assessors; in the country by a judge and 12 jurors—peasant proprietors, the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. From these courts an appeal lies to the Superior Court (*Hovioikeus*) in Turku, Vaasa and Viipuri. The Supreme Court of Judicature (*Korkein oikeus*) sits in Helsinki. Judges can be removed only by judicial sentence.

Two functionaries, the *Oikeuskansleri* or the Chancellor of Justice, and the *Oikeusasiamies*, or the Attorney-General, exercise control over the administration of justice. The former acts also as counsel and public prosecutor for the Government; while the latter, who is appointed by the Parliament, has to extend a general supervision over all the courts of law.

At the end of 1932, the prison population numbered 7,556 men and 823 women, while the number of sentences pronounced in 1930 was 127,016 for crimes and 55,225 in civil cases.

Pauperism.

The number of paupers in 1932 supported by the towns and the village communities was 229,982 (4·9 per cent. of the population); and the total cost was 404,943,448 marks.

Finance.

Revenue and expenditure for 4 years in thousands of marks according to Balance of Accounts:—

	1932	1933	1934[1]	1935[1]
Revenue	2,925,100	3,300,500	3,065,600	3,355,800
Expenditure	3,001,700	3,247,200	3,021,000	3,354,900

[1] Estimates.

The main items of the ordinary budget of Finland for 1935 are as follows in millions of marks:—

Revenue	Millions of marks	Expenditure	Millions of marks
Direct taxes	521·4	President	2·1
Customs	1382·5	Parliament	10·7
Excise	328·0	State Chancellor and Council	11·5
Mixed taxes	170·0	Administration :—	
Fees	93·6	Interior	344·8
Interests, dividends, etc.	293·7	Justice	103·8
Miscellaneous revenues	137·6	Foreign Affairs	41·1
State enterprises (net income):—		Finance	51·4
Communications	155·7	Defence	521·3
Sundry enterprises	3·6	Church and Education	470·1
State forests	83·6	Agriculture	363·4
Agricultural enterprises	4·2	Communications	163·2
Capital incomes	181·9	Trade and Industry	75·6
		Social Affairs	56·6
		Pensions	89·1
		Debt	261·1
		Miscellaneous expenditures	111·2
		Investments which give income	391·0
		Investments which do not give income	286·9
Total	3355·8	Total	3354·9

At the end of December, 1934, the foreign loans totalled 2,341,500,000 marks and the internal loans 1,040,200,000 marks, a total of 3,381,700,000 marks. Of the foreign loans 2,282,600,000 marks, and of the internal loans 990,700,000 marks, were consolidated.

Defence.

Army.

The military forces of Finland consist of: (1) the army, air force and naval defence, recruited on the principle of universal service, (2) the Civic Protective Guards Organisation, recruited from the voluntarily enrolled citizens.

The President of the Republic is Commander-in-Chief of the Finnish military forces, but during war he may invest a general with that authority. In peace time the Minister of Defence appointed by the President is responsible for the military administration. The Chief of the Army, assisted by the General Staff, directs the commanding affairs of the army, air force and coast defence.

Every citizen is liable to serve from the age of 17 to the age of 60. The conscripts are divided into troops of the line and the "landwehr."

The troops of the line consist of the standing army and the reserve. All young men who have reached the age of 21 years are summoned to active service. The period of service is generally 350 days, and 440 days for those who are appointed to be trained as officers or non-commissioned officers of reserve. At the end of this service the soldier remains in the first reserve to the age of 40 years. The first reserve contains periods of active training, in all 40 to 60 days.

The "landwehr" is divided into three classes; to the first class belong the conscripts who after their service in the reserve are relegated to the second reserve (men of 40–60 years); to the second, the conscripts who are considered as incapable for active service in peace time (men of 21–60 years), and the third, young men who cannot on account of their youth yet be enrolled as conscripts (17–21 years).

The effectives in 1935 amounted to 1,798 officers and 29,500 other ranks, comprising army, air force, coast defence and the territorial organisation.

The Army comprises 3 divisions and one cavalry brigade.

The Air Force comprises 6 military aerodromes and 1 air school.

The Coast Defence consists of the coast artillery and the coast fleet.

The territorial organisation provides for the preparation of mobilisation and consists of 9 military governments divided into 30 military districts.

The Civic Guards are an essential part of the plan of defence. For the administration the Commander-in-Chief of the Guards appointed by the President is subordinated to the Minister of Defence, and directly responsible to the President with regard to his command. The number of the Protective Guards is about 100,000.

The military budget for 1935 amounted to 628,744,300 Finnish marks.

Navy.

The naval forces consist of 2 coast defence ironclads of 4,000 tons, *Ilmarinen* and *Väinämöinen*, each armed with 4 10-inch and 8 4-inch guns; 6 gun-boats, 7 motor-torpedo-boats, 2 mine-layers, 4 submarines and a number of small vessels.

From 1929 to 1934 a retired British naval officer (Captain M. C. Despard, D.S.C., R.N.) was attached to the Ministry of Defence as naval adviser. On his retirement the Finnish Government publicly expressed its appreciation of his valuable aid in reorganizing the country's naval defences.

Production and Industry.

Agriculture is the chief occupation of the people in Finland, although the cultivated area only covers 6·6 per cent. of the land. The land was divided in 1929 into 285,390 farms, and the landed property was distributed as follows:—Less than 3 hectares cultivated, number of farms, 109,155; 3–10 hectares, farms 108,642; 10–25 hectares, farms 51,683; 25–100 hectares, farms 15,083; over 100 hectares, farms 827 (1 hectare = 2·47 acres).

The principal crops of 1933 were as follows:—rye, 575,140 acres, yielding 372,700 tons; barley, 320,014 acres, yielding 178,500 tons; oats, 1,297,154 acres, yielding 635,500 tons; potatoes, 198,782 acres, yielding 1,281,800 tons; hay, 3,027,429 acres. Total land under cultivation, 1933, 5,969,856 acres. Butter production in 1933 was 23,774 tons.

Domestic animals in 1933:—Horses, 356,900; horned cattle, 1,745,000; sheep, 973,400; goats, 11,300; pigs, 435,000.

The total forest land amounts to 62,429,000 acres, of which 24,835,000 acres belong to the State. The productive forest land covers 49,764,000 acres, of which 17,570,000 acres belong to the State.

Finland had, in 1933, 3,527 large factories, employing an aggregate of 140,736 workers, and yielding an aggregate product of 10,837·4 million marks. The chief were:—

—	No. of Establishments	No. of Workers	Production
			Marks
Iron and mechanical works	653	23,707	1,224,075,500
Textiles	276	22,113	1,189,534,500
Wood industries	768	42,497	2,141,064,400
Paper	193	16,730	2,495,926,600
Leather, rubber and fur	169	6,767	458,128,600
Chemicals	138	2,229	286,648,500
Graphic arts	196	4,821	227,786,300
Tobacco	7	1,655	247,253,600
Electricity, gas and water	269	2,699	334,065,200

In 1933, there were 459 saw mills with 98 water motors, 417 steam, 37 oil and gas, 2,937 electric motors.

Commerce.

Imports and exports for 5 years, in thousands of Finnish marks :—

—	1930	1931	1932	1933	1934
Imports .	5,247,671	3,464,755	3,502,297	3,928,055	4,772,068

Of the total pulp and paper exports in 1934, newsprint accounted for 406,449,128 marks, ground wood-pulp 204,677,544 marks, and chemical wood-pulp 1,245,973,174 marks. In 1933, the figures were 389,915,436, 155,721,777, and 1,181,147,728 respectively.

Total trade between the United Kingdom and Finland for 5 years (according to Board of Trade returns) :—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Finland into U.K.	12,634,451	11,630,127	11,733,436	12,766,868	15,232,604
Exports to Finland from U.K. .	2,414,486	1,603,658	2,263,001	2,845,878	3,611,852
Re-exports to Finland from U.K.	429,560	169,579	242,492	256,484	387,114

Shipping and Navigation.

The mercantile marine of Finland on January 1, 1933, aggregated 4,406 vessels of 541,829 net registered tons, and consisted of 256 sailing vessels of 66,762 tons; 530 steam vessels of 210,976 tons, 163 motor boats of 19,000 tons, and 3,457 lighters of 245,091 tons.

Vessels entered from and cleared for foreign countries, in 1933, were as follows:—

Countries	Entered		Cleared	
	Number	Net tons	Number	Net tons
United Kingdom . . .	622	703,800	798	1,555,000
United States . . .	50	178,400	85	255,000
Germany	844	651,600	741	521,400
Sweden	1,944	879,700	1,380	373,200
Denmark	827	636,900	533	213,800
Estonia	1,004	262,200	902	169,100
Total (including all others) .	6,842	4,673,000	6,905	4,680,800

On the air lines Helsinki–Reval and Helsinki–Turku–Stockholm, 7,180 passengers and 130,701 kilos goods and mail were transported in 1933.

Internal Communications.

For internal communications Finland has a remarkable system of lakes connected with each other and with the Gulf of Finland by canals, navigable at a length of about 2,500 miles. The number of vessels which passed along the canals in 1933 was 35,651, and the number of timber-rafts 13,858; the receipts from vessels, 8,165,600 marks.

In 1933, there were 20,189 miles of high roads and 17,941 miles of other public roads.

Railway history in Finland begins in 1860, when the State built a line 66 miles long between Helsinki and Hämeenlinna. On December 31 1933, there were 3,463 miles of railways, all but 158 miles belonging to the State. The gauge is 1·524 metres (4·9 feet). The traffic upon the State railways in 1933 was 17,548,000 passengers and 10,491,000 tons of goods. The total cost of the State railways to the end of 1933 was 6,341 million marks. The total revenue in 1933 was 725,822,000 marks, and the total expenditure 655,032,000 marks.

Finland had 3,330 post and telegraph-offices in 1933, and revenue and expenditure of posts and telegraphs combined were respectively 175,736,000 and 154,114,000 marks. The number of letters and postcards was 63,924,000; ordinary and printed packages, 18,696,000; newspapers, 180,289,000; money-orders, 1,763,000; total, 264,672,000.

There were in 1933, 20,698 miles of telegraph and 23,491 miles of telephone wires belonging to the State in Finland. The number of telegraph messages

sent in the year 1933 was 889,778. The telegraph system and part of the telephone system are State property. The length of the private telephone wires was 56,542 miles.

Banking, Money, Weights, &c.

The Bank of Finland (founded in 1811) is the State Bank and the only bank of issue. The Bank is under the guarantee of the House of Representatives; its capital and reserves are fixed by its constitution, and its note circulation is limited by the value of its metallic stock and foreign correspondents, and the additional right of issue 1,200 million marks. Notes in circulation are: 1,000, 500, 100, 50, 20, 10 and 5 markkaa. The paper currency of the Bank of Finland on January 31, 1935, was 1,268 million marks, against which the bank held a stock of gold of 323 million marks, and foreign currency 1,330 million marks. Finland had in 1933, besides the State bank, 11 joint stock banks with 489 offices. The deposits of all the Private banks on November 30, 1934, were 7,553 million marks.

The number of ordinary savings banks at the end of 1933 was 481; number of depositors 840,000, who had to their credit 4,301·2 million marks; in the Post Office savings banks 137,000 depositors had 327·1 million marks; and on Consumers' Co-operative Societies' Savings Account 388·4 million marks were deposited.

The *markka* of 100 *penni* is stabilized at the current rate of exchange for the dollar of 39·7, and is of the value of 1·24*d*.

According to the new monetary law gold coin is to be struck of the value of 100 and 200 markka. The former will contain 4·21053 grammes of gold, 900 fine; the latter 8·42105 grammes, 900 fine. Aluminium bronze coins are 20, 10 and 5 markka, and nickel coins 1, ½, and ¼ markka pieces. Copper coins 10 and 5 penni pieces.

Because of the exceptional conditions on the international money market, the gold standard was, however, suspended on October 12, 1931, whereby bank notes will not have to be redeemed in gold. Since March, 1933, the exchange has been stable at a rate of 227 marks to 1*l*.

The metric system of weights and measures is officially and universally employed in Finland.

Diplomatic Representatives.

1. Of Finland in Great Britain.

Envoy and Minister.—G. A. Gripenberg. (Appointed May, 1933.)
Secretary.—P. O. F. Hjelt.
Commercial Secretary.—Ragnar Smedslund.
Attaché.—Heikki Hjelt.
Naval Attaché.—V. L. Kopio.

There are also Finnish consular representatives at Aberdeen, Belfast, Birmingham, Bradford, Bristol, Cardiff, Cork, Dublin, Glasgow, Hull, Liverpool, Manchester, Newcastle, Plymouth, Southampton, and many other places.

2. Of Great Britain in Finland.

Envoy and Minister.—Herbert A. Grant Watson, C.M.G. (Appointed February 1, 1935.)
Second Secretary.—J. T. Henderson.
Commercial Secretary.—R. K. Jopson, M.B.E.
Naval Attaché.—Capt. G. C. Muirhead-Gould, D.S.C., R.N.
Military Attaché—Major R. C. W. G. Firebrace, R.A.
Consul at Helsingfors.—J. A. Waite.

There are consular representatives at the following places: Hangö (Hanko), Kotka, Gamlakarleby (Kokkola), Kristinestad (Kristiinankaupunki), Kuopio, Turku (Abo), Lovisa, Vaasa (Vasa), Pori (Björneborg), Jakobstad (Pietarsaari), Tampere (Tammerfors), Oulu (Uleaborg), Viipuri (Viborg).

FRANCE.

Constitution and Government.

Central.

Since the overthrow of Napoleon III. on September 4, 1870, France has been under a Republican form of government, confirmed on February

25, and July 16, 1875, by a constitutional law, which has been partially modified in June, 1879, August, 1884, June, 1885, and July, 1889. It vests the legislative power in the Chamber of Deputies and the Senate, and the executive in the President of the Republic and the Ministry.

The President is elected for seven years, by an absolute majority of votes, by the Senate and Chamber of Deputies united in a National Assembly, or Congress. He promulgates the laws voted by both Chambers, and ensures their execution. He selects a Ministry from the two Chambers, but may, and sometimes does, choose ministers who are not members of either Chamber (*e.g.* a general as Minister for War, an admiral as Minister of Marine, a civilian as Minister for Foreign Affairs); he appoints to all civil and military posts, has the right of individual pardon, and is responsible only in case of high treason. The President concludes treaties with foreign Powers, but treaties which affect the area of France or of French colonies must be approved by the Legislature, and he cannot declare war without the previous assent of both Chambers. Every act of the President has to be countersigned by a Minister. With the consent of the Senate he can dissolve the Chamber of Deputies. In case of vacancy, the two Chambers united immediately elect a new President.

President of the Republic.—Albert *Lebrun*; born August 29, 1871; elected May 10, 1932.

The Ministers or Secretaries of State, the number of whom varies, are usually, but not necessarily, members of the Senate or Chamber of Deputies. The President of the Council (Premier) chooses his colleagues in concert with the President of the Republic. Each Minister has the direction of one of the great administrative departments and each is responsible to the Chambers for his acts, while the Ministry as a whole is responsible for the general policy of the Government.

The Ministry consists of the following members, appointed November 9, 1934.

Prime Minister.—Pierre-Etienne *Flandin.*
Minister without Portfolio.—Louis *Marin.*
Minister without Portfolio.—* Edouard *Herriot.*
Minister of Foreign Affairs.—*Pierre *Laval* (Senator).
Minister of Justice.—Georges *Pernot.*
Minister of Interior.—Marcel *Régnier* (Senator).
Minister of War.—General *Maurin.*
Minister of Marine.—François *Piétri.*
Minister of Air.—General *Denain.*
Minister of Finance.—Louis *Germain-Martin.*
Minister of Education.—André *Mallarmé.*
Minister of Commerce.—Paul *Marchandeau.*
Minister of the Colonies.—Louis *Rollin.*
Minister of Agriculture.—Emile *Cassez* (Senator).
Minister of Public Works.—Henri *Roy* (Senator).
Minister of Health.—Henri *Queuille.*
Minister of Pensions.—Georges *Rivollet.*
Minister of Labour.—Paul-Maurice *Jacquier.*
Minister of Mercantile Marine.—William *Bertrand.*
Minister of Posts and Telegraphs.—Georges *Mandel.*

* Former Prime Ministers.

The following is a list of the Sovereigns and Governments of France, from the accession of the House of Bourbon:—

House of Bourbon.	
Henri IV.	1589–1610
Louis XIII., 'le Juste'	1610–1643
Louis XIV., 'le Grand'	1643–1715
Louis XV.	1715–1774
Louis XVI. (died 1793)	1774–1792
First Republic.	
Convention	1792–1795
Directory	1795–1799
Consulate	1799–1804
First Empire.	
Napoléon I. (died 1821)	1804–1814
House of Bourbon restored.	
Louis XVIII.	1814–1824
Charles X. (died 1836)	1824–1830
House of Bourbon-Orléans.	
Louis-Philippe (died 1850)	1830–1848
Second Republic.	
Provisional Government, Feb—Dec.	1848
Louis Napoléon	1848–1852
Second Empire.	
Napoléon III. (died 1873)	1852–1870
Third Republic.	
Government of National Defence	1870–1871
Adolphe Thiers, President	1871–1873
Marshal MacMahon, ,,	1873–1879
F. J. P. Jules Grévy, ,,	1879–1887
F. Sadi Carnot ,,	1887–1894
Casimir Perier (June—Jan.) ,,	1894–1895
Félix Faure ,,	1895–1899
Émile Loubet ,,	1899–1906
Armand Fallières ,,	1906–1913
Raymond Poincaré ,,	1913–1920
Paul Deschanel ,,	1920
Alexandre Millerand ,,	1920–1924
Gaston Doumergue ,,	1924–1931
Paul Doumer ,,	1931–1932
Albert Lebrun ,,	1932–

The Chamber of Deputies is elected for four years, by manhood suffrage, and each citizen 21 years old, not actually in military service, who can prove a six months' residence in any one town or commune, and not otherwise disqualified, has the right of vote. Deputies must be citizens and not under 25 years of age. The manner of election of Deputies has been modified several times since 1871. The *scrutin de liste*, under which each elector votes for as many Deputies as the entire department has to elect, was introduced in 1871. In 1876 it was replaced by the *scrutin d'arrondissement*, under which each department is divided into a number of *arrondissements*, each elector voting for one Deputy only; in 1885 there was a return to the *scrutin de liste*, in 1889 the uninominal vote was reintroduced; in 1919 the *scrutin de liste*, with proportional representation, was again adopted; but in 1927 (July 12) the old system of *scrutin d'arrondissement* was once more introduced. In each constituency the votes are cast up and the Deputy proclaimed elected by a commission of Councillors-General appointed by the prefect of the department. The Chamber is now composed of 615 Deputies.

Chamber of Deputies, elected May 1–8, 1932:—Communists and Socialists-Communists, 20; Socialists, 130; Republican Socialists and French Socialists, 33; Radicals and Radical Socialists, 153; Independent Radicals, 74; Republicans of the Left, 48; Democrats, 15; Democratic Republican Union, Democratic and Social Action, Independents, 127; Others, 15.

The Senate is composed of 314 members, elected for nine years from citizens 40 years old, one-third retiring every three years. The election of the Senators is indirect, and is made by an electoral body composed (1) of delegates chosen by the Municipal Council of each commune in proportion to the population; and (2) of the Deputies, Councillors-General, and District Councillors of the department. Besides the 225 Departmental Senators elected in this way, there were, according to the law of 1875, 75 Senators elected for life by the united two Chambers; but by the Senate Bill of 1884 it was enacted that vacancies arising among the Life Senatorships would be filled by the election of ordinary nine-years Senators, the department which should have the right to the

vacant seat to be determined by lot. The Princes of deposed dynasties are precluded from sitting in either House.

Senate, one-third elected on October 16, 1932: Socialists, 17; Gauche Démocratique, 161; Union Républicaine, 69; Gauche Républicaine, 16; Right, 6; Union Démocratique, 32; Independents, 13.

The Senate and Chamber of Deputies assemble every year on the second Tuesday in January, unless a previous summons is made by the President of the Republic, and they must remain in session at least five months out of the twelve. The President is bound to convoke them if the demand is made by one-half of the number of members composing each Chamber. The President can adjourn the Chambers, but the adjournment cannot exceed the term of a month, nor occur more than twice in the same session.

Bills may be presented either in the Chamber or Senate by the Government, or on the initiative of private members. In the first case they are remitted to the bureaux for examination; in the second, they are first submitted to a commission of parliamentary initiative. Financial laws must be first presented to and voted by the Chamber of Deputies.

The Senate, constituted as a High Court of Justice, tries cases of attempt against the safety of the State or of plotting to change the form of government.

Senators and Deputies are paid 62,000 francs a year and the Presidents of the two Chambers receive allowances for the expense of entertainment. Members of both Chambers travel free on all railways by means of a small annual payment. The dotation of the President of the Republic is 1,800,000 francs, with a further allowance of 1,800,000 francs for his expenses. On January 1, 1905, a fund was instituted for pensions to ex-Deputies, or their widows and orphans. It is supported by contributions from Deputies (deducted from their pay) as well as by gifts and legacies.

France has, besides, a special institution under the name of *Conseil d'État*, which was introduced by Napoleon I., and has been maintained since. It is presided over by the Minister of Justice or (in his absence) by a vice-president, and is composed of Councillors, Masters of Requests (Maîtres des Requêtes), and Auditors, all appointed by the President of the Republic. Its duty is to give opinion upon such questions, chiefly those connected with administration, as may be submitted to it by the Government. It is judge in the last resort in administrative suits, and it prepares the rules for the public administration.

II. Local Government.

For administrative purposes France is divided into 90 departments. Since 1881, the three departments of Algeria are also treated for most purposes, as part of France proper. The department has representatives of all the Ministries, and is placed under a Prefect, nominated by Government, and having wide and undefined functions. He is assisted by a Prefecture Council, an administrative body, whose advice he may take without being bound to follow it. The Prefect is a representative of the Executive, and, as such, supervises the execution of the laws, issues police regulations, supplies information on matters which concern the department, nominates subordinate officials, and has under his control all officials of the State. There is a Sub-Prefect in every *arrondissement*, except in those containing the capitals of departments and the department of the Seine.

The unit of local government is the *commune*, the size and population of which vary very much. There were, in 1931, in the 90 departments into which France was divided, 38,004 communes. Most of them (33,960) had

less than 1,500 inhabitants, and 22,491 have even less than 500 ; while 173 communes only have more than 20,000 inhabitants. The local affairs of the commune are under a Municipal Council, composed of from 10 to 36 members, elected by universal suffrage, and by the *scrutin de liste* for 6 years by Frenchmen after 21 years and 6 months' residence ; but each act of the Council must receive the approval of the Prefect, while many must be submitted to the Council General or even to the President of the Republic, before becoming lawful. Even the commune's quota of direct taxation is settled by persons (*répartiteurs*) chosen by the Prefect from among the lists of candidates drawn up by the Municipal Council.

Each Municipal Council elects a Mayor, who is both the representative of the commune and the agent of the central government. He is the head of the local police and, with his assistants, acts under the orders of the Prefect.

In Paris the Municipal Council is composed of 80 members ; each of the 20 *arrondissements* into which the city is subdivided has its own Mayor. The place of the Mayor of Paris is taken by the Prefect of the Seine, and, in part, by the Prefect of Police. Lyons has an elected Mayor, but the control of the police is vested in the Prefect of the department of the Rhone.

The next unit is the *canton* (3,024 in 1931), which is composed of an average of 12 communes, although some of the largest communes are, on the contrary, divided into several cantons. It is a seat of a justice of the peace (*juge de paix*), but is not an administrative unit.

The district, or *arrondissement* (279 in 1931), has an elected *conseil d'arrondissement*, with as many members as there are cantons, its chief function being to allot among the communes their respective parts in the direct taxes assigned to each *arrondissement* by the Council General. That body stands under the control of the Sub-Prefect. A varying number of *arrondissements* form a department, which has its *conseil général* renewed by universal suffrage to the extent of one-half every three years (one Councillor for each canton). These *conseils* deliberate upon all economical affairs of the department, the repartition of the direct taxes among the *arrondissements*, the roads, normal schools, and undertakings for the relief of the poor. Their decisions are controlled by the Prefect, and may be annulled by the President of the Republic.

Area and Population.

I. Progress and Present Condition.

The legal population at the date of the last two enumerations was :—

Departments	Area : Engl. sq. miles	Population		Population per square mile. 1931
		March, 1931	March, 1926	
Ain . . .	2,248	322,918	317,195	143·6
Aisne . . .	2,866	489,368	489,022	170·7
Allier . . .	2,848	373,924	370,562	131·2

[1] Not including military and naval forces and crews of the commercial navy abroad which in 1931 numbered 93,928, and in 1926, 178,534.

According to the Peace Treaty with Germany (June 28, 1919) Alsace-Lorraine has been transferred to France, to date from the Armistice of November 11, 1918. The districts of Lower Alsace, Upper Alsace and Lorraine have become the departments of Bas-Rhin (1,848 square miles and population 688,242); Haut-Rhin (1,354 square miles, population 516,726), and Moselle (2,403 square miles, population 693,408). Thus the total area added to France is 5,605 square miles, population (1931) 1,898,376.

In 1926 the rural population was 20,759,131 and the urban population 19,984,766.

According to the Treaty of Versailles (article 45), France obtained from Germany as a compensation for the destruction of the coal mines in the North of France, the exclusive rights of exploitation of the coal mines situated in the Saar Basin. For 15 years the Saar Basin was governed by a Commission of Five, chosen by the League of Nations. At the end of 15

years the population decided on union with Germany, and the district was handed over to Germany on March 1, 1935, France receiving compensation for the mines.

In the following table, the third, fourth, and fifth columns give [in brackets] for the first five censuses the population, its density, and its average annual increase of France, excluding Alsace-Lorraine, and are thus comparable with the data for the censuses posterior to the loss of Alsace and Lorraine (1872–1911).

Dates	Area: sq. miles	Domiciled Population	Inhabitants per sq. mile	Annual Increase per 10,000 inhabitants
1801	207,765	27,349,003	131	—
		[26,930,756]	[130]	—
1821	—	30,461,875	146	57
		[29,871,176]	[144]	[55]
1841	—	34,230,178	164	62
		[33,400,864]	[161]	[58]
1861	212,659	37,386,313	176	72
		[35,844,902]	[173]	[36]
1866	—	38,067,064	178	36
		[36,495,489]	[176]	[36]
1872	207,054	36,102,921	174	—96[1]
				[—17]
1876	—	36,905,788	178	54
1881	—	37,672,048	182	41
1886	—	38,218,903	184	29
1891	—	38,348,192	185	6·5
1896	—	38,517,975	186	9·1

1911	—	39,604,992	189	18
1921	212,659	39,209,518	184	—10[1]
1926	—	40,743,897	191	+76
1931	—	41,834,923	196	+54

[1] Decrease.

Total number of foreigners in 1931 was 2,890,923; in 1926, 2,505,047.

II. Movement of the Population.

Births, Deaths, and Marriages.

Year	Marriages	Living Births	Deaths	Surplus of Birth over Deaths	Still-born
1929	334,322	780,060	738,652	— 8,592	25,417
1930	342,059	749,953	648,886	+101,067	26,044
1931	326,661	733,909	679,114	+ 54,795	25,710
1932[1]	314,878	722,246	660,882	+ 61,364	27,537
1933[1]	315,466	682,860	661,262	+ 21,598	26,025

[1] Provisional figures.

The number of divorces was 15,450 in 1913, 21,213 in 1931, 21,848 in 1932, and 20,699 in 1933.

III. Principal Towns.

The following towns, according to the census of 1931, have each a population of over 100,000 (figures for census of 1926 added for comparison):—

	1931	1926
Paris	2,891,020	2,871,429
Marseilles	800,881	652,196
Lyons	579,763	570,840
Bordeaux	262,990	256,026
Nice	219,549	184,441
Lille	201,568	201,921
Toulouse	194,564	180,771
St. Étienne	191,088	193,737
Nantes	187,343	184,509
Strasbourg	181,465	174,492
Le Havre	165,076	158,022
Toulon	133,263	115,120
Rouen	122,957	122,898
Nancy	120,578	114,491
Roubaix	117,190	117,209
Reims	112,820	100,998
Clermont-Ferrand	103,143	111,701

The following towns have a population over 50,000, according to the census of 1931:

Mulhouse	99,534	Tours	78,585	Colombes	57,313
Limoges	92,577	Le Mans	76,868	Avignon	57,228
Dijon	90,869	Perpignan	73,962	Saint-Maur-des-Fossés	57,164
Grenoble	90,748	Orléans	71,606	Aubervilliers	55,714
Amiens	90,211	Béziers	71,527	Clichy	55,692
Nîmes	89,213	Levallois-Perret	71,181	Courbevoie	54,185
Rennes	88,659	Argenteuil	70,657	Neuilly-sur-Seine	53,491
Montpellier	86,924	Montreuil	70,450	St. Ouen	53,146
Boulogne-sur-Seine	86,234	Calais	70,213	Boulogne-sur-Mer	51,854
Angers	85,602	Brest	69,841	Drancy	51,156
St. Denis	82,412	Versailles	66,859		
Villeurbanne	82,038	Asnières	63,654		
Tourcoing	81,972	Besançon	60,367		
Metz	78,767	Troyes	58,804		
		Caen	57,528		

For fiscal and electoral purposes the population of each commune is divided into *agglomerated*, *scattered*, and *separated* (*comptée à part*); the first two constitute the municipal population, and the third consists of garrison, college, prison, and hospital population. Different from this is the distinction between urban and rural population, a commune being urban where the agglomerated population is over 2,000, and rural where under 2,000.

Religion.

No religion is recognised by the State.

Under the law promulgated on December 9, 1905, the Churches were

separated from the State, the adherents of all creeds were authorised to form associations for public worship (*associations cultuelles*). As transitory measures, ecclesiastics over 45 years of age and of over 25 years of service remunerated by the State were entitled to a pension, and all other ecclesiastics were to receive a grant during a period of from four to eight years. All buildings actually used for public worship and as dwellings in that connection were to be made over, after an inventory was taken, to the associations for public worship: the places of worship for the total period of the existence of these associations, the ecclesiastical dwellings for a time.

The law of January 2, 1907, provides (among other things) that, failing *associations cultuelles*, the buildings for public worship, together with their furniture, will continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion; but, in each case, there is required an administrative act drawn up by the *préfet* as regards buildings belonging to the State or the Departments, and by the *maire* as regards buildings belonging to the Communes. Forms of the documents necessary under the new law have been supplied by the Government.

There are 17 archbishops and 68 bishops of the Roman Catholic Church in France, not including Alsace and Lorraine, Algeria or the colonies, in addition to 51,000 clergy of various grades. The Protestants of the Augsburg Confession are, in their religious affairs, governed by a General Consistory, while the Reformed Church is under a Council of Administration, the seat of which is at Paris. There are about a million Protestants in France.

The Associations law, passed July 1, 1901, requires religious communities to be authorised by the State, and no monastic association can be authorised without a special law in each particular case. Before the passing of that law there were 910 recognised associations, and 753 not recognised; the establishments, mostly not recognised, numbered 19,514, and their members 159,628 (30,136 men and 129,492 women). After the passing of the law, of the 753 associations not recognised, 305 dissolved themselves and 448 asked for authorisation, which was refused by the Chambers to the majority of them.

Education.

The public schools constitute the University of France and are divided into three classes, primary, secondary, and superior. The Superior Council of 52 members has deliberative, administrative, and judiciary functions, and a Consultative Committee advises respecting the working of the school system, but the inspectors-general are in direct communication with the Minister. For local educational administration France is divided into 17 circumscriptions, called Academies, each of which has an Academic Council whose members comprise a certain number elected by the professors or teachers. The Academic Councils deal with all grades of instruction. Each is under a Rector, and each is provided with academy inspectors, one for each department except Nord which has two (one being for primary instruction), and Seine which has eight (one being director of primary instruction), besides primary inspectors of schools, usually one for each *arrondissement*, 20 inspectors (male or female) for the department of the Seine. Each department has a council for primary educational matters, the prefect being president, and this body has large powers with respect to the inspection, management and maintenance of schools and the opening of free schools.

The law of August 9, 1879, rendered obligatory for each department the maintenance of two primary normal schools, one for school-masters,

the other for school-mistresses. Certain departments, however, are authorised to maintain an inter-departmental normal school. In 1932–33, there were in the 90 departments 87 normal schools for male teachers (6,696 students), and 86 normal schools for female teachers (6,775 students). There are two higher normal schools of primary instruction: one at Fontenay-aux-Roses for professors for normal schools for school-mistresses, the other at St. Cloud for professors for normal schools for school-masters. The law of June 16, 1881, made instruction absolutely free in all primary public schools; that of March 28, 1882, rendered it obligatory for all children from 6 completed to 13 years of age. The law of October 30, 1886, is the organic law of primary instruction now in force; it established that teachers should be lay; for infant schools it substituted *écoles maternelles* instead of *salles d'asile*; it fixed the programmes of instruction, and established freedom of private schools under the supervision of the school authorities.

The following table shows the condition of primary instruction for 3 years:—

Description of Schools	1930–31		1931–32		1932–33	
	Schools	Enrolled Pupils	Schools	Enrolled Pupils	Schools	Enrolled Pupils
Infant Schools:						
Public . . .	3,170	343,088	3,218	342,706	3,269	360,318

On November 15, 1932, there were 322 higher elementary schools for boys and 242 for girls. The number of pupils was on November 15, 1932, 42,675 boys and 42,862 girls, compared with 38,934 boys and 39,079 girls on November 15, 1931. Higher elementary education is also given in continuation schools (*cours complémentaires*) attached to the elementary schools. On November 15, 1932, there were 34,127 boys and 40,840 girls taking these courses in the public schools and 4,698 boys and 25,661 girls in private schools.

Secondary Instruction: Boys.—Secondary instruction is supplied in two types of schools—by the State in the lycées, and by the communes in the colleges, by associations and by private individuals in free establishments (*écoles libres*). The course of study extends over 7 years. Since the beginning of the school year, 1934–35, secondary education has been free.

The number of public secondary schools for boys and the number of pupils for 3 years were as follows:—

Public Institutions: France and Algeria	Nov. 1931		Nov. 1932		Nov. 1933	
	No.	Pupils	No.	Pupils	No.	Pupils
Lycées . . .	125	92,611	125	99,754	125	102,450
Communal colleges .	236	48,954	229	54,976	229	58,154

Girls.—The following table shows the condition of the institutions for girls :—

Institutions	Nov. 1931		Nov. 1932		Nov. 1933	
	No.	Pupils.	No.	Pupils	No.	Pupils

Total . .	203	65,758	197	72,052	196	75,897

Higher Instruction is supplied by the State in the universities and in special schools, and by private individuals in the private faculties and schools. The freedom of higher instruction was established by the law of July 12, 1875, modified by that of March 18, 1880, which reserved to the State faculties the exclusive right to confer degrees. A decree of December 28, 1885, created a general council of the faculties, and the creation of universities, each consisting of several faculties, was accomplished in 1897, in virtue of the law of July 10, 1896.

There are 17 Universities in France. The following table shows the year of foundation and the total number of students on July 31, 1933 :—

Universities	Students	Universities	Students
Aix-Marseilles (1409) . .	3,693	Montpellier (1125) . .	3,874
Alger	2,640	Nancy (1572) . . .	3,874
Besançon (1485) . . .	673	Paris (1150) . . .	35,365
Bordeaux (1441) . . .	4,782	Poitiers (1431) . . .	2,229
Caen (1432)	1,914	Rennes (1735) . . .	3,177
Clermont-Ferrand (1808) .	1,272	Strasbourg (1567) . .	3,465[1]
Dijon (1722)	1,417	Toulouse (1230) . . .	4,297
Grenoble (1339) . . .	2,700		
Lille (1530)	4,226	Total	84,658
Lyons (1808)	5,060		

[1] Including 359 students in the two faculties of Theology.

The faculties are of four kinds : 15 faculties of Law (Paris, Aix, Bordeaux, Caen, Dijon, Grenoble, Lille, Lyons, Montpellier, Nancy, Poitiers, Rennes, Strasbourg, Toulouse, and Algiers) ; 9 faculties of Medicine (Paris, Montpellier, Bordeaux, Lille, Lyons, Toulouse, Nancy, Strasbourg, and Algiers) ; 17 faculties of Science (Paris, Besançon, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyons, Marseilles, Montpellier, Nancy, Poitiers, Rennes, Toulouse, Strasbourg, and Algiers) ; 17 faculties of letters (at the towns last named) ; 4 faculties of medicine and 4 faculties of pharmacy (Paris, Montpellier, Nancy, Strasbourg), and 5 mixed faculties of medicine and pharmacy (Algiers, Bordeaux, Lille, Lyons, Toulouse) ; 15 schools with full functions and preparatory schools of medicine and pharmacy.

The following statement shows the number of students by faculties or schools in July, for 3 years :—

Students of	1931 State Institutions	1932 State Institutions	1933 State Institutions
Law	20,871	22,982	24,325
Medicine	17,554	18,805	19,317
Sciences	15,959	15,463	15,097
Letters	18,386	19,277	19,843
Pharmacy	5,554	5,777	5,717
Theology	350	351	359
Total	78,674	82,655	84,658

There are free faculties: at Paris (the Catholic Institute of Paris comprising theology, law and advanced scientific and literary studies); Angers (theology, law, sciences, letters, agriculture); Lille (theology, law, medicine and pharmacy, sciences, letters, social sciences and politics); Lyon (theology, law, sciences, letters); Marseilles (law); Toulouse (the Catholic Institute with theological, literary, and scientific instruction). There is, besides, in Paris a large institution for free higher instruction in political science, the École libre des Sciences Politiques, and also one for the study of international law, the Institut des Hautes Études Internationales.

The State faculties confer the degrees of bachelor, of licentiate, and of doctor. Yearly competitive examinations in the various branches of teaching (*agrégations*) are open to holders of the degree of licenciate, or doctor in the case of law and medicine, and lead to the title of *professeur agrégé* in secondary and higher (law and medicine) instruction.

The other higher institutions dependent on the Ministry of Public Instruction are the Collège de France (founded by François I. in 1530), which has courses of study bearing on various subjects, literature and language, archæology, mathematical, natural, mental and social science (political economy, &c.); the Museum of Natural History giving instruction in the sciences and nature; the École Pratique des Hautes Études (history and philology, mathematical and physico-chemical sciences, and the sciences of nature and of religion), having its seat at the Sorbonne; the École Normale Supérieure, which prepares teachers for secondary instruction and, since 1904, follows the curricula of the Sorbonne without special teachers of its own; the École des Chartes, which trains the archivist paleographers; the École des Langues Orientales vivantes; the École du Louvre, devoted to art and archæology; the École des Beaux-Arts, and the Bureau des Longitudes, the Central Meteorological Bureau; the Observatoire of Paris; and the French Schools at Athens, Rome, Cairo and Indo-China, besides a school for Morocco.

Outside Paris there are eight observatories (Meudon, Besançon, Bordeaux, &c.). The observatory at Nice is dependent on the Academy of Sciences.

Professional and Technical Instruction.—The principal institutions of higher or technical instruction dependent on other ministries are: the Conservatoire des Arts et Métiers at Paris (with 20 evening courses on the applied sciences and social economy), the École Centrale des Arts et Manufactures, the École des Hautes Études Commerciales, 18 higher schools of commerce with 3,552 pupils (1931), dependent on the Ministry of Public Instruction; the National Agronomic Institute at Paris, the Veterinary school at Alfort, a school of forestry at Nancy, the higher national school of colonial agri-

culture, national agricultural schools at Grignon, Rennes, Montpellier, 44 schools of Agriculture, &c., dependent on the Ministry of Agriculture; the École Supérieure de Guerre, the École Polytechnique, the military school at St. Cyr, the École d'Artillerie at Fontainbleau, the École de Cavalerie at Saumur, and other schools dependent on the Ministry of War; the Naval School at Brest dependent on the Ministry of Marine; the School of Mines at Paris, the School of Bridges and Roads at Paris, the School of Mines at St. Etienne, and the Schools of Miners at Alais and Douai; with other schools dependent on the Ministry of Public Works; the École Coloniale at Paris, dependent on the Ministry of the Colonies. The École des Beaux Arts, the École Nationale des Arts Décoratifs, and the Conservatoire de Musique et de Déclamation depend on the department of Fine Arts, which is attached to the Ministry of Public Instruction. The municipal school of Industrial Physics and Chemistry is dependent on the City of Paris. In the provinces there are National schools of fine arts, and schools of music, and also several municipal schools as well as free subventioned schools, etc.

Technical schools of a somewhat lower grade (dependent on the Ministry of Public Instruction are very numerous, comprising (in 1932—the latest available figures) seven national schools of arts and trades (Aix, Angers, Chalons, Cluny, Lille, Paris, Strasbourg), two schools of horology, twelve national professional schools, 205 practical schools of commerce and industry (of which 49 are for girls) with 43,479 pupils (13,433 girls).

Justice and Crime.

The Courts of lowest jurisdiction in France are those of the Justices of Peace (*juges de paix*, one in each *canton*) who try small civil cases and act also as judges of Police Courts, where all petty offences (*contraventions*) are disposed of. The Correctional Courts pronounce upon all graver offences (*délits*), including cases involving imprisonment up to 5 years. They have no jury, and consist of 3 judges belonging to the civil tribunals of first instance. In all cases of a *délit* or a *crime* the preliminary inquiry is made in secrecy by an examining magistrate (*juge d'instruction*), who may either dismiss the case or send it for trial before a court where a public prosecutor (*Procureur*) endeavours to prove the charge. The Court of Assizes is assisted by 12 jurors, who decide by simple majority on the fact with respect to offences amounting to crimes. The highest courts are the 26 Courts of Appeal, composed each of one President and a variable number of members, for all criminal cases which have been tried without a jury; and one Court of Cassation which sits at Paris, for all criminal cases tried by jury, so far as regards matters of law.

Until 1926 there was a tribunal of first instance in each *arrondissement* for civil cases, wherein the amount in dispute is between 200 and 1,500 francs, but the decree of September 3, 1926, suppressed the tribunals other than those in the capital of the department; a certain number of tribunals in the *arrondissement* have been re-established since then. These tribunals may be divided into several sections. Above these are the Appeal Courts and the Court of Cassation. For commercial cases there are, in 226 towns, Tribunals of Commerce and Councils of experts (*prud'hommes*). In the towns are police courts.

All Judges are nominated by the President of the Republic. They can be removed only by a decision of the Court of Cassation constituted as the *Conseil Supérieur* of the magistracy.

The French penal institutions consist, first, of Houses of Arrest (3,628 *chambres de sûreté* and *dépôts de sûreté* at the end of 1932). Next come

Departmental Prisons (274 in 1932), also styled *maisons d'arrêt, de justice* and *de correction*, where both persons awaiting trial and those condemned to less than one year's imprisonment are kept, as also a number of boys and girls transferred from, or going to be transferred to, reformatories. The reformatories are 7 for boys and 5 for girls. The Central Prisons (*maisons de force et de correction*), where all prisoners condemned to more than one year's imprisonment are kept, provided with large industrial establishments for the work of prisoners, are 9 for men and 3 for women. The average population in 1932 of all penal establishments was 17,922 men and 2,719 women.

All persons condemned to hard labour and many condemned to 'reclusion' are sent to Guiana (military and *récidivistes*); the *dépôt de forçats* of St. Martin-de-Ré is a *dépôt* for transferred hard-labour convicts.

Pauperism, Relief of Old Age and Social Insurance.

In France the poor are assisted partly through public 'bureaux de bienfaisance' and partly by private and ecclesiastical charity. The funds of the 'bureaux de bienfaisance' are partly derived from endowments, partly from communal contributions, and partly from public and private charity. In 1931, the bureaux expended 224,887,200 francs and assisted 846,095 persons. Public assistance is rendered to poor or destitute children. At the end of 1931 the institutions for this purpose contained 170,300 children; the expenditure during the year amounted to 242,935,900 francs. In 1931 the hospitals for the sick, infirm, aged, or infants, numbered 2,031; and at the end of the year had 96,769 patients, besides 94,137 aged and infirm inmates; their expenditure for 1931 amounted to 1,516,425,400 francs. In the same year the expenditure for free medical assistance amounted to 350,738,800 francs. At the end of 1931 the asylums for imbeciles, national, departmental, and private, had 90,973 patients.

An Act was passed in 1905, for the relief of the aged poor, age limit, 70, the infirm, and the permanently incurable. The Act of 1905 provided that the cost of the scheme should be borne by the communes, the departments, and the State. The number of persons registered for relief on December 31, 1931, was 616,327. The cost to the State for 1931, was 703,655,000 francs. The Old-Age Pensions Law of April 5, 1910, as amended on February 27, 1912, provides for all wage-earners old-age pensions towards which both employers and workers contribute. Contributions are to be paid up to the 60th year of the worker's life, and the State will contribute 100 francs. This sum will be increased by one-tenth for every insured worker who has brought up 3 children of the age of 16.

A law of March 24, 1873, provides protection for new-born infants. In 1930, 41,902 infants were placed in 89 departments. In 1913, two further laws were introduced: that of June 17 to give relief, varying from 0·50 to 1·50 francs or more per day, to women in confinement, and that of July 14 amended in 1925 and 1926, to give relief to families with numerous children. The rate is a minimum of 22·5 francs per month for every child beyond the third. In 1931, the number of women so aided was 325,143, and the amount of relief 57,195,000 francs. Supplementary relief to nursing mothers, under the law of October 24, 1914, amounted in 1931 to 79,258,600 francs. In 1931, the number of families assisted was 46,920, at an expense of 10,452,900 francs, of which 4,251,000 francs were contributed by the State. Since 1922 it has been customary, in accordance with the law of June 29, 1918, to award prizes for large families. By law of April 29, 1926,

360 francs per annum is granted to every French family which has more than 3 children living for every child beyond the third under 13.

The law providing for compulsory social insurance which was passed on April 5, 1928, came into force on July 1, 1930.

The law provides for the compulsory insurance of all wage earners whose wages do not exceed 15,000 francs per annum (18,000 francs in the larger cities), against sickness, incapacity, old age and death, and also extends maternity and unemployment benefits. The cost of the insurance is borne by the employer, worker and the state, the amount of contribution from the worker varying in accordance with the remuneration. The assessment amounts to about 8 per cent. for industrial workers and about 2 per cent. for agricultural workers, half to be paid by the worker and half by the employer. The yields from this assessment amounted to 3·56 milliard francs in 1931, 3·26 milliard francs in 1932, and 3·27 milliard francs in 1933.

Finance.

The following figures show the budget estimates for 6 years :—

Years	Revenue	Expenditure	Years	Revenue	Expenditure
	Francs	Francs		Francs	Francs
1930–31[1]	50,465,079,818	50,398,167,195	1933	45,645,851,509	50,486,710,242
1931–32[2]	50,643,485,395	50,640,509,352	1934	48,281,366,848	50,162,570,005
1932[3]	41,100,883,494	41,097,501,752	1935	46,991,968,737	47,506,511,976

[1] April 1, 1930—March 31, 1931. [2] April 1, 1931—March 31, 1932.
[3] April 1, to December 31, 1932.

The accounts of revenue and expenditure of the Government officials are examined by a special administrative tribunal (*Cour des Comptes*), instituted in 1807. In 1930 and 1931, the financial year commenced on April 1, but on October 17, 1931, it was decided to revert to the calendar year.

Budget estimates in francs for the years 1933 and 1934 :—

REVENUE.

	1933	1934
Taxes	39,164,464,000	40,515,390,000
Monopolies and State Industries	1,609,797,956	1,490,730,177
State Domains	255,538,000	254,951,500
Various	4,523,306,953	5,224,306,171
Exceptional Revenues	64,000,000	768,150,000
Revenue from Algeria	28,744,600	27,339,000
Total	45,645,851,509	48,281,366,848

EXPENDITURE.

	1933	1934
Finance	22,549,885,583	23,192,643,767
Military	6,080,889,987	5,946,701,590
Naval	2,712,254,978	2,948,283,494
Air	1,996,230.679	1,654,019,235
Education	4,148,042,616	4,034,276,021
Foreign Affairs	292,784,713	287,901,735
Labour and Health	2,988,443,931	2,845,569,986
Agriculture	1,012,697,255	593,245,368
Public Works	2,721,849,391	2,671,523,878
Colonies	798,613,280	859,203,646
Total (including all items)	50,486,710,242	50,162,570,005

The French National debt (excluding war debts estimated at 192,000,000,000 francs) on August 31, 1934, was as follows :—

	August 31, 1934
	1,000 francs
Perpetual Debt	51,933,000
Amortizable Debt	178,844,000
Short-term Debt	22,302,000
Floating Debt	53,929,000
Post, Telegraph and Telephone Debt	8,812,000
External Debt	4,011,000
Total	319,831,000

The service of the public debt, exclusive of the "*dette viagère*" (largely a pensions service), was estimated at 10,816,500,000 francs.

Defence.

I. Land Defences.

France has a coastline of 1,760 miles, 1,304 on the Atlantic and 456 on the Mediterranean. Its land frontier extends over 1,665 miles, of which 1,246 miles are along the Belgian, German, Swiss, and Italian frontiers, and 419 along the Spanish frontier.

In consequence of the reduction of the term of service in the regular army to one year, France has constructed a trench system of defence, based on the experiences of the Great War, along her Eastern Frontier between the Rhine and Luxembourg and on the Italian frontier. Behind this system are the former German fortresses of Strassburg, Metz, and Thionville and the first-class fortresses of Verdun, Toul, Epinal, and Belfort. On the coast Toulon, Rochefort, Lorient, Brest, and Cherbourg are naval harbours surrounded by forts. The construction of a similar defensive system on the Belgian frontier was begun in 1934.

II. Army.

The French Army is divided into the Metropolitan and the Colonial Armies; both are under the War Minister, but the estimates for Colonial troops other than those maintained in Algeria, Tunis, and Morocco are included in the budget of the Minister for the Colonies. The Metropolitan Army is divided into the *Active Army*, the *Reserve Troops* and the *Territorial Army*. The Army is localised and territorialised in the military government of Paris and 20 Army Corps areas. The normal composition of a French Army Corps is 2 infantry divisions, 1 regiment of cavalry, 1 artillery brigade of three regiments, 1 battalion of engineers, 1 group and 1 company of observation balloons, and adminstrative services.

The infantry division consists of 3 regiments of infantry each of 3 battalions, and 1 regiment of artillery of 3 groups each of 3 batteries. The cavalry division consists of 3 cavalry brigades each of 2 regiments, 1 group of horse artillery, and 1 group of cyclist chasseurs.

The peace establishment of the French Army provides for 5 Cavalry

divisions and 25 divisions of the Active Metropolitan Army. The establishment of the Active Metropolitan Army by units for 1934–35 is as follows :—

—	Regiments	Independent Battalions	Independent Companies	Independent Groups	Independent Sections	Independent Squadrons
Infantry	71	21	—	—	—	—
Tanks	10	3	—	—	—	—
Cavalry	29	5[2]	—	—	—	11[1]
Artillery	68	13	10	2	—	—
Engineers	11	—	—	—	2	—

[1] Motor machine guns. [2] Dismounted dragoons.

The peace establishment of the Active Metropolitan Army for 1933–34 is 352,044, of whom 294,763 are allocated for Home Defence, and 57,281 form a mobile reserve for the overseas garrisons. Enlistment for the Metropolitan Army is regulated by the law of March 28, 1928, and is on a compulsory basis, but liberal exemptions are allowed. Service in the active army is for 1 year, and begins at the age of 21, the first half of the annual contingent joining in November, the second half in the following May. The total duration of service in active army and reserve is 28 years. Provision is made for the enlistment of 106,000 long service professional soldiers, 76,000 for the Metropolitan and 30,000 in the Colonial Army. After serving for 2 years, the soldier remains immediately available for military service for 3 years. In his fourth year of service he joins the first line of reserve for 16 years, and in his twentieth year the Territorial Army in which he remains for 8 years.

The *Reserve Troops* form divisions corresponding to those in the *Active Army* on mobilisation, in the same districts as those to which the Active divisions belong. The *Territorial Army* forms a second line and is similarly organised in divisions on mobilisation. The *Customs Corps* is organised in battalions as are the *Chasseurs Forestiers*, these are both recruited from men who have passed into the *Territorial Army*.

The *Gendarmerie* is a police force recruited from the Army but performing civil duties in time of peace. There is a legion in each military district. The strength of the *Gendarmerie* is 33,380, of whom about one-third are mounted.

The *Garde Républicaine* is also a police force and performs duties in Paris similar to those performed by the *Gendarmerie* in the districts. Its strength is 2,988.

The *Colonial Army* is distinct from the *Metropolitan*, and consists partly of white troops and partly of native troops. The Colonial establishment for 1934 was 206,063 exclusive of Colonial troops in France and of certain native troops administered by the Ministry of the Colonies. The total peace establishment of the French Army, exclusive of Gendarmerie, is 206,063 + 352,004 = 588,067. The Colonial white troops are recruited either by voluntary enlistment, or by voluntary transfer from the *Metropolitan Army*.

The organisation of the extra-European troops by units is as follows:—

—	Regiments	Independent Battalions	Independent Companies	Independent Groups	Independent Sections	Independent Squadrons
Infantry	54	14	11	—	—	—
Tanks	—	3	—	—	4	—
Cavalry	14	—	7	—	—	8
Artillery	10	1	—	2	12	—
Engineers	—	8	4	—	—	—
Air Force	2	—	—	4	—	—

The administration of the French Army consists of a General Staff and of a number of departments, all under the War Minister. In questions of strategy and of higher military policy the War Minister is assisted by a Council called the *Conseil Supérieur de la Guerre*, consisting of himself as President, the Marshals of France and twelve selected generals, of whom one must be Chief of the General Staff.

In September, 1919, it was decided that the uniform of the Army should be the horizon-blue dress with kepi. The *Chasseurs* or Light Infantry battalions were, however, permitted to keep their distinctive dark blue uniform. Khaki was adopted for Colonial and North African troops, and navy blue for the Air Force.

The French infantry is armed with the Lebel magazine rifle : calibre ·315. The French field gun is the 7·5 cm. (2·95 in.) Q.F., shielded gun. The French howitzer is the 10·5 cm. (3·35 in.) howitzer, and as the result of the war the French Army possesses a large varietv of heavy guns of all calibres.

Army estimates for 1934, 5,946,000,000 francs.

III. Navy.

Under the Washington Treaty, whose provisions affected her very slightly, France was allowed to retain ten capital ships, but the *France* was lost in Quiberon Bay on August 25, 1922, and the nine remaining displace 185,925 metric tons. By the provisions of the London Treaty, she retains the right to lay down additional capital ships up to a total of 105,000 tons during 1931–36. So far, the laying down in 1932 and 1934, respectively, of the 26,500-ton battle cruisers *Dunkerque* and *Strasbourg* is all that has been done towards effecting this tonnage replacement. These ships will each mount a main armament of eight 13 in. guns in quadruple turrets. A third capital ship, of 35,000 tons, is projected.

Ships completing include the battle cruiser *Dunkerque* (mentioned above); 6 cruisers of 7,600 tons (*Jean de Vienne*, *La Galissonière*, *Georges Leygues*, *Gloire*, *Marseillaise*, *Montcalm*); 2 flotilla leaders of 2,569 tons; 1 destroyer; 6 submarines; 1 netlayer of 2,330 tons; and a number of escort gunboats. All naval aircraft have been transferred from the Air Department to the Ministry of Marine; they comprise 5 squadrons of ship-borne aircraft, 11 squadrons shore-based and 6 squadrons of naval co-operation autonomous aircraft. The coast defences are now under the control of the Navy, and have been reorganized in four coast 'naval frontier' districts, in relation to 4

divisions of aircraft (40 flotillas), while a fifth division (10 flotillas) is attached to the active fleet. The naval frontier districts include considerable forces of destroyers, submarines, and minelayers. The chief stations are Dunkirk, Cherbourg, Brest, Rochefort, Toulon, Corsica, Bizerta, Oran, Algiers, and Bona.

Navy estimates for 1934 were 2,742,084,616 francs, including 50,000,000 francs for the personnel vote of the Naval Air Service, formerly included in the Air estimates. Naval construction covered by this vote includes the capital ship *Strasbourg*, of 26,500 tons, a flotilla leader, and 2 submarines. A special vote of 595,000,000 francs has been passed for oil fuel supplies; 144,000,000 francs of this are reported to be for the accumulation of reserves of oil fuel. For 1935 the amount demanded in the Budget for the Navy is 2,903,479,543 francs.

The Navy is under the supreme direction of the Minister of Marine, assisted by a Chief of the Staff. The latter has charge of all that concerns preparation for war, and is commander-in-chief designate. There are two sub-chiefs of the staff, of whom one is in charge of various sections, and the other of the work of the Military Cabinet. The central administration embraces the directorates of *personnel*, *matériel*, and artillery, the works section, the finance department, the services of submarine defences, hydrography, and the Naval Air Service. In addition to these are the Superior Council of the Navy, which advises the Minister on high policy, and several special committees. For purposes of administration the French coasts are divided into five maritime arrondissements, having their headquarters at the naval ports of Cherbourg, Brest, Lorient, Rochefort, and Toulon, each under a vice-admiral, but Lorient and Rochefort are being reduced. Two flag-officers are inspectors-general and commanders-in-chief designate in the Channel and Mediterranean.

The French navy is manned partly by conscription and partly by voluntary enlistment. By the channel of the 'Inscription Maritime,' which was introduced by Colbert, and on the lists of which are the names of all male individuals of the 'maritime population,' France was formerly provided with a reserve of 114,000 men, of whom about 25,500 were usually serving with the fleet; now large numbers are taken from the shore for engine-room and other duties. The active personnel in 1934 numbered 3,777 officers and 53,750 men.

The following is a summary of the strength of the fleet at the periods shown:—

—	Complete at end of		
	1932	1933	1934
Battleships—1st Class	6	6	6
Battleships—2nd Class	3	3	3
Aircraft Carriers	1	1	1
Armoured cruisers	1	1	1
Cruisers	17	14	14
Despatch Vessels and Sloops	68	75	79
Flotilla Leaders and Destroyers	81	81	76
Submarines	84	95	99

Below is a list of the principal ships in service or completing at the end of 1934. Instead of being replaced as proposed under the Washington agreement, the 6 first-class battleships are being modernised to a certain extent and will all be adapted to burn oil fuel.

Launched	Name	Standard Displacement	Armour		Armament	Torpedo Tubes	Indicated horse-power	Max. speed
			Belt	Guns				
	1st Class Battleships.							Knot
1911	Jean Bart, Courbet	22,189	10¾	12	12 12in.; 22 5·5in.; 4 3in. A.A.	4	28,000	20·5
1912	Paris							
1913	Bretagne, Lorraine, Provence	22,189	10¾	17	10 13·4in.; 10 5·5in.; 4 3in. A.A.	4	29,000	21
	2nd Class Battleships.

1924	Primauguet							
1930	Jeanne d'Arc	6,496	—	Shields	8 6·1in.; 4 3in. AA.	2	32,500	25·5
1914	Strasbourg	4,723	—		7 5·9in.; 2 3in. AA.	4	36,000	27
	Cruiser Minelayers.							
1933	Emile Bertin	5,886	—	Shields	9 6in.; 4 3·5in.	6	102,000	34
1929	Pluton	4,773	—		4 5·5in.	—	57,000	30
	Aircraft Carrier.							
1920	Béarn	22,146	3½	—	8 6·1in.; 6 3in. AA.	4	39,000	21
	Aircraft Tender.							
1929	Commandant Teste	10,000	2	—	12 4in.	—	21,000	20·5

In the flotillas are included 30 modern flotilla leaders of 2,126–2,441 tons and 26 destroyers of about 1,350 tons, with speeds ranging from 33 to 40 knots, besides 20 destroyers of older design; 60 ocean-going submarines, of which 8 are minelayers; and about 40 coastal submarines. Most of these are of recent design and construction.

IV. Air Force.

The French Air Force is under the Air Ministry and is controlled by the Supreme Air Council, of which the Air Minister is President, the other members being the Inspector General, the Chief of the Air Staff, and 5

general officers of the Air Services. The strength of the Air Force in 1934 was :—

Home :—Military, 26,951 ; naval, 4,301. *Overseas :*—Military, 7,522 ; naval, 1,128 ; total, 39,902.

The number of aircraft is service was :—

Home :—Military, 1,847, reserve machines, 474 ; naval, 109, reserve machines, 26. *Overseas :*—Military, 439, reserve machines, 131 ; total, 3,026.

There are in addition 3 dirigibles.

The Military Air Force in the Home County is organized in 3 divisions, with headquarters at Metz, Paris and Tours ; 5 air brigades and 2 bombing brigades. These units comprise : 11 air regiments ; 2 air bases ; 2 balloon regiments ; 1 independent group ; 16 groups of air mechanics ; 1 independent company of mechanics.

The Air Force Overseas is organized in 2 aviation regiments (Morocco, Levant) ; 4 independent groups (Algeria, Tunis) ; 3 squadrons (Indo-China, West Africa, Madagascar).

The budget of the Air Ministry for 1934 was 1,654,000,000 francs, exclusive of a special vote for modernizing equipment.

Production and Industry.

I. Agriculture.

Of the total area of France, including Alsace and Lorraine (134,379,755 acres), 25,615,023 acres were under forests in 1930, 12,412,835 acres were returned as moor and uncultivated land, and 87,849,470 acres, of which 53,823,868 acres were arable, were returned as under crops, fallow and grass.

The following tables show the area under the leading crops and the production for three years :—

Crop	Area (1,000 acres)			Produce (1,000 metric tons)		
	1932	1933	1934	1932	1933	1934
Wheat	13,422	13,496	13,103	9,077	9,861	8,359
Mixed Corn	205	185	161	107	105	820
Rye	1,731	1,704	1,670	861	898	829
Barley	1,778	1,736	1,909	1,089	1,145	1,137
Oats	8,366	8,311	8,123	4,818	5,674	4,155
Potatoes	3,490	3,436	3,448	16,484	14,822	—
Beetroot	657	674	669	7,590	7,461	—

The annual production of wine and cider appears as follows :—

Year	Under Vines, acres	Wine produced thousands of gallons	Wine Import, thousands of gallons	Wine Export, thousands of gallons	Cider produced 1,000 of gallons
1900[1]	3,974,970	1,441,330	114,760	41,010	647,000
1931	3,557,622	1,264.076	343,728	15,598	415,492
1932	3,489,606	1,047,948	301.532	13,574	373 494
1933	3,512,733	1,093,199	378,805	14,159	428,643

[1] Excluding Alsace and Lorraine.

The production of fruits (other than for cider making) and nuts for 1933, is given in metric tons, as follows (figures for 1932 in brackets) :—Apples and pears 182,300 (216,400), plums 35,800 (63,200), peaches 45,500 (49,600), apricots 9,300 (20,000), nuts 26,600 (40,500), cherries 40,600 (51,800).

On December 31, 1933, the numbers of farm animals were: Horses, 2,878,380; mules, 130,340; asses, 223,100; cattle, 15,829,790; sheep and lambs, 9,729,970; pigs, 6,768,970; goats, 2,448,100.

Silk culture, with Government encouragement (*primes*), is carried on in 21 departments of France—most extensively in Gard, Drôme, Ardèche, Var and Lozère. Silk production for 4 years:—

Year	Number of producers	Quantities of eggs put into incubation	Total production	Total value of produce
		Kilogs.	1000 Kilogs.	1000 Francs.
1930 . .	35,670	976	827	14,714
1931 . .	22,055	564	997	5,573
1932 . .	18.286	512	987	4,222
1933 . .	15,894	466	943	4,829

II. Mining and Metallurgical Industries.

The following are the statistics of the principal minerals produced for 3 years, in thousands of metric tons:—

—	1931	1932[1]	1933[1]	—	1931	1932[1]	1933[1]
Coal	50,019	46,266	46,853	Antimony . .	2·6	1·7	—
Lignite . . .	1,035	991	1,063	Auriferous ore.	196·0	191·0	168
Iron ore . . .	38,559	27,565	30,275	Manganese . .	0·3	—	—
Bauxite . . .	404	402	488	Lead ore . .	11·0	5·0	—
Pyrites . . .	193	191	—	Rock salt . .	1,518·0	1,484	1,542
Mineral oil . .	74	78	80	Potash salts .	369	326	326

[1] Provisional Figures.

The output of iron and steel products was as follows (in thousands of metric tons): pig iron, 1931, 8,250; 1932, 5,549; 1933, 6,328; crude steel, 1931, 7,816; 1932, 5,604; 1933, 6,519.

III. Manufactures.

Sugar.—In 1932-33, there were 106 sugar works, employing 28,728 men, 965 women, and 252 children. The yield of sugar during 12 years (expressed in metric tons of refined sugar) was:—

Years	Tons	Years	Tons	Years	Tons	Years	Tons
1921-22	278,273	1924-25	750,280	1927-28	780,867	1930-31	1,084,129
1922-23	445,368	1925-26	678,545	1928-29	815,861	1931-32	786,968
1923-24	446,773	1926-27	641,393	1929-30	825,333	1932-33	920,032

Alcohol.—In 1906, 59,616 thousands of gallons of alcohol were produced; in 1927, 37,348; in 1928, 47,360; in 1929, 55,480; in 1930-31, 67,584; in 1931-32, 75,899; and in 1932-33, 85,203.

Cotton.—In 1933, there were 11,654,700 spindles, 198,200 looms and 283 textile printing machines used in the cotton industry which employed a total number of 235,300 operatives.

IV. Fisheries.

For the French fisheries, including those of Algeria, the following are statistics for 1932 (the latest available):—Persons employed, 139,208; sailing-boats, 15,060; steamers, 544; motor boats, 9,414; value of products, 958,144,000 francs.

Commerce.

In French statistics General Trade includes all goods entering or leaving France, while Special Trade includes only imports for home use and exports of French origin.

The chief subdivisions of the special trade in thousands of francs and in tons were for two years :—

—	Imports				Exports			
	1933		1934		1933		1934	
	Tons	1000 francs	Tons	1000 francs	Tons	1000 francs	Tons	1000 francs
Food products	6,897,986	9,604,142	5,901,985	7,450,979	1,210,416	2,543,531	1,452,781	2,566,228
Raw materials	39,693,719	13,794,831	37,960,267	11,372,712	20,864,937	4,752,883	23,400,517	5,148,815
Manufactured goods . .	1,841,271	5,031,869	1,849,029	4,237,074	3,093,498	11,177,387	3,485,759	10,106,609
Total .	48,432,976	28,430,842	45,711,281	23,060,765	25,168,851	18,473,801	28,339,057	17,821,652

The chief articles of import and export (special trade) were in millions of francs :—

Imports	1933	1934	Exports	1933	1934
Wine . . .	3,160·6	1,890·0	Timber . . .	70·3	70·0
Wool . . .	1,555·2	1,325·8	Textiles, silk . .	724·9	570·0
Cereals . . .	1,339·3	1,210·3	,, cotton. .	966·0	813·3
Raw cotton . .	1,573 7	1,071·6	Wine . . .	476·7	498·0
Coal and coke . .	2,210·5	1,962·7	Raw silk and yarn .	25·7	31·7
Coffee . . .	877·6	700·4	Soaps and perfumes	285·8	247·9
Oil seeds . . .	1,176·8	924·3	Iron and steel . .	1,238·4	1,555·4
Sugar . . .	454·0	477·8	Jewellery, etc. . .	281·3	232·4
Petroleum . .	1,301·5	1,157·8	Automobiles . .	688·6	611·9
Machinery . .	898·0	752 0	Chemical products .	1,761·3	1,650·4
Copper . . .	412·4	322·8	Glass . . .	280·9	274·0
Iron and steel . .	147·4	108·0	Clothing . . .	181·1	157·5
Hides and skins .	484·4	328·7	Rubber goods . .	226·5	174·0
Silk	240·9	159·2	Table fruits . .	169·4	121·1
Chemicals. . .	889·2	751·6	Vegetables . .	45·5	39·8

The chief imports for home use and exports of home goods are to and from the following countries, in thousands of francs :—

Countries	Imports		Exports	
	1933	1934	1933	1934
United Kingdom	1,894,220	1,637,386	1,678,238	1,535,879
Germany . .	2,928,280	2,218,448	1,714,098	1,979,437
Belgium . .	1,802,536	1,469,738	2,140,529	1,977,081
Switzerland .	612,300	523,323	1,330,160	1,266,400
Spain . . .	687,067	496,501	377,235	395,702
Italy . . .	623,660	483,386	496,327	552,838
United States .	2,934,981	2,215,635	868,243	836,289
Brazil . . .	447,150	327,820	161,601	116,057
Argentina . .	613,020	513,945	328,891	290,760
French Colonies .	6,730,217	5,812,751	5,989,267	5,502,416

The following table gives the declared value, in pounds sterling, of the more important articles consigned to the United Kingdom from France in four years according to Board of Trade returns :—

Staple Imports into U.K.	1930	1931	1932	1933
	£	£	£	£
Apparel &c.	1,432,999	1,029,946	283,379	356,671
Silk manufactures	5,026,755	2,509,308	1,631,292	1,383,514
Woollen goods	3,096,581	2,557,178	212,383	257,758
Artificial silk manufactures	2,323,823	2,718,918	1,807,459	1,321,000
Fancy goods	729,423	501,696	188,944	167,768
Wine	1,831,582	1,567,836	761,493	1,192,049
Brandy	878,243	844 614	702,580	814,046
Leather goods	1,633.827	1,602,938	714,411	372,127
Motor-cars	716,671	399,367	286,912	377,078

The total quantity of wine imported into the United Kingdom from France in 1930, was 2,442,386 gallons; in 1931, 2,218,574 gallons; in 1932, 1,422,978 gallons; and in 1933, 1,642,459 gallons.

The following table exhibits the value, according to Board of Trade returns, of the principal articles of British produce consigned from the United Kingdom to France in four years :—

Staple Exports from U.K.	1930	1931	1932	1933
	£	£	£	£
Woollen and Worsted	1,128,066	892,504	542,578	623,652
Iron and steel	1,145,441	637,589	349,364	337,091
Coal	10,801 396	8,603,456	7,721,173	7,611,403
Cotton yarn	574,776	368,288	133,787	108,443
Machinery	906,434	2,050,893	1,231,962	1,353,450

Total trade between France and United Kingdom for 5 years (in thousands of pounds) :—

—	1930	1931	1932	1933	1934
Imports from France into U.K.	49,267	40,922	19,070	19,085	19,258
Exports to France from U.K.	29,690	22,552	18,446	18,152	16,756
Re-Exports to France from U.K.	14,508	9,468	8,332	7,625	6,723

Shipping and Navigation.

On July 1, 1934, the French mercantile marine possessed 1,567 vessels with a gross tonnage of 3,298,053.

Shipping in foreign trade in 1934, and its distribution among French ports, is shown as follows with cargoes only :—

—	Entered (1934)		Cleared (1934)	
	Vessels	Tonnage	Vessels	Tonnage
French	8,539	13,955,978	7,178	12,260.665
Foreign	18,578	38,626,995	12,018	31,981,339
Total	27,117	52,582,973	19,196	44,242,004
Marseilles	7,235	13,685,012	6,433	13,691,642
Le Havre	6,602	8,223,762	7,297	7,107,484
Cherbourg	1,059	6,448,081	794	6,404,817

—	Entered (1934)		Cleared (1934)

Caen	1,225	542,912	856	345,835

Internal Communications.

I. Rivers, Railways, etc.

In 1933, there were in France 49,809 miles of national roads, 3,477 miles of departmental roads, 338,205 miles of local roads, making a total of 391,491 miles.

In 1931, there were 6,106 miles of navigable waterways with a total traffic of 52,667,000 tons.

By a law of July 11, 1842, the construction of railways was left mainly to companies, superintended, and if necessary assisted, by the State; which now constructs lines which the companies work, and works on its own account one important State system. There are lines of local interest subventioned by the State or by the departments. The concessions granted to the six great companies expire at various dates from 1950 to 1960, till when (by a Convention made on June 28, 1921), the State guarantees to them working expenses and the interest and redemption of capital and loans.

The length of principal lines open for traffic on January 1, 1933 was 26,076 miles, made up as follows: State, 5,667 miles; Nord, 2,357 miles; Est 3,009 miles; Paris-Orléans, 4,881 miles; Paris-Lyons-Mediterranean, 6,180 miles; Midi, 2,678 miles; Alsace-Lorraine, 1,304 miles. The total receipts for 1933 of all the seven companies was 11,378,511,447 francs; for 1934, 10,836,416,010 francs.

The electrification of the French railways is now a settled policy. On January 1, 1933, there was a total length of 1,262 miles electrified. The State railway has 63 miles (Paris suburbs); the Orléans railway 145 miles (Paris–Vierzon 127 miles); the P.L.M. 84 miles (Chambéry to the Modana section of the Culoz-Modana line), and the Midi about 925 miles.

The following table gives particulars of air traffic for 4 years:—

Years	Mileage flown (in thousands of miles)	Passengers carried	Freight (1,000 lbs.)	Mail (1,000 lbs.)
1930	5,849	28,935	3,678	478
1931	5,945	34,238	3,895	504
1932	5,685	36,792	2,554	380
1933	6,202	51,110	3,326	512

II. Posts, Telegraphs and Telephones.

From April 1, 1932, to December 31, 1932, the receipts on account of posts, telegraphs, and telephones amounted to 2,806 million francs; the

expenditure to 2,835 million francs. The number of ordinary letters carried in 1932, was 1,601 millions, and of registered letters 75 millions.

The total length of the telegraphic lines in 1932, was 223,725 miles. In 1932, there were despatched 38,463,000 telegrams, of which 26,342,000 were internal and 5,275,000 international. In 1932, gross telegraph receipts were 184,245,000 francs.

In 1931, the telephone systems in France had 138,992 miles of line, and 4,469,725 miles of wire; number of subscribers (1932) 1,292,000; number of conversations 861,854,000.

Money and Credit.

The nominal value of the French money coined in France during the past years was:—

Year	Gold	Silver	Nickel and Bronze	Nickel and Aluminium	Total
	Francs	Francs	Francs	Francs	Francs
1914–1929 .	165,002,990	813,186,341	1,087,330,240	8,984,231	2,074,503,802
1930 . . .	—	369,861,630	10,900,444	—	380,762,074
1931 . . .	—	354,675,830	12,176,463	50,325,911	417,178,204
1932 . . .	—	402,876,670	12,178,303	102 073,372	517,128,345
1933 . . .	— .	800,401,000	811,017,000	53,151,000	1,664,569,000

The ordinary savings-banks numbered 560 (with about 1,800 branch offices) on December 31, 1932; the number of depositors was 9,901,000, with deposits to the value of 33,659,000,000 francs, representing an average of francs 3,400 to each depositor.

The National savings-banks, on December 31, 1932, held deposits and interest amounting to 23,614,260,000 francs due to 9,668,515 depositors, representing an average of 2,440 francs per account.

The Bank of France, founded in 1800, and placed under State control in 1806, has the monopoly (since 1848) of issuing bank notes. The present privileges of the Bank were last renewed on December 20, 1918, for a further 25 years, *i.e.*, until December 31, 1945. The capital of the Bank is fixed at 182,500,000 francs.

The situation of the Bank compared as follows:—

	February 9, 1934	February 8, 1935
	1000 francs	1000 francs
Gold	74,882,707	81,883,244
Sight deposits abroad . . .	14,040	8,667
Advances to the Public . .	3,003,675	3,140,669
Advances to the State . . .	3,200,000	3,200,000
Notes in circulation . . .	81,392,589	82,561,440
Current accounts and deposits .	12,618,967	15,264,076

At the outbreak of war the maximum note issue of the Bank of France was 6,800 million francs; on August 5, 1914, it was raised to 12,000 million francs; the amount was increased on successive occasions. By the Monetary Law of June 24, 1928, the maximum limit on note issue was cancelled.

The following are the principal banks:—The Crédit Foncier de France, founded in 1852, which lends money on mortgage; the Crédit Lyonnais, founded in 1863; the Société Générale, founded in 1864; the Comptoir-National d'Escompte de Paris; Banque de Paris et des Pays Bas; and the Banque Nationale de Crédit.

Money, Weights, and Measures.

The *Franc* of 100 *centimes* was in normal pre-war conditions of the value of 9½*d.* or 25·225 francs to the pound sterling.

A new Monetary Law was introduced on June 24, 1928, stabilising the franc on a gold basis. According to this law, the franc, the French monetary unit, consists of 65½ milligrammes of gold, 900/1,000 fine. The Bank of France is bound to convert its notes into gold on demand, and to keep a reserve of gold bullion and coin equal to at least 35 per cent. of the combined total of the notes in circulation and of the credit current accounts. The Mint has struck gold coins of 100 francs, 900/1,000 fine, and these coins are to be unlimited legal tender. To replace the 5, 10 and 20 franc notes of the Bank of France, which were withdrawn from circulation on December 31, 1932 (from which date they ceased to be legal tender), the Mint, on behalf of the State, issued silver coins 680/1,000 fine, of a nominal value of 5, 10 and 20 francs. The total issue of such coins must not exceed 3 milliard francs.

The weight of the 10-franc silver coins is fixed at 10 grammes and of the 20-franc piece at 20 grammes, with a margin of five-thousandths both as regards weight and fineness.

The metric system of weights and measures is in general use in France.

Diplomatic Representatives.

1. Of France in Great Britain.

Ambassador.—Charles Corbin (appointed March 8, 1933).
Counsellor.—Roger Cambon, C.V.O.
First Secretary.—Mons. de Margerie.
Second Secretaries.—Marquis de Castellane and Mons. de G. de Charbonnière.
Attaché.—Jacques Roux.
Military Attaché.—Général de Brigade Voruz.
Naval Attaché.—Capitaine de Vaisseau Latham.
Air Attaché.—Lieutenant de Vaisseau Albertas.
Commercial Attaché.—Vicomte de Poulpiquet du Halgouêt.
Financial Attaché.—Emmanuel Monick.
Consul-General in London.—J. Knecht.

There are also French Consuls at:—Cardiff, Dublin, Glasgow, Liverpool, Manchester (V.C.), Newcastle, Southampton (V.C.), and other places.

2. Of Great Britain in France.

Ambassador.—Rt. Hon. Sir George Russell Clerk, G.C.M.G., C B. (appointed February 25, 1934).
First Secretaries.—O. C. Harvey and C. B. P. Peake, M.C.
Third Secretaries.—F. K. Roberts and F. H. R. Maclean.
Commercial Counsellor.—Sir R. Cahill, Kt., C.M.G.
Commercial Secretary.—A. H. S. Yeames.
Financial Adviser.—E. Rowe-Dutton, C.M.G.
Naval Attaché.—Captain C. F. Hammill, R.N.
Military Attaché.—Col. T. G. G. Heywood, O.B.E.
Air Attaché.—Group-Captain R. M. Field.
Press Attaché.—Sir Charles Mendl.

Superintending Archivist.—W. E. Fuller, O.B.E.
Consul-General.—G. D. N. Haggard, C.M.G., O.B.E.
Canadian Minister in Paris.—Philippe Roy (appointed Sept. 28, 1928).

There are British Consular Representatives at Ajaccio, Bordeaux, Brest, Calais, Cherbourg, Dunkirk, Havre, Lille, Lyons, Marseilles (C.G.), Nantes, Nice, Rouen, Strasbourg (C.G.), and other towns.

ANDORRA.

The independence of the valleys of Andorra was of Carlovingian origin. Their political status was regulated by the *Paréage* of 1278, according to which they were placed under the joint suzerainty of the Comte de Foix and of the Spanish Bishop of Urgel. The rights vested in the House of Foix passed by marriage to that of Béarn and, on the accession of Henri IV, to the French Crown; they are now exercised by the President of the French Republic. The country consists of gorges, narrow valleys and defiles, surrounded by high mountain peaks of the Eastern Pyrenees. Its maximum length is 17 miles, and its width 18 miles; it has an area of 191 square miles and a population of 5,231, scattered in 6 villages. The surface of the country is rough and irregular, with an altitude varying between 6,562 and 10,171 feet. The country is governed by a Council-General of twenty-four members elected for four years by male citizens of 25; half of the council is re-elected every two years. The council nominates a First Syndic (*Syndic procureur des Vallées*) to preside over its deliberations; in the First Syndic was vested the executive power. A Second Syndic was also nominated as deputy of the First Syndic. The judicial power is exercised in civil matters in the first instance by 2 civil judges (*Bayles*) appointed by the Bishop and by France respectively. There is a Judge of Appeal appointed alternatively by each co-Prince, and in the third instance a Supreme Court of Andorra at Perpignan, and an Ecclesiastical Court of the Bishop at Urgel. For criminal suits two magistrates (*le Viguier de France* and *le Viguier Episcopal*), assisted by the Judge of Appeal, preside over a criminal court at Andorra-la-Vieille. The valleys of Andorra pay an annual due of 960 francs to France and 460 pesetas to the Bishop. A permanent delegate, the Prefect of the Pyrénées Orientales, moreover, has charge of the interests of France and his department controls the public services established by France, such as education, posts and telegraphs. A good road traverses the country, connecting the Spanish and French frontiers by way of Sant Julia, Andorre-la-Vieille, les Escaldes, Encamp, Canillo and Soldeu: it crosses the Col d'Envalira (2407 metres). Another road connects Andorre-la-Vieille with Ordino. Catalan is the language spoken. French and Spanish currency are both in use.

Colonies and Dependencies.

The colonies and dependencies of France (including Algeria and Tunis) have an area which is given officially as about 11,049,711 sq. kilometres, or 4,265,188 square miles, with a population of 63,374,000. Algeria, however, is under the jurisdiction of the Ministry of the Interior, and Tunis and Morocco are attached to the Ministry of Foreign Affairs. For Syria, Togo, and Cameroon France holds mandates under the League of Nations. The

administration of the colonies is directed or controlled by the Ministry of the Colonies, which was organised as a separate department in 1894. Most of them enjoy some measure of self-government and have elective councils to assist the governor. The older colonies have also direct representation in the French legislature, Réunion, Martinique and Guadeloupe sending each a senator and two deputies, French India a senator and a deputy, Senegal, Guiana, and Cochin-China each a deputy, while most of the others are represented on the 'Conseil Supérieur des Colonies.' This council consists of the senators and deputies of colonies, delegates from other colonies, and officials and other persons appointed on account of their special knowledge or qualifications. Some only of the colonies have a revenue sufficient for the cost of administration.

The area and population of the colonial domain of France are as follows:

—	Year of Acquisition	Area in Square Miles	Population
In Asia:—			
India	1679	196	286,410
Annam	1884	39,758	5,119,801
Cambodia	1862	67,550	2,806,000
Cochin-China	1861	26,476	4,467,352
Tonking	1884	40,530	8,012,429
Laos	1892	89,320	944,000
Syria [1]	1922	60,000	2,831,622
In Africa:—			
Algeria	1830–1902	847,552	6,553,451
Tunis	1881	48,300	2,410,692
Sénégal	1687–1889	74,112	1,587,944
French Sudan	1893	380,557	3,568,825
Guinea	1843	89,436	2,176,281
Ivory Coast	1843	180,802	3,842,944
Dahomey	1893	41,302	1,132,289
Mauritania	1893	347,400	348,929

ASIA.

FRENCH INDIA.

The chief French possession in India is Pondicherry. It was founded by the French in 1674, taken by the Dutch in 1693, and restored in 1699. The English took it in 1761, restored it in 1765, re-took it in 1778, restored it a second time in 1785; re-took it a third time in 1793, and restored it in 1814.

As established by the treaties of 1814, and 1815, the French possessions in India consist of five separate colonies, which cover an aggregate of 50,803 hectares (about 196 square miles), and had in 1933 the following estimated populations:—

*Pondichéry	46,535	Modéliarpeth	14,445	Nédounkadou	8,051
Oulgaret	21,743	Ariancoupom	16,367	Cotchéry	6,928
Villenour	19,572	*Karikal	17,070	*Chandernagor	28,082
Tiroubouvané	24,473	Tirnoular	9,661	*Mahé	12,523
Bahour	20,285	Grande Aldée	8,158	*Yanaon	4,734
Nettapacom	12,753	Neravy	10,307	Total	281,684

In 1933, the population of the Provinces was as follows:—Pondichéry, 176,173; Karikal, 60,172; Chandernagor, 28,082; Mahé, 12,523; Yanaon, 4,734.

The colonies are divided into five *dépendances* (the chief towns of which are marked with an asterisk in the above table) and seventeen communes, having municipal institutions. There is also an elective general council. The Governor of the colonies resides at Pondichéry. The colonies are represented in the Parliament at Paris by one senator and one deputy. In the colonies

the birth-rate in 1933, was 2·03 per cent. for Europeans and mixed, and 3·74 per cent. for Indians; and the death-rate 11·55 per cent. for Europeans and mixed, and 4·33 per cent. for Indians. There were in 1932, 62 primary schools and 5 colleges, all maintained by the Government, with 307 teachers and 12,099 pupils. Local revenue (budget, 1933) was 3,049,585 rupees and expenditure, 2,763,199 rupees. The principal crops are paddy, rice, manioc, ground-nuts. On December 31, 1933, there were 66,710 cattle, 27,225 sheep, and 33,745 goats. There are at Pondichéry 3 cotton mills, and at Chandernagor 1 jute mill; the cotton mills have, in all, 1,335 looms and 72,067 spindles, employing 8,245 persons. There are also at work a few oil presses for ground-nuts, and one ice factory. At the ports of Pondichéry and Karikal, in 1933, the imports amounted to 108,615,000 francs, and the exports to 127,418,000 francs. At these ports in 1933, 286 vessels entered and cleared. Railway open, 43 miles, Pondichéry to Villapuram, and Peralam to Karikal. The Banque de l'Indochine has a branch in Pondichéry.

FRENCH INDO-CHINA.

CENTRAL GOVERNMENT.

Governor-General.—René Robin (February 27, 1934).
Secretary-General.—H. Yves Châtel (March 13, 1934).

Government, Area and Population.—French Indo-China, with an area of about 285,000 square miles and a population, in 1931, of 21,652,000, of whom 43,839 were European (including military forces), consists of 5 States: the Colony of Cochin-China, the Protectorates of Annam, Cambodia (including the territory around Battambang ceded by Siam in 1907) Tonking and Laos; and Kwang-Chau-Wan, leased from China. The whole country is under a Governor-General, assisted by a Secretary-General, and each of the States has at its head an official bearing the title of Resident-Superior, except in the case of Cochin-China, which, being a direct French Colony while the others are only Protectorates, has a Governor at its head. There is a Grand Council for Economic Affairs and a Government Council for the whole of Indo-China, a Colonial Council in Cochin-China, a Protectorate Council, and a Council for Economic Affairs for each of the Protectorate States.

Education.—Instruction is given in public and private schools. The system of education is like that of France, and instruction is given in elementary schools and in the three lycées at Hanoi, Saigon and Balat (Annam). For native children there were, in 1933, 8,314 elementary schools, with 390,000 pupils and 11,834 teachers, and 23 high schools (2 lycées for boys with 319 pupils, and 21 colleges for boys and girls, with 3,890 pupils), of whom 3,540 were boys and 350 girls. The Indo-Chinese University of Hanoi (organised in 1917) had 203 Indo-Chinese students in 1933, a school of Medicine and Pharmacy (established in 1923) had 248 students, and a school of law (established in 1932) had 140 students.

Justice.—In Cochin-China justice is administered by French magistrates for both Europeans and natives, but in the Protectorates there are native tribunals for matters affecting natives, and French courts for matters affecting Europeans and Chinese. From the native tribunals there is an appeal to courts at Saigon and Hanoi. In these appeal courts European judges, in matters affecting natives, are assisted by Annamite mandarins.

Finance.—There is a common budget for the whole of Indo-China, and also a separate budget for each of the States. The Provinces have also their budget, as have the municipalities. The general budget is supported by receipts from customs, Government monopolies, indirect contributions, posts, telegraphs, and railways in all the countries of the union, and besides maintaining these, provides for military and judicial services, public works, and other matters relating to the whole of the union. For 1934 the revenue and expenditure of the general budget balanced at 60,954,000 piastres. The outstanding debt of Indo-China on January 1, 1934, amounted to 1,414,000,000 francs and 5,450,000 piastres.

Defence.—The military force consists of two divisions and an independent brigade. Effective strength on July 1, 1933, was 831 officers, and 28,280 other ranks (18,035 natives). The naval force on December 31 comprised 3 sloops, 5 gun-boats, 2 submarines, and 5 surveying vessels.

Production.—Indo-China is divided into three main economic areas:—(1) The territory tributary to Saigon (Cochin-China, Cambodia, Southern Laos, and Annam South of Cape Varella), which, apart from the fisheries on the Coast and the interior lakes, is almost entirely agricultural, being one of the great rice regions of the world. (2) The region tributary to Haifong (Tonking and the three northern districts of Annam), which is devoted to agriculture, mining and manufacture. (3) Central Annam (the region between Porte d'Annam and Cape Varella), with Tourane as the principal port, which is mainly agricultural, but is not a great rice-growing district; its main exports are cinnamon, sugar and tea. The minerals of Indo-China are coal (output in 1933, 1,591,000 tons), zinc (4,989 tons), tin (1,055 tons), wolfram (211 tons), spelter, 3249 tons.

Commerce.—In 1887, the French possessions in Indo-China, including Annam, Tonking, Cochin-China and Cambodia, were united into a Customs Union. In 1933, the total imports amounted to 910,000,000 francs, and exports to 1,015,000,000 francs. The chief export is rice, 1,214,000 tons in 1932, and 1,289,000 tons in 1933. Other exports are rubber, fish, coal, pepper, cattle and hides, corn, zinc and tin ore. The principal imports are cotton and silk tissues, metal goods, kerosene and motor cars.

In 1934, the imports into Great Britain from Indo-China amounted to 273,451*l.*, and the exports from Great Britain, 141,306*l.*; re-exports to Indo-China from U.K. were 939*l.*

Communications.—There are 5,257 miles of colonial routes and 10,611 miles of local roads (December 31, 1932).

The principal railways are from Saigon to Mytho (43½ miles); from Hanoi to Nacham (111 miles); from Hanoi to Tourane (497 miles); from Saigon to Khanh-Hoa (264 miles); from Haiphong to Yunanfou (534 miles); from Phnom Penh to Mongkol Borey, 211 miles; and from Tourcham to Dalat (38½ miles). Total length of line, two-thirds Government, 1,699 miles. There were 354 principal post offices and more than 700 rural post offices (1932).

In 1932 there were 4,047 miles of telephone lines in Indo-China, and 24,195 miles of wire. The number of calls made was 9,810,000, the number of subscribers 7,362. There is a radio-telephonic service to Europe from Saigon. The length of telegraph line in 1932 was 11,861 miles; number of inland telegrams sent, 1,028,000.

Money and Banking.—According to a decree of May 31, 1930, the piastre was legally established on a gold basis, the rate of stabilisation being 10 francs = 1 piastre. The piastre will have a gold content of 655 milligrams (10·0308 grains) of fine gold and will be 900 fine.

The Bank of Indo-China has the monopoly of note issue in Indo-China. This privilege was renewed for a period of 25 years by the law of March, 1931. Its capital is 120,000,000 francs. Notes in circulation, July 31, 1934, 92,055,000 piastres.

British Consul-General at Saigon.—Drummond Hogg.
British Vice-Consul at Haiphong.—A. Mercadier.

STATES AND PROTECTORATES.

Cochin-China.

Cochin-China was ceded by the King of Annam to France in 1862. Its area is estimated at 26,476 square miles. The whole is divided into 21 provinces. The towns of Saigon, Cholon, Cantho, Baclieu and Ranhgia have been formed into municipalities and a new administrative division, named 'Région Saigon-Cholon' has been created. The Colonial Council contains 24 members (12 French, 12 native). The colony is represented in France by one deputy. The population consists mainly of Annamites, Chinese and foreigners. In 1933, the total population was put at 4,441,418, of whom 17,000 were French and 597 European foreigners (excluding the military forces, about 3,000 troops). There were 131,000 Chinese in 1933, of whom 33,415 resided in Cholon. Saigon had, in 1933, a population of 109,468, of whom 11,760 were French and 460 other Europeans. The town of Cholon has 88,000 inhabitants, of whom 893 are French and 17 other Europeans. There are about 1,536 schools, with 3,811 teachers, and 135,807 pupils.

Of the total area, 2,554,000 hectares (6,308,380 acres) are cultivated (1933). The chief culture is rice, of which the production in 1933 was 1,931,524 metric tons from 2,049,986 hectares. Other crops are maize, beans, sweet potatoes, earth-nuts, cotton, rubber, sugar-cane, tobacco, coffee, coco-nuts, betel-nuts, pepper, oranges, bananas, etc. The farm animals in 1933 comprised 11,426 horses, 454,968 buffaloes, 628,520 pigs, 5,772 sheep and goats.

River and coast fishing is actively carried on; the fishery products are valued at 63,350,000 francs yearly. There are 55 rice mills in Saigon and Cholon, turning out 3,705 tons of rice a day. In these towns are also 8 saw-mills, 6 soap factories, and a varnish factory. Commerce is mostly in the hands of Europeans and Chinese, but about 18,000 Annamites are small traders. The total exports in 1933 amounted to 771,846,000 francs, and imports to 536,872,000 francs. The chief exports in 1933 were rice (1,247,282 metric tons), dried and salted fish (22,633 metric tons), pepper (3,678 metric tons), cotton (702 metric tons), copra (7,372 metric tons), rubber (18,683 metric tons). During 1933, 986 steamers of 3,702,540 tons and 2,373 sailing vessels of 64,821 tons entered at the port of Saigon. The vessels of the Messageries-Maritimes and of the Chargeurs-Réunis Companies visit Saigon regularly. There is also constant communication with Hong Kong and Singapore by British, Norwegian, Japanese and Chinese vessels. There are about 4,350 miles of roads, of which 3,230 miles are suitable for all weathers. There are also 3,480 miles of navigable waterways. There is a regular weekly air service between Marseilles and Saigon. (For railways

see Indo-China.) At Saigon there are 10 banks or bank-agencies, but the two chief ones are the Franco-Chinese Bank and the Indo-China Bank.

In 1933, the local budget balanced at 13,229,130 piastres.

Annam.

French intervention in the affairs of Annam, which began as early as 1787, was terminated by a treaty, signed on June 6, 1884, and ratified at Hué on February 23, 1886, by which a French protectorate has been established over Annam. The King **Bao-Dai** succeeded to the throne on January 8, 1926. The King governs the country, assisted by a Council of Ministers, in accordance with the wishes of the French Government, represented by a Resident Supérieur. A Chamber of representatives of the people was established in 1926. The ports of Tourane and Qui-Nhon are opened to European commerce, and the customs revenue conceded to France; French troops occupy part of the citadel (called Mang-Ca) of Hué, the capital (population in 1934, 33,222). Province of Binh-Dinh had 557,126 inhabitants in 1931. Annamite functionaries, under the control of the French Government, administer all the internal affairs of Annam. The area of the protectorate is about 39,758 square miles, with a population in 1934, of 5,122,249. There were 2,885 Europeans, 591,705 Moïs, 9,878 Chinese, and 242 Japanese and Indians. The population is Annamite in the towns and along the coast, and consists of various tribes of Moïs in the hilly tracts. There were in 1934, 1,023 preparatory schools with 44,824 pupils; 103 elementary schools with 7,730 pupils; 90 secondary schools with 17,369 pupils; one higher secondary school for boys at Hué, with 502 pupils, one at Vinh with 110 pupils and one at Quinhon with 420 pupils; one higher secondary school for native girls at Dông-Khanh with 502 pupils, and one at Tanh-Hoá with 89 pupils; one professional school with 162 pupils; one normal school for boys, and one for girls, both at Hué. Local budget, 1934, balanced at 8,808,230 piastres. The Phanrang river has been utilised to irrigate about 6,900 acres, and similar works, on a smaller scale, have been carried out in Central Annam. Rice is the most important product. Others are cotton, maize, and other cereals, the areca nut, mulberry, cinnamon, tobacco, sugar, betel, manioc, bamboo; excellent timber abounds, also caoutchouc, cardamoms, coffee, dye, and medicinal plants. Raw silk is produced. There are about 900,000 head of cattle in Annam, and cattle rearing is of some importance. There are copper, zinc, and gold in the province of Quang-nam; the mines are worked by natives. An important seam of haematite iron is worked about 9 kilometres from Thanhhoa. At Nongson, near Tourane, coal mines are worked. In North, Central, and Southern Annam there are salt works. The chief imports are cotton-yarn, cottons, tea, petroleum, paper goods, and tobacco; chief exports, sugar, rice, cotton and silk tissues, cinnamon, tea, and paper. In 1933, 226 French ships of 1,000,853 tons, 21 Chinese of 27,279 tons, and 13 ships (19,861 tons) of other nationalities cleared the port of Tourane, the total tonnage being 1,047,993 tons. The number of native junks entering the port were 2,481, of a tonnage of 22,405.

Cambodia.

Cambodia is bounded on the south by Cochin-China, on the east by Annam, on the north by Laos and Siam, on the west by Siam, and on the south-west by the Gulf of Siam. The French Protectorate was established in 1863.

Area, 67,550 square miles; population according to the census of 1931:

2,806,000, of whom 2,000 were Europeans (excluding the military forces), 176,000 Annamites, 148,000 Chinese, 2,475,000 Cambodians, Sino-Cambodians, Malayans, and Laotians, and 5,000 of various races. The present King, **Sisowathmonivong**, succeeded his late father, Sisowath, on August 9, 1927, and was crowned on July 22, 1928. The country is divided into 14 provinces. The four chief towns are Phnôm-Penh (population 96,000), the capital of the territory, located at the crossing of Tonlé-Sap and Mékong rivers, Battambang, 180 miles further north-west, Kampot (92 miles from the capital), a seaport on the Gulf of Siam, but not accessible for sea-going vessels, and Kompong-Cham. The budget for 1933 balanced at 7,942,000 piastres, including a sum of 728,000 piastres allowed for the civil list of the king and princes. There were (1932) 410 French-native schools, besides one college and one professional school, and a school of Applied Arts. Total number of pupils in attendance was (1932) 26,000 Cambodian, Annamite and Chinese.

The soil is fertile, but only a part of it is under cultivation owing to shortage of labour. The chief product of Cambodia is rice which is exported by way of Cholon where the rice is milled, and Saigon where it is shipped. Amongst the other products are tobacco, kapok, cotton, pepper, maize, palm sugar, rubber and silk. Pepper is especially grown in the country of Kampot, the export in 1931 was 3,100 metric tons. Maize growing is extending; the production of maize is estimated at 70,000 tons, the whole of which is exported. Cattle breeding is a flourishing native industry, especially between Phnôm-Penh and Manila. Other native industries are: weaving of silk and cotton, pottery and making of rush mats. There is a cotton-ginning mill, a silk factory and rice-mills at Phnôm-Penh. Valuable forests cover an area of about 10,000,000 acres. Phosphate is the principal mineral, but not worked very extensively. The overflow of the Mekong river fills up the Great Lake, which occupies the middle of Western Cambodia. With the low-water season the lake slowly empties and leaves innumerable ponds on the ground it covered during the high-water season. These ponds are filled with an enormous quantity of fish suitable for salting and smoking. This is the principal native industry. Imports in 1931: 17,500,000 piastres; exports, 23,500,000 piastres. The imports comprise salt, beverages, textiles, chemicals, cigarettes, iron and opium; the exports comprise rice, salted fish, pepper, maize, cotton, tobacco, fish-oil, palm-sugar, sticklac, kapok, wood, resin, hides, and cattle. This last trade is carried between Phnôm-Penh and Manila.

Cambodia possesses two little sea-harbours, Kep and Réam, both on the Gulf of Siam and connected to Bangkok and Saigon by the steamers of the 'Siam Steam Navigation Company.' The Mékong and the Great Lake, with their affluents, give a total of 875 miles of waterways, of which about 370 are not navigable to launches during the low-water season. River-steamers easily reach Phnôm-Penh, which has good quays and embankments.

Cambodia possessed in 1930, 1,430 miles of good metalled roads and nearly 188 miles of unmetalled roads and 50 miles of roads in course of construction. The chief roads are from Saigon to the Siamese frontier, viâ Phnôm-Penh and Battambang, from Phnôm-Penh to the Gulf of Siam, and Mount Bokor (hill-station), from Saigon to Kratié, and from Phnôm-Penh to Angkor viâ Kompong-Thom. A railway between Phnôm-Penh and Battambang is in operation and will shortly be connected up with the Siamese railway system.

Of all the countries of the Far East, Cambodia is among the richest in ancient monuments. The ruins of Angkor are specially famous.

Tonking.

This territory, brought under France's protectorate in 1884, has an area of 40,530 square miles, and is divided into 23 provinces, and 4 military territories, with 10,885 villages and a population in 1934 of 8,669,949, of whom 10,315 were French (exclusive of military forces) and 285 other Europeans. The King of Annam was formerly represented in Tonking by a viceroy, but, in July, 1897, he consented to the suppression of the viceroyalty and the creation of a French residency in its place. Chief town Hanoi, a fine and large modern town, with a population of 120,509 in 1934 (French, 4,946; other Europeans, 58; natives, 115,505; and Chinese, 3,460). This town on January 1, 1902, became the capital of Indo-China, instead of Saigon. In 1934, there were in Hanoi 12 native primary schools (6,133 pupils), 1 native normal college (152 students), 1 primary high school for native girls (211 pupils), 1 lycée for native boys (691 students), 1 technical and professional school (113 students), 1 French primary school for girls (244 pupils), 2 French primary high schools (611 pupils), and 1 French lycée for French and natives (1,000 pupils). There are also in the provinces 1,961 official primary schools for natives (80,591 pupils), 1,110 village schools (39,678 pupils), 5 primary high schools for natives (419 pupils), 1 technical and professional school at Haiphong (111 students), 8 primary schools for French children (409 pupils) and 1 high primary school for French boys and girls at Haiphong (205 pupils). There is a university at Hanoi with medical, veterinary, pharmacy, law, agriculture, engineering and fine arts faculties. The local budget for 1934 balanced at 11,115,088 piastres. The chief crop is rice (total production 1933, 1,763,784 tons). Other products are maize, arrow-root, sugar-cane, coffee, tea, various fruit trees, and tobacco. A large quantity of raw silk is produced annually, most of which is used in native weaving and the remainder exported. There are rich limestone quarries, calamine and tin mines, and also rich hard coal beds.

Imports in 1933, 321,139,975 francs; exports, 208,992,677 francs.

Chief imports are metal tools and machinery, yarn and tissues, beverages; chief exports, rice, maize, and animal products. The principal port is Haiphong, which is visited regularly by the steamers of three French lines.

The **Laos** territory, under French protectorate since 1893, has an area of 231,400 square kilometres, or 89,320 square miles; the population in 1934 was 989,115. The capital is Vientiane. In the country there is a protected state, Luang Prabang, which has a capital of the same name, the residence of the King, who is assisted in his government by a French Administrator. The soil is fertile, producing rice (output in 1934, about 362,000 tons), cotton, indigo, tobacco and fruits, and bearing teak forests, from which the logs are now floated down the Mekong to Saigon. Gold, tin, lead and precious stones are found, and concessions have been granted to several French mining companies. It can be entered by the Mekong, which is barred at Khone by rapids, and by two new roads from Vinh to Thakhek and from Quang Tri to Savannakhet. A new road following the Mekong connects Thakek to Paksé, and thence to Saigon. A railway, four miles in length, has been constructed across Khone island, and by means of it several steam launches have been transported to the upper waters, where they now ply. Motor launches ply between Vientiane, Luang Prabang and Houei-Sai. A telegraph line connects Hué in Annam with the towns on the Mekong, and these with Saigon and Hanoï. The local budget for 1934 balanced at 3,404,500 piastres.

In 1900, the territory of **Kwang Chau Wan** (or, according to the French official spelling, **Kouang-Tcheou-Wan**) on the coast of China, leased from China in 1898, and increased in 1899, by the addition of 2 islands in the bay, was placed under the authority of the Governor-General of Indo-China. The territory has been divided into 3 administrative circumscriptions, including 1 Municipality, Tchékam (35,000 inhabitants), a commercial centre, but the Chinese organisation is maintained. Fort-Bayard (12,000 inhabitants) is the seat of the local Administration. Its area is about 200 square miles and its population 230,000, including about 120 French and 600 Annamese. The defence force consists of 1 company of infantry and 1 section of machine guns. The police force numbers 500 men. There is a college for Chinese students, also Franco-Chinese schools and several schools for girls at Fort-Bayard and Tchékam. The imports are chiefly cotton yarns, petroleum, matches, refined sugar, cunao (for tinctorial purposes); the exports are straw sacks, swine, cattle, brown sugar, and ground-nuts. Imports in 1933, 7,296,430 piastres; exports, 6,233,901 piastres. The port is free. The territory is regularly visited by the vessels of French, Portuguese, Chinese and English companies; in 1933, 175 vessels of 163,324 tons entered. The local budget for 1934 balanced at 464,860 piastres. A regular service of automobiles connect Fort-Bayard with the principal centres. There are 46 miles of new roads in the island of Tanghai, and 3 miles of roads in the island of Nao-Tchao. Fort-Bayard and Tchékam are provided with electric light; a telephone connects these two localities.

Governor.—H. de Tastes.

MANDATED STATES IN ASIA: SYRIA AND LEBANON.

Syria and Lebanon have been recognised as independent States to be placed under a Mandatory Power. By decision of the Supreme Council of the Allied Powers at San Remo (April 25, 1920), France has been assigned the Mandate for Syria, which was confirmed by the League of Nations on July 24, 1922 (Declaration of London).

High Commissioner.—M. le Comte de Martel (took office October 12, 1933).

Area and Population.—The territory under the French Mandate is bounded by the Mediterranean on the west, by Palestine on the south, by Iraq on the east, and by Turkey on the north.

For details of the frontier between Syria and Iraq and Palestine, see the STATESMAN'S YEAR BOOK, 1928, p. 893. The frontier between Syria and Turkey (Nisibin-Jeziret ibn Omar), was settled by the Franco-Turkish agreement of June 22, 1929.

The country was originally organised into 5 territories (*états*), but since January 1, 1925, two of these, viz. Damascus and Aleppo, were united to form the single State, now the Republic of Syria (Sanjaks of Hama, Homs, Damascus, Hauran, Aleppo, Alexandretta and Deir ez Zor). The remaining territories are those of Latakia, formerly the Alawiyya (Sanjaks of Latakia and Tartus); of Lebanon (Sanjaks of North Lebanon, Mount Lebanon, South Lebanon and Bekaa); of Jebel Druze (south of Hauran). The autonomous Sanjak of Alexandretta, set up January 1, 1925, is part of the Syrian Republic.

THE SYRIAN REPUBLIC.—The Constitution of May 14, 1930, provides for a President, elected by the Legislature for 5 years; the Legislature itself,

which consists of 69 members, is elected for 4 years. The first general election, which is in two degrees, was held in December, 1931, and January, 1932. The capital is Damascus.

THE LEBANESE REPUBLIC, was proclaimed a State on September 1, 1920. It has the following frontiers :—North, the Nahr-el-Kebir; south, the frontier of Palestine; west, the coast; and east, the heights of Anti-Lebanon. Beirut is the seat of the Government.

THE GOVERNMENT OF LATAKIA was established under that name on May 14, 1930. Capital, Latakia.

THE GOVERNMENT OF JEBEL DRUZE has its seat at Es Suweideh.

The total area subject to the French Mandate may be estimated at 60,000 square miles. The total population of this area in 1929 was 2,831,622. The population of the 4 territories was as follows:—Syria, 1,696,638; Lebanon, 862,618 (of whom 342,388 were Christians and 292,247 Moslems); Latakia, 286,920; and Jebel Druze, 51,780. Arabic is the prevailing language, with many dialectical varieties. But there is a large influx of foreign elements, including Turks, Turkomans, Kurds, Circassians, Armenians, Persians, Jews, and a certain number of Europeans. The principal towns are Damascus, population 193,912; Aleppo, 177,313; Beirut, 134,655; Homs, 52,792; Hama, 39,960; Tripolis, 37,260; Antioch, 28,000; Latakia, 21,404; Alexandretta, 13,997; and Zahlah in Lebanon, 20,985. There are no statistics of births and deaths.

Religion and Education.—The population is composed mainly of Moslems, of whom there are 1,514,755. The majority are Sunni Moslems (1,075,816). The Druzes number about 86,125, the Alawiyya 227,930, and Ismailians 14,882. There have been Christians in Syria since the earliest times. They number at present 505,419, of whom 186,676 are Maronites, 66,762 Greek Catholics (Uniats), 7,305 Armenian Catholics (Uniats), 32,859 Armenians, 8,887 Protestants, 28,885 Melkites, and 151,326 belong to the Orthodox Church. There are also 16,526 Jews. There are now one Orthodox, one Gregorian Armenian, one Latin, and three Uniat Patriarchs (Melkite, Syrian, and Maronite) of Antioch, none of whom reside in that city. Apart from this there are in French Mandated territory 9 Orthodox Dioceses, one Armenian Uniat Archbishop, six Melkite (Uniat) Archbishops and six Bishops, three Syrian (Uniat) Archbishops, five Maronite (Uniat) Archbishops and four Bishops, one Latin Apostolic Delegate, a Grand Mufti and a Grand Rabbi.

There were in the whole of the mandated territory in 1933, 691 public schools with 72,654 pupils, 1,095 private schools with 84,455 pupils, and 631 foreign schools with 56,897 pupils.

At Damascus there is a Syrian university (founded June 15, 1923), with (in 1933) a faculty of medicine (178 students), a faculty of law (127 students), pharmacy (15 students), dentistry (25 students), and arts (46 students). There is also an Arab Academy, founded in 1919, and amply endowed, and also agricultural colleges at Sélémié and Bekaa.

There are also two universities in Beirut, one French and one American. The American university contains a faculty of medicine and several schools, with a total of 392 students in 1933. The French university (founded in 1875) has a faculty of medicine with 289 students, and several schools, total students, 650 in 1933.

Finance.—The revenue and expenditure for four years were as follows in Syrian pounds (Syrian pound = Francs 20):—

	1931	1932	1933	1934 [1]
	Syrian Pounds	Syrian Pounds	Syrian Pounds	Syrian Pounds
Revenue . . .	19,418,936	13,505,904	11,286,664	13,512,239
Expenditure . .	18,941,905	13,249,766	11,245,162	13,512,239

[1] Estimates.

The Budget for 1933 and estimates for 1934 were distributed as follows in Syrian pounds, paper:—

	1933 Receipts	1933 Expenditure	1934 Receipts and Expenditure estimates
	Syrian Pounds	Syrian Pounds	Syrian Pounds
Syrian Republic . . .	5,361,401	5,777,671	6,932,100
Alexandretta Sanjak . .	965,275	775,201	734,000
Lebanon	3,583,506	3,526,623	4,533,200
Latakia	1,140,231	923,326	1,039,500
Jebel Druze	236,251	242,341	273,438
Total	11,286,664	11,245,162	13,512,238

Defence.—A French army is in occupation of the whole country. On January 1, 1934, the effective strength was 316 officers (119 French) and 13,655 other ranks (306 French).

Production and Industry.—Syria is essentially an agricultural country, the bulk of the population being engaged in the cultivation of the soil and in cattle breeding; the total area cultivated in 1932–33 was 2,500,000 acres. The principal products in 1932–33 were: wheat, 327,377 metric tons; barley, 273,160 metric tons; maize, 31,000 metric tons; sorghum, 7,500 metric tons; oats, 12,900 metric tons; olives, 48,030 metric tons; silk cocoons, 1,400 metric tons (1,762 in 1932); and cotton, 935 metric tons. Sesamé, from which oil is produced, is one of the most valued crops, but is very uncertain. Chickpeas, lentils, beans, vetches, and lupins are largely cultivated, production of chickpeas in 1932–33 was 8,530 metric tons, and of lentils, 25,450 metric tons. About 9,430 acres in Latakia, Aleppo, Beirut, and Damascus produced 1,883 metric tons of tobacco in 1932–33. The cultivation of cotton has been considerably extended during the last two years. The chief cotton-growing centre is the Aleppo district. In 1932–33 the total area under cotton was 20,315 acres. Hemp and sugar-cane are also cultivated. The most important fruit trees are the olive, vine, mulberry, lemon, banana, and orange. In 1932–33, there were 187,226 acres under olive trees, against 188,782 in 1931–32. The yield of olive oil in 1933 was 75,942 metric quintals. There were also produced 6,850 metric tons of apricots, 249,418 metric tons of grapes, 31,520 metric tons of figs, and 33,460 metric tons of oranges, lemons, and mandarines. The white mulberry is largely cultivated in Northern Syria for feeding silk-worms. There were 1,962,000 sheep, 1,638,000 goats, 160,000 camels, 280,000 oxen, and 78,000 asses on December 31, 1933.

Syria is poorer in minerals than in other resources, but this may be due to insufficient exploration. Northern Lebanon has been worked for iron in ancient and modern times. At Majerba the ore is rich, and the iron good.

There is a comparatively rich mine of lignite in South Lebanon. There are indications of petroleum in various places. The work of laying of a pipe-line to Tripoli was begun in 1932. There are indications of phosphates, lead, copper, antimony, nickel, chrome; gypsum is widely distributed. There is abundance of marble and good building stone.

The industries of Syria are on a very small scale. Flour, oil, soap, and silk thread are the most important. The chief centres of the silk industry are Beirut, Aleppo, Tripoli, and Latakia. The production of cocoons amounted to 2,600 metric tons in 1931, 1,762 in 1932 and 1,400 in 1933. There were 100 silk spinning factories in 1933, but only about 30 were active. Wine and tobacco are also produced. There is a cement factory at Chekka.

Commerce.—The imports and exports for five years (in thousands of Syrian pounds, paper) were as follows :—

	1929	1930	1931	1932	1933
	1,000 Syrian pounds	1,000 Syrian pounds	1,000 Syrian pounds	1,000 Syrian pounds	1,000 Syrian pounds
Imports .	72,998	68,526	57,969	48,500	45,176
Exports .	34,237	30,616	20,892	17,125	17,383

The principal imports in 1933 were (in thousands of Syrian pounds paper) :—textiles, 14,376; metal and metal work, 3,149; animal produce, 3,317; vegetable produce, 5,377; chemicals and allied products, 1,867. Principal exports were :—animal produce, 2,295; fruit, vegetables, etc., 2,678; textiles, 7,574.

The distribution of trade in 1933 was as follows (in thousands Syrian paper pounds) :—Imports from France, 7,368; Great Britain, 4,179; United States, 1,827; Italy, 2,109; Turkey, 2,903; Japan, 2,817; Germany, 2,255; Persia, 328; Belgium, 1,960. Exports to Egypt, 657; France, 1,302; Palestine, 3,662; Iraq, 2,615; United States, 4,798; Great Britain, 1,567.

According to Board of Trade Returns the imports from Syria into Great Britain amounted to 125,719*l.* in 1933, and 199,981*l.* in 1934, while the exports to Syria amounted to 924,830*l.* in 1933, and 843,586*l.* in 1934. Re-exports to Syria from U.K. were 13,244*l.* in 1933, and 10,827*l.* in 1934.

Communications.—Most of the ports of Syria are visited regularly by the steamers of various shipping companies. In 1933, 1,723 vessels of 3,623,605 tons entered the ports of Lebanon and Syria. Beirut was the principal port of call.

In 1933, the number of postal packets handled on the international service was 24,093,000, and on the inland service, 8,842,600. In 1933 the number of inland telegrams handled was 91,631, of international, 184,306. In 1932, there were 3,971 miles of telephone line, 51 telephone stations, 3,108 subscribers, and 645,622 conversations.

In 1927, there were 2,240 miles of macadam roads and 2,754 miles of dirt and gravel roads. Syria is comparatively well provided with railways, and new lines and branches are proposed. The following railways are open :—standard gauge from Rayak to Aleppo and Rajn (Turkish frontier) 260 miles; Homs to Tripolis, 64 miles; narrow gauge Beirut to Damascus, 93 miles; Beirut to Mameltein, 11 miles; Damascus to El Hammé, 120 miles. Three companies operate passenger routes across the Syrian Desert between Beirut and Baghdad. An air mail service between Beirut and Marseilles has been in operation since June, 1929.

Currency.—The official currency since May 1, 1920, is the Syrian Bank Note, issued by the Bank of Syria, under French Treasury control. The monetary unit is the Syrian pound, divided into 100 piastres (1 piastre =20 centimes), which are exchangeable in Paris at the fixed rate of 20 francs to the pound. On January 1, 1934, the notes in circulation amounted to 12,935,000*l.* (Syrian). In some parts of the country the Turkish pre-war mejidiehs are still current.

There is a Consul-General at Beirut, and Consuls at Aleppo and Damascus.

AFRICA.*

ALGERIA.

(L'ALGÉRIE.)

Government.

The government and administration of Algeria are centralised at Algiers under the authority of the Governor-General, who represents the Government of the Republic throughout Algerian territory. With the exception of the non-Mussulman services of Justice, Public Instruction, Worship, and the Treasury, which are under the appropriate ministries in Paris, all the services are under his direction. He has to prepare a special budget for Algeria, he grants concessions for works, and he contracts loans in the name of the Colony.

* See also Morocco.

Northern Algeria has three departments (Oran, Algiers, Constantine) divided into *arrondissements*, which include *communes de plein exercise* with administration on French lines, and *communes mixtes* with natives in large numbers. The latter divisions are often large and are under special administrators; each has a municipal council helped by native sheikhs, caids or aghas. Natives elect representatives in all local assemblies.

The budget of Algeria which, since 1901, has been entirely distinct from that of France, comprises under revenue the imposts of every sort which are collected within the Colony and under expenditure the whole of the civil disbursements. The expenditure on War and Marine is still at the cost of the mother country. The budget, prepared by the Governor under the control of the Minister of the Interior, is discussed and voted by the Financial Delegations and the Superior Council. These Delegations were instituted in 1898 to enable the body of tax-payers to state their views on questions of imposts by means of elected delegates. There are three Delegations representing respectively the French colonists, the French tax-payers other than colonists, and the Mussulman natives. The Superior Council is composed of elected members and of high officials. Lastly, the Governor is assisted in the exercise of his functions by a purely consultative council of government.

The territories of the South, forming a separate colony, are each under a military command which directs all the administrative and civil services under the authority of the Governor. They have a budget distinct from that of Algeria. The natives are represented on the communal administration. By the law of February 4, 1919, the position of French citizens is accorded to natives, above the age of 25 and monogamous, who served in the war, who are proprietors or farmers, who can read or write or who hold a French decoration.

The French Chambers alone have the right of legislating for Algeria, while such matters as do not come within the legislative power are regulated by decree of the President of the Republic. Algeria is neither a colony in the usual sense nor a simple aggregate of French departments; it has not complete autonomy, yet it is not entirely assimilated to France. It is represented in the French Parliament by three deputies for each of its three departments and by senators. The present system is, therefore, a temporary compromise between the opposed systems of annexation and self-government. Though the ties of centralisation have been relaxed, Algeria does not enjoy political autonomy, having no parliament or responsible ministry, and only enjoys partial financial autonomy.

Governor-General.—M. Jules Carde, C.B.E., appointed October 3, 1930.

Area and Population.

The census of March 8, 1931, which is the last taken, showed a population (including the military forces) amounting to 6,553,451 (of whom 920,788 were Europeans, 5,632,663 natives), on an area of 847,500 sq. miles. The colony has been organised in 2 great divisions called respectively Northern (80,117 sq. miles) and Southern Algeria (767,435 sq. miles). Northern Algeria consists as formerly of Civil Territory and Territoire de Commandement, but the Civil Territory has been extended, while the Territoire de Commandement has been diminished and will before long be completely merged in the Civil Territory. Northern Algeria contains 17 arrondissements, 304 communes, and 78 mixed communes, in the Civil Territory. Southern Algeria consists of the 4 Territories of Aïn-Sefra, Ghardaïa, Touggourt, and the Saharan Oases, organised under decree of August 14, 1905. These territories contain 13 communes, of which 7 are mixed and 6 native.

Population, including military forces, according to the revised figures of the census of March 8, 1931 :—

	Municipal Population			Population numbered separately			Grand Total
	European	Native	Total	European	Native	Total	
Northern Territory	875,636	5,026,383	5,902,019	36,521	40,293	76,814	5,978,833
Southern Territory	5,948	561,931	567,879	2,683	4,056	6,739	574,618
Grand Total .	881,584	5,588,314	6,469,898	39,204	44,349	83,553	6,553,451

Population, according to Departments and Territories (census of March 8, 1931) :—

Northern Algeria (Departments)	Population	Southern Algeria (Territories)	Population
Algiers	2,057,971	Ain Sefra . . .	175,594
Oran	1,436,661	Ghardaia . . .	144,336
Constantine . . .	2,484,201	Touggourt . . .	224,547
		Saharan Oases . .	30,141
Total . . .	5,978,833	Total . . .	574,618
Grand Total . . .	6,553,451		

In 1931, of the total European population of 920,788, the French numbered 762,852 and foreigners, 157,936.

The chief towns with population in 1931 were: Algiers, 257,122; Oran, 163,743; Constantine, 104,902; Bona, 68,778; Sidibel-Abbes, 45,902; Philippeville, 47,750; Mascara, 31,449; Tlemçen, 46,060; Sétif, 37,253; Mostaganem, 28,357; Blida, 39,371; Bougie, 25,261; Tizi Ouzon, 38,291.

Religion and Education.

The native population is entirely Mussulman, the Jews being now regarded as French citizens. The Roman Catholic Church has an archbishop and 2 bishops, with some 400 officiating clergymen. There are 13 Protestant pastors and 6 Jewish rabbis sharing in Government grants.

At Algiers (city) there is a University, attended (July 31, 1933) by 2,622 students (1,286 for Law, 588 Medicine and Pharmacy, 276 Science, 472 Arts). There are also special schools for commerce, the fine arts, hydrography, and agriculture. In 1933 there were also 595 Mussulman schools with 56,330 pupils. There are higher Mussulman schools (*médersas*) at Algiers, Tlemçen, and Constantine, with 168 students (November 5, 1933) (145 Arabs, 23 Kabyles). There were, on November 5, 1933, 11 establishments for secondary education for boys with 8,263 pupils (7,363 French, 813 natives and 87 foreigners) and 6 establishments for girls with 3,599 pupils (3,442 French, 107 natives and 50 foreigners). There were, in 1933, 18 higher primary schools for boys with 3,834 pupils, and 11 for girls with 2,426 pupils. In 1933 there were 1,257 primary schools, public and private, with 140,076 pupils (73,248 boys and 66,828 girls), and 237 infant schools with 10,850 boys and 9,702 girls. There were (1933) three normal schools for men teachers with 38 professors and 323 students, and three normal schools for women teachers with 28 professors and 232 students.

Justice and Crime.

There is an Appeal Court at Algiers, and in the arrondissements are 17 courts of first instance. There are also commercial courts and justices of the peace with extensive powers. Criminal justice is organised as in France for Europeans. Since 1902, there have been criminal courts and special repressive tribunals for trying natives accused of crime.

Mussulman justice is administered to natives by Justices of the Peace and Cadis in the first instance with an appeal to French courts.

The average prison population in 1933 was 7,125, compared with 7,368 in 1932.

Finance.

Europeans and natives pay the same direct and indirect taxes. The departments of War and Marine are excluded from the estimates, but the proceeds of the Military tax, the Government monopolies, and some other revenues are paid to France. The total expenditure (including military and extraordinary disbursements) exceeds the Algerian revenue by about 75,000,000 francs.

The budget estimates (including extraordinary budget) for five years were as follows (in francs):—

—	1931-32[1]	1932[2]	1933	1934	1935
Revenue . . .	1,199,056,329	1,799,770 663	1,865,326,643	1,735,283,350	1,872,425,120
Expenditure . .	1,195,401,883	1,799,640,616	1,864,535,716	1,735,018,856	1,871,722,943

[1] Financial year terminates March 31. [2] April 1–December 31, 1932.

The details of the 1933 ordinary budget are as follows:—

Revenue	Francs	Expenditure	Francs
Taxes	1,060,969,030	Debt, pensions, etc. .	285,893,194
State Revenues . .	25,328,500	Government and Central Administration	60,026,490
Sundry receipts . .	5,623,066	Interior	341,188,744
Exceptional receipts .	3,000,000	Native Affairs . .	74,589,842
Payments for State Services	148,048,547	Finance. . . .	115,286,213
		Posts, Telegraphs and Telephones	94,878,026
		Public Works . .	185,062,234
		Agriculture, Commerce, &c.	52,052,138
		Forests	31,554,310
		Miscellaneous . .	1,500,000
Total . . .	1,242,969,143	Total (including all items). .	1,242,031,191

The extraordinary budget for 1933 showed revenues of 557,357,500 francs, and expenditure of 557,357,500 francs.

There is a separate Post Office budget which is estimated to balance revenue and expenditure at 257,123,489 francs for 1934.

Defence.

The military force in Algeria and Tunis comprises the XIXth Army Corps, which includes 3 divisions. French residents are under the same obligation to

serve as in France; natives are under the obligation to serve 2 years with the colours and can be called up as reservists in case of mobilisation. The troops may be stationed in North Africa or employed on Colonial expeditions, but they belong to the 'Metropolitan,' not to the Colonial Army. There are 6 regiments of zouaves, each of 3 battalions, of 5 companies; 6 regiments of cavalry (Chasseurs d'Afrique), of several squadrons; 3 groups of field and 1 of heavy artillery; 1 battalion of engineers; and 1 regiment of the Flying Corps. These are all European troops, and in the case of the artillery and engineers their recruiting depôts are in France. The Foreign Legion of 4 regiments of a varying number of battalions is recruited from foreigners of any nationality, but officered chiefly by Frenchmen; the headquarters of the regiments are in Sidi-Bel-Abbes, in Oran, but battalions are sent to any colony where they may be required. The Natives are 12 regiments of Algerian Tirailleurs each of 3 battalions, and 6 regiments of Spahis (Arab cavalry) each of several squadrons. The officers and a proportion of the non-commissioned officers of the native regiments are French. In 1934, the strength of the garrison of Algeria and of Tunis was 3,043 officers and 71,696 men. The air force comprises 2,070 all ranks, organised in 4 groups.

Agriculture and Industry.

There exists in Algeria a small area of highly fertile plains and valleys in the neighbourhood of the coast, mainly owned by Europeans, which is cultivated scientifically, and where profitable returns are obtained from vineyards, cereals, &c., but the greater part of Algeria is of limited value for agricultural purposes. The northern portion is mountainous and generally better adapted to grazing and forestry than agriculture, and a large portion of the native population is quite poor. In spite of the many excellent roads built by the Government, a considerable area of the mountainous region is without adequate means of communication and is accessible only with difficulty.

The soil is, under various systems, held by proprietors, by farmers, and by métayers or khammés. Most of the State lands have been appropriated to colonists. The area under cultivation is 24,474,350 acres, of which 5,793,797 acres are owned by European farmers and the balance by native farmers. The chief crops in 1933 were wheat, 3,987,584 acres with a yield of 865,490 metric tons; barley 3,386,612 acres with a yield of 770,250 metric tons; and oats, 871,052 acres with a yield of 140,800 metric tons; maize, potatoes, artichokes, beans, peas and tomatoes. Flax, silk, and tobacco (the cultivation of the latter being most remunerative) are also produced. In 1933 there were 12,802 tobacco planters, the area under cultivation was 41,787 acres, and the yield 13,086 metric tons. Sericulture is in an experimental stage and subsidised by the government. There were 326 growers in 1926, 186 in 1927, and 104 in 1929. In 1929, 6,142 pounds of cocoons were produced as against 16,160 in 1928.

In 1933, the yield of wine was 368,028,929 gallons from an area of 921,944 acres compared with 402,927,624 gallons from 869,321 acres in 1932. Date, banana, pomegranate, almond, fig, and many other fruits grow abundantly. The production of olive oil amounted to 3,300,276 gallons in 1932. The cultivation of cotton is gradually being abandoned. State forests (1932), 5,424,231 acres, and, for the most part, belong to the State and communes. The greater part is mere brushwood, but there are very large areas covered with cork-oak trees, Aleppo pine, evergreen oak, and cedar. The dwarf-palm and alfa are worked on the plains. Timber is cut for firewood, also for industrial purposes, for railway sleepers, telegraph poles, &c., and for bark for

tanning. Considerable portions of the forest area are also leased for tillage, or for pasturage for cattle, sheep, or pigs. The forest revenue in 1932 was 9,327,076 francs.

On December 31, 1934, there were in Algeria 171,000 horses, 177,000 mules, 332,000 asses, 884,000 cattle, 5,513,000 sheep, 2,830,000 goats, 52,000 pigs, and 170,000 camels. The wool-clip in 1932 was 17,800 metric tons.

There are extensive fisheries for sardines, allaches, anchovies, sprats, tunny-fish, &c., and also shell-fish. In 1933, 981 boats of 5,333 metric tons, and 3,754 persons were employed in fishing, and the quantity of fish taken amounted to 18,144,333 kilos.

Algeria possesses deposits of iron, zinc, lead, mercury, copper and antimony. The mineral output in 1933 was as follows: iron ore, 763,000 metric tons (463,000 metric tons in 1932); lead, 157 metric tons (4,149); zinc, 5,084 metric tons (3,675); phosphate rock, 587,753 metric tons (569,571). Kaolin, marble and onyx, salt, coal, and antimony are also found.

Commerce.

The foreign trade of Algiers in recent years has been as follows (in 1,000 francs):—

—	Imports	Exports	—	Imports	Exports
	1,000 francs	1,000 francs		1,000 francs	1,000 francs
1928	5,049,908	4,233,781	1931	4,871,519	3,402,267
1929	5,858,351	3,877,492	1932	4,253,216	3,766,461
1930	5,711,000	4,272,000	1933	4,316,097	3,934,799

The imports and exports for 1933 were divided as follows (in thousands of francs):—

—	Imports			Exports		
	From France	From Other Countries	Total	To France	To Other Countries	Total
Animal products . .	197,378	53,164	250,542	162,671	29,500	192,171
Vegetable products . .	499,949	349,980	849,929	3,217,626	225,132	3,442,758
Mineral products . .	231,501	227,550	459,051	21,516	80,371	101,887
Manufactured articles .	2,589,388	167,187	2,756,575	118,882	79,101	197,983
Total . . .	3,518,216	797,881	4,316,097	3,520,695	414,104	3,934,799

The principal imports in 1933 were (in millions of francs), textiles, 471 (of which 459 were from France); machines, spare parts, 250 (226 from France); automobiles, 202 (201 from France); petroleum, 83; sugar, 128 (127 from France); coal, 80; iron and steel, 87 (86 from France); cereals, 60; coffee, 77; livestock, 38.

The principal exports in 1933 were (in millions of francs), wines, 2,333 2,321 to France); cereals, 423 (378 to France); sheep, 84 (84 to France); olive oil, 31 (11 to France); phosphate, 39; esparto, 50.

In 1932 the receipts of the customs authorities amounted to 189,382,128 francs and in 1933 to 187,955,787 francs.

Total trade between the United Kingdom and Algeria (Board of Trade returns) for 5 years:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Algeria into U.K. .	2,201,458	1,213,327	1,102,380	1,352,525	1,690,043
Exports to Algeria from U.K. .	1,635,473	1,234,644	1,172,974	938,588	962,845
Re-exports to Algeria from U.K. .	25,087	6,827	10,172	6,943	3,434

Shipping and Communications.

In 1933, 5,146 ships of 8,240,986 tons entered the ports of Algeria, discharging 4,195,084 tons of merchandise, and 4,922 ships of 7,792,204 tons cleared after loading 5,149,395 tons of merchandise.

On January 1, 1931, the mercantile marine of Algeria consisted of 14 vessels of 32,232 tons (overseas trade); 160 coasting vessels of 43,248 tons; and 512 harbour craft of 21,231 tons.

There were 31 national roads in 1933, with a length of 4,347 miles, 41 miles of Departmental roads, 7,832 miles of main roads and 18,217 miles of by-roads.

On January 1, 1934, there were 3,005 miles of railway open for traffic (exclusive of lines on Tunisian territory), the railway receipts (1933) amounting to 252,040,000 francs. There is a regular postal air service between Algiers and Marseilles (800 kilometres).

The postal receipts in 1933 were 39,264,167 francs, and there were 752 post offices on December 31, 1933. The telegraphic receipts were 14,695,669 francs, and those from telephones 35,946,653 francs. Postal traffic in 1933 was as follows: ordinary postal packets, 81,281,100 inland service (France and Colonies); 3,241,400 international service. In 1933, 2,098,924 private telegrams were sent, and 2,658,191 received; on transit service there were 4,845,988; official telegrams sent and received totalled 386,370.

There were on January 1, 1934, 31,607 telephone subscribers, 922 public telephone offices, and 28,091 miles of inter-urban line. Number of conversations in 1933, 25,584,579.

Postal cheque accounts were opened at Algiers on February 1, 1921, and on December 31, 1933, there were 18,061 accounts with a total balance of 120,584,213 francs.

Banking, Money, Weights, and Measures.

The Bank of Algeria is a bank of issue, with a capital of 20,000,000 francs. By the law of April 9, 1932, its note circulation was limited (as a temporary measure) to 3,000 million francs. Several co-operative agricultural banks, assisted by Government funds, are in operation. Barclay's Bank (Overseas), Ltd., have branches at Algiers and Oran.

The money, weights, and measures of France only are used.

TUNIS.

(Afrikiya; Tunisie.)

Government.—Sidi Ahmed Bey, born 1862, succeeded his cousin, Sidi Mohamed el Habib Bey, July 10, 1929.

The reigning family of Tunis, occupants of the throne since 1705, descend from Hussein ben Ali, commonly believed to be a native of the Isle of Crete, who made himself master of the country, acknowledging, however, the suzerainty of the Sultan of Turkey.

After the French invasion of the country in the spring of 1881, the treaty of Kasr-es-Said (May 12, 1881), confirmed by convention signed June 8, 1883,

placed Tunis under the protectorate of France. The government is carried on under the direction of the French Foreign Office, which has a special department for Tunisian affairs, under the control of a French Minister Resident-General, who is also Minister of Foreign Affairs, and a ministry of 11 heads of departments, 8 of the ministers being French and 3 Tunisian. The country is divided into 19 districts (contrôles civils), and 6 military circles; the district governors (contrôleurs) are French; the subordinate officials (Caids, Kahias and Sheiks) are Native. French tribunals administer justice between subjects of European powers, and also between them and natives; there are Native courts for cases between natives (tribunals at Ouzara and Charaã). In 1914, the Tunisian penal law was codified. French administration in Tunis has been confirmed by conventions with all the European Powers regulating the status and the conditions of trade of their respective citizens within the Regency.

French Resident-General.—M. *Peyrnton* (appointed July 23, 1933).

Area and Population.—The present boundaries are: on the north and east the Mediterranean Sea, on the west the Algerian province of Constantine, and on the south the great desert of the Sahara and Libya. The area is about 48,300 English square miles, including that portion of the Sahara which is to the east of the Djerid, extending towards Gadamés.

According to the census held on March 22, 1931, the total European population was 195,293, composed of 91,427 French (exclusive of the army of occupation and of the navy), 91,178 Italians, 8,643 Maltese, 449 Spaniards, 463 Greeks, and 3,133 other foreigners. The total native population, according to the census held on March 22, 1931, was 2,215,399, of whom 2,159,151 were Arabs and Bedouins, and 56,242 Jews. Grand total was 2,410,692.

The capital, the city of Tunis, had, in 1931, a population of 202,405, of whom 89,801 were Moslems, and 25,399 Jews, besides 33,649 French, 46,457 Italians, 5,529 Maltese, and 1,570 other Europeans. By means of the channel, which was opened in 1893, Tunis is directly accessible to ocean-going vessels. Other towns are Bizerta with 23,206 inhabitants (7,971 Europeans); Sousse with 25,324; Sfax with 39,969; Kaisouan, the Holy City of the Moslems, with 21,532 natives exclusively; Ferryville with 6,123 (5,227 Europeans), and Tindja, 1,655 inhabitants.

The bulk of the population is Mohammedan under the Sheik-ul-Islam, and the revenue from the 'Habus' lands, like that from the 'Wakf' lands in Egypt, is applied to religious, educational, and charitable purposes. There are about 195,000 Roman Catholics, under the ministration of the Archbishop of Carthage, and about 125 other clergymen. The Greek Church (400), the French Protestants, and the English Church are also represented, and there are 30 English Protestant missionaries at work.

Education.—Within the Regency there are (1932) some 484 public schools, including 8 lycées and colleges, and 32 private schools (of which 6 Jewish schools are provided for by the Government). In the schools there are 86,554 pupils, of whom 57,107 are boys. Of the total number of pupils, 20,762 are French; 37,995 Mussulman; 9,131 Jews; 9,528 Italian; 1,104 Maltese and 8,034 others. In the Great Mosque at Tunis there is a Mohammedan university. In the city are 78 and in the interior 1,254 Mussulman primary schools, some of them assisted by Government funds. 24 Moslem apprentice-ship-schools have been created during the last few years numbering 490 native pupils. Many private schools have recently sprung up at Tunis and Sfax. The abolition of congregational teaching decreed in France has been

extended to the Regency as regards French children. The Italian Government and certain Italian societies still maintain Italian schools at Tunis and other large towns.

Finance.—Receipts and expenditure for 5 years :—

	1931–32[1]	1932[2]	1933	1934	1934–35[1]
	Francs	Francs	Francs	Francs	Francs
Revenue . . .	614,267,500	461,215,126	617,348,130	594,664,200	574,952,990
Expenditure . .	614,217,639	461,127,600	617,276,579	594,238,308	574,798,138

[1] Year ending March 31. [2] April 1 to December 31.

The estimates of ordinary receipts and expenditure for 1933, were as follows :—

Receipts		Expenditure	
	Francs		Francs
Taxation :—		Departments :—	
Direct	83,815,180	Finance	268,927,801
Indirect	287,752,490	Post Office	46,365,600
Monopolies :—		Local Administration . .	73,769,520
Tobacco	186,241,000	Agriculture and Commerce .	50,271,733
Others	59,239,460	Education	73,492,000
		Public Works . . .	86,122,313
		Army	4,088,760
		Justice	12,238,850
		Miscellaneous	2,000,000
Total . . .	617,348,130	Total . .	617,276,578

At the end of 1930, the Tunisian Public Debt amounted to 538,958,000 francs. The yearly charge for interest, together with sinking fund, 1,038,536*l.* In normal conditions the 1903 loan (1,000,000*l.*) will be extinguished in 1968 and the rest in 1988.

Defence.—The army of occupation consists of 25,000 men, including 1,145 officers, supported by native regiments (*tirailleurs* and *spahis*), and the Foreign Legion.

Production and Industry.—Tunis may be divided into five districts—the north, characterised by its mountainous formation, having large and fertile valleys (*e.g.*, the valley of the Medjerdah, and the plains of Mornag, Mateur, and Beja); the north-east, with the peninsula of Cap Bon, the soil being specially suited for the cultivation of oranges, lemons, and citrus fruits; the Sahel, where olive trees abound; the centre, the region of high table lands and pastures; and the south, famous for its oases and gardens, where dates grow in profusion. The chief industry is agriculture, and large estates predominate. The area of the country is divided as follows:—7,446,980 acres of tillage land; 2,509,520 acres of cork and pine forest, 122,265 acres of vineyards (the production in 1932 was 37,620,000 gallons); and 11,238,500 acres of stockland. The area of wheat in 1932 was 2,390,960 acres; the production was 475,000 tons; of barley 1,506,700 acres, and the production 340,000 tons; of oats 51,870 acres, and the production 28,000 tons. There were 16,997,229 olive trees; and the production was 60,500 tons of oil. In the south of Tunis date palms abound; there were 2,598,131 date palms, of which 1,241,601 produced 14,400 tons of dates. Other products are almonds, oranges, lemons, shaddocks, pistachios, alfa grass, henna, and cork. Considerable areas of agricultural land have been acquired either on lease or by purchase by immigrants.

In 1932, the farm animals were:—horses, 102,232; asses, 186,604; mules, 50,692; cattle, 542,878; sheep, 2,931,041; goats, 1,668,469; camels, 169,485; pigs, 23,814.

In 1932, 34 mines were worked; value of the mineral output in 1932, 110,000,000 francs. By far the greatest development has been in phosphates, the output of which is increasing yearly. Mineral output in 1934 (in metric tons):—lead ore, 6,415 (5,800 in 1933); iron ore, 546,500 (291,000); phosphate rock, 1,789,534 (1,763,556).

Native industries are the spinning and weaving of wool for garments, carpet weaving, leather embroidery, saddle making, the manufacture of slippers, pottery (in ancient style), and matting; tanning and silk weaving are declining.

The fisheries are principally in the hands of Italians and Tunisians. In 1932, 3,525 boats (7,397 tons) were engaged in this industry, with a total of 11,302 men. Sardines, anchovies, allaches, tunny (8,227 tons of fish) were caught.

Commerce.—The imports and exports for 4 years were as follows:—

	1929	1930	1931	1932
	Francs	Francs	Francs	Francs
Imports . . .	1,984,455,000	2,107,455,000	1,935,562,000	1,771,517,000
Exports . . .	1,408,443,000	1,127,233,000	880,701,000	861,033,000

Imports and exports in 1932 were:—

Imports	Value	Exports	Value
	1,000 Francs		1,000 Francs
Textiles[1] . .	279,304	Grain, mealy food . .	395,458
Colonial produce . . .	135,947	Marble, stone, minerals .	85,034
Marble, stone, and minerals	156,332	Crude Metals . . .	22,093
Manufactured metals . .	198,911	Beverages and wines . .	87,793
Hides	40,698	Fruits and seeds . .	37,402
Yarns	37,060	Live animals . . .	18,324
Timber	28,903	Hides	14,976
Mealy foods . . .	55,370		

[1] These goods coming chiefly from England.

The share of France in the foreign trade of Tunis in 1932 was 1,188,122,000 francs for imports and 613,615,000 for exports, and that of Algeria 124,159,000 francs and 55,507,000 francs respectively.

Total trade between Tunis and the United Kingdom (according to Board of Trade returns) for 5 years:—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Tunis into U.K. .	1,038,455	756,872	671,809	674,516	993,619
Exports to Tunis from U.K. .	333,827	220,069	193,936	208,902	199,494
Re-exports to Tunis from U.K. .	14,201	28,638	11,514	26,738	37,263

In the year 1932, there entered the ports of the Regency 7,382 vessels.

Good roads to the length of 3,524 miles have been constructed between 1882 and 1932.

Length of railways, 1,282 miles in 1933 (469 miles broad gauge and 813 miles narrow).

There were in 1932, 3,454 miles of telegraphs; 285 telegraph offices; messages received and transmitted 1,010,653. The telephone systems had 12,261 miles of subscribers' lines and 16,878 miles of inter-urban lines in 1932, the number of subscribers being 13,199. There were in 1932, 549 post offices; letters sent and received, 89,601,500; parcels received and despatched, 806,241. Operating receipts from the three services in 1932 were 23,726,369 francs, expenditure, 33,156,341 francs. There were 5,198 savings accounts in the Postal Savings Bank in 1932, deposits at the end of that year standing at 118,939,778 francs.

Money, Weights, and Measures.—The Banque d'Algérie has begun operations in the Regency and issues Tunisian bank notes.

The legal coinage since 1892 consists of pieces similar to the French, the pieces being coined in France.

The *ounce* = 31·487 grammes; the multiples of the ounce are the various denominations of the *Rottolo*, which contains from 16 to 42 ounces.

The *Kaffis* (of 16 *whibas*, each of 12 sahs) = 16 bushels.

The principal measure of length is the *pik*: the *pik Arbi* for linen = ·5392 yd.; the *pik Turki* for silk = ·7058 yd.; the *pik Andoulsi* for cloth = ·7094 yd.

French weights and measures have almost entirely taken the place of those of Tunis, but corn is still sold in *kaffis* and *whibas*.

British Consul-General at Tunis.—Sir Harold Eustace Satow.

There is a Consul at Bizerta, and Vice-Consuls at Sfax and Susa; and Consular Agents at Mehdia, Monastir, Gabes, and Djerba.

FRENCH EQUATORIAL AFRICA (FRENCH CONGO).

The French Congo extends along the Atlantic coast between Cameroon and the territories of the Belgian Congo, with the exception of the Spanish territory on the coast from the Muni river on 1° N. lat. to Cameroon, and inland to the meridian of 11° 20′ E. of Greenwich, and the Kabinda region, which is Portuguese. Inland it is bounded by the Congo and Ubanghi rivers and stretches northwards to the Bahr-el-Ghazal and Lake Chad. French acquisition began on the Gabun river in 1841 ; Libreville was founded in 1849 ; Cape Lopez was gained in 1862, and the French possessions extended along the coast for about 200 miles. Since then the territories have been increased by exploration and military occupation and their limits have been defined in a series of international conventions. The boundary between French Equatorial Africa and the Anglo-Egyptian Sudan was fixed by a protocol signed on February 28, 1924.

By decree of January 15, 1910, the French Congo was divided into three circumscriptions which form three colonies, viz. :—the Gabun Colony (capital Libreville), the Middle Congo Colony (capital Brazzaville), and the Ubangi-Shari Colony (capital Bangui). The Chad Territory, which was formerly a dependency of the Ubangi-Shari Colony, was, by decree issued on March 17, 1920, made a separate colony. It extends from Lake Chad across the Eastern Sudan and includes Wadai. Capital, Fort Lamy.

By decrees issued on January 15, 1910, the name of the French Congo was changed into French Equatorial Africa, which extends over the Gabun, the Middle Congo, the Ubangi-Shari and Chad Territories.

By a decree of June 30, 1934, French Equatorial Africa was constituted a single administrative unit under the rule of a Governor-General, who is assisted by an administrative council, and a Secretary-General, who acts as his deputy in the Governor-General's absence The headquarters of the Governor-General are at Brazzaville,

The area is about 912,049 square miles, containing a population which at the 1931 census numbered 3,192,282 ; the Europeans numbered 5,459. The area and population of the separate colonies are shown as follows as at January 1, 1934 :—

Colony	Area in square miles	Europeans	Natives
Gabun	104,320	1,352	387,283
Middle Congo	172,411	2,149	660,564
Ubangi-Shari	236,363	782	1,175,782
Chad	398,955	378	1,095,339
Total	912,049	4,661	3,318,968

Under the system of government before June 30, 1934, there were a general budget for the whole of French Equatorial Africa, and also separate budgets for the colonies. Local revenues accrue chiefly from customs duties ; there are native poll taxes. The sale of alcohol to natives is restricted. The budgets showed the following figures :—

—	1932	1933	1934
General Budget—	Francs	Francs	Francs
French Equatorial Africa	86,875,000	97,238,000	98,443,000
Local Budget—			
Gabon	17,185,000	17,143,000	19,200,000
Middle Congo	23,600,000	21,313,000	21,161,000
Ubangi-Shari	17,800,000	16,000,000	15,600,000
Chad	17,048,200	18,971,000	16,342,000

In the colony there were in 1933, 78 native schools with 6,095 pupils, and 36 European teachers with 84 native assistants. Private schools in 1933 numbered 70 with 7,714 pupils, and 80 European teachers with 118 native assistants. These schools are run by the religious missions.

The resources of French Equatorial Africa are quite undeveloped. There are about 300,000 square miles of tropical forest extending to the Gabun coast, containing many species of trees of industrial value. Wild rubber is the most important. Palm oil is produced to some extent. Coffee, cacao and cotton are also cultivated. In the Chad Colony large numbers of cattle, sheep, asses, camels, horses, and ostriches are raised, but there are no facilities for export. Ivory is an important article of export. Copper, zinc, and lead are found.

Imports and exports for 1932 and 1933 were as follows :—

Colony	Imports		Exports	
	1932	1933	1932	1933
	Francs	Francs	Francs	Francs
Middle Congo	149,395,000	105,012,535	11,140,000	15,592,915
Gabun	37,864,000	38,101,240	82,881,000	91,021,514
Ubangi-Shari	23,516,000	22,281,928	22,390,000	28,753,082
Chad	11,498,000	12,361,429	3,869,000	5,638,264
Totals	222,273,000	177,757,132	120,280,000	141,005,775

There is considerable shipping at Port Gentil, Libreville and Pointe-Noire, the chief ports at which in 1929, 574 vessels of 1,821,739 tons entered and 572 vessels of 1,803,596 tons cleared. At Loango steamers must anchor about three miles off the coast. Whale fishing commenced in 1922.

On February 6, 1921, a new railway was commenced to connect Brazzaville with the Atlantic at Pointe-Noire, a distance of 318 miles, and was completed in 1930.

A river port is under construction at Brazzaville, to facilitate traffic between the Congo and the railway.

The Central African telegraph line connects Brazzaville with Pointe-Noire, the terminus of the French cable from Brest via Dakar and Libreville, and is in communication with the English Atlantic cable. Wireless telegraphy connects Brazzaville and the head of the Southern Railway in the Loango Region, a distance of 300 miles, and also Brazzaville and Leopoldville, and a radio service with France was inaugurated in 1927. In the Chad region there are several stations connecting Fort Lamy, Ati, Faya, and Maô. A line has been laid to connect Brazzaville with Bangui, and another to connect Bangui with Fort Lamy. The total length of telegraph line in operation is about 3,253 miles.

On the north-east of Lake Chad is the state of Kanem, which was com-

pletely subjected to France in 1903, and is now only a district of the Colony of Chad with Maô for its capital. Wadai, to the east of Kanem, with an area of about 170,000 square miles, and a semi-civilised population of about 1,000,000, accepted the French Protectorate in the summer of 1903. In 1911 a French force occupied Arada, some miles to the north of the capital, Abeshr, which is in communication with Benghazi, on the coast of Tripoli, by caravans, and in 1913 Ain-Galakka.

The principal banks are Banque de l'Afrique Occidentale, Banque Commerciale Africaine and Banque Belge d'Afrique.

Governor-General of Equatorial Africa.—Vacant (March, 1935).

MADAGASCAR.

Government.

The last native sovereign of Madagascar, Ranavàlona III. (born 1861, died 1916), succeeded in 1883. The French having claimed a portion of the north-west coast as having been transferred to them by local chiefs, hostilities were carried on in 1882–84 against the Hovas, who refused to recognise the cession. In 1885 peace was made, Diégo Suarez having been surrendered to France. A French Resident-General was received at the capital, and the foreign relations of the country were claimed to be regulated by France. By the Anglo-French agreement of August 5, 1890, the protectorate of France over Madagascar was recognised by Great Britain; but the Native Government having refused to carry out the clauses of the treaty of 1885, a French expedition was despatched in May, 1895, to enforce the claims of France, and on October 1, the capital having been occupied, a treaty was signed whereby the Queen recognised and accepted the protectorate. By a unilateral convention made in January, 1896, Madagascar became a French possession, and by law promulgated August 6, 1896, the island and its dependencies were declared a French colony.

Governor-General.—Leon Cayla (appointed February 10, 1930).

A Consultative Council of Administration has been established at Antanànarivo. The Colony is not represented in the French Parliament, but there is an Economic and Financial Delegation, composed of 24 French citizens and 24 natives. The former are elected by the Chambers of Commerce, Industry and Agriculture and the Municipal Councils. The native members are chosen by the votes of a body of representatives itself elected by the chiefs of the villages. This delegation meets once a year for examination of the budget proposals. Four Europeans and two native members of the Council of Administration also take part in the meetings of this assembly. Madagascar is divided into 8 Regions and 90 Districts. Natives are employed to a large extent in subordinate positions both in the civil and military administration. In all parts of the island the natives are

allowed to choose chiefs who represent them in their relations with the Government.

Area and Population.

Madagascar is situated to the south-east coast of Africa, from which it is separated by the Mozambique Channel, the least distance between island and continent being 240 miles; its length is 980 miles; greatest breadth, 360 miles, and it has a coast line of over 3,000 miles. The area is estimated at 241,094 square miles. According to the last census (1931) the population (including that of the Mayotte and Comoro islands) was 3,701,770 (19·9 per sq. mile), of whom 3,665,234 were Malagasy, 23,076 were French and 13,460 foreigners, including Europeans and others.

The Malagasy races or tribes are very numerous, the more important being the Hova (910,000), the Bétsiléo (520,000), the Betsimisáraka (438,400), the Tanala (187,300), the Sakalava (214,000), and the Bara (182,000). Hindus, Chinese, Arabs, and other Asiatics carry on small retail trade. The most intelligent and enterprising tribe is the Hova or Merina, whose language, allied to the Malayan and Oceanic tongues, is understood over a large part of the island. The people are divided into a great many clans, who seldom inter-marry.

The slave trade was nominally abolished in 1877; slavery in Imerina and in all parts under French authority was abolished by proclamation on September 27, 1896. The system of forced labour in the public service was abolished on January 1, 1901, but the personal tax due from 16 to 60 years of age, formerly 5 francs, has been increased to 50 or 60 francs according to the districts. The populations of the chief towns were, in 1931, the capital, Antanànarivo, in the centre of the island, 92,475 (6,700 Europeans and 300 Asiatics); Tamatave, 15,022; Fianarantsoa, 12,575; Antsirabe, 8,300; Majunga, 20,000; Diégo Suarez, 12,300; Tulear, 12,300; Mananjary, 11,000; Sainte-Marie, 7,922; Nossi-Bé, 12,000. The principal ports are Tamatave, on the east coast, Majunga on the north-west coast, Diégo-Suarez in the north, and Tulear in the south-west.

In 1896, Diégo-Suarez (a French colony from 1885), the island of Nosy-Bé (area 130 sq. miles) on the west coast, and the island of Ste. Marie on the east coast (area 64 sq. miles), and in 1914 the Comoro Islands, were placed under the authority of the Governor-General of Madagascar.

Religion, Education, Justice.

Up to 1895, a large portion of the Hova and of the other tribes in the central districts had been Christianised. The Christian population was estimated at 450,000 Protestants, and 150,000 Roman Catholics. There are many missionary societies at work, French (Catholic and Protestant), British (the London Missionary Society, the Friends' Mission, and the Anglican Mission); there is also a Norwegian Lutheran Mission and an American Mission. There are in the Colony 1,867 Roman Catholic churches, 3,493 Protestant (high and low), churches and 75 Mosques. The outlying tribes are still mostly heathen.

Education is compulsory from 8 to 14 years of age. On January 1, 1932, there were 2 lycées, more than 1,000 official schools for European or native children, with 112,000 pupils and 2,000 teachers, and 600 private schools, with 67,000 pupils and 1,144 teachers. Children are required to learn the French language. At Antanànarivo there are a school of native medicine, an administrative and commercial school, a normal school, and a school of agriculture.

For the administration of French justice there are a *Parquet* consisting

of a *Procureur-Général* and other officials, a court of appeal, 4 courts of first instance in the principal towns, and justice of peace courts at 17 centres. For native justice there are tribunals in the districts, and the natives have the right of appeal from lower to higher tribunals. There were also arbitration courts for settling labour disputes.

Finance.

The local revenue of Madagascar is derived chiefly from direct taxation (including a poll tax and taxes on land, cattle, and houses), from customs and other indirect taxes, from colonial lands, from posts and telegraphs, markets, and miscellaneous sources. The chief branches of expenditure are general administration, public works, the post office, and the public debt. The budget estimates for the calendar year 1933 balanced at 249,931,000 francs, those for 1934 at 270,500,000 francs, and those for 1935 at 267,755,000 francs.

The colony has since 1897 contracted debt to the amount of 4,200,000*l.* (principally for public works) at the average yearly rate of interest of 3·02 per cent. The 1932 budget makes provision for debt revenue, 12,700,000 francs, and the 1933 budget for 17,791,000 francs.

Defence.

In peace time the troops in Madagascar (including the forces at Diégo-Suarez) consist of 1,580 Europeans, and 3,720 natives. The police and militia, consisting of 3,300 natives, are maintained on the local budget.

Production and Industry.

In 1896, on the completion of the French occupation of the Island, the Malagasy system of land tenure was modified on the model of the Torrens Act of Australia. Since then, a decree issued in 1926, specifies that the French State is presumed to be the owner of any land not under cultivation, exploited nor put under registration. And in 1929 there was ssued a new regulation concerning the native property and providing reserved zones for the local communities. The principal crops are rice, sugar, coffee, manioc, cotton, cacao, vanilla, tobacco, butter beans, lima beans, cloves, mulberry trees, and rubber trees. The latest statistics give the following acreage:—rice, 1,892,425 acres; manioc, 726,250 acres; maize, 213,540 acres; sweet potatoes, 244,825 acres; haricot beans, 91,097 acres; potatoes, 77,207 acres; coffee, 180,000 acres; vanilla, 53,260 acres. Sericulture is encouraged. The forests contain many valuable woods, while caoutchouc, gum, resins, and plants for textile, tanning, dyeing, and medicinal purposes abound.

Cattle breeding and agriculture are the chief occupations of the natives. There were on December 31, 1931, 7,000,000 cattle in the island; 3,000 horses; 255,000 sheep; 70,000 goats; 2,000 ostriches, and 500,000 pigs.

Silk and cotton weaving are carried on, and the working of metal and the making of panama and other straw hats. The preparation of sugar, rice, soap, tapioca, &c., is being undertaken by Europeans, as well as the canning of meat. A cement works was erected at Majunga in 1933. There are large meat-preserving factories at Bo-anamary (Majunga), Diégo-Suarez, Tamatave, Antanànarivo and Antsirabe.

The value of the total output of minerals in 1933 was 21,000,000 francs, graphite (6,800 tons) accounting for 8,200,000 francs, and mica (245 tons) for 2,330,000 francs. The production of phosphates (1,275 tons) was

valued at 2,550,000 francs, that of precious stones at 1,015,000 francs. Madagascar produces also industrial stones, corundum, radio-active minerals (betafite and euxenite) and zircon.

Commerce.

The trade of Madagascar has been as follows in five years:—

—	1929	1930	1931	1932	1933
	Francs	Francs	Francs	Francs	Francs
Imports . . .	807,354,929	602,782,842	507,322,279	344,777,730	368,511,000
Exports . . .	439,978,455	369,668,899	361,349,497	320,070,397	317,911,000

The chief articles of import and export in 1932 and 1933 were the following:—

Imports	1932	1933	Exports	1932	1933
	1,000 francs	1,000 francs		1,000 francs	1,000 francs

France supplies the bulk of the imports (282,574,000 francs in 1933), and that country also receives the bulk of the exports (259,734,000 francs in 1933).

According to Board of Trade returns, the imports from Madagascar into Great Britain in 1934 amounted to 274,556*l.*, and in 1933 to 294,128*l.*, and the exports from Great Britain amounted to 76,310*l.* in 1934 and 64,975*l.* in 1933. Re-exports to Madagascar from U.K. were 542*l.* in 1933, and 3,568*l.* in 1934.

Shipping and Communications.

Tamatave, the principal seaport of the island, is visited by the steamers of two French shipping companies, and the principal ports are connected with each other by coasting steamers plying regularly. In 1932, 7,487 vessels of 3,370,891 tons entered and 7,521 vessels of 3,366,063 tons cleared at the ports of Madagascar. Of the total vessels entering, 5,609 were French and 1,398 were British; and of those clearing, 5,601 were French and 1,441 British.

At the end of 1933, there were 9,500 miles of roads. Three railways are at present worked in Madagascar. The first is the through railway line between Antanànarivo and Tamatave (229 miles) which was opened for traffic on March 9, 1913. The second is the railway between Antanànarivo and Antsirabe (noted for its thermal springs), 98 miles south of Antanànarivo, opened for traffic on October 15, 1923. The third is the branch line of the Tamatave railway, from Moramanga to the Antsihanaka Districts, towards the north of the island, which was opened for traffic in October, 1917, a distance of 103 miles. Total railway mileage (including narrow-gauge local lines) on December 31, 1927, 430 miles. A new line from Fianarantsoa to the east coast of the island (105 miles) is being constructed. There is

also a motor-car service with a network of routes covering more than 1,300 miles.

There is postal communication throughout the island. There were in 1931, 185 ordinary post offices and 500 rural offices. The telegraph line has (1931) a length of 9,207 miles. There is cable communication to Mozambique, Mauritius, Réunion, and Aden. In 1931 there were 1,490 miles of urban and inter-urban telephone line, and eleven Government wireless telegraph stations. The important wireless station at Antanànarivo, forming part of the French inter-colonial network of wireless stations, was opened towards the end of 1924.

Money and Banks.

By the decree of 22 December, 1925, a Bank of Issue was established—the Bank of Madagascar, with a capital of 200 million francs. It has a branch at Antanànarivo and agencies at Diégo-Suarez, Fianarantsoa, Majunga, Mananjary, Nossi-Bé, Tamatave and Tuléar. The Comptoir National d'Escompte de Paris has agencies at Antanànarivo, Tamatave, Nossi-Bé, Morondava, Diégo-Suarez, Mananjary, Majunga and Tuléar. The Crédit Foncier de Madagascar is also established in the island. On January 1, 1920, a Savings Bank was established.

The monetary system is the same as that of France, and all coins and notes which are legal tender in France are also legal tender in the Colony. The Bank of Madagascar issues notes which are legal tender in the island and its dependencies.

MAYOTTE AND THE COMORO ISLANDS.

The archipelago of the Comoro Islands is formed by the islands of Mayotte, Anjouan, Grande Comore and Moheli. Before 1912, Anjouan, Moheli and Grande Comore were only under French protection; Mayotte alone being a colony. But by a law of July 25, 1912, and a decree of February 23, 1914, the whole archipelago has become a colony, attached to the general government of Madagascar, of which it forms a Region under the command of a Lieutenant-Governor.

In 1931, the combined population was 130,253, including 501 Europeans.

The island of Mayotte (140 square miles) had a population (1931) of 12,690. There is an increasing emigration to Zanzibar and Madagascar. The chief product was formerly sugar, but the cultivation of vanilla has now superseded that of the sugar-cane. There are now only two sugar works and two distilleries for rum. Besides vanilla and sugar, cacao, aloes and perfume plants (citronella, ylang-ylang, patchouli, &c.) are cultivated.

Grande Comore, Moheli, Anjouan, and a number of smaller islands, have an area of about 650 square miles and population in 1931 of 109,563. Grande Comore itself is about 40 miles long and 18 miles at its broadest points. Vanilla, cacao and perfume plants are successfully cultivated. Grande Comore has a fine forest and exports timber for building and for railway sleepers.

The principal imports are cotton fabrics, metals, and rice; the principal exports, hides, sugar, copra, sisal, and vanilla.

The other dependencies surrounding Madagascar are the islands: Europa, Juan de Nova, Barren, Bassas da India, Glorienses. Then half-way between Cape of Good-Hope and Australia lie Amsterdam and St. Paul, also the archipelago of Kerguélen, whaling and fishing stations, and near the Antartic pole Crozet islands and Terre Adelie. Amsterdam, St. Paul, Kerguelen, Crozet and Terre Adelie were made dependencies of Madagascar by decrees of March 26 and November 27, 1924.

Consular and other Representatives.

OF GREAT BRITAIN IN MADAGASCAR.

Consul at Antanànarivo.—J. Helm Smith.

There is also a Vice-Consul at Majunga and at Tamatave.

RÉUNION.

Réunion (or Bourbon), about 420 miles east of Madagascar, has belonged to France since 1643. It is administered by a Governor assisted by a Privy Council, and an elective Council-General, and is represented in the French Parliament by a Senator and two Deputies. It has an area of 970 square miles and population (1931) of 197,933, of whom 194,272 were French; there were also 196 British Indians, 921 natives of Madagascar, 302 Africans, 2,242 Chinese. The chief towns are: St. Denis, with 26,807 inhabitants in 1931; St. Pierre, 22,048; St. Paul, 22,679; St. Louis, 17,237. The towns are under the French municipal law. Réunion has a lycée with (1934) 25 teachers and 545 pupils. Primary education is given at St. Denis in two schools, one for boys with 670 pupils and 16 teachers, and one for girls with 880 pupils and 21 teachers. There are besides three infant schools under State supervision, and three private establishments. In the rest of the island, primary education is given in 178 schools by 396 teachers, and in 31 private schools. The number of pupils attending school in the island is (1934) 24,450. There is a teachers' training course at the lycée attended by 140 pupils with 4 teachers. The chief port, Pointe-des-Galets, is connected by a coast railway of 80 miles with St. Benoît on the one hand, and St. Pierre on the other. In 1888 this railway was taken over by the State. The chief productions are sugar (62,000 acres), rum, manioc (12,000 acres), tapioca, vanilla, essences. The forests occupy about 150,000 acres. The production of spirits (expressed as 100 per cent. alcohol) in 1933 amounted to 4,117 hectolitres (90,574 gallons) in industrial distilleries and 40,323 hectolitres (887,106 gallons) in other works. The sugar production in 1933–34 was 77,000 metric tons. The chief imports are rice (valued at 16,000,000 francs in 1933), grain, cotton goods (11,000,000 francs in 1933), &c.; the chief exports are sugar (56,000 metric tons valued at 84,000,000 francs in 1933), and spirits (46,566 hectolitres valued at 19,000,000 francs in 1933). Total value of imports in 1933, 146,000,000 francs; of exports, 117,000,000 francs. In 1933, 174 vessels entered and cleared at the ports of the island. There are about 80 miles of railway. The Tamatave-Réunion-Mauritius Telegraph Cable is open for traffic. The wireless station is also open for public traffic. During the year 1933, there were 263,764 telephone conversations and 62,958 telegraph communications. There are 61 post offices and 675 central telephone offices. The budget for 1933 showed 63,634,000 francs for receipts and expenditure. The currency of Réunion consists of local bank notes and token nickel coinage. It has nominally the same value as that of France. The Bank of Réunion has a capital of 6 million francs.

FRENCH SOMALILAND.

The colony of the Somali Coast lies between the Italian Colony of Eritrea and British Somaliland. On the north it is bounded by Cape Doumeirah, which separates it from the Italian possessions; on the south by a line drawn from the wells of Hadou to Gueldessa, which separates it from the British possessions; the inland boundary towards Abyssinia being, by convention of March 20, 1897, at a distance of 90 kilometres (about 56 miles) from the coast. It is administered by a Governor, assisted by an Administrative Council. The port of Obock was acquired for France in 1862, but it was not till 1884 that its active occupation began. In 1884, Sagallo and Tajurah were ceded to France; in 1885, Ambado; in 1888 the territory was delimited by agreement with Great Britain; in 1888, a port was created at Djibouti, now the seat of government. The territory has an area of about 8,880 square miles, and the native population was estimated in 1931 at 68,965, made up as follows: Somali, 46,687; Arabs, 2,992;

Danakils, 18,552; Jews, 78; Abyssinians, 157; Hindus, 499. Djibouti has (1931) 11,366 inhabitants, of whom 628 are European (356 French).

There are two schools for elementary education, one public and the other private. The local budget for 1933 balanced at 13,358,100 francs. The country has scarcely any industries, but with the coast fisheries and inland trade there is considerable traffic. The mineral wealth of the country is imperfectly known. Salt has been mined since 1912; in 1931, 22,000 metric tons were exported; other minerals supposed to exist are: gypsum, mica, amethyst, sulphur and petrol. The chief imports are cotton yarns and cotton goods, cattle, coal, sugar; the chief exports were coffee, hides and skins, animal wax and salt. The total imports in 1933 amounted to 130,025,000 francs, and the total exports to 120,695,000 francs. Transit trade in 1933 was valued at 64,731,000 francs. Much of the traffic with Abyssinia which formerly passed by Zailah now goes by railway from Djibouti to Addis Ababa (485 miles). In 1933 there entered at Djibouti 476 steam merchant vessels of 1,806,467 tons. Of these vessels, 205 were French, 131 English, 44 Italian, 15 Norwegian, 70 German, 7 Swedish, and 4 various.

FRENCH WEST AFRICA AND THE SAHARA.

French West Africa comprises the following colonies:—(1) Senegal, (2) French Guinea, (3) the Ivory Coast, (4) Dahomey, (5) French Sudan, (6) Mauritania, (7) Niger, and (8) Circonscription of Dakar and Dependencies.

The approximate area and population of French West Africa in 1933 are shown as follows:—

Colony	Area (in Square Miles)	Population 1933		
		Total	Including Europeans	Including French
Senegal	74,112	1,619,944	6,900	4,445
Guinea	89,436	2,119,162	3,399	1,364
Ivory Coast	180,802	3,859,431	2,834	2,304
Dahomey	41,302	1,133,274	981	892
French Sudan	380,557	3,526,611	2,348	1,897
Mauritania	347,400	351,625	283	236
Niger	490,490	1,721,331	428	410
Dakar and Dependencies	60	72,764	10,158	7,963
Total	1,604,159	14,404,142	27,331	19,511

By decree of September 5, 1932, which came into force on January 1, 1933, Upper Volta ceased to be a colony; its territory and population were distributed as follows: to Niger, 27,290 square miles and 268,239 inhabitants; to French Sudan, 20,226 square miles and 713,167 inhabitants; and to Ivory Coast, 59,212 square miles and 2,018,837 inhabitants.

The principal tribes are the Ouolofs in Senegal (about 603,000, mostly Moslems); Bambaras and Mandingos in the Sudan (about 1,200,000); Peuhls Faulbés in the Sudan, Upper Volta, Niger and Guinea (about 2,000,000); the Mossi in the Upper Volta (about 1,300,000), and the Kroumen on the Ivory Coast.

A treaty of October 19, 1906, determines the course of the Anglo-French boundary from the Gulf of Guinea to the Niger. The delineation of the boundary was completed in 1912, and approved by the two governments in 1914.

The British government has leased to France for purposes of commerce two pieces of land, one on the right bank of the Niger between Lealaba and the confluence of the rivers Moussa and Niger, and the other on one of the mouths of the Niger, each to form one block of from 25 to 120 acres with a river frontage not exceeding 436 yards; the lease, at first, to be for 30 years. It is further stipulated that, within the boundaries indicated in the convention, British and French as regards persons and merchandise shall enjoy for 30 years the same treatment in all matters of river navigation, of commerce, and of tariff and fiscal treatment and taxes of all kinds.

Under the Anglo-French Convention of April 8, 1904, the river port of Yarbatenda on the Gambia (belonging to the British colony of Gambia), with all its landing places, was ceded to France, and, if this port should prove inaccessible to sea-going merchantmen, access to the river will be granted to France at an accessible point lower down. At the same time the Los Islands were ceded to France.

By a Convention between Great Britain and France the former recognised the right of France to all territory west of the Nile basin, which practically includes the whole of the Sahara (exclusive of the Libyan Desert), and the State of Wadai. The French Sahara may be roughly estimated at about 1½ million square miles.

Over the whole of French West Africa there is a Governor-General, who is assisted by a Council, the seat of the general government being at Dakar. The Colonies are each under a Lieutenant-Governor, the Circonscription of Dakar and Dependencies under a Governor of Colonies, all subject to the direction of the Governor-General, who has been relieved of the direct administration of any portion of his Government, and is free to devote the whole of his attention to directing and controlling the common interests of all the Colonies. To facilitate this object a General Budget has been created, drawn up by the Governor-General, which provides for all the services which are common to all the Colonies, particularly public works and social services, and the funds for which are provided by the customs and shipping dues of each of the Colonies, which have now only their internal revenues to depend upon for their local budgets, which have, however, been relieved of the cost of all the general services.

There were in 1933–34, 265 preparatory and elementary schools with 22,323 pupils (2,301 girls); 75 country schools with 22,289 pupils (2,243 girls); 18 urban schools with 4,136 pupils; 8 higher primary schools with 930 pupils (8 girls); 13 technical schools with 693 pupils. There were besides 196 evening schools for adults with 7,813 pupils, 6 orphan schools with 144 boys and 157 girls, 3 'medersas' or Mussulman schools with 262 pupils; also 2 Lycées with 540 pupils. There were 74 private schools with 6,416 boys and 3,051 girls. The expenditure on education was 23,876,435 francs.

The following are the financial estimates for 1934 :—

	General Budget	Local Budgets	Supplementary Budgets	Total
	francs	francs	francs	francs
Revenue . . .	164,397,000	390,433,000	257,831,000	812,661,000
Expenditure . .	164,397,000	390,433,000	257,831,000	812,661,000

The military forces in 1933–34 consisted of 17,900 men, of whom 3,327 were Europeans. In 1933–34 there were 11,750 recruits. The police force numbers 7,069.

The principal agricultural products are ground-nuts (388,670 tons exported in 1933), cocoa (31,087 tons in 1933), and cotton (1,576 tons in 1933).

The imports into French West Africa are mostly textiles, fuel oil, mechanical implements, food substances and beverages; the exports from these colonies are chiefly fruits, oils and oil seeds, as well as cocoa, gold, timber, coffee and gum.

The following is a comparative table in thousand francs of the imports and exports during 1932 and 1933 for each of the colonies:—

Colonies	Imports		Exports	
	1932	1933	1932	1933
	1,000 francs	1,000 francs	1,000 francs	1,000 francs
Senegal	404,879	410,294	289,976	280,273
French Guinea	55,386	56,905	56,053	55,082
Ivory Coast	88,928	93,907	115,438	114,322
Dahomey	61,414	42,945	44,231	27,652
French Sudan	20,061	19,084	7,018	5,630
Upper Volta	3,220	—	10,062	—
Niger	12,376	9,891	16,080	15,990
Mauritania[1]	696	—	691	—
Total	646,961	633,026	539,547	498,950

[1] For 1933, the trade of Mauritania is included with that of Senegal.

Of the imports, 307,721,334 francs in 1933 and 277,006,284 francs in 1932 were from France; of the exports, 326,406,907 francs in 1933 and 299,704,626 francs in 1932 went to France.

Total trade between Great Britain and French West Africa,[1] according to Board of Trade Returns for three years, was as follows:—

	1932	1933	1934
	£	£	£
Imports from French West Africa into U.K.	212,993	91,162	167,865
Exports to French West Africa from U.K.	1,140,386	1,138,143	1,082,948
Re-exports to French West Africa from U.K.	51,065	52,245	72,364

In 1933, 9,910 vessels of 9,326,621 tons entered and 9,808 of 9,287,058 tons cleared the ports of French West Africa.

There were (January 1, 1934) 2,355 miles of railway in operation; 22,126 miles of telegraph. In 1934 there were 327 post offices, divided as follows:—Senegal, 80; French Sudan, 91; Guinea, 36; Ivory Coast, 49; Dahomey, 32; Mauritania, 15; and Niger, 24.

A savings bank was established by a decree of July 22, 1920, and began to function on October 1, 1922, with a single office at Dakar. There are now 4 branch offices at Saint-Louis, Conakry, Porto-Novo, and Niamey. On January 1, 1933, there were 15,382 depositors with 35,571,700 francs to their credit. The Banque de l'Afrique Occidentale Française has the exclusive right to issue notes. It has branches at Dakar, St. Louis, Rufisque, Bamako, Grand-Bassam, Porto Novo, Lome and Kaolack. Its capital is 50,000,000 francs. The Banque Commerciale Africaine is also an important banking institution in French West Africa. The use of French weights and measures, and money, is compulsory throughout French West Africa.

Governor-General of French West Africa.—M. J. Brévié. Appointed 1930.

[1] Including French Equatorial Africa.

The colony of **Senegal** was last reorganised by the decree of April 13, 1934. The capital is St. Louis, an old town founded in 1658 (population, 1933, 29,827, Europeans, 1,107). The other important towns are Dakar, a fortified naval station, and the seat of the Government General of French West Africa (population, 1934, 72,752, European, 10,145), Rufisque (population, 1933, 13,559, European, 346), Kaolak (15,645), Diourbel (15,544), Thiès (13,356). By a decree of December, 1924, Dakar and its suburbs were formed into a special territory called *circonscription de Dakar et Dependances.* Goree, a small island situated in front of Dakar (population, 998), was amalgamated with Dakar in April, 1929. There are three municipal communes governed by a mayor and corporation, St. Louis, Dakar and Rufisque.

The total area is 74,112 square miles, and the total population in 1933 was put at 1,619,944. The natives of the four towns and their descendants are French citizens, and other natives are French subjects.

The Colony is represented in the French Parliament by a deputy.

The Colony is administered by a Lieutenant-Governor, assisted by a Colonial Council of 44 members, 26 elected by French citizens and 18 by representatives of native chiefs of cantons and provinces. The Colony is divided into 16 'circles,' each under the rule of an administrator. The local budget for 1934 was 97,936,000 francs.

For primary education there were in 1934, 46 preparatory schools, 15 elementary schools and 13 regional schools. There were also 4 urban schools at St. Louis and 2 at Rufisque, which give the same instruction as the French primary schools, modified to suit local requirements. At Dakar there are grouped superior technical schools common to all the colonies, a normal school for teachers, a professional school, a commercial and administrative school, a school of medicine. At St. Louis a superior primary school has 182 pupils. Secondary education is provided at Dakar and at St. Louis (540 pupils in 1934). In 1934, 1,600,000 francs were provided for secondary education. There is a large hospital for natives at Dakar and St. Louis.

The soil is generally sandy. In 1933, there were 680,000 sheep and goats; 401,000 cattle; 70,000 asses; and 40,000 horses. The natives cultivate ground-nuts (production, 1933, 570,000 tons), millet, maize, and some rice; other products are castor beans, some coco-nuts, gum from Mauritania, and rubber from the Casamance river. Ground-nuts form the bulk of the exports. A salt industry is being developed. Native industries comprise weaving, pottery, brick-making and jewellery; a small quantity of gold and titanium-bearing sand is produced.

Imports in 1933, 357,714,874 francs; exports, 394,737,577 francs. The chief imports are cottons, foodstuffs, metal-work, and coal. The chief exports in 1933 were ground-nuts (391,384 tons), turtles, hides and skins, ground-nut oil (34 tons), gums (4,500 tons).

In 1933 the colony possessed 1,653 miles of telegraph and 1,625 miles of telephone lines. There are 2 French submarine cables, Brest–Dakar and Brest–Casablanca–Dakar. There are three other cables, one Spanish, one French West African, and the third belonging to a South American company.

One railway connects Dakar, Rufisque and St. Louis (165 miles) and Louga-Linguère; another one Thiès, Kayes and Bamako (French Sudan), 450 miles, with a branch to Kaolack and another to Touba.

There is a river service on the Senegal from St. Louis to Podor (140 miles) open throughout the year. During the rainy season ships of 14 to 15 feet draught can get as far as Kayes, 484 miles from Dakar. The Senegal river is closed to foreign flags. Dakar, the principal port, is in regular communication with French ports by the steamers of French lines, and with

Liverpool by a British line, and is also served by an Italian Line. La Banque de l'Afrique Occidentale (established June 29, 1901 and reorganised by a law of January 29, 1929), with a capital of 50,000,000 francs, and reserve funds 17,500,000 francs, was founded for the purpose of carrying on financial, industrial, or commercial operations; it has a branch at Dakar, and agencies at St. Louis, and Kaolack. La Banque Belge d'Afrique has an agency at Dakar. The Banque Commerciale Africaine has agencies at Dakar, Rufisque and Kaolack.

H.B.M.'s Consul-General at Dakar (for French Western Africa, including the Sudan).—V. V. Cusden (May 1, 1931).

French Guinea lies on the coast between Portuguese Guinea and the British colony of Sierra Leone, and extends some considerable distance inland. The area is about 89,436 square miles, and the population (1933) was 2,119,162, including 3,399 Europeans (1,364 French). A regular system of Government lay schools has recently been introduced all over French West Africa. The principal products are palm oil and nuts, rubber, millet, earth-nuts, rice, gum, bananas, pineapples, and coffee, which is grown in the Rio Nunez Fouta and military regions. There is an experimental garden at Camayenne near Conakry (the capital), where the culture of bananas, pineapples, rubber trees, and other plants is being tried. Fouta Djallon contains cattle in abundance. In 1933 there were 404,500 cattle, 84,000 sheep, 89,600 goats, 2,065 horses, and 841 asses. Gold is found in the river Tinkisso and in the Bouré and Siecke districts. Imports in 1933, 56,905,304 francs; exports, 55,063,068 francs. The principal exports in 1933 were rubber, 234,618 francs; cattle, 407,243 francs; hides, 2,269,928 francs; bananas, 19,579,277 francs; and palm kernels, 4,711,084 francs; animal wax, 1,568,566 francs; palm oil, 225,284 francs. The principal imports in 1933 were cotton fabrics, 18,338,010 francs; metal goods, 6,128,731 francs; petrol, 1,420,422 francs; wines, 2,429,535 francs; salt, 484,364 francs. A network of roads is being made to connect with the railway station from Conakry to the Niger. The French Guinea railway which runs from Conakry on the coast to the Milo at Kankan (664 kilometres long) was opened in January, 1911, and in August, 1914, was continued to Kankan (412 miles from Conakry). The jetty 1,066 feet long, at Conakry has been completed. In the colony there were (1930) 2,836 miles of telegraph line. The Colony is connected by cable with France and Pernambuco; also with Freetown, Monrovia, and Grand Bassam. There is a wireless station at Conakry affording communication with Dakar (Senegal), Bamako (French Sudan) and Grand Bassam (Ivory Coast). Conakry is visited regularly by the steamers of four French companies and one English company. The budget of the colony provided for 1934 the sum of 49,077,000 francs.

The **Ivory Coast** lies between Liberia and the British Gold Coast Colony. It has common frontiers with French Guinea, and French Sudan. France asserted and obtained rights on the coast about 1842, but did not actively and continuously occupy the territory till 1882. On January 1. 1933, a portion of Upper Volta was added to the Ivory Coast. Area about 180,802 square miles; native population (1933 census), 3,856,597; Europeans, 2,834; total, 3,859,431. The seat of administration, previously at Bingerville, has now been transferred to Abidjan (population 17,718, European 1,030). There is a central school group at Bingerville, and a number of Government schools in the districts. The chief ports, in

respect of population and commerce, are Abidjan-Port-Bouet, Grand-Bassam (population 4,415), Assinie, Grand Lahou (3,486), Sassandra, and Tabou. The natives cultivate ground-nuts, maize, rice, millet, bananas, pine-apples, and many other fruits. They have also been taught to grow cocoa, the export of which increased from an average of 4 tons in 1904–1908 to 31,063 tons in 1933. The cultivation of cotton is being developed; coco-nuts and rubber are collected. The mahogany forests inland are worked. Gold is found near Grand-Bassam in Baoulé, on the Comoé and Bia Rivers, and in Indenié. Manganese deposits have also been located. The imports in 1933 amounted to 93,907,000 francs, and the exports to 114,322,000 francs. Chief imports in 1933 were: cotton tissues, 31,283927, francs; petrol, 2,190,460 francs; wines, 4,876,813 francs; metal work, 11,640,833 francs. Chief exports were: palm kernels, 1,705 metric tons; palm oil, 3,192 metric tons; cacao, 31,063 metric tons; coffee, 1,697 metric tons; cabinet woods, 25,976 metric tons; cotton, 948 metric tons. Number of vessels entered in 1933, 1,190 of 3,367,515 tons, and cleared 1,189 vessels, of 3,365,167 tons. From Abidjan, on the north side of the lagoon, a railway has been constructed, running between Abidjan and Bobo-Dioulasso (494 miles). There is also a railway connecting Abidjan and Port-Bouët (7 miles). There is a large network of roads suitable for motor traffic, total length about 7,986 miles. At the end of 1933, there were 4,036 miles of telegraphic and 417 miles of telephonic lines. The telegraph connects the principal towns and extends to adjoining colonies. Telephonic communication exists between Abidjan, Aboisso, Assinie, Bassam, Bingerville, Dabou, Lahou, and Tiassalé. There are three wireless stations in the colony. The budget of the colony for 1935 has been fixed at 86,124,200 francs.

Dahomey stretches from the coast between Togoland on the west and the British possessions of Lagos and Nigeria on the east, and is bounded on the north-east by the river Niger, on the north-west by the colony of the Ivory Coast, and on the north by the colony of Niger. France obtained a footing on the coast in 1851, and gradually extended her power until in 1894 the whole kingdom of Dahomey was annexed. The colony has only about 70 miles of coast, but opens out northwards into a wide hinterland. The area is about 41,302 square miles, and the population, according to the latest census of 1933, 1,133,274, including 981 Europeans (French 892). The seat of government is Porto Novo (the chief business centre, with Kotonu the biggest port of the colony), which has 25,724 inhabitants. Village, regional, and urban schools are instituted under the new West African educational system. In 1934, 1,982,225 francs were spent on education. The natives are of pure Negro stock, and belong to the Fon branch of the Ewe family. They are industrious agriculturists in the coast region, and grow maize, manioc, yams, and potatoes. In 1933, there were 180,000 cattle; 158,000 sheep; 203,000 goats. The forests contain oil palms, which have been profitably utilized. These furnish the chief exports—kernels and oil. Cotton cultivation has recently been successfully introduced in the central provinces; coffee cultivation has given good results in the south provinces. Imports in 1933, 42,504,000 francs; exports, 27,619,000 francs. The principal exports (1933), were palm kernels, 15,929,898 francs; palm oil, 4,802,953 francs, and cotton, 1,629,855 francs. The principal imports in 1933 were, cotton goods, 9,149,936 francs; metal goods, 6,123,430 francs.

A metalled road, called the East Road (297 miles in length), for motor traffic runs from Savé to Malanville on the Niger. There is also a road from Dassa-Zoumé to Porga (281 miles), called the North-west Road. Other roads

are: Kotonu—Dassa-Zoumé—Savé (198 miles), Kotonu to Anecho (68 miles), Abomey to Ketou (75 miles). There are now altogether more than 2,711 miles of carriage road, of which 871 miles are first-class roads. At Kotonu an iron pier has been erected, and from that port a railway runs into the interior to Chaoru or Tchaourou (227 miles), with a branch line to Whydah and Segborué on Lake Aheme (36 miles). The gauge is a metre. A metre gauge railway has also been constructed from Porto Novo to Pobé (50 miles) along the Lagos frontier. Another line has been constructed from Grand-Popo to Lokossa along the Togoland frontier (30 miles). A new railway linking the Capital with the port of Kotonu was opened to traffic on June 1, 1930 (22 miles). A telegraph line connects Kotonu with Abomey, Togoland, the Niger, and Senegal. In the colony there were (in 1932) 1,800 miles of telegraph line, and 565 miles of telephone line. In 1933, 419 vessels entered and cleared the ports of Dahomey. French coins only are in circulation. The budget for 1934 was 41,724,000 francs.

The **Colony** of **French Sudan** was formed in 1904, from the Territories of Senegambia and the Niger, less the Senegal Protectorate, which was restored to Senegal. Its old name of Upper Senegal-Niger was changed to French Sudan by decree of December 4, 1920. On January 1, 1933, a portion of Upper Volta was added to it.

The Colony is bounded on the north by the Algerian sphere; on the west by Mauritania, the Falémé river, and the frontier of French Guinea; on the south by the frontier of the Ivory Coast, and on the east by the Colony of the Niger. The area is 380,557 square miles, with a population of 3,526,611 in 1933.

The whole of the French Sudan is under civil administration, with the same judicial and educational systems as the other Colonies comprised in the Government General. The budget of the Colony for 1934 provided for 63,547,000 francs.

The following are the most important towns in the French Sudan with population in 1933 shown in parentheses: Bamako, the capital (20,929), Segou (8,898), Kayes (11,744), Djeuné (6,131), Timbuktu (5,670), Goundam (6,314), Ouahigouya (5,731), Sikasso (10,279), San (4,221), Mopti (4,632), Kita (3,711), Gao (5,307), Bandiagara (3,622). All the principal towns have regional or urban schools; Bamako has a professional school, a junior high school, a veterinary school and a school for artisans; there is a Mussulman superior school at Timbuktu with 110 pupils, called a médersa (official).

The natives cultivate ground-nuts, millet, maize, rice, cotton, sesame; other products are rubber, gum arabic and kariti. In 1932 the colony possessed 1,147,200 herd of cattle, 57,260 horses, 133,104 asses, and 4,153,070 sheep and goats.

Native industries comprise pottery, brick-making, jewellery, weaving, leather-making. Chief imports are cottons, food-stuffs, automobiles, petrol, building material, sugar, salt, beer; total in 1933, 19,083,910 francs. Chief exports are ground-nuts, cattle, gum, kopak, skins, cotton, wool, sisal, kariti and wax; total in 1933, 5,630,073 francs.

There is a very complete system of telegraphs throughout the Colony from Kayes to Niamey, Zinder, and Lake Tchad.

Since the completion of the section from Thiès to Kayes (January, 1924), French Sudan is connected with the coast by a railway 760 miles in length, stretching from Dakar to Koulikoro by way of Thiès, Kayes and Bamako. For about seven months in the year small steamboats perform the service from Koulikoro to Timbuktu and Gao, and from Bamako to Kourroussa.

Wireless telegraph connects Kabara, Kidal and Bamako with the Eiffel Tower in Paris, and with Dakar, Rufisque, Conakry, Abidjan, Kotonu, Brazzaville.

Mauritania, formed into a Protectorate in May, 1903, converted into a special 'Civilian Territory' in October, 1904, became a Colony on January 1, 1921, with a Lieutenant-Governor at its head. It consists of the districts of Trarza, Brakna, Gorgol, Assaba, Guidimaka, Adrar. Levrier Bay, Akjoujt, and Tagant, with a total area of 347,400 square miles. The native population (census, January, 1934) numbers 351,625, mostly Moorish Mussulmans; European population, 283 (French, 236). The northern limit of the Colony is approximate, and the foregoing area is obtained by taking the latitude 23° 3′ N. as the northern boundary.

The budget of the Colony for 1934 was 18,138,600 francs.

The Colony of the Niger was formed by a decree of October 13, 1922. By a decree dated December 28, 1926, the circle of Say and part of the circle of Dori were transferred from the Colony of Upper-Volta to the Colony of the Niger. On January 1, 1933, other portions of Upper Volta were added to it. Estimated area, 490,490 square miles; population (December 31, 1933), 1,721,331 (Europeans, 428; French, 410). The country is composed of a zone in the north, which is largely desolate country; a central strip which is wooded; and the southern zone, richly wooded and abounding in cattle. On January 1, 1934, there were 67,320 horses, 844,047 oxen, 2,595,589 sheep and goats, 158,433 asses, 46,216 camels. In the southern zone rice, cotton, wheat, tobacco, maize, barley and indigo can be produced. In 1933 the chief agricultural products were, millet (542,143 tons), earth-nuts (13,600 tons), manioc (31,440 tons), dates (2,600 tons), and beans (97,235 tons). The whole colony lacks water, with the exception of (1) the western districts which are watered by the Niger and its tributaries, (2) part of the southern zone where there are a number of wells, (3) the extreme south-east touching Lake Tchad. Imports in 1933 were 9,891,324 francs, and exports, 15,990,412 francs. Local budget in 1934, 26,895,000 francs. Niamey is the capital.

MANDATED TERRITORIES IN AFRICA: TOGO AND CAMEROON.

Togo.—Togo, the former German Colony, lies between the Gold Coast Colony on the west and French Dahomey on the east. It was surrendered unconditionally by the Germans to British and French forces in August, 1914, and is now divided between the French and British. The Mandate was approved by the League of Nations on July 20, 1922. Of the total area of 33,700 square miles, the French have obtained about two-thirds, 21,893 square miles, the boundary running from the north-east in a generally south-east and south direction to Lomé, in such a manner that no part of the coast is included in the British sphere. Lomé (population in 1933, 10,600 natives and 300 Europeans) is the seat of the administration. The total population of the whole of Togo in 1933 was 753,300 natives and 512 Europeans.

The southern half of Togoland is peopled by natives using 30 different languages, of which the principal is Ewe—these may be regarded as an offshoot of the Bantu peoples. The northern half contains, ethnologically, a totally different population descended largely from Hamitic tribes and speaking in all 16 languages, of which Dagomba and Tim are the most important. The majority of the natives are pagans, but many profess Mohammedanism,

while Christianity has, latterly, been making some progress in the coast districts. In 1932, 47,000 natives had adopted the Roman Catholic, and 13,500 the Protestant faith.

In 1933, there was 1 high school at Lomé with 28 pupils; 2 boarding-schools (32 pupils); 1 school for European children with 25 pupils; 1 professional school at Sokodé (42 pupils); 1 normal school at Lomé (13 pupils); 15 higher schools with 580 pupils; 59 primary schools with 6,088 pupils; 7 adult courses (300 students); 2 domestic science schools (280 pupils). Total number of teachers, 17 European and 97 natives. In 1932, 2,253,200 francs were voted towards public education.

Inland the country is hilly, rising to 3,600 feet, with streams and waterfalls. There are long stretches of forest and brushwood, while dry plains alternate with cultivable land. Maize, yams, cassada, plantains, groundnuts, etc., are cultivated by the natives; oil palms, caoutchouc, and dyewoods grow in the forests; but the main commerce is the barter trade for palm oil, palm kernels, coco, rubber and copra carried on with the European factories. There are considerable plantations of oil and coco palms, coffee, coco, kola, and cassada. During recent years the natives have been increasingly engaged in the cultivation of cocoa and cotton. Production of cotton amounted to 1,419 metric tons in 1931, 1,282 metric tons in 1932, and 1,037 metric tons in 1933. Production of cocoa amounted to 7,679 metric tons in 1931, 6,137 metric tons in 1932, and 6,986 metric tons in 1933. Other products in 1933 were, palm oil, 388 metric tons; palm kernels, 3,497 metric tons. In the Sokodé and Sansane-Mangu districts in the French sphere there are about 65,000 head of cattle; in some districts horses of small size are bred. Native industries are: weaving, pottery, smith-work, straw-plaiting, wood-cutting, etc. There is no mining by Europeans, but the natives in the Sokodé and Klouto districts smelt iron, in which this Colony is very rich. For 1933, imports amounted to 41,605,232 francs, and exports to 27,353,970 francs. The principal exports were, palm kernels, 3,497,403 francs; cocoa, 13,972,442 francs; ginned cotton, 3,628,890 francs; copra, 1,391,792 francs; dried fish, 1,268,918 francs. The local budget for 1933 balanced at 34,127,500 francs. There was also a railway budget, 11,419,500 francs; and a budget for public health and native medical services, 4,160,000 francs.

There are good roads, connecting the more important centres of the Colony. There are three railways connecting Lomé with Anecho (Little Popo) (27 miles), with Palime (74 miles), and with Blitta (185 miles *via* Atakpamé, 103 miles); total, 286 miles, with 5 stations and sub-stations. There are 13 post and telegraph stations and 4 sub-stations, connected by telegraph and telephone with the Gold Coast Colony, French Dahomey, and with Europe.

The port of Lomé has a wharf with a capacity of 600 tons of traffic daily. At Anecho the embarkation is made by means of surf boats. In 1933, 331 vessels cleared at the two ports.

Cameroon.—The former German Colony of Kamerun, including the area of French Equatorial Africa ceded by France to Germany, was occupied by French and British troops in 1916. The greater portion of the territory has been placed under French administration, and a strip on the southern border of Nigeria under British. The total area allotted to France amounts to 166,489 square miles, excluding the 107,270 square miles ceded to Germany in 1911, which is now included in French Equatorial Africa. Native population in 1933 was 2,296,457. The Europeans numbered 2,038, of whom 805 were children. The portion of Cameroon placed under the Mandate of France by the Treaty of Versailles has, by decrees of March 23, 1921, and February 21 1925, been constituted an autonomous territory both

administratively and financially. The seat of government is Yaoundé (population, 1933, 6,190). In 1933, there were 1 high school at Yaoundé (77 pupils), 7 regional schools (2,248 pupils), 57 village schools (4,833 pupils), 2 schools for domestic science (90 pupils), 2 urban schools (23 pupils), 5 professional schools, 1 kindergarten school (40 pupils) and 1 school for the sons of native chiefs. There were 23 European teachers and 145 native teachers. There were also 71 private schools with 8,769 pupils and 146 teachers. The budget (1934) provided for 1,553.531 francs for public education. General budget for 1933 showed 57,291,141 francs for receipts and 54,464,719 francs for expenditure. Chief products are ground-nuts, palm oil, almonds, hides, timber, cacao and ivory. In 1932, there were 504,000 oxen; 19,500 horses; 12,650 asses; 320,000 sheep; 346,000 goats; and 50,000 pigs. Imports in 1933 amounted to 75,263,000 francs, and exports to 77,562,000 francs. In 1933, 551 vessels entered at the ports of Douala, Kribi, Campo and Garoua, and 554 vessels cleared. The country has 2,795 miles of roads, and 314 miles of railway.

Commissioner.—M. Repiquet (July, 1934).

AMERICA.

GUADELOUPE AND DEPENDENCIES.

Guadeloupe, situated in the Lesser Antilles, consists of two islands separated by a narrow channel, called 'Rivière Salée.' That on the west is called Guadeloupe proper, the principal town of which is Basse-Terre, the capital of the colony, and that to the east Grande-Terre; they have a united area of 1,380 square kilometres (532 square miles), and a circumference of 275 miles. There are five dependencies consisting of the smaller islands, Marie Galante, Les Saintes, Désirade, St. Barthélemy, and St. Martin; the total area with these is 688 square miles. The colony is under a Governor and an elected council, and is represented by a senator and two deputies. Population (1932) 267,407. Instruction (1932–33) is given in 1 lycée at Pointe-à-Pitre, with 497 pupils, a junior school at Basse-Terre with 86 pupils, and a secondary course for girls at Pointe-à-Pitre, with 360 pupils, and 129 public and private elementary schools. The public elementary schools have 420 teachers and 20,158 pupils, and the private have 1,308 pupils. The seat of government is Basse-Terre (9,268 inhabitants). Pointe-à-Pitre (30,465 inhabitants) has a fine harbour. Revenue and expenditure balanced at 66,220,864 francs for 1932. Outstanding debt, December 31, 1932, 3,812,282 francs.

Chief products are sugar, bananas, coffee, cocoa, and rum. For local consumption there are grown sweet potatoes, manioc, tobacco, indian corn, and vegetables.

In 1933, the imports were 150,200,000 francs; exports, 188,200,000 francs. The principal exports in 1933 were sugar, 40.954 tons; coffee, 293 tons; rum, 112,624 hectolitres; cacao, 124 tons; vanilla, 4,867 kilogrammes; bananas, 16,439 tons. Guadeloupe is in direct communication with France by means of two steam navigation companies. A new wireless station at Destrellan was opened in 1918. It is connected with each of the dependencies. In 1933 there were 67 post offices and 9 wireless stations. Within the islands traffic is carried on by means of roads, of which there were 344 miles in 1933. The Bank of Guadeloupe, with a capital of 3,000,000 francs, and reserve funds amounting to 6,122,090 francs, advances loans chiefly for agricultural purposes. The Royal Bank of Canada has also established a branch. There is likewise another bank, the Crédit Guadaloupéen, but this is a private institution; the Banque de la Guadeloupe is the official banking institution of the colony, enjoying the privilege of issuing bank notes. Silver coin has disappeared from circulation; nickel treasury tokens (bons) of 1 franc and of 50, 25, 10 and 5 centimes are authorised up to total emission of 1,000,000 francs.

British Consul at Guadeloupe.—J. T. Devaux.

GUIANA.

The colony of French Guiana, on the north-east coast of South America, is administered by a Governor, assisted by a Privy Council of 7 members. The colony has a Council-General of 8 members elected by French citizens resident in Guiana, and is represented in the French Parliament by one deputy. Area about 34,740 square miles, and population, census of 1931, 22,169. Cayenne, the chief town, has a population of 10,744, and the

other 14 communes have 11,425. These figures are exclusive of the population of the penal settlement of Maroni, of the floating population of miners without any fixed abode, as also officials, troops, and native tribes. At Cayenne there are a court of first instance, and a superior court of appeal, with jurisdiction in other localities. The military force consists of 310 officers and men of the Colonial Infantry. Primary education is given gratuitously since 1889 in lay schools for the two sexes in the communes and many villages. There is also (1933–34) a college for secondary (103 pupils) and higher primary education (42 students), and a normal course for teachers (28 students). There are also several Congregational schools (650 pupils) and a number of private schools (102 pupils). The school population in 1933–34 was 3,494. The penal settlement also has 3 schools with 253 pupils. The budget for 1931 balanced at 16,755,676 francs. The country has immense forests rich in many kinds of timber. There is little agriculture in the colony; only about 7,900 acres are under cultivation. The crops consist of rice, maize, manioc, cocoa, coffee, and sugar-cane. The most important industry is gold-mining (placer). The exports consist of cocoa, phosphates, various woods, gold, fish glue, rum, rosewood essence, balata, and hides. The total imports in 1933 were valued at 36,946,042 francs, and the exports at 24,274,703 francs. There are three ports—Cayenne, Saint-Laurent-du-Maroni, and Oyapoc. Cayenne and Saint-Laurent are visited once a month by a packet boat of the Compagnie Général Transatlantique. There is also steamboat communication between the capital and the other towns of the colony. There are three chief and many secondary roads connecting the capital with various centres of population in the interior with motor-car services. There is a telegraph system connecting Cayenne with Macouria, Kourou, Sinnamary and Iracoubo, as well as with the penal settlement. There are wireless stations at Cayenne, Oyapoc, Regina, St. Laurent, La Forestière.

Since 1854, Cayenne has had a penal settlement for habitual criminals and convicts sentenced to hard labour. In 1931 the penal population consisted of 5,954 men.

The Bank of Guiana, under Government control, with a capital of 1,200,000 francs, with statutory reserve fund amounting to 300,000 francs, advances loans for agricultural and other purposes.

MARTINIQUE.

The colony is under a Governor assisted by a Privy Council. An elected General Council votes the Budget, and elective municipal councils administer the communes. It is represented by a senator and two deputies in the French Chamber. Area 385 square miles, divided into 32 communes; population (census 1931) 234,695. The military force consists of one company of infantry and a battery of artillery. There is a law school (at Fort-de-France) with (1931) 65 students; a lycée for boys, with 1,080 pupils; a high school for girls with 1,000 pupils; primary schools, with 24,000 pupils (including 7 private schools); a commercial school with 80 pupils, and a school of arts and crafts (89 pupils). Chief commercial town, Fort-de-France (population, 43,338). The budget for 1933 balanced at 97,665,730 francs. Sugar and rum are the chief productions, then come cocoa, pine-apple, bananas, coffee and tobacco. There are 40,000 hectares under sugar-cane and food-producing crops. There are 19 sugar works with distilleries attached, 148 agricultural distilleries, 2 industrial distilleries devoted to the production of rum, and 12 industrial establishments. In 1933, 48,215 metric tons of sugar, 3,110,404 gallons of rum, 9,396 metric tons of bananas, 497 metric tons of preserved pineapple and 171 metric tons of cocoa beans were

exported. The total imports in 1933 were valued at 191,821,000 francs, and the exports at 200,505,000 francs. Vessels entered in 1933, 723; vessels cleared, 731. The island is visited regularly by the steamers of French and American companies. For local traffic there are subsidised mail coaches and motor-cars; and subsidised steamers ply along the coast. The colony is in telegraphic communication with the rest of the world by telegraph cables and wireless. The Bank of Martinique at Fort-de-France with a capital of 3,000,000 francs, the Crédit Martiniquais with a capital of 10,000,000 francs, and a branch of the Royal Bank of Canada advance loans for agricultural and other purposes.

ST. PIERRE AND MIQUELON.

The largest islands of two small groups close to the south coast of Newfoundland. Area of St. Pierre group, 10 sq. miles; population in 1931, 3,743; area of Miquelon group, 83 sq. miles; population, 578; total area, 93 sq. miles; total population, 4,321. An administrator organises and regulates the various branches of the public service. He is assisted by a consultative council of administration and municipal councils. Chief town, St. Pierre. Primary instruction is free. There are 3 public schools for boys, and 3 for girls, with (in all) 16 teachers and 899 pupils. There are, besides, infant schools, 'salles d'asile,' frequented by 140 children. There are a private boarding school and two private schools.

The islands, being mostly barren rock, are unsuited for agriculture. The chief industry is cod-fishing Imports in 1933, 115,000,000 francs; exports, 138,000,000 francs. The imports comprise textiles, salt, wines, foodstuffs, meat; and the exports, cod, dried and fresh, and fish products. St. Pierre is in regular steam communication with North Sydney and Halifax; and is connected by telegraph cable with Europe and the American continent. Local budget for 1934: Receipts, 8,370,260 francs; Expenditure, 8,370,260 francs.

AUSTRALASIA AND OCEANIA.

NEW CALEDONIA AND DEPENDENCIES.

Governor.—B. *Siaolous* (1933).

New Caledonia is administered by a Governor assisted by a Privy Council consisting of the Secretary-General, the Procureur-Général (the head

of the Judicial administration), the Superior Commandant of the Troops, the head of the Department of Domains and Colonisation, and two notables of the colony appointed by the President of the Republic. The colony has also an elective Council-General of 15 members. Nouméa, the capital, has a municipality; other centres of population are locally administered by municipal commissions.

The island is situated between the 20° 1′ and 22° 26′ parallels south latitude, and 161° 30′ and 164° 40′ east longitude. It has a total length exceeding 248 miles and an average breadth of 31 miles. Area, 8,548 square miles. According to the census of July 1, 1931, the population was 57,165, of whom 15,795 were free, 623 of convict origin, and 28,502 Melanesians and Polynesians. Nouméa had (1931) 10,708 inhabitants. The immigrants from France are not numerous. Other immigrants (July 1, 1931) were 6,198 Javanese, 5,026 Tonkinese, 40 Indians, and 164 islanders from the New Hebrides. Primary instruction is provided in public and also in private elementary schools, the former being assisted by the local budget. In 1933, there were 48 public and private primary schools with 2,604 pupils (1,303 being girls), and 67 native schools with 3,735 pupils. In Nouméa the 'Collège La Pérouse' gives classical tuition to 200 pupils and professional instruction (iron and wood) to 37 pupils. Local budget for 1933 balanced at 29,579,175 francs. Of the total area one-third is not cultivable; about 1,600 square miles are pasture land; about the same area is cultivated or cultivable; and about 500 square miles contain forest which is being worked. The land is divided into 2 domains: that of the state (in which gratuitous concessions may be made); and that of the native reserve. The chief agricultural products are coffee, copra, cotton, manioc (cassava), maize, tobacco, bananas, pineapples. There are 100,000 cattle, 5,000 sheep, 8,000 goats, 9,000 horses, and 7,000 pigs. The mineral resources are very great; chrome, cobalt, nickel, iron, and manganese abound; antimony, mercury, cinnabar, silver, gold, lead, and copper have all been obtained. The nickel deposits are of special value, being without arsenic. About 151,000 hectares of mining land are owned, and 109,000 hectares have been granted for prospecting. In 1933, the blast furnaces produced 5,978 tons matte of nickel valued at 29,655,000 francs. Local industries are developing; there are a grain storage and cleaning depôt, meat preserving works, barking mills for coffee and cotton, and two blast furnaces melting nickel ore. A hydro-electric factory was established in 1926. The imports in 1933 were valued at 56,999,000 francs, and the exports at 47,999,000 francs. The imports comprise wine, coal, flour, rice; the exports, minerals, coffee, copra, cotton and preserved meats. In 1933, 109 vessels of 277,526 tons entered and 106 of 270,862 tons cleared at the ports of New Caledonia. Of those which entered, 77 (136,023 tons) were French. Nouméa is connected once monthly with Sydney in New South Wales by regular steamers sailing monthly, and by other vessels sailing irregularly. There is a mail service by steamer along the coast. There is a narrow-gauge railway (single line) from Nouméa to Paita, about 20 miles long. The proposed extension to Bourail, 105 miles from Nouméa, has, however, been postponed. There is a daily motor road service for passengers from Nouméa to Voh on good roads; the rest of the Colony's roads are only suitable for horseback transport. There are 825 miles of telegraph line and 1,345 miles of telephone line.

Dependencies of New Caledonia are:

1. The Isle of Pines, 30 miles to the south-east, with an area of 58 square miles and a population of about 600.
2. The Wallis Archipelago, north-east of Fiji, with an area of 40 square

miles and about 4,500 inhabitants. The islands were placed under the French protectorate in 1842. There is a French Resident, and the archipelago is in regular communication with Nouméa. Budget for 1934, 386,612 francs.

3. Futuna and Alofi, south of the Wallis Islands, with about 1,500 inhabitants, were placed under French protectorate in 1888.

4. The Loyalty Islands, 60 miles east of New Caledonia, consisting of 3 large islands, Maré, Lifou, and Uvéa, and many small islands with a total area of about 800 square miles. The chief culture in the islands is that of coconuts; the chief export, copra.

5. The Huon Islands, 170 miles north-west of New Caledonia, a most barren group.

The **New Hebrides**, in accordance with the Anglo-French convention of February (ratified in October), 1906, are jointly administered by the High Commissioners of His Britannic Majesty and the French Republic. In 1914 an Anglo-French conference was appointed to devise means of remedying the defects of the condominium. In 1933 there were 289 French and 214 English. There are French and English courts, and a mixed court with a judge foreign to both nations. Local budget for 1934, 7,410,100 francs. Exports in 1933 amounted to 8,908,136 francs, of which 7,628,085 were French trade, and 1,280,051 francs British trade; imports were 10,607,515 francs, of which 7,043,826 francs were in French trade, and 3,563,689 in British trade. Maize, coffee, cotton, cocoa, vanilla, and coconuts are grown, and are the chief articles of export. In some places sulphur is abundant. In 1933, 60 vessels of 158,806 tons entered, and 60 vessels of 161,467 tons cleared the ports. Of those entering 14 were British (34,615 tons), and 37 French (102,922 tons). Of those clearing 14 were British (34,615 tons), and 37 French (105,583 tons).

FRENCH ESTABLISHMENTS IN OCEANIA.

Governor.—Michel-Lucien *Montagne* (appointed June 17, 1933).

These, scattered over a wide area in the Eastern Pacific, are administered by a governor with an Administrative Council consisting of certain officials, the *maire* of Papeete, and the Presidents of the Chambers of Commerce and Agriculture. The establishments consist of the **Society Islands**, the most important of which are Tahiti and Moorea, the former with an area of about 600 square miles and (census 1931) 16,781 inhabitants, the latter with an area of 50 square miles and 2,011 inhabitants; the principal products are phosphate (annual production, 80,000 metric tons) and copra (20,000 metric tons). Other groups are the **Marquezas Islands**, with a total area of 480 square miles and 2,283 inhabitants, the two largest islands being Nukahiva and Hivaoa; the **Tuamotu group**, consisting of two parallel ranges of islands from King George's Island on the north to Gloucester Island on the south, their total population being 4,771; the **Leeward Islands** (Iles sous le Vent) (8,705 inhabitants), of which the more important are Huahiné (pop. 1,676), Raiatéa and Tahaa (pop. 5,416), and Bora-Bora-Maupiti (pop 1,586); the **Gambier, Tubuai,** and **Rapa** Islands; the Gambier group (of which Mangareva is the principal) having six square miles of area and 501 inhabitants; the Tubuai (or southern) Islands, of which Rurutu is the largest, Raivavae (or Vavitu), Rimatara, and, far to the south, Rapa, having together an area of 115 square miles and 3,063 inhabitants; **Makatea**, 1,160 inhabitants; Island of Maiao, 117 inhabitants. The total area of the Establishments is estimated at 1,520 square miles, and their population, according to the census of 1931, was 40,392, of whom 29,757

were natives. There were 5,290 French, 307 English, 4,059 Chinese, 169 Americans, 15 Germans, 10 Chileans, 2 Belgians, 1 Dutch, 3 Spanish, 5 Italians, 319 Indo-Chinese, 41 Japanese, 14 Danes, 15 Swedes, 5 Russian, 7 Swiss, 43 Czech, 1 Austrian, 2 Portuguese, 7 Norwegians. In 1903 it was decreed that separate islands or groups should no longer be regarded as distinct Establishments, but that all should be united to form a homogeneous colony. Budget for 1933 balanced at 15,400,000 francs.

The most important of the islands is **Tahiti**, whose chief town is Papeete with 7,061 inhabitants (1931 census), of whom 4,848 are French. A higher primary school, with a normal school, has been established at Papeete, and there are (1925) 63 primary schools, with 91 teachers and 3,750 pupils. Pearls and mother-o'-pearl are important products. The island is mountainous and picturesque with a fertile coastland bearing coconut, banana, and orange trees, sugar-cane, vanilla, and other tropical fruits, besides vegetables grown in temperate climates. The chief industries are the preparation of copra, sugar, and rum. Value of imports (1932) 24,717,626 francs, exports 21,011,298 francs. The chief imports are tissues, wheat, flour, metal work. The chief exports were copra (19,044 tons), mother-o'-pearl (215 tons), vanilla (55 tons), and phosphates. The export of phosphates in 1929 was 250,914 tons; in 1930, 172,059 tons; in 1931, 114,432 tons; in 1932, 120,649 tons. The New Zealand company (with a French subvention) has a monthly service connecting San Francisco, New Zealand and Australia with Papeete. The shipping between the islands is carried on by sailing and motor boats, and by a regular service of the 'Compagnie des Messageries Maritimes.'

GERMANY.

(DEUTSCHES REICH.)

ON November 9, 1918, the abdication of the German Emperor was announced, and from that date Germany became a Republic.

(For the constitution of the Empire and its rulers *see* THE STATESMAN'S YEAR-BOOK for 1918, pp. 881–884.)

Constitution and Government.

The Council of People's Commissioners in Berlin took over the Government of the country; the reigning princes of the Federal States were either deposed or abdicated, the existing Imperial Parliament was declared dissolved, and arrangements were made for summoning a National Assembly. The elections for the body (for which all Germans, men and women, over 20 years of age voted) were held in January, 1919, and the National Assembly was summoned to meet at Weimar on February 6. On July 31, 1919 the Constitution of the Republic was adopted by the National Assembly at Weimar, and promulgated on August 11, 1919. (For details of the Weimar Constitution, *see* THE STATESMAN'S YEAR-BOOK, 1933, p. 927.) On February 11, 1919, the National Assembly elected the first President of the Republic, Friedrich Ebert, who held office from February 11, 1919, until his death on February 28, 1925. He was succeeded by Field-Marshall Paul von Hindenburg (elected April 26, 1925; re-elected April 10, 1932) who died on August 2, 1934. On that day a law was published in which the offices of President and Chancellor were united in the person of Adolf Hitler, who expressed the wish to be known as "Führer (Leader) and Chancellor."

The Cabinet, originally appointed on January 30, 1933, is composed as follows:—

Führer and Chancellor.—Adolf *Hitler.*
Minister of the Interior.—Dr. Wilhelm *Frick.*
Minister for Foreign Affairs.—Konstantin Count von *Neurath.*
Minister of Defence.—General Werner von *Blomberg.*
Minister of Finance.—Ludwig Count Schwerin von *Krosigk.*
Minister of Food and Agriculture.—Dr. Walther *Darré.*
Minister of Economic Affairs.—Dr. Hjalmar *Schacht* (August 2, 1934).
Minister of Labour.—Franz *Seldte.*
Minister of Communications and Posts.—Paul Baron von *Eltz-Rübenach.*
Minister for Aviation.—Hermann *Göring.*
Minister of Justice.—Dr. Franz *Gürtner.*
Minister of Learning and Education.—B. *Rust* (April 30, 1934).
Minister for National Enlightenment and Propaganda.—Dr. Joseph *Goebbels.*
Ministers without Portfolio.—Rudolf *Hess*, Hanns *Kerrl*, and Dr. Hanns *Frank* (Dec. 19, 1934).

The Reichstag elected on March 5, 1933, which met on March 23, virtually, though not *de jure*, set aside the Weimar Constitution by giving absolute power to the Chancellor and his Cabinet. The Enabling Act of March 24, 1933, provides that the Cabinet may make laws by ordinance, even including such laws as are not in accord with the Weimar Constitution (which has not yet been formally abrogated).

Deriving authority from the Enabling Act, Chancellor Hitler and his Cabinet have unified Germany, but at the same time have set up a personal dictatorship of the Chancellor, in which all the activities of the country—political, economic, industrial, commercial, cultural, etc.—have been *gleichgeschaltet* (totalitarianized), freedom of speech and of thought, and of the press abolished, equality before the law limited by the so-called 'Aryan paragraph' which arbitrarily grants full citizen rights only to 'Aryans,' and personal freedom from arrest, owing to the activities of an officially recognised secret police, curtailed. No political parties are

tolerated except only the National Socialist German Workers' (Nazi) Party (*Nationalsozialistische Deutsche Arbeiterpartei*). There is only one Legislative Assembly in Germany, the Reichstag, elected according to the provisions of the Weimar Constitution, by universal, equal, direct and secret votes of male and female voters, and composed entirely of the supporters of Hitler, who insists on the principle of Leadership in all matters appertaining to the life of the country, from the highest to the least significant.

Accordingly, the working constitution of Germany provides for a 'Leader' and *Reichskanzler*, who is the supreme commander of the Army and who appoints all officials, and is also the 'Leader' in all political activities in Germany, both in the Reich and in the States. By the side of the Chancellor stand the ministers, who together compose the Cabinet, which, within the ambit of the Enabling Act possess unlimited powers of legislation. The *Reichstag* enjoys only advisory functions. In matters of supreme import to the nation, a Referendum is provided for.

The Unification Act of April 7, 1933, brought the Federal States under the rule of *Reichsstatthalter* or Governors directly responsible to Herr Hitler. According to the *Statthalter* Law of January 29, 1935, each *Statthalter* may become head of the government of his territorial division. By the law reforming the Reich, of February 1, 1934, the sovereign rights formerly possessed by the Federal States passed into the hands of the Reich Cabinet; the *Reichsstatthalter* passed under the jurisdiction of the Minister of the Interior, and the Reich Cabinet abrogated to itself the promulgation of new constitutional laws for the Federal States. Germany is thus a unified and centralized State and the seventeen Federal States (*Länder*) are now merely administrative units.

Area and Population.

I. Progress and Present Conditions.

The following table gives the area and population of the present States (*Länder*) of Germany in the order of their magnitude, embodying the returns of the census of June 16, 1933 :—

States of the Empire	Area English sq. miles	Population June 16, 1933			Pop. per sq. mile 1933
		Male	Female	Total	
Prussia (excluding the Saar and including Waldeck[1])	113,012	19,452,471	20,481,540	39,934,011	353
Bavaria (excluding the Saar)	29,336	3,721,090	3,960,494	7,681,584	262
Württemberg	7,530	1,306,531	1,389,793	2,696,324	358
Baden	5,817	1,167,830	1,245,121	2,412,951	415
Saxony	5,785	2,484,098	2,712,554	5,196,652	898
Mecklenburg[2]	6,197	399,789	405,424	805,213	130
Thuringia	4,540	806,022	853,488	1,659,510	365
Hesse	2,969	698,038	731,010	1,429,048	480
Oldenburg	2,480	285,044	288,809	573,853	232
Brunswick	1,417	248,412	264,577	512,989	361
Anhalt	893	177,138	187,277	364,415	408
Lippe	469	86,304	89,234	175,538	374

[1] Waldeck was absorbed by Prussia on April 1, 1929.
[2] Mecklenburg-Schwerin and Mecklenburg-Strelitz were united on January 1, 1934.

States of the Empire	Area English sq. miles	Population June 16, 1933			Pop. per sq. mile 1933
		Male	Female	Total	
Schaumburg-Lippe.	131	24,465	25,490	49,955	382
Hamburg . .	160	581,988	636,459	1,218,447	7,588

[1] The figures for the population of the Saar District are estimates, based on the natural increase as at June, 30, 1933.

According to the Treaty of Versailles (June 28, 1919) Germany agreed to the following territorial arrangements:—(1) Alsace-Lorraine ceded to France, (2) the greater part of the Provinces of West Prussia and Posen ceded to Poland, (3) a part of Upper Silesia and of East Prussia likewise to Poland, (4) a portion of Upper Silesia to Czechoslovakia, (5) Memel to Lithuania, (6) Danzig, a Free State under the protection of the League of Nations, (7) Eupen and Malmedy to Belgium, (8) a part of Schleswig to Denmark.

Provision was made in the Treaty to settle the ultimate fate of the following areas by *plébiscite*:— (1) The Saar Basin (after 15 years), (2) Schleswig (in two zones), (3) districts in Southern East Prussia, in West Prussia and in Upper Silesia. Results of the *plébiscites*:—Schleswig (March, 1920), northern zone for Denmark, southern zone for Germany; East and West Prussia (July, 1920) for Germany; Upper Silesia (March, 1921) for Germany.

An estimate of the actual areas and populations (according to the Census of 1910) lost to pre-war Germany has been made as follows: Alsace-Lorraine, 5,607 square miles, population 1,874,014; ceded to Belgium, 400 square miles, population 60,003; ceded to Poland, 17,816 square miles, population 3,854,961; Memel, 1,026 square miles, population 141,238; Danzig, 739 square miles, population 330,630; ceded to Denmark, 1,542 square miles, population 166,348; ceded to Czechoslovakia, 122 square miles, population 48,446; total 27,252 square miles, population 6,475,640.

The Saar Basin, which was placed under the government of the League of Nations for 15 years, has an area of 738 square miles and a population (Census, July 19, 1927) of 770,030. The plebiscite for determining the ultimate fate of the Saar Basin was taken on January 13, 1935. There voted for return to Germany, 476,089 (89 per cent. of the qualified electorate); for joining France, 2,083 (0·4 per cent.); and for the *status quo*, 46,613 (8 per cent). The Council of the League accordingly restored the Saar to Germany on March 1, 1935.

The following table shows the increase in population at various periods, with the annual rate of increase per cent.

Year	Increase	Annual Rate per cent.	Year	Increase	Annual Rate per cent.
1871 [1]	970,171	0·60	1900	4,087,277	1·56
1880	4,175,269	1·13	1905	4,274,100	1·52
1885	1,621,643	0·72	1910	4,284,715	1·41
1890	2,572,766	1·10	1925	4,612,192 [2]	0·55
1895	2,851,431	1·15	1933	2,807,842 [2]	0·56

[1] Since 1867 [2] Excluding the Saar.

The number of foreigners in Germany, according to the census of June 16, 1925, was 957,096, or 15·3 per 1,000 of the total population of the country. Poles numbered 259,804, Austrians 128,859, Czechoslovaks 222,521, British 6,977, and French 7,290.

According to the census of 1933, 32,296,000 inhabitants of Germany were engaged in gainful occupations, as follows:—agriculture and forestry, 9,343,000 (28·9 per cent.); industry, 13,051,000 (40·4 per cent.); commerce, 5,931,000 (18·4 per cent.); professions, 2,701,000 (8·4 per cent.); domestic service, 1,270,000 (3·9 per cent.).

II. Movement of the Population.

The following table shows the movement of the population of the Republic during four years:—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1930	562,648	1,163,381	35,931	140,993	746,781	+416,600
1931	515,403	1,063,921	32,151	126,383	757,967	+305,954
1932	509,597	1,007,798	29,588	118,446	729,208	+278,590
1933	630,826	984,880	27,965	—	758,767	+226,113

Of the children born in 1932, 520,494 were boys, and 487,304 girls; in 1931, 549,484 were boys, and 514,437 girls.

The number of divorces in Germany was in 1930, 40,722 being 63·3 per 100,000 inhabitants; in 1931, 39,971 or 61·8; in 1932, 42,202 or 65·0.

The following table shows the annual number of German emigrants for five years:—

Year	Total	Destination						
		European Countries	United States	Brazil	Other American Countries	Africa	Asia	Australia
1929	48,734	293	38,188	1,324	8,502	347	34	46
1930	37,399	200	25,427	1,167	9,195	1,323	29	58
1931	13,644	131	8,796	765	3,290	632	12	18
1932	10,325	70	7,258	646	2,232	85	6	28
1933	12,866	133	10,037	829	1,645	187	10	25

III. Principal Towns.

German towns are distinguished as large towns (with 100,000 inhabitants and upwards); medium towns (20,000–100,000 inhabitants); small towns (5,000–20,000 inhabitants), and country towns (2,000–5,000 inhabitants). In 1933, 2 towns had over 1,000,000 inhabitants; 22 others over 250,000; 29 others over 100,000; 47 between 50,000 and 100,000; and 164 between 20,000 and 50,000. According to the results of the census of June 16, 1933, the population of the principal towns at that date was:—

Town	State	Pop. (June 16, 1933)	Town	State	Pop. (June 16, 1933)
Berlin[1]	Prussia	4,242,501	Lübeck	Lübeck	129,427

Religion.

According to the census of June 16, 1933, there were in Germany 40,865,151 Protestants (62·7 per cent. of the total population), 21,172,087 Catholics (32·5 per cent.), 34,927 other Christians (0·1 per cent.), 499,682 Jews (0·7 per cent.), and 2,646,614 adherents of other professions of religion (4·0 per cent.).

During 1934 efforts were made to unite the Evangelical Churches in the German Evangelical Church under the direction of a Reich bishop, 'called' by the National Synod at the nomination of the heads of the regional Churches. The National Synod was to be formed of 60 members, 40 sent by the regional Churches from their own synods and 20 to be chosen from persons 'who have prominently proved themselves in the service of the Church,' but by March 1935 the efforts had made little progress and the regional churches retained their independence.

Within the Protestant churches the 'German Christians' are seeking to introduce into the Church the principle of the Leader or dictatorship, while the German Confessional Movement (*Deutschgläubige Bewegung*), with its strongly marked heathen tendencies, is negotiating with the government for recognition as a third religious community, side by side with Protestantism and Catholicism.

There are 6 Roman Catholic archbishoprics, 17 suffragan bishoprics, 1 bishopric immediately subject to Rome, 2 parts of bishoprics attached to non-German bishoprics, and 1 apostolic administration. The 'Old Catholics' have a bishop at Bonn. A Concordat between Germany and the Holy See was signed on September 10, 1933, but has not yet (March 1935) been ratified.

The Jewish congregations are federated in the 'Deutsch-Israelitischer Gemeinde-Bund.'

Education.

Education is general throughout Germany, all children between the ages of 6 and 14 being bound to attend some recognized school. The teachers in German schools are required to hold a Government certificate, and to have undergone a period of training and probation.

According to a school census taken in 1931–32 there were in that year 52,961 public elementary schools in Germany with 190,281 teachers (141,584 males and 48,697 females), and 7,590,073 pupils (3,842,611 boys and 3,747,462 girls). There were in 1931–32, 679 private schools with 49,828 pupils (20,903 boys and 28,925 girls).

According to the law of April 28, 1920, German children are all bound to receive a four years' course of instruction in the 'Foundation School'

(*Grundschule*). The next highest school for elementary education is the 'People's School' (*Volksschule*), which, like the *Grundschule*, is supported partly by the State (mostly for *personnel*), and partly by the municipalities (mostly for school buildings, etc.). Children who have left the *Volksschule* and entered on some calling must by law attend Continuation Schools or Trade Schools until they are eighteen years of age. In 1931–32 there were 16,462 Continuation Schools with 338,837 scholars, and 5,171 Trade Schools with 1,236,373 scholars (829,616 males and 406,757 females). There are also 1,671 public technical schools with 177,731 scholars. Besides the *Volksschule* there is found the 'Middle School' (*mittlere Schule*), which differs from the former in that instruction is provided in English and French. In 1931–32 there were 1,472 *mittlere Schulen* with 11,517 teachers and 229,671 pupils (107,192 boys and 122,479 girls). Apprentices and young people at work must attend Continuation Schools for 6 to 8 hours weekly during working hours.

To prepare for the Universities and for admission into certain professions, there are several kinds of secondary schools with a course of study extending in the main over 9 years. Of these the oldest is the *Gymnasium*, which specializes in classical studies; side by side with this is the *Realgymnasium*, which specializes in mathematics, natural science and modern languages, but also teaches classical subjects. The *Gymnasien* are the most fully developed classical schools; the *Progymnasien* differ from these only in not having the highest classes. The *Oberrealschulen* give instruction in mathematics, natural science and modern languages, but not in classics. Experimentally two other kinds of schools have been established—the German High School (*Deutsche Oberschule*) and the *Aufbauschule*, the former to stress German subjects (besides modern languages), and the latter to provide an intensive and curtailed high school education for the bright scholars of elementary schools.

For girls there are *Lyceen*, *Oberlyceen* and certain other educational institutions which prepare for the universities.

In 1931–32 the number of secondary schools was as follows:—For boys, 1,699 with 530,578 pupils (including 35,628 girls). Total number of teachers, 30,187. For girls, High Schools, 779; with 14,715 teachers and 247,862 pupils (including 849 boys). Other higher schools for girls are attended by 9,365 pupils.

There are 10 fully-equipped Technical High Schools, with the right of granting degrees. They are all aided by the States to which they respectively belong. The statistics for the Summer session 1933 were as follows:—

Schools	Teaching Staff (1933)	Matriculated Students[1] (1933)	Of whom		Schools	Teaching Staff (1933)	Matriculated Students[1] (1933)	Of whom	
			Women	Foreigners				Women	Foreigners

[1] Who have attended lectures.
[2] Including 169 special teachers and excluding 758 assistants.
[3] In addition to 2,016 on leave or excused attendance at lectures, of whom 1,255 were nscribed at the Berlin Technical High School, besides 157 special students.

There are, besides, the following (number of students in 1933 shown in brackets): 2 Veterinary Colleges (1,036), 3 Agricultural Colleges (987), 2 Afforestation Academies (118), 2 Mining Academies (325), 5 Commercial High Schools (3,023), 1 Academy for Practical Medicine (525), 11 Schools of Art (1,490), and 10 Colleges of Music (3,440). There are also 10 Training Colleges for elementary school teachers at the following centres (students in 1933 in brackets):—Beuthen (98), Bonn (76), Dortmund (90), Elbing (132), Frankfort-on-Main (64), Halle (74), Kiel (96), Lauenburg (87), Mainz (423), Rostock (126), making a total of 1,266 students.

There are 23 universities in the German Republic, besides the Philosophical and Theological High Schools at Braunsberg, with 107 students in the summer term of 1933, Paderborn (278), Frankfort-on-Main (217), Fulda (141), Trier (279), Mainz (134), Augsburg (93), Bamberg (127), Dillingen (216), Eichstätt (160), Freising (218), Passau (174), and Regensburg (262), which have only faculties of theology (Roman Catholic) and philosophy (Augsburg has philosophy only).

The following table gives the date of foundation, the number of teachers and students for the summer term of 1933:—

Universities	Professors and Teachers (1933)	Matriculated Students (1933)						
		Theology	Jurisprudence, &c.	Medicine and Dentistry	Philosophy	Mathematics and Natural Science, &c.	Auxiliary Science	Total
Berlin (1809)	875	769	2,804	3,018	1,877	1,522	27	10,017

Of whom Women	71	313	1,515	6,380	5,261	2,641	22	16,132
Of whom Foreigners	—	342	557	1,386	705	402	53	3,445

[1] Including 353 special teachers.
[2] Including 924 students of Veterinary Science.
[3] Exclusive of 3,990 on leave or excused from attending lectures.

In three universities, namely, Freiburg, Munich, and Würzburg, the faculties of theology are Roman Catholic; four are mixed, both Protestant and Roman Catholic—Bonn, Breslau, Münster, and Tübingen; and the rest

are Protestant. Cologne, Frankfort, and Hamburg have no theological faculties.

In the summer term 1934, the number of registered students was 95,667 (82,420 men and 13,247 women).

Justice and Crime.

A uniform system of law courts exists throughout Germany, though, with the exception of the Reichsgericht and the People's Courts, all courts are directly subject to the Government of the special State in which they exercise jurisdiction, and not to the Central Government. The appointment of the judges other than those of the Reichsgericht and the People's Courts is also a State function, and not that of the Central Government.

The lowest courts of first instance are the *Amtsgerichte* (1,646 on January 1, 1933), competent to try petty civil and criminal cases. Cases relating to property in which the amount involved does not exceed 1,000 marks are usually tried by a single judge. In the trial of more serious criminal cases the judge is assisted by two assessors (laymen) (*Schöffengericht*). The *Amtsgerichte* deal also with guardianships, estates and official records. The *Landgerichte* (155 on January 1, 1933) contain both civil and criminal chambers. The former, consisting of three judges, are competent to deal in first instance with all civil cases in so far as they have not been referred to the *Amtsgerichte*, especially with divorces, and also exercise an appellate jurisdiction over the *Amtsgerichte*. For trying commercial cases there are further commercial chambers, consisting of one judge and two laymen. The Criminal Chamber decides as court of first instance in the majority of criminal cases, that is to say, if they do not come within the competence of the *Amtsgerichte*, or the People's Courts, or the *Schwurgerichte*. But even the latter may be brought before the Criminal Chamber at the request of the Public Prosecutor. The Criminal Chamber consists of 3 judges and 2 lay assessors. It also hears appeals from the *Amtsgerichte* in criminal cases. The Lower Criminal Court decides, with one judge and two assessors, in appeal cases from the *Amtsgerichte*. For the trial of capital cases, the *Landgerichte* are transformed into *Schwurgerichte*, consisting of three judges and six laymen. The *Amtsgerichte* and *Landgerichte* have as superior court the *Oberlandesgerichte*. There are twenty-six such courts in Germany. The *Oberlandesgerichte* contain criminal and civil senates consisting of three or five judges. They exercise appellate jurisdiction over the *Landgerichte* in civil cases, and revisory jurisdiction over the 'small chambers' (and in some cases over the 'large chambers') in criminal cases. The total number of judges on the bench in all the courts above mentioned was 10,069 (Jan. 1, 1933). The People's Courts, consisting of five judges, decide in cases of treason. The supreme court is the *Reichsgericht*, which sits at Leipzig, and has 103 judges. This court exercises a revisory jurisdiction over all inferior courts. It has 5 criminal and 7 civil senates, consisting of 5 judges each.

Number of persons condemned after trial, 1931, 566,139; 1932, 566,042.

Special courts exist for all civil disputes arising from the relationship between employers and employed (*Arbeitsgerichte, Landesarbeitsgerichte*, and the *Reichsarbeitsgericht*). Qualified judges are appointed to these judicial bodies and they are attended by representatives of employers and employed. In 1934 there were 452 *Arbeitsgerichte*, 60 *Landesarbeitsgerichte* and the *Reichsarbeitsgericht*. The *Arbeitsgerichte* gave decisions (1933) in 261,530 cases. The *Landesarbeitsgerichte* dealt with 10,774 appeals. The *Reichsarbeitsgericht* received 479 cases for revision.

Public Assistance (including Poor Relief and Welfare for Children and Juveniles).

Before the war the public assistance for the poor was regulated by the law of June 6, 1870 (*Gesetz über den Unterstützungswohnsitz*). At the beginning of this century this law, however, was found insufficient for social work that must accommodate itself to the changed social conditions brought about by the economic development (industrialization, urbanization). When, as a result of the war and the inflation period, substantial parts of the population became distressed, new measures for social welfare had become urgently necessary to meet the economic depression. The various rules and orders in this direction, however, could not be codified uniformly for the whole Reich until after the stabilization of the German currency under the *Verordnung über die Fürsorgepflicht* of February 13, 1924.

The public assistance, in the sense of the law, includes social relief for disabled soldiers, dependents of those killed in the war and those persons who, according to the *Versorgungsgesetze*, are entitled to benefit, for persons in receipt of Invalidity Insurance for wage earners and Salaried Employees' Old Age Insurance (*Rentenempfänger der Invaliden- und Angestelltenversicherung*), for persons being out of work, minors in need of help and other poor. Public assistance is administered by the local authorities called *Bezirks- und Landesfürsorgeverbände*.

Public assistance to juveniles includes all public measures for the promotion of youth welfare, firstly enacted in the *Reichsjugendwohlfahrtsgesetz* of July 9, 1922. This law contains, *inter alia*, regulations relating to education of children (maternity and child welfare, care of young children), co-operation of local authorities regarding supervision of boarded-out children, guardianship, probation and Juvenile Court assistance. By the *Jugendgerichtsgesetz* of February 16, 1923, protection is granted to juvenile offenders.

Only by this law—which appears to be its outstanding feature—the legal right of education is granted to all juveniles for physical, spiritual and social fitness. Children whose parents or legal representatives are found neglecting their educational duties are taken care of by the Juvenile Boards (*Jugendämter*).

In 1927, for the first time, total figures of relief were published by the Official Statistic of Public Assistance (*Reichsfürsorgestatistik*), and Official Statistics of Public Assistance to Juveniles (*Reichsstatistik der öffentlichen Jugendhilfe*). On March 31, 1934, 3,296,246 heads of families received permanently ordinary out relief (4,671,349 on March 31, 1933), by 973 Public Assistance District Committees (*Bezirksfürsorgeverbände*). Furthermore, 1,567,541 persons were in receipt of institutional relief in 1932–33. The total expenditure for relief in money and kind granted by Public Assistance District Committees in 1933–34 (financial year) amounted to 1,866,848,200 RM. (2,409,260,700 RM. in 1932–33).

Moreover, the Public Assistance State Committees (*Landesfürsorgeverbände*) were granting relief—especially institutional relief—to 208,350 persons in 1932–33 (210,381 in 1931–32), the expenditure for which amounted to 113,972,000 RM. in 1932–33 (131,740,300 RM. in 1931–32).

Besides these payments for direct relief the Public Assistance Authorities expended various amounts for grants to own institutions, private welfare work, administration expenses, etc. The balance of the total expenditure and income of Public Assistance Authorities in 1932–33 amounted to 1,887,854,700 RM. (1,993,796,800 RM. in 1931–32).

The above-mentioned amounts expended in 1932–33 include the expenses

for public assistance to juveniles, also expenses in connection with education and bringing-up of minors, juvenile care and physical training, amounting to 14,341,200 RM., furthermore, contributions to orphans' asylums, children's homes, etc., amounting to 3,764,500 RM., day nurseries, kindergarten and similar institutions, amounting to 15,161,100 RM., according to data compiled from the Public Assistance District Committees.

Additional data furnished by the Public Assistance State Committees show total amounts for public assistance to juveniles, 21,671,100 RM., and 2,855,100 RM. for other purposes connected therewith.

In addition to the above given ordinary expenditure on public assistance there must be noticed government grants with which local authorities were supplied to meet all requirements regarding public welfare.

Thus, the whole charge to the community incurred by the administration of public assistance for the Reich amounted to 2,717,300,000 RM. in 1932–33 (2,239,160,000 RM. in 1931–32), or 41·7 RM. (35·9 RM. in 1931–32) per head of estimated population.

Compulsory Insurance.

Social insurance has existed in Germany since 1883. It comprises compulsory insurance of workmen and employees against sickness (including maternity), accidents, unemployment, old age and infirmity.

Under a law of 1883 and amending Acts, workmen and employees with an annual income up to 3,600 marks must be insured against sickness, and must themselves pay two-thirds of the contributions, their employers paying one-third. For accident insurance, under an Act of 1884 and amending Acts, the contributions are paid entirely by the employers, and they, for mutual protection, have been obliged to unite into associations according to the nature of the industries in which they are engaged. The working of these insurance associations is controlled by Government. For invalidity and old age insurances, under an Act of 1889 and amending Acts, the contributions are paid half by the workmen and half by their employers, while towards each pension the Government grants an annual subsidy. The employers are responsible both for their own and the workmen's contributions. The latter must be deducted from wages and paid subsequently. Insurance for old age pensions for employees was introduced by law of December 20, 1911, and amending Acts, 65 being the pensionable age. Unemployment Insurance was introduced by the law of July 16, 1927, to take the place of the Unemployment Welfare which had been in existence since the end of the war.

The State makes a grant for invalidity and old age insurance and for the miners' societies.

For the year 1933 the average of those insured against sickness was 18,540,000. Of this total, 16,280,000 (10,059,000 men and 6,221,000 women) were insured in ordinary societies, and 547,000 in *Knappschaften* or societies for miners, and 1,713,000 in supplementary offices. In 1932, about 21,200,000 persons were insured against accident in 65 industrial and 39 agricultural societies.

The total receipts in 1933 of the ordinary societies were 975,481,000 RM., of the *Knappschaften* 55,709,000 RM., and of the supplementary offices 154,236,000 RM. The total expenditure of the ordinary societies was 971,714,000 RM., of the *Knappschaften* 56,737,000 RM., and of the supplementary offices 152,425,000 RM. The number of cases and days of sickness amounted with the ordinary societies to 5,847,000, and 149,203,000, and with the *Knappschaften* to 236,000, and 6,765,000, and of the supplementary offices 371,000 and 9,068,000 respectively. For accident insurance the receipts (1932) were 330,700,000 RM., and the expenditure 333,000,000 RM. For invalidity and old age insurance the receipts in 1932 were 1,104 million RM., and the expenditure was 1,289 million RM.; including state subsidy of 386 million RM., appropriations for pensions 794 million RM., other appropriations 41 million marks. The deficit was in 1932, 185 million RM., total resources 1,267 million RM.

On January 1, 1934, the current benefits for old age, invalidity and sickness amounted to 2,442,000, and pensions to widows and orphans to 582,000 and 350,000, respectively; for the insurance of employees the receipts in 1933 were 449 million RM. and the expenditure 276 million RM. There is in addition compulsory insurance for clerical workers. The number insured is not known exactly; on the basis of the monthly contributions paid it can be estimated at 3·6 million persons at the end of 1933. As insurance of employees is comparatively new, the number of beneficiaries is increasing considerably from year to year. At the end of 1933 there were 206,904 persons receiving old-age pensions (12·8 per cent. increase over 1932), 90,018 widows' pensions (11·2 per cent. increase), and 35,944 orphans' pensions (35·1 per cent. increase). Contributions in 1933 totalled 287,838,000 RM., total receipts 448,780,000 RM.; pensions accounted for an expenditure of 227,665,000 RM., health insurance benefits 20,193,000 RM.; other benefits 15,479,000 RM., and administration expenses 12,017,000 RM. The excess of receipts over expenditure was, in 1933, 173 million RM.

For the miners' societies the receipts in 1932 were 200 million RM. and the expenditure 201 million RM.; for unemployment insurance the contributions in 1933 were 981 million RM. and the expenditure for unemployment benefit 277 million RM.

Finance

The following table shows the revenue and expenditure for five years, ending March 31 (in millions of Reichsmarks):—

	1930-31	1931-32	1932-33	1933-34	1934-35[1]
Revenue . . .	10,585,400	8,567,600	6,327,100	4,510,500	6,458,300
Expenditure . .	11,877,200	10,042,000	7,944,700	6,293,000	6,458,300

[1] Budget Estimates.

The budget estimates for 1934–35 give the principal items of revenue and expenditure as follows:—

BUDGET ESTIMATES, 1934–35 (in millions of Reichsmarks)

Revenue		Expenditure	
Taxes	4,007·9[1]	Payments to States and Communes	540·3[1]
Customs	1,080·0	General Administrative Expenses	3,301·0
Administrative Revenues .	479·2	Provision of Work	324·5
Contribution of the German Railway Company to Reparation Payments . . .	70·0	War and Civil Pensions, etc. .	1,280·0
Loan	275·0	Internal Charges arising out of the War, Occupation, etc. .	299·1
Other Revenues . . .	546·2	Payment of Bonds and reduction of Debt . . .	573·3
		War charges	140·0
Total . . .	6,458·3	Total . . .	6,458·3

[1] Exclusive of the share of the separate States in the taxes due to them.

On March 31, 1934, the total debt of the German Reich amounted to 12,407·1 million Reichsmarks, of which 4,255·2 million are pre-war debt, 408·9 million Rentenbank-debt, 410·3 Dawes Loan (1924), 1,078·8 Young Loan (1930), 374·7 million External Loan of 1930, 500·0 million Internal Loan of

1927, 183·0 million Internal Loan of 1929, 1,012·4 million claims for war damages (according to the War Damages Liquidation Act), 217·1 million claims for Poland damages (according to the Poland Damages Act), 2,188·1 million floating debt, and 1,839·2 million other debts.

The growth of the German debt is shown as follows :—

Year (March 31)	Million Marks	Year (March 31)	Million Marks
1871[1]	769·5	1931	12,089·6
1875[1]	120·3	1932	12,137·3
1913	4,925·8	1933	12,331·3
1929	8,971·7	1933[1]	12,304·7
1930	10,375·1	1934	12,407·1

[1] December 31.

The floating debt on December 31, 1934, was 2,371,400,000 Reichsmarks, compared with 2,032,600,000 Reichsmarks on December 31, 1933.

Defence.

I. Army.

Under the terms of the Treaty of Versailles, and in accordance with the law of March 23, 1921, enlistment is voluntary and for 12 years. Officers have to engage to serve for 25 consecutive years on appointment. The Reichswehr is organized in 7 divisions of infantry and 3 divisions of cavalry, with two army corps headquarter staffs. The strength of an army corps staff is 30 officers and 150 N.C.O.'s and men ; of an infantry division, 410 officers and 10,830 men ; of a cavalry division, 275 officers and 5,250 men. The total strength of the army in 1932 was 4,500 officers and 96,000 other ranks. The Chancellor is the supreme head of all land and sea forces. Under his orders the Minister of National Defence exercises actual command through the medium of a General Officer appointed Chief of the Army Direction, organized as follows :—

—	Divisions	Regiments	Battalions	Groups	Squadrons	Companies	Batteries
Infantry	7	21	84[1]	—	—	336[2]	—
Cavalry	3	18	—	—	97[3]	—	—
Artillery	—	7	—	24	—	—	79
Engineers	—	—	7	—	—	14	—
Train	—	—	—	14	25	24	—
Medical Service	—	—	—	7	—	—	—
Communication Troops	—	—	—	7	—	14	—

[1] 21 Instructional. [2] 63 Instructional. [3] 18 Instructional. [4] 7 Instructional.

By June, 1921, the fortresses specified in the Treaty of Versailles, and also the coast defences of Kiel and Heligoland had been razed. The fortifications on the southern and eastern frontiers may remain in the condition in which they were when the Treaty of Versailles became operative, but according to the request of London (May 5, 1921), all German fortresses had to surrender their equipment, with the exception of Königsberg, which was permitted to retain 33 guns. The maximum armaments authorised are 132,000

rifles, 18,000 carbines, 828 heavy machine guns, 1,418 light machine guns, 63 trench mortars, 189 light trench mortars, 204 7·7 cm. field guns, and 84 10·5 cm. howitzers. No heavy artillery, tanks, or military aircraft are permitted. Since 1933, Germany, on leaving the League of Nations, has disregarded the terms of the Treaty of Versailles, and is believed to be converting the Reichswehr into a short service army, with a strength of 300,000 and a skeleton organisation, to be completed from semi-military organisations, of 20 divisions. At the same time she is organising her civil aviation for military use and is believed to have not less than 600 aircraft available for use with her army. The air budget for 1934–35 has been increased 210,000,000 Reichsmarks.

The police, under the authority of the Minister of the Interior, comprises barrack police, 100,000 strong; police in towns, 60,000; Gendarmerie, 40,000; *Feldjägerkorps*, 40,000. There are also the criminal police and the secret police.

The estimates of the Defence Department for 1934–35 amounted to 894,323,850 RM. (652 millions for the army and 236 millions for the navy).

II. Navy.

The German Navy is directed and administered by the Chief of the Naval Directorate, under the Minister of National Defence. In addition to the central administrative division are the Office of Naval Command (staff), the General Naval Office (supply and research), the Constructional Division, also the Naval Administrative Office, and some departments dealing with the relations of the Navy to the Defence Ministry, which also controls the Army.

The Treaty allows to the German Government the right of maintaining a navy, recruited and maintained on a volunteer basis. The fleet consists of 6 capital ships; of these, four are pre-Dreadnoughts completed between 1906 and 1908, each displacing approximately 13,000 tons and mounting four 11-inch and from twelve to fourteen 6·7 or 6-inch guns. These are the *Hannover*, *Hessen*, *Schlesien*, and *Schleswig-Holstein*. They possess little fighting value, though a certain amount of money has been spent in modernising them. The remaining two are 26-knot battleships, the *Deutschland* and *Admiral Scheer*, each of 10,000 tons, driven by Diesel engines. Each is armed with six 11-inch and eight 6-inch guns, and is claimed to have a radius of action of 10,000 miles at 20 knots. A third ship of this type, the *Admiral Graf Spree*, was launched on June 30, 1934, and a fourth has since been begun. These vessels are officially rated as 'armoured ships.' The cruisers include the *Berlin*, of 3,650 tons, completed 1904, and mounting 8 4·1-inch guns; the *Emden*, of 5,600 tons, completed at the end of 1925, armed with 8 6-inch guns, and recently refitted; the *Königsberg*, *Karlsruhe*, *Köln*, and *Leipzig* of 6,000 tons, completed 1929–31, armed with 9 6-inch guns. A new cruiser of the *Leipzig* type, the *Nürnberg*, will be completed in 1935. By treaty the cruisers built since the war are limited to a standard displacement of 6,000 tons. There are 30 destroyers and torpedo-boats, 18 of which date from 1907–13; the remainder were built in 1926–29 to replace worn-out vessels. Four new destroyers are under construction. Other modern ships are the gunnery vessel *Bremse* and the depot ships *Saar* and *Tsingtau*. No submarines or naval aircraft are permitted. Two Diesel-engined depot ships, the *Saar* and *Tsingtau*, were completed in 1934; each is armed with 3 4·1-inch guns.

The battleships, cruisers and torpedo-boats are divided equally to constitute squadrons severally in the North Sea and the Baltic. The cruisers *Karlsruhe* and *Emden* are training ships, and make extensive cruises with naval cadets and men.

The total personnel may not exceed 15,000, including a maximum of 1,500 officers and warrant officers. Its present strength is 1,104 officers and petty officers and 13,896 men. The officers and warrant officers engage for a minimum of twenty-five consecutive years, and the petty officers and men for twelve years. The vessels of war are to have a fixed allowance of arms, munitions, and material.

Production and Industry.

I. Agriculture.

Generally speaking, small estates and peasant proprietorship prevail in the West and South German States, while large estates prevail in the north-east.

The subdivision of the soil, according to the latest official returns for Germany, without the Saar, at the beginning of June, 1934, was as follows (in acres):—Arable land, 51,049,683; grass, meadows, pasture, 20,435,728; vineyards. 211,733; orchards, market gardens, etc., 1,672,570; total area under cultivation, 73,369,713 acres.

The areas under the principal crops, in acres, and the yields, in metric tons (1 metric ton = 2,204 lbs. or ·984 an English ton), were for three years as follows:—

—	Acreage.			Produce (Metric tons).		
	1932	1933	1934[1]	1932	1933	1934[1]
Wheat	5,700,680	5,793,823	5,493,410	5,003 071	5,604,274	4,532,538
Rye	11,124,942	11,310.498	11,228,520	8,363,554	8,727,173	7,607,618
Barley	3,920,155	3,963,615	4,077,100	3,214.667	3,468,097	3,203,881
Oats	8,211,725	7,955,965	7,863,373	6.650,243	6,952,483	5,452,328
Potatoes	7,197,627	7.222,043	7,266,500	47,016,427	44,071,412	43,631,663
Sugar Beet	676,877	760,128	891,210	7,875,593	8,578,909	9,081,529
Hay	18,898,227	18,865,818	18,725,223	37,058,416	32,836,310	27,293,416

[1] Provisional figures.

In 1933 the area devoted to vines was 179,868 acres, the wine yield 39,567,792 gallons. Area devoted to tobacco, 1932, 27,050 acres; 1933, 29,943 acres; yield 1932, 28,224,052 kilos; 1933, 29.433,365 kilos. Sugar production, 1932–33, 1,088,445 tons; 1933–34, 1,429,175 tons. In 1934 the hop production was 6,544 tons; in 1933, 6,794 tons.

A census of fruit trees taken in the spring of 1933 shows the following results (in thousands):—Apple trees, 69,862; pear trees, 26,354; plum trees, 36,689; cherry trees, 18,724; apricot trees, 331; peach trees, 2,240; total (including all others), 155,687.

The number of domestic animals in Germany according to the census of December 5, 1933, was:—

States	Horses[1]	Cattle	Sheep	Swine	Goats
Prussia	2,344,348	11,255,124	2,253,172	16,262,021	1,507,963
Bavaria	368,400	3,990,455	345,675	2,564 119	327,121
Saxony	140,273	749,408	65,328	888.136	139,249
Württemberg	103,565	1,105,987	139,966	672,379	78,514
Baden	62,831	655,780	37,706	570,158	111,780
Other States	377,908	1,981,841	544,872	2,933,584	423,285
Total 5 Dec. 1933	3,397,325	19,738,545	3,386,719	23,890,397	2,587,912
Total 1 Dec. 1934	3,374,000	19,165,000	3,482.000	23,125,000	2,489,000

[1] Exclusive of Army horses.

II. Forestry.

Forestry in Germany is an industry of great importance, conducted under the care of the State on scientific methods. The forest area of Germany in its present extent was put in 1927 at 31,635,443 acres, State and partly State forests, 10,328,563 acres; communal forests, 4,914,498 acres; private forests, 15,129,785 acres, and forests belonging to various associations or foundations, 1,262,597 acres. Of the whole forest area 9,110,040 acres are under deciduous trees, oak, birch, ash, beech, etc., and 22,525,403 acres bear pine, larch, red and white fir, etc. The forest area in 1933 was 31,950,255 acres, or 27 per cent. of the total area of Germany.

III. Mining.

The great bulk of the minerals raised in Germany is produced in Prussia, where the chief mining districts are Westphalia, Rhenish Prussia, and Silesia, for coal, iron and metal smelting works, Central Germany for brown coal, the Harz for iron and copper ore, and the Westerwald for iron ore. Saxony has coal mines.

In 1933 there were 1,305 mines in Germany employing 442,583 persons (437,807 men, and 4,776 women). Number of blast furnaces in 1932, 154; in 1933, 150.

The quantities of the principal minerals raised were as follows in metric tons :—

—	1931	1932	1933
Coal	118,640,113	104,740,540	109,921,000
Lignite	133,310,720	122,646,629	126,796,000
Iron ore	2,621,300	1,389,772	2,592,000
Iron content	841,534	442,728	828,400
Zinc ore	202,417	141,215	—
Zinc content	105,244	75,275	104,000
Lead ore	114,736	110,299	—
Lead content	54,261	50,950	53,660
Copper ore	886,474	964,788	1,000,000
Copper content	29,827	30,741	29,480
Rock salt	2,086,884	2,115,688	1,841,000
Brine salt	490,975	485,379	426,000
Brines used directly (salt content)	528,750	632,013	500,000
Potash	8,051,400	6,415,531	7,363,000
Pure potash content of the product as sold	941,056	786,627	1,026,000
Petroleum	228,931	229,735	232,689

Coal output, 1934, 25,011,000 tons; lignite, 37,246,000 tons.

In 1913 the total output of pig iron was 16,763,809 metric tons; in 1933, 5,266,769 tons; in 1934, 8,741,661 tons. Ingot steel production (including castings from steel-works) in 1913 totalled 17,147,360 metric tons; in 1933, 7,585,735 tons; in 1934, 11,886,043 tons. In 1931, the output of coke was 23,189,836 tons; in 1932, 19,545,920 tons; in 1933, 21,154,000 tons; in 1934, 24,218,000 tons.

IV. Fisheries.

In 1933 the yield of the North Sea fisheries was 352,783,800 kilos of fish; and of the Baltic fisheries, 34,556,800 kilos of fish.

V. Manufactures.

The chief seat of the German iron production is the Ruhr; to a less extent also in Sieg, Lahn, and Dill districts. Steel is chiefly made in the

Ruhr. The manufacture of both iron and steel is carried on in the vicinity of the coal mines in the district of the Lower Rhine, and in Westphalia. The electrical industry is found principally in Berlin. The chemical industry is centred on the Rhine, near Mannheim, the Main and Cologne, and in Prussian Saxony. Saxony (Free State) is the leading State in the production of textiles, but Silesia and Westphalia also produce linen; Saxony (Free State), Rhenish Prussia, Westphalia, Württemberg, and Bavaria produce cotton goods. Woollens are manufactured in Saxony, Brandenburgh, Rhenish Prussia, and Thuringia; silk in Rhenish Prussia and Baden. Beetroot sugar is an important manufacture in Prussia, chiefly in the provinces of Saxony, Silesia, Hanover, and Pomerania. Potash is produced mainly in Prussian Saxony, Thuringia, and Hanover. Glass, porcelain, and earthenware in Bavaria, Thuringia, Silesia, Rhenish Prussia, and Saxony; clocks and wooden ware in Baden, Württemberg, and Bavaria; and beer principally in Bavaria.

The following are the statistics of the beet sugar manufacture in Germany :—

Years beginning 1 September	Number of Factories	Beetroot used in Metric Tons	Production in Metric Tons		No. of Kgs. Beetroot to produce 1Kg. of Sugar
			Raw Sugar	Molasses	
1929–30	238	11,937,531	1,955,711	338,232	6·10
1930–31	233	15,874,435	2,515,630	394,228	6·31
1931–32	216	9,419,820	1,560,196	238,329	6·04
1932–33	200	6,780,420	1,060,364	202,552	6·39
1933–34[1]	209	8,284,433	1,391,603	248,789	5·95

[1] Preliminary figures.

The quantity of beer (in thousands of hectolitres, 1 hectolitre = 22 gallons) brewed in Germany in 1914 was 59,373; in 1929, 58,078; in 1930, 48,560; in 1931, 37,137; in 1932, 33,570; in 1933, 34,132.

The total number of active breweries in Germany with a yearly production of over 500 hls. was in 1927, 2,719; in 1928, 2,782; in 1929, 2,837; in 1930, 2,794; in 1931, 2,723; in 1932, 2,639; in 1933, 2,643.

Production of alcohol for four years :—

Year	No. of Distilleries	Gallons	Year	No. of Distilleries	Gallons
1929–30	38,186	63,395,464	1931–32	36,852	49,568,816
1930–31	28,901	56,519,694	1932–33	33,462	66,066,374

Tobacco products in the year ending March 31, 1934:—7,271,123,422 cigars, 33,693,706,523 cigarettes, 31,955,030 kilos of smoking tobacco, and 1,761,362 kilos of snuff.

Output of artificial silk in 1934, 41,550,000 kilos; in 1933, 34,028,000 kilos; in 1932, 29,492,000 kilos.

According to the industrial census of June 16, 1933, there were in Germany 1,901,222 industrial establishments, employing 8,941,350 workpeople (6,705,476 males, being 75 per cent. of the total, and 2,235,874 females). The following table gives certain particulars of the more important industries :—

Branch of Industry	Number of Factories	Number of Employees	
		Total	Industrial Workers
Mining, salt works, etc.	1,305	442,583	409,795
Stone, clay and glass products	34,186	402,578	325,965
Iron and steel	1,458	235,616	196,864
Metal	1,184	47,666	38,071
Iron and metal manfactures	155,833	585,646	273,153
Machinery	41,961	605,029	385,991
Electrotechnical industry	27,551	247,190	142,155
Chemicals	7,699	246,429	173,797
Textiles	67,579	846,831	673,806
Paper	10,886	181,107	142,537
Leather	34,551	119,848	62,999
Timber	214,640	607,817	285,807
Musical instruments and toys	11,009	38,236	18,450
Foodstuffs	302,593	1,417,191	622,142
Clothing	535,266	1,045,301	318,350
Building	260,415	1,008,625	591,851

Commerce.

The following table shows the volume and value of the special trade (exclusive of gold and silver) for five years:—

Year	Imports		Exports	
	Double cwts. (= 100 kg.)	Million marks	Double cwts. (= 100 kg.)	Million marks
1913	728,307,811	10,770	737,135,321	10,097
1931[1]	407,795,110	6,727	572,960,650	9,599
1932	331,478,706	4,666	429,151,064	5.739
1933	353,914,615	4,204	418,316,243	4,871
1934	444,072,139	4,451	452,177,594	4,166

[1] Including deliveries in kind under Reparations.

The distribution of trade according to categories is shown as follows (in millions of gold mark values):—

—	Imports			Exports		
	1913	1933	1934	1913	1933	1934
Live animals	289·7	30·8	33·3	7·4	9·0	3·7
Foods and beverages	2,807·8	1,082·3	1,066·8	1,069·5	172·2	117·0
Raw material and semi-manufactured articles	6,280	2,420·5	2,600·4	2,274·1	903·4	790·2
Manufactured articles	1,392·2	670·0	750·4	6,746·2	3,786·8	3,255·7
Gold and silver	436·4	406·5	282·6	101·4	833·5	500·2
Total	11,206·1	4,610·1	4,735·5	10,198·6	5,704·9	4,666·8

The value of some of the more important imports and exports in 1933 and 1934 was as follows:—

Imports	1933	1934	Exports	1933	1934
	1,000 Reichsmarks	1,000 Reichsmarks		1,000 Reichsmarks	1,000 Reichsmarks
Wheat	71,884	60,919	Coal	208,768	215,762
Butter	83,765	73,692	Silk and rayon	95,903	77,374
Coffee	125,261	118,997	Woollen goods	95,638	69,177
Fruit	113,652	108,791	Cotton goods	112,108	81,169
Raw Cotton	306,994	260,239	Leather	86,560	57,305
Wool	266,191	322,626	Paper	155,464	132,632
Mineral oil	127,515	136,856	Dyes, varnishes, etc.	202,492	206,001
Coal	58,007	66,781	Chemical products	357,384	316,209
Copper	102,250	96,767	Glass and Glassware	119,903	107,506
Timber	70,081	62,295	Iron and steel	704,813	642,668
Iron ore	58,753	88,307	Copperware	127,247	118,050

The distribution of trade according to principal countries for 2 years was as follows:—

Country	Imports		Exports [1]	
	1933	1934	1933	1934
	Millions of Marks	Millions of Marks	Millions of Marks	Millions of Marks
Belgium [2]	138·8	161·0	278·1	235·9
France [3]	184·0	176·9	395·0	281·7
Italy	166·4	184·7	227·3	245·9
Netherlands	232·0	264.1	612·8	481·8
Austria	57·6	66·3	120·7	106·7
Czechoslovakia	121·7	162·2	160·1	148·4
Sweden	102·6	133·8	191·1	198·3
United Kingdom	238·4	205·7	405·6	382·9
United States	482·8	372·7	245·9	157·8

[1] Including deliveries in kind under Reparations.
[2] Including Luxemburg. [3] Including Alsace-Lorraine.

Principal articles imported into the United Kingdom from, and exported from the United Kingdom to, Germany (Board of Trade Returns):—

Staple Imports	1932	1933	Staple Exports	1932	1933
	£	£		£	£
Glass & manufactures	885,311	981,744	Cotton yarns	2,627,331	2,489,027
Dyes	635,740	673,108	Cotton piece goods	604,082	541,128
Woollens	221,717	337,146	Woollen yarn	823,439	872,732
Hosiery	628,398	1,038,474	Alpaca, &c., yarn	340,368	327,268
Machinery	2,738,027	2,550,241	Wool piece goods	719,224	476,581
Toys	776,286	745,705	Iron and steel	227,268	220,112
Artificial silk	779,244	800,277	Machinery	409,887	463,183
Chemicals	1,766,535	1,785,031	Coal	1,518,402	1,552,864
Electrical goods	968,568	749,456	Fish	1,423,118	1,124,992
Leather	1,119,718	1,126,578	Motor cars & motor cycles	239,051	330,481

Total trade between Germany and the United Kingdom for five years, according to the Board of Trade Returns:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Germany into U.K.	65,490,446	64,162,625	30,499,459	29,814,174	30,575,444
Exports of British produce to Germany	26,808,992	18,411,873	14,574,741	14,821,224	14,011,507
Re-exports to Germany from U.K.	17,308,493	13,589,920	10,811,882	9,777,338	8,913,443

The ports of Hamburg and Bremen were the chief gates of commercial intercourse of Germany with the United Kingdom and the United States.

Shipping and Navigation.

On June 30, 1934, the German mercantile marine (Lloyd's Register of Shipping) amounted to 2,043 ships of 3,690,990 registered gross tons (5,459,296 tons in 1914).

The following table for 1933 shows the number and net tonnage of vessels entering and clearing German ports (excluding deep-sea fishing traffic) :—

Flag	Entered				Cleared			
	With Freight		In Ballast		With Freight		In Ballast	
	No.	Tonnage	No.	Tonnage	No.	Tonnage	No.	Tonnage
German . .	49,811	17,761,744	10,616	2,503,411	52,939	16,940,606	8,015	3,368,427
Foreign . .	11,565	14,142,007	3,690	1,496,791	12,644	11,827, 076	2,661	3,917,731
Swedish . .	1,886	1,667,271	963	283,010	2,496	1,706,474	402	287,269
United States	260	1,354,195	2	4,664	268	1,387,356	6	26,866
Danish . .	2,523	1,725,950	1,406	141,836	3,599	1,613,722	345	188,189
British . .	2,345	3,828,102	233	213,024	1,816	2,533,746	657	1,469,087

Dutch . .	2,339	1,799,914	633	276,667	2,479	1,344,339	525	538,928
This shipping was distributed among the ports as follows:—								
Hamburg[1] .	13,374	16,500,699	3,196	1,212,023	16,199	14,259,792	1,996	3,592,380
Bremen . .	5,213	4,372,370	438	399,109	4,692	4,321,681	876	497,397
Bremerhaven.	976	2,514,244	68	71,162	731	2,143,678	159	315,060
Stettin . .	3,621	1,975,015	661	213,855	3,476	1,139,636	780	1,059,832
Emden . .	1,167	767,464	1,210	1,227 962	2,050	1,572,915	259	410,871
Cuxhaven .	393	725,718	6	338	285	642,296	46	8,459
Königsberg .	1,826	820,407	153	101,384	1,317	484,799	679	440,934
Lübeck . .	1,800	456,086	1,612	132,707	3,097	380,594	307	201,768

[1] Inclusive of Altona and Harburg-Wilhelmsburg.

During the calendar year 1933 there passed in transit through the Kaiser Wilhelm (Kiel) Canal 40,471 merchant vessels, aggregating 14,179,687 net tons.

Internal Communications.

I. Railways.

On April 1, 1920, all the various German State railways were transferred to the Central Government. On October 11, 1924, as a result of the adoption of the Dawes Scheme, the German railway system was transferred to a private company—the Deutsche Reichsbahn-Gesellschaft—which manages and administers the system. The railways, however, remain the property of the State. The total length of railway line was 58,331 kilometres, or 36,246 miles on December 31, 1933. Of this total 53,817 kilometres, or 33,441 miles are State lines.

In 1934, 365,000,000 tons of merchandise including free-hauled were carried by the Deutsche Reichsbahn-Gesellschaft. The number of passengers (including military) was 1,361 million. Revenue, 1934, 3,325 million marks; expenditure, 3,285 million marks.

On December 31, 1932, there were in operation 3,293 miles of tramway, and 6,237 miles of light local railways.

II. Canals and Navigation and Airways.

The length of inland waterways in 1933 was 7,536 kilometres, or 4,684 miles. The inland waterways fleet at the end of 1933 comprised 17,833 vessels of 6,442,114 tons. In 1933, 77,960,000 tons of goods were carried on the inland waterways.

Air traffic for 3 years:—

Year	Miles Flown	Passengers	Passenger Miles	Goods Traffic	Air Mail
				Tons	Tons
1931	6,424,068	98,167	15,945,524	2,230·8	405·9
1932	5,758,371	98,489	17,530,094	2,118·7	384·2
1933	6,551,918	123,036	23,828,955	2,519·5	467·3

III. Posts and Telegraphs.

The postal and telegraphic services are retained in the hands of the Central Government.

Statistics for 1933:—Employees, 350,832; total number of post, telegraph, telephone, and radio offices, 62,119. Revenue, 1933–34, 1,638 million marks; expenditure, 1,310 million marks.

The following are the telegraph and telephone statistics for the year 1933:—Length of telegraph lines, 153,446 kilometres or 95,350 miles; of wire, 5,388,682 kilometres or 3,348,463 miles; number of foreign telegrams, 9,343,000; of inland telegrams, 14,231,000, including official service telegrams. Length of telephone lines, 227,902 kilometres or 141,616 miles; of wire, 19,411,600 kilometres or 12,062,139 miles; number of telephone boxes, 2,953,614; of telephone connections, 2,178,635,000.

International cable service is provided by the Deutsch-Atlantische Telegraphengesellschaft, which operates cables via Emden, the Azores, and Emden-Vigo.

Currency, Banking and Credit.

By the Currency Law of August 30, 1924, which came into operation on October 11, 1924, the currency was once more established on a gold basis, with the following gold coins as legal tender: 20 and 10 Reichsmark pieces. Provision was also made for silver coins of 2 and 5 marks, for nickel coins of 1 mark and 50 pfennig and for 1, 2, 5, and 10 pfennig. The notes of the Reichsbank (10 marks and upwards) are likewise legal tender; they have a minimum cover of 40 per cent. of their face value in gold and foreign exchange; three-quarters of this cover must consist of gold and the remainder of good commercial paper, complying with specified conditions. For the present the convertibility of these notes is practically suspended. Besides the Reichsbank there are the four so-called 'private note banks': (1) Bayerische Notenbank, in Munich; (2) Sächsische Bank, in Dresden; (3) Württembergische Notenbank, in Stuttgart; and (4) Badische Bank, in Karlsruhe, which also have the right of issuing notes (50 marks and upwards), on the same terms as the Reichsbank. They may issue notes up to a total of 194 million Reichsmarks.

On October 16, 1923, a proposal was adopted for the setting up of a Renten Bank to issue notes (Rentenmark) secured (since August 30, 1924) by first mortgages in gold marks on the entire German landed property.

On September 30, 1934, there were in circulation Reichsbank notes to the value of 3,911·5 million marks; 'Private Bank' notes (*see* above), 168·4 million marks; notes of the Rentenbank (all of which must be withdrawn by the Reichsbank within 10 years), 298·7 million marks; and coins 1,486·8 million marks; making a total of 5,865·4 million marks.

The condition of the Reichsbank of Germany compared as follows (in thousands of marks):—

Assets	Feb. 9, 1935	Feb. 15, 1934.	Liabilities	Feb. 9, 1935	Feb. 15, 1934
Gold	79,844	333,307	Capital and reserves	622,797	623,151
Bills and cheques .	3,529,205	2,675,608	Notes . . .	3,525,470	3,294,851
Loans . . .	63,906	68,397	Other liabilities .	1,178,589	723,283
Other Assets . .	1,401,533	1,201,624			

By the Bank Law of August 30, 1924, the privileges of the Reichsbank were renewed for 50 years.

The Renten Bank commenced operations on November 15, 1923; it is now in liquidation and the process is expected to be completed by April 11, 1935 at latest. On September 30, 1934, its only credits outstanding were those to the Central Government, which amounted to 408·9 million Rentenmarks. The Renten Bank had issued notes to the value of 408·9 million Rentenmarks, of which the Reichsbank had 110·2 million Rentenmarks, cash in hand, and the rest (391·9 million Rentenmarks) were in general circulation.

By a law of March 19, 1924, there was established the German Gold Discount Bank (Deutsche Golddiscontbank) for the purpose of providing foreign currencies for German business. The capital of the institution is 10 millions sterling, one half provided by the Reichsbank (with the aid of English credits); the other half, from private sources, is not wholly paid up. On August 31, 1934, the German Savings Banks had deposits amounting to 12,160·1 million Reichsmarks.

The capital of the Reichsbank is 150,000,000 Reichsmarks.

Money, Weights, and Measures.

The *Reichsmark*, of 100 *Reichspfennig*, is of the normal value of 11¾*d.*, or 20·43 *Reichsmark* to the pound sterling. It contains 0·358423 grammes of gold.

The metric system of weights and measures is in force.

Diplomatic Representatives.

1. Of Germany in Great Britain

Ambassador.—Dr. Leopold von Hoesch. (Appointed September 23, 1932.)

Acting Counsellor.—Otto Fürst von Bismarck.

First Secretaries.—Dr. Harald Bielfeld and Adolf Freiherr Marschall von Bieberstein.

Second Secretaries.—Dr. Günter Henle, Dr. Gans Edler Herr zu Putlitz, Dr. Albert Hilger van Scherpenberg, and Dr. Werner von Fries.

Military Attaché.—Colonel Freiherr Geyr von Schweppenburg.

Naval Attaché.—Captain Erwin Wassner.

Chancellor.—F. W. Achilles.

2. Of Great Britain in Germany.

Ambassador.—Rt. Hon. Sir Eric Clare Edmund Phipps, G.C.M.G., C.V.O. (Appointed August 2, 1933.)

Counsellor.—B. C. Newton, C.M.G.

First Secretary.—I. A. Kirkpatrick.

Second Secretary.—W. I. Mallet.

Third Secretary.—G. P. Young.
Naval Attaché.—Captain G. C. Muirhead-Gould, D.S.O., R.N.
Military Attaché.—Lt.-Col. F. E. Hotblack, D.S.O., M.C.
Air Attaché.—Group-Captain F. P. Don.
Commercial Counsellor.—E. C. D. Rawlins, C.M.G., C.B.E.
Commercial Secretary.—J. H. Magowan, O.B.E.
Press Officer (First Secretary).—T. F. Breen, C.B.E., M.C.
Financial Adviser.—G. H. S. Pinsent.

There are consular officers at Berlin (C.), Cologne (C.G.), Frankfort (C.G.), Hamburg (C.G.), Leipzig (C.), Munich (C.G.), Bremen, Breslau, Chemnitz, Dresden, Essen, Hanover, Kiel, Lübeck, Stettin, Stuttgart.

Books of Reference concerning Germany.

ADMINISTRATIVE DIVISIONS OF GERMANY.

ANHALT.

(Land Anhalt.)

Under the National-Socialist (Nazi) régime, popular government and the Diet have been abolished. By a law of the Government of the *Reich* of

April 7, 1933, the State is under the absolute rule of a *Statthalter*, or Governor, who is the personal representative of Chancellor Hitler.

Governor (*Statthalter*).—Wilhelm Friedrich *Loeper*. (Also in Brunswick.)

Area, 893 square miles. Population, June 16, 1933, 364,415 (177,138 males and 187,277 females). The capital, Dessau, 78,593 inhabitants on June 16, 1933; Bernburg, 38,327; Köthen, 26,709; Zerbst, 20,151; Rosslau, 12,830; Coswig, 10,573. Population by religion, June 16, 1925: Protestants, 320,850; Catholics, 14,129; Jews, 1,140; other Christian confessions, 248; the rest, principally free-thinkers, 14,678.

Estimated income and expenditure, 1934-35, 23,695,000 marks. Public debt, December 31, 1933, 17,527,052 marks; State property, December 31, 1933, 295,049,424 marks.

BADEN.

(Land Baden.)

Until 1771, Baden was a Margraviate divided into two or more lines; it was then united, and subsequently received various additions, and its ruler took the title of Elector in 1803, and of Grand-Duke in 1806. On November 22, 1918, the Grand-Duke abdicated, and the Provisional Government proclaimed Baden a Republic.

Under the National-Socialist (Nazi) régime, the Constitution was set aside, and the Diet and popular government abolished. By the law of the Government of the *Reich* of April 7, 1933, the State is under the absolute rule of a *Statthalter*, or Governor, who is the personal representative of Chancellor Hitler.

Governor (*Statthalter*).—Robert *Wagner*.

For general administrative purposes there are (since April 1, 1924) 40 'Amtsbezirke,' superintended by four general commissioners (Landes-Kommissäre). For local government there are 11 circles (Kreise), and 1,526 communes (Gemeinden), 123 communal cities, and 1,403 parishes.

Area and Population:—

District	Area: Square miles	Population		Pop. per square mile 1933
		1925	1933	
Konstanz . .	1,610	337,508	353,122	219·3
Freiburg . .	1,830	599,998	631,108	344·9
Karlsruhe . .	993	667,653	687,866	692·7
Mannheim . .	1,386	707,303	740,855	534·5
Total . .	5,819	2,312,462	2,412,951	414·7

Population in 1933, 1,167,830 males and 1,245,121 females.

Including a part of the Lake of Constance, area is 5,889 square miles.

Principal towns, 1933:—

Mannheim .	275,162	Konstanz .	32,961	Weinheim .	17,486
Karlsruhe .	154,902	Baden .	30,262	Bruchsal .	16,903
Freiburg .	99,122	Durlach .	18,658	Lahr .	16,807
Heidelberg .	84,641	Lörrach .	18,254	Villingen .	14,430
Pforzheim .	79,816	Offenburg .	17,976	Rastatt .	14,208

Marriages, 1933, 20,457; births, 36,540; deaths, 26,323; stillbirths, 958; divorces, 1,242.

Religion and Education.—In 1933 there were 1,408,532 Catholics, 920,988 Protestants, 33,938 other Christians, 20,617 Jews, and 28,876 others.

All religious denominations enjoy equality and self-government, appointing their own clergy. The Protestant Church is under a Bishop. The Roman Catholic Church has an Archbishop (at Freiburg), whose 4 suffragans are outside Baden. The Catholic Foundations Council (Oberstiftungsrat) manages the property of the Catholic Church. The Jews, whose ecclesiastical affairs are managed by the 'Oberrat der Israeliten,' have 15 rabbinates.

Instruction is general, free, and compulsory. Schools are under the authority of the State. Religious instruction, however, is provided by each denomination, but there is no compulsion to give or to receive religious instruction. Baden has 2 universities (Heidelberg and Freiburg), 1 technical high school (Karlsruhe), 1 Academy of Arts (Karlsruhe), 17 gymnasia, 14 Realgymnasia, 19 Oberrealschulen, 15 Realschulen, 13 high schools for girls, 3 training colleges for teachers, and a number of technical and special schools.

Finance.—The budget for 1934 fixes the revenue at 196,206,900 marks, and expenditure at 199.730,700 marks (excluding arrears of revenue from previous budgets amounting to 75,000 marks, and expenditure to 1,448,200 marks). Debt, December 31, 1933, 132,300,000 marks.

Production and Industry.—Of the total area, 2,040,807 acres are cultivable land and 1,450,914 acres are forests. In 1934 the area under cultivation was 2,064,695 acres. Oats, barley, wheat, rye and potatoes are grown. Vines in 1933, 30,385 acres, yield 3,587,936 gallons of wine; beetroot, turnips, hemp, hops and chicory are also grown. Tobacco area in 1934, 14,205 acres. The corn crop in 1933 was 427,263 metric tons. The number of animals in 1933 was: cattle, 655,780; pigs, 570,158; sheep, 37,706; goats, 111,780; horses, 62,831. Mineral produce almost solely salt, potash and building-stone.

Principal manufactures: Tiles, cigars, jewellery, machinery, clocks, musical instruments, chemicals, silk ribbons, cotton tissues, paper and cardboard, leather, wood-work, and brushes.

BAVARIA.

(LAND BAYERN.)

Bavaria was for over a century a kingdom, ruled by descendants of the ancient Counts of Wittelsbach, who flourished in the twelfth century. Duke Maximilian I. of Bavaria was elevated to the rank of Elector of the Holy Roman Empire in the Thirty Years' War; and Elector Maximilian Joseph was raised to the rank of king by Napoleon I. in 1805. On November 22, 1918, the dynasty was deposed, and Bavaria was declared a Republic.

Under the National-Socialist (Nazi) régime, the Constitution was set aside, and the Diet and popular government abolished. By the law of the Government of the *Reich* of April 7, 1933, the State is under the absolute rule of a *Statthalter*, or Governor, who is the personal representative of Chancellor Hitler.

Governor (*Statthalter*).—General Franz *von Epp*.

Area and Population:—

Regierungsbezirke	Area, Eng. sq. miles	Population		Pop. per sq. mile, 1933
		1925	1933	
Upper Bavaria (Oberbayern) .	6,437	1,684,766	1,776,534	276·0
Lower Bavaria (Niederbayern) .	4,148	755,769	770,260	185·7
Palatinate (Rheinpfalz), without the Saar District . . .	2,124	931,755	985,681	464·1
Upper Palatinate (Oberpfalz) .	3,725	629,262	652,428	175·1
Upper Franconia (Oberfranken), including Coburg . . .	2,898	757,515	786,409	271·4
Middle Franconia (Mittelfranken)	2,935	998,386	1,036,710	353·2
Lower Franconia (Unterfranken) .	3,260	762,744	796,043	244·2
Suabia (Schwaben) . . .	3,807	859,397	877,519	230·5
Total	29,334	7,379,594	7,681,584	261·9

On November 30, 1919, the inhabitants of the Free State of Coburg decided by an overwhelming majority to join the Free State of Bavaria, and on March 11, 1920, the Bavarian Diet unanimously adopted a Bill for the Union of the two Republics.

To the area have to be added 257 square miles for water.

Of the total population at the end of 1933, 3,728,297 were males and 3,965,359 females.

In 1933 there were 64,976 marriages, 127,667 living births, 3,072 still births, 90,679 deaths, and 3,346 divorces.

Urban and rural population at the censuses of 1925 and 1933:—

Census	No. of Towns	No. of Rural Communes	Towns, &c., with 2,000 inhabitants and over			Communes, &c., with less than 2,000 inhabitants		
			No.	Population	Per cent. of pop.	No.	Population	Per cent. of pop.
1925	261	7,762	377	3,563,208	51·1	7,648	3,816,386	51·7
1933	268	7,718	401	3,877,365	50·2	7,586	3,807,280	49·5

Principal towns, 1933:—

Towns	1933	Towns	1933
Munich (München)	735,388	Bayreuth	37,196
Nuremberg (Nürnberg)	410,438	Aschaffenburg	36,260
Augsburg	176,575	Erlangen	32,348
Ludwigshafen a. Rh.	107,344	Landshut	30,858
Würzburg	101,003	Ingolstadt	28,628
Ratisbon (Regensburg)	81,106	Speyer	27,718
Fürth	77,135	Amberg	27,082
Kaiserslautern	62,619	Frankenthal	26,080
Bamberg	54,161	Straubing	25,893
Pirmasens	47,221	Coburg	25,707
Hof	43,545	Passau	25,151
Schweinfurt	40,176	Kempten	23,739

Religion.—Religious division of the population, June 16, 1933:—Roman Catholics, 5,370,815; Protestants, 2,203,392; Jews, 41,939.

There are 2 Roman Catholic archbishoprics, those of Munich and Bamberg each with 3 suffragan bishoprics; 272 deaneries; and 3,882 parishes. The Protestant Church is under a Bishop. Of the three universities of the Republic, two, at Munich and Würzburg, are Roman Catholic, and one, at Erlangen, Protestant.

Education.—(For Universities, *see* under *Germany.*) Education compulsory from six to sixteen. In 1932–33, there were 7,719 public elementary schools, with 20,278 class teachers (13,725 males and 6,553 females), and 984,358 scholars.

Justice and Crime.—Bavaria is the only German State which before the revolution had an *Oberstes Landesgericht*, or appeal-court of third instance; it has a bench of 26 judges. Under it are 4 Oberlandesgerichte, 26 Landgerichte and 237 Amtsgerichte. The number of judges was (1933) 1,438. In 1933, 85,011 criminals were convicted.

Public Assistance.—At the end of March, 1933, public assistance was rendered as follows: war allowances to wounded ex-soldiers or their families, 3,852; social pensioners, 58,033; small pensioners, 23,864; and others requiring assistance, 270,542—a total of 356,291; in the financial year 1932, allowances for maternity cases, 17,184; indoor relief (in institutions), 163,183. The total allowances amounted to 146,394,500 reichsmarks.

Finance.—The ordinary budget for the year 1934 balanced at 579,439,540 reichsmarks. The extraordinary budget balanced at 20,192,000 reichsmarks.

The debt at the end of June, 1934, was 356,871,974 reichsmarks; floating debt, 45,086,193 reichsmarks.

Production and Industry.—Of the total area, 36·4 per cent. is under cultivation, 21·6 per cent. under grass, and 33·1 per cent under forests.

The areas under the chief crops, and the yield in 1933, were as follows:—

Wheat, 935,955 acres (yield 771,711 metric tons); rye, 1,011,647 acres (696,081 tons); oats, 1,006,120 acres (726,271 tons); barley, 885,365 acres (704,988 tons); potatoes, 1,039,637 acres (5,583,658 tons). Vines, 48,437 acres, yielded 13,078,142 gallons; hops, 20,073 acres, yielded 11,379 metric tons.

The census of live-stock on December 5, 1933, showed 368,400 horses, 3,990,455 cattle, 345,675 sheep, 2,564,119 pigs, and 327,121 goats.

In 1933 the output of coal was 1,654,617 tons; of iron ore, 348,075 tons; pig iron, 135,895 tons; cast iron, 63,777 tons; sulphuric acid, 186,552 tons.

BREMEN.

(Freie und Hansestadt (Land) Bremen.)

Under the National-Socialist (Nazi) régime, the Constitution was set aside, and popular government abolished. By the law of the Government of the *Reich* of April 7, 1933, the Hansestadt Bremen is under the absolute rule of a *Statthalter*, or Governor, who is the personal representative of Chancellor Hitler.

Governor (*Statthalter*).—Carl *Roever*. (Also for Oldenburg.)

Area, 99 square miles; population (1933), 371,558 (181,070 males and 190,488 females).

On June 16, 1933, Bremen contained 317,188 Protestants (85·4 per cent.), 24,122 Roman Catholics (6·5 per cent.), 44 other Christians, 1,438 Jews, others 28,766 (7·7 per cent.). In January, 1934, Bremen (town) had 324,189 inhabitants and Bremerhaven 25,810. In Bremen (town) marriages in 1933, 3,468; births, 4,306; deaths, 3,613; excess of births, 693; divorces, 448.

Bremen contains two Amtsgerichte and a Landgericht, whence appeals lie to the 'Hanseatische Oberlandesgericht' at Hamburg.

For 1932 the ordinary revenue was 85,663,818 reichsmarks, and expenditure 95,539,521 reichsmarks. Public debt on March 31, 1934, 244,378,000 reichsmarks.

Next to Hamburg, Bremen is the largest port for the international trade of Germany. In 1933, 7,223 vessels, 7,631,490 tons, entered and 7,128 vessels, 7,632,705 tons, cleared. Principal shipping companies, Norddeutscher Lloyd, 'Hansa,' and 'Neptun.'

Railways, 17 miles, owned and worked by the State.

HAMBURG.

(FREIE UND HANSESTADT (LAND) HAMBURG.)

Constitution.—The State and Free City of Hamburg is a republic. The Constitution bears date January 7, 1921.

Under the National-Socialist (Nazi) régime, the Constitution was set aside and popular government abolished. By a law of the Government of the *Reich* of April 7, 1933, the City of Hamburg is under the absolute rule of a *Statthalter*, or Governor, who is the personal representative of Chancellor Hitler.

Governor (*Statthalter*).—Karl *Kaufmann*.

Area and Population.—Area, 160 English square miles; population on June 16, 1933, 1,218,447. The State consists of two divisions, the population of each of which was as follows on June 16, 1933: City of Hamburg, 1,129,307; Landgebiet, 89,140.

Marriages, 1933, 14,538; births, 14,302 (397 or 2·78 per cent. stillbirths, 1,481 or 10·36 per cent. illegitimate); deaths, 13,871; divorces, 2,390.

Religion, Education, and Justice.—On June 16, 1933, 952,381 Protestants (78·16 per cent.), 63,538 Roman Catholics (5·22 per cent.), 393 other Christians (0·03 per cent.), 16,973 Jews (1·39 per cent.), and 185,162 'all other' (15·20 per cent.).

On February 1, 1934, Hamburg (State) had 257 public elementary schools with 3,658 teachers (2,165 male, 1,493 female), and 106,563 pupils; 30 higher State schools with 13,975 pupils and 54 private schools with 14,289 pupils. The University at Hamburg (summer 1934) had 2,387 matriculated students (534 women).

The State contains three Amtsgerichte, a Landgericht, and the 'Hanseatische Oberlandesgericht,' or court of appeal for the Hanse Towns.

Finance.—For 1934 the ordinary budget provided for 296,700,000 reichsmarks revenue, and 320,200,000 reichsmarks expenditure. Debt, March 31, 1934, 387,100,000 reichsmarks.

Commerce and Shipping.—Hamburg is the principal seaport in Germany. Leading Steamship Companies:—Hamburg - America line; Hamburg-South America line; German East Africa line; Woermann line; German Levant line; Reederei Rob. M. Sloman, jr. Movement of shipping for 5 years:—

Year	Entered		Cleared	
	No. of Ships	Tonnage	No. of Ships	Tonnage
1929	18,175	21,965,410	20,798	22,134,875
1930	20,350	27,990,248	22,744	22,204,578
1931	19,871	20,774,510	21,758	20,642,139
1932	18,024	18,054,048	20,087	18,174,401
1933	16,570	17,712,722	18,195	17,852,172

HESSE.

(Land Hessen.)

Under the National-Socialist (Nazi) régime, the Constitution was set aside and popular government and the Diet abolished. By a law of the Government of the *Reich* of April 7, 1933, the State is under the absolute rule of a *Statthalter*, or Governor, who is the personal representative of Chancellor Hitler.

Governor (*Statthalter*).—Jacob *Sprenger*.

For administrative purposes, the Republic is divided into three provinces, eighteen circles (Kreise), and 982 communes (Gemeinden).

Area and Population:—

Provinces	Sq. Miles	Population			Pop. per sq. mile, 1933
		1910	1925	1933	
Starkenburg	1,157	590,380	634,621	665,512	574·2
Upper Hesse (Oberhessen) . .	1,269	309,233	328,490	342,620	269·9
Rhenish Hesse (Rheinhessen) . .	542	382,438	384,168	420,916	774·6
Total	2,968	1,282,051	1,347,279	1,429,048	480·6

There were 698,038 males and 731,010 females in 1933.

The largest towns are Mayence or Mainz (including suburbs), with 142,627; Darmstadt, the capital, 93,222; Offenbach, 81,329; Worms, 51,346; Giessen, 35,913 inhabitants, 1933.

Religion and Education.—At the census of 1933 there were 923,656 Protestants, 439,048 Catholics, 10,642 of other Christian sects, 17,888 Jews, 27,782 unclassified, or of no religion, and 10,032 others. The Roman Catholic Church has a Bishop (at Mainz).

There are (1934) 994 public elementary schools with 3,541 teachers, and 181,491 pupils. Hesse has 10 gymnasia, 1 progymnasia, 3 senior realgymnasia, 4 reform realgymnasia, 15 oberrealschulen, 26 realschulen, with 703 teachers and 11,624 pupils; 13 higher girls' schools and women's schools, with 200 teachers and 3,291 pupils; and 33 private schools with 3,619 pupils. The University at Giessen had (summer term, 1934) 1,412 matriculated students (94 women), and the Technical High School at Darmstadt 1,461 students (22 women). There are many industrial, technical, agricultural and other special institutes.

Finance.—The ordinary revenue and expenditure were estimated for the year 1934 to balance at 104,231,847 marks.

The public debt, March 31, 1934: 90,728,703 marks.

Production and Industry.—In 1934 48·3 per cent. of the area was under cultivation; 13·7 per cent. meadows and pastures; 31·3 per cent. forests; 6·7 per cent. uncultivated (houses, roads, water, etc.). Arable land occupies 844,520 acres; meadows and pastures, 260,360 acres; vineyards, 40,755 acres; and forests, 593,950 acres.

Areas and yield of chief crops, 1934: Wheat, 82,330 acres (yield, 75,420 tons); rye, 125,600 acres (98,730 tons); barley, 110,740 acres (44,140 tons); oats, 117,210 acres (89,540 tons); potatoes, 156,100 acres (990,923 tons); (1933) 40,755 acres under vines, yielding 7,286,000 gallons of wine to the value of 15,173,000 marks.

Domestic animals, December 5, 1933: Cattle, 322,963; sheep, 37,647; swine, 387,682; goats, 102,140; horses, 57,411.

The quantity of coal raised in 1933 was 947,950 tons, to the value of 3,207,000 marks; and iron, 294,050 tons. The principal manufactures are leather, cloth, paper, chemicals, furniture, wagons, railway cars and

carriages, motor cars, machinery, musical instruments, tobacco and cigars, sparkling-wine.

MECKLENBURG.

(LAND MECKLENBURG.)

In November, 1918, Mecklenburg-Schwerin and Mecklenburg-Strelitz were each proclaimed a Republic.

By a law of the Reich of December 15, 1933, the two Mecklenburgs were united into one State of Mecklenburg as from January 1, 1934. By a law of the National-Socialist (Nazi) Government of April 7, 1933, the new State was placed under the absolute rule of a *Statthalter*, or Governor, who is the personal representative of Chancellor Hitler.

Governor (*Statthalter*).—Friedrich *Hildebrandt*. (Also for Lübeck.)

Area, 6,197 sq. miles; population (1933), 805,213 (399,789 males and 405,424 females). The chief towns (1933) were Rostock (93,530 inhabitants), Schwerin (53,621 inhabitants), the capital, Wismar (27,493 inhabitants), Güstrow (22,464 inhabitants), Neu-Strelitz (19,414 inhabitants).

In 1933 there were: Protestants, 764,794: Catholics, 31,831; other Christians, 69; Jews, 1,003; other religions, 450; no religion, 6,801; not stated, 265. The parishes are generally well endowed with landed property.

There were (1934) 1,235 elementary schools with 105,392 pupils; Gymnasia, 9 with 2,159 pupils; Realgymnasien, 4 with 1,107 pupils; Reform realgymnasien, 7 with 1,464 pupils; Oberrealschule, 3 with 1,357 pupils; Realschulen, 5 with 676 pupils; higher girls' schools, 9 with 2,563 pupils, 26 with 1,039 pupils; as well as a number of special schools. There is a university at Rostock (see *Germany*).

There are 50 Amtsgerichte, 4 Landgerichte, and 1 Oberlandesgericht at Rostock.

PRUSSIA.

(LAND PREUSSEN.)

On November 13, 1918, Prussia was proclaimed a Republic.

Until that date the country was ruled by sovereigns of the Hohenzollern family, the last of the line being William II (1888–1918). For an account of the rise of Prussia, *see* THE STATESMAN'S YEAR BOOK for 1922, p. 973.

Constitution and Government.

The National-Socialists (Nazis) seized the Government of Prussia on January 30, 1933. Under their régime the Constitution has been set aside, and popular government and the Diet abolished. By a law of the Government of the *Reich* of April 7, 1933, Prussia is under the absolute rule of a *Statthalter*, or Governor, who appoints the Cabinet.

Governor (Statthalter).—Adolf *Hitler*.
Prime Minister.—Hermann *Göring*.

For local government Prussia is divided into 14 Provinces (including Berlin and the Hohenzollern Lands), 34 Government districts (*Regierungsbezirke*), 116 urban circles (*Stadtkreise*), and 361 rural circles (*Landkreise*). Urban circles consist of towns of over 25,000 inhabitants (in Westphalia, 30,000 ; in the Rhine Province, 40,000) ; rural circles consist of the smaller

towns and rural communes (*Landgemeinden*). In provinces and rural circles the government is in the hands of an official appointed by the Prime Minister. Each province has a governor (*Oberpräsident*) ; each government district has a president, and deals chiefly with local affairs of State concern. Under Nazi rule, the towns are under the absolute authority of an official appointed by the Prime Minister.

Area and Population.[1]

I. Progress and Present Condition.

Provinces	Area : Square Miles[2]	Population		Pop. per Square Mile (excluding Haffe) 1933
		June 16,1925	June 16, 1933	
East Prussia (Ostpreussen) .	15,061	2,256,349	2,333,301	163·4

Pomerania (Pommern) . .	11,987	1,878,781	1,920,897	164·4
Border Province (Grenzmark Posen—Westpreussen) . .	2,979	332,485	337,578	113·3
Lower Silesia (Niederschlesien)	10,270	3,132,135	3,204,004	312·0
Upper Silesia (Oberschlesien) .	3,751	1,379,408	1,482,765	395·3
Saxony (Sachsen) . . .	9,856	3,293,364	3,400,592	345·0
Schleswig-Holstein . . .	5,820	1,519,365	1,589,664	273·1
Hanover (Hannover) . .	14,976	3,222,887	3,367,507	224·9
Westphalia (Westfalen) . .	7,805	4,784,169	5,039,963	645·7
Hessen-Nassau (including Waldeck)	6,504	2,475,064	2,584,828	397·4
Rhine (Rheinprovinz) . .	9,256	7,213,564	7,631,723	824·5
Hohenzollern (Hohenzollerische Lande)	441	71,840	72,991	165·4
Total	114,120	38,175,989	39,934,011	353·3

[1] Of the area as at June 16, 1933, exclusive of the Saar (574 square miles).
[2] Including Haffe, East Prussia, 779 sq. miles; Pomerania, 300 sq. miles; total, 1,079 sq. miles.

Of the total population on June 16, 1933, 19,452,471 were males and 20,481,540 females.

Waldeck was absorbed by Prussia on April 1, 1929.

II. Movement of the Population.

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths incl. Stillborn	Surplus of Births
1929	365,221	725,299	23,303	76,107	517,345	+207,954
1930	350,347	713,322	22,991	73,705	454,516	+258,806
1931	325,055	655,334	20,622	66,335	461,432	+193,902
1932	322,286	621,122	18,857	61,806	442,534	+178,588
1933	399,613	610,386	18,046	55,500	466,364	+144,022

In 1932, 2·63 per cent. of the total births in rural districts and 3·40 per cent. in urban areas were stillborn, and 8·13 per cent. in rural districts and 11·60 per cent. in urban areas were illegitimate. Divorces in 1932, 27,237.

Principal towns with population in 1933. According to the area on June 16, 1933 :—

Berlin	4,242,501	Duisburg-Hamborn	440,419	Altona	241,970
Cologne	765,605	Wuppertal	408,602	Kiel	218,335
Essen	654,461	Gelsenkirchen	332,545	Halle a. S.	209,969
Breslau	625,198	Bochum	314,546	Oberhausen	192,345

Düsseldorf	498,600	Stettin	270,747	Aachen	162,774
Hanover	443,920			Wiesbaden	159,755

Religion.

According to the census of 1933 there were in Prussia 25,387,584 Protestants (63·6 per cent.), 12,571,007 Catholics (31·5 per cent.), 19,047 other Christians (0·1 per cent.), 361,826 Jews (0·9 per cent.), and 1,594,536 others (4·0 per cent).

The Evangelical or Protestant Church has since October 31, 1817, consisted of a fusion of the Lutheran and Calvinistic bodies, from which, however, there are still a few dissenters. It is governed since 1933 by a bishop. The Catholic Church has 3 archbishoprics (Breslau, Paderborn and Cologne). There are approximately half a million Catholics in Greater Berlin out of a population of 4½ millions. Altogether in Prussia there are besides the three archbishops ten bishops (Ermland, Berlin, Schneidemühl, Hildesheim, Fulda, Münster, Trier, Aachen, Limburg, and Osnabrück).

Education.

Education in Prussia is compulsory. Every town, or community in town or country, must maintain a school supported by local rates, supplemented by the State, and administered by the local authorities. All parents are compelled to have their children properly taught or to send them to one of these elementary schools, in which all fees are now abolished. No compulsion exists in reference to a higher educational institution than elementary schools, but parents who send more than one child to any school supported by the community have, in many cases, a reduction made in the charge, and a limited number of pupils (about 10 per cent.) whose parents cannot afford to pay the full rate either enjoy this reduction or are admitted entirely free, at the discretion of the authorities. The school age is from 6 to 14 years. Private schools are under the supervision of the authorities. All children, on completion of their schooling, are bound to participate in what is termed the *Landjahr*, *i.e.*, spending a year in camps on the land. The cost is borne by the State.

The following table gives the educational statistics of Prussia:—

—	No.	Teaching Staff	Students or Pupils
Universities [1] (1933–34)	14	4,735 [3]	45,473
Technical high schools [2] (1933–34)	4	1,202 [3]	6,352
Agricultural high schools (1933–34)	2	188 [3]	852
Veterinary high schools (1933–34)	2	122 [3]	1,008
Forestry high schools (1933–34)	2	45 [3]	99
Technical mining academy (1933–34)	1	57 [3]	167
Commercial high schools (1933–34)	2	143 [3]	1,520
Training colleges for elementary school teachers (1933–34)	8	120 [3]	677

[1] Including academy at Braunsberg and Medical academy at Düsseldorf.
[2] Berlin, Hanover, Aachen, Breslau.
[3] Including lecturers and special teachers.

—	No.	Teaching Staff	Students or Pupils
Philosophical-theological high schools (1933–34)	4	61 [3]	916
Secondary schools [4] (public and private), (1931–32)	880	15,999 [5]	302,376
Secondary schools for girls [6] (public and private), (1931–32)	537	10,013 [5]	177,812

[7] Including ministers of religion, specialists and assistant teachers.

Justice, Crime.

Prussia contains 13 Oberlandesgerichte (*see* under *German Empire*). The Oberlandesgericht at Berlin is called the *Kammergericht*. The prosecution in all criminal cases is conducted by *Staatsanwälte*, or public prosecutors, paid by the State.

Finance.

Revenue and expenditure for years ending March 31 :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Reichsmarks	Reichsmarks		Reichsmarks	Reichsmarks
1930–31	4,333,510,664	4,283,238,220	1933–34 [1]	2,744,656,170	2,744,656,170
1931–32	3,569,389,172	3,570,702,023	1934–35 [1]	2,094,403,790	2,094,403,790
1932–33	3,145,155,403	3,208,285,284	1935–36 [1]	2,001,000,000	2,001,000,000

[1] Estimates.

Public debt on April 1, 1934, 715,871,434 reichsmarks.

Production and Industry.

I. Agriculture.

The areas under the chief crops, and the yield in metric tons, for 3 years, were as follows :—

—	1931		1932		1933	
	Acres	Tons	Acres	Tons	Acres	Tons
Wheat	3,208,821	2,610,214	3,386,311	3,075,727	3,454,677	3,474,594
Rye	8,175,075	4,979,575	8,314,080	6,309,403	8,541,815	6,609,324
Summer barley	2,108,070	1,659,692	2,038,080	1,780,459	2,099,110	1,945,084
Oats	5,583,128	4,287,789	5,442,179	4,537,588	5,323,775	4,786,366
Potatoes	4,576,375	29,653,175	4,669,540	31,558,356	4,744,070	29,928,616
Hay (meadow)	6,885,122	11,812,656	6,867,808	11,870,690	6,916,400	10,270,709

In 1933 there were vineyards on 38,837 acres, yielding 11,934,032 gallons of wine, valued at 34,371,739 reichsmarks. On December 1, 1932, Prussia (excluding the ceded territories) contained livestock comprising 11,255,124 cattle, 2,253,172 sheep, 16,262,021 swine, 1,507,963 goats, 2,344,348 horses, and 60,735,816 head of poultry.

II. Minerals.

Quantities (in metric tons) and values (in marks) of the coal and iron ore raised in 3 years :—

—	1930		1931		1932	
	Tons	Reichsmarks	Tons	Reichsmarks	Tons	Reichsmarks
Coal .	138,995,363	2,062,966,728	115,351,758	1,494,799,528	101,469,411	1,124,519,117
Lignite	123,556,434	331,820,533	111,368,437	283,694,396	101,844,065	232,224,353
Iron ore	2,786,063	41,558,209	1,709,927	20,106,716	901,583	9,338,574
Salt .	1,366,064	10,610,020	1,091,196	8,780,910	1,152,234	9,143,544

In 1932 the numbers employed in and about mines in Prussia were : underground workers, 184,001 ; surface workers, 110,358 ; total 294,359.

Internal Communications.—Since April 1, 1920, the Prussian railways (as of the other Federal States) have been taken over by the *Reich*. On December 31, 1931, the railways of the German Republic in Prussia (excluding the Saar) were Deutsche Reichsbahn 31,738 kilometres, private railways 2,602 kilometres ; total, 34,340 kilometres.

Savings Banks.—In 1933 there were 1,276 savings banks in Prussia. The deposits amounted on December 31, 1933, to 7,246,600,000 reichsmarks.

THE SAAR.

(GAU, SAAR-PFALZ.)

According to paragraph 49 of the Treaty of Versailles, the Saar Basin was placed under the control of the League of Nations. In 1935, the population were to decide, by plebiscite, what nationality they desired, and as there was a clear majority for Germany, the League of Nations handed back the Saar to German sovereignty on March 1, 1935.

Governor (*Statthalter*).—Herr Bürckel.

Area: Prussian Saar district, 573 sq. miles; Bavarian Saar, 164 sq. miles; total, 737 sq. miles.

Population (census of July 19, 1927): Prussian portion, 670,019; Bavarian portion, 100,011; total, 770,030 (385,679 males and 384,351 females). Estimated population on January 1, 1933, 823,444 (412,698 males and 410,746 females).

In 1927, there were in the area 558,857 Catholics, 201,354 Protestants, 4,038 Jews, and 5,781 others.

Principal towns (census of 1927): Saarbrücken (125,020); Neunkirchen (41,031); Dudweiler (23,647); Sulzbach (22,402); St. Ingbert (20,817); Saarlouis (15,836); Friedrichstal (13,908); Homburg (11,201).

Number of schools (May 1, 1933), 547; scholars, 121,259; teachers, 2,528.

Revenue and expenditure, 1933, balanced at 518,968,889 francs.

Production of coal, 1933, 10,561,172 metric tons; 1932, 10,438,049 metric tons; production of coke, 1933, 1,879,518 metric tons; 1932, 1,384,914 metric tons; production of pig iron: 1933, 1,591,725 metric tons; 1934, 1,825,665 metric tons; of steel, 1933, 1,676,272 metric tons; 1934, 1,950,418 metric tons; of rolled steel, 1933, 1,245,618 metric tons; 1934, 1,445,899 metric tons.

SAXONY.

(LAND SACHSEN.)

Under the National-Socialist (Nazi) régime, the Constitution was set aside, and popular government and the Diet abolished. By a law of the Government of the *Reich* of April 7, 1933, the State is under the absolute rule of a *Statthalter*, or Governor, who is the personal representative of Chancellor Hitler.

Governor (*Statthalter*).—Martin *Mutschmann*.

Area and Population :—

Governmental Divisions	Area, English Sq. Miles	Population.		Population per Sq. Mile 1933
		June 16, 1925	June 16, 1933	
Dresden-Bautzen . .	2,627	1,854,181	1,916,632	729·6
Leipzig	1,377	1,307,256	1,367,846	993·4
Chemnitz . . .	804	980,838	1,038,595	1291·8
Zwickau . . .	978	852,006	873,579	893·2
Total . . .	5.786	4.994.281	5.196.652	898·1

Of the population, according to the census of June 16, 1933, 2,484,098 were males and 2,712,554 females.

The movement of the population is shown in the following table :—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus (+) or Decrease (—) of Births
1930	45,112	78,799	2,875	16,952	52,783	+23,141
1931	38,153	68,270	2,500	15,088	53,859	+11,911
1932	38,574	61,767	2,116	13,525	52,754	+6,897
1933	50,000	60,332	1,910	11,902	55,447	+2,975

Divorces in 1933, 4,122.

The population of the principal towns was, on June 16, 1933 :—

Leipzig	713,470	Zittau	39,719	Riesa	26,248
Dresden	642,743	Freital	36,829	Aue	25,836
Chemnitz	350,734	Freiberg	36,448	Meerane	24,855
Plauen	113,855	Pirna	33,656	Döbeln	24,774
Zwickau	84,701	Reichenbach	32,276	Planitz	24,172
Meissen	46,992	Glauchau	31,199	Werdau	21,587
Bautzen	41,951	Crimmitschau	27,988		

Religion.—The vast majority of the inhabitants of Saxony are Protestants. In 1933, there were, Protestants, 4,522,856 (87 per cent.); Roman Catholics, 196,839 (4 per cent.); other Christians, 3,887; Jews, 20,584 (0·4 per cent.). Of the Lutheran Church, the head is the Bishop at Dresden; and it also has a representative Synod (*Synode*) with 27 clerical and 47 lay members (1934).

Education.—On May 15, 1931, there were 2,105 public elementary schools with 16,950 teachers and 568,203 pupils, besides 52 private and chapter schools. In addition there were 1 technical high school at Dresden (summer term, 1934, 1,991 students), 1 Commercial College (summer term, 1934, 358), 1 mining academy at Freiberg (summer term, 1934, 115 students), further, and on May 15, 1933, 18 Gymnasia, 28 Realgymnasia, 20 'Oberrealschulen,' 32 other high schools, 15 higher girls' schools and 'Studienanstalten,' altogether 113 educational establishments, exclusive of the University and a large number of industrial, commercial, agricultural, musical, and art institutes. The University of Leipzig is one of the largest in Germany (summer term, 1934, 4,468 students). *See* under *Germany*.

Justice and Crime.—Saxony has one 'Oberlandesgericht,' at Dresden, 7 'Landgerichte,' and 106 'Amtsgerichte.' The 'Reichsgericht' has its seat at Leipzig. In 1932, 61,379 persons were convicted of criminal offences.

Finance.—The following table shows revenue and expenditure for five financial budget periods ending March 31.

—	1930–31	1931–32	1932–33	1933–34	1934–35
	Rm.	Rm.	Rm.	Rm.	Rm.
Revenue	411,353,289	343,679,001	345,932,380	326,435,310	326,252,890
Expenditure	425,076,876	365,643,187	345,932,380	326,435,310	326,252,890
Extraordinary budget	58,579,624	—	15,500,000	17,424,400	636,000

Debt, September 30, 1934, 367,465,000 marks.

Production and Industry.—Saxony is, in proportion to its size, the busiest industrial State in the German Republic, rivalled only by the leading industrial provinces of Prussia. Textile manufactures form the principal

branch of industry, but mining and metal working are also important. According to the Industrial Census of June 16, 1933, Saxony had 341,467 industrial establishments with 1,502,599 workpeople (540,120 women).

In 1934, of the total area, 2,481,598 acres were under cultivation, viz.:—1,870,197 acres (75·36 per cent.) arable; 438,127 acres (17·66 per cent.) meadow; 118,719 acres (4·78 per cent.) orchards and gardens; 54,154 acres (2·18 per cent.) pasture; and the rest vineyards.

Areas under the chief crops in acres and the yield (in metric tons) in 1934:—wheat, 260,316 (225,835); rye, 402,189 (306,139); barley, 99,677 (87,207); oats, 344,221 (237,140); potatoes, 275,523 (2,112,229); meadow, 438,127 (hay, 489,419). The census of live-stock taken in December, 1933, showed 140,273 horses, 749,408 cattle, 888,136 pigs, 139,249 goats, and 65,328 sheep.

The following shows the mining statistics for three years:—

Year	Coal Mines					Other Mines			Total		
	No. of Mines	Hands	Production in metric tons		Value in 1,000 reichsmarks	No. of Mines[1]	Hands	Produce in 1,000 reichsmarks	No. of Mines	Hands	Produce in 1,000 reichsmarks
			Coal	Lignite							
1931	50	23,412	3,146,000	11,384,000	90,789	15	137	175	65	23,549	90,964
1932	47	22,063	3,131,000	10,534,000	78,060	15	96	81	62	22,159	78,141
1933	43	22,478	3,201,000	10,920,000	78,803	15	106	13	58	22,584	78,816

[1] Exclusive of mines not worked.

In 1933–34, 135 breweries produced 50,696,500 gallons of beer.

In 1933 there were 356 savings banks having to the credit of their depositors at the end of the year, 911,347,000 Reichsmarks.

SCHAUMBURG-LIPPE.

(Land Schaumburg-Lippe.)

Under the National-Socialist (Nazi) régime, the Constitution was set aside, and popular government and the Diet abolished. By a law of the Government of the *Reich* of April 7, 1933, the State is under the absolute rule of a *Statthalter*, or Governor, who is the personal representative of Chancellor Hitler.

Governor (*Statthalter*).—Dr. Alfred *Meyer*. (Also for Lippe.)

Area, 131 sq. miles; population (1933), 50,023 (24,509 males and 25,514 females).

In 1933 there were 48,913 Protestants, 674 Catholics and 187 Jews. Bückeburg, the capital, had, in 1933, 6,686 inhabitants.

For the financial year 1934 the budget balanced at 2,734,840 Reichsmarks. Public debt: December 31, 1933, 1,800,000 Reichsmarks.

OFFICIAL PUBLICATION.

Schaumburg-Lippische Landesanzeigen bezw. Landesverordnungen.

THURINGIA.

(LAND THÜRINGEN.)

The seven Thuringian States after much negotiation, which commenced in May, 1919, and ended on December 24, 1919, combined into one State. The two Republics of Reuss had by a law of April 4, 1919, already been merged into the one People's State of Reuss, and Coburg had elected to merge with Bavaria. On March 31, 1922, the country was divided into 10 town and 15 country districts (*Kreise*) and one sub-district (*Kreisabteilung*).

Under the National-Socialist (Nazi) régime, the Constitution was actually, though not *de jure*, set aside, popular government abolished, and the Diet suspended. By a law of the Government of the *Reich* of April 7, 1933, the State is under the absolute rule of a *Statthalter*, or Governor, who is the personal representative of Chancellor Hitler.

Governor (*Statthalter*).—Fritz *Sauckel*.

Area and Population.—The following table shows the area and population of the political districts:—

Districts[1]	Area in sq. miles	Population Census June 16, 1933	Population per sq. mile 1933	Districts[1]	Area in sq. miles	Population Census June 16, 1933	Population per sq. mile 1933

Stadtroda	323	78,105	242		4,413	1,227,911	278
Weimar	497	103,265	208				
Eisenach	453	100,945	223	Grand Total	4,541	1,659,510	365

[1] Kreise. [2] Kreisabteilung.

The total area is 4,541 sq. miles; population, 1933, 1,659,510 (806,022 males and 853,488 females). Principal country towns with population in

1933: Meiningen, 18,833; Rudolstadt, 16,863; Saalfeld, 19,148; Sondershausen, 10,677; Sonneberg, 20,283.

Movement of population for 3 years:—

Year	Marriages	Births		Deaths	
		Total	Males	Total	Males
1930	14,277	29,030	14,889	17,390	8,759
1931	12,757	25,596	13,186	17,687	8,713
1932	12,999	24,244	12,609	18,121	9,041

Religion and Education.—In 1933 there were 1,485,636 (89·5 per cent.) Protestants; 44,894 (2·7 per cent.) Catholics; and 2,882 (0·2 per cent.) Jews.

On May 1, 1932, there were in Thuringia 1,515 elementary schools with 4,695 teachers (640 females) and 217,495 pupils (108,005 girls); 76 public high schools with 1,099 teachers (176 females) and 19,281 pupils (7,009 girls). For the University of Jena, *see* under *German Universities*.

Finance.—The ordinary budget for the year 1934 balanced with a revenue and an expenditure at 114,105,770 Rm. Debt, December 31, 1933, 149,000,000 Rm.

Production and Industry.—Of the total area 1,325,454 acres (46 per cent.) are arable land, 976,154 acres (34 per cent.) forest, and 316,395 acres (11 per cent.) pasture land. In 1934 there were 209,228 acres under wheat; 164,200 acres under rye; 200,347 acres under oats; and 185,384 acres under potatoes.

On December 5, 1933, Thuringia had 73,586 horses, 461,830 head of cattle, 645,431 pigs, 124,394 sheep, and 172,891 goats.

The deposits of the savings banks, the saving department of the Thuringian State Bank included, amounted on August 30, 1934, to 358,995,100 reichsmark.

WÜRTTEMBERG.

(LAND WÜRTTEMBERG.)

Under the National-Socialist (Nazi) régime, the Constitution was set aside, popular government abolished, and the Diet suspended. By a law of the Government of the *Reich* of April 7, 1933, the State is under the absolulute rule of a *Statthalter* or Governor, who is the personal representative of Chancellor Hitler.

Governor (*Statthalter*).—Wilhelm *Murr*.

For administrative purposes the country is divided into the City of Stuttgart, 61 districts (Oberämter), and 1,856 communes (Gemeinden).

Area and Population:—

Districts	Area in Sq. Miles	Population		Population per Sq. Mile 1933
		1925	1933	
Neckar	1,285	964,586	1,036,298	806
Black Forest (Schwarzwald)	1,844	595,508	620,511	340
Jagst	1,984	426,394	430,202	218
Danube (Donau) . .	2,417	593,747	609,313	255
Total . . .	7,530	2,580,235	2,696,324	360

In 1933, there were 1,306,531 males and 1,389,793 females.

In 1933, 1,527,481 or 56·7 per cent., lived in communes of 2,000 inhabitants and upwards, and 1,168,843, or 43·3 per cent., in other communes. Foreigners, 9,431 and Stateless, 559 in 1933.

The movement of the population for three years was:—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1931	19,893	44,293	1,072	4,727	31,630	12,663
1932	18,891	41,854	991	4,446	29,382	12,472
1933	21,709	41,316	958	4,120	29,388	11,928

Divorces in 1933, 1,012.

The population in 1933 of the largest towns was as follows:—

Stuttgart .	415,028	Tübingen .	23,257	Tuttlingen .	17,225
Ulm . .	62,472	Göppingen .	23,007	Geislingen .	14,349
Heilbronn .	60,308	Heidenheim	21,903	Ebingen . .	14,218
Esslingen .	43,089	Schwenningen	20,605	Friedrichchafen	13,306
Reutlingen .	34,135	Gmünd .	20,131	Aalen . .	12,703
Ludwigsburg .	32,795	Ravensburg	18,930	Schramberg .	11,741

Religion.—The various creeds numbered as follows at the census of 1933:—Protestants, 1,811,797; Roman Catholics, 839,678; other Christians, 408; Jews, 10,023; others, 34,418.

At the head of the Evangelical Church stands a Bishop, who with a Church Council is responsible for its administration. The Roman Catholics are under a bishop, who has his see at Rottenburg, and is suffragan to the archbishop of Freiburg in Baden. The administration of the Jewish community is in the hands of the Oberrat der israelitischen Religionsgemeinschaft Württembergs.

Education.—In 1933-34 there were for middle and elementary education 2,335 schools, with 326,109 children. There were 150 higher boys' schools, including 42 gymnasia, with 13,590 pupils; 108 modern schools with 14,942 scholars; 27 high schools for girls with 7,901 pupils. General con-

tinuation and Sunday schools were attended by 8,852 males and 20,367 females; the 151 trade schools had 26,974 pupils; the 73 commercial schools had 7,867 pupils. There are, besides, the Technical High School at Stuttgart, the Agricultural High School at Hohenheim, and several agricultural and other special institutes. The total expenditure on education amounted in 1934-35 to 58,033,000 marks. For Tübingen University, *see* under *Germany*.

Justice.—In addition to other tribunals there is one Oberlandesgericht at Stuttgart.

Finance.—The estimated revenue for the year ending March 31, 1935, was 116,593,540 Rm., and the expenditure 122,440,509 Rm. Public debt, March 31, 1934, 64,000,000 Rm.

Production.—Württemberg is primarily an agricultural State, and of the entire area (4,876,897 acres), 3,021,705 acres, or 62 per cent., are under cultivation, and 1,520,680 acres, or 31 per cent., under forest.

Areas under the principal crops and yield in metric tons in 1933:—

—	Acres	Yield, metric tons	—	Acres	Yield, metric tons
Wheat . .	236,605	176,985	Oats . . .	289,775	148,404
Rye . . .	62,032	35,717	Potatoes . .	217,667	840,772
Barley . .	266,767	166,726	Hay . . .	1,000,460	2,023,610
Spelt. . .	183,162	94,473	Hops. . .	3,102	892

Vines in 1933, 30,235 acres, yielded 4,470,268 gallons of wine. In 1933 there were produced 40,764,900 gallons of beer. There are active iron foundries and salt works.

GREECE.

(HELLENIC REPUBLIC.)

GREECE gained her independence from Turkey in 1821–29, and by the Protocol of London, of February 3, 1830, was declared a kingdom, under the guarantee of Great Britain, France, and Russia. The crown was accepted by Prince Otto of Bavaria, who ascended the throne January 25, 1833, being under the age of eighteen. He was expelled the Kingdom, after a reign of 29 years, in October, 1862, which event was followed by the election, in 1863, under the directing guidance of the three guaranteeing Powers, of Prince William, younger son of Christian, IX, King of Denmark as King George I. George I., who was assassinated on March 18, 1913, was succeeded by his son Constantine, who reigned until June 11, 1917, when he was excluded from the throne by the allied Powers. Alexandros, second son of King Constantine, then reigned till his death on October 25, 1920. Constantine returned to Greece on December 19, 1920, reigned until his abdication on September 27, 1922, and died in exile on January 11, 1923. He was succeeded by his eldest son George II, who was forced to leave Greece on December 18, 1923.

Constitution and Government.

By a *plébiscite* on April 13, 1924, the Republic was established. In the voting 758,742 votes were for a Republic and 325,322 votes against. A new Constitution was published on September 22, 1926. It was revised by the Chamber elected on November 7, 1926. The new constitution was published on June 3, 1927. According to the constitution the President of the Republic is elected every five years by the Chamber and the Senate. The Chamber of deputies is composed of 200 to 250 members elected every four years by universal suffrage. The Senate is composed of 120 Senators, of whom nine-twelfths, at least, are elected by the people every nine years, the remainder may be elected by the Chamber and the Senate in a common meeting. By a decree dated January 31, 1930, women were granted the right to vote at municipal elections.

President of the Republic.—Alexander *Zaïmis* (elected December 14, 1929, re-elected December 14, 1934).

Elections to the Chamber were held on March 5, 1933, with the following result: Liberals and National Union (Venezelist), 111; Popular Party, 135.

The Ministry, constituted on March 10, 1933, and modified March 21, 1934, and March 5, 1935, is as follows:—

Premier and Minister for Foreign Affairs.—Panagis *Tsaldaris.*
Minister of Finance.—George *Pesmazoglu.*
Minister of War.—General George *Kondylis.*
Minister of Marine.—Admiral *Dousmanis.*
Minister of the Interior.—G. *Chloros.*
Minister of Agriculture.—Senator *Decasos* (December 28, 1934).
Minister of Justice.—S. *Taliadouros.*
Minister of National Economy.—M. *Stefanopoulos* (December 28, 1934).
Minister of Communications.—Peter *Rallis.*
Minister of Aviation.—M. *Schinas.*
Minister of Education.—J. *Makropoulos.*
Minister of Public Welfare and Minister of Health.—M. *Kyrkos.*

Area and Population.

The total area of the country is 130,199 square kilometres or 50,270 square miles, of which the mainland accounts for 41,652 square miles and the islands account for 8,618 square miles.

The population of the country was 6,204,684, according to the Census of May 16, 1928. By geographical divisions the population was as follows:—

Geographical division	Area in sq. miles [1]	Population	Geographical division	Area in sq. miles [1]	Population
Central Greece and Euboea	9,740	1,601,934	Macedonia	13,438	1,411,769
Thessaly	5,148	493,213	Epirus	3,610	312,634
Ionian Islands	742	213,157	Aegean Islands	1,485	307,734
Cyclades	996	129,702	Crete	3,199	386,427
Peloponnese	8,514	1,044,235	Western Thrace	3,396	303,879

[1] Revised as at December 31, 1933.

The following table shows the Departments in geographical divisions:—

Department	Population	Capital	Population of Capital
Central Greece and Euboea—			
Aetolia and Arcanania	220,055	Missolonghi	9,270
Attica and Boeotia	1,033,759	Athens	452,919

Hevros	123,077	Alexandroupolis	12,009
Rhodope	180,802	Komotene	30,136
	6,204,684		

There were 3,076,235 males and 3,128,449 females according to the 1928 census, while the urban population was shown as 33 per cent., and rural population 67 per cent. On December 31, 1933, the population was estimated at 6,620,000.

Mount Athos, the easternmost of the three prongs of the peninsula of Chalcidice, is inhabited by the monks of Greek (17), Russian (1), Bulgarian (1), and Serbian (1) monasteries and hermitages (*Sketai*). The monks and the novices till the fields, tend the vineyards, take in the harvest, fish, weave, transact business in their own shops, and, indeed, carry on the secular duties of the community as well as the sacred. Originally inhabited by one mediæval ascetic, Peter the Athonite, it has in the course of time grown to a religious colony of 4,858 males (Census of 1928), distributed in 20 monasteries with their respective dependencies; and after having passed in the fifteenth century from the sovereignty of the Greek Emperors of Byzantium to that of the Sultans it fell again into the hands of the Greeks, who occupied it in November, 1912. Each of the 20 monasteries is a sort of little republic in itself, those of the 'coenobitic' category being ruled by abbots elected by the brethren of the monastery, while the 'idiorrhythmic' monasteries are administered by a board of overseers (*epitropoi*) elected for a certain term of years. For centuries the peninsula was administered by a Council of 4 members, and an Assembly of 20 members, the latter consisting of 1 deputy from each monastery. The Greek government on September 10, 1926, recognized the autonomous form of government existing in Mount Athos for centuries and ratified it by Articles 106–109 of the Constitution. It has also sanctioned by a law the Charter of Mount Athos, which was drawn up at the extraordinary double meeting held by representatives of its 20 monasteries on May 20, 1924.

Since 1925, there has been a fiscal Free Zone in the town of Salonika covering an area of 245,180 square yards on land and 188,968 square yards on water. Since 1924 there has been a Yugoslav Free Zone in the port of Salonika with an area of 73,536 square yards on land and 40,119 square yards on water with 909 miles of railway.

Vital statistics for 3 years:—

Year	Living Births	Marriages	Deaths	Surplus of births over deaths
1931	199,243	45,517	114,369	84,874
1932	185,523	39,283	117,593	67,930
1933	187,523	45,358	110,362	77,161

Emigration in 1931, 15,060; 1932, 19,712.

Religion.

According to the census of 1928, there were 5,961,529 adherents of the Greek Orthodox Church, 35,182 Catholics, 9,003 Protestants, 126,017 Mussulmans, 72,791 Jews and 162 belonging to other religions. By the terms of the Constitution of 1864, the Greek Orthodox Church was declared the religion of the State, but complete toleration and liberty of worship was guaranteed to all other sects. The government of the Orthodox Church is at present vested in a permanent council, called the Holy Synod, consisting of the Metropolitan of Athens as president and 12 metropolites, who must during their year of office reside at Athens. The Orthodox Church has 32 archbishops in the old territory and 38 archbishops and 7 bishops in the new territories. By agreement with the Œcumenical Patriarchate of Constantinople in 1929 the sees within the spiritual jurisdiction of the latter in the new territories were provisionally attached to that of the Holy Synod of Athens for convenience in administration.

Education (Provisory Elements).

All children between the ages of seven and twelve years must attend school, but the law is not well enforced in country districts.

There were (1931–32) 542 infant schools with 571 teachers and 30,631 pupils (15,680 boys and 14,951 girls); 7,703 primary schools with 13,561 teachers (8,359 men and 5,202 women) and 791,658 pupils (436,206 boys and 355,452 girls). For secondary education there were 428 high schools with 3,098 teachers (2,680 men and 418 women) and 65,217 pupils (46,643 boys and 18,574 girls). There were 28 commercial schools with 327 teachers (300 men and 27 women) and 2,790 pupils (2,108 boys and 682 girls), and 10 private commercial schools with 70 teachers (66 men and 4 women) and 1,250 pupils (1,162 boys and 88 girls). There were 15 agricultural schools with 67 teachers and 499 pupils; 31 practical agricultural schools with 93 teachers (men) and 646 pupils (631 boys and 18 girls). There are also 11 secondary agricultural schools with 11 teachers (men) and 345 pupils (276 boys and 69 girls). There were also 6 seminaries with 22 teachers and 367 pupils. There were also 1 commercial high school with 19 professors and 487 students (462 boys and 25 girls), 1 agricultural high school with 20 professors and 167 students (166 boys and 1 girl); 4 military colleges with 123 professors and 1,219 students, 9 practical schools for officers with 145 teachers and 520 students, and 2 other inferior military schools with 32 teachers and 737 pupils. Also 3 naval colleges with 70 professors and 265 students, and 10 inferior naval schools with 90 teachers and 1,768 pupils. There were also 3 aviation schools with 22 teachers and 135 pupils. There were also 26 conservatories and other musical schools with 271 professors and teachers (131 men and 140 women) and 5,091 pupils (1,725 boys and 3,366 girls. There are 2 universities in Athens, the National University (founded 1836) and the Capodistria University, with 131 professors and 6,820 students (6,240 men and 580 women), and 1 at Salonika (founded in 1925), with 44 professors and 962 students. The Polytechnic, with 5 faculties and 3 annexed schools, 55 professors and 701 students, provides instruction in electricity, chemistry, mechanics, architecture, surveying. The School of Fine Arts provides instruction in painting, sculpture, etc., with 11 professors and 189 students (117 boys and 72 girls). There was also a superior private school of political sciences with 189 students (188 boys and 1 girl).

The Ministry of Education is also charged with the Service of Antiquities, managed by an Archæological Council, which is responsible for the

conservation and reparation of ancient monuments of all periods (Prehistoric, Classical, Byzantine and Mediæval), the upkeep of museums and the conduct of excavations.

British scholarship is represented in Athens by the British School of Archæology, which, by the aid of grants from the Government, universities, and private subscribers, is able to encourage and carry out scientific research of all kinds, but especially art, archæology and history. Members of the school have in recent years been responsible for the excavations at Knossos, in Crete, in Melos, at Sparta, in Thessaly, at Mycenae, and elsewhere. There are also similar French, American, Italian, Austrian and German institutions.

Finance.

The estimates of revenue and expenditure for 6 years are as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Drachmai	Drachmai		Drachmai	Drachmai
1929-30	9,855,375,913	9,847,375,962	1932-33	8,676,294,740	8,673,512,592
1930-31	10,341,596,153	10,332,887,544	1933-34	9,747,570,530	10,400,382,606
1931-32	10,240,512,053	10,234,259,924	1934-35	10,391,753,107	10,733,487,748

Particulars of the budgets for 1933-34 and 1934-35 are given as follows:

Revenue	1933-34	1934-35	Expenditure	1933-34	1934-35
	Thousands	Thousands		Thousands	Thousands
Ordinary:	drachmai	drachmai	Ordinary:	drachmai	drachmai

The total public debt of Greece amounted on December 31, 1933, to 43,115,772,707 drachmai, distributed as follows: Loans in gold, 32,087,586,974 drachmai; loans in banknotes, 6,257,934,031; floating debt, 4,688,561,642; liabilities according to the treaty of Lausanne, 81,690,060 drachmai. The service on this debt during the fiscal year ended March 31, 1933, is estimated at 1,399,131,372 drachmai.

In accordance with the peace preliminaries between Greece and Turkey and the Greek Law of Control of March, 1898, the financial commission of delegates representing France, Great Britain, and Italy (the mediating Powers)

is established at Athens in direct relation with the Greek Minister of Finance. The public debt of Greece is in large measure under the control of this commission. To this commission were assigned, for the payment of the interest on the external debt, the revenues (for the most part in Old Greece) from certain Government monopolies, the stamp duty, and the import duties at the port of the Piræus. The total income from these sources was, 1934, 245,958,860 drachmai from monopolies (tobacco, stamps and stamped paper), and 924,094,627 from the Piræus customs.

The payments made by the commission in 1933 for the service of Greek foreign debts totalled 461,002,840 drachmai as compared with 533,345,879 drachmai in 1932.

The collection of the assigned revenues and the administration of the monopolies are entrusted to a Greek Company, called the 'Société de Régie des Revenues affectés au Service de la Dette Publique,' which is under the control of the international commission.

Defence.

I. Army.

Military service in Greece is compulsory and universal. It commences in the 21st year, and lasts up to the 50th. The normal term of service in the active army is 12 months for all arms, followed by 19 years in the first reserve of the active army and 8 years in the second. The normal annual contingent of recruits is about 50,000. Each annual contingent is called up for service in the active army in three batches on February, May and September.

The country is divided into 12 military areas. To these correspond 12 divisions and 1 brigade. Moreover there are two brigades of cavalry and a number of units (telegraphists, railwaymen and engineers), as well as of Army Service Corps directly under the Minister of War. Each division contains 2 or 3 regiments of infantry (6 battalions) and one regiment of Mountain Artillery (3 or 4 batteries). The Air Force consists of 3 flying regiments each of 4 flights with 118 aeroplanes.

The effective strength in 1934 was 4,993 officers and the number of other ranks serving was 43,244.

The infantry is armed with the Mannlicher-Schönauer and the Lebel rifle, the polybole guns, Hotchkiss as well as French ones, and the mitrailleuses Schwargloze, St. Etienne and Hotchkiss. The artillery is armed with mountain guns of 65 mm. and Schneider 75 and 105 m. 1919 and by field guns Schneider, M.P.O.F. and Krupp as well as with heavy short guns, Schneider 155. The budget expenditure for the army for 1933–34 amounted to 1,072,612,455 drachmai.

II. Navy.

The Greek Navy is a defensive force composed mainly of light craft. The principal vessels are as follows:—

—	Launched	Displacement Tons	Armour Belt In.	Armour Gun In.	Principal Armament	Torpedo Tubes	Horse Power	Max. Speed Knots
Giorgios Averoff.	1910	9,960	8	8-6½	4 9·2; 8 7·5in.; 16 3in	3	19,000	22·5
Helle[1] . . .	1912	2,600	—	—	3 6in.; 2 3in. . .	2	7,500	20·3

[1] Cruiser purchased 1914, originally built for China. Now fitted for minelaying.

There are 12 destroyers, 9 torpedo boats, 4 minelayers, 6 submarines, and a variety of miscellaneous craft. The *Giorgios Averoff* and *Helle* have been completely refitted and modernized.

A programme of new construction, covering a term of several years, and comprising 1 cruiser, 10 destroyers and a number of submarines and other vessels, was recently brought forward. It also includes provision for further extension of the principal dockyard at Salamis, to which new docks and workshops have already been added recently. On the coast of Scaramanga, opposite Salamis, new buildings have been erected for the Torpedo and Mining School.

The services of a British naval mission to reorganize the Greek fleet were lent by the Admiralty from time to time between 1910 and 1932.

Production and Industry.

Greece is mainly an agricultural country. Of the total area only one-fifth is cultivable. The total area under cultivation in 1933 was 2,081,090 hectares (5,140,292 acres). Forest area is 2,406,502 hectares (5,944,059 acres), of which 4,121,119 acres were State owned.

By the draining of Lake Copais, an area of about 53,000 acres has been acquired for agricultural purposes. Irrigation and drainage canals, farm roads and buildings are being constructed, tree planting is undertaken, and the breed of cattle is being improved.

The acreage and production of the chief crops for two years were as follows:—

—	Area in Acres		Production in Metric Tons	
	1933	1934[1]	1933	1934[1]
Wheat . . .	1,732,450	2,069,682	772,517	692,803
Barley . . .	559,021	594,562	229,470	212,627
Maize . . .	652,835	464,335	273,312	—
Oats . . .	344,986	346,946	134,369	103,954
Tobacco . . .	193,889	164,272	54,878	—
Cotton . . .	71,587	80,097	23,012	—
New wine . .	355,721	386,866	386,647	—
Currants . .	183,635	183,324	167,165	246,158

[1] Provisional figures.

Olives are abundant, about 380,000 acres being under cultivation; olive oil production in 1933 was 105,355 metric tons, valued at 1,875,013,225 drachmai, as compared with 134,320 metric tons, valued at 1,962,876,798 drachmai in 1932. Fruit production in 1933 was: lemons, 100,135,000, valued at 39,219,577 drachmai; oranges, 162,804,000 (78,569,656 drachmai); mandarins, 73,150,000 (26,284,361 drachmai); apples, 51,761 metric quintals (18,920,264 drachmai); pears, 137,778 metric quintals (32,503,814 drachmai); figs (dried), 235,596 metric quintals (116,036,165 drachmai). Rice is cultivated in Greek Macedonia—Vodena, near Salonika, being the principal centre. Two kinds of cheese are produced in Greece—sliced cheese in brine (commercially known as Fetta cheese) and head cheese.

There were in Greece (1933) 341,165 horses, 169,473 mules, 374,480 asses, 913,513 cattle, 7,427,129 sheep, 4,951,584 goats, and 506,807 pigs.

Greece has a great variety of mineral deposits. The ore and other minerals worked include iron, iron-pyrites, emery, copper, zinc, lead, silver, manganese, aluminium, antimony, nickel, magnesite ore, lignite, sulphur ochre, bitumen, marble (white and coloured), and various other earths. The Laurium district, Thessaly, Euboea, the Aegean islands and other parts of Greece yield a large output of ores and earths.

The principal mineral output of Greece for three years is given as follows (in metric tons) :—

—	1930	1931	1932	—	1930	1931	1932
	Metric tons	Metric tons	Metric tons		Metric tons	Metric tons	Metric tons
Iron ore .	256,161	235,967	46,022	Chromites	23,402	5,634	1,555
Iron pyrites .	177,818	141,442	86,767	Emery .	12,598	11,629	8,953
Lead (ore) .	41,610	4,424	203	Lignites .	129,623	105,208	—
Magnesite (raw)	68,581	49,990	44,699				

Industry in Greece is making considerable progress. The leading industrial products are olive oil, wine, textiles, chemicals, articles of food. In 1933 the value of the production of industries was 7,238,000,000 drachmai, as compared with 6,445,000,000 drachmai in 1932.

Commerce.

Value of the commerce of Greece (in thousands of drachmai) for five years was as follows:—

—	1930	1931	1932	1933	1934
	1,000 Drachmai	1,000 Drachmai	1,000 Drachmai	1,000 Drachmai	1,000 Drachmai
Imports . . .	10,525,245	8,763,320	7,869,989	8,576,776	8,792,000
Exports . . .	5,985,686	4,203,591	4,757,385	5,379,566	5,469,000

Principal special imports and exports in 1932 and 1933 : —

Categories.	Imports		Exports	
	1932	1933	1932	1933
	1,000 Drachmai	1,000 Drachmai	1,000 Drachmai	1,000 Drachmai

All other countries	386,937	1,252,907	173,330	242,649
Total	7,869,989	8,576,776	4,757,385	5,879,566

The staple article of import from Greece into the United Kingdom (Board of Trade Returns) is currants, the value of which amounted in 1933 to 1,571,545*l.* Other articles of import in 1933 were:—raisins, 135,713*l.*; tobacco, 19,662*l.* Of the exports from the United Kingdom to Greece in 1933, cotton piece goods were valued at 484,840*l.*; woollens, 124,374*l.*; coal, 113,513*l.*; iron and steel, 160,997*l.*; machinery, 72,918*l.*

The total trade between Greece and the United Kingdom for 5 years was as follows:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Greece to U.K.	2,049,940	2,026,357	2,340,435	2,055,422	2,104,131
Exports to Greece from U.K.	3,731,692	3,179,021	2,177,511	1,946,430	2,666,011
Re-exports to Greece from U.K.	195,131	135,880	124,354	107,324	239,499

Navigation and Shipping.

The merchant navy of Greece on June 30, 1934, had 594 steam and motor ships of 1,600,359 tons. In the year 1933, 6,176,032 tons of shipping in the foreign trade entered the ports of Greece, while 5,961,568 tons cleared.

Internal Communications.

There are about 8,611 miles of roads in Old and New Greece, and 570 miles under construction. There is a canal (opened November 9, 1893) across the Isthmus of Corinth (about 4 miles). In 1933, 5,806 steamers of 2,546,849 tons and 2,057 sailing vessels of 42,585 tons passed through the canal.

Railways open for traffic total a length of 1,668 miles, of which 823 miles are operated by the State. The operating revenues of the State railways in 1933–4 reached 290,300,000 drachmai, compared with 254,500,000 drachmai in 1932–33, while operating expenses were 318,800,000 drachmai compared with 315,100,000 drachmai in 1932–33.

There is an air service, run by a Greek company, which connects Athens and Salonica, and Athens and Janninan (Epirus). In 1932–33 6,828 passengers were carried, and 101,640 kilogrammes of freight. A number of foreign air companies also operate services in Greece.

The telegraph lines on December 31, 1932, had a length of 13,662 miles, with 33,625 miles of wire. The number of offices was 4,298. They handled 3,715,985 inland telegrams, and 746,742 international, of which 326,798 were despatched abroad and 419,944 were received.

In 1931 there were 236 miles of urban telephone lines with 2,430 miles of wire, and 4,586 miles of inter-urban lines with 15,394 miles of wire. The number of subscribers was 9,500, and the number of offices 25.

There were 1,296 post offices at the end of 1932, and there passed through the post in that year:—Inland post:—letters, 47,991,617; post-cards, 1,740,585; printed matter, journals and samples, 33,385,670; postal orders, 1,265,968, of a total value of drachmai 1,136,250,481; parcels, 525,986. Foreign postal service (dispatched):—letters, 10,349,227; post-cards, 12,214,255; printed matter and journals, 2,670,536; parcels, 18,316. Foreign postal service (received):—letters, 12,214,255; post-cards, 1,037,458; journals and other printed paper, 4,390,580; parcels, 65,612; money orders, 17,750, of a total value of drachmai 27,395,850.

Banking, Money, Weights and Measures.

The National Bank (founded in 1841) was authorised to issue bank notes, the amount being increased each time the privilege of the bank was extended. According to a decree of May 12, 1928, the note-issuing privilege of the National Bank was transferred to the new issuing bank, the Bank of Greece, as from May 14, 1928, in accordance with the conditions of the Geneva Protocol of September 15, 1927. By the same decree, the drachma was stabilised, its gold content being fixed at 0·01952634 grammes of gold, corresponding to 77·02 drachmai to the U.S. dollar, but the stabilisation has been suspended since April 26, 1932. On January 31, 1935, the total bank-note circulation amounted to 5,267,790,000 drachmai; total gold, 3,967,038,000 drachmai.

On March 31, 1932, there were 33 banks in Greece with deposits amounting to 16,319 million drachmai, and capital, 4,294 million drachmai.

The *Drachma* consists of 100 *leptá*. Nickel coinage in circulation consists of 10, 20 and 50 *leptá*, 1 and 2 drachmai; there are also pieces of 5, 10, and 20 drachmai, made of silver and nickel.

In 1920 the metric system was made compulsory. The use of the Gregorian Calendar has been authorised as from March 1, 1923.

The old weights and measures are still met with. The principal are:—

1 oke = 400 drams = 2·832 lbs.
1 kantar = 44 okes = 124·608 lbs.
1 pik = 27 inches.
1 stremma = ·2471 acres.

The Great Venetian pound (G.V. lb.) is used universally in the currant trade; 2,128 G.V. lbs = 1 long ton.

Diplomatic Representatives.

1. Of Greece in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Charalambos Simopoulos (appointed November 1, 1934).

Counsellor.—Pierre Almanachos.

Secretaries.—Philon Philon and Alexander Romanos.

Honorary Attaché.—Philip Argenti.

Commercial Counsellor.—Spero X. Constantinidi.

Consul-General.—George Dracopoulos.

Secretary-Archivist.—N. Pendjiky.

There are consular officers of Greece at London, Birmingham, Cardiff, Dublin, Glasgow, and various other towns.

2. Of Great Britain in Greece.

Envoy Extraordinary and Minister Plenipotentiary.—S. P. P. Waterlow, C.B.E. (appointed November 30, 1933).

First Secretary.—E. A. Walker.

Third Secretary.—J. W. Nicholls.

Commercial Secretary.—A. N. Cumberbatch, M.B.E.

Naval Attaché.—Capt. H. Pott, M.V.O., R.N.

Military Attaché.—Major F. A. Sampson.

Air Attaché.—Group Capt. T. G. Hetherington, C.B.E.

Consul-General at Salonika.—E. G. Lomas, O.B.E.

There are also British Consular representatives at Athens, Piraeus, Candia, Canea, Corfu, Patras, Samos, Volo, Zante, Syra, and Mitylene.

Statistical and other Books of Reference concerning Greece.

1. Official Publications.

Annuaire Statistique de la Grèce. First issue, 1931.

The Statistical Bureau also publishes many monthly and annual returns, among others:—Recensements de la population. Résultats statistiques généraux des recensements.—Statistique du mouvement de la population.—Statistique des causes de décès.—Statistique des élections.—Statistique annuelle du Rendement Agricole etc. de la Grèce.—(Effectif du bétail—Dénombrement des arbres.)—Bulletins du mouvement de la navigation de la Grèce avec l'étranger.—Bulletins mensuels et annuels du commerce spécial de la Grèce avec les pays étrangers.—Statistique des Postes, Télégraphes et Téléphones.—Bulletin mensuel de Statistique.

GUATEMALA.

(REPÚBLICA DE GUATEMALA.)

Constitution and Government.

THE Republic of Guatemala was established on March 21, 1847, after having formed for twenty-six years part of the Confederation of Central America. The present Constitution came into effect January 1, 1928. The legislative power is vested in a single-chambered National Assembly, consisting of representatives (one for every 30,000 inhabitants) chosen by universal suffrage for 4 years. In addition a Council of State of 7 members, 3 elected by the National Assembly, and 4 appointed by the President of the Republic, has supervision of public concessions and contracts, and large advisory powers. The President is elected for 6 years, and barred from re-election for a period of 12 years.

On April 12, 1934, delegates of the five Central American republics signed in Guatemala City a convention binding their countries to the maintenance of peace amongst themselves, accepting arbitration as the machinery for settling disputes and advocating the fullest cooperation until political union could be achieved.

President of the Republic.—General Jorge *Ubico* (February 14, 1931).

The administration is carried on, under the President, by the heads of seven departments—of Foreign Affairs, Government and Justice, Finance and Public Credit, Public Instruction, Public Works, War, and Agriculture.

Area and Population.

The area is officially given as 45,452 square miles, including the territory recently acquired from Honduras by arbitration award. The population, according to the 1920 census, was 2,004,900; on March 31, 1934, it was estimated at 2,245,593. About 60 per cent. are pure Indians, of 21 different groups descended from the Maya-Quiché tribe; most of the remainder are mixed Indian and Spanish (*ladinos*); the ruling classes are of European descent. There are about 25,000 foreigners. Recent legislation has largely curtailed the system of peonage formerly prevailing on the large plantations. Guatemala is administratively divided into 23 departments, each with a governor appointed by the President.

The capital is Guatemala City, with 134,400 inhabitants (March 31, 1934), almost all *ladinos* or descendants of Europeans. Other towns are Quezaltenango, 30,125, Coban, 26,774, and Zacapa, 18,094.

Religion and Education.

Roman Catholicism is the prevailing religion; but all other creeds have complete liberty of worship. Guatemala has an archbishopric.

In the year 1933-34, there were 2,066 primary schools with 4,052 teachers and 95,350 pupils; 16 secondary schools with 20,620 pupils and 584 teachers; teachers. The University of Guatemala (originally founded in 1678 as the University of San Carlos de Borromeo) was re-opened in 1910. The total number of schools of all kinds, 2,095, with 99,650 pupils and 4,990 National Central Institute confers degrees which are recognised in all the Central American Republics. Among the other institutions are a School of Handicraft for Women, a National Conservatoire of Music, a School of Art, and a College of Pharmacy and Natural Sciences. The national library contains 20,000 volumes.

Justice and Crime.

Justice is administered in a supreme court, 6 appeal courts, and 28 courts of first instance. All judges, under the 1927 constitution, are appointed by the National Assembly. In all the municipalities there are Justices of Peace.

Finance.

Ordinary revenue and expenditure in currency (1 quetzal = 1 U.S. dollar):—

—	1928-29	1929-30	1930-31	1932 [1]	1933 [1]
	Quetzales	Quetzales	Quetzales	Quetzales	Quetzales
Revenue . .	15,398,825	13,468,870	10,226,191	8,466,415	8,230,589
Expenditure .	15,409,150	14,342,811	12,376,589	8,272,374	7,936,288

[1] Calendar year.

Customs duties (imports and exports) provided 4,439,293 quetzales in 1933, or more than 50 per cent. of the revenue. Actual expenditure on public debt in 1933 took 916,583 quetzales.

On December 31, 1933, the external funded debt was 7,409,695 quetzales; in addition there was an interest-bearing internal debt of 2,736,745, and a floating debt of 4,835,461. Total, 14,981,901 quetzales, including English debt of 1,490,620*l.*

Defence.

Military service is compulsory between the ages of 18 and 50 (from 18 to 30 in the special reserves). Service in the active army is for 1 year for infantry and cavalry and 2 years for artillery and engineer corps. The effectives for 1934 were 315 officers and 6,576 other ranks, organised in 2 infantry corps of 14 companies and 4 groups of artillery. The military estimates for 1934–35 were 1,780,000 quetzales.

Production and Industry.

The Cordilleras divide Guatemala into two unequal drainage areas, of which the Atlantic is much the greater. The Pacific slope, though comparatively narrow, is exceptionally well watered and fertile between the altitudes of 1,000 and 5,000 feet, and is the most densely settled part of the Republic. The Atlantic slope is sparsely populated and has little of commercial importance beyond the chicle and timber cutting of the Petén, coffee cultivation of Coban region, and banana raising of the Motagua Valley and Lake Izabal district.

The soil in general is exceedingly fertile and agriculture is the most important industry. The principal crop is coffee, accounting for 62 per cent. of total exports; coffee exports in 1933, 528,988 bags; in 1932, 681,895 bags. Germans own and control between 30 and 40 per cent. of the coffee plantations of Guatemala. Next to coffee, bananas are the most important export crop; exports, 1933, 5,558,228 stems; sugar is subject to export restrictions but is ample for the home market; maize, beans and rice, forming the diet of the population, are also important domestic crops. Guatemala is, after Mexico, the largest producer of chicle gum used for chewing gum manufacture in the United States; exports in 1933 were valued at 75,680 quetzales. Crop diversification is encouraged by agricultural experiment stations maintained by the United Fruit Company. Cattle-grounds (potreros) occupy about 758,640 acres. Census of 1932 showed 369,253 cattle, 165,631 sheep, 89,416 pigs, 65,136 horses, 17,945 goats and 30,996 mules and asses.

The forest area has an extent of 1,316,482 acres. The department of Petén is rich in mahogany and dye woods, but exports are inconsiderable at the present time.

There are silver, gold, copper, iron and lead mines, but owing to the lack of transport, mining is little developed. Chrome was discovered in 1916.

Commerce.

Value of the commerce for 5 years (1 quetzal = 1 dollar, U.S.):—

	1930	1931	1932	1933	1934
	Quetzales	Quetzales	Quetzales	Quetzales	Quetzales
Imports . . .	16,473,970	12,971,234	5,742,228	5,940,735	8,073,104
Exports . . .	23,577,819	15,167,386	10,660,736	9,527,102	14,808,464

In 1932, 51 per cent. of the imports came from the United States, 13 per cent. from Great Britain, 12 per cent. from Germany, and 4 per cent. from Japan; 34 per cent. of the exports went to the United States, 34 per cent. to Germany, 17 to Holland, and 5 per cent. to France.

Total trade between Guatemala and the U.K. for 5 years (according to Board of Trade Returns) :—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Guatemala to U.K. .	57,748	87,942	208,607	187,427	338,282
Exports to Guatemala from U.K. .	230,906	195,787	174,925	199,298	183,449
Re-exports to Guatemala from U.K. .	4,153	2,399	2,097	1,982	1,687

Shipping and Communications.

The chief ports on the Atlantic side are Puerto Barrios and Livingston ; on the Pacific side, San José and Champerico.

The principal railway system is the American-owned International Railways of Central America which represents a consolidation of the Guatemala Railway (198 miles), the Guatemala Central Railway (139 miles), the Occidental Railway (51 miles), and the Ocos Railway (22 miles). Total mileage, 652. The lines extend from Puerto Barrios to Guatemala City, a distance of 198 miles, thence to San José de Guatemala, on the Pacific Ocean, a distance of 74 miles. The system extends northward to Ayutla on the Mexican border where it connects with the Pan-American Railway of Mexico. All roads are of 3 ft. gauge. Total mileage of all lines in 1932 was 737 miles.

There are (1933) 2,523 miles of highways. Motor traffic is possible everywhere on the Pacific slope during the dry season.

There are (1932) 345 post-offices. The national telegraph lines have a length of 4,067 miles, and the telephones, 3,882 miles. There are 235 telegraph offices and 12 central and 79 subordinate telephone stations. Radio stations have been opened at Quezaltenango, Guatemala City, Puerto Barrios, and Livingston. There are two broadcasting stations at Guatemala City.

Air-mail and passenger service connects Guatemala City with Puerto Barrios, Quezaltenango, Coatepeque, Flores (Petén), Coban, Tela (Honduras), Tegucigalpa (Honduras), Belize (British Honduras), San Salvador, Managua, Panama and Mexico City.

Banking, Money, Weights and Measures.

The creation of the Central Bank of Guatemala, with an authorised capital of 10,000,000 quetzales (1,875,000 quetzales paid up in 1934), and the exclusive right to issue paper money for 10 years, was decreed on June 30, 1926. This ended a paper money régime which had lasted since 1897. Total circulation of banknotes (backed by a gold reserve fixed by law at 40 per cent.) on December 31, 1933, was 5,565,558 quetzales. Gold coin in circulation totalled 261,383 quetzales. By a decree of May 12, 1932, silver coinage is limited to 2,000,000 quetzales, and copper-nickel to 500,000 quetzales.

The unit of currency is the gold *quetzal*, established May 7, 1925, equal to the United States dollar (containing 1·504665 grammes of fine gold), named after the national bird (emblematic of liberty). Gold coins in circulation, 20, 10, and 5 quetzales ; quetzal notes in circulation, 20, 10, 5, 2, 1 and 50 centavos. Silver coins are in circulation (since May 1, 1933) of the value of 25-centavo, 10-centavo and 5-centavo, and also new 2-centavo, 1-centavo and half-centavo copper-nickel coins. Old notes in circulation (no longer issued) are for 500, 100, 50, 25, 20, 5 and 1 pesos ; the 'peso

stabilized at the rate of 60 pesos = 1 quetzal (U.S. dollar), is no longer an authorised unit of currency, but the peasant still habitually calculates in terms of 'pesos.'

The Spanish *Libra* of 16 ounces	=	1·014 lbs. avoirdupois.
,, *Arroba* of 25 libras	=	25·35 lbs. ,,
,, *Quintal* of 4 arrobas	=	101·40 lbs. ,,
,, *Tonelada* of 20 quintals	=	18·10 cwt.
,, *Fanega*	=	1½ imperial bushels.
,, *Caballeria*	=	110 acres.

The metric system has been officially adopted.

Diplomatic and Consular Representatives.

1. Of Guatemala in Great Britain and Northern Ireland.

Chargé d' Affaires and Consul-General (in London).—Dr. don Francisco A. Figueroa.

Secretary.—Francisco A. Soto.

There are also Consular representatives at Glasgow, Liverpool, Southampton, Cardiff, Grimsby, and Belfast.

2. Of Great Britain in Guatemala.

Envoy Extraordinary, Minister Plenipotentiary, and Consul-General.—John Henry Stopford Birch. (Appointed August 23, 1933.)

There is a salaried Vice-Consul at Guatemala City, an unsalaried Consul at Quezaltenango, and unsalaried Vice-Consuls at Guatemala City, Puerto Barrios and San José.

HAITI.

(RÉPUBLIQUE D'HAÏTI.)

Constitution and Government.

THE Republic of Haiti, formerly a French colony, was proclaimed independent January 1, 1804, and is now governed under a Constitution ratified on July 15, 1932. After being in abeyance since 1917 (their functions performed by the Council of State, nominated by the President) the Senate and Chamber were revived in October, 1930, to sit until 1936. The President is now elected by the 36 deputies and 20 senators, sitting as a National Assembly, for a period of six years. Deputies are elected for 4 years by popular vote; senators (4 years) are chosen by electoral colleges in each department.

President of the Republic.—Sténio *Vincent*; elected November 18, 1930; term expires May 15, 1936.

The administration of the Republic is carried on, under the President, by ten departments supervised by at least five Secretaries of State and one Under-Secretary of State, for the Department of the Interior and Justice. The President may not immediately succeed himself.

In November, 1915, both Houses of the Haitian Congress ratified a treaty with the United States by which the latter agreed to assist in the establishment of responsible, orderly government. The treaty, which expires in 1936, provided for a number of American Advisers to the Haitian Government, appointed by the President of Haiti on the recommendation of the President of the United States; by a subsequent agreement the Financial Adviser-General Receiver and his assistants were succeeded on January 1, 1934, by a Fiscal Representative, appointed by the President of Haiti on the nomination of the President of the United States, to supervise the customs on behalf of holders of Haitian bonds.

Area and Population.

The area of the Republic, which embraces the western portion of the island of Hispaniola, formerly known as Haiti—the larger but less populated eastern division forming the Dominican Republic—is estimated at 10,204 English square miles. On January 1, 1929, the estimated population was 2,550,000, excluding 3,000 white foreign residents. The majority of the population are Negroes; there are also great numbers of Mulatto Haitians, the descendants of the former French settlers. Capital, Port-au-Prince, with about 125,000 inhabitants, situated on a large bay and possessed of an excellent harbour. Cap Haitien has an estimated population of 22,000; Cayes and Jacmel, 12,000 each; Gonaives, 10,000; Port de Paix, 5,000. The official language of the country is French, though most of the common people speak a dialect known as Creole French. The cultural focus of the educated classes is Paris.

Religion and Education.

The religion is Roman Catholicism. There is an archbishop with 4 suffragan bishops. The Catholic clergy are French (mostly Bretons).

Elementary education is free and compulsory; the school system is modelled after that of France, under the direction of the Secretary of Public Instruction with the country divided into 24 inspectors' districts. Primary schools (about 1,060) have 1,190 teachers and are attended by approximately 54,000 boys and 33,000 girls. There are 6 national lycées and 15 private

secondary schools, with about 6,000 pupils. Agricultural and industrial education is provided by 60 farm schools for boys and 8 urban schools for boys and girls with a total registration of 12,200. There are 2 normal schools at Port-au-Prince. Higher education (free) is offered at the National School of Medicine, the National School of Law, the School of Applied Science, and the Central School of Agriculture. In addition there are strong systems of schools maintained by the Catholic Teaching Orders and a small group under Protestant direction.

Justice.

Justice is administered by a Court of Cassation and by lower courts, all appointed for 10 years by the President and irremovable, unless impeached.

Finance.

About 90 per cent. of the revenue of Haiti is derived from customs, paid in American gold on exports and imports. Debt charges absorb about 30 per cent. of revenue.

The following table shows the revenue and expenditure (fiscal year ending September 30) for five years (in United States dollars; 5 gourdes = 1 U.S. dollar):—

	1929-30	1930-31	1931-32	1932-33[1]	1933-34
Revenue	7,729,633	6,349,316	5,604,748	5,720,000	7,350,433
Expenditure	8,369,460	7,380,275	6,793,385	6,358,715	7,374,141

[1] Budget.

Total public debt, September 30, 1934, was 60,830,000 gourdes, of which the bulk was represented by the three 'dollar loans' outstanding whose service and retirement are supervised by the American Fiscal Agent. Under various agreements, his functions cease with the extinction of the foreign debt (presumably in 1942, at the present rate).

Defence.

An armed constabulary (Garde d'Haïti), both urban and rural, was instituted in 1916 and since the withdrawal of the United States forces on August 15, 1934, is under Haytian control. The establishment (1934) consists of 215 officers and 2,602 non-commissioned officers and men.

Production.

The industries of Haiti are mainly agricultural, carried on in 7 large plains, from 200,000 to 25,000 acres, and in 15 smaller plains down to 2,000 acres. Irrigation is extensively used. The most important product is coffee of excellent quality grown by peasants. Average production, 31,800,000 kilos. Cocoa is grown extensively, and cotton and sisal are exported in increasing quantities. The cultivation of tobacco and bananas is extending. Sugar is likewise grown, and there are 2 sugar-making establishments. An extensive sugar central, founded with American capital, has been constructed near Port-au-Prince. Rum and other spirits are distilled but not exported: the rum is of a superior quality. Logwood is an important product, and other valuable woods are now exported. Cattle breeding is encouraged; live-stock in 1933 included 650,000 asses, 400,000 horses, 310,000 goats, 350,000 pigs, and 105,000 cattle.

Haiti possesses considerable mineral resources quite undeveloped. Gold

silver, copper, iron, antimony, tin, sulphur, coal, kaolin, nickel, gypsum, limestone and porphyry are found but are little worked.

Commerce.

Imports and exports for 4 fiscal years ending September 30 (in U.S. dollars):—

—	Imports	Exports	—	Imports	Exports
	Dollars	Dollars		Dollars	Dollars
1930 .	12,841,626	14,144,567	1932 .	7,461,110	7,221,279
1931 .	9,576,318	8,963,419	1933 .	9,137,041	10,309,200

In 1933–34, the principal exports were coffee, 34,000,000 kilos valued at 7,286,600 dollars (about 71 per cent. in value of total exports); raw cotton, 5,302 metric tons; logwood, 17,885 metric tons; raw sugar, 20,106 metric tons (1932–33); sisal, 6,041 metric tons; cacao, 1,607 metric tons; rum, 21,792 litres.

Total trade between Haiti and the U.K. for 5 years (Board of Trade Returns):—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Haiti to U.K.	149,745	195,547	259,125	336,248	298,888
Exports to Haiti from U.K.	166,921	110,347	188,981	249,498	171,779
Re-exports to Haiti from U.K.	1,908	2,238	992	3,047	874

Shipping and Communications.

Several lines of steamers (American and Dutch) connect the ports of Haiti with New York, and others (British, French, Dutch and German) with Europe. In 1931–32, 595 vessels of 1,296,361 tons entered and cleared at Port-au-Prince.

Port-au-Prince is connected with Cap Haitien by a road 169 miles long, and with Mirebalais and Lascahobas by a road 33 miles long. Total length of motor road in 1932 was 935 miles. A light railway has been constructed from Port-au-Prince to Lake Assuéi (28 miles), and to Léogane (22 miles), but the traffic is small. The 'National Railroad of Haiti' runs from Port-au-Prince to Verrettes, distance 85 miles. Total mileage, 1932, 158 miles. The two railroads, the National and the P.C.S. (Compagnie des Chemins de Fer de la Plaine de Cul de Sac) are both American-owned.

The principal towns are connected by the Government telegraph system with 1,490 miles of wire in 1927. A cable runs from the Mole St. Nicholas to Santiago de Cuba and from the Mole to Port-au-Prince, and also to Cap Haitien, whence it runs to Puerto Plata (Santo Domingo) and to New York and South America. The All-America Cables has a cable to Haiti.

There are 92 post offices.

Port-au-Prince has a modern automatic telephone exchange; 1,200 miles of telephone cables connect 46 commercial and 17 local exchanges.

Money, Weights, and Measures.

The Banque Nationale de la République d'Haïti, established October 21, 1910, with a capital of 10,000,000 francs (present capital, 2,000,000 dollars),

has a monopoly of the note issue until 1960. Notes are covered one-third by U.S. currency and the balance by trade bills. The Bank acts as Treasurer for the Government on a commission of 1 per cent. of State revenue. In 1916, the National City Bank of New York purchased control over this bank. The Royal Bank of Canada has a branch at Port-au-Prince.

The unit of currency is the *Gourde* which has a fixed value in relation to United States currency, *i.e.* 1 gourde is equivalent to 20 cents U.S. currency. Stock of money on September 30, 1932, 600,000 dollars in U.S. Government notes and 5,562,712 gourdes in notes of the Banque Nationale; subsidiary coinage, 3,219,540 gourdes. To reduce the use of American money the Banque Nationale was authorized in April, 1928, to issue notes of 20, 50 and 100 gourdes.

Use of the metric system of weights and measures has been made obligatory since July 1, 1922.

Diplomatic and Consular Representatives.

1. Of Haiti in Great Britain.

Minister Resident.—Ernest G. Chauvet (Appointed Sept. 13, 1934.)
Consul.—W. Haines.

There are Consuls at Belfast, Cardiff, Cork, Liverpool, Birmingham, Edinburgh, Newport, Queenstown, Southampton, Glasgow.

2. Of Great Britain in Haiti.

Minister Resident.—F. M. Shepherd, M.B.E.
Military Attaché.—Brevet Lt.-Col. W. W. T. Torr, D.S.O., M.C.

HONDURAS.

(REPÚBLICA DE HONDURAS.)

Constitution and Government.

On September 15, 1821, the State of Honduras declared its independence of Spain and set up as a Republic which is governed under a charter proclaimed on October 3, 1824. The present Constitution was re-written in 1924 Legislative power is vested in a single chamber, the Congress of Deputies consisting of 43 members, chosen for 4 years by popular vote, in the ratio of one per 15,000 inhabitants. It meets for 60 days (may be extended to 100 days) on January 1 each year. A Permanent Commission of five members sits whilst Congress is not in session for the transaction of routine or emergency business. The President is elected by popular vote for 4 years, holding office from February 1st.

President.—Dr. Tiburcio *Carias.* Assumed office February 1, 1933.

The administration of the Republic is carried on by a Council of six ministers, to whom are entrusted the departments of Foreign Affairs, Interior and Justice, War and Navy, Finance and Public Credit, Public Works and Agriculture, and Instruction.

Area and Population.

Area about 44,275 English square miles, with a population, on June 29, 1930 (census), of 854,184, or 19·4 inhabitants to the square mile. Aboriginal tribes are estimated to number over 35,000, principally Mosquito, Zumo, Payas and Xicaques Indians, all speaking different languages. The Spanish-speaking inhabitants are chiefly Indians with an admixture of Spanish blood. On the north coast there is a considerable proportion of negroes, chiefly employed by the fruit exporting companies, of whom about 3,000 are British subjects; their immigration is now forbidden. The Republic is divided into 17 departments and one territory. La Mosquitia is still practically unexplored and is inhabited by native races who speak little or no Spanish.

The capital of Honduras is Tegucigalpa, with (census of June, 1930) 47,075 inhabitants. Other towns are San Pedro Sula, 34,425; Pespire, 9,212; Nacaome, 10,302; Danlí, 10,232; Santa Rosa, 10,807; Choluteca, 12,248; Juticalpa, 10,990; El Progress, 10,920. The main ports are Amapala on the Pacific, and, on the Atlantic, Puerto Cortez (9,597), Omoa, La Ceiba (13,073), Trujillo (8,865), Puerto Castilla, and Tela (9,935). The port of entry for the Bay Islands is Roatan.

Religion, Education, Justice.

Roman Catholicism is the prevailing religion, but the Constitution guarantees freedom to all creeds, and the State does not contribute to the support of any.

Instruction is free, compulsory (from 7 to 15 years of age), and entirely secular. The school census of 1933 showed 103,463 children of school age, of whom only 41,689 were then receiving education. In 1933 there were 944 public schools with 1,848 teachers and 41,689 children enrolled. The secondary schools (1 State, 1 private and 13 public schools with high school classes) had 814 pupils, the normal schools 1,405, and the commercial schools, 372. At Tegucigalpa there is a National University with faculties of Law, Medicine and Engineering (308 students in 1933), and a technical school with 118 female pupils.

The Judicial power resides in the Supreme Court with five judges chosen directly by the people for 4 years; four Appeal Courts, and departmental and local judges. In 1923 an Appeal Court was established at San Pedro Sula to serve the Northern Provinces.

Finance.

For the years stated, ending July 31, the revenue and expenditure are given as follows (the lempira was legally fixed in 1931 at one-half the value of an American dollar).

—	1930–31	1931–32	1932–33	1933–34 [1]	1934–35 [1]
	Lempiras	Lempiras	Lempiras	Lempiras	Lempiras
Revenue . . .	11,818,673	10,943,782	8,972,398	12,478,918	10,282,963
Expenditure . . .	13,875,145	10,060,616	12,286,185	12,478,918	10,282,963

[1] Estimates.

Total external debt stood on July 31, 1933, at 8,921,714 lempiras, and internal debt at 19,043,940 lempiras. Payment on debt services, external and internal, in 1932–33, was 1,771,982 lempiras. The external debt, held principally in England and unpaid as to principal or interest since 1872, totalled by 1925, 30,000,000*l.*, and was then scaled down to 1,200,000*l.* to be repaid in 30 annual instalments of 40,000*l.* each, derived from a special Consular tax on imports to Honduras, collected abroad and deposited in New York. In 1928 the Government borrowed 1,500,000 dollars in New Orleans, repayable in monthly instalments of 25,000 dollars at 7 per cent. interest; in 1931, 250,000 dollars was borrowed from a New Orleans bank and in 1933, 300,000 dollars. Amortization of internal debt was suspended in 1932.

Defence.

Every citizen of Honduras is liable to serve in the army from the age of 21. Service in the active army is for three months, and in the reserves from the age of 23 to 40. Foreigners are exempt from service. Under the terms of the Washington Central American Conventions of 1923 the size of the Regular Army is fixed at 2,500 men, including the National Guard. The strength in 1934 was approximately 176 officers and 1,500 men. The military budget for 1934–35 was 1,485,665 lempiras; actual expenditure in 1932–33 was 1,278,441 lempiras, plus 2,063,695 expended for "public order" during civil disturbances.

Production and Industry.

The chief culture is that of bananas, on the Atlantic coast (23,493,676 bunches exported in 1932–33 almost entirely by two companies; value of banana exports was 11,746,578 dollars, U.S.). The United States took 14,997,251 stems, Germany, 3,554,868 stems, and United Kingdom, 2,851,534 stems. Coconuts are also grown. The coconut groves of Puerto Sal extend from the Ulua River to the Cuero River, a distance of about 60 miles, and are said to contain over 28,000 fruit-bearing trees. Coffee of fine quality is grown, generally by small farmers (exports in 1932–33, 4,237,443 lbs.), likewise tobacco. The production of sugar from 2 large mills is decreasing. Exports in 1931–32, 8,187,175 lbs.; in 1932–33, nil. Honduras is potenially a cattle producing country.

The mineral resources of Honduras are—gold, silver, copper, lead, zinc, iron, antimony, some of them being found in almost every department.

The rivers still yield gold to the native workers, using primitive utensils. There is only one large mining company, at San Juancito, near Tegucigalpa. Deposits of brown and other coal have also been found.

Straw hats and cigars are manufactured for local consumption and export; 13,354,000 cigars were exported in 1932–33. A good quality of Panama hat is manufactured in the Departments of Copan and Santa Barbara.

Commerce.

Imports and exports for 5 fiscal years, ending July 31 (the lempira = 50 cents, U.S.):—

—	1928–29	1929–30	1930–31	1931–32	1932–33
	Lempiras	Lempiras	Lempiras	Lempiras	Lempiras
Imports . . .	14,860,981	31,892,257	20,582,845	16,736,082	12,575,126
Exports . . .	24,569,165	52,342,436	40,056,173	35,162,622	28,554,396

The United States took 67·7 per cent. of the exports of Honduras in 1932–33, and furnished 73·8 per cent. of its imports. Bananas constituted about 82 per cent. of the value of total exports.

Total trade between Honduras and United Kingdom for 5 years was (according to Board of Trade returns) as follows:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Honduras . . .	496,415	1,110,919	884,854	1,155,351	385,771
Exports to Honduras . . .	517,007	88,161	92,507	106,823	101,461
Re-exports to Honduras . . .	2,050	1,635	1,705	995	734

Communications.

In general, travelling and transport are accomplished by means of mules and ox-carts. Slow improvements in road-making and repairing continue to be made. There is a fair mail service by automobiles, and a daily autobus passenger and freight service connects Tegucigalpa with both the northern and southern sections. The two principal roads are the Carretera del Sur from San Lorenzo, on the Pacific Coast, to Tegucigalpa, 84 miles; and the Carretera del Norte, from Tegucigalpa to Comayagua, and Lake Yojoa, 154 miles. Transport from Lake Yojoa (20 miles across) is continued by road to Potrerillos (25 miles), the head of the railroad to San Pedro Sula and Puerto Cortés. A road from Tegucigalpa to Juticalpa has been completed to Las Flores and another from Santa Barbara to San Pedro Sula is completed but is not in good condition. Total mileage of motor roads in 1930 was 361 miles. Aviation services connect the principal towns and spread outward to other Central American points; there are 33 landing fields in the Republic.

There is a national railway of 66 miles from Puerto Cortez to Potrerillos, taken over by the Government in 1912 and leased to a fruit company. The other four railroads are owned and operated by the various fruit companies on the north coast. Total length of line (1934), 893 miles.

The country has about 1,247 miles of telephone lines and 2,895 miles of telegraph lines. Number of telephones in use, about 1,500; number of telegraph offices, 262. Number of post-offices, 550. Honduras has 6 wireless stations, at Tegucigalpa, Puerto Cortés, La Ceiba, La Lima, Tela

and Puerto Castilla, all owned by foreign companies, and in 1933-34 5 government stations were erected.

Money, Weights, and Measures.

By a decree of March 9, 1931, the gold *lempira* (named after a native chief) is the monetary unit; its value is that of 0·836 gramme of gold, 900 fine, or 50 cents, U.S. currency. Coins of 1 *lempira*, 50 cents, 20, 10 and 5 cents have been coined. The old peso coinage has been withdrawn from circulation. The value of the silver *lempira* was legally fixed at one-half the value of an American dollar. The new *lempiras* have been minted in the United States and were placed in circulation early in 1932. On the north coast the currency is partly American paper money.

There are two banks. One is the Banco de Honduras, founded in 1889; it has the power to issue notes but does not act as the Government's fiscal agent. The second bank, Banco Atlantida, which belongs mainly to Americans, also issues *lempira* notes.

The metric system of weights and measures has been legal since April 1, 1897, but English pounds and yards and the old Spanish system are still in general use:

1 *Vara*	= 32 inches.
1 *Arroba*	= 25 lb.
1 *Quintal*	= 100 lb.
1 *Tonelada*	= 2,000 lb.

Diplomatic and Consular Representatives.

1. Of Honduras in Great Britain.

Consul-General at London.—Señor B. Basil Telepnéf.

There are Consuls at Manchester, Cardiff, Grimsby, Liverpool, Birmingham, Newcastle-on-Tyne, and Glasgow.

2. Of Great Britain in Honduras.

Minister Plenipotentiary and Envoy Extraordinary.—John Henry Stopford Birch. Appointed August 23, 1933. (Residing in Guatemala City.)

Consul and Chargé d'Affaires at Tegucigalpa.—W. H. Gallienne, C.B.E.

There are consular representatives at Trujillo, Amapala and La Ceiba.

HUNGARY.

(KINGDOM OF HUNGARY.)

Constitution and Government.

HUNGARY first became an independent kingdom in 1001. On October 31, 1918, a revolution broke out in Hungary with the object of establishing a Republic. On November 13 King Charles issued a letter of abdication, and on November 16, 1918, Hungary was proclaimed an independent Republic (Hungarian People's Republic), of which Count Michael Károlyi became Provisional President. The two Houses of the Legislature were abolished, and their place taken by a Provisional National Council. The Károlyi *régime* continued until March 21, 1919, when its place was taken by a Soviet Government, which proclaimed the dictatorship of the proletariat. An opposition Government was, however, soon set up at Arad and Szeged, which with the assistance of the Rumanian army swept away the Soviet Government, and on August 7, 1919, a National Government was again in the Capital. Elections were held on the basis of universal suffrage in January and February, 1920, and the new Parliament considered the period of the revolutions of 1918 and 1919 as *de jure* a blank space of time, and resolved that the old monarchical constitution should be continued. Hungary was thus considered a monarchy with a vacant throne, the functions of the monarch being exercised by a Regent. In accordance with a law passed on July 17, 1933, the Regent has the power to prorogue or dissolve Parliament. It has been decided that the dynastic question shall be solved at such time as the people are freed from external pressure.

Regent.—Nicholas *Horthy de Nagybánya.* (Elected March 1, 1920.)

The Legislature consists of two houses; the Upper House (by a Bill passed on November 11, 1926) consists of 6 groups—(1) elected representatives of the former hereditary members, about 38; (2) members elected by the County Councils and municipalities, about 50 members; (3) heads of the various religious communities, about 31 members; (4) high dignitaries—such as judges, the commander-in-chief of the army, the chairman of the National Bank; (5) representatives of scientific institutions, the Chambers of Commerce, about 40 members; and (6) life members appointed by the head of the State.

The Lower House consists of 245 members. At the elections held on June 28, 1931, the following parties were elected:—Party of National Unity (Bethlen Party), 155; Christian Social Union, 32; Socialists, 14; Independent Agricultural Party, 11; other parties, 12; Independents, 21; total 245. New elections were held on April 27, 1935.

The Ministry, formed on March 4, 1935, is composed as follows:—

Prime Minister and Minister of National Defence.—Julius de *Gömbös.*
Minister of Foreign Affairs.—Koloman de *Kánya.*
Minister of the Interior.—Nicholas *Kozma.*
Minister of Finance.—Dr. *Fabinyi.*
Minister of Agriculture.—Dr. *Daranyi.*
Minister of Commerce.—Geza *Bornemisza.*
Minister of Public Instruction.—Dr. Valentine *Hóman.*
Minister of Justice.—Dr. Andrew *Lázár.*

II. LOCAL GOVERNMENT.

In Hungary a distinction is observed between communes which are large or small, and county-towns and municipalities, which are regarded as com-

munes of a higher order. The representative bodies and executives are elected by the inhabitants of the communities concerned who have possessed an electoral right since 1886 on the basis of secret suffrage, which was in 1929 extended to women also. The representative body in the communes and county towns consists half of members elected for six years, and half of persons who pay the highest taxes, but in the representative bodies of the municipalities ('municipal committee') the proportion of those who pay the highest taxes has been reduced to two-fifths of the total number of members. The members of the representative bodies have an authorization for a fixed period. Each community has the right to issue orders within the limits prescribed by law, to be carried out either by its own officials or by the subordinate communities.

Area and Population.

The Treaty of Trianon, signed on June 4, 1920, and ratified by Hungary on November 13, 1920, mentions in general terms the boundaries of the new State with Austria, Czechoslovakia, Yugoslavia and Rumania. The exact boundaries with Yugoslavia and Rumania are to be determined by a mixed commission. As a result of negotiations with Austria and of the consequent plebescite, Hungary has obtained Sopron in Western Hungary.

The population of Hungary according to the census of December 31, 1930, is 8,688,319, and its area 35,875 square miles as against a population of 7,989,069 in 1920. Of the total population, 4,250,110 were males and 4,438,209 females. Estimated population on December 31, 1933, 8,837,349.

The following is the division of the total population according to language as estimated on December 31, 1930 (Census): Hungarian (Magyar), 8,001,112 (92·1 per cent.); German, 478,630 (5·5 per cent.); Slovak, 104,819 (1·2 per cent.); Rumanian, 16,221 (0·2 per cent.); Ruthenian, 996; Croatian, 27,683 (0·3 per cent.); others, 58,858.

Vital statistics for 5 years:

	1929	1930	1931	1932	1933
Births . . .	215,463	219,784	212 902	205,529	193,911
Marriages . . .	78,518	77,907	76,354	71,202	73,080
Deaths . . .	152,847	134,341	144,968	157,106	129,913

Kecskemét .	80,729	Miskolc .	62,597		
Pestszenterzsébet	75,399				

[1] Population of Greater Budapest, 1,421,397 (Census, 1930).

Religion.

Religious toleration is one of the fundamental principles of the Hungarian State. There is perfect equality among all legally recognised religions, which include the Roman and Greek Catholic, the Evangelical (Augsburg and Helvetian), the Unitarian, the Greek Oriental, the Gregorian-Armenian, the Baptist (since 1905), the Jewish, and the Mohammedan (since 1916). Each has the independent administration of its own affairs.

In 1930 (Census), the population according to religion was estimated as follows: Roman Catholics, 5,634,103 (64·9 per cent.); Greek Catholics, 201,093 (2·3 per cent.); Helvetian Evangelicals, 1,813,162 (20·9 per cent.); Augsburg

Evangelicals, 534,065 (6·1 per cent.); Greek-Orientals, 39,839 (0·5 per cent.); Unitarians, 6,266 (0·1 per cent.); Jews, 444,567 (5·1 per cent.); others, 15,224.

Education.

Public education in Hungary comprises the following grades:—(1) infant schools; (2) elementary schools; (3) industrial and commercial apprentice schools; (4) primary (city) schools; (5) training colleges for teachers; (6) middle or secondary schools; (7) special schools; (8) universities and colleges.

In 1930, 9·6 per cent. of the population over 6 years of age was illiterate.

School attendance is compulsory for children of six to twelve years at day schools, and then for three years in continuation schools. There were in the school year 1932–33 altogether 1,122 infants' schools and permanent foster-homes with 1,574 female teachers and 111,966 infants, and 4 training colleges for female teachers of infant schools.

In Hungary there were in the school-year 1932–33, 6,875 elementary schools with 997,427 pupils and 19,423 teachers. There were also 4,631 general, 1,037 agricultural continuation schools (or courses) and 54 agricultural public schools with special teachers attached to them. There were 459 apprentice schools, 422 for industrial and 37 for commercial apprentices. The number of industrial apprentices was 36,437 and of commercial apprentices 2,116. There were 20 training colleges for elementary schools for males and 35 for females, with 892 teachers and 9,636 students. The number of primary schools was for boys 133, for girls 194, for both sexes 63, with 89,417 pupils and 4,986 teachers.

In the middle schools the curriculum extends over eight years. They are maintained by the State, by the larger communes, or (in the case of the denominational schools) by ecclesiastical foundations, with sometimes a subvention from the State. There were in 1932–1933, 29 gymnasia, 74 realgymnasia, 18 modern schools, and 44 girls' secondary schools. Total number of teachers, 3,622, pupils, 65,327 (51,644 boys and 13,683 girls).

Of the special schools, 45 are agricultural, 50 industrial and mineral, and 50 commercial, with 29 others. Of the commercial schools, 31 were for boys and 19 for girls; total number of pupils, 7,976. The other special schools had 8,347 pupils. There are 4 agricultural high-schools with 370 pupils.

Hungary has four universities and (since 1919) an independent Faculty of Economics at Budapest (68 professors, 1,184 students in 1932–33), all maintained by the State. In 1932–33 the University of Budapest had 371 professors and 5,265 students; the University of Szeged, 97 professors and 1,707 students; the University of Pécs 57 professors and 1,478 students, and of Debrecen 73 professors and 1,400 students—the last two having been founded in 1912. Total number of students at the Universities, 1932–33, 11,034. There are also 21 theological colleges, viz., 17 Roman Catholic, 3 Protestant, and 1 Jewish, with a total of 134 professors and 1,151 students; and 3 law schools with 35 professors and 953 students; and the veterinary school with 29 professors and 283 students. The technical high school (polytechnicum) in Budapest has 94 professors and 1,077 students (1932–33); the high school of mining and forestry of Sopron 27 professors and 143 students; and 3 agricultural colleges have 32 professors and 274 students. There are 6 other high schools with 107 professors and 1,411 students.

Justice and Crime.

The Supreme Court in Budapest (curia) is the highest instance in all civil and criminal matters. As courts of first instance, there are county courts

(törvényszékek) with collegiate judgeships; district courts (járásbiróságok) with single judges; and jury courts (sajtóbiróságok) for press offences besides an army special court.

Social Insurance and Pauperism.

In 1927 and 1928, two fundamental laws were passed to regulate optional and obligatory social insurance, and called into existence the National Social Insurance Institute. The Institute affords its members medical and hospital treatment gratuitously and pays a subsidy to any member during the period of his illness, and grants, moreover, an old age and disability pension. The membership of the Institute amounted to 568,836 on December 31, 1932, including membership of all other social insurance bodies, 262,181. The insurance of farm-workers is optional in Hungary, done by the Agricultural Workers' National Fund, with a membership of 655,974 (end of 1932).

In Hungary poor relief is in the main left to communal administration. In the smaller communes orphans and the indigent are cared for by official guardians and overseers, while in the larger there are poor-houses, the funds being mostly derived from fines and taxes. The number of asylums for paupers and orphans is about 300.

Finance.

Budget estimates for 5 years (in thousands of pengös):—

	1930–31	1931–32	1932–33	1933–34	1934–35
	1,000 Pengös	1,000 Pengös	1,000 Pengös	1,000 Pengös	1,000 Pengös
Revenue . .	1,401,100	1,365,900	1,207,329	1,097,085	1,084,589
Expenditure .	1,398,130	1,364,900	1,207,329	1,173,285	1,150,709

Budget for 1934–35 is shown as follows:—

	Revenue		Expenditure	
	Ordinary	Total	Ordinary	Total
I. State Administration	Pengös	Pengös	Pengös	Pengös

Total revenue includes 6,693,400 pengös extraordinary revenue, and expenditure includes 26,005,980 pengös transitory expenditure, and 26,678,900 pengös investments.

The public debt on December 31, 1933, was given at 1,851,700,000 pengös, of which 1,307·0 million pengös were foreign debt and 544·7 million pengös domestic.

Defence.

According to the Treaty of Trianon, Hungary is authorised to maintain an army of 35,000 officers, non-commissioned officers and men. The Treaty laid down that conscription was to be abolished, and consequently recruiting on a voluntary basis has been substituted. All recruits have to undertake to serve in the Army for a minimum period of 12 consecutive years, at least 6 of which are to be with the colours. Officers now serving will continue to do so until they attain the age of 40 years at least. Officers newly appointed must undertake to serve on the active list for a minimum of 20 consecutive years. No reserves or measures for mobilisation are permitted.

Hungary is divided into the following seven military districts:—Budapest, Székesfehérvár, Szombathely, Pécs, Szeged, Debrecen, and Miskolc. To each of these districts is allotted a mixed brigade each composed of 1 brigade staff, 1 cavalry squadron, 2 infantry regiments, 1 trench mortar company, 1 field artillery group, 1 cyclist battalion. In addition to the 7 mixed brigades there are the following troops: 4 hussar regiments, 1 mounted artillery group, 3 independent batteries, and 3 pioneer battalions. Strength in November, 1934, 1,781 officers and 33,255 men.

Hungary has a force of 12,000 gendarmerie and of 12,000 police, as well as 6,360 customs guards, and 1,600 river guards. The members of this force are under the obligation to serve for a minimum of 6 consecutive years. The authorised armament is as follows:—Gendarmerie: 1 rifle or 1 carbine per man; Police: 1 sword or revolver per man (automatic pistols for 5 per cent. of the establishment, *i.e.* 600); Customs Guards: 1 rifle per man.

A force of 3,000 finance guards is also maintained. These are armed with revolvers.

Hungary has no navy or air force, but only four patrol vessels for police duty on the Danube.

The budget expenditure on the army in 1934–35 was 87,469,000 pengös.

Production and Industry.

The cultivation of the soil is the chief industry of Hungary. The soil is noted for its fertility and the variety of its products. The area and production of crops in Hungary for two years was as follows :—

Crop	1932-33		1933-34
	Area	Yield	Estimated Yield
	Acres	Quintals	Quintals
Wheat	3,923,792	26,224,140	16,788,518
Rye	1,676,874	9,264,692	5,363,196
Barley	1,197,438	8,414,553	4,522,056
Oats	570,487	3,576,072	2,1·3,941
Maize	2,815,916	18,093,189	21,694,703
Potatoes	725,618	18,556,545	24,213,292
Sugar-beet	107,593	9,442,586	9,469,561
Grapes	520,132	67,842,202 [1]	—

[1] Gallons.

In Hungary there were, in 1934, 803,033 horses, 1,677,712 cattle, 1,037,464 sheep, and 2,502,163 pigs.

The total area under forest in Hungary (1932) was 2,706,626 acres.

The production of coal in Hungary was in 1900, 6,575,000 tons; in 1910, 9,036,000 tons; in 1930, 6,987,826 tons; in 1931, 6,887,630 tons; in 1932, 6,826,289 tons; and in 1933, 6,707,302 tons. The best quality coal is found in the Mecsek Mountain, in the district of Pécs. Bituminous coal is found at Ajk. Hungary has a considerable number of brown-coal and lignite mines. Her bauxite deposits may be counted among the largest in the world.

Hungary retains important fishery preserves in the Danube and Theiss rivers and in lake Balaton. The latter, situated in the west, is the largest lake in central Europe, being 50 miles long and from 2 to 7 miles broad. Its waters contain plentiful supplies of perch, carp, pike, sheatfish, shad and other fish. The north shore of Lake Balaton is an important wine-producing district. The best known Hungarian wines come from the hilly country, 'Tokaj,' in the north-east section of Hungary.

The industries of Hungary are based on agriculture. They include milling, distilling, the manufacture of sugar (1,353,880 metric quintals of raw sugar in 1933), hemp and flax, and also iron and steel works (93,072 metric tons of pig-iron and 227,262 metric tons of steel in 1933). In 1933 there were in Hungary 3,366 factories, employing on an average 181,533 workmen, with an output valued at 1,734,133,000 pengös.

Commerce.

Trade for 5 years is shown as follows :—

Year	Imports		Exports	
	Quantity	Value	Quantity	Value
	Million Quintals	Thousands of Pengös	Million Quintals	Thousands of Pengös
1930	48·9	823,348	22·9	911,666
1931	33·5	539,361	18·8	570,390
1932	21·1	328,538	13·1	334,512
1933	17·7	312,643	18·4	391,337
1934	23·6	344,755	16·6	405,336

The distribution of trade according to categories was as follows:—

	Imports 1,000 Pengös		Exports 1,000 Pengös	
	1932	1933	1932	1933
Food, drink, and tobacco	30,923	28,752	131,691	103,032
Live animals	251	376	50,249	58,776
Raw materials	35,354	16,894	30,921	43,516
Manufactures	262,010	266,621	121,651	126,013
Total	328,538	312,643	334,512	391,337

The value of the principal imports and exports for 2 years was as follows (in thousands of pengös):—

Imports	1933	1934	Exports	1933	1934
Timber, raw and worked	27,028	38,205	Animals for slaughter and draught	53,998	39,905
Coal	10,942	13,736	Flour	9,209	9,604
Cotton fabrics	4,338	5,096	Wheat	43,695	54,188
Woollen fabrics	4,771	5,194	Poultry, live and slaughtered	27,124	28,854
Machinery and apparatus	9,554	11,699	Rye	7,652	5,830
Mineral oil	13,775	13,523	Electrical machinery and apparatus	25,208	33,916
Paper and paper goods	18,573	20,037	Furs, finished	3,248	4,440
Cotton, raw	24,452	26,373	Lard	6,701	15,843
Silk and silken yarn	10,016	10,414	Hardware	7,685	9,173
Hides, raw	11,695	17,405	Hides and skins, finished	7,559	7,405
Tropical fruits	5,604	5,506	Fruits, fresh	7,834	6,878
Metals, raw	9,573	13,210	Raw tobacco	3,892	4,791
Cotton, yarn and thread	6,871	5,698	Feathers	8,099	14,095
Woollen yarn	7,924	7,518			

The trade was distributed as follows, for 2 years, in thousands of pengös:—

Country	Imports 1,000 Pengös		Exports 1,000 Pengös	
	1933	1934	1933	1934
Austria	62,417	81,762	105,697	99,384
Czechoslovakia	31,568	24,051	28,748	20,111
Rumania	24,245	30,499	12,822	19,314
Yugoslavia	19,259	14,356	21,312	11,808
Germany	61,507	62,715	43,701	89,468
Switzerland	5,526	8,003	20,291	19,657
Italy	23,230	41,225	33,732	33,534
France	17,397	10,297	17,615	13,861
Holland	4,671	5,891	4,990	4,482
Great Britain	13,629	17,967	31,250	31,471
Poland	4,182	3,711	3,591	3,231
United States	20,621	19,682	5,920	4,242
Other Countries	24,391	24,596	61,668	54,309
Total	312,643	344,755	391,337	405,336

Total trade between Hungary and the United Kingdom according to Board of Trade returns for five years :—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Hungary .	999,537	1,552,979	1,082,140	1,476,564	1,423,572
Exports to Hungary . .	738,737	513,828	339,794	278,247	500,487
Re-exports to Hungary . .	90,109	80,615	38,465	49,994	71,020

Internal Communications.

In 1933 there were 2,642 miles of state roads, 10,371 miles of municipal roads and 5,114 miles of inferior roads ; total, 18,127 miles of road.

The length of railways in Hungary in 1932–33 was 8,651 kilometres, or 5,372 miles, of which 6,520 kilometres, or 4,049 miles, are owned by the State. Of the total 969 kilometres or 602 miles are double track. The passengers carried in 1932–33 were: State railways, 54,516,000 ; private railways, 26,954,000 ; and freight, 16,248,000 and 1,796,000 metric tons respectively. There are six air lines over which 2,579 flights were made in 1933 with 7,565 passengers and 428 metric tons of freight. Distance flown was 423,549 miles.

Number of Hungarian post-offices (not including collecting places and railway post) (1933), 2,399. In 1933, the inland postal service handled 238,279,000 pieces of correspondence, and the international 30,307,000 pieces ; 8,487,000 parcels were carried on the inland service, and 390,000 on the international service. On December 31, 1933, the length of telegraph lines was 5,472 miles ; of telegraph wires, 49,056 miles ; of telephone lines, 15,295 miles ; and of wire, 397,530 miles. The postal and telegraphic services are in the hands of the Government.

The total number of telegrams handled in 1933 was 2,370,000 (1,515,000 inland, 761,000 foreign, and 194,000 transit). The number of telephone conversations in 1933 was: local, 127,200,000 ; inter-urban, 2,662,000 ; international service, 1,256,000 ; transit, 339,000.

Currency and Banking.

By a law of November 4, 1925, a new monetary unit, the 'pengö' (= 12,500 paper crowns), subdivided into 100 *fillér*, was instituted, and came into use on December 27, 1926. Up to January 31, 1927, new pengö coins were issued to the value of 24,752,105 pengös. The pengö contains 0·263158 grammes of fine gold.

The amount of the bank notes in circulation, issued by the National Bank of Hungary, was 331,995,000 pengös on February 7, 1935. Metal reserve was 92,437,000 pengös.

On December 31, 1931, the total saving deposits in the Postal Savings Bank and the twelve principal Budapest banks amounted to 516,700,000 pengös as compared with 631,600,000 on December 31, 1930.

The metric system of weights and measures is in use.

Diplomatic Representatives.

1. Of Hungary in Great Britain.

Envoy and Minister.—Count László Széchenyi. Appointed December 28, 1932.

Counsellor.—Marquis Alphonz de Pallavicini.

Secretary.—G. de Lukács-Királdy.

Military Attaché.—Major Z. de Álgyapap.

2. Of Great Britain in Hungary.

Minister and Consul-General.—The Hon. Sir Patrick William Maule Ramsay, K.C.M.G. (Appointed December 2, 1933.)
First Secretary.—W. R. C. Green.
Second Secretary.—C. Bramwell.
Commercial Secretary.—R. P. F. Edwards, D.S.O.
Military Attaché.—Major K. V. B. Benfield, D.S.O., M.C.

ICELAND.

(ÍSLAND.)

Reigning King.

ICELAND is united with Denmark by a personal bond of union under the government of King **Christian X.** (*see* Denmark).

The first settlers came to Iceland in 874. Between 930 and 1264 Iceland was an independent republic, but by the 'Old Treaty' of 1263 the country recognised the rule of the King of Norway. In 1381, Iceland, together with Norway, came under the rule of the Danish Kings, but when Norway was separated from Denmark in 1814, Iceland remained under the rule of Denmark. Since December 1, 1918, it has been acknowledged as a sovereign State, and is united with Denmark only through the identity of the Sovereign.

As King of Iceland King Christian X. has a civil list of 60,000 kroner.

Constitution and Government.—By the Act of Union of November 30, 1918, Iceland is temporarily united with Denmark in certain affairs beyond the King's person.

According to the Act of Union, Denmark and Iceland are free, sovereign States, united by one King and by the agreement comprised in the Union Act. The order of succession is not to be altered without the assent of both States. In Iceland, Danish citizens enjoy the same rights as Icelandic citizens, and in Denmark the latter enjoy the same rights as Danish citizens. But citizens of either of the States are exempt from military service in the other. Danish goods and products in Iceland and Icelandic goods and products in Denmark are treated no less favourably than those of any other country. Denmark takes charge of the foreign affairs of Iceland, and if Iceland so desires it, special Icelandic attachés or experts on Icelandic conditions may be appointed to Danish embassies and consulates, the expenses arising out of such appointments to be borne by Iceland. Denmark has a minister at Reykjavík, and Iceland a minister at Copenhagen.

An advisory Danish-Icelandic committee of eight members has been appointed to review Bills of importance to both States, and also to prepare Bills aiming at co-operation between the two States. After December 31, 1940, the Danish Parliament and the Icelandic Legislature may demand negotiations to be opened concerning the revision of the Union Act.

Denmark has informed the Powers that, in conformity with the Union Act, she recognises Iceland as a sovereign State.

The present constitution of Iceland is embodied in the Charter of May 18, 1920, with an amendment made in 1934. By the terms of this Charter the executive power belongs to the King, and is exercised by him through responsible ministers, while the legislative power rests conjointly with the King and the Parliament, which is called *Althing*. The Althing is composed of a varying number of members not exceeding 49, of whom 38 are elected in constituencies, each electing one or two representatives by simple majority, except the capital, where 6 members are elected by Proportional Representation, while a necessary number of supplementary mandates, though not exceeding 11, is distributed among the parties, which have got too few in proportion to the number of their electors. The electoral period is 4 years. The franchise is enjoyed by all Icelandic citizens (men and women) of good reputation who are over 21 years of age and have resided in the country during the previous 5 years. All voters are eligible as candidates, save only the superior judges.

The Althing is divided into two Houses, the Upper House and the Lower House. The former is composed of one-third of the members elected by the whole Althing in common sitting. The remaining two-thirds of the members form the Lower House. The members of the Althing receive payment for their services, besides travelling expenses 12 krónur (10*s.* 10*d.*) per day. This payment has temporarily been raised by 15 per cent.

The Althing must meet on February 15 in every year, unless it is convoked by the King at an earlier date. The Budget Bills must be laid by the Government before the two Houses in joint session, but all other Bills can be introduced in either of the Houses. If the Houses do not agree they assemble in a common sitting, and the final decision is given by a majority of two-thirds of the voters, with the exception of Budget Bills, where a simple majority is sufficient. The ministers have free access to both Houses, but can only vote in the House of which they are members.

The executive power is exercised under the King by a ministry divided into three departments. The ministry, appointed July 29, 1934, is as follows:—

President of the Council and Minister of Justice and of Agriculture.—Hermann *Jónasson.*

Minister of Trade and of Education.—Haraldur *Gudmundsson.*

Minister of Finance.—Eysteinn *Jónnsson.*

The ministers are responsible for their acts. They can be impeached by the Althing, and in that case their cause will be decided by the *Landsdómur*, a special tribunal, which can only try parliamentary impeachments.

For administrative purposes Iceland is divided into 16 provinces (*syslur*), each governed by a chief executive functionary (*sysslumadur*). Each province forms one or two municipal districts with a council superintending the rural municipalities (about 200). There are also 8 urban municipalities with a town council, independent of the provinces, and forming by themselves administrative districts co-ordinate with the provinces. The municipal councils are elected direct by universal suffrage (men and women over 21 years of age), in urban municipalities by Proportional Representation, but in rural municipalities by simple majority.

Area and Population.—The following table gives the area and population of Iceland according to the census in 1930:—

Divisions	Area, English sq. m.	Population, 1930	Population, 1930, Per sq. m.
The South-West	4,125	46,765	11·3
The Western peninsula	3,658	13,071	3·6
The North	13,695	24,960	1·8
The East	5,954	10,461	1·8
The South	12,277	13,604	1·1
Total	39,709	108,861	2·7

Estimated population on December 31, 1933, 113,353.

In 1930, 49,477 were domiciled in rural districts, and 59,384 in towns and villages (of over 300 inhabitants). The population is almost entirely Icelandic. In 1930, the foreign-born population numbered only 1,511, or 1·4 per cent. of the whole; 592 were born in Denmark, 417 in Norway, 141 in Faroe Islands and 361 in other countries.

The capital of Iceland, Reykjavík, had in 1933 a population of 31,689; other towns are Akureyri, 4,243, Hafnarfjördur, 3,748, Vestmannaeyjar, 3,462, Ísafjördur, 2,576, Siglufjördur, 2,330, Nes, 1,098, Seydisfjördur, 990.

The following table gives the total number of births, deaths and marriages, with the surplus of births over deaths, for three years:—

Years	Marriages	Total living Births	Stillborn	Deaths	Surplus of Birth over Deaths
1931	680	2,804	64	1,277	1,527
1932	682	2,696	53	1,191	1,505
1933	696	2,478	52	1,159	1,319

Religion.—The national Church, and the only one endowed by the State, is Evangelical Lutheran. But there is complete religious liberty, and no civil disabilities are attached to those not of the national religion. The affairs of the national Church are under the superintendence of one bishop. At the census of 1930 only 1,503, or 1·4 per cent. were returned as Dissenters.

Education.—There is a University in Reykjavík. There are 2 grammar schools, 3 public high schools, besides 2 ladies' schools, a school for elementary-school teachers, 2 schools of agriculture, a school of navigation, a commercial high school, and several other special schools. The elementary instruction is compulsory for a period of 5 years, the school age being from 10 to 14 years. Before the age of 10 the children are usually privately educated, at any rate in the country. In 1928–29, there were 238 elementary schools, with 400 teachers and 8,709 pupils. There are also several continuation schools for young people.

Pauperism and Old-Age Pensions.—Ordinary poor-relief is regulated by the law of May 31, 1927. Each community constitutes a poor district.

There is in every community one Old-Age Pension Fund, to which all men and women from 18 to 60 years of age, to whom pensions are not otherwise secured, are bound to contribute, unless they are considered too poor to do so. In addition the funds receive a subvention from the State. Grants are made to infirm poor persons over 60 years of age who for the preceding 5 years have not received poor-relief.

Justice and Crime.—The lower courts of justice in Iceland are those of the provincial magistrates (*syslumenn*) and town judges (*bæjarfógetar*). From these there is an appeal to the Supreme Court (*hæstirjettur*) in Reykjavík, which has 3 judges.

In 1932, 75 men (55 in 1931), and 3 women (3 in 1931), were convicted of crime.

Finance.—Current revenue and expenditure for 6 years:—(1*l.* = kr. 22·15).

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1930 .	754,698	733,709	1933 .	611,345	614,158
1931 .	675,358	706,742	1934[1] .	496,228	494,836
1932 .	488,289	557,890	1935[1] .	621,354	591,830

[1] Budget estimates.

Budget estimates for the year 1935 for current revenue and expenditure:—

Revenue	Krónur	Expenditure	Krónur
Taxes	4,815,000	Interest on State debt	1,547,576
Customs and excise .	6,460,000	Civil list of the King .	60,000
Balance on State undertakings . . .	1,894,400	Althingi . . .	250,920
Balance of domain revenue	24,650	The central administration . . .	304,846
Interest on State assets.	518,940	Foreign Affairs . .	103,000
Other revenues . .	50,000	Justice, police, etc. .	1,296,760
		Sanitary affairs . .	721,371
		Communications .	2,593,102
		Ecclesiastical affairs and instruction .	1,865,897
		Science, literature, and art	209,010
		Trade, etc. . . .	2,629,675
		Social welfare . .	1,158,200
		Pensions . . .	268,864
		Other expenditure .	100,000
Total revenue .	13,762,990 (621,354*l.*)	Total expenditure .	13,199,041 (591,830*l.*)

The public debt of Iceland was on December 31, 1933, 25,959,217 krónur, besides 13,998,965 krónur on behalf of banks and mortgage institutions, or altogether 39,958,182 krónur, of which the foreign debt amounted to 33,896,136 krónur, and the internal debt 6,062,046 krónur.

The State assets amounted on December 31, 1933, to 66,305,044 krónur.

Defence.—Iceland possesses neither an army nor a navy, nor any fortifications, and according to the Act of Union of 1918 its permanent neutrality is established. Three fishery protection vessels are maintained by the government, besides one which is maintained in commission by Denmark.

Production.—Of the total area of Iceland, about six-sevenths is unproductive, but only about one-quarter per cent. is under cultivation, which is confined to hay, potatoes, and turnips. In 1933, the total hay crop from cultivated and uncultivated land was about 4,389,000 cwt., the crop of potatoes 86,000 cwt., and of turnips 42,000 cwt. In the spring of 1933 the live stock

was as follows:—Horses, 45,400; head of cattle, 31,900; sheep, 729,000; goats, 2,800.

The total value of the fisheries in 1932 was estimated at 23,827,000 krónur (about 1,076,000*l.*), whereof the cod fishery was valued at 20,456,000 krónur, and the herring fishery at 2,069,000 krónur.

Commerce.—Total value of imports and exports for 5 years (kr. 22.15 = 1*l.*):—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports . . .	3,249,120	2,172,047	1,686,270	2,204,257	2,188,727
Exports . . .	2,713,117	2,167,448	2,157,316	2,257,350	2,020,825

The value of the leading imports and exports for 1932 was as follows:—

	Imports	Exports.
	Krónur	Krónur
Animals living and animal food . . .	219,474	39,033,575
Cereals	3,336,556	—
Colonial produce	3,115,911	—
Textile materials	30,686	530,409
Yarn, rope, etc.	1,655,325	1,062
Textile manufactures	4,125,117	22,590
Skins, hair, etc.	163,127	811,755
Fish and herring meal etc. . . .	—	3,377,746
Oils, tallow, etc.	3,606,179	3,677,687
Timber and wooden goods . . .	2,618,596	160
Coal	3,135,700	—
Salt	2,286,753	—
Metals and hardware	3,062,183	320
Vessels, carriages, machinery, etc. . .	2,425,971	180
Other articles	7,569,301	329,066
Total . . .	37,350,879	47,784,544

The following table shows the value of the trade with the different countries in 1932:—

	Imports	Exports
	Krónur	Krónur
Denmark	8,680,932	2,683,790
Great Britain	12,304,290	6,355,776
Norway	4,372,422	2,941,808
Sweden	1,245,812	2,404,678
Germany	5,123,284	5,005,874
Netherlands	621,157	423,611
Belgium	408,316	52,070
Portugal	92,642	5,413,994
Spain	2,196,280	13,339,060
Italy	109,388	6,642,737
United States	491,667	1,346,440
Other countries	1,704,689	1,174,706
Total . .	37,350,879	47,784,544

The chief articles of import from Iceland to the United Kingdom (Board of Trade Returns) for 1933 were: fish, 137,243*l.*; raw wool, 64,030*l.*; fish oils, 8,606*l.* Chief articles of the United Kingdom exports to Iceland, 1933: coal, 98,097*l.*; cottons, 40,338*l.*; meal and flour, 36,889*l.*; petroleum, 31,603*l.*

Total trade (Board of Trade Returns) between Iceland and the United Kingdom for 5 years :—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Iceland to U.K.	346,167	180,857	233,485	270,148	214,455
Exports to Iceland from U.K.	702,903	410,404	391,854	580,688	556,486
Re-exports to Iceland from U.K.	122,883	95,147	76,180	54,075	55,882

Shipping and Navigation.—The mercantile marine of Iceland (above 12 gross tons) was, in 1934, 86 steam vessels of 32,005 gross tons, and 297 motor vessels of 8,249 gross tons; total, 383 vessels of 40,254 gross tons.

Internal Communications.—There are no railways in Iceland. At the end of 1929 there were completed about 1,300 km. (800 miles) of carriage roads outside the towns. In 1933 there were registered 1,559 automobiles, of which 637 were passenger and 922 trucks.

There are 533 post offices.

The length of the telegraph and telephone lines at the end of 1933 was 2,660 miles. The wires had a length of 8,017 miles. There were 398 telegraph and telephone offices. Number of dispatches sent in the year 1933 was 254,377, of which 132,716 were internal. Number of telephone conversations was 562,337. The total receipts amounted to 1,866,811 krónur, and the total expenditure to 1,600,911 krónur, leaving a surplus of 265,909 krónur.

Banking and Credit.—There are 3 banks in Iceland, *Landsbankinn* (The National Bank), a note-issuing bank which belongs entirely to the State, *Bunadarbanki Islands* (The Rural Bank of Iceland), a State Bank founded 1930, and *Utvegsbanki Islands* (The Fishing Trade Bank), a private joint-stock bank, founded in 1930, the majority of shares being held by the Government. On December 31, 1932, the accounts of the National Bank balanced at 64,797,000 krónur. A special department for loans on mortgage is connected with the National Bank.

At the end of 1932 there were 54 savings banks with deposits amounting to 9,127,000 krónur.

Money, Weights and Measures.—The Icelandic name of the monetary unit is *króna*, pl. *krónur*. Since October, 1925, the relation of the value of the Icelandic króna to £ has been altered to £1 = Kr. 22·15, but this value is not stipulated by law.

The metric system of weights and measures is obligatory.

Diplomatic and Consular Representatives.

1. Of Iceland in Great Britain.

According to the Act of Union of 1918, Iceland is represented by the Diplomatic Representatives of Denmark.

2. Of Great Britain in Iceland.

Consul at Reykjavik.—Asgeir Sigurdsson, C.B.E.

There are also consular representatives at Akureyri, Isafjord, Nordfjord, and Vestmannaeyjar.

IRAQ.

(Mesopotamia.)

Iraq was freed from the Turks during the Great War. It was recognised as an independent State, to be placed under a Mandatory Power, and the mandate was allotted to Great Britain. On December 14, 1927, a treaty was signed between Great Britain and Iraq, by which the former undertook to recognise the latter as an independent State. Iraq was admitted to membership of the League of Nations on October 4, 1932, and the mandate was terminated.

Reigning King.

Ghazi, born March 21, 1912, succeeded his father, Faisal, first King of Iraq, who died on September 9, 1933; married on September 19, 1933, to his cousin, the Emira *Aliyah*, second daughter of King Ali of the Hejaz.

Sisters of the King.—Emirah *Assa* and Emirah *Rajihah.*

Government.—In 1920 a Council of State was formed, as a provisional measure, to conduct the administration of the country. On August 23, 1921, the High Commissioner proclaimed the Emir Faisal King of Iraq, by election

of the people, as the result of a plebiscite in which 96 per cent. of the inhabitants of the country voted in his favour.

The Cabinet, formed on March 17, 1935, is as follows:—

Prime Minister and Minister of Finance.—*General Yasin Pasha el *Hashimi*.
Minister of the Interior.—*Rashid Ali Beg *Gailani*.
Minister of Defence.—*General Jafar Pasha el *Askari*.
Minister of Foreign Affairs.—*General Nuri Pasha *as Said*.
Minister of Economics and Communications.—Amin *Zaki* Beg.
Minister of Justice.—Mohamed *Zaki* Beg.
Minister of Education.—Sheikh Riza *Shabibi*.

* Has previously been Prime Minister.

The Organic Law passed by the Constituent Assembly in June, 1924, provides for a limited monarchy and a responsible government. The legislative body consists of a Senate of 20 nominated 'elder statesmen,' and the Lower House of 88 elected deputies.

In March, 1924, the elective Constituent Assembly met for the purpose of ratifying the Anglo-Iraqi treaty, passing the Organic Law and the Electoral Law for the election of a subsequent parliament. It completed these duties early in August, and was then dissolved. The first Parliament under the Constitution was opened by King Faisal on July 16, 1925.

The country is now divided into the following Liwas: Mosul, Arbil, Kirkuk, Sulaimani, Diyala, Baghdad, Dulaim, Kut, Karbala, Hillah, Diwaniyah, Muntafiq, 'Amarah, Basrah. Each Liwa is administered by a Mutasarrif, and is sub-divided into Qadhas (under Qaimmaqams) and Nahiyahs (under Mudirs).

Area and Population.—The country has an area of 116,600 square miles and a population, according to an estimated census made in 1932, of 2,857,077. The following are the detailed figures of the census results:—

Liwa	Sunnis	Shias	Un-orthodox	Christians	Jews	Other Religions	Total
Mosul . .	268,844	18,997	11	73,058	7,537	24,063	392,510
Arbil . .	99,670	220	—	3,795	3,090	—	106,775
Kirkuk . .	122,610	11,204	—	1,308	2,633	134	137,889
Sulaimani .	101,282	—	106	194	1,343	7	102,932
Baghdad .	192,187	96,165	153	27,292	42,799	244	358,840
Diyala . .	43,086	39,321	1,483	488	2,252	227	86,857
Kut . .	2,569	117,344	5	72	346	51	120,387
Diwaniyah .	3,388	337,083	—	27	531	39	341,068

Southern Desert	2,000	18,000	—	—	—	—	20,000
Total . .	1,029,833	1,612,533	1,758	110,885	72,783	29,285	2,857,077

On November 25, 1933, the Council of the League of Nations fixed the boundary between Iraq and Syria, including the whole of the Jebel Sinjar in Iraq.

Education.—The medium of instruction in the schools is Arabic, except in the Kurdish-speaking areas; Turkish remains in a few Turcoman towns (Tuzkhur-matu, Kirkuk, Kifri). In 1933-34 there were 53,393 pupils (boys and

girls) in the 458 government primary and elementary schools, with 1,808 teachers. There were in 1933–34 six secondary schools at Baghdad, Basrah, Mosul, and Najaf with 425 pupils, and 21 intermediate schools at other places with 3,029 pupils. There are two technical schools, a law college, a medical college, a domestic science school, and a military college. There are two training colleges for town teachers (one for men and the other for women) and two training colleges for village teachers (one for men and the other for women) with a total of 314 pupils. There are 142 centres for illiterates at various places in the country. In April, 1922, King Faisal laid the foundation stone of the future Al ul Bait University, and the first block was opened on March 15, 1926. The education budget for the year 1933–34 amounted to 359,645 dinars, and for 1934–35, to 399,645 dinars.

Justice.—Civil and Shara' Courts are established throughout the country as follows:—A Court of Cassation at Baghdad with a British President and 6 'Iraqi Judges, 2 Shara' Courts of Revision at Baghdad, 6 Sessions areas, each under a British President, 6 Courts of First Instance; 8 Single Judge Courts with jurisdiction of a Court of First Instance; 33 Peace Courts; 10 Shara' Courts. In districts where a Peace Court only is established the Peace Judge has limited jurisdiction of a Court of First Instance as well as Shara' Jurisdiction.

Wherever a Civil Court is established the judge sits as a magistrate, every judge having either first or second class magisterial powers. Certain administrative officials of outlying places where no courts have been formed have also magisterial powers, and have also been given powers of a peace judge in cases of debts due from cultivators.

The prison population at the end of April, 1934, was 4,879 (74 females).

Finance.—Civil receipts and expenditure:—

—	1929–30	1930–31	1931–32	1932–33	1933–34
	Rupees	Rupees	Iraqi dinars	Iraqi dinars	Iraqi dinars
Revenue . .	5,72,77,479	4,64,56,781	4,289,741	3,691,052 [3]	3,574,830 [5]
Expenditure .	5,73,19,390 [1]	5,11,57,521	3,729,974 [2]	3,586,159 [4]	3,553,170 [6]

[1] Including 11,53,788 rupees on capital expenditure.
[2] Including 169,993 dinars on capital expenditure.
[3] Exclusive of oil royalties, amounting to 524,397 dinars.
[4] Exclusive of capital works expenditure, amounting to 332,603 dinars.
[5] Exclusive of oil royalties amounting to 536,050 dinars.
[6] Exclusive of capital works expenditure, amounting to 328,250 dinars.

Defence.—Besides British Imperial Forces, which passed on October 1, 1922, under the control of the Air Ministry, and now consist of R.A.F. units, there are local forces of the 'Iraqi Army. The establishment of the 'Iraqi Army on December 31, 1933, was as follows:—2 cavalry regiments, 2 batteries of field artillery, 3 batteries of mountain artillery, 12 infantry battalions, 1 motor machine-gun company, 1 signal battalion, 1 armoured car section, 1 platoon of engineers. The administrative services consisted of 1 mechanical transport company, 2 horse transport companies, veterinary and remount services, ordnance services and medical services. The following schools and depots also exist: Staff School, Royal 'Iraqi Military College, Cavalry School and Depot, Small Arms School, Mechanical Transport School and Depot, and Ordnance Depôt. Total strength, 11,588 officers and men. The Royal 'Iraqi air force consists of one squadron, one training squadron, and one communication flight. In January, 1934, an Act was passed for

introducing compulsory military service on all men between the ages of 19 and 21. Two years are to be served with the Colours, four in the First Reserve and four in the Second. Students in secondary, technical and religious schools and the physically unfit are exempt, and exemption from service may be obtained by the payment of 30 dinars. The Ministry of Defence is advised by a British Military Mission.

On June 30, 1934, the 'Iraqi Police force comprised 79 'Iraqi Gazetted Officers, 289 Inspectors, 3,735 mounted police and 4,954 foot police—total strength, 8,689. The strength of the British Inspectorate staff is 5 Gazetted Officers (to be further reduced in June, 1935). The force is under complete 'Iraqi executive control. Police budget for the year 1934–35, 569,462 dinars. There is a camel corps, total strength, 110 camelmen, which operates on the Western and South Western Frontiers; and also 17 armed cars, equipped with Lewis and Vickers guns. Attached to these cars are Police wireless stations (mobile and fixed). There is a Mobile Force, comprising a Regiment of Mounted Police (four squadrons) at headquarters with a complement of armed cars. There is a large Police Training School in Baghdad for probationary gazetted officers and inspectors.

Production.—Iraq is a land of great potentialities. The soil of the country is rich, but there are vast areas which can only be cultivated if irrigated by canals or pumps. The Irrigation Department operates several canal systems, and new irrigation works are under consideration. The number of pumps at the end of December, 1930, was roughly 2,027, with a total horse-power of perhaps 58,279, all in the hands of private individuals or tribal groups. The total area actually irrigated by them in a single year is at present about 1,000,000 acres, but reliable figures are not available.

An oilfield, 30 miles south of Khanaqin, in the area known as the Transferred Territories near the Persian frontier, is operated by the Khanaqin Oil Company, a subsidiary of the Anglo-Persian Oil Company, and there is a pipe-line to a refinery near Khanaqin. Oil for consumption in Iraq is refined at this refinery and distributed and marketed by an associated company, the Rafidain Oil Company in all parts of Iraq at cheap prices controlled by an agreement between the company and the Government. An oilfield at Kirkuk has been tested by the 'Iraq Petroleum Company, an international group, who have constructed pipe-lines to the Mediterranean in order to go into production. The British Oil Development Company are exploring oil resources in the Mosul district west of the Tigris.

The chief winter crops are wheat and barley. The date crop is important, and the chief producing area is the tidally irrigated riverain belt of the Shatt-el-Arab. Wool is also an important export. Cotton exports reached 5,000 bales in 1928, but has since declined owing to adverse markets.

Commerce.—Imports and exports for five fiscal years (ended March 31) were as follows:—

	1929–30	1930–31	1931–32	1932–33	1933–34
	Rupees	Rupees	Rupees	Iraqi dinars	Iraqi dinars
Imports .	9,82,32,840	7,13,81,615	6,39,78,175	6,239,614	6,024,954
Exports .	5,63,38,285	4,07,12,642	4,62,23,767	2,563,559	2,873,820

Customs gross revenue in 1932–33, 1,557,190 dinars; in 1933–34, 1,637,787 dinars. Transit, 1932–33, 1,933,941 dinars; 1933–34, 3,007,669 dinars.

The principal imports in 1933–34 were as follows, in thousands of dinars

(corresponding figures for 1932–33 in parentheses):—cotton piece-goods, 941 (1,110); metals and ores, 862 (837); sugar, 399 (397); vehicles, 384 (298); machinery, 315 (248); woollen piece-goods, 144 (179).

The export of barley in 1932–33, 62,657 tons, valued at 213,442 dinars; in 1933–34, 82,553 tons, valued at 206,906 dinars; of wheat in 1932–33, 13,025 tons, valued at 62,979 dinars; in 1933–34, 15,413 tons, valued at 72,018 dinars; of wool in 1932–33, 3,112 tons, valued at 91,017 dinars; in 1933–34, 3,676 tons, valued at 132,472 dinars; and of dates in 1932–33, 155,643 tons, valued at 878,559 dinars; in 1933–34, 114,300 tons, valued at 834,843 dinars.

The total trade between Iraq and United Kingdom, according to the Board of Trade Returns, was as follows for five years:—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Iraq	1,131,156	705,113	421,914	439,737	492,252
Exports to Iraq .	1,692,499	1,242,118	1,975,845	1,893,866	1,657,449
Re-exports to Iraq from U.K. .	84,251	26,673	34,417	25,675	20,061

Communications.—The 'Iraqi railway system consists of a metre gauge line from the Port of Basra, which is the Port of Iraq situated on the Shatt-el-Arab at the head of the Persian Gulf, to Baghdad, a distance of 354 miles. There are further, a metre gauge line, connected with the Basra line by a wagon ferry across the River Tigris at Baghdad, from Baghdad to the important town of Kirkuk in Northern 'Iraq (201 miles); a branch metre gauge line therefrom to Khanaqin (17 miles) also an important town near the Iraqi-Persian Frontier; a standard gauge (4 ft. 8½ in.) line from Baghdad to Baiji (136 miles) along the right bank of the Tigris towards Mosul. The main Basra-Baghdad line passes the ancient cities of Ur of the Chaldees, Babylon and Kish, and special railway facilities exist to enable travellers to visit these cities. Goods trains leave the Port of Basra daily for Baghdad. There are also daily services to Khanaqin, whence all goods are transferred by road to the markets in Northern and Central Persia. Arrangements also exist whereby through Bills of Lading are issued by steamship companies covering the carriage of goods from overseas ports, *via* sea and rail, to Baghdad, while the railway administration is in a position to arrange collection and to quote through rates for the carriage of such to and from all parts of 'Iraq and Persia. Passengers from London and the Continent and vice versa can book through *via* the Simplon-Orient and Taurus expresses *via* Paris, Venice, Trieste, Belgrade, Sofia, Constantinople to Mosul, Baghdad, Basra and thence to India. The gap between the Syrian railhead at Tel Ziouane and the 'Iraq railhead at Kirkuk (240 miles) is served by a fleet of Rolls Royce saloon cars operated by the railway administration. The journey from London to Baghdad, with wagon-lits from Calais to Tel Ziouane, is performed in seven days, and that to Bombay and vice versa in 14 to 16 days, inclusive of two days to visit places of interest in 'Iraq. These services are bi-weekly and offer an alternative to the sea routes. The total route mileage open on March 31, 1934, was 752·70 miles. There were also 173·09 miles of siding, making a total of 925·79 miles. Railway earnings for the year 1933–34 were approximately 524,037*l.*, and expenses 491,986*l.*

Since the War nearly five thousand miles of roads, chiefly earthen, have been opened for the passage of all classes of traffic. Many of these roads are now being surfaced with gravel and bituminous compounds. Of these, a

very important one has been opened recently which enables, in particular, the trade of the north-west provinces of Persia to pass to and from 'Iraq. This new road connects the town of Arbil, 60 miles north of railhead at Kirkuk, to the Persian frontier, whence connection to the chief towns, including Tabriz, are made.

In the year 1932–33, 812 steamers of a gross registered tonnage of 4,738,646 entered the ports of Basra and Abadan.

At the close of 1933 there were 112 Post and Telegraph Offices in 'Iraq. At most of these Money Orders are issued and paid. A restricted number of Offices also issue and pay Postal Orders and accept and deliver Insured and Cash-on-Delivery (Value-payable) postal packets.

Internal mail communication is maintained over distances totalling 5,235 miles, as follows:—820 miles by air, 735 miles by rail, 3,304 miles by mechanical road transport, 254 miles by pack animals and runner service, 122 miles by river.

Apart from frontier exchanges of mails with Turkey and Persia ordinary foreign mails are received and despatched by three routes; a weekly service *via* India for correspondence to and from all countries East of Iraq (excluding China and Japan) and also East and South Africa, and two bi-weekly services across the desert and through Palestine and Syria for correspondence with all countries West of Iraq, including those in North and South America. Mails for China and Japan are transmitted by the overland route. The latter service affords mail communication to or from most countries in Europe in less than fifteen days, the time of transit for mails between England and Iraq being seven to eight days. Parcels are received and despatched by both of these routes.

Air Mail correspondence is both despatched and received in mails conveyed by the Imperial Airways, Ltd., London–Cairo–Baghdad–Karachi–Singapore, and the (K.L.M.) Amsterdam-Bandoeng services. The transit period between Iraq and England by this service is 3 to 4 days, and between Iraq and India about 2 days. Air Mail communication with Syria is maintained by means of Air Union Orient Lines, Ltd., bi-weekly service.

During 1933 the number of postal packets transmitted by the Inland Post was approximately 4,482,213, including 18,586 parcels. Approximately 2,327,267 postal packets, including 4,601 parcels, were despatched to destinations abroad and 4,298,322, including 26,953 parcels, were received from foreign countries for delivery in Iraq.

Post Office Money Orders issued during 1933 totalled 92,902, of an aggregate value of 248,358 dinars, and 88,558 Money Orders, aggregating 226,449 dinars, were paid.

On December 31, 1933, the line and wire mileages of the Iraq Telegraph and Telephone System were 4,430 miles and 21,620 miles respectively. The number of Post and Telegraph Offices open for public telegraph traffic was 113; in addition, 60 Railway Telegraph Offices also dealt with public telegrams.

The total number of Inland Telegrams transmitted during 1933 was 178,676. Sent and received ordinary foreign telegrams totalled 22,855 and 39,911 respectively. The number of wireless messages sent and received was 34,844. At the end of the year there were 58 Departmental Public Telephone Exchanges, and 33 Sub-Exchanges operating private systems. The number of connections in the public system was 2,370. A Strowager Automatic Telephone Exchange has been operating at Basra since 1923.

Currency. Banking. Weights and Measures.—The rupee currency was displaced by a national Iraqi currency and note issue, by a Currency Law published on April 19, 1931. By this law, which came into

effect on July 1, 1931, but was suspended until April 1, 1932, the monetary unit became the *'Iraqi dinar* (I.D.) = 1,000 fils = 5 riyals = 20 dirhams = 1 pound sterling. Silver coins for 50 fils (*Dirham*) and 20 fils are in circulation, and other coins for 10, 4 (nickel), 2 and 1 (bronze) fils. Notes are for a quarter, a half, and one dinar, and for 5, 10 and 100 dinars. The 50-fils coins are of a silver alloy, the fineness of which is 500 parts of pure silver in 1,000 parts, and of a weight of 9·00 grammes, while the 20-fils coin is of a silver alloy, the fineness of which is the same, but of a weight of 3·60 grammes. A larger coin of 200 fils was put into circulation in June, 1933. The total issued currency on July 1, 1934, was notes, 2,675,765 dinars; coin, 498,600 dinars. The Currency is controlled by an Iraqi Currency Board sitting in London. The principal banks are the Ottoman Bank, the Imperial Bank of Persia, and the Eastern Bank, with branches in the chief towns.

The metric system is gradually being introduced, but native weights and measures are still met with, the principal ones being: *hogga* = 2·8 lbs.; *man* = 56 lbs.; *wazna* = 224 lbs.; *tughar* = 4,480 lbs.; *dhra* = 29·38 inches (27 inches in Aleppo); *mishara* = 0·62 acres,

Diplomatic Representatives.

1. Of Great Britain in Iraq.

Ambassador.—Archibald John Kerr Clark Kerr. (Appointed, 1934.)
Counsellor.—G. A. D. Ogilvie-Forbes, C.M.G.
First Secretary.—C. H. Bateman, M.C.
Third Secretaries.—P. M. Crosthwaite and W. L. Gorell-Barnes.
Financial Secretary.—F. E. Stafford, O.B.E.
Oriental Secretary.—V. Holt, M.V.O.
Air Officer Commanding British Forces.—Air Vice-Marshal C. S. Burnett, C.B, C.B.E., D.S.O.
British Consul, Baghdad.—C. A. W. Were.
British Consul, Basra.—L. H. Hurst.
British Consul, Mosul.—H. R. D. Gybbon-Monypenny.

There are also Vice-Consuls at Kirkuk and Diana-Rowanduz.

2. Of Iraq in Great Britain.

Envoy and Minister.—(Vacant.)
First Secretary and Chargé d'Affaires.—Ata Bey Amin, C.V.O.
Secretaries.—Said Effendi Fahim and Albert F. Nannis.
Military Attaché.—Major Kassim Shukri.
Attachés.—Thabit Bey Abdun-noor, Sheikh Kadhim el Dujaily and Hashim Effendi Jawad.

ITALY.

(REGNO D'ITALIA.)

Reigning King.

Vittorio Emanuele III., born November 11, 1869, the only son of King Umberto I. of Italy and of Queen Margherita; succeeded to the throne on the death of his father, July 29, 1900; married October 24, 1896, to *Elena*, born January 8, 1873, daughter of Nicholas, King of Montenegro; offspring, Princess *Jolanda*, born June 1, 1901, married on April 9, 1923, to Count Calvi di Bergolo; has three daughters and a son, born in 1924, 1927, 1930 and 1933 respectively; Princess *Mafalda*, born November 19, 1902, married on September 23, 1925, to Prince Philip of Hesse; has two sons, born in 1926 and in 1927 respectively; Prince *Umberto* Nicola Tomaso Giovanni Maria, Prince of Piedmont and Heir Apparent, born Sept. 15, 1904, married January 8, 1930, to Marie-José of Belgium, born August 4, 1906; offspring: Princess *Maria Pia*, born September 24, 1934; Princess *Giovanna*, born November 13, 1907, married to King Boris of Bulgaria, on October 25, 1930; has one daughter, born in 1933; Princess *Maria*, born December 26, 1914.

Cousin of the King.

Prince *Vittorio Emanuele*, of Savoy-Aosta, Count of Turin, born November 24, 1870, son of the late Prince Amedeo of Savoy, Duke of Aosta (deceased January 18, 1890), from his union with Maria Vittorio, Princess of Pozzo della Cisterna, who died January 8, 1876.

Most genealogists trace the origin of the reigning house to a German Count Berthold, who, in the eleventh century, established himself on the western slope of the Alps, between Mont Blanc and Lake Geneva. In the end of the eleventh century the Count of Savoy acquired the countries of Turin and Susa. Count Amadeus, in 1383, founded a law of primogeniture which led to the immediate acquisition of the territory of Nice. In 1416 the Counts of Savoy adopted the title of Duke; in 1418 they acquired the Principality of Piedmont; and in 1713 they obtained the island of Sicily, with the title of King. Sicily had to be exchanged, in 1720, for the isle of Sardinia, to which henceforth the royal dignity remained attached. The Genoese territory was added at the peace of 1815. The direct male line of the House of Savoy died out with King Carlo Felice in 1831, and the crown fell to Prince Carlo Alberto, of the house of Savoy-Carignano, a branch founded by Tommaso Francesco, born in 1596, younger son of Duke Carlo Emanuele I. of Savoy. King Carlo Alberto abdicated the throne March 23, 1849, in favour

of his son, the late King Vittorio Emanuele II., who, by the Peace of Zürich, November 10, 1859, obtained Lombardy, with the exception of Mantua and a part of the surrounding territory. On March 11, 1860, annexation to Sardinia was voted by *plébiscites* in Parma, Modena, the Romagna, and Tuscany; on October 21, Sicily and Naples (including *Benevento* and *Pontecorvo*, part of the Papal States), and on November 4, the Marches and Umbria. The first Italian Parliament assembled in February, 1861, and declared (March 17, 1861) Vittorio Emanuele King of Italy. The remaining part of the province of Mantua and Venetia were added in 1866. Finally, the remaining part of the Papal States (province of Rome), having been taken possession of by an Italian army (September 20, 1870), was annexed to the Kingdom by *plébiscite* on October 2. After the Great War—by the Treaty of Saint Germain (Sept. 10, 1919) there were annexed to the kingdom: the Venezia Tridentina, the Venezia Giulia with Zara, the islands of Cherso, Lussino and other minor ones. Later, on January 28, 1924, Fiume was also annexed.

The civil list has been settled (1919) at 11,250,000 lire; by a law of 1925 an allowance of 3,000,000 lire was settled on the Prince of Piedmont, Heir Apparent; Duke of Aosta and the Duke of Genoa receive an allowance of 1,000,000 lire each.

The greater part of the private domains of the reigning family has been given up to the State.

Constitution and Government.

The present Constitution of Italy is an expansion of the 'Statuto fondamentale del Regno,' granted on March 4, 1848, by King Charles Albert to his Sardinian subjects. According to this charter, the executive power of the State belongs exclusively to the Sovereign, and is exercised by him through responsible ministers; while the legislative authority rests conjointly in the King and Parliament, the latter consisting of two Chambers—an upper one, the Senate, and a lower one, called the 'Camera de' Deputati.' To co-ordinate and complete all the activity of the régime, resulting from the Fascist Revolution, there is the *Gran Consiglio del Fascismo* which is composed of the *quadrumviri* of the March to Rome appointed for an indefinite period; a certain number of Members (Ministers and other high dignitaries) appointed for as long as they hold their respective office; and an undetermined number of Members to be appointed for the duration of three years, by the Head of Government. The *Gran Consiglio del Fascismo* forms the definitive list of the candidates to Parliament; gives its opinion on the Statutes, on the arrangement and on the lines of conduct of the Fascist Party. Its approval must be obtained on all questions of a constitutional nature including those connected with the succession to the throne and the prerogatives of the Crown. The Secretary of the *Partito Nazionale Fascista* is also Secretary to the *Gran Consiglio* and may be invited at the sessions of the Council of Ministers. In 1934 the membership of the Fascist party consisted of 1,851,777 members belonging to the male 'Fasci,' of 657,613 belonging to the young combative 'Fasci,' of 66,934 fascist students and of 304,313 persons belonging to the female 'Fasci.'

The Senate is composed of the princes of the royal house who are twenty-one years of age (with the right to vote when twenty-five years of age), and of an unlimited number of members, above forty years old, who are nominated by the King for life; a condition of the nomination being that the person should either fill a high office, or have acquired fame in science, literature, or any other pursuit tending to the benefit of the nation, or,

finally, should pay taxes to the annual amount of 3,000 lire. On October 28, 1934, the Senators numbered 456: of these 8 are Royal Princes.

By the law of May 17, 1928, the whole electoral system has been radically changed. Franchise is granted to men of 21 years of age, and also to men aged 18 years, if married or widowers with sons, who are paying a syndicate rate, or taxes to the amount of 100 lire, or are receiving a salary or pension from any public institution. Criminals and certain others are excluded.

The Chamber of Deputies consists of 400 members elected for 5 years. To be eligible it is necessary to have completed 25 years of age and to fulfil the conditions required for active electorate. The whole country is a single constituency. The National Syndicate Confederations are entitled to propose a number of candidates twice as great as the number of deputies to be elected. Juridical persons and Associations of national character are also entitled to propose 200 other candidates. Out of these lists of candidates the Great Fascist Council selects 400 names which is the roll proposed to the electors. If the proposed roll is not approved, fresh elections must be held. In this case the lists of candidates must be presented fifteen days before the fixed day for the elections. The candidates elected are those inscribed on the list which has obtained the majority of votes. The seats reserved to the minority are divided among the other lists in proportion to the number of votes obtained by each list.

Each Deputy has an annual allowance of 21,000 lire.

The last elections took place on March 25, 1934; out of the 10,433,536 registered electors, 10,041,997 (or 96·2 per cent.) participated in the balloting; of these 10,025,513 (or 99·84 per cent. of the voters) voted in favour of the national list of candidates.

The duration of a Parliament is five years, and it must meet annually. The ministers have the right to attend the debates of both the upper and the lower House; but they have no vote unless they are members.

The executive power is exercised by the King through the Government. The Prime Minister is the Chief of the Government responsible to the King for the general political direction of the Government. The Ministers are responsible to the King and the Chief of the Government for the action of their respective Offices. The Prefects are responsible, in their respective Provinces, for the high efficiency of all the Services connected with the State—with the exception of those connected with the Administration of Justice, of War, of the Navy and of the Air Service.

To discipline mass labour, the Italian State juridically admits Syndicates. Syndical Associations are either grouped territorially, or in Federations. The latter consist of thirteen Confederations, six for the employers and six for the workers. Each Confederation corresponds to the following activities: Agriculture, Industry, Commerce, Banks, Transport on Land and Maritime and Air Transports. The thirteenth comprises Arts or Liberal Professions.

The National Council of Corporations is presided over by the Chief of the Government and through it is carried into effect the principle of integral corporation. Legislation in 1934 created 22 Corporations, which were officially constituted on November 9, 1934.

The present Cabinet, appointed on January 24, 1935, consists of the following Members:

Prime Minister, Chief of the Government and Minister of the Interior, of Foreign Affairs, of the Colonies, of War, of the Navy, of the Air, and of Corporations.—Signor Benito *Mussolini.*

Minister of Public Works.—Luigi *Razza.*

Minister of National Education.—Count Cesare Maria *de Vecchi.*

Minister of Agriculture and Forests.—Edmondo *Rossoni.*
Minister of Finance.—Paolo *Thaon de Reval.*
Minister of Justice.—Arrigo *Solmi.*
Minister of Communications.—Antonio Stefano *Benni.*

Local Government.

The State is divided into 92 Provinces, and these into 7,311 Communes. Provinces are administered by a Provincial Rectorate and a President. The President, the Vice President and the Rectors are appointed by Royal Decree. In every province there is a *Giunta Provinciale Amministrativa* which exercises functions of guardianship on Communes and on the *Opere Pie*, as well as jurisdictional functions. The *Consiglio Provinciale dell'Economia Corporativa* represents the interests of the productive activities of the Province. At the head of the Commune (with the exception of Rome where there is a Governor, and Naples where there is a High Commissioner) is the *Podestà* (Mayor) who is appointed by Royal Decree and remains in charge for five years with the same powers which were formally exercised by the elected municipal authorities. In all the capitals of the Provinces and in Communes with more than 20,000 inhabitants, there exists a Council (*Consulta*) of from 10 to 40 members, selected by the Prefect of the Province from among the persons designated by the recognised local syndical associations. The *Consulta* has advisory functions only, but its advice must be asked in the case of the approval of budgets and of the imposition of taxes.

Area and Population.

The following figures show the increase of the population of the Kingdom of Italy:—

Year (1 Jan.)	Population	Increase per cent. per annum	Year (1 Jan.)	Population	Increase per cent. per annum
1816	18,283,000	—	1928	40,054,000	0·940
1872[2]	26,801,154	0·260	1929	40,445,000	0·976
1882[2]	28,459,628	0·619	1930	40,759,000	0·776
1901,[3]	32,475,253	0·702	1931,[3,5]	41,176,671	0·768
1911,[2,3]	34,671,377	0·655	1933	41,806,000	0·867
1921,[3,4]	38,033,000	0·929	1934	42,217,000	0·983
1926	39,349,000	0·846	1935	42,621,000	0·956

[1] February 10. [2] June 10. [3] Census Figures. [4] December 1. [5] April 21.

The following table gives area and population of the Provinces and departments according to the census of April 21, 1931:—

Provinces and Departments	Area in sq. miles	Population Census, 1931	Population per sq. mile, 1931
Alessandria	1,960	756,068	385·7
Aosta	1,837	226,107	123·1
Cuneo	2,870	619,598	215·9
Novara	1,391	389,352	279·9
Torino	2,116	1,147,149	542·1
Vercelli	1,157	359,525	310·7
Piedmont	11,331	3,497,799	308·7

Provinces and Departments	Area in sq. miles	Population Census, 1931	Population per sq. mile, 1931
Genova	682	831,651	1219·4
Imperia	456	162,383	356·1
La Spezia	345	221,921	643·2
Savona	614	221,003	359·9
Liguria	2,097	1,436,958	685·2
Bergamo	1,076	584,881	543·6
Brescia	1,823	710,642	389·8

Emigrants.—Total number in 1930, 280,097; in 1931, 165,864; in 1932, 83,309; in 1933, 194,772; in 1934, 175,740. In 1934, 142,158 went to European countries, and 33,582 to other countries.

The number of Italians who returned to Italy was in 1934, 106,975.

The number of Italians living in other countries is estimated at 9,600,000 (29,000 in Great Britain). Foreigners living in Italy (Census, 1931), numbered 137,797.

Principal Towns.

On April 21, 1931, the number of communes and their population were as follows:—

Population	Number	Population
Up to 100	2	171
From 101 to 1,000	836	576,848
From 1,001 to 5,000	4,616	11,807,514
From 5,001 to 10,000	1,178	7,955,392
From 10,001 to 25,000	509	7,388,341
From 25,001 to 50,000	103	3,473,320
From 50,001 to 100,000	44	2,803,439
Over 100,000	22	7,171,646
Total	7,310	41,176,671

The communal population of the capitals of provinces was as follows, according to the census of April 21, 1931:—

Communes	Population	Communes	Population	Communes	Population
Agrigento	30,032	Catanzaro	41,888	Mantova	42,939

[1] On October 1, 1934, Rome had a population of 1,121,189; Milan, 1,049,250; Naples, 874,126; Genoa, 635,881; Turin, 619,375.

Religion.

The treaty between the Holy See and Italy, of February 11, 1929, admits and confirms the principle established by the first article of the Fundamental Statute of the Kingdom of Italy that the Catholic Apostolic Roman Religion is the only religion of the State. Other creeds are permitted, provided always they do not profess principles, or follow rites, contrary to public order or to moral behaviour. The profession of such creeds is free, and discussion on religious matters is freely admitted.

The appointment of Archbishops and of Bishops is made by the Holy See; but before proceeding to such appointments the Holy See submits to the Italian Government the name of the person to be appointed in order to obtain an assurance that the latter will not raise objections of a political nature.

Catholic religious teaching is given in elementary and intermediate schools. Marriages may be celebrated before a Catholic clergyman in accordance with the rules of Canon Law, or before a clergyman of other religions admitted by the State. Civil marriages when celebrated in accordance with prescribed legal formalities are also recognized.

According to the Census of 1931, 99·6 per cent. of the Italians were Catholics (41,017,369); 82,481 were Protestants; 47,435 Jews; orthodox, 5,890; Muslims, 814; other religions, 2,323; atheists, 17,474; religion not disclosed, 2,885.

Education.

Elementary education is free and compulsory up to the age of 14. It is given in 3 grades: Preparatory in the so-called 'Maternal Schools' or 'Asili' maintained by the municipalities (3 years), Lower (3 years), and Higher (2 years).

The Secondary schools are divided into 2 grades. In the first grade are the Gymnasium (*Ginnasio*), the Preparatory Course for Teachers, the Preparatory Course of the Technical Institute. In the second grade are the classical Lyceum (*Liceo classico*), the Lyceum for Science, the Higher Course for Teachers, the Higher Technical Institute (which is divided into several Sections).

Higher Instruction is given in the Royal Universities and Higher Institutes, and also in the Free Universities and Free Higher Institutes ('Free' denotes that they are self-supporting).

Physical education is organized by the *Comitato Olimpionico Nazionale Italiano*, which directs and co-ordinates the activity of 33 National Federations. Sports of a popular character are entrusted to the *Opera Nazionale Dopolavoro*. In the Elementary and Secondary Schools physical education for boys and for girls is entrusted to the *Opera Nazionale Balilla*.

[1] Not available.

[2] Including Lecturers.

There were also twelve higher institutes for commercial education (Turin, Genoa, Milan, Venice, Trieste, Rome, Bari, Catania, Naples, Florence, Palermo, and Bologna), with 9,182 students in 1933–34; six higher schools of agriculture (Milan, Bologna, Florence, Perugia, Pisa, and Portici) with 910 students in 1933–34; nine engineering colleges (Turin, Milan, Genoa, Padua, Bologna, Pisa, Rome, Naples, and Palermo), five schools of architecture (Rome, Florence, Naples, Turin and Venice), and the School of Industrial Chemistry in Bologna, with 3,757 students in 1933–34; the higher naval engineering college of Naples with 293 students; the school for Oriental languages in Naples, with 537 students; 10 veterinary colleges (Turin, Milan, Parma, Bologna, Perugia, Pisa, Naples, Messina, Sassari, and Camerino), with 657 students; 6 superior institutes for teachers (Turin, Milan, Florence, Rome, Naples, and Messina), with 2,471 students.

The Italian Academy consists of 60 members, divided into 4 categories.

Justice and Crime.

Italy has 1 Court of Cassation, in Rome, and is divided for the administration of justice into 18 appeal court districts (with 6 detached sections), subdivided into 126 tribunal districts, and these again into mandamenti, each with its own magistracy (Pretura), 986 in all. There are also 89 Assize Courts. For civil business, besides the magistracy above mentioned, *Conciliatori* have jurisdiction in petty plaints.

By a law of November, 1926, a special tribunal was instituted with jurisdiction in offences (*delitti*) against the security of the State.

Statistics of persons convicted of offences of all kinds:—

Year	Convictions			
	Total	Before the Pretori	Before the Tribunali (first instance)	Before the Corti d'Assise
1928	871,939	777,182	89,382	5,375
1929	816,121	724,416	86,993	4,712
1930	696,209	594,393	97,521	4,290
1931	768,539	676,623	87,466	4,450
1932	747,850	635,547	105,643	6,660

On December 31, 1933, there were 40,258 male and 3,076 female prisoners. At that date there were 993 establishments for imprisonment before trial, 66 penal establishments, and 24 establishments for the execution of preventive measure of safety.

Pauperism.

In Italy legal charity, in the sense of a right in the poor to be supported by the parish or commune, or of an obligation on the commune to relieve the poor, does not exist. Public charity in general is exercised through the permanent charitable foundations, called 'Istituzioni pubbliche di assistenza e di beneficenza' (Opere pie), regulated by the laws of July 17, 1890, and later laws, including that of June 17, 1926.

There is, moreover, the National Institution for the protection of Maternity and Infancy (*Opera Nazionale per la protezione della Maternità e dell' Infanzia*), whose relief expenditure during the year 1933 amounted to 137,956,000 lire, and the relief foundations of the Fascist Party which entertained during the same year 405,142 children in holiday resorts.

Finance.

Total effective revenue and expenditure for six years (in millions of lire) :—

Years ending June 30.	Revenue.	Expenditure	Years ending June 30.	Revenue.	Expenditure.

On June 30, 1934, and on Dec. 31, 1934, the public debt was as follows :—

—	Millions of Lire June 30, 1934	Millions of Lire Dec. 31, 1934
Consolidated debt	9,892	9,892
Redeemable debt	82,105	84,066
Floating debt	10,625	11,206
Total	102,622	105,164

The foreign public debt on Sept. 30, 1934, amounted to 82,033,000 dollars.

On June 30, 1933, the property of the State was as follows :—

	Estimated Value, in thousand Lire.
Financial assets (Treasury)	8,731,319
Property, immovable, movable, loans, and various titles	16,638,382
Property of industrial nature	28,731,573
Material in use in army, navy, and air force . .	20,301,011
Property used in the service of the State . . .	4,242,494
Scientific and artistic material	14,092,444
Total	92,737,223

Defence.

I. Frontier.

The extent of the land frontier of Italy is as follows:—French frontier 303 miles; Swiss 450; Austrian 261; Yugoslav 152; frontier of San Marino 24; in all (exclusive of San Marino) 1,166 miles. The coast line of the peninsula measures 2,472 miles; of Sicily, 693; of Sardinia, 830; of Elba and the small islands, 973; the total length of coast is thus 4,968 miles.

II. Army.

Service in the army (or navy) is compulsory and universal. Liability to service begins at the age of 21 up to the age of 55.

The term of service in the active army is normally 18 months for all arms. After passing through the ranks, the men are placed on 'unlimited' leave, *i.e.*, they are transferred to the reserve, in which they remain until the age of 55.

The army is divided into the metropolitan army and the colonial troops, the former being under the Ministry of War, the latter under the Ministry of the Colonies.

The establishment of the metropolitan army for 1934–35 was 15,350 officers and 235,600 other ranks organised in 11 army corps and the military commands of Sicily and Sardinia comprising:—

	Divisions	Brigades	Legions	Regiments	Battalions	Groups	Squadrons	Batteries	Companies
Carabinieri			21			—	—	—	—
Infantry	31	31	—	114	228	—	—	—	—
Cavalry	3	1	—	12	—	—	60	—	—
Artillery—									
Field	—	—	—	31	—	124	—	259	—
Mountain	—	—	—	4	—	9	—	27	—
Heavy	—	—	—	22	—	91	—	187	—
Coast	—	—	—	3	—	9	—	18	—
Anti-Air	—	—	—	5	—	12	—	24	—
Engineers	—	—	—	16	46	—	—	—	—
Railway troops	—	—	—	1	2	—	—	—	—
Balloonists	—	—	—	—	—	1	—	—	—
Medical	—	—	—	—	—	—	—	—	13
Supply	—	—	—	—	—	—	—	—	13
Mechanical Transport	—	—	—	—	—	13	—	—	—
Tanks	—	—	—	1	6	—	—	—	—

Besides the above-mentioned units, the Volunteer Militia for National Security was formed by decree of August 4, 1924. It is organised in General Headquarters (Rome), 4 areas (Milan, Bologna, Rome, Naples), 2 militia headquarters (Palermo, Cagliari), 33 legion group headquarters, 135 legions (13 reserve and 2 colonial) and 6 independent cohorts. Its strength in 1934 was 31,692 officers and 397,956 other ranks, inclusive of permanent formations amounting to 1,719 officers and 8,784 other ranks. Of these the average number called up for annual training was 31,507.

The Carabinieri are a force of military police. They are recruited by selection from the army, and by voluntary enlistment. In 1933 the strength of the Carabinieri was 1,043 officers and 49,500 other ranks.

The colonial forces consist of various colonial units, enlisted voluntarily, and native troops. The establishment in 1934 was 1,016 officers and 29,889

other ranks. This was distributed as follows: Tripolitania, 423 officers, 12,515 other ranks; Cyrenaica, 362 officers, 10,151 other ranks; Eritrea, 121 officers, 3,323 other ranks; Somaliland, 100 officers, 3,246 other ranks.

The army estimates for 1933–34 amount to 2,620,587,746 lire; for 1934–35, 2,543,761,000 lire.

III. Air Force.

By Royal Decree of January, 1923, the Commissariat of Aeronautics was constituted. By successive Royal Decree of March, 1923, the Royal Air Force was constituted as a separate body independent of the other armed forces. Finally, by Royal Decree of August, 1925, the Commissariat was abolished, and instead of it was created the Ministry of Aeronautics.

The Air Force is divided into wings (*stormi*), consisting of different numbers of groups, each of them containing different numbers of squadrons. The Air Force contains the following parts: (1) The Air Force proper; (2) the Air Force co-operating with the royal army; (3) the Air Force co-operating with the royal navy; (4) the Air Force for the colonial army.

The Air Force proper remains at the entire disposal of the Ministry of Aeronautics. The wings destined for co-operation with the army, the navy and the colonial forces depend respectively on the Ministers of War, of Marine and of the Colonies.

For the financial year 1933–34 the Air Force expenditure is estimated at 678 millions of lire, exclusive of expenditure on civil aviation.

The number of aeroplanes actually in service amounts to 840 in 1st line and 800 in reserve, but are gradually increasing.

The strength of the personnel (including officers, non-commissioned officers and other ranks) amounted for the year 1934–35 to 25,029 persons.

IV. Navy.

The Treaty of Washington assigned to Italy, in capital ship tonnage, a replacement figure of 175,000 tons (177,800 metric), but the existing ships have a 'standard' displacement of only 86,532 tons. Italy, had she so desired, could have begun the construction of capital ships at any time from 1927 to 1930. Under the London Naval Treaty, she reserved the right to lay down capital ships at any time up to 1936. This option was exercised on October 28, 1934, when two battleships of 35,000 tons, the *Littorio* and *Vittorio Veneto*, were begun. The older battleships *Cavour* and *Cesare* have been completely reconstructed and re-engined. The current building programmes include 4 cruisers of 6,790 tons.

The naval expenditure for 1933–34 is estimated at 1,397,222,277 lire, for 1934–35 at 1,224,780,477 lire.

The Head of the Naval Administration is the Minister of Marine, assisted by an Under-Secretary of State. The Ministry of Marine embraces various general and central directorates covering the personnel, the military and scientific services, naval and mechanical establishments, arms and naval armaments, medical and accountant officers, and civil personnel. Advisory Councils of the Ministry are the Board of Admirals; the Superior Marine Council; and the Committee of Ship Designs. The Office of the Chief of the Naval Staff is entrusted with the study of all problems connected with naval warfare and the employment of the various naval units.

The coast line of the peninsula is divided into zones placed under the jurisdiction of Admirals, Commanders-in-Chief of Maritime departments, with headquarters at Spezia, Naples, Venice, and Taranto. In localities more important from a strategical point of view, there exist Maritime commands (Pola, La Maddalena, Brindisi, Messina); and in other localities

there are stations under charge of Senior Naval Officers (Genoa, Leghorn, Gaeta, Cagliari and Zara).

The Mercantile Marine is administered by a Directorate General of the Ministry of Communications.

Summary of the Italian navy:—

—	Completed at end of		
	1932	1933	1934
Battleships	4	4	4
Armoured cruisers	3	3	2
Cruisers	18	20	22
Flotilla leaders and destroyers	92	94	103
Torpedo boats	23	20	4
Submarines	50	55	69

The tables which follow of the Italian fleet are arranged after the manner of other similar tables in this book, but all displacements have been corrected to Washington Treaty standard.

First of class laid down	Name	Standard Displacement.	Armour		Principal Armament	Torpedo Tubes	Indicated horse-power	*Max.* speed
			Belt	Big guns				
	Battleships.							knots
1910	Cavour	21,604	9¾	9½	10 12in.; 24 4in.	2	70,000	26

1928	Bande Nere	5,070	—	—	8 6in.; 6 4in.	4	95,000	37
	Colleoni							
	Barbiano							
	Giussano							
	Cadorna							
	Diaz							
1911	Libia	3,700	—	—	8 4·7in.; 3 3in.	2	12,500	22
1909	Quarto	2,903	—	—	6 4·7in.; 7 3in.	2	25,000	28
1910	Ancona	3,838	—	—	7 6in.; 3 3in.	2	26,000	27
1910	Taranto	3,184	—	—	7 6in.; 2 3in.	2	26,000	27
1913	Bari	3,248	—	—	8 6in.; 3 3in.	2	27,000	27·5
1911	Brindisi	2,756	—	—	9 4in.; 2 3in.	4	25,000	27
1911	Venezia							

The five cruisers last named are ex-enemy vessels. There are 15 modern flotilla leaders, of from 1,550 to 1,630 tons, and a speed from 35 to 38 knots, and 40 destroyers with speeds of from 30 to 40 knots, nearly all completed since the war, besides many of earlier date. Six of the cruisers and many of the destroyers are equipped as mine-layers.

The *personnel* consists of 3,336 officers and 51,800 men.

Production and Industry.

I. Agriculture.

The area of Italy comprises 76,637,877 acres, mainly distributed, on December 31, 1933, as follows (the figures are in acres):—cereals, 17,966,641; leguminous plants, 2,307,914; industrial plants, 442,309; vegetables, 1,284,920; vines, 2,436,406; olive trees, 1,991,626; woods and forests, 13,741,231; forage and pasture, 12,184,501. The total agricultural land extended to 70,294,640 acres.

According to the agricultural census taken on March 19, 1930, the number of firms engaged in agriculture was 4,114,116. Persons engaged in agriculture as their main occupation number 6,088,088 males and 2,704,349 females, while for 1,207,850 males and 2,938,912 females agriculture is a secondary occupation.

The principal crops for 3 years were as follows:—

—	Acreage			Produce in thousand quintals		
	1932	1933	1934	1932	1933	1934
Wheat	12,236,887	12,568,102	12,236,392	75,151	81,003	63,328
Barley	531,286	510,450	491,729	2,512	2,265	2,035
Oats	1,111,995	1,109,553	1,062,530	6,068	5,763	4,978
Rye	294,061	285,183	276,752	1,626	1,726	1,424
Maize	3,259,381	3,529,814	3,271,604	28,080	25,879	29,179
Rice	333,598	316,307	323,701	6,566	6,078	6,170
Beans	1,482,660	1,360,232	1,317,043	5,912	6,101	4,311
Potatoes	800,636	985,801	766,010	28,237	23,757	27,066
Sugar Beet	207,572	201,680	219,919	24,943	21,462	26,520
Vines	2,542,762	2,440,964	2,446,290	74,450[1]	58,769[1]	49,702[1]
Olives	1,990,820	1,991,215	1,991,626	—	1,761,190[2]	2,130,400[2]

[1] Grapes. [2] Hectolitres of oil.

On March 19, 1930, Italy had 973,978 horses, 869,781 asses, 455,234 mules, 15,639 buffaloes, 7,012,877 cattle, 3,264,572 pigs, 10,043,370 sheep, and 1,846,075 goats.

II. Forestry.

The total forest area was 5,561,000 hectares (13,741,231 acres) in 1932. The forest area belonging to the State on December 31, 1931, was 239,854 hectares (592,715 acres).

III. Mines and Minerals.

The Italian mining industry is most developed in Sicily (Caltanissetta), in Tuscany (Arezzo, Florence, and Grosseto), in Sardinia (Cagliari, Sassari and Iglesias), in Lombardy (particularly near Bergamo and Brescia), and in Piedmont.

Production in metric tons (1 metric ton = 2,204 lbs., or 1,016 metric tons = 1,000 English tons) of metallic ores and other minerals in 1933 was as follows:—

Ores, &c.	No. of productive mines	Quantity (in thousands of metric tons)	Value (in thousands of Lire)	No. of Workers
Iron	7	508	15,584	1,048
Manganese	5	23	1,148	172
Copper	—	—	—	—
Zinc, Lead	43	122	20,905	3,592
Gold	10	6	735	141
Antimony	2	2	398	138
Mercury	5	69	4,841	870
Iron and cupreous pyrites	20	733	37,599	3,641
Mineral fuel	35	749	33,986	4,086
Sulphur ore	155	2,320	95,195	11,579
Asphaltic and bituminous substances	9	50	4,045	461
Boric acid	7	5	9,796	434
Totals (including graphite, petroleum and other minerals)	581	—	292,801	32,320

Iron and steel production in 1934 was as follows in metric tons (1933 figures in parentheses): pig-iron, 520,548 (517,078); raw steel, 1,843,534 (1,783,650); rolled steel, 1,580,270 (1,498,234).

In 1933 the 9,397 quarries in activity employed 48,546 persons, the output of building and decorative stone being valued at 311,814,000 lire.

IV. Manufactures.

The Italian industrial census of October 15, 1927, showed that there were 732,109 industrial establishments in the country, having 4,005,790 employees (1,009,890 women). Of the total factories, 692,313 employed from 1 to 10 persons; 34,951 from 11 to 100 persons; 4,151 from 101 to 500 persons: and 694 over 500.

The textile industry is the largest and most important (10,406 factories with 642,887 employees). Number of spindles in the cotton industry was, in January, 1934, 5,378,380. Silk culture, while flourishing most extensively in Lombardy, Piedmont and Venetia, is carried on all over Italy. The quantity of silk produced in Italy was (in tons), 1932, 2,965; 1933, 3,284. The production of artificial silk (rayon) was in 1933, 27,293 metric tons.

Sugar output (in metric tons) in 1913–14, 269,946; 1927–28, 254,954; 1928–29, 353,458; 1929–30, 405,081; 1930–31, 387,747; 1931–32, 341,384; 1933–34, 274,043. The manufacture of cheese is also an important industry.

Commerce.

The following table shows value of Italy's special foreign trade for five years (in millions of paper lire), excluding precious metals:—

Year	1930	1931	1932	1933	1934
Imports	17,346·6	11,643·1	8,257·4	7,412·7	7,664·7
Exports	12,119·2	10,209·5	6,811·2	5,979·7	5,231·5

The value in lire of the leading imports and exports for 2 years was as follows :—

Items	Imports (in thousand Lire)		Exports (in thousand Lire)	
	1932	1933	1932	1933
Live animals	159,582	122,800	23,156	12,400
Meat, broth, soup, eggs	284,536	132,300	96,192	67,800
Milk, cheese products	53,426	45,600	261,114	191,600
Fish products	158,876	165,300	21,055	22,500
Colonial produce, sugar	249,269	229,800	57,350	40,600
Cereals, vegetables, roots, and their alimentary derivatives	848,440	311,300	376,045	407,900
Vegetables and fruit	57,249	45,900	1,091,041	1,006,600
Drinks	12,035	10,600	127,139	138,000
Salt and tobacco	74,947	43,700	49,541	52,400
Seeds and fruits, oils and their products	234,904	181,300	36,675	33,900
Animal and vegetable oils and fats, wax	228,119	195,100	165,332	95,200
Hemp, linen, jute, and other vegetable fibres, except cotton	137,445	111,200	188,225	210,600
Cotton	829,907	923,700	735,12	609,300
Wool, hair	555,634	592,700	300,951	256,700
Silk and artificial silk	125,302	110,300	987,552	752,200
Clothing, white material, and other sewn goods not included in other categories	23,979	33,000	69,896	55,300
Minerals	37,235	39,100	27,751	31,200
Cast iron, iron and steel	278,130	306,000	68,411	91,800
Copper and its derivatives	174,970	169,000	8,146	12,800
Other common metals and derivatives	78,594	94,200	46,678	52,700
Works of common metals not included in other categories	16,591	18,400	1,501	1,700
Machines and apparatus	365,235	363,800	293,117	166,400
Tools and instruments for agricultural purposes	25,899	29,200	4,895	4,400
Scientific instruments and watches	158,096	132,300	17,714	27,100
Arms and ammunition	12,832	2,700	11,584	28,500
Vehicles	81,686	69,400	279,928	274,000
Stones, earths, and minerals	812,906	832,500	265,440	205,400
Building products and cement	12,273	14,900	15,805	15,800
Earthenware products	20,170	19,000	11,879	10,800
Glass and crystal	45,506	44,600	19,433	18,800
Reinforced concrete, graphite, and mica	17,907	15,500	5,341	4,800
Wood and cork	349,556	316,200	67,718	67,000
Straw and other weaving material	6,544	6,000	16,955	13,300
Inlaying material	19,880	19,200	15,922	15,960
Mineral oils, oils of resin and tar, tyres and resin	436,095	389,500	17,327	15,700
Essential oils, perfumery, soap, and candles	25,876	18,800	32,528	32,800
Inorganic chemical products	58,543	44,300	38,499	37,900
Fertilizers	52,561	60,100	18,042	8,100
Organic chemical products	41,928	43,500	60,660	55,300
Medicines and pharmaceutical products	51,471	56,000	45,376	40,900
Tanning and dyeing materials, colours and varnishes	102,463	108,900	41,263	40,800
Skins and furs	297,078	325,500	166,000	155,600
Elastic and gutta-percha	55,140	65,700	118,792	94,400
Paper and cardboard	191,154	202,500	67,325	57,100

Items	Imports (in thousand Lire)		Exports (in thousand Lire)	
	1932	1933	1932	1933
Musical instruments	7,923	7,000	12,491	12,100
Precious stones, silver, quicksilver, and works made out of precious stones	134,759	137,500	63,679	50,100
Fashion objects, shoes, and personal effects not included in other categories	35,616	30,300	232,229	165,000
Toys and brushes	48,734	42,400	23,578	24,600
Vegetable materials not included in other categories	120,951	80,600	63,586	58,100
Animal materials not included in other categories	12,036	9,100	5,623	5,100
Miscellaneous	37,461	44,400	40,145	30,700
Total, all items	8,257,437	7,412,700	6,811,226	5,979,700
Gold and silver	90,242	1,338,300	14,874	75,100
Grand total	8,347,679	8,751,000	6,826,100	6,054,800

The following table shows the ten countries with which the principal commercial relations were maintained by Italy in 1932 and 1933 :—

Countries	Imports into Italy (1932)	Exports from Italy (1932)	Imports into Italy (1933)	Exports from Italy (1933)
	1,000 Lire	1,000 Lire	1,000 Lire	1,000 Lire
Austria	184,632	195,646	176,600	131,900
Czechoslovakia	118,635	97,187	88,200	92,800
France	484,797	516,675	409,700	458,100
Germany	1,106,007	778,857	1,089,900	727,800
Great Britain	738,989	737,645	724,900	681,500
India	304,096	180,686	297,400	113,800
Yugoslavia	241,200	110,708	188,900	124,400
Switzerland	310,011	578,696	270,400	482,700
United States	1,111,237	637,759	1,113,200	517,700
Argentine Republic	482,232	380,837	248,500	383,200

The principal articles of import into Great Britain from Italy, and British exports to Italy (according to the Board of Trade Returns) in 2 years were :—

Imports into U.K.	1932	1933	Exports to Italy	1932	1933
	£	£		£	£
Almonds	230,031	213,438	Coal	4,118,525	3,840,573
Raw silk	122,504	80,067	Iron and Steel	232,778	223,984
Canned vegetables	505,817	436,157	Machinery	507,699	653,476
Lemons	1,071,815	754,543	Copper Sulphate	143,665	84,134
Silk manufactures	307,611	247,939	Woollen goods	300,549	378,111
Rayon manufactures	645,783	582,313	Coke	272,540	251,350
Cheese	449,083	339,954	Motor vehicles	271,429	294,620

Total trade between Italy and the United Kingdom (Board of Trade Returns) for 5 years (in thousands of pounds sterling) :—

—	1930	1931	1932	1933	1934
Imports from Italy to United Kingdom	15,005	15,148	10,763	9,184	8,458
Exports to Italy from United Kingdom	13,835	9,917	8,639	9,050	9,312
Re-exports to Italy from U.K.	957	727	786	883	1,224

Navigation and Shipping.

On September 30, 1934, the mercantile marine consisted of 2,290 sailing vessels, of 114,000 metric tons, and 1,208 steamships and motorships of 1,782,300 metric tons.

In 1934 the vessels entered and cleared at Italian ports were as follows:—

—	Entered Italian Ports			Cleared from Italian Ports		
	Vessels	Tonnage in 1,000 Tons	Goods in 1,000 Tons	Vessels	Tonnage in 1,000 Tons	Goods in 1,000 Tons
Italian	200,755	54,458	12,386	200,619	54,547	6,639
Foreign	8,492	13,639	9,078	8,471	13,592	1,064
Total	209,247	68,097	21,464	209,090	68,139	7,703

Movement of vessels in 1932 at the principal Italian ports:—

—	No. of Vessels entered	Tonnage in 1,000 Tons entered	Goods Entered	Goods Cleared
Genoa	5,991	10,122	5,367	1,125
Leghorn	3,850	3,907	1,189	390
Naples	10,750	9,813	1,495	344
Messina	3,415	2,172	306	121
Catania	2,864	2,101	430	204
Palermo	3,362	3,542	464	151
Venice	4,234	4,834	2,444	522
Trieste	17,022	5,231	1,359	530
Fiume	5,753	1,986	402	168

Internal Communications.

I. Railways.

Railway history in Italy began in 1839, with a short line between Naples and Portici (5 miles). Length of railways (June 30, 1934), 23,035 km., of which 17,007 km. were State railways. Receipts from State railways in 1933–34, 2,947,603,000 lire; expenditure, 3,754,559,000 lire.

The Government proposes to electrify the greater part of the railways; already electrified, 2,182 km.

The total length of national roads in Italy (June 30, 1934) was 20,687 kilometres (12,854 miles).

II. Aviation.

The statistics of aviation for 3 years were as follows:—

—	1931	1932	1933
Length of air lines (km.)	18,723	19,564	16,964
Distance flown (km.)	4,398,871	4,650,118	4,763,863
Passengers (No.)	33,650	43,300	43,126
Parcels and letters (kg.)	71,107	52,201	62,888
Newspapers (kg.)	34,884	216,678	238,669
Baggage (kg.)	446,878	544,330	565,818
Goods (kg.)	153,284	154,334	188,723

III. Posts and Telegraphs.

In the year 1934 (June 30) there were 11,321 post offices. In the postal correspondence (1932–33), 2,286,339,000 pieces, including insured and registered pieces, were dealt with at ordinary rates.

On June 30, 1934, the telegraph lines had a length of 65,828 km., and the wires 548,205 km. There were 10,354 telegraph offices, of which 9,628 were State offices and 1,726 railway offices. In 1933–34, 23,285,000 private telegrams were sent inland; and 1,637,000 private international telegrams.

The telephone service in 1933–34 (June 30) had 355,570 subscribers. There were 1,095 urban systems, and also 4,690 inter-urban systems. Total number of conversations in the year, 29,855,000 (excluding international conversations).

During the year 1933–34 the maritime radio-telegraphic service, with its 19 coast stations, transmitted and received 1,211,000 words, while local continental radio stations despatched and received 1,295,285 messages of 18,791,000 words.

Banking and Currency.

State notes and bank notes in circulation in lire (December 31):—

—	1930	1931	1932	1933	1934
State notes .	—	—	—	—	—
Bank notes .	15,680,458,000	14,294,823,000	13,672,000,000	13,243,408,000	13,145,104,000

The total coinage in circulation at the end of December, 1934, was: silver, 1,635,149,000 lire; nickel, 448,847,000 lire; bronze, 60,006,000 lire; total, 2,144,002,000 lire.

The value of the money coined in each year:—

—	Gold	Silver	Nickel	Bronze	Total
	Lire	Lire	Lire	Lire	Lire
1929	—	237,016,000	35·0	—	237,016,035
1930	—	134,301,000	160·0	—	134,301,160
1931	—	1,750	185·0	823,781	825,716
1932	—	—	—	1,141,000	1,141,000
1933	—	2,000	—	2,061,000	2,063,000

There is no national bank in Italy. According to the law of May 6, 1926, there is only one bank of issue, the Banca d'Italia. The position of the Bank on January 31, 1935:—

—	Assets	—	Liabilities
	1,000 Lire		1,000 Lire
Gold and Silver . .	5,822,300	Notes in circulation .	12,788,200
Discounts . . .	3,843,400	Accounts current (public)	1,546,300
Advances . . .	1,292,600	,, ,, (private)	1,002,800
Government securities.	1,389,900		

At the end of 1932, there were 3,226 credit institutes with deposits amounting to 37,527,000 thousands of lire. At the same date the capital and reserves of these 3,226 credit institutes were 8,824,400,000 lire.

Deposits in the savings-banks on June 30, 1934, were as follows: Post Office savings banks, 19,852,000 thousands of lire; ordinary savings banks, 19,472,000 thousands of lire, total 39,324,000 thousands of lire.

By a decree of April 29, 1923, life assurance business is carried on only

by the National Insurance Institute and by other institutions, national and foreign, authorised by the Government. Branches of the National Institute of Insurance have been established in every Province of Italy, 2,485 branches in all, on December 31, 1932. The insurance effected by the Institute in 1933, 1,059,900 contracts in force, to the value of 11,504,600 thousands of lire.

Money, Weights, and Measures.

The standard coin is the *Lira* of 100 *Centesimi*. On December 22, 1927, the paper lira was stabilized at 92·46 to £ sterling, 19 to the dollar, and 366 for 100 gold lire. The lira contains 0·079191 grammes of gold.

The coin in circulation consists of gold 20-lire, 50-lire and 100-lire pieces; of silver, 5-lire, 10-lire, and 20-lire pieces; nickel, 20-cent, 50-cent, 1-lire, and 2-lire pieces; and bronze 5 and 10-cent pieces. Nickel coin is being substituted for bronze to a large amount. Bank notes of 50, 100, 500 and 1,000 lire are in circulation, and, in accordance with the decree of December 22, 1927, are convertible into gold or monies of countries with a gold basis.

The Metric System of weights and measures is in general use.

Diplomatic Representatives.

1. Of Italy in Great Britain.

Ambassador Extraordinary and Plenipotentiary.—Signor Dino Grandi (appointed July 21, 1932).
Counsellor of the Embassy.—Leonardo Vitetti.
First Secretary.—Nobile Cristofero dei conti Fracassi Raffi.
Second Secretary.—Nobile Giulio del Balzo dei Duchi di Presenzano.
Third Secretaries.—Michele Lanza and Alberto Brugnoli.
Attaché.—Gaetano Defacci Negrati.
Military Attaché.—Lt.-Col. Umberto Mondadori.
Naval Attaché.—Capitano di Fregata Conte Ferrante Capponi.
Air Attaché.—Captain Ercole Trigona della Foresta.
Commercial Counsellor.—Giovanni-Battista Ceccato.
Chancellor.—Giuseppe L. de Grossi.
Consul-General in London.—Commendatore Carlo Bossi.

There are also Consular representatives at Dublin (C.), Glasgow (C.G.), Liverpool (C.G.), &c.

2. Of Great Britain in Italy.

Ambassador Ex. and Plen.—Rt. Hon. Sir J. Eric Drummond, G.C.M.G., C.B. (appointed October 26, 1933).
Counsellor.—E. M. B. Ingram, C.M.G., O.B.E.
First Secretary.—P. B. B. Nichols, M.C.
Second Secretaries.—H. M. G. Jebb and A. N. Noble
Commercial Counsellor.—R. L. Nosworthy.
Press Officer.—Sir W. K. McClure, Kt., C.B.E.
Naval Attaché.—Capt. H. Pott, M.V.O., R.N.
Military Attaché.—Col. H. R. G. Stevens, D.S.O.
Air Attaché.—Group Captain T. G. Hetherington, C.B.E.
Consuls-General.—G. A. Fisher (at Naples), E. W. P. Thurstan, C.M.G. (at Milan), and A. G. Major (at Genoa).

There are also Consular representatives at Florence, Venice, Bologna, Leghorn, Palermo, Rome, Spezia, Trieste, Turin, and other towns.

FOREIGN DEPENDENCIES.

ITALIAN EAST AFRICA.

Colony of Eritrea.

The dominion of Italy on the coast of the Red Sea extends from Cape Kasar (18° 2′ N.) to Cape Dumeirah on the Strait of Bab-el-Mandeb (12° 30′ N.). The length of coast is about 670 miles. The total area is 45,754 square miles, and the population according to a census taken in 1931 is 621,621 inclusive of 4,565 Italians. Massawah has (1931) 4,154 inhabitants, of whom 654 are European, mainly Italian. The seat of the Government is Asmara, a modern town 7,765 feet above the sea-level, with 22,101 inhabitants (3,101 European). The religions of the native population are the Christian (Coptic rite) and the Mohammedan. There are some Roman Catholics and a few Pagans. The principal languages of Eritrea are Tigrȳ and Tigré, two languages originating from the ancient Ghehz, the Ethiopian language, which is the ecclesiastical language of the Eritrean Christians. Tigrȳ is spoken by the Abyssinian stock and Tigré in the North, in Massawah and district, and is understood to a certain extent in the whole of Eritrea. Other languages are spoken in the plateau, and Arabic in the lowlands and ports.

Military force (1934): 98 officers, 111 non-commissioned officers, and about 3,500 native troops, exclusive of the police force of the colony.

In the Italian dependencies the central government is represented by a civil governor, who is nominated by the King and is under the direction of the Minister for the Colonies.

High Commissioner for Eritrea and Italian Somaliland.—General Emilio *de Bono* (January 17, 1935).

For the financial year 1934–35 the revenue and expenditure of the Colony of Eritrea are estimated at: Colonial revenue, 64,784,847 lire; State contributions, 41,250,000 lire; expenditure, civil administration, 41,701,947 lire; military, 23,082,900 lire.

For climatic and agricultural purposes the country must be divided into two zones, the lowlands along the sea coasts and the plains, where the climate is tropical and the rains fall in winter; and the uplands, where the climate is cool, and sometimes cold, and the rains fall in summer. Both in the lowlands and the uplands the annual rain is sufficient for the successful raising of the crops. Irrigation works are being carried on in the lower zone in order to facilitate intensive production by Italian farmers. Pasture is abundant, and the pastoral population is partly nomadic. Pearl-fishing is carried on at Massawah and the Dahlak archipelago. There are 3 salines on the coast at Massawah, Assab and Ouakiro. Their production totalled 130,000 tons in 1931 and is of growing importance. There are gold mines worked successfully in several localities of Hamasien.

At Massawah the imports by sea, the exports, and the tonnage entered were as follows:—

—	1929	1930	1931	1932	1933
Imports . Lire	207,503,799	176,814,898	186,825,100	173,035,066	176,565,985
Exports . ,,	72,499,008	76,279,192	69,063,359	59,194,200	62,490,114
Tonnage entd. Tons (Steamships only)	597,681	572,205	572,742	560,038	579,471

Through the land frontier the imports in 1933 amounted to 23,731,958

lire, and the exports to 19,335,869 lire, compared with 17,919,756 lire and 14,511,639 lire respectively in 1932.

There are 75 miles of railway from Massawah to Asmara, 65 miles from Asmara to Cheren, and 53 miles from Cheren to Agordat. The line from Agordat to Tessenei, under construction, has reached a point 65 miles from Agordat. There are monthly sailings between Massawah and Genoa and Massawah and Trieste, and weekly sailings for Egypt, and frequent sailings for the Far East. There are 13 post-offices. There is a telegraph line of 465 miles in length with 13 public offices. There are 2,911 miles of telephone lines with 13 public offices. Wireless telegraph stations have been opened at Massawah, Assab, Asmara, and Marsa Fatma Eri. They communicate with the radiotelegraphic system of Italian Somaliland and also with Italy (St. Paolo of Rome). There is thus through wireless communication between Italy and Italian Somaliland, via Massawah.

The legal currency consists of Italian coins and Maria Theresa thalers. The Italian mint in 1918 issued a new silver coin, the *Tallero d'Italia*, the weight of which is 28·0668 grammes, ·835 fine.

Italian Somaliland.

(SOMALIA ITALIANA.)

Governor.—General Rudolfo *Graziani* (March 6, 1935).

The Colony of Italian Somaliland has an area of about 194,000 sq. miles and a population (1931) of 1,010,815 (1,630 Italians and 28 other Europeans). It extends along the east coast of Africa from British Somaliland to Dik's Head in Kenya Colony. The inland boundaries are determined under the Treaty of May 6, 1908, between Italy and Abyssinia, by a line (only partially demarcated) from the confluence of the Ganale with the Daua, thence to Bender Ziada (45th parallel) on the Gulf of Aden following an irregular line which runs at a mean distance of 180 miles from the coast through Jet, Ato, El Gorum, Bur Lelmis, Bur Gumburn, Bur Burdubo, and Bur Galambaladi to Bender Ziada.

As a result of the Treaty of 1915 and the Colonial rearrangements consequent on the war, Britain has ceded Italy territories on the right bank of the Juba with the port of Kismayu (Chisimaio). This district is incorporated in Somalia and forms one of its provinces. [*See* map in THE STATESMAN'S YEAR-BOOK for 1925.]

Italian Somaliland comprises (I.) The territories of Northern Somalia, viz.—(1) The territory of the Mijertins, from Bender Ziada, the most northerly point belonging to Italy on the Gulf of Aden, to Cape Gabà on the Indian Ocean (8° 13′ N. lat.); (2) the territory of the Nogal, from Cape Gabà to Cape Garad (6° 47′ N. lat.), formerly occupied by the Mad Mullah; (3) the territory of Obbia, from Cape Garad to the northern boundary of the colony of Benadir, determined by a line which ends at the sea near the wells of El Gabobe (about 4° 30′ N. lat.). (II.) Southern Somalia, formerly called 'Benadir,' which extends from 4° 30′ N. lat. to Ras Chiamboni (Dik's Head). Mogadiscio (population 29,562, of whom 675 are Europeans), capital of the Colony, with its territory, has been placed under the direct dependence of the Governor.

The principal occupations of the people are cattle-rearing and agriculture. In Southern Somaliland the whole country near the banks of the Webi Shebele and the Juba is inhabited and cultivated by the natives, and in the district of Merca-Genale and in that of Villaggio Duca degli Abruzzi there are Italian plantations with a cultivated area of some 70,000 acres. In Northern Somali-

land agriculture is almost unknown ; the Mijertins rear camels and sheep. Exports (1933) were 30,272,870 lire ; imports, 58,662,580 lire. Imports are cottons, sugar, rice, tea, coffee, iron, machinery, timber ; exports sesame oil, gum, hides, butter, cotton and cotton-seed oil, resin, kapok and ivory. In 1933 there were 71 miles of railway open to traffic. In 1934 exports to U.K. amounted to 38,453*l.* and imports from U.K. 4,474*l.* Re-exports from U.K. in 1934 amounted to 499*l.* Length of roads 6,200 miles ; steamship service on the Juba River from Kismayu to Bardera, and on Webi Shebele from Brilo Burti to Afgoi Military force (1932), 123 (Italian) officers, 73 non-commissioned officers and 3,047 (coloured) men. A detachment of the Flying Corps has recently been added.

The budget of Italian Somaliland for the year 1934–35 is as follows : Revenue proper of the colony, 22,000,000 lire ; State contribution, 48,750,000 lire ; special administration, 3,722,000 lire ; total, 74,472,000 lire. Civil expenditure, 44,724,993 lire ; military, 26,754,000 lire ; total, 71,478,993 lire.

Twenty-three wireless telegraph stations are working in the Colony. The wireless station at Afgoi communicates directly with Italy.

There are in the Colony 9 principal post offices (Mogadiscio, Merca, Brava, Khismayu, Baidoa, Villaggio Duca degli Abruzzi, Obbia, Afgoi and Alula), and 17 secondary post offices. A railway runs from Mogadiscio to Afgoi Adalei Villaggio Duca degli Abruzzi (70·23 miles).

The currency is the Italian lira (silver coins and currency notes issued by the Banca d'Italia).

Libya.

(LIBIA ITALIANA.)

Governor (*with Headquarters in Tripolitania*).—Marshal Italo *Balbo* (appointed November, 1933).

Italian Libya lies along the north coast of Africa between Tunis on the west and Egypt on the east, in longitude from about 9° to 25° east. The extreme northerly point of Libya is at about the parallel of latitude 33° north. The territory in effective occupation was greatly extended southwards in 1930–31. According to an arrangement with France (September 12, 1919) as a result of the Treaty of 1915, the western frontier extends in a curve from west of Ghadames to south of Tummo including Ghat. On the Egyptian frontier Italy has obtained Jaraboob from Britain. By the Italo-Egyptian Treaty of December 5, 1925, the Eastern boundary was the 22nd parallel, but is now Mt. Tibesti.

Tripoli fell under Turkish domination in the sixteenth century, and though, in 1711, the Arab population secured some measure of independence, the country was in 1835 proclaimed a Turkish vilayet. In September, 1911, a quarrel broke out between Turkey and Italy, and the latter occupied Tripoli and established an army there. On November 5, 1911, a decree was issued annexing Tripoli, and on February 23, 1912, the Italian Chamber passed the Bill which ratified the decree of annexation. The war, nevertheless, continued until October 18, 1912, when the Treaty of Ouchy was signed, by which the sovereignty of Italy in Tripoli was established. This has been recognised by the Great Powers.

The oasis of Jarabub, on the eastern border of Cyrenaica, was ceded by Egypt to Italy, and Italian troops occupied it on February 7, 1926. On the other hand, the frontier in the neighbourhood of Sollum on the sea was rectified in favour of Egypt.

For administrative and military purposes the country is divided (since January 1, 1934) into four provinces, *viz.*, Tripoli, Misurata, Benghasi, and Derna.

Area and Population.—The area of the territory is estimated at about 420,500 square miles, with a hinterland zone of about 212,000 square miles. According to a census taken on April 21, 1931, there were 687,914 natives and 29,749 Europeans (36,000 Italians estimated in 1934). It is estimated that of the total population, 500,356 are Mussulmans, 21,342 Jews, and 1,216 other religions. Of the Mussulman population the negroes of various races form about 35 per cent. Arabic is more generally spoken than written, and both Italian and Arabic are the official languages. The principal towns are on the coast: Tripoli with 91,000 inhabitants (1934), Benghasi with 43,000, Misurata with 43,000, and Homs with 31,000. Inland are the caravan halting places, Ghadames, Sinauen, Mizda, Murzûk, and Ghat.

Justice.—In both districts justice, in so far as personal status or family or succession matters are concerned, is administered by Mohammedan or rabbinic tribunals for native Mohammedans or Jews according to their own religious law, and by regional tribunals according to Italian law in civil and commercial matters, whether the parties concerned be Italians, strangers or natives, except for special concessions made by the Colonial Judiciary to native mentality. Criminal cases are tried by the regional tribunals with the assistance of two assessors, chosen from the citizens of the best class, who with the President (a professional magistrate) form the Judicial College. One of the assessors must be a Mussulman or a Jew, according to the religion of the accused, but the judges of the metropolitan citizens are all Italians. More serious penal cases are tried by the Court of Assize, consisting of the President of the Court of Appeal with four assessors, two of whom must be Mohammedans or Jews, according to the religion of the accused. Appeals in both the districts, whether in civil or in criminal cases, are heard by the Court of Appeal for Libya, which was instituted in December, 1912, with its seat at Tripoli. There is a final appeal to the Supreme Court of Cassation at Rome. Disputes as to titles to land (which have to be inscribed in the Land Registry) are tried in the first instance by the Land Registry Office, from which there is an appeal to the Regional Tribunal composed of a judge and four assessors, and finally to the Court of Appeal of Libya.

Finance.—For the financial year 1934–35 the revenue and expenditure were estimated at: Revenue proper of the colony, 70,200,000 lire; State contribution, 165,500,000 lire; special administration, 2,253,000 lire; civil expenditure, 97,175,420 lire; military expenditure, 137,000,000 lire.

Defence.—The military force in Tripoli consists of a corps of Colonial troops numbering 500 officers, 700 non-commissioned officers, and 10,000 men. There is an aviation station near Tripoli, also a naval command, with its station at Tripoli and a higher naval officer at its head. To this are attached some light vessels and tugs, stationed in the harbour.

Production and Industry.—Tripoli has three zones from the coast inland—the Mediterranean, the sub-desert and the desert. The first, which covers an area of about 17,231 square miles, is the only one properly suited for agriculture, and may be further subdivided into (1) the oases along the coast, the richest in N. Africa, in which thrive the date-palm, the olive, the orange, and all Mediterranean plants (the yield of dates in 1931 was 50,000 metric tons); (2) the steppe district, suitable for cereals (barley and wheat) and pasture (the barley crop in 1931 was 20,000 metric tons and the wheat crop 4,000 metric tons). This district is the one where Italian colon-

isation has chiefly spread; it has olive, almond, vine, orange and mulberry trees and ricinus plants; (3) the dunes, which are being gradually afforested with acacia, robinia, poplar and pine; (4) the Jebel (the mountain district, Tarhuna, Garian, Nalut-Yefren), in which thrive the olive, the fig, the vine and other fruit trees, and which on the east slopes down to the sea with the fertile hills of Msellata. The sub-desert zone produces the alpha plant. The desert zone and the Fezzan contain some fertile oases, such as those of Ghadames, Ghat, Socna, Sebha, Brak. In 1931 there were in the colony: 650,000 sheep, 380,000 goats, 55,000 cattle, 50,000 camels and 42,000 donkeys, mules and horses.

Sponge-fishing and tunny-fishing are of great importance. In 1934, there were 8 fisheries working, the number of tunnies caught was 10,969. In 1934 the quantity of sponges fished amounted to 28,947 kilogs. Among the other industries the most flourishing is that of tobacco and tobacco manufactures. In 1933 the tobacco crop yielded 339 metric tons. The exports of the products of the tobacco manufacture reached in 1933–34 the sum of 2,079,386 lire. The Mellaha salt-pits yielded 16,308 tons of the best salt in 1933–34, nearly the whole of it being exported. Among the other products are matting, carpets, leather articles, fabrics embroidered with gold and silver, and other articles of value of a local character.

Commerce.—The trade of Tripoli was: Imports, 1933, 153,043,072 lire, 1932, 160,568,419 lire; exports, 1933, 28,608,247 lire, 1932, 29,276,629 lire. In 1934 the exports to the United Kingdom (Board of Trade Returns) were 1,178*l.* and the imports from U.K. 63,176*l.* Re-exports from U.K. in 1934 were 5,636*l.*

Communications.—The principal means of communication inland are the caravans which follow long-frequented routes. Tripoli (town) is connected by telegraph cable with Malta, and by land lines with Bengardane (Tunis). In 1912 an Italian cable was laid between Syracuse and Tripoli.

Tripoli is also connected by a wireless station with Rome (Coltano). Telephone communication is general. There is a daily air service with Rome.

Total length of railways, 273 miles. There are 2,820 miles of carriage road. Good motor roads connect Tripoli to Zuara, to Gadames, to Hon, to Homs-Misurata, and to Bengazi.

There are fortnightly steamship sailings from Tripoli to Naples and Tripoli to Genoa. From Tripoli to Syracuse and *vice versa* there are two steamship sailings every week. Malta is always touched. From Tripoli along the coast there are weekly steamship sailings.

During the year 1933, 681 steamers and sailing vessels entered the port of Tripoli, landing 172,960 tons of goods and 28,304 passengers; while 685 steamers and sailing vessels left the port embarking 33,078 tons of goods and 24,202 passengers. During the same period the post office issued post money orders for 92,605,669 lire and paid out money orders amounting to 80,623,037 lire. The number of messages despatched was 239,277, and those received were 222,385. The railways carried 160,466 passengers and 244,427 tons of goods.

Banking and Currency.—The Banca d'Italia, the Banco di Sicilia, the Banco di Napoli, the Banco di Roma, the Cassa di Risparmio, the Cassa di Piccolo Prestito and other banks carry on financial operations. The official currency is the Italian, but English pounds and francs are also used in commercial transactions.

There is a British Consul at Tripoli and a Vice-Consul at Homs.

AEGEAN ISLANDS.

Italy occupied the Aegean Islands in 1912, during the Tripoli War. By the Treaty of Lausanne, which came into force on August 6, 1924, Turkey ceded them, with the island of Castelrosso, to Italy in full sovereignty. The military regime in the islands lasted from the occupation, May 4, 1912, to August 7, 1920. The civil regime was then established, Governors being appointed. The Governor, who is subject to the Foreign Office in Rome, is head of the administration; his authority is represented in the smaller islands by the Regent of the Government of Cos and five delegates in the islands of Lero, Calino, Simi, Scarpanto and Castelrosso. The municipalities of the cities of Rhodes and Cos debate autonomously the matters within their province. The municipal councils of these two cities are appointed by the Governor. The other towns and villages are administered by *sindaci* and *demogerondii* elected by the people according to ancient customs.

Governor.—Senator Mario Lago. (Appointed February, 1923.)

Area and Population.—The following are the Italian islands in the Aegean with their areas and population in 1933 (Italian names in brackets):—

Island	Area in sq. miles	Population 1933	Island	Area in sq. miles	Population 1933
Rhodes (Rodi) .	542	56,322	Karchi (Calchi)	12	1,791
Cos (Coo) . .	109	21,696	Symi (Simi) .	24	9,689
Patmos (Patmo) .	12	3,080	Astypalaea (Stampalia) .	37	1,711
Lipso (Lisso) .	6	1,029			
Kalymnos(Calino)	38	16,921	Karpathos(Scarpanto) . .	107	6,758
Leros (Lero) .	24	6,429			
Nisyros (Nisiro) .	15	3,478	Casos (Caso) .	24	1,961
Tilos (Piscopi) .	24	1,252	Castelrosso .	3	2,267

The chief towns are: Rhodes (capital) with 25,447 inhabitants; Calino, 16,512; Cos, 11,571; Simi, 9,462. Of the total population of 131,255 the Greeks in 1931 were 83 per cent., the Turks 7, the Italians 5 and the Jews (all in Rhodes and Cos) were 5 per cent.

Justice.—The special judiciary of the Aegean Islands includes (1) the Department of Judicial Services, under which are all the judicial offices of the possession; (2) the Tribunal of Second Instance (appeal); (3) the Assize Court; (4) a Civil and Penal Tribunal of First Instance at Rhodes, with jurisdiction over the islands of Calchos, Simi, Piscopi, Scarpanto, Caso and Castelrosso; (5) a Civil and Penal Tribunal of First Instance at Cos, with jurisdiction over all the other islands. Special Ecclesiastical and Mixed Tribunals which exert authority in matters of personal status also operate for the Orthodox, Moslems, and Jews, and Mixed Tribunals of Appeal. These special tribunals apply the provisions of Byzantine, Koranic and Talmudic law.

Finance.—The State contribution is 3,000,000 lire on a budget of 68,000,000 lire (1933–34).

Education.—There are Government schools for boys and girls, both elementary and secondary, and practical agricultural school, commercial

school of first and second degree, and a normal school; and private schools, both elementary and secondary, for the various communities.

Defence.—The Aegean Islands are garrisoned by an infantry regiment of two battalions, one stationed at Rhodes and the other at Cos. These battalions send detachments to the smaller islands. The Italian Navy has a station at Rhodes, to which are attached the units scattered over the Aegean and the naval base of Porto Lago in Leros. The police and passport service is in the hands of the Carabinieri (one company). The Customs services are carried out by the Finance Guard (one company).

Agriculture, Commerce and Navigation.—The agriculture of the islands of Rhodes and Cos is highly developed. These islands are famous for the cultivation of the very famous table grapes, other white and black grapes. Olives, tobacco, oranges, and other fruits, and vegetables are also cultivated. The most important industries are the manufacture of oriental carpets, wines in bottles, olive oils, artistic pottery, and tiles, that are specially exported to Italy and to Egypt. The market to which the greater part of the exports is directed is Egypt, which is connected with Rhodes by speedy steamship lines. Rhodes is developing a considerable tourist traffic, partly dependent on the thermal springs at Calitea. Sponge fishing is of great importance in the islands of Kalymnos, Simi and Castelrosso. The transit and inter-island commerce gives rise to a brisk harbour movement of sailing vessels and small steamers, which serve the neighbouring islands. The countries which import manufactures and food-stuffs are principally Italy, Egypt and Turkey. The trade of Aegean Islands was (1933): imports, 48,000,000 lire; exports, 15,000,000 lire. In 1934, exports to U.K. (Board of Trade Returns) were 77,648*l.*; imports from U.K., 18,654*l.*; re-exports from U.K., 149*l.* There are no railways.

Communications.—Every week a steamship sails from Brindisi and from Alexandria to Rhodes and *vice versa*. The means of communications are assured by steamships and motorships of the Lloyd Triestino, Adriatica, Messageries Maritimes and many other steamship companies which touch at Italian ports of the Tyrrenean and Adriatic Seas and the Piræus, Smyrna, Syria, Palestine and Egypt. There is an air-mail every week from Brindisi and Athens to Rhodes.

There are in Rhodes almost 250 miles of good roads and there are telegraph lines (cable and wireless) and automatic telephones in each island.

Banking and Currency.—The Banca d'Italia, the Banco di Roma, the Banco di Sicilia and other banks carry on financial operations. Italian money is current; the metric system of weights and measures is in use.

There is a British Consul at Rhodes.

Concession of Tientsin.—The Italian concession of Tientsin, under the agreement with China of June 7, 1902, lies on the left bank of the Pei-Ho and has an area of about half a square kilometre with a population of 8,629 (Chinese, 8,199; Italians, 286; other Europeans, 144) on December 31, 1933.

Island of Saseno.—3 miles long and 1·24 miles broad. Lies at the entrance of the Vallona Bay (Albania) and is inhabited by some few shepherds and by marines of the Royal Navy. The island owns a radio-telegraphic station.

Statistical and other Books of Reference concerning Italy

1. Official Publications.

The Annuario Statistico Italiano (Annual) and Bollettino mensile di Statistica (Monthly), issued by the Istituto Centrale di Statistica, gives statistical information about Italy and her Colonies.

The publications of the various Departments of Government; Agriculture; Public Works; Treasury; Finance; War; Marine; Aeronautics; Interior; Public Instruction; Justice; Foreign Affairs; Communications; Corporations; Colonies.

Census publications are issued by the Istituto Centrale di Statistica.

JAPAN.

(NIPPON.)

Reigning Sovereign.

THE Japanese claim that their empire was founded by the first Emperor Jinmu Tennō, 660 B.C., and that the dynasty founded by him still reigns. It was revived in the year 1868 (the first year of the *Meiji*), when the now ruling (*de jure*) sovereign overthrew, after a short war, the power of the Shogun (the *de facto* sovereign), who had held the ruling power in successive families, since the twelfth century; and in 1871 the feudal system (Hōken Seiji) was entirely suppressed. The Emperor bears title of Tennō; but the appellation by which he is called in relation to external affairs is 'Kōtei,' a word of Chinese origin. Only foreigners make use of the poetical title 'Mikado.'

Emperor of Japan.—Hirohito, born at Tōkyō, April 29, 1901; succeeded his father, Yoshihito, December 25, 1926; married, January 26, 1924, to Princess Nagako, born March 6, 1903, daughter of H.I H. Prince Kuninomiya (died January 27, 1929). Offspring:—Imperial Princess.—I., Princess Shigeko (Terunomiya), born December 6, 1925. II., Princess Sachiko (Hisanomiya), born September 10, 1927; died March 8, 1928. III., Princess Kazuko (Takanomiya), born September 30, 1929. IV., Princess Atsuko (Yorinomia), born March 7, 1931. V., Prince Akihito of Tsugunomiya, born December 23, 1933.

Empress Dowager.—Princess Sadako, born June 25, 1884; daughter of Prince Kujō; married, May 10, 1900, to late Emperor.

Brothers of the Emperor.—I., Prince Yasuhito (Chichibunomiya), born June 25, 1902; married, September 28, 1928, to Setsu-Ko Matsudaira. II., Prince Nobuhito (Takamatsunomiya), born January 3, 1905; married, February 3, 1930, to Kiku-Ko Tokugawa. III., Prince Takahito (Suminomiya), born December 2, 1915.

By the Imperial House Law of February 11, 1889, the succession to the throne has been definitely fixed upon the male descendants. In case of failure of direct descendants, the throne devolves upon the nearest Prince and his descendants. The civil list is fixed at 4,500,000 yen.

Constitution and Government.

By the Constitution of February 11, 1889, the Emperor combines in himself the rights of sovereignty, and exercises the whole of the executive powers with the advice and assistance of the Cabinet Ministers, who are responsible to him, and are appointed by himself. There is also a Privy Council, who are consulted by the Emperor on important matters of State. The Emperor can declare war, make peace, and conclude treaties, and he exercises the legislative power with the consent of the Imperial Diet. It is his prerogative to give sanction to laws, to convoke the Imperial Diet, to open, close, and prorogue it, and to dissolve the House of Representatives. The Imperial Diet consists of two Houses, a House of Peers and a House of Representatives. Every law requires the consent of the Imperial Diet. Both Houses may respectively initiate projects of law, can make representations to the Government as to laws or upon any other subject, and may present addresses to the Emperor.

The House of Peers (404 members) is composed of (1) male members of the Imperial family of full age (16 in number); (2) princes and marquises of the age of 30 and upwards (15 princes and 30 marquises); (3) counts, viscounts, and barons of the age of 30 and upwards, who have been elected by the members of their respective orders, to the total number of 18 counts, 66 viscounts and 66 barons; (4) persons above the age of 30 years, who have been nominated members by the Emperor for meritorious services to the State or for erudition, not to exceed 125 in number, the term of membership being, in principle, for life; (5) 4 members of the Imperial Academy of Sciences above the age of 30 years, who have been elected by the members of that body; (6) 1 or 2 persons above the age of 30 years, who have been elected in Hokkaido and each Fu and Ken from among and by respectively 100 or 200 male inhabitants thereof, paying therein the highest amount of direct national taxes on land, trade or industry, to the total number of 66. The term of membership under (3), (5) and (6) is seven years.

Until May, 1925, the suffrage for the House of Representatives was restricted by qualification arising from payment of taxes. But in May, 1925, general manhood suffrage was enacted to come into force at the first

general election. According to the new law, the members of the House shall number 466 (at present, 440), a fixed number being returned from each electoral district for a term of 4 years.

The proportion of the total number of members to the population of Japan proper is 1 to 133,309. In principle, all the male Japanese subjects above the age of 25 years are electors and those above the age of 30 years eligible. Heads of the families of peers and persons in the army and navy can neither elect nor be elected; holders of certain specified offices in the Government are ineligible; and no Government officials except the *seimukan* (political) class are, while in office, permitted to be members of the House. Such persons as have not lived continuously for not less than a year within the same city, town or village, shall not be registered as electors. Voting is by secret single ballot.

The President and Vice-President of the House of Peers are nominated by the Emperor from among the members, and President and Vice-President of the House of Representatives are nominated by the Emperor from among three candidates, elected by the House. The Presidents of both Houses receive an annual salary of 7,500 yen; Vice-Presidents, 4,500 yen; elected and nominated members of the House of Peers and members of the House of Representatives, 3,000 yen, besides travelling expenses. The Imperial Diet, which must meet annually, has control over the finances.

At the elections held on February 20, 1932, the following parties were returned to the 56th Diet:—Seiyūkai, 303; Minseito, 146; Labour, 5; Other Groups, 12.

The Cabinet (appointed on July 8, 1934) consists of the following members:—

Prime Minister.—Admiral Keisuke *Okada.*
Minister for Foreign Affairs.—Kōki *Hirota.*
Home Affairs.—Fumio *Goto.*
Finance.—Korekiyo *Takahashi.*
War.—General Senjūro *Hayashi.*
Marine.—Admiral Mineo *Osumi.*
Minister of Justice.—Naoshi *Ohara.*
Education.—Genji *Matsuda.*
Agriculture and Forestry.—Tatsunosuke *Yamazaki.*
Commerce and Industry.—Chūji *Machida.*
Communications.—Takejiro *Tokonami.*
Railways.—Shinya *Uchida.*
Overseas Affairs.—Count Hideo *Kodama.*

Local Government.

For local administration Japan (except Hokkaidō or Yezo; Chōsen, formerly Korea; Karafuto or Japanese Sakhalin; and Taiwan or Formosa) is divided into prefectures ('Fu' and 'Ken'). The prefectures are subdivided into municipalities ('Shi'), towns ('Chō') and villages ('Son'). Okinawa Prefecture and some islands have, however, special organisations. Municipality, town, and village are the units of local government. These administrative divisions form at the same time local corporations of the same names. In each prefecture there are a governor ('Chiji'), a prefectural assembly ('Fukwai' or 'Ken-kwai'), and a prefectural council ('Fu-Sanji-kwai' or 'Ken-sanji-kwai'), of which the governor is president; in each municipality a mayor, a municipal assembly, and a municipal council, of which the mayor is the president; and in each town or village a chief magistrate and a town or village assembly. Prefectural assemblies give

decisions upon certain matters prescribed by the Law (chiefly upon financial affairs); and municipal, town and village assemblies, upon public affairs in general. The prefectural council gives decisions upon matters delegated by the prefectural assemblies and upon matters of pressing necessity when the assembly is not in actual session.

Citizenship in a municipality, town, or village, is recognised, in principle, for every male person above the age of 25 years who has resided for two years continuously within the municipality, town or village, with similar exceptions to those in the case of the suffrage for the House of Representatives. Every citizen is qualified to elect and be elected for the municipal, town, or village assembly of his own city, town or village, and also for the prefectural assembly of the prefecture to which his city, town, or village belongs.

Hokkaidō has a governor and a special organisation. Chōsen has a Governor-General. The peninsula is administered in 13 Do or provinces, these being sub-divided into 329 Tuand Yun or districts. Taiwan (Formosa) also has a governor-general, who is invested with very extensive powers. The island is divided into 5 provinces (Shū), each of which has a governor. Karafuto is divided into 7 local divisions (Shichō).

Area and Population.

The Empire consists of the five principal islands of Honshiu (mainland), Kiushiu, Shikoku, Hokkaidō (Yezo), and Taiwan (Formosa); besides the Chishima (Kuriles), Sado, Oki, Awaji, Iki, Tsushima, Riukiu (Luchu Islands), Ogasawarajima (Bonin Islands), Bōkotō (Pescadores) islands, the peninsula Chōsen (Korea), and the southern half of the island of Karafuto (Sakhalin). Total area is shown as follows:—

Principal Islands	Number[1] of Adjacent Small Islands	Area in square miles		
		Principal Islands	Total with all Adjacent Small Islands	Per cent.
Mainland	382	—	88,919	34·11
Shikoku	167	—	7,248	2·78
Kiūshiū	373	—	16,247	6·23
Hokkaidō (excluding the Chishima)	68	—	34,276	13·15
Riūkiū	89	—	921	0·35
Included in Japan proper: Sado	1	—	331	0·13
Awaji	1	—	229	0·09
Oki	5	—	135	0·05
Ogasawarajima or Bonin Islands	15	—	40	0·02
Iki	12	—	53	0·02
Tsushima	45	—	271	0·10
Chishima or Kurile Islands	47	—	3,944	1·51
Total (Japan proper)	1,079	—	147,611	56·62
Chōsen (Korea)	1,164	—	85,228	32·70
Taiwan (Formosa)	51	13,809	13,840	5·31
Bōkotō (Pescadores)	25	24	49	0·02
Karafuto (Japanese Sakhalin)	2	13,928	13,934	5·35
Grand Total (Empire of Japan)	2,322	—	260,662	100·00
Kwantung	53	1,241	13,934	—
South Sea Mandated Territories	760	—	83	—

[1] Not including islands having a coast-line of less than 2·4 miles.

Administratively there exists a division into 47 prefectures. There is also a division into 632 rural districts, 121 cities, 1,663 towns, and 9,839 villages (April 1, 1934).

Taiwan (Formosa) and Bōkotō (the Pescadores) were ceded by China in accordance with the treaty of Shimonoseki in 1895, and Japanese Karafuto was ceded by Russia by the Treaty of Portsmouth, N.H., in 1905. By the same Treaty of Peace the Russian Government ceded to Japan the lease of Port Arthur, Ta-lien, and adjacent territory and waters, and also the railway between Chan-Chun and Port Arthur, and the coal mines worked in connection therewith. In March, 1915, the Chinese Government agreed to extend the lease of the territory on Liaotung Peninsula, including Port Arthur and Dalny, to 99 years. The Chino-Japanese Treaty of December 22, 1905, provided for the interests of China and Japan with respect to Manchuria. By a treaty between Japan and Korea on Aug. 23, 1910, the Korean Territory was annexed to the Empire of Japan.

By an agreement signed May 25, 1915, Japan obtained from China exclusive mining rights in Eastern Mongolia, and the right to settle in the province, and in Shantung the transference of all mining and railway privileges hitherto enjoyed by the Germans; also the extension of the lease of Port Arthur to 99 years, and a joint control over certain industrial works in which they have a large financial interest, besides other privileges. (For full details, *see* Introduction to THE STATESMAN'S YEAR-BOOK for 1916.)

The population of Japan, according to the census of October 1, 1930, is shown as follows:—

	Area sq. miles	Population according to the Census of the 1st Oct. 1930			Pop. per sq. mile
		Total	Male	Female	
The Empire of Japan .	260,644	90,396,043	45,675,654	44,720,389	347
Japan proper . .	147,593	64,450,005	32,390,155	32,059,850	437
Korea	85,228	21,058,305	10,763,679	10,294,626	247
Formosa . . .	13,889	4,592,537	2,353,288	2,239,249	331
Karafuto . . .	13,934	295,196	168,532	126,664	21
Kwangtung Province (Leased Territory) .	1,438	1,328,011	809,044	518,967	924
South Sea Mandated Territories . .	830	69,626	37,929	31,697	84

Estimated population of Japan on October 1, 1934, 34,279,300 males and 33,915,600 females; total, 68,194,900.

On October 1, 1932, the number of Japanese residing abroad was 672,266 (385,315 males and 286,951 females). Of these, 250,283 men and 186,297 women were in America; 129,065 men and 99,143 women in Asia; 3,055 men and 493 women in Australasia; 2,811 men and 967 women in Europe; and 101 men and 51 women in Africa. On December 31, 1933, the number of foreigners in Japan was 29,268, of whom 19,932 were Chinese, 1,944 English, 2,039 American, 1,118 German, 491 French, 158 Portuguese, 139 Dutch, 1,479 Russian, 317 British Indians, 203 Swiss, 304 Canadian, and 132 Italian.

Movement of population for five years :—

Year	Marriages	Births	Deaths	Stillbirths	Divorces	Excess of Births
1929	497,410	2,077,026	1,261,228	116,971	51,222	851,798
1930	506,674	2,085,101	1,170,867	117,730	51,295	914,234
1931	496,574	2,102,784	1,240,891	116,509	50,609	861,893
1932	515,270	2,182,742	1,175,344	119,579	51,437	1,007,398
1933	486,058	2,121,253	1,193,987	114,138	49,282	927,266

In 1933 the figures represented per 1,000 of the population, 7·23 for marriage, 31·55 for births, and 17·76 deaths.

The following is a list of large towns and cities on October 1, 1930 (census figures) :—

Tōkyō	4,978,390	Kure	190,282	Saseho	133,174
Ōsaka	2,453,573	Sendai	190,180	Niigata	125,108
Nagoya	907,404	Sapporo	168,576	Sakai	120,348
Kōbe	787,616	Yawata	168,217	Wakayama	117,444
Kyōto	765,142	Kumamoto	164,460	Yokosuka	110,301
Yokohama	620,306	Kanazawa	157,311	Hamamatsu	109,478
Hiroshima	270,417	Otaru	144,887	Moji	108,130
Fukuoka	228,289	Okayama	139,222	Kawasaki	104,351
Nagasaki	204,626	Kagoshima	137,236		
Hakodate	197,252	Shizuoka	136,481		

The estimated population of the seven largest cities on October 1, 1934, was as follows :—Tokyo, 5,662,900 ; Osaka, 2,722,700 ; Kyoto, 1,052,500 ; Nagoya, 1,017,700 ; Kobe, 853,800 ; Yokohama, 703,900 ; Hiroshima, 295,700.

Religion.

There is absolute religious freedom. The chief forms of religion are—(1) Shintoism, with 13 sects ; (2) Buddhism, with 12 sects (56 denominations). There is no State religion, and no State support. In 1932 Shinto shrines numbered 49,650 (besides 61,500 minor shrines), and the priests, 15,375 ; Buddhist temples (1931), 71,343 (besides 34,961 minor temples) ; high priests and priestesses, 55,094. There were, in 1931, 2,574 licensed preachers and 1,815 churches and preaching stations of the Roman Catholic, Greek, Catholic, and Protestant Churches. Since 1891 the Roman Catholics have had an episcopate of one archbishop and three suffragan bishops. There are shrines dedicated to the eminent ancestors of the Imperial House, and to meritorious subjects ; these are independent of any religious sect, and some of them are supported by State or local authorities.

Education.

Elementary education is compulsory. The following are the educational statistics for 1931–32 :—

Institutes	Number	Teaching Staff	Students and Pupils
Kindergarten	1,622	5,012	126,564
Elementary schools	25,665	235,862	10,781,290 [1]
Middle ,, for boys	558	13,896	3 6,478
Girls' High ,,	980	15,257	362,625
Normal ,,	108	2,822	41,832
Schools for the Blind and for Deaf Mutes	136	1,125	8,694
High schools	32	1,288	18,498
Universities and colleges	46	5,984	69,985
Special schools	111	5,079	67,913
Special technical schools	52	2,048	21,952
Technical schools (excluding special technical schools)	1,003	15,213	292,015
Preparatory technical schools	15,083	20,351	1,271,971

[1] 5,392,259 males and 4,989,031 females.

Japan has 6 Imperial universities, and 40 other institutions of university rank (1931–32).

Particulars of the Imperial universities are given as follows:—

University	Location	Established	1931–32	
			Teachers	Students
Tokyo Imperial University	Tokyo	1877	671	8,187
Kyoto Imperial University	Kyoto	1897	507	5,419
Tohoku Imperial University	Sendai	1907	242	1,680
Kyushu Imperial University	Fukuoka	1910	253	1,959
Hokkaido Imperial University	Sapporo	1918	269	2,309
Osaka Imperial University	Osaka	1931	82	642

The remaining 40 institutions had 5,984 teachers and 69,985 students.

In 1931, there were 4,609 libraries in Japan, with 10,138,281 volumes. In 1932, 22,014 original books and translations, and 11,118 periodicals, monthly, weekly, and daily, were published.

Justice and Crime.

A system of justice founded on modern jurisprudence has been established. Judges are irremovable, except by way of criminal or disciplinary punishment. There are four classes of courts in Japan; namely, subdistrict courts, district courts, courts of appeal, and court of cassation. In the court of cassation five judges preside; in the courts of appeal and in the district courts three judges; in each case one of them being the chief judge. In the subdistrict courts a single judge presides. A court which deals with disputes respecting administrative affairs is under the direct supervision of the Emperor.

The following are the criminal statistics for four years —In 1928, 140,149 criminals were condemned; in 1929, 151,726; in 1930, 163,192, and in 1931, 151,296.

In 1931 there were 52 prisons, 102 detached prisons and houses of correction. Number of prisoners of all kinds, convicted and accused, and

those in houses of correction at the close of 1931 :—Men, 46,778 ; women, 729 ; total, 47,507.

Pauperism.

The relief statistics for 3 years show expenditure as follows (in yen) :—

Year	Food	Clothing	Providing with work	Shelter and Temporary lodgings	Total (including miscellaneous)
1930–31	237,015	37,394	195,036	238,374	988,517
1931–32	223,970	46,116	653,648	70,177	1,141,554
1932–33	222,885	45,543	468,715	69,565	1,002,482

In 1931–32 the Government relieved 18,118 persons to the amount of 624,228 yen. On March 31, 1932, 609 foundlings were being maintained, and the expense in that year was 67,992 yen. There are, besides, several workhouses established by local corporations and private persons. The number of hospitals in 1931 was 2,208 (13 state, 82 public and 2,113 private).

Finance.

I. Imperial.

Revenue and expenditure, ordinary and extraordinary.

—	1931-32	1932-33	1933-34	1934-35 [1]	1935-36 [1]
	1000 Yen	1000 Yen	1000 Yen	1000 Yen	1000 Yen
Revenue . . .	1,531,082	2,045,276	2,331,760	2,142,528	2,193,414
Expenditure . .	1,476,875	1,950,141	2,254,662	2,142,528	2,193,414

[1] Estimates

Summary of the budget estimates for the year ending March 31, 1936.

Revenue 1935-36	1,000 Yen	Expenditure 1935-36	1,000 Yen
Ordinary :—		Ordinary :—	
Land tax	57,922	Civil List	4,500
Income tax	195,888	Foreign Affairs. . .	16,830
Business tax . . .	50,499	Home Affairs . . .	50,748
Liquor tax	212,562	Finance	444,870
Sugar excise . . .	78,029	Army	179,803
Tax on Textile fabrics .	33,467	Navy	215,917
Customs duties . . .	129,955	Justice	35,884
		Education. . . .	129,587
Total Taxes [1] . . .	828,741	Agriculture and Forests .	30,593
Stamps	82,205	Commerce and Industry .	5,488
Public Undertakings and		Communications . .	176,896
State Property . .	276,410	Overseas Affairs . .	1,967
Total ordinary (including other receipts) . .	1,335,587	Total ordinary . . .	1,293,082
Extraordinary Revenue .	857,826	Extraordinary Expenditure	900,332
Total Revenue . .	2,193,414	Total Expenditure . .	2,193,414

[1] Including all items.

Public debt, March 31, 1934:—Internal loans (4 and 5 per cent.), 6,724,440,125 yen; foreign loans (4 to 6½ per cent.), 1,414,598,267 yen; total, 8,139,038,392 yen. Floating debt, March 31, 1934, 213,891,164 yen; government rice purchase notes, 545,645,944 yen. Finance debt, 100,000,000 yen. Total debt, March 31, 1934, 8,998,575,108 yen.

II. Local.

The revenue of the Prefectures for the year 1933–1934 was 494,698,504 yen, and expenditure 494,696,393 yen. The revenue of the cities in 1933–34 was 808,305,902 yen, and the expenditure was 808,197,698 yen. The revenue of the towns and villages in 1933–4 was 451,921,803 yen, and the expenditure was 451,746,992 yen. The total local debt at the end of March, 1933, was 2,728,249,752 yen.

Defence.

I. Army.

Service in the army (or navy) is universal and compulsory. Liability commences at the age of 17 and extends to the age of 40, but actual service begins at 20. All those physically capable of bearing arms are divided into two classes, the 'fit,' and the 'absolutely fit.' The numbers necessary for the first line (or active army), called *Gen-eki*, are taken solely from the 'absolutely fit.' Service in the ranks is for 2 years in all arms; then for 5 years and 4 months in the reserve (*Yobi*). Reservists are usually called out once during their reserve service, for 3 weeks. Having completed 7 years and 4 months in the first line, including its reserve, the men are transferred to the second line, called *Kōbi*. Service in the Kōbi is for 10 years, with usually one period of training of 3 weeks. At the end of their Kōbi service the men are in the 38th year of their age, and they are passed into the *Kokumin*, which is the territorial or home defence army. In this they serve for 2 years and 8 months, to complete their total service of 20 years.

The reserve for making good the waste of war, or *supplementary reserve*, is called Hojū. It is composed of the balance of the 'absolutely fit' recruits not required for the first line, and of as many of those classed as 'fit' as may be required to make up a certain fixed number. They all serve in the Hojū for 12 years and 4 months, during which a part of them is called out for training. After completion of this they are passed to the Kokumin until 40 years of age to complete their army service.

The Kokumin is divided into two 'bans.' The first ban comprises all the men who have passed, as shown above, through the first line and landwehr, or through the supplementary reserve and landwehr, who are trained in barracks, and will serve until 20 years of age. The second ban consists of Jōbi, Kōbi, Hojū, and those of which do not serve for the first ban. It includes (1) those who though 'fit' are not required for the Hojū; (2) those who for various reasons have been exempted from military service; and (3) the young men between 17 and 40 years of age who have not been called up. None of these classes receive any military training, but they can be drawn on in case of national emergency.

The partially trained men who have been passed into the Kōbi from the Hojū are not included in the fighting units of the Second Line. They supply the large number of men required for the transport service on mobilisation, and for the expansion of other departmental corps.

The strength of the active army and the first and second reserves in 1934 was 19,399 officers and 309,782 other ranks, inclusive of military air forces, organised as follows:—

	Divisions	Brigades	Regiments	Battalions	Squadrons	Special Companies	Batteries
Infantry	17	34	70	210	—	70	—
Cavalry	—	4	25	—	70	—	—
Artillery	—	4	—	—	—	—	—
Field	—	—	15	45	—	—	90
Heavy	—	—	8	—	—	—	44
Coast	—	—	3	8	—	—	34
Mountain	—	—	4	8	—	—	22
Horse	—	—	—	1	—	—	2
Anti-Aircraft	—	—	1	4	—	—	—
Engineers	—	—	4	17	—	80	—

The air personnel for the army numbered in 1932, 6,944, organised in 8 flying regiments and a balloon corps. The number of aeroplanes in service was 800.

The Japanese Islands are divided into military districts, corresponding to the divisions of the army, and the district is the unit of administration as well as of territorial command. Each division is supplied with recruits from its own district, except the Guards, whose infantry recruits are selected from the whole country; the other arms of the Guard division are recruited from each district of the 1st, 2nd, 3rd, 13th and 14th divisions. Three divisions are stationed in Manchuria and North China, with several independent companies of railway guards.

The Emperor is the head and supreme commander of the army, and also of the navy. He nominates the War Minister (always a general officer of high rank), the Chief of the General Staff, and the Members of the Military Council.

The arm of the Japanese infantry is the improved rifle; calibre, 6·5 mm. (·256″) machine guns and light machine guns, infantry cannons and infantry howitzers, a Mauser with an altered chamber. The cavalry are armed with a carbine of similar construction, and also with heavy and light machine guns. The field gun is a q.-f. shielded Krupp of 7·5 cm. calibre, which fires a shrapnel of 14·3 lbs. The mountain artillery has a gun of the same calibre firing a lighter shell. There are a certain number of field howitzer batteries, armed with 4·6″ and 5·9″ howitzers, firing shells of about 44 lbs. and 80 lbs. respectively. A 4″ gun for heavy field batteries is being introduced.

The military budget for 1933–34 amounted to 448,100,000 yen.

II. Navy.

The administration of the Navy is in the charge of the Minister of Marine, under whose control is also the Naval Technical Department for Naval Construction, while the Chief of the General Staff is directly responsible to the Emperor for Operation, Mobilization, and Intelligence.

The coast of Japan is divided into three maritime districts having their headquarters at Yokosuka, Kure, and Sasebo.

The Japanese Fleet was markedly affected by the Washington Agreement, though Japan remains the third great naval power of the world. Her replacement tonnage was fixed by the Treaty at 315,000 tons in capital ships, which is superior to the strength allowed to France and Italy. By

the London Treaty, no capital ships may be replaced during 1931–36. When the London Treaty expires in 1936, Japan has expressed the intention of claiming 'parity in principle' with the British Empire and the United States. The existing capital ships are in process of being modernized, it is said at a cost of 7,500,000*l.* Recent programmes have been concerned mainly with the building of cruisers, destroyers and submarines for the purpose of replacing obsolete ships. Under the Fleet Replacement Laws there are to be built during 1931–38: 6 cruisers of 8,500 tons, 2 aircraft carriers of 10,000 tons, 26 destroyers, 13 submarines, 1 large and 3 small minelayers, 6 minesweepers, 16 torpedo boats, and 13 other vessels.

The principal state dockyards are at Kure and Yokosuka, where capital ships have been built, and there is a dockyard also at Sasebo, where lighter vessels are constructed. The Kawasaki private shipbuilding yard at Kobe and the Mitsubishi establishment at Nagasaki are well equipped with modern plant, and there are lesser building yards at Maizuru, Uraga and elsewhere, as well as the government armour and armament factory at Kure. Japan has made herself practically independent of Europe for the building and arming and equipment of her warships.

A statement of the Japanese fleet follows:—

	Completed at end of		
	1932	1933	1934
Battleships	9	9	9
Armoured Cruisers	7	7	7
Aircraft Carriers	3	4	4
Cruisers	31	31	31
Destroyers	101	102	108[1]
Torpedo Boats	—	4	4
Submarines	62	62	68[2]

[1] The destroyers are 74 first-class and 34 second-class.
[2] The submarines are 30 first-class, 38 second-class.

The following table includes all the battleships which are being retained, and the armoured cruisers and principal protected cruisers.

Year of laying down	Name	Standard Displacement	Armour		Main Armament	Torpedo Tubes	Indicated Horse-power	Speed
			Water-line	On Guns				
Battleships.[1]		Tons	inches	inches				Knots
1911	Kongō	29,330	8	10	8 14 in.; 16 6 in.	4	64,000	26·0
1912	Kirishima							
1912	Haruna							
1912	Fusō	29,330	12	12	12 14in.; 16 6in.	2	40,000	22·5
1913	Yamashiro							
1915	Ise	29,990	12	12	12 14in.; 18 5·5in.	4	45,000	23·0
1915	Hyuga							
1917	Nagato	32,720	12	14	8 16in.; 20 5·5in.	6	80,000	23·0
1918	Mutsu							

[1] The battleship *Hiyei*, which has been rendered non-effective under the terms of the London Treaty, is omitted from this table.

Year of laying down	Name	Standard Displacement	Armour: Water-line	Armour: On Guns	Main Armament	Torpedo Tubes	Indicated Horse-power	Speed
	Armoured Cruisers (rated as Coast Defence Vessels).	Tons	inches	inches				Knots
1896	Asama	9,240	7	6	4 8in.; 12 6in.	4	18,000	21·25

Ships building or completing include four 8,500-ton cruisers, seven destroyers, eight submarines and one submarine-depôt ship.

The gross amount of the Navy Estimates 1932–33 was 306,800,000 yen; for 1933–34, 403,771,338 yen; and for 1934–35, 487,954,658 yen. The active personnel numbers 101,400.

Production and Industry (in Japan proper).

About three-fifths of the arable land is cultivated by peasant proprietors and the remaining portion of it by tenants. According to the official report of

January 1, 1934, taxed land owned by private persons and local corporations was 41,937,401 acres, of which under rice, 7,778,773 acres; other cereals, 6,793,591 acres; forests, 21,661,581 acres; plains, 4,724,681 acres; buildings, 11,040,628 acres.

The forest area on January 1, 1931, was 49,128,737 acres, of which 17,902,696 acres belonged to the State, and 3,156,274 acres to the Imperial household.

The following are some agricultural statistics for three years :—

Crop	Acreage			Produce (metric tons)		
	1931	1932	1933	1931	1932	1933
Rice	7,958,021	7,983,165	7,778,773	9,960,319	10,893,811	12,893,811
Wheat	1,227,582	1,246,702	1,509,318	1,155,537	1,172,137	1,444,274
Barley	931,867	931,434	851,096	1,330,966	1,366,275	1,247,674
Rye	1,456,176	1,175,564	1,103,975	1,543,104	1,182,664	1,332,403
Tobacco	90,236	83,508	83,601	68,361	60,606	66,540
Tea	93,351	93,988	94,272	38,305	40,410	43,467

Rice production in 1934 was 9,374,600 tons.

In 1932, the number of oxen was 1,529,309; horses, 1,541,086; sheep, 26,918; goats, 228,998; swine, 926,010.

The mineral and metal products for 1932 and 1933 were :—

Mineral or Metal	1932		1933	
	Quantity	Value	Quantity	Value
		Yen		Yen
Gold grammes	12,469,285	25,924,770	13,701,200	33,790,368
Silver ,,	163,625,358	5,386,849	185,610,259	8,037,277
Copper kilos.	71,876,557	39,120,840	69,032,756	50,771,985
Lead ,,	6,414,643	1,071,842	6,824,687	1,357,829
Zinc ,,	27,043,432	6,032,611	30,657,632	9,746,556
Pig iron m. tons.	157,315	7,957,131	—	—
Steel ,,	2,113,647	154,296,231	—	—
Iron pyrites ,,	726,073	7,514,695	903,129	9,974,995
Chromite ,,	12,492	356,581	19,897	714,688
White arsenic kilos.	2,637,408	273,633	2,375 092	383,579
Coal m. tons.	28,053,375	141.976.783	32,523,746	195,467,264
Sulphur ,,	84,580	4,616,084	114,426	7,500,318
Crude petroleum hectolitres	2,534.966	7,509,873	2,255 655	8,958,927

In 1932, the number of mining workers was as follows :—in collieries, 137,975; in metal mines, 39,698; various, 8,167; total, 185,840.

In 1934, the total quantity of cocoons obtained was 87,199,771 kwan, valued at 204,131,502 yen, compared with 101,163,566 kwan, valued at 500,129,171 yen in 1933.

On December 31, 1932, the number of employees in the 67,318 factories was 1,733,511 (846,307 males and 887,204 females).

The value of the principal manufactures in 1932 was as follows: woven goods, 1,153,524,933 yen; earthenware, 65,262,852 yen; lacquered ware, 26,632,909 yen; matting, 15,092,978 yen; oil, 31,944,837 yen; grege silk, 487,340,118 yen; leather, 19,975,882 yen.

At the end of 1932 there were 21,297 textile factories operating in Japan, employing 161,408 men and 720,051 women. The number of spindles, at the end of 1930, was 6,836,516, and of looms 77,898.

In 1932 the raw marine products amounted to the value of 145,735,675 yen; the manufactured products to the value of 131,662,479 yen. The production of salt in 1932–33 was 572,497 metric tons; in 1933–34, 630,706 metric tons.

Commerce.[1]

Trade for 5 years was as follows:—

—	1930	1931	1932	1933	1934
	Yen	Yen	Yen	Yen	Yen
Imports	1,546,071,870	1,235,675,266	1,431,461,000	1,917,219,858	2,282,531,000
Exports	1,469,852,293	1,146,981,326	1,409,992,000	1,861,045,718	2,171,925,000

[1] Excluding bullion and specie.

The bullion and specie (gold and silver) in 1934 amounted to: imports, 331,000 yen; exports, 13,924,000 yen; 1933, imports, 124,780 yen; exports, 28,607,641 yen.

The staple articles of trade between Japan and Great Britain, including Formosa (Board of Trade Returns) for 2 years were:—

Imports into U.K.	1932	1933	Exports to Japan	1932	1933
	£	£		£	£
Raw silk	898,699	919,353	Cotton goods	165,843	70,348
Silk manufactures	548,042	563,176	Woollen goods	741,363	476,335
Electrical goods	119,032	177,894	Woollen and worsted yarns	263,494	125,799
Peas (tinned)	362,418	347,670	Iron and steel	935,127	675,740
Soya bean oil	243,245	63,763	Machinery	735,782	554,337
Toys	173,575	201,967	Motor cars	128,209	57,272
Fish (including canned salmon)	735,834	797,000	Chemicals	647,357	399,649

Total trade between Japan (including Formosa) and U.K. for 5 years in thousands of pounds sterling (Board of Trade Returns):—

—	1930	1931	1932	1933	1934
Imports from Japan to U.K.	7,820	7,952	6,697	6,200	7,992
Exports to Japan from U.K.	8,229	6,186	5,730	4,187	3,809
Re-exports to Japan from U.K.	168	145	109	140	165

Shipping and Navigation.

Shipping movements at Japanese ports for 2 years:—

	Entered				Cleared			
	1932		1933		1932		1933	
	No.	Tons	No.	Tons	No.	Tons	No.	Tons
Steam	47,034	108,464,968	49,672	116,033,860	46,901	98,010,969	49,574	75,137,375
Sailing	1,167	202,291	1,373	133,402	2,078	201,364	606	138,092
Total	48,201	108,667,259	51,045	116,167,262	48,979	98,212,333	50,180	75,275,467

In 1933 the registered merchant navy (Japan Proper) consisted of 3,295 steamers of European style, of 3,780,197 tons; and 14,993 sailing vessels of Japanese style, of 862,914 tons. There were only 18 steamships of more than 10,000 tons, all belonging to the Nippon Yusen Kaisha. On July 1, 1934, the mercantile marine comprised 1,949 vessels of 4,072,707 tons gross.

Internal Communications.

The total length of roads in Japan is 591,228 miles (1931).

The first railway in Japan was built in 1872, between Tokyo and Yokohama, a distance of 18 miles. By 1880 there were 73 miles of railway in operation; by 1900, 3,638 miles; by 1910, 5,354 miles; by October, 1923, 9,974 miles. The following table gives the railway statistics for 1932–33:—

—	State Railways	Railways owned by Private Companies	Total
Length in miles	9,486	4,501	13,987
Gross income, yen	408,093,702	74,935,466	483,029,168
Expenditure, yen	265,081,894	47,400,667	312,482,561
Goods carried, tons	61,732,756	22,212,514	83,945,270
Passengers, number	781,149,732	427,668,098	1,208,817,830

It has been decided to make the standard gauge 4 feet 8½ inches. The work is expected to be completed in 1943, and the cost estimated at 1,408,000,000 yen. Japan has been conceded by China the right to build five railway lines in Manchuria and Mongolia. Comprehensive plans have been made for the electrification of the Japanese Government railways. On December 31, 1932, there were 1,778 miles electrified, of which 308 miles were state-owned and 1,470 miles owned by private companies.

There are (1932–33) 1,278 miles of electric tramway in Japan.

The air traffic has been as follows (years ended March 31) :—

	1928–29	1929–30	1930–31	1931–32	1932–33
Number of aviators	336	412	460	512	638
Number of flights	17,528	20,628	30,018	51,370	51,984
Number of machines	107	118	122	154	161
Distance flown (kilometres)	1,106,802	1,711,683	2,346,052	3,010,260	2,807,113
Hours flown	8,394	12,108	15,459	20,600	19,422

The following are postal and telegraphic statistics for four fiscal years (ended March 31) :—

—	1929–30	1930–31	1931–32	1932–33
Letters, Postcards, Newspapers and periodicals	5,096,611,368	4,409,551,651	4,490,202,875	4,253,759,031

The notes of the Bank of Japan are of five denominations, 1, 5, 10, 20 and 100 yen.

The total amount of notes in circulation on January 10, 1935, was 1,225,656,000 yen, cash and bullion 497,941,000 yen, discounts 576,142,000 yen, advances 91,312,000 yen, state and public deposits 358,428,000 yen. On March 31, 1929, the gold stock of Japan was 1,178,000,000 yen, of which 91,000,000 yen were held by the Government and 1,087,000,000 yen by the Bank of Japan. The embargo on the export of gold, imposed on September 12, 1917, was removed on January 11, 1930, and Japan thus returned to the gold standard. The embargo, however, was re-imposed on December 13, 1931, to check the gold efflux.

The modern banking system dates from 1872. The principal banks of Japan are the Nippon Ginko (Bank of Japan), the Yokohama Specie Bank, the Hypothec Bank, the Industrial Bank of Japan, the Hokkaidō Colonisation Bank, the Bank of Taiwan, Bank of Chosen. There were on December 31, 1933, 19 agricultural and industrial banks, 513 ordinary banks, and 84 savings banks. The condition of the banks (ordinary, saving and special) for three years (December 31st) was as follows.

Year	Paid-up Capital	Reserve Fund	Deposits	Net Earnings	Rate of Dividend
	Yen	Yen	Yen	Yen	Per cent.
1931 . .	1,656,874,000	962,900,000	11,156,940,000	266,518,000	6·6
1932 . .	1,626,320,000	976,867,000	11,402,489,000	286,269,000	6·6
1933 . .	1,599,376,000	978,391,000	11,946,407,000	319,074,000	6·4

The depositors in the Post Office Savings Bank on March 31, 1934, numbered 37,165,173, and their deposits amounted to 2,748,620,646 yen; on March 31, 1933, there were 35,020,351 depositors with 2,679,065,760 yen to their credit.

Money, Weights, and Measures.

The present monetary law came into force from October, 1897, by which gold standard was adopted. The unit of value is 0·75 gramme of pure gold, and is called the yen = 2*s.* 0½*d.*, which, however, is not coined. The pieces coined are as follows:—Gold coins (20, 10, and 5 yen pieces), silver coins (50, 20, and 10 sen pieces), nickel coin (10 and 5 sen pieces), and bronze coins (1 sen and 5 rin pieces). The sen is the hundredth part of a yen, and the rin is the tenth part of a sen. The gold coins are ·900 fine, and the silver coins ·720 fine. The gold coins formerly issued (20, 10, 5, 2, and 1 yen pieces) are used at double their face value. The one-yen silver coin formerly issued is withdrawn. The old copper 2, 1 and ½ sen pieces are used as formerly.

Weights and measures are as follows:—

The *Kin*	= 160 *momme*	= 1·323 lbs. avoirdupois.
,, *Picul*	= 100 *kin*	= 132·27 lbs. ,,
,, *Kwan*	= 1,000 ,,	= 8·267 lbs. ,,
,, *Sün*		= 1·193 inches.
,, *Shaku*	(10 sün)	= 11·930 inches.
,, *Ken*	= 6 *shaku*	= 5·965 feet.
,, *Chô*	= 60 *ken*	= $\frac{1}{15}$ mile, 5·4229 chains.
,, *Ri*	= 36 *chô*	= 2·44 miles.
,, *Ri* sq.		= 5·9552 sq. miles.
,, *Tsubo*		= 3·9538 sq. yds.
,, *Chô*, land measure		= 2·45 acres.

The *Koku*, liquid . . . . . = 39·6804 gallons.
,, ,, dry . . . . . = 4·9601 bushels.
,, *To*, liquid=$\frac{1}{10}$ *koku* . . . . = 3·9680 gallons.
,, ,, dry . . . . . = 1·9851 pecks.

The metric system was made obligatory by a law passed in March, 1921, but has not yet been enforced. The following rates are recognised :—

metre = 3·3 *shaku*.
gramme = 0·266667 *momme* ($\frac{4}{15}$ *momme*).

Diplomatic Representatives.

1. Of Japan in Great Britain.

Ambassador Extraordinary and Plenipotentiary.—His Excellency Tsuneo Matsudaira, G.C.V.O. (Appointed July 24, 1928.)
Counsellor.—Sotomatsu Kato, C.B.E.
First Secretary.—Katsutaro Miyazaki.
Second Secretaries.—Denjiro Kato, Takashi Mori, and Shinichi Kamimura.
Attachés.—Akira Miyazaki, Koh Chiba, Morio Sugi, Kohei Teraoka, and Ichiro Kawasaki.
Naval Attaché.—Captain Arata Oka.
Military Attaché.—Lieut.-Colonel Masao Maruyama.
Financial Attaché.—Yutaro Tomita.
Commercial Counsellor and Consul-General.—Shinjiro Matsuyama.
Chancellors.—Yoshio Sumino, M. Yamashita, Shigeo Harada, and I. Kakegawa.

There are Consuls at Glasgow, Liverpool, Cardiff, Middlesbrough, and Manchester.

2. Of Great Britain in Japan.

Ambassador Extraordinary and Plenipotentiary.—Sir Robert Henry Clive, K.C.M.G., appointed January 30, 1934.
Counsellor.—C. E. S. Dodd.
Counsellor (local rank).—W. B. Cunningham.
Secretaries.—H. Ashley Clarke and E. E. Crowe.
Naval Attaché.—Captain J. G. P. Vivian, R.N.
Military Attaché.—Col. E. A. H. James, R.E.
Air Attaché.—Squadron-Leader R. W. Chappell, M.C.
Commercial Secretary.—H. A. Macrae, M.B.E.
Commercial Counsellor.—G. B. Sansom, C.M.G.

There are Consular Representatives at Tokio, Yokohama, Osaka, Shimonoseki, Kobe, Nagasaki, Tamsui (in Formosa), Dairen, and Seoul.

3. Of Japan in Canada.

Minister.—Iemasa Tokugawa (appointed April 30, 1929).

4. Of Canada in Japan.

Minister.—Herbert Meredith Marler (appointed January 12, 1929).

KOREA (CHOSEN).

Government.—By a treaty concluded between Japan and Korea on August 22, 1910, the Korean territory was formally annexed to the Empire of Japan. The Emperor was deprived of all political power, and the title of the country was changed back to 'Chosen,' from Tai Han, which had

been adopted in 1897, and the office of Japanese Governor-General established. By an Imperial Rescript of 1919, Korea is to be treated as in all respects an integral part of Japan, Koreans to be on the same footing as Japanese. Members of the Korean Imperial House and the late Korean Cabinet have had Japanese patents of nobility conferred upon them.

Governor-General.—General Kazunari Ugaki (June, 1931).

Area and Population.—The area is 85,228 square miles. Population at the end of 1932, 20,599,876 (10,482,841 males and 10,117,035 females). Of this number, 523,452 were Japanese, 20,037,273 Koreans, and 39,151 foreigners. The 1932 returns give the number of British subjects as 233, Americans 793, French 67, and Germans 91. At the end of 1932 the population of the largest cities and towns was as follows:—Keijo-fu (Seoul), the capital, 374,909 (104,656 Japanese), Fusan-fu (Pusan), 148,156 (47,836 Japanese), Heijo-fu (Pyong-Yang), 145,455 (19,459 Japanese), Taikyu-fu (Tai-Ku), 103,511 (26,550 Japanese), Chemulpo 68,189 (11,276 Japanese).

The language of the people is intermediate between Mongolo-Tartar and Japanese, with a large admixture of Chinese words, and an alphabetical system of writing is used. Official correspondence, except with Korean provincial officials, is conducted in Japanese. The written language of the people is a mixture of Chinese characters and native script.

Religion and Education.—The knowledge of Chinese classics and of Confucian doctrine, formerly considered essential to the education of the upper classes, has given way under Japanese and foreign influence to a more practical system of instruction, but the worship of ancestors is still observed with as much punctiliousness as in China. In the country there are numerous Buddhist monasteries, which, however, are looked upon with scant respect. There is a large number of Christian converts. French missionaries were working in the country from 1784 and struggled for a century in the face of official persecution. The ban on Christianity was raised in 1882 and the first Protestant missionaries came to Korea in 1884. In 1932 there were 341 foreign missionaries working in Korea and a membership of 367,897 converts was claimed. The missions early established numerous hospitals and schools throughout the country.

Since annexation the Japanese authorities have provided schools in all parts of the country, but it is recognized that much is required to be done, as less than 40 per cent. of the Koreans are literate. Plans are now being drawn up to establish an elementary school in every *myen* or village, but lack of funds hinders the speedy attainment of this ideal. Technical schools are being gradually introduced.

In 1933 there were for the education mainly of Japanese 479 elementary schools with 79,397 pupils and 2,267 teachers, 11 middle schools with 6,347 pupils, 1 medical school, a law school, 3 normal schools with 1,891 students and 103 teachers, a higher technical school, a higher commercial school and a higher agricultural school, 25 girls' high schools with 9,558 pupils, and 269 kindergarten schools with 13,121 pupils and various private schools. For the education of Koreans there were 2,017 common schools with 534,585 pupils, and 83 private common schools with 26,645 pupils, 26 higher common schools (11 private) with 13,610 pupils, 17 (10 private) higher common schools for girls, with 5,179 pupils; besides various industrial schools. There is a University at Seoul with 609 students (May 31, 1933), of whom 202 were Koreans and 407 Japanese. The preparatory course has 314 students.

In Seoul there are three daily Korean newspapers, and 4 Japanese besides others published at Chemulpo and in other parts of the country.

There is a Government-subsidised daily newspaper in English, published at Seoul.

Finance.—The finances of Korea form a special account in the Budget of Japan. The estimated revenue and expenditure for two years are shown as follows :—

Revenue.	1933-34	1934-35	Expenditure.	1933-34	1934-35
	Yen	Yen		Yen	Yen
Ordinary	184,481,578	206,282,652	Ordinary	170,097,296	184,100,368
Extraordinary ...	47,545,371	52,321,746	Extraordinary ...	61,929,653	74,491,237
Total ...	232,026,949	258,604,398	Total ...	232,026,949	258,591,605

The outstanding debt (March 31, 1934) is 473,025,657 yen.

Production.—Korea is almost entirely an agricultural country; the cultivated area at end of 1932 was 11,251,872 acres. The Japanese own less than 7 per cent of the cultivated land. The chief crops are rice (about 33 per cent. of the cultivated area), barley, wheat, beans, and grain of all kinds, besides tobacco and cotton. The rice crops for 4 years were (in bushels) :—1929, 81,617,865; 1930, 95,903,385; 1931, 79,364,995; 1932, 81,729,125. In 1932, 40,018,780 bushels of barley were produced; 22,048,385 bushels of soya beans, 149,212,219 lbs. of Upland American cotton and 56,491,457 lbs. of native cotton. Whale fishing is carried on off the coast. In 1932, 105,975,225 pounds of apples and 32,473,017 pounds of pears were produced. Silkworm rearing is also carried on and in 1932 there were produced 2,965,290 bushels of cocoons. Live-stock is raised as a by-product of agriculture. The cattle are well known for their size and quality. In 1932, there were 1,664,435 cattle, 53,887 horses, 1,339,473 pigs, 6,789 donkeys and 27,363 goats. The fishing industry is developing; value of catch in 1932, 46,263,592 yen.

Gold mining is carried on ; the value of the 1932 output was 17,809,438 yen. There are several foreign-owned gold mines in active operation. Copper, iron, and coal are abundant in Korea; the development of these resources has been impeded by defective means of communication, but is making steady progress. The output of pig iron in 1932 was valued at 4,114,012 yen; iron ore at 749,259 yen; and coal 5,970,119 yen. Anthracite coal mines in the north of Korea are in operation. Graphite and mica also are found in fair quantities. The total value of mineral products in 1932 was 33,746,959 yen. The Government has the monopoly of ginseng, salt and tobacco, the latter yielding 44,249,358 lbs. in 1932. At end of 1932 there were 4,643 factories with 110,650 employees, while the value of the output was 310,336,804 yen.

Commerce.—The open ports are Seoul, Chemulpo, Fusan, Gensan Chinnampo, Mokpo, Kunsan, Seishin, Ping-Yang (inland city), Wiju, Yong-Am-Po (1908), Yuki, Joshin and Shin-wi-ju.

Trade (merchandise only) at the open ports :—

—	1930	1931	1932	1933	1934
	Yen	Yen	Yen	Yen	Yen
Imports .	367,050,000	270,466,331	320,356,016	404,185,460	519,796,000
Exports .	266,540,000	261,798,539	311,354,050	368,627,722	465,367,000

The imports in 1933 included cotton goods, 60,186,472 yen; machinery, 12,521,159 yen; silk goods, 18,445,439 yen; timber, 6,135,575 yen; mineral oil, 8,480,554 yen; grass cloth, 1,147,109 yen; sugar, 5,851,982 yen; paper, 8,615,513 yen; flour, 3,989,562 yen; fertilisers, 11,453,405 yen; and coal, 10,735,449 yen. The principal exports were rice, 154,706,658 yen; beans, 19,275,359 yen; hides, 1,426,271 yen; silk, 14,009,028 yen; cattle, 4,261,494 yen; cocoons, 1,774,342 yen; and gold ore, 1,882,460 yen. Of the total imports in 1934, the value of 440,268,000 yen was from Japan; of the exports, the value of 407,693,000 yen was to Japan. From Great Britain and the United States of America respectively, direct imports in 1933, amounted to 988,625 yen and 2,195,447 yen; but there is also considerable indirect trade via Japan.

Imports from United Kingdom (Board of Trade Returns) were 112,201*l.* 1932; 82,402*l.* in 1933; and 73,099*l.* in 1934; exports to United Kingdom were 30*l.*, 1,587*l.* and 1,294*l.*; and re-exports from U.K. were 100*l.*, 290*l.* and 148*l.* in the three years respectively.

Shipping and Communications.—The shipping entered at the open ports in 1933 had a tonnage of 12,289,563, and those that cleared a tonnage of 12,283,746. In March 1933 there were 223 steamships, of 58,003 tons, and 756 sailing ships, of 24,889 tons, registered in Korea.

Transport in the interior is by rail, road (motor-car, oxen, pack-horses, etc.), and river. The railways are being rapidly extended and the roads are being gradually improved. At the end of March, 1933, there were 12,897 miles of completed roads. Length of railways, 1934 (public and private), about 1,823 miles; number of passengers carried (1933–34) 22,238,338.

Post, telegraph and telephone data for 1933–34: ordinary post offices, 806; letters handled, 562,735,447; parcels, 5,573,623; telegraph offices, 827; telegraph line, 5,439 miles; telegraph wire, 25,920 miles; telegrams, 12,780,262; telephone offices, 721; telephone line, 5,919 miles; telephone wire, 121,929 miles; telephone messages, 231,309,215; domestic money orders issued, 3,474,609, valued at 108,254,429 yen; paid, 3,098,808, valued at 99,723,253 yen; foreign money orders issued, 6,541, valued at 302,782 yen; paid 28,080, valued at 701,327 yen.

Currency and Banking.—Regulations for banking were framed in 1906. In 1934 (Jan.) there were 15 banks, semi-Government and ordinary, with 61,871,000 yen paid-up capital, with total deposits at January 1, 1934, amounting to 294,073,000 yen.

A central bank, the Bank of Chosen, was established in August, 1909, and in November it took the place of the First Bank of Japan (Dai-Ichi-Ginko) as the Government Treasury. Notes of this bank are permitted to circulate unrestrictedly within the jurisdiction of the Government-General of Chosen and are exchangeable with convertible notes issued by the Bank of Japan. The Bank of Chosen has a paid-up capital of 25 million yen, the deposits amounting to 60,913,581 yen (Dec. 31, 1933). Notes issued at Dec. 31, 1933, 148,176,000 yen. Against their issue must be provided a reserve of the same amount, consisting of gold coin, gold and silver bullion, and convertible notes of the Bank of Japan; silver bullion, however, must not exceed one-fourth of the total reserve. The postal savings banks had 2,840,656 depositors with a total amount 44,807,154 yen on March 31, 1934.

The coinage consists of gold pieces of 5-, 10-, and 20-yen, silver of 10-, 20-, and 50-sen, nickel of 5-sen, and 10-sen, and bronze of 1-sen. The gold coins, however, are not in general use, the ordinary medium of commerce being the notes of the Bank of Japan or of the Bank of Chosen which are issued in

the following denominations, viz.: 100 yen, 20 yen, 10 yen, 5 yen, and 1 yen. The old nickel coin has been wholly withdrawn from circulation, and the *cash* currency is now rarely seen, and then only in remote parts of the country. Under certain regulations, bills of exchange and cheques may pass into the currency.

Acting British Consul-General at Seoul.—R. L. Cowley.

FORMOSA (TAIWAN).

The Island of Formosa, or Taiwan, was ceded to Japan by China by the treaty which was ratified on May 8, 1895, and Japan took formal possession on June 2 of the same year. Japanese civil government in the island began on March 31, 1896.

Governor-General.—Kenzo *Nakagawa.*

The Island has an area of 13,890 square miles, with a population according to the census of Oct. 1, 1930, of 4,592,537 (2,353,288 males and 2,239,294 females). There were 243,872 Japanese, and 45,284 foreigners in the Island in 1931. The chief towns are Taihoku (230,490 inhabitants in 1930 Census), Tainan, Kūrun, and Taichu. The official language is Japanese, but Chinese (Amoy dialect) is the most used.

Many improvements have been effected by the Japanese administration. A colonising scheme was commenced in 1909, whereby Japanese were settled in Taiwan. An educational system has been established for Japanese and natives. In 1932 there were for the instruction of the Japanese 133 primary schools, with 924 teachers and 37,786 pupils. For the instruction of the natives there were 762 schools, with 5,606 teachers and 281,714 pupils. There are also normal schools, a medical school, an industrial school, and a school for teaching the Japanese language to natives, and native languages to Japanese. The University of Formosa was opened in April, 1928.

The receipts of the Japanese administration are from inland taxes, customs, public undertakings, and also subsidies from Japan ranging from 5 to 9 million yen annually. The expenditure is chiefly for internal administration and the working of public undertakings.

[1] Budget estimates.

The agricultural products of Formosa are rice, tea, sugar, sweet potatoes, ramie, jute, turmeric; while camphor is worked in the forests under a Government monopoly. The production of crude camphor and camphor oil respectively was in 1933, 5,366,393 lbs. and 8,553,000 lbs.; and in 1932, 5,848,828 lbs. and 10,365,120 lbs. The quantity of tea produced in 1933 was 9,326,926 kilogs; in 1932, 8,822,491 kilogs. Production of rice in 1933, 41,480,782 bushels; in 1932, 44,746,077 bushels. Yield of raw sugar in 1933, 633,724 metric tons; in 1932, 989,050 metric tons; value of marine products, 14,030,502 yen in 1933; 12,328,268 yen in 1932. The number of

animals (December 31, 1932) was:— horses, 333; goats, 90,084; cattle, 80,851; pigs, 1,753,963; buffaloes, 286,255. The industries comprise flour-milling, sugar, tobacco; oil, spirits, iron-work, glass, bricks, soap, and many other manufactures. Mining is making steady progress: gold, silver, copper and coal being the principal minerals; the output of coal in 1931, was 1,421,544 metric tons, and in 1932, 1,354,995 metric tons. The total value of minerals in 1932 was 13,950,889 yen. There were 46 new style and 68 old style sugar mills in Taiwan in 1932.

The commerce of Formosa is largely with Japan. In 1934 the imports from Japan amounted to 176,990,724 yen; exports to Japan 279,410,271 yen. Imports from other foreign countries, 38,030,977 yen; exports to other foreign countries, 26,518,409 yen. Total imports, 215,021,701 yen; and total exports, 305,928,680 yen. Imports in 1932, 31,040,823 yen from foreign countries; 133,456,947 yen from Japan; total imports, 164,497,770 yen; exports, 18,045,250 yen to foreign countries; 222,682,738 yen to Japan; total exports, 240,727,988 yen. The chief exports in 1932 were tea, 4,870,380 yen; sugar, 3,174,477 yen; camphor and camphor oil, 1,547,783 yen; alcohol, 521,358 yen; coal, 1,315,805 yen. The chief imports in 1932 were manures, 12,612,630 yen; soya beans, 1,800,962 yen; liquid fuel, 1,086,118 yen; gunny bags, 1,327,074 yen.

In March, 1932, there were 16 steamships, of 2,960 tons, and 122 sailing vessels, of 7,370 tons, registered in Formosa. In 1932, 1,125 vessels of 2,519,029 tons entered the ports of Formosa from Japan and other countries.

Roads have been and are being constructed throughout the Island. There were, in 1932, 624·1 miles belonging to the Government and 332·2 miles to private companies, and 1,085·8 miles to exclusive use of private companies. In 1934 there were 178 post offices, through which passed packets (including parcels), 76,389,393. The telegraph service has 202 offices; length of line 823 miles; of wire, 3,783 miles; messages, 3,153,419. Telephone line, 2,142 miles; length of wire, 49,688 miles; calls, 83,499,151.

The post office savings bank had 511,482 depositors with 19,207,329 yen to their credit (1933–34).

The coinage current in the Island is that of Japan.

Bōkotō, or the **Pescadores**, consist of about 12 islands, with a total area of about 50 square miles.

Japanese **Sakhalin** (or **Karafuto**) consists of that portion of Sakhalin which lies to the south of the parallel of 50° north latitude. It has an area of about 13,935 sq. miles, and, in 1930 (census), the population was 295,196 (168,532 males, 126,664 females). The most important industry of the island is the herring fishery, but large areas are fit for agriculture and pasturage, and Japanese settlers have been provided with seed and domestic animals. There is a vast forest area of larch and fir trees. The minerals found are coal and alluvial gold; coal raised in 1933, 888,913 tons.

The budget for the year ending March 31, 1935, balanced at 25,929,056 yen, and expenditure 23,566,668 yen.

The leased Territory of **Kwantung**, the southern part of the Liaotung Peninsula, has an area of about 1,444 sq. miles, and a population (December 31, 1933) of 1,004,439, of whom 569,942 were males and 434,497 females. At the end of 1933, there were 862,307 Chinese and 141,275 Japanese (exclusive of army and navy). The Territory is under a Japanese governor-general, the seat of administration being at Dairen (or Tairend, formerly called Dalny). At the end of 1932 there were 56 elementary schools

with 33,873 pupils, 7 secondary schools with 4,150 pupils, and 8 girls' schools with 4,132 pupils, for the instruction of the Japanese, and 157 schools with 39,178 pupils for the instruction of the natives; also an American Presbyterian Mission with a church and a hospital.

The revenue for 1934–35 is estimated at 22,911,058 yen, and expenditure, 22,911,058 yen.

The chief agricultural products of the Territory are maize, millet, beans, wheat, buckwheat, rice, tobacco, hemp, and various vegetables. There is an active fishing industry, the catch in 1932 being 11,171,422 kwan, valued at 4,104,259 yen, as compared with 9,387,036 kwan in 1931, valued at 3,150,750 yen. The chief manufactured product is salt, which is abundant in the Territory. In 1933 production amounted to 291,170 metric tons. Since July 1, 1907, the Territory forms a Customs district under the Chinese Imperial Customs, Dairen being the Customs port, with out-stations at Kinchow, Pulantien, Pitzewo, and Port Arthur. The port is free, goods being subject to duty only on crossing the frontier of the leased territory. The trade is mostly with Japan and China. Imports (1933), 374,780,644 yen; exports, 330,151,374 yen, of which 259,052,416 yen were imported from Japan, and 128,041,857 yen exported to that country. Dairen has a fine harbour, ice-free all the year, and protected by a breakwater 1,000 yards long. The harbour is provided with sheds and warehouses, under the control of the South Manchuria Railway Company. The railway connects Port Arthur and Dairen with Mukden, Harbin, and the Eastern Chinese Railway System, 11,633,875 passengers and 18,850,840 tons of goods were carried during 1933–34. In 1934 its total length was 699 miles.

Exports to U.K. in 1934 (Board of Trade Returns) were 1,108,701*l.*; imports from U.K., 370,388*l.*, and re-exports from U.K., 7,895*l.*

Pacific Islands.—Under the Treaty of Versailles Japan was appointed mandatory to the former German possessions north of the Equator. These include:—(1) *The Marianne (or Ladrone) Islands*—By treaty of February 12, 1899, these islands, with the exception of Guam (the largest of the Marianne Islands) ceded to the United States in 1898, passed on October 1, 1899, from Spanish to German possession for payment of 840,000*l.* Sipan is the seat of Government. The Japanese population of the islands at October 1, 1930, numbered 19,835, and the natives 49,695. The northern group is actively volcanic and uninhabited.

(2) *The Caroline Islands.*—The Carolines consist of about 549 coral islets, Ponapé having 9,864 inhabitants, Yap 6,725, and Parao 9,743 (each at April 1, 1933). The population is mainly of Malay origin, with some Chinese and Japanese. The chief export is copra. For administrative purposes the islands were divided into two groups: (*a*) the Eastern Carolines, with Truk and Ponapé as the centres of administration. There are in Truk 1,106 Japanese, 26 Foreigners, and 15,214 natives; in Ponapé there are 1,417 Japanese, 23 Foreigners, and 8,424 natives. (*b*) The Western Carolines, with Palau and Yap as administrative centres. There are in Palau 3,657 Japanese, 6,070 natives, and 16 Foreigners. In Yap there are 360 Japanese, 6,355 natives, and 10 Foreigners.

(3) *Marshall Islands.*—The Marshall Islands, consisting of two chains or rows of lagoon islands (several uninhabited), known respectively as Ratack (with thirteen islands) and Ralick (with eleven islands), first came under German rule in 1885. The population on April 1, 1933, consisted of 433 Japanese,

10 foreigners, and 9,868 natives. The chief island and administrative centre is Jaluit; Protestant (American) and Catholic missions are at work. There are plantations of coco-palm (1,705 hectares). The chief export is copra.

Justice is administered in 3 district courts and in a court of appeal. The islands contain 17 primary schools for Japanese and 23 for natives. Besides coco-palm, the principal products are sugar-cane (island of Saipan) and cotton (islands of Rota and Tinian). In 1932, there were in the islands 4,415 cattle, 2,888 goats, and 13,329 pigs.

The revenue for the Pacific Islands for 1932–33 is estimated at 5,628,918 yen, and expenditure, 5,628,918 yen.

LATVIA.

(LATVIJAS REPUBLIKA.)

LATVIA, along the southern part of the Baltic littoral, is inhabited chiefly by Letts. As early as the 13th century the Letts fought against the Germans (battle of Durbe, 1260), but in the long run the Germans carried the day, and the state created by the Teutonic Order under the form of a Federal Republic (consisting of Estonia, Latgale, Livonia, and Courland) lasted until 1560. Eventually, Estonia passed under the rule of Sweden, Latgale and Livonia under that of Lithuania-Poland, while Piltene and Oesel became Danish. Courland alone retained her independence under the form of a vassal duchy of Lithuania-Poland. In 1621 Livonia was annexed by Sweden, and in 1710 by Russia. In 1772, after the first partition of Poland, Latgale was assigned to Russia, and in 1795 Courland joined Russia. From this time onwards, Latvia was under Russian rule.

In 1917 Lettish public opinion expressed itself in favour of the separate existence of Latvia, and announced its view officially in the Russian Constituent Assembly in January, 1918. An organization for establishing the independence of the country was formed, and on November 18, 1918, it proclaimed in Riga the sovereign Free State of Latvia, which has been

recognised as an independent State by all the Powers, and was admitted to the League of Nations on September 22, 1921.

Constitution and Government.—The Latvian Constitution which was passed by the Constituent Assembly on February 15, 1922, declares that Latvia is an independent democratic Republic and that the sovereign power of the State is vested in the Latvian people. The *Saeima* (Parliament) consists of 100 representatives elected for 3 years by universal, equal, direct, and secret vote on the basis of proportional representation, by citizens of both sexes over 21 years of age. The *Saeima* elects the President of the State by absolute majority, and he holds office for 3 years. The President must be over 40 years of age. He is the Chief of the armed forces of the State, and, for the period of war, appoints a commander-in-chief. War can only be declared after a vote of the *Saeima*. The President chooses the Prime Minister, who forms the Cabinet; and the Cabinet is responsible to the *Saeima*.

Since May 16, 1934, an authoritarian Government has been established under the leader, Karlis Ulmanis, the President of the Cabinet of Ministers. The Parliament, *Saeima*, was disbanded. The executive and legislative power is concentrated in the hands of the Cabinet of Ministers until a revised Constitution is adopted.

The Ministries are those of Interior, Foreign Affairs, Finance, War, National Health, Education, Agriculture, Justice, and Communications.

President of the State.—Albert *Kviesis* (elected April 4, 1933).
Prime Minister.—Karlis *Ulmanis* (appointed May 17, 1934).

Area and Population.—Latvia consists of the former Russian Province of Courland (about 10,435 square miles), four southern districts (Riga, Wenden, Wolmar, Walk) of the former Russian province of Livonia (about 8,715 square miles) and three western districts (Dvinsk, Reshitza, Lutsin) of the former Russian province of Vitebsk (about 5,292 square miles), making a total of about 24,440 square miles, or, including inland lakes, about 25,000 square miles. The total length of the frontier line of Latvia is 1,040 statute miles, with a coast line of 338 statute miles. For administrative purposes Latvia is divided into: Vidzeme (Livonia), Kurzeme (Courland), Zemgale, and Latgale.

The chief town is Riga (the capital), population (1930) 377,917; population of other principal towns according to 1930 Census, Liepāja (Libau) 57,238; Daugavpils (Dvinsk), 43,226; Jelgava (Mitau), 33,048; Ventspils (Windau), 17,253; Rezekne (Rositten), 12,680; Valmiera (Wolmar), 8,368; Cēsis (Wenden), 7,692.

The census taken in 1930 showed a population of 1,900,045 in Latvia, of which 1,843,877 were Latvian citizens, and 56,168 foreigners (including 21,336 persons without nationality). Of the Latvian citizens 73·42 per cent. were Letts, 12·52 per cent. Russians, 4·97 per cent. Jews, 3·68 per cent. Germans, 3·12 per cent. Poles, 1·36 per cent. Lithuanians, 0·40 per cent. Estonians, 0·45 per cent. other nationalities, and 0·08 per cent. were persons with unknown nationality.

Births, 1933, 34,576; marriages, 16,063; deaths, 26,319; excess of births over deaths, 8,257; divorces, 1,527.

Religion and Education.—The majority of the population in Latvia is Protestant (56·58 per cent.), but in Latgale and one district of Kurzeme there are also many Roman Catholics (23·69 per cent.), while in Riga, Ventspils and south-east of Vidzeme there are a number of Greek Catholics and members of the Orthodox Church (8·93 per cent.).

During the year 1933–34 there were 2,057 elementary schools in Latvia, with 219,551 pupils and 8,556 teachers. Most of these schools were supported by the State or municipal institutions, only 132 being supported by private persons or societies. The State or municipal institutions also supported 84 of the secondary schools in the country, the remaining 54 being supported by private persons or societies. In these 138 secondary schools 2,557 teachers taught 20,167 pupils.

Each national minority has the right to its own schools (elementary and secondary) with its own language of instruction. The State contributes to the maintenance of these schools according to the percentage of inhabitants of the respective national minorities. In 1933–34, instruction was given in elementary schools in the following languages (figures in brackets refer to secondary schools):—Lettish in 1,502 (87) schools, with 163,389 (15,127) pupils and 5,756 (1,719) teachers; national minorities in 535 (56) schools, with 56,162 (5,040) pupils, and 2,800 (838) teachers.

Formerly the University of Dorpat served the whole of the Baltic provinces of Russia, and as Dorpat became an Estonian institution, the Riga Polytechnic was in 1919 raised to be the Latvian University. The number of students is (1933–34) 8,640, and of professors, 382. There are also 77 technical professional schools with 4,923 pupils; a Musical Academy with 295 students and 37 teachers; and an Academy of Arts with 211 students and 20 teachers.

Finance.—Revenue and expenditure for five years are shown as follows:—

	1930-31	1931-32	1932-33	1933-34 [1]	1934-35 [1]
	Lats	Lats	Lats	Lats	Lats
Revenue .	172,594,000	126,735,000	130,110,000	140,712,000	150,952,000
Expenditure .	175,048,000	150,938,000	135,038,000	140,712,000	150,952,000

[1] Budget estimates.

The National Debt of Latvia on April 1, 1934, was as follows:—To United States of America, 7,069,924 dollars; to Great Britain, 1,925,000*l.*; to France, 4,500,000 francs; to the Swedish Match Trust, 6,000,000 dollars. The internal debt amounted to 11,170,000 lats.

Defence.—The standing army numbers 2,200 officers and 23,000 men, organized in four divisions. There are also 550 men in the Air Service organized in 1 regiment. Service is compulsory, beginning at the age of 21, and lasting to the age of 50. Service with the colours has been reduced, according to the law of May 16, 1928, to 12 months in the case of the infantry and 15 months for other arms.

Latvia maintains a coast defence squadron, comprising at present 2 submarines and 4 ships of different types. Military budget, 1933–34, 27,700,000 lats.

Production and Industry.—Latvia is mainly an agricultural country, but an increasing number of people are passing from agricultural to industrial life. In 1933 the principal crops were rye, 637,013 acres, 355,090 metric tons; barley, 455,715 acres, 194,970 metric tons; oats, 757,302 acres, 330,700 metric tons; wheat, 308,750 acres, 183,030 metric tons; potatoes, 257,127 acres, 1,402,560 metric tons; flax, 102,575 acres, 12,400 metric tons (12,320 metric tons linseed). Latvian forest lands,

State and private (4,098,280 acres), produced in 1932-33, 5,959,000 cubic metres of timber (firewood, 4,825,000 cubic metres). On December 31, 1933, there were 3,788 industrial enterprises in Latvia, employing 59,853 hands. The number of workers employed in the principal industries was as follows:—metallurgical, 9,058; chemical, 3,564; textile, 11,133; mineral working, 3,772; woodworking, 9,618; and foodstuffs, 10,758.

Live-stock in 1934: horses, 375,200; cattle, 1,157,600; sheep, 1,208,900; pigs, 686,400.

Latvia does not possess much mineral wealth.

Commerce and Communications.—Latvia has about 340 miles of sea-coast; its 3 principal harbours are Riga, Liepaja, and Ventspils. Three Russian main lines converge on Latvian ports, viz. the Riga–Tsaritsin line, the Ventspils–Moscow line, and the Liepaja–Romni line.

Trade for four years:—

Year	Imports		Exports	
	Metric tons	1,000 Lats	Metric tons	1,000 Lats
1931	1,049,611	177,083	773,587	163,757
1932	733,952	84,576	657,024	96,528
1933	813,408	91,215	954,175	81,526
1934	—	94,700	—	85,500

The commerce for two years was distributed as follows (in thousands of lats):—

	1932		1933	
	Imports	Exports	Imports	Exports
	1,000 Lats	1,000 Lats	1,000 Lats	1,000 Lats
Raw materials and semi-manufactured articles	30,893	29,064	39,308	38,157
Manufactured articles	41,480	33,712	42,939	18,255
Food products	11,148	33,734	7,416	25,112
Cattle	668	18	1,292	2
Precious metals, etc.	387	—	260	—
Total	84,576	96,528	91,215	81,526

The main export articles of Latvia are (1933) timber, 28,280,000 lats; flax, 3,245,000 lats; butter, 21,059,000 lats.

In 1934 the imports (value in thousand lats) came from Germany, 23,200; United Kingdom, 21,400; Belgium, 5,780; Soviet Russia, 2,750; Poland and Danzig, 3,800; United States of America, 6,690. Exports to the United Kingdom, 30,700; Germany, 25,000; Soviet Russia, 1,910; Belgium, 3,490.

In 1933 the principal imports into the United Kingdom from Latvia (according to the Board of Trade Returns) were: sawn timber, 967,796*l.*; sleepers, 236,120*l.*; flax, 230,253*l.*; butter, 487,282*l.* The principal exports to Latvia were iron and steel, 98,557*l.*; herrings, 139,586*l.*; coal, 205,999*l.*

Total trade between Latvia and the United Kingdom for 5 years (according to Board of Trade Returns):—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Latvia into U.K. . .	4,746,797	2,927,537	2,682,735	2,640,792	2,718,638
Exports to Latvia from U.K . .	1,152,046	590,712	590,508	1,001,154	1,166,137
Re-exports to Latvia from U.K. . .	95,360	31,314	44,275	188,355	228,814

On January 1, 1934, there were 107 steamships and motorships of 193,458 tons gross, and 26 sailing vessels of 2,515 tons gross, making a total of 133 vessels of 195,973 tons gross sailing under the Latvian flag. There were also 4 ice-breakers.

In 1933, 2,722 vessels of 1,463,000 tons entered and 2,727 of 1,484,000 tons cleared the ports of Latvia.

To facilitate the transit of goods to and from Russia, the Latvian main lines converging on the ports of Riga and Ventspils have been altered to the Russian gauge, while for Western traffic (Riga–Ostend–Paris line) and internal communications the normal and narrow gauges are used. Of the total length of Latvian railways—1,836 miles on January 1, 1934—1,110 miles were of Russian gauge and 198 miles of the normal gauge. Gross receipts of Latvian railways in 1933 were 29,663,000 lats. and expenditure 29,109,000 lats; 12,327,000 passengers were carried and 2,806,884 tons of freight handled. There were also 769 miles of macadamised high roads. The navigable inland waterways (2,775 miles) carried about 968,087 tons of goods in 1933.

On April 1, 1934, there were 1,415 post offices in the country; length of telegraph line, 2,114 miles; length of telephone lines, 22,652 miles.

Banking and Currency.—The legal tender in Latvia is the *Lat*, equal to one gold franc, and representing ·2903226 grammes of fine gold. Notes of 20, 25, 50, 100 and 500 lats are in circulation, also silver coins of 1, 2 and 5 lats, bronze and nickel coins of 1, 2, 5 santims, and 10, 20, 50 santims respectively. The issue of notes in Latvia is strictly limited to the amount of cover, and notes can be encashed in gold.

On January 1, 1934, there were 16 joint-stock Banks, 30 mutual credit societies and 10 communal credit institutions in Latvia, with an aggregate capital of 36,025,000 lats, and assets totalling 128,144,000 lats. The Bank of Latvia (*Latvijas Banka*) which commenced operations on November 1, 1922, had on January 30, 1933, notes in circulation amounting to 34,905,155 lats; deposits, 91,077,377 lats (including 72,000,798 lats on current account); and gold bullion and coin, 38,010,140 lats.

The metric system has been established by law, but the old Russian system of weights and measures was used until January 1, 1924.

Diplomatic Representatives.

1. Of Latvia in Great Britain.

Envoy and Minister.—Karlis Zarine (appointed July 16, 1933).
First Secretary.—Paul Alberts.
Third Secretary.—Teodors Ansevics.
Agricultural Adviser.—Emils Zolmanis.

There is also a Consulate-General in London, and consular representatives in Belfast, Hull, Swansea, and other towns.

2. OF GREAT BRITAIN IN LATVIA.

Envoy and Minister—E. Monson (appointed 1934), also Minister to Lithuania and Estonia.

First Secretary.—C. J. W. Torr.

Commercial Secretary.—J. P. Trant.

Naval Attaché.—Captain G. C. Muirhead-Gould, D.S.C., R.N.

Military Attaché.—Major R. C. W. G. Firebrace, R.A.

There are consular representatives at Riga and Libau.

LIBERIA.

Constitution and Government.—The Republic of Liberia had its origin in the efforts of several American philanthropic societies to make permanent provision for freed American slaves by establishing them in a colony on the West African coast. In 1822 a settlement was formed on the west coast of Africa near the spot where Monrovia now stands. On July 26, 1847, the State was constituted as the Free and Independent Republic of Liberia. The new State was first recognised by Great Britain and France, and ultimately by other Powers. The Constitution of the Republic is on the model of that of the United States, with important differences. The executive is vested in a President and a Council of 8 Ministers, and the legislative power in a parliament of two Houses, called the Senate and the House of Representatives. The President and the House of Representatives are elected for four years, and the Senate for six years. The President must be at least thirty-five years of age, and have unencumbered real estate

to the value of 2,500 dollars, or 500*l*. Electors must be of negro blood, and owners of land. The natives of the country are not excluded from the franchise, but, except in the centres of civilisation, they take no part in political life. The official language of the Government is English.

President of Liberia.—Edwin *Barclay* (1932–1936).

Liberia is one of the original members of the League of Nations.

Area and Population.—Liberia has about 350 miles of coast line, extending from the British colony of Sierra Leone, on the west, to the French colony of the Ivory Coast on the east, and it stretches inland to a distance, in some places, of about 200 miles. The boundaries were determined by the Anglo-Liberian agreement of 1885 and the Franco-Liberian agreements of 1892 and 1907–10. Early in 1911 an agreement was concluded between the British and Liberian Governments transferring the territory of Kanre-Lahun to Sierra Leone in exchange for a strip of undeveloped territory of about the same area on the south side of Morro River, which now becomes the boundary.

The total area is about 43,000 square miles. The total population is estimated at 1,000,000, all of the African race. Since the organisation of the frontier force the Government has obtained complete control of Northern Liberia and of the Kroo countries in Southern Liberia. The indigenous natives belong in the main to six principal stocks: (1) the Mandingos (Muhammadan), (2) the Gissi; (3) the Gola, (4) the Kpwesi, (5) the Kru negroes and their allies, and (6) the Greboes. The other principal tribes in the Republic are: Vai, Mendi, Belle, Dey, Manoh, Geo, Bassa, Buzzi, Gbandi, Krahn, and Geh.

The Kru tribes are mostly Pagan. The number of Americo-Liberians is estimated at about 12,000. About 60,000 of the coast negroes may be considered civilised. There is a British negro colony of about 500, and there are about 150 Europeans and Americans. The coast region is divided into counties, Bassa, Sino, Maryland, and Grand Cape Mount, each under a Government superintendent, and Montserrado, subdivided into 2 districts, each under a superintendent. Monrovia, the capital, has, including Krutown, an estimated population of 10,000, and is administered as a Federal District by a Municipal Board appointed by the President. It is one of the eleven ports of entry along the 350 miles of coast, the others being Liberian Jene (river port), Robertsport (Cape Mount), Marshall (Junk), Buchanan, River Cess, Greenville (Sinoe), Sasstown, Grand Cess, Harper (Cape Palmas), and Kablaki (river port). Other towns are Royesville, Arthington, Careysburg, Millsburg, Whiteplains, Bopora (native), Rocktown (native), Garraway, Upper Buchanan, Edina, Kakata, Paynesville, Clay Ashland.

Religion Education and Justice.—The Americo-Liberians are all Protestant (Anglican, Presbyterian, Baptist, or Methodist). There are several American missions at work and one French Roman Catholic. The Government educational system is supplemented by mission schools, instruction being given both to American and to native negroes. In the year 1932 there were 172 schools, of which 51 were Government schools and 121 were maintained by missions. The total number of pupils receiving instruction amounted to about 7,000. The Methodist Episcopalians have a college at Monrovia and an agricultural and industrial institute at Kakata; the Government has a college with (1932) 8 professors and 88 students.

A criminal code was enacted in 1900; the customs laws were codified in 1907.

Finance.—The revenue and expenditure for 5 years (in American dollars):—

	1928–29	1929–30	1930–31	1932	1933
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue . .	1,028,123	980,156	482,808	476.368	465,573
Expenditure .	1,098,152	985,554	702,194 [1]	635,080 [2]	382,814

[1] Includes loan charges of 220,002 dollars but does not include prior year's charges.
[2] Includes loan charges of 216,524 dollars but does not include prior year's charges.

The customs duties were for 1928–29, 604,226 dollars; for 1929–30, 461,099 dollars; for 1930–31, 250,549 dollars; for 1932, 236,138 dollars.

In 1927 arrangements were made with the Finance Corporation of America for a loan of 5,000,000 dollars, of which 2,027,700 dollars has been issued. The previous 1912 loan, in which British financial interests preponderated, was paid off from the proceeds of the new loan, which is secured by a first lien on customs revenues and head moneys. The Loan Agreement also provides for financial supervision by American officials. The external bonded debt at the close of the year 1932 was 2,192,000 dollars, on which payments on account of amortization were in arrears to an amount of 94,367 dollars, and on account of interest 133,061 dollars.

The internal floating debt as at December 31, 1932, was approximately 676,000 dollars.

Defence.—For defence every citizen from 16 to 50 years of age capable of bearing arms is liable to serve. The establishment organized on a militia basis numbers 4,000, divided into 7 infantry regiments. There is in addition an enlisted Frontier Force of about 400.

Production, Commerce.—The agricultural, mining, and industrial development of Liberia has scarcely begun. There are forests unworked; but the working of one para rubber plantation has begun, and rubber is being produced. The soil is productive, but cultivation is neglected; cocoa and cotton are produced in small quantities only, and indigenous coffee is the staple product. Piassava fibre, prepared from the raphia palm, palm oil and palm kernels, kola nuts, chillies, beni seed, coffee, anatto seed and rice are also produced. Beeswax is collected, and gum copal is found but is not collected. Tortoiseshell, improperly prepared, is sold in small quantities. In the forests there are rubber vines and trees of 22 species. No survey of the mineral resources of the country has been made by an expert mineralogist, and although iron exists and is worked by the natives, no mineral deposits of sufficient importance to warrant exploitation have yet been found.

The trade for five years was as follows (in dollars):—

—	1928	1929	1930	1931	1932
	Dollars	Dollars	Dollars	Dollars	Dollars
Imports . . .	4,029,506	2,064,440	1,615,454	858,742	637,650
Exports . . .	1,465,768	1,475,356	912,062	679,885	675,312 [1]

[1] Excess of Export values over Import values is caused by the shipment of 70,937 dollars of metallic currency.

The chief imports are cotton goods, spirits, tobacco, building material, galvanised iron, ready-made clothing, and dried and preserved fish. The chief exports in 1932 were coffee (3,439,434 lbs.); piassava fibre (6,865,585 lbs.); palm oil (437,171 gallons); palm kernels (308,761 bushels); cocoa (924,543 lbs.); ivory (7,889 lbs.). Imports in 1932 were chiefly from the United Kingdom (328,982 dollars); United States of America (113,151 dollars); Germany (101,563 dollars); and Holland (32,151 dollars).

According to Board of Trade Returns, the value of the trade between the United Kingdom and Liberia was as follows in five years:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports into U.K. from Liberia	42,767	31,290	14,960	6,523	5,984
Exports of U.K. produce to Liberia . . .	119,575	65,425	82,051	77,808	69,129
Re-exports to Liberia from U.K.	9,699	6,851	4,583	3,912	4,041

Shipping.—In 1933, 538 ships of a tonnage of 1,302,933 entered and cleared. Of these, 168 of a tonnage of 456,243 were British and 192 of a tonnage of 453,809 were German.

Communications.—There are no railways in Liberia, and means of transport are extremely limited. At present there are about 150 miles of road fit for light motor traffic, all of which are in the coastal area. In the interior communication is maintained between villages by tracks, all goods being carried by native porters.

The River St. Paul is navigable for a distance of 25 miles from its mouth for small craft of shallow draft, and a service of motor launches runs between Monrovia and White Plains.

There is cable communication with Europe and America via Dakar, and a wireless station is maintained by the Government at Monrovia. There is no telephone or telegraph service in the country.

Money, Weights, and Measures.—The money chiefly used is British silver, but there is a Liberian coinage in silver and copper. Official accounts are kept in dollars and cents, but commercial accounts are generally in English currency. The Liberian coins are as follows:—Silver, 50-, 25-, and 10-cent pieces; copper, 2- and 1-cent pieces.

Weights and measures are the same as Great Britain and the United States.

The Bank of British West Africa, Ltd., withdrew from Liberia in October 1930; and the Firestone Plantations Company have established a bank at Monrovia under the title of 'United States Trading Company (Banking Department).'

Diplomatic and Consular Representatives.

1. Of Liberia in Great Britain.

Chargé d'Affaires.—Baron R. A. de Lynden.
Consul-General in Liverpool.—H. F. Cooper.

There are Consuls in London, Cardiff, Glasgow, Liverpool, Manchester.

2. Of Great Britain in Liberia.

Chargé d'Affaires and Consul-General.—A. E. Yapp, M.C.

LIECHTENSTEIN.

The Principality of Liechtenstein, lying between the Austrian province of Vorarlberg and the Swiss cantons of St. Gallen and Graubünden, is a sovereign State consisting of the two counties of Schellenberg and Vaduz (formerly immediate fiefs of the Roman Empire). The former in 1699 and the latter in 1712 came into the possession of the house of Liechtenstein and, by diploma of January 23, 1719, granted by the Emperor Karl VI., the two lordships were constituted as the Principality of Liechtenstein. After the Treaty of Pressburg John I., who had succeeded his father, Aloys I., as seventh Prince in 1805, seceded from the Holy Roman Empire on July 12, 1806, and joined the Confederation of the Rhine under the Protectorate of the Emperor, Napoleon I., and after the fall of the French Empire joined the German Confederation June 8, 1815. He was succeeded in 1836 by his son, Aloys II., whose son, John II., in 1858 began his long reign, which lasted until 1929. This Prince, who was of age at his accession, saw the dissolution of the German Confederation in August, 1866, and thereafter maintained the political independence of the Principality.

The Reigning Prince is **Francis I.**, born August 28, 1853; succeeded his brother, February 11, 1929. The reigning family originated in the twelfth century, and traces its descent through free barons who in 1608 became princes of Liechtenstein. The monarchy is hereditary in the male line. The constitution, adopted in October, 1921, provides for a Diet of 15 members elected for four years by direct vote on the basis of universal suffrage and proportional representation. The capital and seat of Government is Vaduz (pop. 1,715). The principality has a High Court. Since February, 1921, Liechtenstein has had the Swiss currency, and since January, 1924, it has been included in the Swiss Customs Union; the posts and telegraphs are administered by Switzerland.

Area, 65 square miles; population, of German origin (Census 1930), 10,213; Catholics, 9,492; Protestants, 253. In 1933 there were 240 births, 73 marriages and 119 deaths. Budget estimates for 1935: revenue, 1,432,790 francs; expenditure, 1,424,157 francs. Public debt on December 31, 1934, 4,383,000 francs. The inhabitants of Liechtenstein since 1867 have not been liable to military service. The Principality has no army (since 1868). The population is in great part agricultural, the chief products of the country being corn, wine, fruit, wood, and marble. The industries are cotton weaving and cotton spinning, leather goods, and pottery. The rearing of cattle, for which the fine alpine pastures are well suited, is highly developed.

Administrator.—Dr. Joseph *Hoop* (appointed August 4, 1928).

LITHUANIA.

(LIETUVA.)

LITHUANIA became a Grand Duchy in the early part of the thirteenth century. In 1386 the Grand Duke Jogaila embraced Christianity and married the Polish Queen Hedvig, thus becoming King of Poland. During the reign of Vytautas (Vitold) the Great (1392–1430) Lithuania reached the zenith of her power and prosperity, her frontiers extending from the Baltic to the Black Sea. After the death of Vytautas the Great, Polish influence gradually increased in Lithuania, and in 1569 the Lithuanians were forced to unite with the Poles at Lublin, the Lithuanians retaining their own treasury, laws, courts of justice, and army. Both countries elected the same king and had a common Seim (parliament).

At the end of the eighteenth century Lithuania fell under Russian rule.

In 1917 a Lithuanian Conference of 214 representatives at Vilna elected a Lithuanian State Council (*Taryba*) and demanded the complete independence of Lithuania. The independence of the Lithuanian State was proclaimed on February 16, 1918.

On December 20, 1922, Lithuania received *de jure* recognition by the Great Powers. Russia had already accorded that recognition in the Treaty of Peace of July 12, 1920.

Constitution and Government.—The constitution adopted by the Constituent Assembly on August 1, 1922, and amended on May 15, 1928, declares that the State of Lithuania is an independent Democratic Republic. The Diet (or *Seimas*) is the exponent of the sovereign power of Lithuania, and makes laws, ratifies treaties with other States, approves the State budget and superintends the execution of the laws. The Executive Power is placed in the hands of the President of the Republic and of the Cabinet of Ministers. The President of the Republic is elected by the people for seven years, and he appoints the Minister-President (Premier), and all

other Ministers, as recommended by the Premier. The President also appoints the higher military and civil officials of the State. In case of the absence or illness of the President, his place is to be taken by the Premier. All the acts of the President must be countersigned by the Premier or the proper Minister. The Cabinet of Ministers is responsible to the Diet and resigns on an expression of a lack of confidence by the latter. The Members of the Diet on entering the Cabinet of Ministers do not cease to be Members of the Diet.

All the citizens of Lithuania, without distinction of sex, nationality or religion, are equal before the law; there are no classes or titles. All citizens are also guaranteed inviolability of person, homes, and correspondence, and freedom of religion, conscience, Press, speech, strikes, assembly and organization.

The Diet of Lithuania is elected every five years by universal, equal, direct and secret suffrage according to the proportional system, the electoral unit being one representative to 50,000 inhabitants.

President of Lithuania.—Antanas *Smetona* (1932–39).

Prime Minister and Minister of Finance.—Juozas *Tubelis* (June 13, 1934).

For administrative purposes the territory of Lithuania is divided into 20 districts, of about 100,000 inhabitants each. The districts are divided into communities, with about 15 communities to each district. National minorities (Jews, Germans, and Poles) enjoy cultural autonomy.

Area and Population.—The Lithuanian Government claims that Lithuania consists of: (1) the whole of the former Russian Province of Kaunas (Kovno); (2) the Province of Vilnius (Vilna), minus the district of Disna and Vileika; (3) a part of the Province of Gardinas (Grodno), north of the Niemen River and the narrow hinterland of the city of Gardinas (Grodno) in the south; (4) the Province of Suvalki minus the southern parts of the districts of Suvalki and Augustovo; (5) part of the Province of Courland between the old German frontier and the Holy Aa (Sventoji) River by the Baltic Sea, and (6) the territory of Klaipeda (Memel).

For the northern and eastern frontier of Lithuania, *see* THE STATESMAN'S YEAR BOOK for 1929, p. 1075.

In the *south* (in the region of the Province of Suvalki) the frontier with Poland has not yet been conclusively agreed upon by Lithuania and Poland. Both Lithuania and Poland lay claim to Vilna, but though the Great Powers (on March 15, 1923) recognized the *de facto* boundary between the two countries as *de jure*, and though the League of Nations has endeavoured to bring about a solution of this problem, no agreement has been reached. The southern part of Lithuania occupied by Poland has an area of about 27,000 sq. kilometres (10,422 sq. miles), with a population of 1,000,000.

The total area of Independent Lithuania (including Memel) is 55,670 sq. kilometres (21,489 sq. miles), and the population (January 1, 1934) 2,451,173.

The Memel territory (area 1,099 square miles, population 149,273, on January 1, 1934), which was detached from Germany by the Treaty of Versailles and at first placed under the control of the conference of ambassadors, who handed it over to Lithuania on February 16, 1923. According to the Memel Convention signed May 8, 1924, between Lithuania on one side and Great Britain, France, Italy and Japan on the other, the Territory of Memel constitutes a unit under the sovereignty of Lithuania, but with a large measure of local autonomy. The port itself is regarded as one of international concern.

The Lithuanians claim that the capital of Lithuania is Vilnius (Vilna), with a population of 214,600 in 1914. Other large towns with their population at January 1, 1934, are: Kaunas (Kovno), seat of the Government, 102,750; Gardinas (Grodno), 61,600; Klaipeda (Memel), 37,523; Siauliai (Shavli), 23,877; and Panevežys (Poneviej), 20,960. Of these cities, Vilna and Grodno are in possession of Poland.

Religion.—In Independent Lithuania, according to the census of 1923, Roman Catholics formed 80·5 per cent., Jews 7·3 per cent., Protestants and Calvinists 9·5 per cent., Greek Orthodox 2·5 per cent. In the Memel Territory Protestants form 91·7 per cent., Roman Catholics 5·3 per cent. In April, 1926, the Vatican decided to declare Lithuania a Church Province, with an Archbishop and four bishops.

Education.—In 1933–34 there were 2,557 primary schools with 4,994 teachers and 266,795 pupils, 51 secondary schools with 422 teachers and 5,348 pupils, 55 gymnasia (high schools) with 994 teachers and 15,433 pupils, and 9 teachers' training colleges with 124 teachers and 762 pupils. In addition to these there are 23 special training schools of higher grade giving commercial, technical, art and music courses, with a total of 3,832 pupils, and 139 special schools of lower grade with 4,720 pupils. The University of Vytautas the Great, at Kovno, which was opened on February 16, 1922, had (1933) 298 professors and teachers and 4,277 students. The academy of agriculture has 41 professors, etc., and 231 students.

Finance.—Revenue and expenditure for 5 years are shown as follows:—

	1929	1930	1931	1932	1933
	Litas	Litas	Litas	Litas	Litas
Revenue . . .	338,541,200	347,694,100	340,085,700	292,080,300	256,862,400
Expenditure . .	269,959,800	320,620,700	335,289,800	278,244,200	249,642,400

During 1933 the largest expenditures were incurred by the following Ministries: Communication, 54 million litas; Agriculture, 38 million litas; and Defence, 49 million litas. The largest source of revenue was derived from indirect taxes (especially customs), which amounted to 66 million litas; from government enterprises (railways, postal service, telephone, telegraph), and indirect taxes (alcohol, playing cards and match monopolies), to the sum of 74 million litas.

On September 1, 1933, the national debt of Lithuania was 136,331,252 litas (13,633,125 dollars). Of this sum 1,979,045 litas (197,904 dollars) were for internal indebtedness, and 134,352,207 litas (13,435,220 dollars) foreign obligations. The larger foreign creditors in 1932 were: the United States, 6,386,227 dollars; Great Britain, 120,209 dollars; and the Swedish Match Syndicate, 4,129,032 dollars.

Defence.—Military service is compulsory, beginning at the age of 21. Service in the active army is for 1½ years. The establishment of the active army in 1934 was 1,463 officers and 18,003 men, organized in 3 divisions: cavalry brigade and technical services. The air force is organised in 7 flights and numbers 770. There is in addition an auxiliary force of about 52,000 men.

Production.—Lithuania is an agricultural country, and preponderantly rural in character. Of the total population, 76·7 per cent. is engaged in

agriculture, 10 per cent. in commerce, industry and communications. The resources of the country consist of timber and agricultural produce. Of the total area, 47·2 per cent. is arable land, 22·2 per cent. meadow and pasture land, 18·6 per cent. forests, and 12·0 per cent. unproductive lands. In 1932 in the agricultural territory of Lithuania, 5,567,000 hectares (about 13,750,490 acres), there was produced (in metric tons) rye, 572,070; wheat, 256,460; barley, 238,950; oats, 356,380; potatoes, 1,918,800; flax fibre, 14,262.

Lithuania is made up of small and middle-sized farms. Approximately half of the available agricultural area is made up of farms from 5 to 23 hectares. The dividing up of the land into smaller holdings has promoted a lively development of livestock raising, dairying and agricultural co-operative societies.

In 1933 the country possessed 586,673 horses, 1,314,074 cattle, 1,321,619 sheep, and 1,305,824 pigs. Poultry farming is also an important occupation.

Forests cover 1,034,143 hectares (about 2,554,333 acres). 70 per cent. of the forests consist of needle-bearing trees, mostly pines, and the remainder of leaf-bearing trees. In 1930, about 90,000 tons of peat were produced.

In 1933 there were 1,136 industrial establishments (with not less than 5 working persons) with 25,131 working persons. The values of the production of principal commodities in 1933 were: meat and fish, 66,651,000 litas; manufactured timber, 16,657,000 litas; tissues and yarns, 18,891,000 litas; machines and metallic wares, 11,101,000 litas; leather, 9,027,000 litas.

Commerce.—Trade for five years:—

	1930	1931	1932	1933	1934
	Litas	Litas	Litas	Litas	Litas
Imports . . .	312,415,200	277,959,100	166,953,500	142,176,200	138,700 000
Exports . . .	333,738,900	273,119,100	189,125,800	160,227,400	147,200,000

In 1933, meat exports amounted to 53,400,000 litas; butter, 22,900,000 litas; cellulose, 15,800,000 litas; pigs, 2,700,000 litas. Other items of export were timber, flax and eggs. In 1933 33 per cent. of the exports were to Germany, 45 per cent. to Great Britain and 3 per cent. to Latvia.

The principal items of import in 1933 were: cotton goods, 19,700,000 litas; woollen goods, 7,900,000 litas; coal, 8,400,000 litas; sugar, 1,000,000 litas; yarns, fertilizer, iron machinery and cement. Of the total imports 36 per cent. came from Germany, 17 per cent. from Great Britain, 6 per cent. from Czechoslovakia and 3 per cent. from the United States.

Total trade between Lithuania and the United Kingdom for five years (according to Board of Trade Returns):—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Lithuania into United Kingdom . . .	791,015	1,487,692	1,882,105	1,967,392	1,854,261
Exports to Lithuania from United Kingdom . . .	367,708	300,866	392,575	658,726	1,069,820
Re-exports to Lithuania from United Kingdom . . .	30,381	5,968	16,337	31,389	30,186

Shipping.—In 1933, 1,069 vessels of 1,068,600 tons entered and 1,088 vessels of 1,071,200 tons cleared the port of Memel.

Internal Communications.—On December 31, 1933, the total length of railways was 1,856 kilometers (1,152 miles), of which 1,283 kilometers (797 miles) were broad gauge lines.

There are 31,322 kilometers (19,451 miles) of roads in the country, while of the waterways those navigable for steamboats extend to 481 kilometers (301 miles); for rafts to 2,000 kilometers (1,242 miles); total, 2,586 kilometers (1,605 miles). The river Niemen is navigable for about 270 days in the year; good for floating, 1,977 km. (1,234 miles).

Banking and Currency.—By a law promulgated on August 16, 1922, a national currency, based on the gold standard, with the *Litas* as unit, was introduced to replace the Ost mark, Ost rouble, and German mark hitherto in circulation but now withdrawn. The litas contain 0·150462 grammes of pure gold, and is equivalent to a tenth of the American gold dollar. The par of exchange with the gold pound sterling is 48·66 litas. There are no gold coins in circulation, but a 50-litas piece weighing 8·3592 grammes ·900 fine is provided for in the currency law. Silver coins in circulation are 5, 2 and 1 litas, and there are also a number of subsidiary copper-aluminium coins ranging from 50 centas to 1 centa. The Bank of Lithuania (*Lietuvos Bankas*) was established in August, 1922, on joint-stock principles, 50 per cent. of the shares being held by the State and the balance being available for private subscription. The Bank's capital-stock is 12,000,000 litas. The Bank enjoys during twenty years the sole right of issuing bank-notes. Although under the law the bank-note issue calls for a gold cover of one-third, yet in practice the Government has decided that the actual security must represent 100 per cent. in the form either of gold or stable currencies backed by gold. On February 15, 1934, the bank-notes in circulation amounted to 85,091,000 litas, silver coin and bullion, 55,714,000 litas. The Land Bank, with a paid-up capital of 50,000,000 litas, is under the control of the Government, and grants agricultural credits to farmers and agricultural co-operative societies. Lithuania has 13 joint stock banks, the capital of which on January 1, 1934, reached 92,500,000 litas. Deposits in all credit institutions on the same date amounted to 278,977,400 litas and loans and special accounts 462,710,500 litas.

The weights and measures are of the metric system.

Diplomatic and Consular Representatives.

1. Of Lithuania in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Bronius K. Balutis (appointed June 1, 1934).

First Secretary.—Joseph Kajeckas.

Second Secretary.—Jonas Zmuidzinas.

Agricultural Adviser.—Kazys Gineitis.

2. Of Great Britain in Lithuania.

Envoy and Minister.—E. Monson (appointed 1934; also Minister to Latvia and Estonia, residing at Riga).

Consul.—T. H. Preston, O.B.E.

LUXEMBURG.

Reigning Grand Duchess.—Charlotte, born January 23, 1896, was the daughter of William, Grand Duke of Luxemburg, Duke of Nassau (died February 25, 1912) and of Marie-Anne, Princess of Braganza, born July 13, 1861, succeeded on the abdication of her sister *Marie-Adelaide*, on January 9, 1919; married to Prince Felix of Bourbon-Parma on November 6, 1919. *Offspring*:—Prince *Jean*, born January 5, 1921, Princess *Elisabeth*, born December 22, 1922, Princess *Marie-Adelaide*, born May 21, 1924, Princess *Marie-Gabrielle*, born August 2, 1925, Prince *Charles*, born August 7, 1927, and Princess *Alix*, born August 24, 1929. Sisters of the Grand Duchess:—Princess *Marie-Adelaide*, born June 14, 1894, died January 24, 1924; Princess *Hilda*, born February 15, 1897; Princess *Antoinette*, born October 7 1899; Princess *Elisabeth*, born March 7, 1901; Princess *Sophie*, born February 14, 1902.

The early history of Luxemburg may be divided into four periods, viz. from 963 to 1443, when the country was part of the Holy Roman Empire; from 1443 to 1506, the Burgundian period; from 1506 to 1714, the Spanish period; and from 1714 to 1795, the Austrian period. From 1795 to 1815 the Duchy was French. By the Treaty of Vienna it was constituted a Grand Duchy and awarded to William I., King of the Netherlands, although it entered the German Confederation June 8, 1815, and its capital was constituted a Federal Fortress and occupied by a Prussian garrison. The Belgian Revolution of August, 1830, put an end to the authority of the

King-Grand Duke everywhere except in the town of Luxembourg, where the Prussians upheld it until by the Treaty of April 19, 1839, he recognised the independence of Belgium and, by ceding 1,706 sq. miles of the Grand Duchy, which was formed into the Belgian Province of Luxembourg, recovered the rest. William I. abdicated October 10, 1840, and died December 12, 1893. His son and successor, William II., under whom the Grand Duchy entered the German Customs Union in 1842, died March 17, 1849, and was succeeded by the last King-Grand Duke, William III., in whose reign the Grand Duchy was neutralised by the Treaty of London May 11, 1867, in consequence of which the Prussian garrison withdrew from Luxembourg and its fortifications were dismantled. On his death, December 4, 1890, the Grand Duchy passed to his heir male while the kingdom of the Netherlands was inherited by his daughter, Queen Wilhelmina. The new Grand Duke, Adolphus, who had to go back to the 13th century to trace his agnatic kinship with his predecessor, had been Duke of Nassau in Germany from 1839 until September 20, 1866, when his Duchy had been annexed by Prussia. He died November 17, 1905, and was succeeded by his son, William IV., who made a family statute April 16, 1907, enabling his daughters to succeed to the Throne, which had hitherto been subject to the Salic Law. The Grand Duke, William IV., died February 25, 1912, and was succeeded by his daughter, Marie Adelaide, who saw her dominions overrun by the Germans in 1914. The Grand Duchess abdicated January 15, 1919, and entered a convent in Italy, where she died January 24, 1924. She was succeeded by her sister, the Grand Duchess Charlotte.

On September 28, 1919, a Referendum was taken in Luxemburg to decide on the political and economic future of the country. Those entitled to vote were men and women of 21 (voters on the register, 127,775; actual voters, 90,984). The voting resulted as follows:—for the reigning Grand Duchess, 66,811; for the continuance of the Nassau-Braganza dynasty under another Grand Duchess, 1,286; for another dynasty, 889; for a Republic, 16,885; for an economic union with France, 60,133; for an economic union with Belgium, 22,242. But France refused in favour of Belgium to consider the possibility of an economic union, and negotiations to this end between Belgium and Luxemburg were concluded on December 22, 1921, when the Chamber of the Grand Duchy passed a Bill for the economic union between Belgium and Luxemburg. The Agreement, which is for 50 years, provides for the disappearance of the customs barrier between the two countries and the use of Belgian currency in the Grand Duchy. It came into force on May 1, 1922.

Constitution and Government.—The Constitution now in force was proclaimed on October 17, 1868; in 1919 some important changes were introduced into it, viz. the Constituent Assembly decided that the sovereign power resided in the Nation (Article 32); that all secret treaties were abolished (Article 37); that the deputies are to be elected on the basis of universal suffrage, pure and simple, by scrutiny of lists, according to the rules of proportional representation and in conformity with the principle of the smallest electoral quotient (Article 52).

The country is divided into four electoral districts: the South, North, Centre, and East. In order to qualify as an elector it is necessary to be a citizen (male or female) of Luxemburg and to have completed 21 years of age; to be eligible for election it is necessary to have completed 25 years of age and to fulfil the conditions required for active electorate. The electors may be called upon to record their votes by means of a referendum or plebiscite in all cases and under the conditions to be determined by law (Article 52).

The Members of the Chamber of Deputies are elected for 6 years; half are renewed every 3 years (Article 56); they receive a salary which may not surpass 4,000 francs per annum; they are also entitled to receive a travelling allowance (Article 75).

The Chamber of Deputies consists of 54 members. The state of the parties (1934) is as follows:—Catholics, 25; Radical Liberals, 7; Labour Party, 4; Independents, 4; Communists, 1; other Parties, 3.

The head of the State takes part in the legislative power, exercises the executive power, and has a certain part in the judicial power. The Constitution leaves to the sovereign the right to organise the Government, which consists of a Minister of State, who is President of the Government, and of at least three Directors-General. The Cabinet, appointed July, 1926, is composed as follows:—

Minister of State and President of Government.—M. *Bech.*
Director-General of Justice and Home Affairs.—M. *Dumont.*
Director-General of Finance and Social Welfare.—M. *Dupong.*
Director-General of Public Works, Trade and Industry.—M. *Schmit.*

Besides the Government there is a Council of State. It deliberates on proposed laws and Bills, on amendments that might be proposed; it also gives administrative decisions and expresses its opinion regarding any other question referred to it by the Grand Duke or by the Law. The Council of State is composed of 15 members chosen for life by the sovereign, who also chooses a president among them each year.

Area and Population.—Luxemburg has an area of 999 square miles, and a population (December 31, 1930) of 299,782. The population is Catholic, save 4,651 Protestants, 2,242 Jews, and 509 belonging to other sects. The chief town, Luxemburg, has 53,791 (December 31, 1930) inhabitants. Other towns are Esch-Alzette, the centre of the mining district, 29,429 inhabitants; Differdange, 17,567 inhabitants; Dudelange, 14,657 inhabitants; and Petange, 11,003 inhabitants.

In 1933 there were 4,895 births, 3,725 deaths, and 2,156 marriages.

Education.—Education is compulsory for all children between the ages of 6 and 13. In 1932 the primary schools had 1,024 teachers (516 women); there are 24 higher elementary schools, 3 classical schools, 2 commercial and industrial colleges, 2 girls' colleges, 4 technical schools, 2 teachers' training colleges (male and female), a mining school, a college of agriculture, and an academy of music.

Finance.—Revenue and expenditure (including extraordinary) for five years (in francs):—

—	1931	1932	1933	1934[1]	1935[1]
Revenue	504,991,319	340,913,575	330,031,287	371,559,416	317,694,094
Expenditure . . .	453,727,527	393,937,178	334,220,141	338,191,735	315,257,567

[1] Estimates.

Consolidated debt on December 31, 1934, amounted to 659,699,926 francs, floating debt to 120,810,980 francs.

The armed forces of the State number 250 men; and the police 180 men.

Production and Industry.—Agriculture is carried on by about 90,000 of the population (about 32 per cent.); 450,000 acres were under cultivation in 1933. The principal crops are oats and potatoes.

According to the latest census (December 1, 1931), the country possesses 16,967 horses, 98,901 head of cattle, 152,802 pigs (June 9, 1934), 7,733 sheep, and 5,046 goats.

The mining and metallurgical industries are the most important. The following table shows production and value for five years:—

Year	Iron ore	Pig iron	Steel	Value of iron ore	Value of cast iron	Value of steel
	metric tons	metric tons	metric tons	francs	francs	francs
1930 .	6,649,372	2,472,908	2,269,892	156,615,796	1,200,416,038	1,411,187,143
1931 .	4,764,926	2,053,098	2,034,952	109,926,843	781,498,272	910,104,104
1932 .	3,312,618	1,960,190	1,955,574	65,163,420	498,232,124	605,582,043
1933 .	3,369,861	1,887,538	1,844,838	—	—	—
1934 .	3,828,398	1,955,258	1,932,377	—	—	—

The number of blast furnaces in 1932 was 46, employing 3,349 workers; the wages paid being 40,761,299 francs. There were 7 steelworks, and the number of workers was 1,912 in 1932. On January 1, 1935, there were 21 blast furnaces in use out of a total of 45.

Communications.—In 1932, there were 1,297 miles of State roads and 1,330 miles of local roads. In 1932 there were 337 miles of railway (246 miles normal gauge and 91 miles secondary gauge), and 801 miles of telegraph line with 2,027 miles of wire, and 457 telegraph offices. There were also 50 telephone systems with 1,467 miles of line and 32,573 miles of wire. In 1932 there were 141 post-offices, through which there passed: inland mail: 4,781,400 letters and post-cards, 23,687,092 pieces of printed matter and newspapers; foreign mail: 16,388,964 pieces of mail matter.

Currency.—According to a law of December 19, 1929, official currency is the Luxemburg franc containing the same weight of fine gold as the Belgian franc. Belgian banknotes are received in payment in the Grand-Duchy at par with Luxemburg notes. On January 1, 1933, there were 177,987 depositors in the State Savings Bank, with a total of 593,098,277 francs to their credit.

Diplomatic Representatives.

1. Of Luxemburg in Great Britain.

Chargé d'Affaires.—Vacant (March, 1935).
Consul-General (honorary).—Bernard Clasen.

2. Of Great Britain in Luxemburg.

Envoy Extraordinary and Minister Plenipotentiary.—Sir Esmond Ovey, K.C.M.G., M.V.O. (British Ambassador at Brussels). Appointed March 19, 1934.
Consul.—F. P. List.

MEXICO.

(REPÚBLICA MEXICANA.)

Constitution and Government.

MEXICO's history falls into three epochs. She was annexed to the Spanish Crown by conquest in 1521, and for three centuries was governed by Spain through 62 Viceroys, from Antonio de Mendoza (1535–1550) to Juan O'Donojú (1821–1822). From 1822 to 1911 was the second epoch, covering nearly a century of national existence and abounding in movements and events shaping the national life. After three quarters of a century marked by stormy events (*see* STATESMAN'S YEAR-BOOK, 1928, p. 1099) the country settled down in 1876 to a long and quiet régime under the presidency of General Don Porfirio Diaz (died July 2, 1915), who ruled the country with the exception of four years (1880–4, General Manuel González) until May 25, 1911, when he presented his resignation to Congress. Then began the third or revolutionary epoch, commencing with *coups d'état* and civil war and culminating in bold social and economic experiments. The names of the Presidents are shown in the following table .—

Gen. Don Porfirio Diaz	Dec. 1, 1884—May 25, 1911.[1]
Don Francisco de la Barra (Provisional).	May 26, 1911—Nov. 1, 1911.
Don Francisco Indalecio Madero	Nov. 1, 1911—Feb. 19, 1913.[1]
Don Pedro Lascurain (Provisional)	Feb. 19, 1913—Feb. 19, 1913.[1]
Gen. Don Victoriano de la Huerta (Provisional)	Feb 19, 1913—July 15, 1913.[2]
Don Francisco Carbajal (Provisional)	July 15, 1914—Aug. 13, 1914.[2]
(Period of disputed succession.)	
Don Venustiano Carranza ('First Chief')	Aug. 20, 1914—Nov. 24, 1914.
Don Eulalio Martin Gutierrez (Provisional)	Nov. 10, 1914—Jan. 16, 1915.
Gen. Don Roque González Garza (Provisional)	Jan. 16, 1915—June 9, 1915.
Don Francisco Lagos Cházaro (Provisional)	July 31, 1915—Oct. 1915.
Don Venustiano Carranza (Provisional)	Oct. 1915—Mar 11, 1917.
Don Venustiano Carranza	Nov. 11, 1917—May 21, 1920.[2]
Don Adolfo de la Huerta (Provisional)	May 25, 1920—Nov. 30, 1920.
Gen. Don Alvaro Obregón	Dec. 1, 1920—Nov. 30, 1924.
Gen. Don Plutarco Elías Calles	Dec. 1, 1924—Nov. 30, 1928.
Owing to the assassination, on July 17, 1928, of General Obregon, the President-elect, a Provisional President took office.	
Don Emilio Portes Gil (Provisional)	Dec. 1, 1928—Feb. 4, 1930.
Don Pascual Ortiz Rubio	Feb 5, 1930—Sept. 3, 1932.[1]
Gen. Don. Abelardo Rodríguez	Sept. 4, 1932 – Nov. 30, 1934.

[1] Resigned. [2] Assassinated.

President.—General Lázaro *Cárdenas*. Assumed office December 1, 1934, to serve until November 30, 1940.

A new Constitution, amending the Constitution of 1857, was promulgated on February 5, 1917; it has been amended in 1929 and 1933. By its terms Mexico is declared a federative republic, divided into States, each

of which has a right to manage its own local affairs, while the whole is bound together in the usual federal system.

Congress consists of a Chamber of Deputies (170 members) and a Senate. Deputies are elected for three years by universal suffrage at the rate of one member for 100,000 inhabitants. The Senate consists of fifty-eight members, two for each State and the Federal District, elected for six years. Senators and Deputies are ineligible for re-election until another term has elapsed. Congress sits from September 1 to December 31. During the recess there is a Permanent Committee consisting of fourteen Senators and fifteen Representatives appointed by the respective Houses.

The President is elected by direct popular vote in a general election, and holds office for six years. Failing the President, Congress acts as an electoral college for the election of a successor. The administration is carried on under the direction of the President and a Council formed by eight Secretaries of State (Foreign Affairs, Interior, Finance and Public Credit, War and Marine, Communications and Public Works, Agriculture and Development, Education, and National Economy), and three Departments of State (Manufacture of State Supplies, Labour, and Public Health).

Local Government.

Mexico is divided into twenty-eight States, one Federal District (comprising Mexico City and 11 surrounding villages), and two Territories, occupying the peninsula of Lower California. Each State has its own constitution, government, taxes, and laws; but inter-State customs duties are not permitted. Each State has its governor, legislature, and judicial officers popularly elected under rules similar to those of the Federation. All the States must publish and enforce laws issued by the Federal Government. The Federal District is governed by a Chief of the Department of the Federal District appointed by the President who also appoints the Governors of the Territories.

Area and Population.

Mexico is situated between the parallels of 14°33′ and 32°43′ north, and 86°48′ and 117°8′ west, and comprises, according to Mexican estimates, 763,944 square miles, though English geographers compute it as 767,198 square miles, and German authorities as 767,290 square miles.

The population at the census of May 15, 1930, was 16,553,398, an increase of 2,218,618 or 15·48 per cent. since 1921; density was 21·67 persons per square mile; census results are shown in the following table. The capitals of the States and territories are in brackets.

States and Territories	Area, in square miles	Census Population, 1930		
		Males	Females	Total
Aguascalientes (Aguascalientes)	2,499	64,516	68,384	132,900
Baja California, N. District (Mexicali)	27,653	27,909	20,418	48,327
Baja California, S. District (La Paz)	27,976	23,863	23,226	47,089
Campeche (Campeche)	19,670	42,068	42,562	84,630
Chiapas (Tuxtla Gutiérrez)	28,729	264,595	265,388	529,983
Chihuahua (Chihuahua)	94,822	246,098	245,694	491,792
Coahuila (Saltillo)	58,062	217,953	218,472	436,425
Colima (Colima)	2,009	29,402	32,521	61,923
Distrito Federal (México City)	573	559,372	670,204	1,229,576
Durango (Durango)	42,272	202,950	201,414	404,364

States and Territories	Area, in square miles	Census Population, 1930		
		Males	Females	Total
Guanajuato (Guanajuato)	11,864	483,541	504,260	987,801
Guerrero (Chilpancingo)	24,885	314,563	327,127	641,690

Yucatán (Mérida)	23,926	193,999	192,097	386,096
Zacatecas (Zacatecas)	28,122	226,833	232,214	459,047
Federal Islands	2,114	—	—	—
Grand Total	763,944	8,119,004	8,433,718	16,552,722

Preliminary figures show that the population in 1930, 4,620,880 were Indian, 9,040,590 of mixed race, 2,444,466 pure white, 140,094 of unknown racial origin, and 159,876 foreigners. Urban population was 33·47 per cent. of the total. The language is Spanish.

The chief cities, with population at the census of 1930, are :—Mexico City (capital), 960,905 (with suburbs annexed in 1931, 1,029,068); Guadalajara, 184,826; Monterey, 137,388; Puebla, 122,914; Mérida, 110,183; San Luis Potosí, 91,883; León, 99,457; Tampico, 70,183; Veracruz, 71,883; Torreón, 74,906; Aguascalientes, 82,184; Chihuahua, 61,526; Saltillo, 66,609; Pachuca, 47,706; Toluca, 89,895; Morelia, 65,548; Ciudad Juárez, 43,138; Durango, 56,236; Culiacan, 71,348; Jalapa, 40,246; Querétaro, 76,051.

Movement of population for 5 years :—

Year	Marriages	Births	Deaths	Migration	
				Entered	Departed
1929	81,715	634,897	437,303	114,316	60,972
1930	100,724	819,814	441,717	114,965	51,592
1931	99,880	738,399	437,038	185,613	59,980
1932	95,390[1]	742,379[1]	432,478	135,248	59,257
1933	—	—	—	95,934	62,174

[1] Preliminary.

Religion, Education, and Justice.

The prevailing religion is the Roman Catholic (7 archbishops and 23 bishops), but by the Constitution of 1857, the Church was separated from the State, and the Constitution of 1917 provided strict regulation of this and

all other religions. No ecclesiastical body may acquire landed property. Since 1917 the property of the Church has been held to belong to the State. In 1926 all foreign priests were expelled, and in June, 1931, the Papal Delegate.

Primary education is free and compulsory, and, according to the Constitution of 1917, secular in all official educational establishments. Clergy are forbidden to set up primary schools. In the Federal District and in the Territories education is controlled by the National Government; elsewhere by the State authorities. The census of 1930 showed 59·26 per cent. of those over 10 years old to be illiterate; in the Federal District, 23·06 per cent. There are 8 universities; two in the Federal District and one each in Jalisco, Michoacáan, Nuevo León (1933), San Luis Potosí, Veracruz, and Yucatán. Of these the most important is the National University at Mexico City, re-organised in 1910, and with full autonomy granted in 1929; it had 7,273 students in 1929. The National University of the South-east, established at Mérida (Yucatán) in 1922, had 1,011 students; University of Guadalajara (founded in 1792, closed 1860, and reopened in 1925), 602. In 1931 there were 19,523 schools of all grades in the country of which 7,012 were supported by the Federal Government, 8,829 by State and municipal governments and 3,682 were private. These included 421 kindergartens, 13,210 rural schools, 5,369 primary, 108 secondary, 238 technical, industrial and commercial, 75 teachers' colleges, 73 other professional schools and 29 art schools; total enrolment, 1,915,419; number of teachers, 44,501. Total expenditures by the Federal Government, States and municipalities, 1931, were 62,751,000 pesos. Ranches, mills, mines and other concerns maintain schools for employees and their children.

Magistrates of the various Courts are appointed by Congress for life. They include the Supreme Court with 16 judges, nine Circuit Courts with 9 judges, and District Courts with 44 judges. The Federal District has a Higher Court of Justice composed of 22 magistrates and 4 supernumeraries. The new Penal Code of January 1, 1930, abolished the death penalty, except for the Army, and set up a Commission of alienists and other specialists, in place of the Courts, to pass on criminal cases; there is no appeal from their recommendations as to the proper treatment. Thus sentences are indeterminate. This Code applies to the Federal District and to such States as adopt it.

Federal Finance.

The ordinary receipts and expenditure for five years (1 gold peso = 50 cents, U.S. in 1930; thereafter the unit is the silver peso = 35.5 cents in 1931, 31.8 cents in 1932, and 28.1 cents in 1933):—

	1931	1932	1933	1934	1935
	Pesos	Pesos	Pesos	Pesos	Pesos
Revenue	221,689,969	197,776,549	222,900,681	274,439,430	275,800,000
Expenditure	231,054,495	226,573,546	233,176,468	—	275,795,000

[1] Budget estimate.

The funded debt (in default since 1914 and allowing for payments of 75,000,000 pesos between 1923 and 1927) stood in 1933 at: Federal debt (mainly external), 923,552,970 pesos; National Railways, guaranteed by the Government, 773,939,248 pesos; internal, about 100,000,000 pesos.

Congress in January, 1932, ratified an agreement reached December 22, 1931, with the International Committee of Bankers by which 'the foreign debt totalling 274,000,000 dollars, the principal covering 15 bond issues since 1885, will be refunded by a single issue totalling 267,419,241 dollars at

5 per cent. interest, which will be guaranteed by import and export duties. Payments which were to have begun not later than January 1, 1934, have been postponed.

Defence.

Every citizen is compelled to serve in the active army or in the National Guard. Supreme command is vested in the President, exercised through the Secretary for War. The active army in 1933 consisted of 52 battalions of infantry, 75 regiments of cavalry, 2 regiments of military police, 2 marine corps, 3 regiments of artillery and 3 detached companies. Infantry strength, 2,538 officers and 23,608 men; cavalry, 4,074 officers and 19,235 men; artillery, 454 officers and 1,372 men. Total strength, 58,262 officers and other ranks. Military education is provided at a military college and in officers' training schools, and is compulsory in the colleges. To combat illiteracy in the Army, 165 regimental schools have been established. The air force comprises 2 regiments each of 3 squadrons.

The Navy, which is little more than a police force, consists of a coast defence vessel *El Anáhuac* of 3,162 tons, purchased from Brazil in 1924, the gunboats *Bravo* and *Agua Prieta*, the armed transport *Progreso*, and some smaller vessels. Five gunboats and 10 patrol vessels are under construction in Spain.

Production and Industry.

Mexico is well suited for agriculture. In the tropical regions, in the mountain valleys, and on the great central plateau are millions of acres of virgin soil and millions more which have been barely skimmed by the antiquated methods of agriculture in vogue. Census of 1930 showed 4,015,068 acres under irrigation, of which 350,196 acres (April 30, 1934) have been created under the Federal program of 1926; up to June 30, 1933, 547,192 acres of irrigated land had been delivered to villages as 'ejidal' or communal lands. Wheat, cotton, garbanzos, sugar, tomatoes and vegetables are grown principally on irrigated land.

Cultivated lands, 24,000,000 acres (about 5 per cent. of the total area); available for cultivation, 73,000,000 acres; pastoral lands, 146,000,000 acres; forest lands, 43,933,200 acres. Number of farms, 1931, about 600,000. Up to June 30, 1930, 18,328,382 acres of public and confiscated lands had been distributed to families in accordance with the agrarian laws, which makes the rural village the unit for holding land in common. Estates in excess of 2,000 acres are being broken up. Principal products in 1932 were maize (1,973,468 metric tons), rice (72,361 tons), sugar (187,500 metric tons), henequen (83,930 tons in 1931), wheat (262,853 tons), coffee (700,000 bags), beans (131,840 tons), chickpeas (43,300 tons), tomatoes, tobacco, alfalfa (1,648,534 tons). The Yucatán peninsula produces about 50 per cent. of the world's supply of henequen; plantations are almost wholly Mexican-owned. Banana production started in 1928 in the Gulf Coast region near Tampico. The west coast grows vegetables for the United States and Canada. The cotton production, 1932. was 22,015 tons.

Timber lands are estimated to extend over 25,000,000 acres and to contain pine, spruce, cedar, mahogany, logwood, and rosewood. A new industry is the extraction of rubber from the guayule bush which flourishes in the arid regions.

Live-stock in May, 1930: Cattle, 10,082,958; horses, 1,887,478; mules, 751,343; donkeys, 2,159,734; sheep, 3,673,887; goats, 6,544,129; and pigs, 3,698,233.

The chief Mexican oil-fields may be grouped in five districts, controlled mainly by 3 big companies; fields covered by 1,186 concessions on January

1, 1930, occupied 30,866,894 acres. Total output (1933) since first well was sunk in 1901, 1,699,262,008 barrels.

Petroleum output follows: In 1931, 33,038,565 barrels; in 1932, 32,802,285 barrels; in 1933, 33,430,000 barrels. Of the 1933 output, 20,834,000 barrels were exported, against 22,588,000 barrels in 1932. There are 3,002 storage tanks with a total capacity of 120,000,000 barrels. Mexico has 16 petroleum refineries, including the two largest in the world, with total daily capacity of 312,129 barrels.

Mining is the principal industry in Mexico, but practically 97 per cent. of the 31,000 mining properties are foreign-owned. Of the annual output, measured in pesos, probably less than 10 per cent. is Mexican-owned. Concessions operated in 1928 numbered 17,355. Nearly all the mines yield silver; output is about 40 per cent. of world production.

Coal is produced only in the State of Coahuila (about 1,000,000 tons per annum). Opals are mined in Querétaro.

The following table shows the quantities of mineral products for three years :—

Metals	1931	1932	1933
	Kilos	Kilos	Kilos
Gold	19,378	18,234	19,856
Silver	2,676,966	2,170,306	2,118,000
Copper	54,211,646	35,212,781	39,825,000
Lead	226,780,338	137,325,487	118,693,000
Zinc	120,289,202	87,844,646	89,339,000
Antimony	5,442,849	1,735,482	1,950,000
Mercury	251,373	252,731	154,390
Arsenic	6,508,467	3,966,968	4,697,000
Amorphous graphite	3,121,864	2,045,135	2,685,000

The industrial census of 1929 showed 48,850 manufacturing establishments with capital of 979,529,483 pesos; number of employees, 318,763; materials used, domestic, 244,453,538 pesos; foreign, 69,751,638 pesos; value of output, 900,332,923 pesos. Food products led in importance, with 14,530 establishments, employing 99,222 persons, with output of 269,761,453 pesos, consuming materials worth 121,791,977 pesos. There were 138 tobacco factories, 158 cotton textile factories, 31 woollen mills, and 89 small iron foundries, producing for local consumption about 50,000 tons annually. There are more than 900 electric power plants, with combined capacity exceeding 700,000 horse power.

Commerce.

The trade of Mexico for 5 years is shown as follows (at par peso = 50 cents, U.S.) :—

	1929	1930	1931	1932	1933
	Pesos	Pesos	Pesos	Pesos	Pesos
Imports	382,247,637	350,173,416	216,585,416	180,912,211	244,559,000
Exports	590,658,603	458,674,489	399,711,314	304,697,117	364,967,000

Of total imports of 244,475,056 pesos in 1933, 146,544,913 (60 per cent.) came from the United States, 29,263,691 from Germany, 21,752,564 from Great Britain, and 16,481,220 from France.

Mineral exports average about 62 per cent. of the total.

The principal articles of commerce between the United Kingdom and

Mexico for 1933 (according to Board of Trade Returns) were as follows:—Imports from Mexico: petroleum spirit, 584,905*l.*; fuel oil, 549,997*l.*; lamp oil, 145,455*l.*; lubricating oil, 192,845*l.* Exports to Mexico: cotton goods, 276,555*l.*; chemicals, 78,187*l.*; machinery, 191,018*l.*; iron and steel, 417,764*l.*

Total trade between Mexico and the United Kingdom for 5 years (according to Board of Trade Returns):—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Mexico to U. Kingdom	2,886,360	2,397,003	2,430,449	2,513,749	3,094,725
Exports to Mexico from U. Kingdom	2,433,312	943,004	1,088,669	1,420,116	1,583,233
Re-exports to Mexico from U. Kingdom	29,893	35,346	18,757	14,776	16,351

Shipping and Communications.

The most important ports are Vera Cruz and Tampico, both on the Gulf of Mexico. In 1933, 11,971 vessels entered and cleared at all the ports. Merchant shipping, 1934, 67 vessels of 53,804 tons.

In 1909 the main railway lines of Mexico were united in a Government corporation —The National Railways of Mexico—which owned (1933) 15,363 miles. There were also 3,925 miles operated by the various States. Road-building is being pushed in order to invite tourist traffic, especially on the new highway (770 miles) between Mexico City and Laredo, on the American border. Total mileage, of uneven character, is 62,137 miles, of which 380 miles are surfaced. Motor cars, 1934, 86,560.

On December 31, 1932, the Federal telegraph and telephone system had 752 offices and 24,106 miles of line. Systems belonging to individual States and private companies had 1,076 offices and 15,328 miles of line. Number of telephone instruments, 101,208. Mexican Telephone and Telegraph Corporation operates about 90 per cent. of all telephones in the country, and serves Mexico City and the central section of the republic. Mexico City has telephone connections with London and the Continent. There are (1932) about 3,098 post-offices. There are 64 broadcasting stations, of which 4 are Government-operated.

There is a State mail, express, and passenger airplane service between Mexico City and Tampico and Tuxpan, as well as over other routes. Airplane service to South and Central America was established in 1930. Passengers carried (1933), 39,213; mail, 57 metric tons. There were four large companies operating, 1932, against five in 1930.

Banking and Credit.

On September 30, 1933, the 67 banks of the Republic (mostly national and including the Bank of Mexico) had total capital of 147,005,000 dollars.

On September 1, 1925, the Bank of Mexico was established with an authorised capital of 100,000,000 gold pesos, of which 66,770,852 pesos were paid up by December 31, 1930. It succeeded a number of former banks of issue, and under Article 28 of the Constitution it has the sole right to issue notes. It has 5 branches, but discontinued commercial banking in April, 1932, becoming solely a central reserve and issue bank, with capital reduced to 50,000,000 pesos (32,197,000 pesos paid). The Government holds 51 per cent. of the capital stock. The Bank is now closely modelled on the

Federal Reserve system, with large powers to 'manage' the currency. On December 31, 1933, metallic monetary reserves were 97,384,351 pesos, of which 36,934,631 pesos were in gold currency and bars, and the balance in silver and subsidiary coinage and in foreign banks. The Bank's silver note circulation was 77,724,235 pesos on that date, of which 52,703,519 were used in rediscount operations, and 25,020,716 pesos were in general circulation. The Monetary Law of July, 1931, authorizes it to issue notes to double the amount of its gold and foreign currency reserves. Notes may be accepted voluntarily but are not legal tender. Ex-president Calles of Mexico became President of the Bank in July, 1931.

Money, Weights, and Measures.

By a decree of April 29, 1925, the monetary unit was the gold peso or dollar, the legal value of which was fixed at ·75 gramme of pure gold. At par it equalled 24·58*d.* or 50 cents. (U.S.). But the excessive premium (30 to 40 per cent.) commanded by the gold peso in 1930 and 1931 led to a decree on July 26, 1931, setting up the silver peso as full legal tender at a fixed value of ·75 grammes of gold. Further minting of gold coins was suspended and restrictions upon export removed. The silver coins are in denominations of 1-peso, 50, 20 and 10 centavos, with a fineness of ·720, except the 2-peso, which is ·900 fine. Control of the issue of silver pesos is now lodged with the Bank of Mexico. Exchange value of the silver peso in New York, 1934, ranged between 27·96 cents and 27·85 cents, U.S.; in London between 19·00 and 7·50 to the £. The bronze coins are in denominations of 5, 2 and 1 centavos. There are 5-centavo nickel coins. Notes of the Bank of Mexico are of the denominations of 1,000, 500, 100, 50, 10 and 5 pesos.

The weights and measures of the metric system were introduced in 1884 and their use is enjoined by law of June 19, 1895, though the old Spanish measures are still in use.

Diplomatic and Consular Representatives.

1. Of Mexico in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Leonides Andrew Almazán.

Second Secretary.—José Rendon y Ponce.

Military Attaché.—Major Jesús H. Pérez.

Consul-General (London).—A. Lüders De Negri.

There are Mexican consulates at Liverpool, Glasgow, Hull, Newcastle-on-Tyne, Cardiff and Birmingham.

2. Of Great Britain in Mexico.

Envoy Extraordinary and Minister Plenipotentiary.—John Murray, C.M.G. (Appointed January 20, 1935.)

First Secretary.—H. L. Farquhar, M.C.

Naval Attaché.—Captain A. R. Dewar, R.N.

Military Attachés.—Brevet Lt.-Col. W. W. T. Torr, D.S.O., M.C.

Consul-General.—J. Pyke.

MONACO.

Prince Louis II, born July 12, 1870, succeeded his father, Prince Albert, June 26, 1922.

Monaco is a small Principality on the Mediterranean, surrounded since 1860 by the French Department of Alpes Maritimes except on the side towards the sea. From 968 it belonged to the house of Grimaldi. In 1715 it passed into the female line, Louise Hippolyte, daughter of Antoine I., heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Thorigny, who took the name and arms of Grimaldi. Antony I. died in 1731, Louise Hippolyte reigning only ten months and dying in 1732. She was succeeded by her husband under the name of Jacques I., who also succeeded Antony I. as Duc de Valentinois, and was in his turn succeeded by his son Honoré III. This Prince reigned from 1731 until 1793, when his dominions were annexed by France. He died in 1795 and in 1814 his son Honoré IV recovered the Principality, which was placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna, 1815. Honoré V, who had acted as Regent for his invalid father since the Restoration, became Prince in 1819. He was succeeded in 1841 by Florestan, against whom, in 1848, Mentone and Roccabruna revolted, and declared themselves Free Towns, only to be occupied by the Sardinians. His son Charles III succeeded in 1856 and sold his rights over these two towns in 1861 to France, to which the Sardinian protectorate was transferred after the cession of Nice and Savoy in that year. Prince Albert, who acquired fame as an oceanographer, succeeded his father, Charles III., in 1889.

On January 5, 1911, a Constitution was promulgated, which provides for a National Council elected by universal suffrage and *scrutin de liste*. The Government is carried out under the authority of the Prince by a Ministry assisted by a Council of State. The legislative power is exercised by the Prince and the National Council, which consists of 12 members elected for four years.

The territory of the Principality is divided into three communes—Monaco-Ville, La Condamine and Monte Carlo—which are administered by a municipal body, elected by vote. Women do not vote.

In 1819 the Government adopted a code founded upon the French codes and a Court of First Instance, as well as a Juge de Paix's Court. The Principality issues its own separate postage-stamps, and has its own flag.

The small harbour, absolutely sheltered, has an area of 42 acres, depth at entrance 90 feet, and alongside the quay 24 feet at least. The Customs duties are the same as in France.

The area is 149 hectares, or 370 acres. Population (census January 1, 1933), 22,153 (1754 native Monegasques). Towns: Monaco, 2,020; La Condamine, 10,705; Monte Carlo, 9,428.

There has been since 1887 a Roman Catholic bishop. A semi-military police force has taken the place of the 'guard of honour' and troops formerly

maintained. The value of the commerce of the Principality is not stated. The revenue is mainly derived from the gaming tables. The annual grant for the concession was 80,000*l.* in 1917 ; 90,000*l.* in 1927, and in 1937 it will be 100,000*l.* Budget estimates, 1933: revenue and expenditure balanced at 9,348,453 francs.

Consul-General for Monaco in London.—Mr. Charles Nuthall Foreman.
British Consul.—W. J. Keogh, O.B.E. (residing at Nice).
British Vice-Consul.—M. L. Ainslie (residing at Monte Carlo).

MOROCCO.

(MOGHREB-EL-AKSA, *i.e.* The Farthest West.)

Reigning Sultan.

THE introduction of Islam into Morocco about the end of the 7th century was followed by an exceedingly confused period, to the latter part of which belongs the great Arab influx of the 11th century known as the Hilalian invasion. This period witnessed the rise and fall of various Arab and Berber dynasties, notably the Idrissids, under whom Fez was founded or refounded early in the 9th century, and the Almoravids, the first of whom, Youssef Ben Tashfin, founded Marrakesh in 1062, and later extended his power over the north of Morocco and into Spain. His dynasty was followed by the Almohads (12th and 13th centuries), and the Merinids (13th to 16th centuries), whose decline led up to the establishment of the Sherifian dynasties, the Saadians (16th and 17th centuries) and the Alaouis. The latter claim descent from Ali, the son-in-law of the Prophet, through the Filali Sherifs of Tafilelt. The present Sultan is the 18th of this dynasty.

Sidi Mohammed, third son of Moulay Youssef (reigned 1912–1927), was proclaimed Sultan on November 18, 1927, on the death of his father.

Government.

The Empire of Morocco is in principle an absolute monarchy, in which the Sultan exercises supreme civil and religious authority ; the latter in his capacity of Emir-el-Muminin or Commander of the Faithful. The majority of his subjects are Sunni Moslems of the Malekite school, the teachings of which formerly constituted the common law of Morocco. The country is now, however, divided into three Zones, in each of which a different system of government prevails as the outcome of the Protectorate Treaty concluded between France and the Sultan at Fez on March 30, 1912, the subsequent Convention between France and Spain of November 27, 1912, and the Convention between Great Britain, France and Spain of December 18, 1923 (modified July 25, 1928), providing for a special Statute in the Tangier Zone.

The Sultan resides in the French Zone, usually at Rabat, but occasionally in one of the other traditional capitals, Fez, Marrakesh, and Meknes. His government, known as the Makhzen, consists of the Grand Vizier, the

Vizier of Justice, the Vizier of 'Habous' or Pious Foundations, the Grand Vizier's Delegate for Public Instruction and the Presidents of the Sherifian High Court and the Religious Court of Appeal. All effective authority is exercised by the Protecting Power, which is represented by a Resident General. The latter is Minister of Foreign Affairs to the Sultan and head of an elaborate French administration which has its headquarters at Rabat and which is divided into departments for Finance, Economic Affairs, Public Instruction, etc. The French have created a large body of modern law in the form of Imperial Edicts or 'Dahirs' issued by the Sultan but promulgated and made executory by the Resident General, and decrees of minor importance, all of which similarly require French approval. Local administration is in the hands of native Pashas or Caids and French Controllers. The French civil administration has been made independent of military authority in the coastal regions and the Oudjda district adjoining Algeria. In other districts it is still subordinate to military authority. In the less settled districts in the south-east of the Zone the French control is less direct than elsewhere, although the system of governing through the 'Grand Caids' or tribal overlords is on the decline.

In the Spanish Zone the Sultan's powers are entirely delegated to a Khalifa, whom he chooses from a list of two candidates presented by the Spanish Government, and whose administration is controlled by a Spanish High Commissioner resident at Tetuan. Spanish authority in the Zone was consolidated by successful military operations terminating in the spring of 1927. Spain also has treaty rights in a narrow coastal strip at Ifni as well as in an area extending south from the river Dra and some distance inland from the coast about Cape Juby. She has never established herself effectively in the Ifni enclave. The connection of the area south of the Dra with the rest of Morocco is tenuous and it merges into the Spanish Rio de Oro farther south.

The 1923 Tangier Statute came into force on June 1, 1925, but did not receive the adhesion of all the Powers signatory of the Act of Algeciras of April 7, 1906. It was modified by a Protocol signed at Paris on July 25, 1928, to which Italy, one of the previously non-adhering Powers, was a party. The Zone is permanently neutralised and demilitarised. The regime is one of autonomy, and legislative power is vested in an international Assembly of 27 members, but the parties to the Statute agreed on certain regulations and fiscal enactments which were not to be modified for two years, as well as on a special code of law. A Committee of Control, composed of the Consuls of the Powers signatory of the Act of Algeciras, is invested with a right of veto and certain other powers. The administration of the Zone is entrusted to an administrator, with assistant administrators for finance, health, etc., and justice. These officials are at present (March, 1935) French, British, Spanish, and Italian respectively. The Sultan is represented by a Mendoub, who is ex-officio President of the Assembly and who is in charge of the administration of native affairs.

French Resident General.—M. Henri Ponsot (appointed July 13, 1933).
Spanish High Commissioner.—D. Manuel Rico Avello (Jan. 23, 1934).
Khalifa for Spanish Zone.—Sidi Muley Hassan Ben el Mehedi.
Mendoub of Tangier.—Si Mehemmed Et-Tazi.
Administrator of Tangier Zone.—M. Le Fur.

Area and Population.

The French Zone comprises the whole of Morocco (except the Ifni enclave and the Cape Juby area) from the Atlantic to the Algerian frontier,

and from the confines of the Sahara to the boundary of the Spanish Zone as agreed to in 1912. The Franco-Spanish boundary has not been fully delimited. It follows a generally eastern direction from a point on the Atlantic about 16 miles south of Larache to the river Moulouya, which completes the boundary to the Mediterranean. The Spanish Zone comprises the area between this line and the sea, with the exception of the small territory around Tangier which is included in the international zone. The southern and eastern boundaries of Morocco being largely indeterminate, no exact estimate can be made of the total area, but it may be estimated as follows:—

French Zone	approximately	200,000 square miles.
Spanish Zone	,,	13,125 ,, ,,
Tangier Zone	,,	225 ,, ,,
	Total . . .	213,350

The native population consists mainly of Islamised Berbers and Arabs dating from the great invasions of the Middle Ages. These elements have to some extent intermixed with each other and with negro stocks. There is a large native Jewish population, mostly in the towns. Since 1912 the European element has greatly increased, especially owing to the influx of French into the towns of the French Zone and of a fair number of agricultural settlers, also mostly French. A census of the French Zone taken in March, 1931, puts the population at about 4,230,000 native Moslems, 120,000 native Jews and 150,000 foreigners; total 4,500,000. An official estimate of the Spanish Zone (1933) gives the population as 720,273 (about 34,000 Europeans and 12,988 Jews), and that of the Tangier Zone at about 51,000 (35,000 native Moslems, 11,000 Europeans and 5,000 native Jews).

The following table shows the estimated population of the principal towns of the French Zone on the results of an urban census in 1931:—

—	Europeans	Natives	Total
French Zone:—			
Casablanca	55,291	105,127	160,418
Fez	9,641	97,197	106,838
Kenitra	5,482	13,251	18,733
Marrakesh	6,379	185,557	191,936
Mazagan	1,949	18,699	20,648
Meknes	9,945	44,211	54,156
Mogador	907	13,584	14,491
Oudjda	14,383	15,054	29,437
Ouezzan	758	14,706	15,464
Rabat	20,802	32,204	53,006
Saffi	1,595	24,538	26,133
Salé	1,285	24,532	25,817
Taza	3,418	9,296	12,714

The principal towns in the *Spanish Zone* are Tetuan (population in 1933, 48,300), Alcazar (35,600), Larache (32,000), Xauen (6,600), Arzila (5,800).

There are important British colonies at Casablanca (about 1,000), and Tangier (about 500). Spaniards form an important element in the European population of the coast towns.

The principal languages are Moorish-Arabic, and numerous Berber dialects. The use of French for official and business purposes is very widespread, except in the Spanish Zone, where Spanish is chiefly used. In the Tangier Zone, French, Spanish and Arabic are recognised as the official languages.

Education.

The bulk of the native population is illiterate. There are numerous Koranic schools imparting a very elementary education, and a number of higher schools attached to mosques. The most notable is the Kairoween University at Fez, which is highly reputed in the Islamic world. In the French Zone education on European lines is given in the French schools, and schools provided by the Protectorate for Moslem natives. There were in 1932 for European boys and girls, 170 primary public schools with 26,530 pupils, and 20 primary private schools with 3,076 pupils ; 3 primary technical schools with 134 pupils ; 15 secondary schools with 7,664 pupils in all, including an industrial and commercial school at Casablanca. The system is correlated with the French system, and pupils can take their baccalauréat in the French zone. The Institut des Hautes Études Marocaines at Rabat had 1,548 students in 1932, and has a faculty of French law. The boys' and girls' high schools at Rabat have sections for training teachers. For Moslems there were in the French zone, in 1932, 96 primary schools attended by 12,802 boys and girls ; 6 schools attended by 1,297 sons of notables ; 17 technical schools with 826 boy pupils ; 2 Moslem colleges with 529 students at Rabat and Fez. The Italian Government maintains schools at Rabat and Casablanca. Jewish education has made great progress since 1912 under the joint auspices of the Protectorate and the Alliance Israélite. There were in 1932, 45 Franco-Jewish schools with 14,537 pupils. Research work is done at the Institut Scientifique Chérifien at Rabat.

There are State schools in the chief towns of the Spanish Zone, also certain Hispano-Arabic schools for education of natives. The Alliance Israélite has schools in Tetuan and Larache, and a native school of Arts and Industries exists in Tetuan, and a carpet-weaving school at Xauen.

In the Tangier Zone the education of native Moslems is mainly confined to the elementary Koranic schools. The Government of the French Protectorate and the Spanish Government, however, maintain several primary and elementary schools for natives, and there are French technical schools for boys and girls. There are several primary and secondary schools for Jews maintained by the Jewish community but connected with the Alliance Israélite. The French Protectorate and Spanish Governments also maintain a number of primary and secondary schools for European boys and girls, to some of which natives are admitted, and there is an Italian school with primary and secondary classes for Europeans as well as natives.

Justice.

French Zone.—Native justice is administered by religious courts and in a large range of criminal and civil cases by the Pashas and Caids. Under the Protectorate two Courts of Appeal corresponding to these jurisdictions have been set up at Rabat. French Courts modelled on those in France were created in 1913, and deal with cases brought by or against French and other foreigners, except cases against British and United States citizens, who retain capitulatory rights and are justiciable in their own Consular courts. The French Courts are the Court of Appeal at Rabat, Courts of First Instance at Rabat, Casablanca, Oudjda, Marrakesh and Fez, and twelve *tribunaux de paix*. They administer specially drawn-up codes, which *inter alia* provide for the application of the national law in matters affecting the personal status of foreigners. Rabbinical Courts deal with matters affecting the personal status of Jews.

Spanish Zone.—Native and Jewish justice is similar to that in the French

Zone, except that all criminal cases are tried in the Spanish Courts. These consist of Audiencia, or Supreme Court, Court of First Instance, and Tribunaux de Paix. As in the French Zone, British subjects and American citizens are justiciable in their own Consular Courts.

Tangier Zone.—Native justice is administered as in the French Zone, the Mendoub having a jurisdiction similar to that of Pashas and Caids. The Statute provides for a Mixed Tribunal which deals with all cases involving foreigners, except the subjects of the U.S.A. which have not adhered to the Convention and still have capitulatory rights.

Finance.

Revenue and Expenditure of the French Zone for five years (ordinary budget) :—

—	1930 [1]	1931-32 [1]	1932 [2]	1933 [1]	1934 [1]
	Francs	Francs	Francs	Francs	Francs
Revenue . . .	802,571,620	921,725,410	734,467,100	1,166,211,685	1,418,549,885
Expenditure . .	802,288,294	921,311,722	734,145,790	1,166,110,085	1,418,167,585

[1] Estimates. [2] April-December.

The chief items of the budgets for the past two financial years are as follows:—

Revenue			Expenditure		
	Year ending Dec. 31, 1933	Year ending Dec. 31, 1934		Year ending Dec. 31, 1933	Year ending Dec. 31, 1934
	Francs	Francs		Francs	Francs
Ordinary receipts:—			*Ordinary expenditure:*—		
Direct taxes (tertib, etc.) . .	152,415,000	138,505,000	Debt charges .	236,348,600	234,605,000
Indirect taxes (customs, etc.) . .	210,550,000	184,950,000	Expenditure other than debt charges	656,668,800	643,823,700
Consumption duties and other indirect taxes . . .	240,380,000	227,480,000			
Monopolies (P.T.T., etc.) . . .	142,620,000	143,320,000			
Various receipts .	147,154,000	184,556,000			
			Total of ordinary expenditure .	893,017,400	878,428,700
Total of ordinary receipts . .	893,119,000	878,811,000	*Extraordinary expenditure:*—		
Extraordinary receipts:—			Expenditure chargeable to proceeds of loans .	213,686,000	488,205,000
Proceeds of loans .	213,686,000	488,205,000	Expenses chargeable to reserve fund . . .	59,406,685	51,533,885
Reserve fund and various receipts.	4,317,800	11,645,000			
Other receipts .	55,088,885	39,888,885			
Grand total of receipts . .	1,166,211,685	1,418,549,885	Grand total of expenditure . .	1,166,110,085	1,418,167,585

The Moroccan debt consists of French loans (1904, 1910, 1914, 1918, and 1920). The 1904 loan amounted to 62,500,000 francs and bears interest at 5 per cent. The 1910 loan was for 101,124,000 francs and also bore interest at 5 per cent. The 1914 loan, guaranteed by the French Government, was for 170,250,000 francs. By a law dated March 25, 1916, the 1914 loan was increased to 242,000,000 francs. The first issue of 70,250,000 in July, 1914, was at 4 per cent., and the second issue 171,750,000 in March, 1918, was at 5 per cent. By the law of August 19, 1920, a further loan, also guaranteed by the Government, was authorised for 744,140,000 francs. Of this amount 300 million francs had been issued by 1923, after which no further issue was made. Provision was made in 1928 for a new loan of 819,822,000 francs in which was to be merged the balance of the 1920 loan not already earmarked for expenditure. A first issue of Fr. 325,000,000 at 4½ per cent. (price of issue Fr. 925 for Fr. 1,000) was made in May, 1929. The second issue of Fr. 425,000,000 at 4 per cent., price Fr. 977·50, followed in July, 1930. In April, 1932, a further loan of 1,535,676,000 francs was authorised, mainly for public works.

The budget of the Spanish Zone for 1933 balanced at 50,271,261 pesetas by the help of a subvention from the Spanish Treasury of 25,872,725 pesetas. In 1932 the budget balanced at 51,841,200 pesetas.

The principal revenue of the Tangier Zone is from Customs and Consumption duties. The budget for 1932 provided for a revenue of 22,460,000 francs and an expenditure of 22,447,000. In 1934, with the help of a subvention of 1,300,000 francs each from the French and Spanish Protectorate Governments in Morocco, to meet the service of the Port Loans, the budget was made to balance at 22,188,700 francs.

Defence.

The Sherifian army as such no longer exists, except for the Black Guard or Sultan's bodyguard. The military forces in the French Zone are made up of drafts (consisting largely of African troops) from the French Metropolitan and Colonial armies, a portion of the Foreign Legion and native levies of various kinds. Following on the termination of the Riff war a Presidential decree of October 3, 1926, placed the army under the control of the Resident General for all purposes except actual operations, and directed that the regular land forces should be organised in three divisions and two mixed brigades. The French budget for 1931–32 provided for 2,650 officers and 58,614 N.C.O.'s and men of the regular army to be employed in Morocco, as well as the following irregulars:—8 auxiliary native officers, 228 French non-commissioned officers, 140 French brigadiers, 12,122 native rank and file. The composition of the Spanish forces in the Spanish Zone in 1934 numbered regulars, 11,200; Spanish troops and Foreign Legion, 22,000; irregulars, 5,000. The Tangier Zone is demilitarised. The 1923 Statute as revised in 1928 provided ultimately for a native gendarmerie of 250 men, under a Spanish commanding officer and a French second-in-command. In March, 1935, the strength of the force was 150.

Production and Industry.

French Zone.—Agriculture is by far the most important industry. The total agricultural area is estimated at 24,875,000 acres, not including forests. Forest land is estimated at about 4,940,000 acres, of which one-third lies within the agricultural area. The principal crops

are cereals, especially wheat and barley; beans, chickpeas, fenugreek and other legumens; canary-seed; cumin and coriander; linseed; olives: vines and other fruits, especially almonds. The approximate yield of the principal crops in 1932 was as follows in metric quintals (220·4 lbs.):—barley, 10,264,928 (3,296,728 acres); wheat, 7,612,192 (2,711,691 acres); sorghum, 242,841 (211,597 acres); oats, 183,890 (56,096 acres); maize, 1,188,053 (856,052 acres); chickpeas, 116,176 (70,691 acres); linseed, 93,722 (53,465 acres). Endeavours are being made to stimulate the production of other crops. *e.g.* cotton. Market-gardening for export has become important in the neighbourhood of Casablanca. The almost universal wild palmetto is put to various uses, including the manufacture of *crin végétal*. The trees grown include cork, cedar, arar, argan, oak, and various conifers. In 1932 there were 6,212,092 olive trees, 467,098 orange and lemon trees, 530,263 palm trees (dates), 2,756,569 almond and nut trees, 5,384,189 fig and other trees. Tizra wood is exported for tanning purposes. Gums are produced in considerable quantities. Stock-raising is an important industry. The number of the animals in the Zone in 1932 was:—cattle (bovine), 1,954,053; sheep, 7,556,318; goats, 3,860,211; pigs, 116,921; horses and mares, 207,548; mules, 108,261; asses, 611,037; camels, 132,185.

The bulk of the land is held by natives, who cling to primitive methods. There are now, however, a fair number of European settlers. The number of exploitations was estimated at the end of 1929 at 2,595, representing 1,729,756 acres. Work was started in 1927 on a considerable programme of irrigation works, which is to include barrages in the rivers Beth, Moulouya, Mellah, Nefis, Oum-er-Rebia, Derna, Tessaout and El-Akhdar.

The principal mineral exploited is phosphate, the output of which (under a State monopoly) has grown rapidly from 8,232 metric tons in 1921 to 885,720 tons in 1926, 900,731 tons in 1931, 1,004,919 tons in 1932, and 1,105,300 tons in 1933. Lead ore (233 metric tons in 1934), manganese (3,407 metric tons in 1934), cobalt (1,052 metric tons in 1934), and molybdenum ore (147 metric tons in 1934) are the principal minerals. Iron ore, tin, antimony ore, and zinc ore are also mined.

The coasts abound in fish. The chief fishing centres are near Casablanca and at Fedhala, which possesses an important preserving industry.

The scheme for providing a central supply of electrical energy for practically the whole zone by harnessing the water power of the Oum-Er-Rebia is expected shortly to yield 18,000 h.p. and to supply all the coast towns and Marrakesh. Other hydraulic power stations in course of erection are the El Kansera barrage on the Beth, and the N'Fis barrage in the Marrakesh region. A large barrage on the Oued Mellah (Chaouia region) was completed in 1932. It is for irrigation purposes and for the water supply of Casablanca.

A number of miscellaneous industries designed partly to supply local requirements of goods previously imported have grown up in recent years. Among them are flour mills, breweries, soap and candle factories, cement factories, etc., etc. The total number of European industrial establishments in 1930 was estimated at 1,000, employing 35,000 persons.

Spanish Zone.—Agriculture is potentially important, but is carried on by natives in primitive fashion. Principal crops harvested by the natives under the colonisation plan in 1931 were, in metric tons: wheat, 25,303; barley, 50,740; straw, 55,267; aldora, 18,472; beans, 4,127; olives, 3,800; maize, 4,424; rye, 946; and peas, 946. The 1931 livestock census showed there were 119,865 goats, 201,559 sheep, 89,690 cattle, 12,000 mules and asses, 8,630 horses, 2,500 swine, and 38 camels. European colonisation is at present

almost entirely confined to the towns, but is spreading from the new Riffian township of Villa Alhucemas into the fertile Guis valley, which was once Abdel Kerim's headquarters. Iron ore is mined and exported from the Melilla district. The Jebala and Ghomara areas are reputed to be rich in mineral wealth, but the disturbed state of the country has in the past prevented any systematic exploitation. Prospecting is now being undertaken in these areas. Fishing, largely tunny, is an important industry. No other considerable industries exist.

Tangier Zone.—The agricultural output, consisting principally of wheat, barley and chickpea, is insufficient for the needs of the population. There are also fisheries and preserving factories and a certain amount of market gardening for local requirements.

Commerce.

French Zone.—Imports and exports for five years were :—

	1930	1931	1932	1933	1934
	Francs	Francs	Francs	Francs	Francs
Imports	2,208,473,848	2,075,190,647	1,785,058,487	1,532,416,277	1,319,704,859
Exports	719,252,702	761,381,874	684,964,858	600,231,159	667,395,188

The main distribution of commerce in the years shown was :—

From or to	Imports		Exports	
	1933	1934	1933	1934
	Francs	Francs	Francs	Francs
France	734,729,561	565,817,706	354,093,566	337,435,263
United Kingdom	94,332,052	58,954,480	20,100,515	23,888,524
Germany	30,810,060	27,125,540	16,440,496	54,052,012
Spain	34,423,942	26,277,908	43,775,297	54,503,582
Belgium	85,780,340	72,158,356	8,336,543	13,180,658
Italy	55,723,909	47,263,251	31,524,806	41,072,286
Austria	—	6,584,296	—	23,390
United States	70,612,208	69,952,073	7,933,180	6,045,860
Portugal	5,416,668	7,268,263	2,690,600	2,267,141
Netherlands	28,376,802	26,554,940	12,775,241	15,663,170
Egypt	671,999	1,164,366	20,620	72,361
Czechoslovakia	15,719,898	14,132,111	15,000	162,855
Sweden	5,335,277	7,059,102	556,002	185,229
Norway	—	827,501	—	1,953,381
Denmark	8,068,906	9,047,622	11,311,189	17,841,591
Japan	65,217,325	107,395,280	2,704,707	2,061,400
Rumania	62,498,540	58,553,884	32,115	378,115
Argentina	5,900,232	4,795,561	—	35,587

The following table shows imports and exports in 1934 and 1933 of certain of the chief commodities :—

Imports	1934	1933	Exports	1934	1933
	1,000 Francs	1,000 Francs		1,000 Francs	1,000 Francs
Refined Sugar	122.513	137,308	Cattle, Sheep, Pigs.	24.230	22,306
Tea	64,802	72,865	Wool	3,589	1,295
Cheese	10,026	11,413	Eggs	40,407	45,562
Timber	12,535	17,069	Hides and Skins	3,631	6,051
Wine	2,923	4,311	Wheat	104,843	142,357

Imports	1934	1933	Exports	1934	1933
	1,000 Francs	1,000 Francs		1,000 Francs	1,000 Francs
Cement	7,813	12,791	Barley	82,758	61,754
Coal	13,662	17,409	Dried Vegetables	21,873	9,841
Petrol	82,296	90,743	Canary Seed	6,059	3,605
Candles	7,461	9,075	Almonds	7,129	3,582
Cotton Goods	98,153	99,962	Linseed	3,884	3,123
Boots and Shoes	17,121	16,515	Palmetto Fibre	30,800	26,652
Motor Vehicles	53,989	64,561	Phosphates	145,168	119,459
Agricultural Machinery	5,544	8,737	Fish, all kinds	34,254	26,391
			Coriander, Cummin. and Fenugreek	5,291	4,843
			Tizra Wood	707	3,924

Spanish Zone.—Imports in 1933 were valued at 76,018,506 pesetas, and exports at 14,030,892 pesetas. The principal imports in 1933 were (in thousand pesetas):—flour, 6,352; semolina, 2,127; sugar, refined, 8,415; tea, 1,839; seed oils, 1,331; wines, 3,907; liquid fuel, 2,848; laundry soap, 1,421; candles, 1,078; cotton goods, 4,927; automobiles and parts, 2,490; the principal exports, cattle, 1,562; eggs, 1,354; iron ore, 4,265. In 1933, 32 per cent. of the imports came from Spain and 25·5 per cent. from France. Of the exports, 96·7 per cent. went to Spain.

Tangier Zone.—Imports and exports for five years:—

—	1929	1930	1931	1932	1933
	Francs	Francs	Francs	Francs	Francs
Imports	134,403,452	115,509,688	93,229,080	73,831,037	68,795,047
Exports	28,536,911	16,818,497	22,276,775	6,850,666	9,306,987

The principal imports are flour, sugar, candles, cottons and other fabrics, coffee, tea, tobacco, soap, oils, cereals and wines. The principal exports are skins, eggs and tinned fish.

Total trade between Morocco and the United Kingdom for 5 years (Board of Trade Returns):—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Morocco to U.K.	332,884	218,810	265,276	262,731	347,604
Exports to Morocco from U.K.	1,404,432	1,337,426	1,420,284	1,203,727	864,228
Re-exports to Morocco from U.K.	130,910	63,803	48,017	41,004	33,625

Shipping and Communications.

In 1934, 3,800 vessels of 5,713,235 tons entered the ports of the French zone. Of these 1,417 vessels of 2,629,231 tons were French, and 2.383 vessels of 3,084,004 tons were foreign. Of the total 2,204 vessels of 4,163,243 tons entered the port of Casablanca.

Casablanca possesses a fully equipped port, and Port Lyautey (Kenitra) a smaller up-river one. Modern ports are under construction at Rabat and Tangier. Fedhala can accommodate vessels up to 4,000 tons which supply important oil storage stations. Mazagan and Mogador have lighter ports

and another is under construction at Saffi. Agadir was opened to commerce on January 1, 1930, and a port is projected. In 1933, 1,786 ships of a total tonnage of 2,922,912 entered the port of Tangier.

The ports in the Spanish Zone are relatively unimportant, the bulk of the trade being done through Ceuta, Mellila and Tangier. In 1933, 1,243 vessels of 545,315 tons entered ports of the Spanish Zone.

At the end of 1932, there were 790 miles of normal gauge railways in operation and 205 miles under construction. There were also 542 miles of narrow-gauge railway (60 cm.). In 1932, 255,134 metric tons of freight and 1,497,963 passengers were carried.

The existing railways in the Spanish Zone are Ceuta-Tetuan (41 km.); Nador-Tistutin (36 km.); and Larache-Alcazar (40 km.), besides the portion of the Tangier-Fez railway which crosses the zone.

On December 31, 1932, there were 2,342 miles of main roads and 1,381 miles of secondary roads in the French Zone; about 1,242 miles of road are tarred. The Spanish Zone has about 540 miles of good roads suitable for traffic. The roads in the Tangier Zone have been considerably improved since the coming into force of the Statute. There are now about 65 miles of urban and rural roads.

There are a daily aeroplane service between Toulouse and Casablanca via Tangier and Rabat, and a weekly service between Casablanca and Dakar.

A Sherifian postal service under French management exists in the French and Tangier zones. European mails are conveyed by steamer services from Marseilles and Bordeaux, overland through Spain, and by daily steamers between Algeciras and Tangier and increasingly by air from Toulouse. The Sherifian service in 1932 received 38,234,205 letters, 2,494,648 registered letters, also 528,423 parcels, and 10,261,129 printed papers and samples; and despatched 36,315,185 letters, 2,037,400 registered letters, 89,238 parcels and 5,104,284 printed papers and samples. The Spanish authorities maintain the ordinary postal service in the Spanish Zone. Spain retains a post-office in Tangier, and Great Britain maintains the only foreign postal service still existing in Morocco as a whole, with offices at Rabat, Casablanca, Mazagan, Saffi, Marrakesh, Fez, Tetuan, Larache, and head office at Tangier.

The total length of telegraph lines open to the public in the French Zone on December 31, 1932, was 3,433 miles. In 1932, 1,223,741 telegrams were received and 1,100,681 despatched, exclusive of 216,488 received and 168,954 despatched free of charge (official, etc.). All important centres in the Spanish Zone are connected by land lines. Communication between Morocco and Europe is maintained by cables between Casablanca and Brest, Tangier-Oran-Marseilles, Tangier-Gibraltar, Tangier-Cadiz, Larache-Cadiz via Algeciras. The French Protectorate administration maintains wireless stations at various places in the French Zone and also at Tangier.

Telephone systems exist in all the principal towns of the French Zone and there is a complete inter-urban connection. In 1932 there were in the Zone 11,111 subscribers and 16,319,171 messages sent. Urban services exist in the principal towns of the Spanish Zone and at Tangier. An inter-zonal system is being studied. Ceuta is now connected with the European system.

Currency, Weights, and Measures.

Since the withdrawal of the Hassani currency in 1920 the *franc* has been the sole currency in the French Zone. Measures were taken later to protect the note-issue of the Moroccan State Bank from the competition of Algerian and French notes, and steps were taken at the end of 1924 to make those measures really effective. The Moroccan franc (State Bank notes of all de-

nominations from frs. 5 upwards) was in 1928 placed on the same gold basis as the French franc. In 1934 silver coins (Moroccan) of 5, 10 and 20 francs were issued in the French zone.

On December 31, 1930, the value of State bank-notes in circulation was 581,421,495 francs, as compared with 603,833,395 francs at the end of 1929.

Spanish currency circulates in the Spanish Zone together with the old Hassani silver currency. The latter has undergone many vicissitudes since it was the legal currency (concurrently under the Act of Algeciras of 1906 with Spanish money) for the whole of Morocco. It is now relatively stable at an exchange of Pesetas Hassani 50 to the £ stg.

Moroccan francs and Spanish money are legal tender in the Tangier Zone. The *Peseta Hassani* continues to circulate freely.

The metric system of weights and measures became in 1923 the sole legal system in the French Zone.

The principal native measures still in current use are :—

Weight.—1 Kantar = 100 Rotls. 1 Rotl = 16 ookeyas. The Rotl varies widely round about 2 lbs. *Capacity.*—The *mudd*, which varies by locality. *Length.*—1 Kama = 50 inches. 1 Dra = 20 inches. 1 Kala = 22 inches.

Diplomatic and Consular Representatives of Great Britain in Morocco.

Under the Tangier Convention of December 18, 1923, the diplomatic agencies maintained by the signatory Powers were suppressed.

Consul-General at Tangier.—Ernest Frederick Gye.
Consul-General at Rabat.—R. W. Bullard, C.M.G., C.I.E.
Consul at Tetuan.—G. E. A. C. Monck-Mason.
Consul at Casablanca.—F. H. W. Stonehewer-Bird, O.B.E.
Consul at Marrakesh.—J. F. R. Vaughan-Russell.

There are also Vice-Consuls at Casablanca, Mazagan, Fez and Laraiche.

NEPÁL.

AN independent Kingdom in the Himálayas, between 26° 25′ and 30° 17′ N. lat., and between 80° 6′ and 88° 14′ of E. long.; its greatest length 500 miles; its greatest breadth about 150; bounded on the north by Tibet, on the east by Sikkim, on the south and west by British India.

The sovereign is His Majesty Mahárájadhirája **Tribhubana Bir Bikram** Jung Bahádur Shah Bahádur Shumshere Jung, who was born on June 30, 1906, and succeeded his father on December 11, 1911. The Prince-Royal and Heir-apparent was born on June 11, 1920. The government of Nepál is a military oligarchy. All power is in the hands of the Prime Minister, to whom it was permanently delegated by the Mahárájádhirája Surendra Bikram Shah under pressure of the Bharadárs or nobles of the State in 1867. The present Prime Minister is General Joodha Shum Shere Jung Bahadur Ráná, Hon. G.C.I.E. (born April, 1875), who was appointed on September 1, 1932. The office of Prime Minister is always held by a member of his family, the succession being determined by special rules.

The aboriginal stock is Mongolian with a considerable admixture of Hindu blood from India. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant in about 1769 and has since given its name to all. The ruling family are Hindu Rajputs.

A commercial treaty between India and Nepál was signed in 1792, and a British Resident was sent to reside at Káthmándu, but was recalled two years later. A frontier outrage, in 1814, compelled the Indian Government to declare war; and a British force advanced to within three marches of the capital. Peace was concluded and the Treaty of Sagauli signed in December, 1815. Since then the relations of the British with Nepál have been friendly. In 1854 hostilities broke out between the Nepalese and Tibetans, and in 1856 a Treaty was concluded between the Nepalese and Tibetan Governments by which the Tibetans bound themselves to pay an annual sum of Rs.10,000 to Nepál, to encourage trade between the two countries, and that the Nepalese Representative at Lhasa should be of high rank. Besides, trade agents are maintained at Gyantse, Kuti, Kerrong, and other trade marts in Tibet.

In accordance with the treaty of Sagauli, which amongst other things provides that accredited ministers of each shall reside at the Court of the other, a British Envoy, with a small escort of Indian sepoys, lives at the capital; but he does not interfere in the internal affairs of the State. The appointment of the British Envoy was raised to that of His Majesty's Envoy Extraordinary and Minister Plenipotentiary at the Court of Nepal on May 18, 1934, and a Nepalese representative of the same rank was appointed to the Court of St. James with effect from June 12, 1934.

A fresh treaty was signed on December 21, 1923. By it all previous treaties, agreements and engagements since and including the Treaty of Sagauli were confirmed, and the British and Nepalese Governments acknowledged one another's independence, internal and external.

Area and Population.—Area about 54,000 square miles; population estimated at about 5,600,000. The estimated gross revenue is 15,000,000 rupees. The races of Nepál, besides the dominant Gurkhas, include earlier inhabitants of Tartar origin, such as Magars, Gurungs, and Bhotias. The Newars, who came from Southern India, live in the valley or adjacent to it.

Capital, Káthmándu, 75 miles from the Indian frontier; population about 80,000, and of the surrounding valley 300,000.

Religion.—Hinduism of an early type is the religion of the Gurkhas, and is gradually but steadily overlaying the Buddhism of the primitive inhabitants.

Defence.—The Army consists of about 45,000 men, mainly infantry, of whom about 20,000 are regulars. The armament comprises about 15,000 magazine ·303 rifles, 25,000 Martini-Henry rifles, 110 machine or Lewis guns, 30 modern, 12 fairly modern and about 240 old-fashioned guns.

Trade.—The principal articles of export are cattle, hides and skins, opium and other drugs, gums, resins and dyes, jute, wheat, pulse, rice and other grains, clarified butter, oil seeds, spices, tobacco, timber, saltpetre. The chief imports are cattle, sheep and goats, salt, spices, sugar, tobacco, drugs and dyes, petroleum, leather, brass, iron and copper wares, raw cotton, twist and yarn, silk, cotton and woollen piece goods. Nepál possesses very valuable forests in the southern part of the country.

Slavery was entirely abolished in the country by the Maharaja in 1924–6.

A telephone connects the capital with Birganj near the southern frontier. In February, 1927, the first railway into Nepál (metre gauge), from Raxaul on the Bengal & North-Western Railway to Amlekhganj, a distance of 25 miles, was opened. There is a suitable road for motors from Amlekhganj to Bhimphedi, a distance of about 27 miles. A ropeway was opened at about the same time for the carriage of goods over the last 14 miles of the road from Dhursing above Bhimphedi into the Káthmándu valley. A topographical survey of the country by Indian personnel of the Government of India was completed in 1927.

The silver mohar is valued at 6 annas and 8 pies of British Indian currency. Copper pice, of which 50 go to a silver mohar, are also coined. The Indian rupee passes current throughout Nepál.

Envoy Extraordinary and Minister Plenipotentiary.—General Krishna Shumshere Jung Bahadur. (Appointed March 20, 1935.)

Envoy Extraordinary and Minister Plenipotentiary at the Court of Nepál, Káthmándu.—Lt.-Col. Frederick Marshman Bailey, C.I.E. (Appointed November 22, 1934.)

NETHERLANDS (THE).

(KONINKRIJK DER NEDERLANDEN.)

Reigning Sovereign.

Wilhelmina Helena Pauline Maria, born August 31, 1880, daughter of the late King Willem III., and of his second wife, Princess Emma, born August 2, 1858 (died March 20, 1934), daughter of Prince George Victor of Waldeck; succeeded to the throne on the death of her father, November 23, 1890; came of age August 31, 1898, and was crowned September 6 of that year; widow of Prince Henry of Mecklenburg-Schwerin, born April 19, 1876 (died July 5, 1934). Offspring: Princess Juliana Louise Emma Marie Wilhelmina, born April 30, 1909.

The royal family of the Netherlands, known as the House of Orange, descends from a German Count Walram, who lived in the eleventh century. Through the marriage of Count Engelbrecht, of the branch of Otto, Count of Nassau, with Jane of Polanen, in 1404, the family acquired the barony of Breda, and thereby became settled in the Netherlands. The alliance with another heiress, only sister of the childless Prince of Orange and Count of Châlons, brought to the house a rich province in the south of France; and a third matrimonial union, that of Prince Willem III. of Orange with a daughter of King James II., led to the transfer of the crown of Great Britain to that prince. Previous to this period, the members of the family had acquired great influence in the United Provinces of the Netherlands under the name of 'stadhouders,' or governors. The dignity was formally declared to be hereditary in 1747, in Willem IV.; but his successor, Willem V., had to fly to England, in 1795, at the invasion of the French republican army. The family did not return till November, 1813, when the United Provinces were freed from French domination. After various diplomatic negotiations, the Belgian provinces, subject before the French revolution to the House of Austria, were ordered by the Congress of Vienna to be joined to the Northern Netherlands, and the whole to be erected into a kingdom, with the son of the last stadhouder, Willem V., as hereditary sovereign. In consequence, the latter was proclaimed King of the Netherlands at The Hague on the 16th of March, 1815, and recognised as sovereign by all the Powers of Europe. The union thus established between the northern and southern Netherlands was dissolved by the Belgian revolution of 1830, and their political relations were not readjusted until the signing of the treaty of London, April 19, 1839, which constituted Belgium an independent kingdom. King Willem I. abdicated in 1840, bequeathing the crown to his son Willem II., who, after a reign of nine years, left it to his heir, Willem III. This king reigned 41 years, and died in 1890; in default of male heirs, he was succeeded by his only daughter Wilhelmina.

The Sovereign has a civil list of 1,200,000 guilders. There is also a large

revenue from domains, and in addition an allowance of 100,000 guilders for the maintenance of the royal palaces. The family of Orange is, besides, in the possession of a very large private fortune, acquired in greater part by King Willem I. in the prosecution of vast enterprises tending to raise the commerce of the Netherlands.

Government and Constitution.

I. Central Government.

The first Constitution of the Netherlands after its reconstruction as a Sovereign State was promulgated in 1814, and was revised in 1815 (after the addition of the Belgian provinces, and the assumption by the Sovereign of the title of King); in 1840 (after the secession of the Belgian provinces); in 1848, 1884, 1887, 1917, and 1922. According to this charter the Netherlands form a constitutional and hereditary monarchy. The royal succession is in the direct male line in the order of primogeniture: in default of male heirs, the female line ascends the throne. In default of a legal heir, the successor to the throne is designated by the Sovereign and a joint meeting of both the Houses of Parliament (each containing twice the usual number of members), and by this assembly alone if the case occurs after the Sovereign's death. The age of majority of the Sovereign is 18 years. During his minority the royal power is vested in a Regent—designated by law—and in some cases in the State Council.

The executive power of the State belongs exclusively to the Sovereign, while the whole legislative authority rests conjointly in the Sovereign and Parliament, the latter—called the States-General—consisting of two Chambers. The Upper or First Chamber is composed of 50 members, elected by the Provincial States. Members of the First Chamber not residing in The Hague, where the Parliament meets, are allowed 10 guilders (16*s.* 8*d.*) a day during the Session of the States-General. The Second Chamber of the States-General numbers 100 deputies, who are elected directly. Members are allowed 5,000 florins (420*l.*) annually, with travelling expenses. Members of the States-General must be Dutch subjects, men or women, and recognised as such.

First chamber (elected July 29, 1932): 16 Catholics, 6 Anti-Revolutionists, 7 Protestant Party, 6 Liberty Union, 4 Democrats and 11 Social Democrats.

Second chamber (elected April 26, 1933): Catholics, 28; Social Democrats, 22; Anti-Revolutionists, 14; Christian Historicals, 10; Liberty Union, 7; Democrats, 6; other parties, 13.

The Electoral Reform Act, passed December 12, 1917, provides for universal suffrage and proportional representation. The Members of the Second Chamber are, according to the Electoral Reform Act, directly elected by citizens of both sexes who are Dutch subjects not under 25 years. Criminals, lunatics, and certain others are excluded; for certain crimes and misdemeanours there may be temporary exclusion. The electoral body numbered April 1, 1934, 4,296,451 voters, *i.e.* 98·1 per cent. of the number of citizens of 25 years and older.

The members of the Second Chamber are elected for 4 years, and retire in a body, whereas the First Chamber is elected for 6 years, and every 3 years one half retire by rotation. The Sovereign has the power to dissolve both Chambers of Parliament, or one of them, being bound only to order new elections within 40 days, and to convoke the new meeting within two months.

The Government and the Second Chamber only may introduce new

Bills; the functions of the Upper Chamber being restricted to approving or rejecting them without the power of inserting amendments. The meetings of both Chambers are public, though each of them, by the decision of the majority, may form itself into a private committee. The ministers may attend at the meetings of both Chambers, but they have only a deliberative vote unless they are members. Alterations in the Constitution can be made only by a Bill declaring that there is reason for introducing those alterations, followed by a dissolution of the Chambers and a second confirmation by the new States-General by two-thirds of the votes. Unless it is expressly declared, the laws concern only the realm in Europe, and not the Colonies. The executive authority, belonging to the Sovereign, is exercised by a responsible Council of Ministers. The Ministry, appointed May 26, 1933, is composed as follows:—

President of the Council of Ministers, Minister of Public Works (Waterstaat), *Minister of the Colonies, and Minister of Economic Affairs.*—Dr. H. *Colijn.*
Minister of Foreign Affairs.—Dr. J. R. *Slotemaker de Bruine.*
Minister of Justice.—Dr. R. J. H. *van Schaik.*
Minister of the Interior.—Dr. J. A. *de Wilde.*
Minister of Instruction, Science, and Arts.—Dr. H. P. *Marchant.*
Minister of Finance.—Dr. P. J. *Oud.*
Minister of Defence.—Dr. L. N. *Deckers.*
Minister of Social Affairs.—Prof. Dr. J. R. *Slotemaker de Bruine.*

Each of the above Ministers has an annual salary of 16,000 guilders. The Minister of Foreign Affairs enjoys besides 10,000 guilders for representation.

There is a State Council—'Raad van State'—of 14 members, appointed by the Sovereign, of which the Sovereign is president, and which is consulted on all legislative and a great number of executive matters.

II. Local Government.

The territory is divided into 11 provinces and 1,070 communes (January 1, 1935). Each province has its own representative body, 'the Provincial States.' The members are elected for 4 years, directly from among the Dutch inhabitants of the province who are 25 years of age. Except that they must be inhabitants of the province, the electors are the same as for the Second Chamber. The members retire in a body and are subject to re-election. The number of members varies according to the population of the province, from 82 for Holland (South) to 35 for Drente. The Provincial States are entitled to make ordinances concerning the welfare of the province, and to raise taxes according to legal precepts. All provincial ordinances must be approved by the Crown. The Provincial States exercise a right of control over the municipalities. They also elect the members of the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of 6 (in Drente 4) of their members, called the 'Deputed States,' is charged with the executive power in the province and the daily administration of its affairs. This committee has also to see the common law executed in the province. Both the Deputed as well as the Provincial States are presided over by a Commissioner of the Sovereign, who in the former assembly has a deciding vote, but in the latter named only a deliberative vote. He is the chief magistrate in the province. The Commissioner and the members of the Deputed States receive an allowance.

Each of the communes forms a Corporation with its own interests and rights, subject to the general law. In each commune is a Council, elected

for four years directly, by the same voters as for the Provincial States, provided they inhabit the commune. All the Dutch inhabitants 23 years of age are eligible, the number of members varying from 7 to 45, according to the population. The Council has a right of making and enforcing bye-laws concerning the communal welfare. The Council may raise taxes according to rules prescribed by common law; besides, each commune receives from the State Treasury an allowance proportioned to the total number of its inhabitants and to the share which its non-contributing inhabitants have failed to pay towards local taxes. All bye-laws may be vetoed by the Sovereign. The Municipal Budget and the resolutions to alienate municipal property require the approbation of the Deputed States of the province. The Council meets in public as often as may be necessary, and is presided over by a Mayor, appointed by the Sovereign for 6 years. The executive power is vested in a college formed by the Mayor and 2—6 Aldermen (wethouders), elected by and from the Council; this college is also charged with the execution of the public law. The Municipal Police is under the authority of the Mayor; as a State functionary the Mayor supervises the actions of the Council; he may suspend their resolutions for 30 days, but is bound to inform the Deputed States of the province.

Area and Population.

I. Progress and Present Condition.

Population at various census periods :—

1829	2,613,487	1889	4,511,415	1920	6,865,314
1869	3,579,529	1909	5,858,175	1930	7,935,565

Area (excluding water) and the population, according to the results of the Census of December 31, 1930, and the estimated population on December 31, 1933 :—

Provinces	Area: square miles (Dec. 31, 1930)	Population		
		Dec. 31, 1930	Dec. 31, 1933	Per sq. mile (Dec. 31, 1933)
North Brabant	1,921	898,386	941,115	489·9
Guelders	1,941	829,293	868,929	447·7
South Holland	1,130	1,957,578	2,039,437	1,804·8
North Holland	1,059	1,509,587	1,584,467	1,496·2
Zealand	690	247,606	250,710	363·3
Utrecht	526	406,960	434,552	826·1
Friesland	1,251	399,659	409,254	327·1
Overysel	1,301	520,788	541,475	416·2
Groningen	886	392,436	404,309	456·3
Drente	1,029	222,432	2 2,205	225·7
Limburg	846	550,340	583,936	690·2
Total	12,579	7,935,565	8,290,389	659·1

Of the total on December 31, 1933, 4,123,798 were males and 4,166,591 females.

The area, including the interior waters, amounted in 1930 to 13,203 square miles, whilst the total area, including gulfs and bays, amounted in 1930 to 15,771 square miles.

On June 14, 1918, a law was passed for the purpose of forming a new province by the draining of the Zuiderzee to the extent of 523,000 acres.

The work, which was commenced in 1924, is expected to take 15 years, and the total outlay for the first stage is calculated at 66,250,000 florins.

Urban and rural populations were as follows :—

Year	Population of the principal Towns [1]	Percentage of the whole Population	Rural Population	Percentage of the whole Population
Dec. 31, 1889 . .	1,699,012	37·66	2,812,403	62·34
,, ,, 1899 . .	2,178,931	42·69	2,925,048	57·31
,, ,, 1909 . .	2,614,903	44·64	3,243,046	55·36
,, ,, 1920 . .	3,206,055	46·70	3,659,091	53·30
,, ,, 1930 . .	3,865,535	48·71	4,070,030	51·29

[1] The towns with a population of more than 20,000 inhabitants at the census of 1930.

II. Movement of the Population.

Years	Total Births Registered as Living	Illegitimate	Deaths	Marriages	Surplus of Births over Deaths	Stillborn
1930	182,310	3,245	71,682	62,911	110,628	4,600
1931	177,387	3,071	77,048	59,456	100 339	4,540
1932	178,525	3,091	73,059	55,816	105,466	4,615
1933	171,289	2,839	72,096	59,245	99,193	4,408

The emigration has been as follows, mostly to North America: 1930, 2,756; 1931, 365; 1932, 158; 1933, 163; 1934, 243.

The total number of emigrants, Dutch and foreigners, who sailed from Dutch ports was, in 1930, 11,196, in 1931, 2,959, in 1932, 1,940, in 1933, 1,710, and in 1934, 1,342.

III. Principal Towns.

Population on January 1, 1934 :—

Amsterdam	778,442	Enschede	51,171	Gouda	30,595
Rotterdam	587,901	Leeuwarden	50,598	Alkmaar	29,596
The Hague	469,168	Heerlen	50,017	Vlaardingen	28,901
Utrecht	159,895	Breda	48,046	Haarlemmermeer	28,783
Haarlem	126,740	's Hertogenbosch	44,615	Zeist	27,335
Groningen	111,240	Emmen	44,052	Bussum	26,868
Eindhoven	96,866	Velsen	43,602	Helmond	26,521
Nimegen	87,808	Amersfoort	42,818	Venlo	25,862
Tilburg	84,967	Zwolle	42,007	Rheden	25,856
Arnhem	82,367	Kerkrade	38,554	Roosendaal	23 369
Leiden	72,414	Deventer	37,949	Bergen op Zoom	23,152
Apeldoorn	65,179	Hengelo	35,058	Voorburg	22,841
Maastricht	64,895	Zaandam	34,952	Flushing	21,594
Hilversum	64,893	Lonneker	34,855	Zutphen	20,496
Schiedam	59,246	Helder	33,940	Renkum	20,009
Dordrecht	59,008	Almelo	33,832		
Delft	52,139	Ede	32,271		

Religion.

Entire liberty of conscience is granted to the members of all religious confessions. The royal family and a great part of the inhabitants belong

to the Reformed Church. The State Budget (1935) contains allowances for the different churches: for Protestant Churches, about 1,715,920 guilders; for Roman Catholics, about 705,930; for Jansenists, about 17,200; and for Jews, about 16,150.

The number of adherents of the different Churches in the various provinces according to the census of 1930 was: Dutch Reformed Church, 2,732,333; Other Protestants, 876,958; Catholics, 2,890,022; Jansenists, 10,182; Jews, 111,917; and other creeds or those of none, 1,313,968 (other creeds, 169,575; no religion, 1,144,393; unknown, 185).

The government of the Reformed Church is Presbyterian. At the end of 1933 the Dutch Reformed, Walloon, English Presbyterian, and Scotch Churches had 1 Synod, 10 provincial districts, 44 classes, and 1,431 parishes. Their clergy numbered 1,679. The Roman Catholic Church had one archbishop (of Utrecht), 4 bishops, and 1,424 parishes. The Old Catholics had 1 archbishop, 2 bishops, and 27 parishes. The Jews had 143 communities.

Education.

Primary instruction is given in all places where needed. It was made compulsory by Act of 1900. The school age is from 6–13.

There are municipal primary schools and schools of voluntary organisations. Two types of primary schools are distinguished, viz. the junior departments (6 or 7 grades), which are found everywhere, and the senior departments (3 or 4 grades) which are to be found only in the larger towns. There are also special schools for mentally and physically defective children. By the Act of 1920 both kinds of schools were put on an equality as regards public funds.

For primary instruction the State pays the salaries of the requisite number of teachers, and the municipalities bear the expenditure for upkeep of the schools.

There are no legal provisions as regards kindergartens, and they are not endowed by the State. These schools are the concern of municipalities and voluntary organisations.

Secondary education is given in grammar and modern schools. The municipalities and voluntary organisations run these schools, though a number of modern schools is also provided by the State. Secondary education includes a number of commercial schools and modern schools for girls. With the exception of this latter type of schools, secondary schools are endowed by the State; in some cases the municipalities endow the voluntary secondary schools, and the Provinces especially the commercial schools.

The training of teachers is provided for in the State 'normal schools,' and those of the municipalities and of voluntary organisations. In many cases the State contributes towards the expenses of the two latter types of schools.

Technical and housewifery schools are, with a few exceptions of State schools, run by municipalities and voluntary organisations. They are endowed by the State, the voluntary schools being also subsidised by the municipalities. This likewise applies to the agricultural schools, towards the expenditure of which the Provinces contribute as well.

Higher education is given at universities and high schools. There are four universities and two high schools (commercial) which are run by voluntary organisations. One of these commercial high schools is endowed by the State.

The following table gives details of educational institutions for 1933–34:—

Institutions	Number	Teaching Staff	Pupils or Students	
			Total	Female
Public Universities [1]	4	492 [3]	9,608	2,079

[1] Leiden (founded 1575), Utrecht (1636), Groningen (1614), Amsterdam (1632). In 1918 the Veterinary School at Utrecht and the Agricultural School at Wageningen were created Universities.

[2] One at Rotterdam and the other at Tilburg (Roman Catholic High School of Commerce, founded October 8, 1927).

[3] Figures for the year 1930-31.

[4] Figures for the year 1932-33.

[5] Figures for the year 1934-35.

[6] The number of pupils taught in secondary, technical, and housewifery schools, and agricultural schools includes a number of non-fulltime students.

Of the conscripts called up in 1933, 0·06 per cent. could neither read nor write. Of the total number of children at the age of 6–13 years on December 31, 1930, 4 per cent. received no instruction.

Justice and Crime.

As from January 1, 1934, justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 19 district tribunals, and by 62 cantonal courts; trial by jury is unknown in Holland. The Cantonal Court, which deals with minor offences, is formed by a single judge; the more serious cases are tried by the district tribunals, formed as a rule by 3 judges (in some cases one judge is sufficient); the courts are constituted of 3 and the High Court of 5 judges. All Judges are appointed for life by the Sovereign (the Judges of the High Court from a list prepared by the Second Chamber). They can be removed only by a decision of the High Court.

Juvenile courts were called into existence in 1922. The juvenile court is formed by a single judge specially appointed to try children's civil cases, at the same time charged with the administration of justice for criminal actions committed by young persons who are not yet 18 years old, unless imprisonment of six months or more ought to be inflicted, in which case the judge of the juvenile court acts as judge-examiner.

The number of persons convicted was:—

Year	By the Cantonal Courts		By the District Tribunals	
	Male	Female	Male	Female
1931	170,544	12,118	19,022	1,978
1932	177,169	11,740	19,887	2,090
1933	202,352	12,002	23,392	2,269

The number of inmates in the prisons, State reformatories, etc., was as follows:—

	1931		1932	
	Males	Females	Males	Females
Prisons	6,078	231	6,111	230
Houses of detention	15,528	518	18,358	533
Four State workhouses	2,603	14	1,932	16
State reformatories	768	103	864	101

There are both State and municipal police. The State police consists of field-constables and cavalry. The former are spread over the country, the latter guard the frontiers (eastern and southern). The cavalry police (maréchaussé) numbers about 23 officers and 1,183 men. There are about 1,339 field-constables—appointed and paid by the Government—divided into numerous brigades. Besides each commune has its own field-constables or police force.

Pauperism and Social Insurance.

The statistics of the poor relief in the Netherlands cover all forms of relief. The following data for the year 1932 relate exclusively to what may be called normal poor relief (not including relief of any kind to the unemployed).

Kind of relief	Number of Persons	Net cost. (guilders)
Outdoor relief (heads of families)	159,839	34,750,174
,, ,, (other persons)	53,866	
,, ,, (gifts)	142,883	
Casuals	41,742	86,212
Refuges to homeless persons	76,793	
Boarding out in families	13,432	2,504,145
,, ,, homes, etc.	22,993	4,472,644
Nursing in hospitals	167,984	20,230,903
Lunatics and idiots	26,447	15,973,501
Homes for the aged, children, etc.	36,107	11,732,519
Almshouses	13,102	1,473,554
Workshops and workhouses	3,870	895,010
Total (1932) including other data		110,758,549

On September 19, 1916, a Government scheme for unemployment insurance was set up in Holland.

Finance.

The revenue and expenditure in five years (ordinary and extraordinary) were, in thousands of guilders :—

	1931	1932	1933 [1]	1934 [1]	1935 [1]
	1,000 guilders	1,000 guilders	1,000 guilders	1,000 guilders	1,000 guilders
Revenue . . .	702,054	1,175,230	1,662,316	485,922 [2]	655,130 [2]
Expenditure . .	838,850	1,078,968	963,248	804,434	782,986

[1] Estimates. [2] Without the new or revised taxes.

Budget estimates for the years 1934 and 1935 were as follows :—

Branches of Expenditure (Ordinary service)	1934	1935	Sources of Revenue (Taxes only)	1934	1935
	1,000 Guilders	1,000 Guilders		1,000 Guilders	1,000 Guilders
Civil list . .	1,850	1,550	Land tax . .	9,785	9,870
Legislative body and Royal cabinet	1,931	1,896	Tax on dividends .	12,240	12,000
Department of Foreign Affairs .	3,623	3,608	Tax on coupons .	6,400	5,000
Department of Justice . . .	26,470	25,991	Tax on incomes .	54.360	61,200
Department of Interior . . .	13,219	17,027	Tax on capital .	29,215	26,715
Department of Instruction, etc. .	154,319	148,133	Tax on successions	30,400	33,000
Department of Finance . . .	143,076	80,718	Import duties .	82,425	99,300
Department of Defence . . .	87,887	87,713	Excise duties .	236,570	217,800
Department of Public Works, etc. .	75,342	60,100	Tax on gold & silver	600	550
Department of Economic Affairs.	11,889	12,771	Tax on Bicycles .	7,000	7,250
Department of Social Affairs .	109,330	121,087	Tax on motor-cars, etc. . . .	14,000	14,500
Department of Colonies . . .	4,714	17,022	Stamp duty . .	15,860	16,000
Public Debt . .	97,372	146,713	Registration duty	10,000	11,500
Unforeseen expenditure . . .	30	30	Total . . .	508,805	514,685
Total expenditure	731,051	724,358	Of which for the—		
			General budget .	487,805 [1]	492,935
			Road Fund . .	21,000	21,750

[1] The new taxes for 1934 included.

The expenditure of the 'Department for the Colonies' entered in the budget estimates only refers to the central administration. There is a separate budget for the great colonial possessions in the East Indies, voted as such by the States-General. The financial estimates for the year 1934 are distributed between the colonies and the mother country in the following proportions :—

	Guilders		Guilders
Expenditure in the colonies	358,197,766	Revenues in the mother country	6,400,350
Home Government expenditure	143,670,949	Revenues in the colonies .	420,397,764
Total expenditure . .	501,868,715	Total revenue . .	426,798,114

In the Budget for 1934 and 1935 the national debt is given as follows in thousands of guilders :—

—	Jan. 1, 1934	Jan. 1, 1935[1]
Funded Debt—		
2½ per cent. debt	515,675	513,682
3 " " "	389,054	378,055
3½ " " "	38,355	38,041
4 " " "	951,218	1,720,459
4·4 " " "	48,469	50,866
4½ " " "	532,149	—
5 " " "	247,925	—
Total	2,722,845	2,701,103
Interest, 1934 and 1935	102,752	96,132
Redemption, 1934 and 1935 (ordinary and extraordinary)	925,817	37,047
Floating Debt —		
Assets, January 1, 1934 and 1935	447,217	359,634
Liabilities " "	648,604	661,997
Interest, 1934 and 1935	24,487	23,072

[1] Estimates

Defence.

I. Frontier.

The Netherlands are bordered on the south by Belgium, on the east by Germany. On the former side the country is quite level, on the latter more hilly; the land frontier is open all round. The frontiers are defended by few fortresses. The scheme of defence adopted in 1874 contemplated the concentration of the defensive forces in a restricted area, known as the 'Holland Fortress.' This comprises the provinces of North and South Holland, with parts of Zealand and Utrecht. Two-thirds of the area is surrounded by the sea. On the land side, to the East and South, are lines of more or less permanent works, which can be rendered very difficult of attack by inundations. There are also strong works on the coast, notably the Helder group, barring access to the Zuiderzee, and the Hollandsch Diep and Volkerak position, while the entrances to the Amsterdam and Rotterdam ship canals are defended by powerful forts. The citadel of the whole is Amsterdam, which is well fortified. Here also inundations would almost preclude a successful attack. The coast defences are in good order and are to be further strengthened, but the defences on the land side, except the position of Amsterdam, have of late years been neglected. Moreover, the control of the inundations is not entirely in military hands.

Apart from the Holland Fortress are the works on the Western Schelde. These have hitherto been unimportant, but a plan has been adopted to augment them by entirely new works at Flushing.

II. Army.

According to an Act of 1922, service in the army is partly voluntary and partly compulsory; the voluntary enlistments bear a small proportion to the compulsory. Every Dutch citizen and, in certain circumstances, every other resident in the Netherlands, is liable to personal service in the army (or navy) from the age of 19 up to 40. The maximum strength of the annual contingent is fixed at 19,500 (including 1,000 for the sea service). The average effective strength of the home army in 1934 was 1,422 officers and 16,293 other ranks, organised in 4 divisions. Budget for Army and Navy, 1934, 87,887,443 florins.

The first training lasts for: (*a*) 5½ months at the longest for men not belonging to the mounted corps, with the exception of those under (*b*) and (*c*); (*b*) 9 months at the longest for men not belonging to the mounted corps who after enlistment are being trained as subalterns; (*c*) 12 months at the longest for men not belonging to the mounted corps who after enlistment are being trained as officers, for infirmary men, for conscripts of the air service, and for men of the mounted artillery troops; (*d*) 15 months at the longest for the cavalry; (*e*) 8 months at the longest for the navy. The time for further training is at the lowest 40 days for all conscripts, with the exception of infirmary men and air-service men, who are exempted.

The Dutch garrison of the East Indies is organised in 2 divisions with a strength, in 1933, of 1,098 officers and 34,096 other ranks.

The Netherlands infantry is armed with the Mannlicher magazine rifle, model 95. Cavalry and engineers carry the Mannlicher carbine. The field artillery, including the horse batteries, is armed with a shielded Q.F. Krupp gun of 7·5 cm.

III. Navy.

The Navy is maintained for a double purpose—viz. the protection of the Dutch waters and coast, and the defence of the East Indian possessions. These latter contribute to the maintenance of that division of it known as the Indian Marine. The majority of the vessels recently added to the Navy are intended mainly for the defence of the Dutch East Indies.

Following is a list of the principal ships of the Royal Netherlands Navy.

Name	Displacement, Tons	Armour water line	Max. Armour on guns	Principal Armament	Torpedo Tubes	Indicated Horse-power	Nominal Speed Knots	Laid down
COAST DEFENCE SHIPS		inches	inches					
Jacob van Heemskerck	4,445	6	7¾	2 9·4-in., 6 6-in.	—	6,400	17	'05
Hertog Hendrik	4,560	6	9¾	1 9·4-in., 4 6-in.	—	6,300	17	'00
Zeven Provinciën	5,644	6	9¾	2 11-in., 4 6-in.	—	8,500	16	'08
CRUISERS								
Java Sumatra	6,670	3	shields	10 6-in., 4 3-in. A.A.	—	65,000	31	'16

There are also 2 armoured gunboats; 3 sloops; 8 destroyers; 5 seagoing torpedo boats; 28 submarines; 2 submarine depôt ships and 12 mine layers. A new cruiser of 6,000 tons for service in the East Indies, the *De Ruyter*, was launched in 1934. A 2,500 ton flotilla leader has been laid down to replace the *Hertog Hendrik*; and 3 submarines are building or completing. The *Zeven Provincien* and the cruisers *Java* and *Sumatra* are assigned to the East Indies Fleet, as are the destroyers, 17 of the submarines, and many of the other vessels mentioned.

Production and Industry.

I. Agriculture.

The surface of the Netherlands was divided in 1933 as follows (in hectares: 1 hectare=2·47 acres):—Uncultivated land: heath, 359,545; water and

morass, 135,018; dykes and roads, 68,805; untaxed land, 85,718; building land, houses, &c., 69,372 Total, 718,458. Cultivated land: arable land, 872,653; pasture, 1,325,253; gardens and orchards, 118,585; forest, 255,063. Total, 2,571,554.

Large estates prevail in the provinces of Zealand, South Holland, Groningen, and North Holland; small estates in North Brabant, Guelders, Limburg, and Overyssel.

The areas under the principal crops, in hectares, were as follows:—

Products.	1931	1932	1933	Products.	1931	1932	1933
	hectrs.	hectrs.	hectrs.		hectrs.	hectrs	hectrs.
Winter wheat	57,635	101,906	115,133	Beans	9,566	6,848	7,141
Summer wheat	20,145	18,165	21,588	Brown mustard seed	457	271	386
Winter rye }	180,052	165,727	165,295	White mustard seed	2,350	1,116	2,798
Summer rye }				Carraway seed	7,437	7,545	5,104
Winter barley	8,496	6,658	7,343	Flax	6,550	1,995	4,885
Summer barley	20,233	13,313	10 555	Tobacco	75	47	21
Oats	149,209	141,811	136,374	Potatoes	164,116	176,118	153,593
Buckwheat	489	427	456	Sugar beets	37,477	40,173	47,480
Horse beans	11,452	9,497	9,905	Chicory	542	510	361
Peas	42,776	38,489	42,245	Onions	3,948	4,128	4,637

The yield of the more important products for 3 years was as follows:—

Crop	Produce			Crop	Produce		
	1931	1932	1933		1931	1932	1933
	hectolitres	hectolitres	hectolitres		Tons	Tons	Tons
Wheat	2,417,489	4,597,457	5,488,055	Sugar beet.	1,029,183	1,655,760	1,948,303
Barley	1,130,886	864.351	802,675	Flax	27,101	9,389	20,050
Oats	6,242,739	6,028,141	6,312,060				
Rye	5,068,343	4,959,779	5,581,649				

According to the live-stock census of May–June, 1930, Holland possessed 299,152 horses, 2,366,066 cattle, 484,987 sheep, and 2,017,781 pigs. In May 1934, cattle numbered 2,764,829, and pigs, 2,022,074.

II. Mining and Manufactures.

A few coal-mines are found in the province of Limburg; some of them belong to the State. The quantity of coal extracted in 1932 was 12,756,448 metric tons, and in 1933, 12,573,960 metric tons. In 1933 the private mines produced 5,034,044 tons, and the State mines, 7,539,916 tons. There is one salt mine at Boekelo, production 1929, 44,914 tons; 1930, 49,807 tons; 1931, 56,141 tons; 1932, 60,765 tons; 1933, 64,949 tons.

There are no official returns of all the manufacturing industries. According to the last reports there were, in 1932, 278 distilleries, 9 sugar refineries, 5 beet-sugar factories, 11 salt works, 136 breweries, and 2,981 tobacco factories.

III. Fisheries.

In 1933, 3,303 vessels of all kinds were engaged in the fisheries. The produce of the herring fishery in the North Sea was valued at 6,291,048 guilders in 1933; the weight of the catch of herrings was 68,480 tons. The quantity of oysters produced in 1933 amounted to 1,162,810 kilos.

Commerce.

The following are the returns of the imports (exclusive of gold and silver coins and bullion) for home consumption and the export of home produce for six years (in thousands of guilders) :—

Year	Imports	Exports	Year	Imports	Exports
1929	2,752,298	1,989,431	1932	1,299,427	846,139
1930	2,418,255	1,718,880	1933	1,209,229	725,841
1931	1,892,733	1,311,814	1934	1,038,164	711,814

The values of the leading articles of import and export in the last two years were (in thousands of guilders) :—

—	Imports		Exports	
	1933	1934	1933	1934
Iron and steel of all kinds	81,245	81,050	19,477	20,349
Textiles, raw and manufactured	178,383	149,328	59,716	62,881
Cereals and flour	104,149	72,346	5,340	9,188
Coal	50,763	43,530	53,722	43,006
Rice and flour thereof	9,782	8,796	5,729	7,684
Mineral oil	40,855	23,823	1,211	791
Coffee	24,460	16,373	3,311	3,760
Butter	308	196	18,545	22,094
Margarine (raw and eatable)	387	273	3,480	2,208
Sugar	5,454	4,077	3,954	4,328
Cheese	271	337	28,457	28,056
Gold and silver	534,851	132,162	698,221	305,366
Wood	58,912	56,515	2,117	2,269
Skins	15,153	15,052	13,164	11,508
Copper	6,657	6,293	1,315	1,101
Paper	24,871	21,742	20,462	20,865
Soot, grease, tallow, suet	4,618	3,435	3,679	2,363
Zinc	2,011	1,412	2,430	2,479
Tobacco (unmanufactured)	23,781	19,016	831	775
Tin	1,483	1,521	7,275	19,077
Colours (painters' wares)	10,962	10,110	9,044	8,229
Seeds (colza, linseed, &c.)	25,313	28,943	10,149	9,817
Manures (all sorts)	27,154	23,854	20,789	18,242

Value of the trade (excluding gold and silver coins and bullion) with the leading countries for two years in thousands of guilders :—

Imports	1933	1934	Exports	1933	1934
Germany	378,355	296,640	Germany	156,119	175,697
Great Britain	109,031	97,078	Great Britain	126,333	135,116
Belgium and Luxemburg	123,548	107,980	Belgium and Luxemburg	100,143	81,540
United States	77,700	69,205	United States	33,382	22,474
Netherlands Indies	50,608	58,438	Netherlands Indies	30,741	30,480
France	53,285	44,842	France	71,873	57,662

The principal articles of trade between the United Kingdom and the Netherlands (Board of Trade Returns) in two years were :—

Imports into U.K. from Netherlands	1932	1933	Exports of produce and manuf. of U.K. to Netherlands	1932	1933
	£	£		£	£
Bacon	2,425,219	2,681,140	Cottons	806,170	565,623
Fish	205,173	155,690	Cotton yarn	767,123	671,330
Cheese	454,680	282,364	Coal	1,247,506	1,149,547
Butter	248,867	576,329	Iron and Steel	856,289	977,299
Onions	490,510	414,969	Machinery	718,396	820,081
Paper, Strawboard	1,286,894	1,029,502	Clothing	304,826	330,652
Tomatoes	839,963	458,528	Woollens	513,994	518,942
Eggs	649,588	406,624	Motor cars & motor cycles	691,723	704,928
Condensed milk	2,315,468	1,913,550	Chemicals.	195,972	252,108

Much of the trade here entered as with the Netherlands consists of goods on transit from and to Germany, notably the imports of silk goods and metal goods.

Total trade between the Netherlands and the United Kingdom (in thousands of pounds sterling) for 5 years (Board of Trade Returns):—

—	1930	1931	1932	1933	1934
Imports from Netherlands to U.K.	39,523	35,198	22,030	18,603	20,973
Exports to Netherlands from U.K.	18,860	13,701	12,106	12,371	12,098
Re-exports to Netherlands from U.K.	4,149	2,998	2,383	1,976	1,991

Shipping and Navigation.

The number of vessels in the mercantile navy on July 1, 1934, was:—Sailing vessels, 19, of 5,639 gross tons; steamers and motor vessels, 1407 of 2,612,377 gross tons; total, 1,426 vessels of 2,618,016 gross tons.

The following table gives the number and capacity of vessels which entered and cleared the ports of the Netherlands:—

Year	With Cargoes		In Ballast		Total	
	No.	Cubic Metres	No.	Cubic Metres	No.	Cubic Metres
Entered.

Communications.

I. Canals and Railways.

The total extent of rivers and navigable canals is about 4,660 miles; of roads about 3,000 miles.

In 1932 the total length of the principal tramway lines was 1,850 miles; 305,671,000 passengers were carried, and 3,672,036,000 kilogrammes of goods. Their revenue amounted to 40,826,000 guilders.

In 1933 the 2 principal railways had a length of 2,250 miles. The breadth of the railway gauge is 1·50 metres, or 4 ft. 11 in. In 1933 50,113,000 passengers were carried on the railways. The total revenue was 119,743,000 guilders. All railway companies are private; there is a State railway company, only so named because the road is owned by the State.

II. Post and Telegraphs.

The postal traffic was as follows in 2 years:—

—	Letters	Post Cards	Newspapers and Printed Matter	Parcels	Letters with Money Orders
1932					
Internal	243,567,000	84,388,421	555,535,000	6,040,701	206,390
Foreign	71,960,000	13,216,283	41,515,000	1,559,518	210,705
1933					
Internal	247,382,000	85,984,054	540,463,000	5,262,380	191,880
Foreign	78,005,000	14,204,427	45,508,000	1,461,243	176,037

The receipts of the Post Office in 1933 were 47,610,000 guilders, the expenditure in 1933, 44,200,000 guilders.

There are several private telegraph lines, but most of the lines are owned by the State. The length of State lines on Jan. 1, 1934, was 652 miles, the length of wires on Jan. 1, 1934, 6,025 miles. The number of State offices was, on Jan. 1, 1934, 2,257. The number of paid messages by State

and private lines in 1933 was 5,314,300. The receipts of the State amounted in the same year to 9,681,000 guilders, and the ordinary expenses in 1933 to 10,585,000 guilders.

In 1921 the interurban and international telephone system had 2,512 miles of line and on December 31, 1931, 317,815 miles of wire, and is administered by the State; 28,818,528 interurban and 2,127,857 international conversations were held in 1933. The receipts were in the same year for interurban and international intercourse 16,730,000 guilders, and the total expenses 12,968,000 guilders.

III. Air Traffic.

There is a regular civil aeroplane service subsidised by the Government between Amsterdam and London, Amsterdam, Brussels and Paris, Amsterdam and Hamburg, Rotterdam and Berlin, Amsterdam and Malmö, and between Amsterdam and Batavia. In 1929, 75 tons of postal matter, 695 tons of goods and 14,269 passengers were carried; in 1930, resp. 65 tons, 684 tons and 10,152 passengers; in 1931, resp. 100 tons, 955 tons and 11,166 passengers; in 1932, resp. 170 tons, 875 tons, and 21,327 passengers; in 1933, resp. 193 tons, 1,234 tons, and 41,701 passengers.

Banking and Credit.

The money in general circulation is chiefly silver. Before 1875 the Netherlands had the silver standard; but a Bill which passed the States-General in the session of 1875 allowed an unrestricted coinage of ten-guilder pieces in gold, whereas the coinage of silver was suspended for an unlimited time.

Value of money minted during the following years (in thousands of guilders):—

Year	Gold	Silver	Copper and Nickel	For the East and West India Colonies	Total value	Total number of pieces
1881–1900	8,564	13,710	1,310	10,834	34,418	452,342,090
1901–1920	95,123	108,370	4,362	58,152	265,907	1,370,652,000
1921–1932	98,240	213,120	2,430	23,512	337,280	754,964,000
1933	24,620	8,900	70	100	33,690	27,422,000

The Bank of the Netherlands is a private institution, but it is the only one which has the right of issuing bank-notes. This right, granted in 1863 for 25 years, was prolonged in 1888 for 15 years, and prolonged again for the same term in 1903, with some alterations in the conditions; *e.g.* all the paper money is to be issued by the Bank. In 1918 the Charter was once more prolonged for a further 15 years. The Bank does the same business as other banks, only with more guarantees. Two-fifths of the paper money in circulation must be covered. It has agencies in all places of importance.

Some recent figures are as follows (in thousands of florins):—

	February 18, 1935	February 19, 1934		February 18, 1935	February 19, 1934
Gold	810,565	813,597	Notes in circulation .	849,398	883,996
Silver	22,490	26,678	Deposits . . .	164,788	143,012
Discounts & advances	158,526	172,620			

The capital amounts to 20,000,000 guilders. The Bank keeps the State-Treasury and the cash of the State Postal Savings-Bank and of other institutions. The Bank receives 3½ per cent. of the capital; the remainder, with deduction of some reserves, is divided between the State and the Bank in proportion of 3 : 1.

There are many savings-banks, all private. Besides these there is a State postal savings-bank, established in 1881. The following table gives some particulars:—

Year	Number of Savings Banks	Amount deposited (in 1,000 gldrs.)	Amount withdrawn (in 1,000 gldrs.)	Total Deposits at end of year (in 1,000 gldrs.)	Number of Depositors at end of year	Amount per inhabitant. Gldrs.
1931

Money, Weights, and Measures.

Money.

The standard coin is the 10-florin piece weighing 6·720 grammes, ·900 fine, and thus containing 6·048 grammes of fine gold. The unit of the silver coinage is the gulden or florin, weighing 10 grammes, ·945 fine and containing 9·45 grammes of fine silver.

Gold is legal tender, and the silver coins issued before 1875.

The principal coins are:—

The *gulden*, *guilder* or *florin* of 100 cents = 1s. 8d.; or 12 g. = £1.
The *rijksdaalder* = 2½ guilders.
Coins in circulation: silver, of 10, 25, 50, 100 and 250 cents; bronze, ½ cent, 1 cent and 2½ cents; nickel, 5 cents.

Weights and Measures.

The metric system of weights and measures, and, with trifling changes, the metric denominations are adopted in the Netherlands.

Diplomatic and Consular Representatives.

1. Of the Netherlands in Great Britain.

Envoy and Minister.—Jonkheer Dr. R. de Marees van Swinderen, G.C.V.O. (October 1, 1913).
First Secretary.—Jhr. Dr. P. D. E. Teixeira de Mattos.
Commercial Attaché.—F. B.'s Jacob.
Agricultural Adviser.—B. Gerritzen.
Consul-General in London.—T. H. de Meester.

2. Of Great Britain in the Netherlands.

Envoy and Minister.—Sir Hubert Montgomery, K.C.M.G., K.C.V.O., C.B. Appointed August 22, 1933.
Second Secretary.—C. E. Steel.
Military Attaché.—Major the Hon. W. Fraser, D.S.O., M.C.
Naval Attaché.—Capt. C. F. Hammill.
Air Attaché.—Group-Capt. R. M. Field.
Commercial Secretary.—R. V. Laming, C.B.E.
Consul-General at Rotterdam.—F. G. Rule.

There are consular representatives at Amsterdam (C.G.), Dordrecht, Flushing, and The Hague.

Colonies.

The colonial possessions of the Netherlands, situated in the East Indies and the West Indies, embrace an area of about 790,000 square miles, with a total population of 60,954,890 in 1934.

NETHERLANDS INDIES.

(Nederlandsch-Indië).

The Netherlands possessions in Asia, forming the territory of the Netherlands Indies, are situated between 6° N. and 11° S. latitude, and between 95° and 141° E. longitude.

In 1602 the Netherlands created their East India Company. This Company conquered successively the Netherlands Indies, and ruled them during nearly two centuries. After the dissolution of the Company in 1798 the Netherlands possessions were governed by the mother-country.

Government and Constitution.

Politically, the territory, which is under the sovereignty of the Netherlands, is divided into (1) Lands under direct government; (2) Subject native States.

The administration and executive authority of the East Indies rest in the hands of a Governor-General. He is assisted by a Council of five members of an advisory character. The members of the Council, however, have no share in the executive. The Governor-General and the members of the Council are nominated by the Queen. In 1918 a 'Volksraad' was installed to discuss the budget, and to advise the Government on matters of general importance as a first step towards the development of self-government in the colony. Some of the members are appointed by the Government, some are elected by the local councils, and the Chairman is appointed by the Crown. It includes Europeans, natives and foreign Orientals (Chinese, Arabs). By the Netherlands India Constitution of 1925, Netherlands India is granted a measure of self-government in internal affairs under supervision of the Home Government, the legislative powers being shared between the Volksraad and the Governor-General.

The provinces, divided into residencies, are governed by Governors; the residencies by Residents, assisted by Assistant-Residents and a member of subordinate European officials. Local government is almost entirely exercised by native civil servants, headed by Regents. The Resident, however, remains responsible for governing in his division.

Governor-General.—Jhr. Dr. B. C. de Jonge, appointed May 8, 1931.

Area and Population.

—	Area: square miles	Population Oct. 7, 1930 (Census)	Population 1920 (Census)	Population per sq. mile 1930

[1] Including New Guinea.

The population of Java and Madura on October 7, 1930 (Census), consisted of 20,424,199 males and 21,294,136 females; 192,571 were Europeans, 40,891,093 natives, and 634,671 other Orientals, chiefly Chinese and Arabs (582,431 Chinese). The population of the outer provinces (census 1930) was 19,011,501 (included an estimate of 135,350), with 9,581,893 males and 9,294,258 females; 48,754 were Europeans, 18,253,531 Natives, 650,496 Chinese, and 58,720 other Asiatics.

The whole population of the colony is legally divided into Europeans, Natives and foreign Orientals. The former generally live under the same laws as the inhabitants of the mother-country, while in the government of the latter the Indian customs and institutions are considered. The Governor-General, however, is, in agreement with the Council, authorised to make individual exceptions to this rule.

Religion.

Religious liberty is granted to all denominations. The Protestant Church counted, at the end of 1933, 31 ministers, 33 preachers and assistant-preachers and 377 native preachers paid by the Government, and in addition 867 native assistants not paid out of public funds; the Roman Catholic 37 priests and 14 native preachers paid by the Government, 327 priests and 57 native preachers not salaried out of the public funds. During 1932, 82 missionaries of 22 societies were allowed to practise their missionary work.

The bulk of the natives are Mohammedans; there are also some millions of converted Christians and Animists, and a million Buddhists.

Education.

There are public (Government and municipal) primary schools, where instruction is given through the medium of the Dutch language, for (1) Europeans and persons assimilated with them (a 7 years' course); (2) Chinese ('Dutch-Chinese schools,' with a 7 years' course); (3) Natives ('Dutch-Native schools,' with a 7 years' course); and (4) link-schools (with a 5 years' course). Public schools where instruction is given through the medium of a native tongue are (1) the 'second class' schools (with a 5 or 6 years' course); and (2) village schools (with a 3 years' course of extremely elementary instruction). Besides, there are schools with an extended primary instruction (in the Dutch language) with a 3 years' course (Mulo-schools) open to all certificated pupils of the primary schools with a 7 years' course, without distinction of race. Side by side with the public schools, there are various private schools.

For secondary education there are public secondary schools with 5- and 3-year courses in connection with the primary schools, and also with 3-year courses in connection with the extended primary school. In addition to the Government institutions there are 6 private secondary schools for girls with a 3 years' course and 1 with a 5 years' course. Higher education is given at the Technical College at Bandoeng, erected in 1920. Furthermore, a College for Law opened in 1924, and a Medical College, erected in 1927, both at Batavia.

The following table shows the number of schools, the school attendance, the teaching staff, and the expenditure on education in 1933:—

Schools	Number	Teaching Staff	Pupils	Cost (in guilders)
Public European primary schools	176	808	25,567	
Private " " "	103	671	21,357	
Public Dutch-Chinese "	63	386	14,500	14,041,000
Private " " "	45	265	9,548	
Public Dutch-Native " [1]	245	1,456	49,194	
Private " " " [1]	114	695	23,853	
Public 2nd-class schools for Natives	2,703	9,927	396,496	
Private " " "	300	1,065	42,460	19,209,500
Village schools	16,075	28,208	1,374,330	
Public Mulo-schools	36	327	7,002	3,956,400
Private " "	29	193	4,112	
Public secondary schools	12	250	4,602	3,384,500
Private " "	12	154	6,217	
Governm't High Schools	3	53	748	979,600

[1] Inclusive link-schools.

Furthermore, there were in 1933 the following training schools:—Four public schools for training in engineering, architecture, electrical engineering, and mining (5 years' course), and one similar private school (4 years' course), with 109 teachers and 1,445 pupils; 43 public and 14 private trade schools for natives (40 two years' course, 7 three years' course and 1 four years' course), with 309 teachers and 4,995 pupils. Five commercial schools (3 years' course), with 409 pupils; 4 agricultural schools with 23 teachers and 333 pupils; one veterinary school with 18 teachers and 30 pupils; 7 training schools for civil, judicial, and administrative functions, with 67 teachers and 540 pupils, and one training school for police with 148 students; three public medical schools with 49 teachers and 421 students; one private nautical school for Europeans.

For native teachers there are 11 schools with instruction in the Dutch language with 138 teachers and 1,520 pupils; with instruction in the native tongue, 175 schools and courses with 346 teachers and 4,706 pupils. Furthermore, there are 19 schools and courses for European teachers with 236 teachers.

For Chinese teachers there is a school with instruction in the Dutch language with 16 teachers and 192 pupils.

Justice and Crime.

The administration of justice for Europeans is entrusted to European judges, while for natives their own chiefs have a large share in the trial of cases. There is a High Court of Justice at Batavia—courts of justice at Batavia, Samarang, Soerabaya, Padang, Medan and Makassar—Resident

courts and police courts for Europeans; native courts, magistrate courts, police courts, Regent courts, district courts, and courts of priests for natives.

Finance.

Revenue and expenditure :—

Year	Revenue	Expenditure	Surplus or Deficit
	Guilders	Guilders	Guilders
1933[1]	452,704,000	552,210,000	— 99,506,000
1934[2]	484,444.000	556,073,000	— 71,629,000
1935[2]	426,798,000	501,869,000	— 75,071,000

[1] Provisional results. [2] Estimates.

The sources of revenue in 1935 are stated as follows (in guilders): From direct and indirect taxes, 217,597,000; opium and salt monopolies, 19,369,000; railway service, 882,000; rubber, 1,170,000; dredging service, 1,030,000; Government printing office, 293,000; all other sources, 20,755,000, including net surplus of State business enterprises (as opium factory, pawnshops, cinchona- and tea-estate, tin, coal, harbours, post, telegraph and telephone services, and electric enterprises). Gross receipts of opium factory are 2,203,000: pawnshops, 8,438,200; cinchona- and tea-estate, 896,000; tin, 19,416,000; coal, 4,516,000; harbours, 12,448,000; electric enterprises, 2,913,000; post, telegraph and telephone services, 21,153,000. Public funded debt on December 31, 1934, was 1,215,000,000 guilders.

Defence.

The Netherlands forces in the East Indies constitute a colonial army which is entirely separate from the home army. The colonial army in 1934 comprised 4 regiments and 1 independent battalion of field infantry, each regiment consisting of 3 or 4 battalions and 1 unit of machine-guns and mortars, 2 battalions of light infantry, 12 garrison battalions and 1 garrison company, and the light infantry corps at Atchin. There were further 2 depôt battalions of infantry, 1 unit of cyclist-soldiers, 4 squadrons, 2 independent troops, 1 depôt squadron of cavalry, 6 mountain batteries, 6 motor batteries, 1 corps and 3 detachments of coast- and anti-aircraft artillery, 1 depôt battery of artillery, 2 field companies, 1 depôt company of sappers and miners, 1 radio company, 1 telephone company, 1 searchlight company, 1 motor-car company, and a flying corps consisting of 1 wing (3 flights of 6 aeroplanes). In 1918 compulsory service was introduced in the militia for Europeans (only of Netherland nationality) between 19 and 32 years of age, and in the *landstorm* between the ages of 31 and 45. On December 31, 1933, there were 1,526 reservist officers, 14,033 militia-men and 16,027 *landstorm*-men.

In most battalions there are 3 companies composed either of Europeans or of Natives; the greater part of the officers, and a proportion of the non-commissioned officers, are Europeans. The artillery has European and Native gunners and Native drivers. The Europeans (except the militia) and Natives are volunteers. The strength of the colonial army in 1933 was 1,109 officers, 30,130 volunteers, of whom 6,309 were Europeans and 23,821 Natives. Besides the Army there are different armed troops, viz.: (1) The Legion of the Native Prince Mangku Negara, consisting of infantry, numbering about 960 men. In case of war this Legion would be placed at the disposal of the Commander-in-Chief. (2) The Barisan, being a native infantry of Madura, consisting of 3 battalions, numbering 1,647 men, designed to maintain peace in the island and to participate in campaigns in case of war.

The Royal Navy in the Indies numbers 340 officers and 1,670 European and 1,700 Native non-commissioned officers and sailors and 167 militia, and consists of 36 men-of-war, including 2 light cruisers, 8 destroyers, 12 submarines, 2 gunboats, 6 minelayers, 3 torpedo motor-boats, 1 old battleship serving as gunnery-schoolship, 1 surveying vessel. There is, besides, a Naval Air Service with 62 hydroplanes, and the Colonial Navy, consisting of 14 smaller ships of no naval value (including 1 surveying vessel), with 147 Europeans and 671 natives, employed for civil service duties.

Production and Industry.

Scattered all over the isle of Java are many agricultural estates chiefly owned by agricultural companies, Europeans and Chinese. Yet the greater part of the soil of Java belongs to and is cultivated by the natives.

The harvested area under various 'native' cultures in Java and Madura was in 1933 as follows, in acres:—Irrigated rice, 8,221,212; non-irrigated rice, 1,123,860; maize, 5,452,979; cassava, 1,733,222; sweet potatoes, 395,395; groundnuts, 539,378; soya beans, 693,830; other pulses, 560,411; tobacco (native), 320,969; other secondary crops, 1,517,296; total, 20,558,552.

In 1933, the harvested areas of the principal 'other secondary crops' were potatoes, 43,177 acres; native sugar-cane, 26,782 acres; indigo, 5,197 acres; and capsicum, 194,158 acres. Separate from this area native tea was planted on 114,895 acres; native rubber on 15,654 acres; and native coffee on 45,537 acres.

The total area in use for agriculture in Netherlands-India in 1933 was 6,467,782 acres, of which 100,568 acres were Government-estates, 799,340 acres were private lands, and 164,781 acres lands hired from native states in Java and Madura, 2,638,399 acres lands hired on long-lease (erfpacht) from the Government or from native states, 2,522,288 acres agricultural concessions in the Outer Provinces granted by the Government or by native states (landbouwconcessie), 242,404 acres lands hired on short-lease from natives. Of the total only 2,810,151 acres were planted.

The following table gives a comparison of the production of sugar for 5 years:—

—		1929	1930	1931	1932	1933
Harvested area	acres	486,172	489,269	496,247	410,521	208,409
Total production	tons	2,870,979	2,915,866	2,772,443	2,560,182	1,372,585
Factories	number	179	179	178	165	116

Other products are shown (for 2 years) as follows (metric tons):—

	1932	1933		1932	1933
Coffee	132,673[1]	106,444[4]	Tea	81,937[7]	75,292[7]
Rubber[9]	212,848[2]	287,778[5]	Cacao	1,449	1,680
Cinchona	10,120	7,534	Oil palms[10]	90,073	112,154
Tobacco	45,114[3]	38,557[6]			

[1] Including 69,958 tons native coffee.
[2] Including 61,447 tons native rubber.
[3] Including 4,337 tons bought up from natives.
[4] Including 49,772 tons native coffee.
[5] Including 115,576 tons native rubber.
[6] Including 5,999 tons bought up from natives.
[7] Including 12,424 tons native tea.
[8] Including 11,798 tons native tea.
[9] *Hevea* only.
[10] Oil.

The tin mines of Banka are worked by the Government; those of Billiton by a combined Governmental and private undertaking; and those of Riau and Sumatra by private enterprise. Their total yield was in metric tons: 1931, 27,813; 1932, 17,058; 1933, 15,167; 1934, 13,643.

The yield of the principal coal mines in Java, Sumatra and Borneo was, in metric tons: 1930, 1,870,823; 1931, 1,404,404; 1932, 1,050,300; in 1933, 1,041,844.

Number of animals in 1933:—horses, 650,052; cattle, 4,962,629; buffaloes, 3,293,440.

The production of the principal mineral oil enterprises was, in metric tons: 1930, 5,531,482; 1931, 4,698,050; 1932, 5,093,164; 1933, 5,527,315.

Commerce.

No difference is made between Dutch and foreign imports and vessels. There is a tariff on certain goods; on some articles there is a small export duty.

The import of the following articles is restricted: beer, cement, white bleached cotton goods, coloured woven goods and sarongs, rice and soya-beans. Import is allowed only by licence.

Imports and exports in thousand guilders:—

Year	Government			Private			Grand Total
	Merchandise	Specie	Total	Merchandise	Specie	Total	
				Imports			
1929	36,077	41,350	77,427	1,076,443	12,103	1,088,546	1,165,973
1930	32,579	30,050	62,629	856,776	2,866	859,642	922,271
1931	20,118	14,000	34,118	579,941	806	575,747	609,865
1932	10,366	16,000	26,366	383,122	392	383,514	409,880
1933	7,615	1,500	9,115	322,056	248	322,304	331,419
				Exports			
1929	239	33,820	34,059	1,453,262	480	1,453,742	1,487,801
1930	469	24,110	24,579	1,166,571	336	1,166,907	1,191,486
1931	406	23,897	24,303	763,164	10,698	773,862	798,165

1933	Steamers	10,730	10,205,315	6,211	2,760,633
	Sailing vessels	3,231	156,936	2,017	73,279

In 1933 the Netherland East Indies had about 36,000 miles of highways, of which 25,000 were macadam (5,175 miles with bituminous surface), 50 asphalt-concrete and brick, and 10,950 low-type, earth, sand-clay, or gravel, graded and drained. The road mileages of some of the larger islands are reported as follows: Java, 15,800; Sumatra, 11,400; Borneo, 1,400; Celebes, 3,850; Moluccas, Bali, Lombok, and Timor, 3,060.

At the end of 1933 the total length of rail and tramways (State and private) was about 4,652 miles (3,420 in Java and 1,232 in Sumatra); the gross receipts (1933) about 54,504,000 guilders; working expenses (1933), 45,144,000 guilders; number of passengers (1933) about 75,643,000.

The Government telegraph lines extended in 1933 over 4,621 miles, the Government telegraph cables over 3,518 miles, making a total of 8,139 miles. The number of post and telegraph offices (combined), post offices (simple), telegraph offices (simple) and stations in 1933 were respectively 226, 79, and 529 for Java and Madura, and 174, 110, and 294 for the other islands, a total of 1,412 offices and stations. Moreover, there were 1,404 rural postal agencies and 679 rural telegraph agencies. The number of telegraph offices includes 49 government radio telegraph stations for public service (including 9 coast stations and 2 stations for wireless traffic with other countries), 6 private radio telegraph stations for coastal public service; and 21 radio posts erected in isolated regions for the purpose of connecting the Government Civil Service officials of these outstations with more populated centres. The numbers of telegrams were 816,000 (internal) and 644,000 (foreign). Internal ordinary letters and postcards carried in 1933, 31,494,000, while there were 34,893,000 printed matter, newspapers, etc., 1,574,000 paid registered articles, 11,276,000 official letters and 1,903,000 official registered articles for the interior. The international correspondence dealt with was 10,401,000 letters and postcards, 9,416,000 other articles, and 735,000 registered articles.

The Government telephone aerial lines extended in 1933 over 14,281 miles, the Government telephone cables over 995 miles. At the end of 1933 there were 350 telephone exchanges and 38,267 telephones.

The Royal N.I. Airlines Cy. (K.N.I.L.M.) maintains internal subsidised airlines between the principal towns of Java, Sumatra, and Singapore. In 1933 about 543,707 miles were covered on the regular lines, 9,956 passengers and 22,546 kilogs. of mail were carried.

Since October 15, 1931, the Royal Dutch Airlines Cy., The Hague (K.L.M.), maintains a weekly service, carrying mail, freight and passengers, between Amsterdam and Batavia.

Banking and Credit.

The Java Bank, established in 1828, has a capital of 9,000,000 guilders. On February 18, 1935, its position (in thousands of guilders) was as follows: gold and silver, 145,140; discounts and advances, 70,990; notes in circulation, 176,770; deposits and bills payable, 37,560. The other large Dutch banking institutions are the Netherlands Trading Company, the N.E.I. Commercial Bank, and the N.E.I. Escompto Company, besides which there are branches of British and Japanese banks.

In the Postal savings-bank there were in 1933 about 419,900 depositors, with a deposited amount of about 31,839,000 guilders.

Weights and Measures.

The metric system of weights and measures was officially introduced on January 1, 1934.

The following are the old weights and measures:—

The *Picul* . . .	= 133⅓ lbs. avoirdupois.
,, *Catty* . . .	= 1⅓ ,, ,,
,, *Tjengkal* . .	= 4 yards
,, *Paal* (Java) .	= 1,507 metres
,, *Paal* (Sumatra) .	= 1,852 metres
,, *Square Paal* . .	= 227 hectares = 561·18 acres
,, *Bouw* . . .	= 1·7537 acres

The legal coins of 10, 5, 2½, 1 and ½ guilders, as well as the weights and measures, of Dutch India, are those of the Netherlands. But the country has coins of its own, viz., 25, 10, 5, 2½, 1 and ½ cent pieces.

Consular Representatives.

British Consul-General at Batavia.—H. Fitzmaurice, M.B.E., C.M.G.

There are also consular officers at Samarang, Sourabaya, Makasser, Medan, and Padang.

DUTCH WEST INDIES.

The Dutch possessions in the West Indies are (*a*) *Surinam*, or *Dutch Guiana*, and (*b*) *Curaçao*.

Surinam or Dutch Guiana.

Dutch Guiana or Surinam is situated on the north coast of S. America between 2° and 6° N. latitude, and 53° 50′ and 58° 20′ W. longitude, and bounded on the north by the Atlantic Ocean, on the east by the river Marowijne, which separates it from French Guiana, on the west by the river Corantijn, which separates it from British Guiana, and on the south by inaccessible forests and savannas to the Tumac-Humac Mountains, which separates it from Brazil.

At the peace of Breda, in 1667, between England and the United Netherlands, Surinam was assured to the Netherlands in exchange for the colony of New Netherlands in North America, and this was confirmed by the treaty of Westminster of February, 1674. Since then Surinam has been twice in the possession of England, 1799 till 1802, when it was restored at the peace of Amiens, and in 1804 to 1816, when it was returned according to the Convention of London of August 13, 1814, confirmed at the peace of Paris of November 20, 1815, with the other Dutch colonies, except Berbice, Demerara, Essequibo, and the Cape of Good Hope.

The administration and executive authority are in the hands of a governor

assisted by an advisory council consisting of the governor as president, a vice-president and three members, all nominated by the Queen of the Netherlands. The Colonial States form the representative body of the colony. The members (13) are elected for 6 years.

Governor.—Prof. Dr. J. C. *Kiclstra.* Appointed August 16, 1933.

Dutch Guiana is divided into six districts.

Area, 54,291 English square miles; population (December 31, 1933) 161,008 inclusive of the negroes and Indians living in the forests. Capital, Paramaribo, 50,294 inhabitants.

Births and deaths for 3 years:—

	Births			Deaths		
	1931	1932	1933	1931	1932	1933
Males . . .	2,069	2,106	2,313	1,082	984	1,022
Females . . .	2,097	2,080	2,219	884	843	831
Total . .	4,166	4,186	4,532	1,966	1,827	1,853

Number of marriages in 1931, 386; in 1932, 420; in 1933, 438.

There is entire religious liberty. At the end of 1933 the numbers of the different religious bodies were: Reformed and Lutheran, 12,984; Moravian Brethren, 29,453; Roman Catholic, 27,294; Jews, 769; Mohammedans, 36,899; Hindus, 30,667.

There were, in 1933, 43 public schools with 8,001 pupils, and 78 private schools with 12,680 pupils.

There is a court of justice, whose members are nominated by the Sovereign. There are four cantonal courts and two circuit courts.

For relieving pauperism the Government not only subsidises orphan-houses and other religious or philanthropical institutions, but itself maintains an almshouse.

The expenditure, the local revenue (derived from import, export, and excise duties, taxes on houses and estates, personal imposts, and some indirect taxes), and the State subvention are shown as follows for 4 years in thousands of guilders:—

—	Expenditure	Local Revenue	Subvention	—	Expenditure	Local Revenue	Subvention
1932	7,690	4,679	3,011	1934	6,847	3,990	2,857
1933	6,767	3,860	2,907	1935	6,744	4,056	2,688

The Dutch forces in Surinam consist of a civic guard and infantry, the latter containing, in 1933, 8 officers and 186 non-commissioned officers and men.

Principal products for 2 years:—

	1932	1933		1932	1933
Sugar (kilos) .	24,572,000	16,454,000	Rice (kilos) .	25,048,500	27,197,200
Cacao (kilos) .	125,800	102,500	Maize (kilos) .	1,706,700	1,799,500
Bananas (bunch.)	422,900	442,200	Rum (litres) .	350,000	365,000
Coffee (kilos) .	3,853,500	2,625,000	Molasses (litres)	4,633,100	3,049,900

Gold production in 1933 was 385,500 grammes, that of balata 115,000 kilos, and of bauxite 101,500 metric tons.

In 1933 there were 18,245 head of cattle, 3,413 goats and 6,063 pigs. Imports and exports for 6 years :—

Year	Imports	Exports	Year	Imports	Exports
	Guilders	Guilders		Guilders	Guilders
1928	9,194,989	11,684,859	1931	6,626,645	6,170,886
1929	8,638,900	7,946,629	1932	5,650,259	4,616,374
1930	9,188,476	8,389,803	1933	4,899,186	5,801,671

Principal exports in 1933: Sugar, 13,423,456 kilos; rum, 150,319 litres; rice, 1,635,074 kilos; coffee, 2,658,776 kilos.

Board of Trade figures show U.K. imports from Dutch Guiana in 1934, 28,695*l.*; and U.K. exports to Dutch Guiana, 68,301*l.*; U.K. re-exports to Guiana, 1,567*l.*

In 1933 there entered 193 vessels of 783,874 register tons, and cleared 190 vessels of 770,250 register tons.

The communication between several districts of the colony is carried on by vessels and small steamers. A Colonial steamship service extends to British Guiana. The capital, Paramaribo, has a harbour open to ships of 20 feet draught; regular connections in both directions exist with Europe and the United States by different steamship companies (Royal Netherlands Steamship Company, Compagnie Générale Transatlantique, Ocean Dominion Steamship Corporation and Aluminium Line). In September, 1929, a weekly air service was established between Paramaribo and the United States. In February, 1930, air services were further increased when Paramaribo was made a regular stop of a weekly service between the United States and Buenos Aires. Both these services are by the Pan-American Airways, Inc.

Curaçao.

The colony of *Curaçao* consists of two groups of islands about 500 miles apart. One group is made up of the first three islands in the following list; the other of the last three :—

—	Square Miles	Population Dec. 31, 1933
Curaçao	210	50,276
Bonaire	95	17,614
Aruba	69	6,066
St. Martin [1]	17	2,815
St. Eustatius	7	1,129
Saba	5	1,495
	403	79,395

[1] Only the southern part belongs to the Netherlands, the northern to France.

Governor.—B. W. T. van Slobbe. Appointed January 1, 1930.

The Governor is assisted by a Council composed of a vice-president and three members, nominated by the Sovereign. There is also a Colonial Council consisting of thirteen members nominated by the Sovereign. The city of Willemstad, on Curaçao, is the seat of government. The different islands, except Curaçao, are under officials called 'Gezaghebbers,' nominated by the Governor. In 1933, 2,706 births were registered, 536 marriages and 851 deaths. Schools in 1933 numbered 49 with 11,044 pupils.

The revenue is derived from import, export, and excise duties, taxes on income, on land, and some other taxes. In the Budget for 1935 the

revenue is estimated at 6,482,700 guilders, and the expenditure at 6,478,453 guilders.

The garrison of Curaçao consisted at the end of 1933 of 1 officer and 65 men, with 1 man-of-war, and that of Aruba of 1 officer and 19 men.

The imports of Curaçao and the other islands in 1933 were valued at 150,268,613 guilders; the exports of Curaçao and the other islands at 194,560,473 guilders. The chief products are maize, beans, pulse, cattle, salt, and phosphate of lime. The chief industry is oil-refining.

There entered the ports of the different islands in 1933, 11,013 vessels 48,303,507 tons net.

Vice-Consul at Curaçao.—B. L. Maduro.

NICARAGUA.

(República de Nicaragua.)

Constitution and Government.

The Constitution of the Republic of Nicaragua came into operation on April 5th, 1913. It vests the legislative power in a Congress of two houses consisting of 43 deputies, elected for 4 years by universal suffrage, and 24 Senators elected for 6 years. The President is elected for 4 years.

President.—Don Juan B. *Sacasa* (elected November 4, 1932; assumed office January 1, 1933).

The President exercises his functions through a council of responsible ministers, composed of the heads of the departments. He may form, when occasion requires, a Council of State to advise on public contracts and other matters.

The Republic is divided into 13 'departments' and 2 'comarcas,' each of which is under a political head, who has supervision of finance, instruction and other matters, and is also military commandant. The Mosquito Reserve now forms a department named Bluefields.

By an agreement reached in 1911 between the Government and the British bondholders, modified and extended in 1917 and 1920, customs receipts and certain other revenues are collected by the Collector-General of Customs (who must be an American) and applied by a High Commission of

3 members (2 of whom must be Americans) to the payment of the external debt, the balance being turned over to the Government.

On February 18, 1916, the Bryan-Chamarro treaty between Nicaragua and the United States was signed, under which the United States in return for 3 million dollars acquired the option for a canal route through Nicaragua and also a naval base in the Bay of Fonseca on the Pacific coast and Corn Island on the Atlantic coast. It was ratified by Nicaragua on April 7, 1916, and by the United States on June 24, 1926. American Army engineers reported to the U.S. Congress in 1931 that a Nicaraguan canal would cost 700,000,000 dollars, whereas a third set of locks on the Panama Canal could be constructed for 140,000,000 dollars.

Area and Population.

Area estimated at 51,660 English square miles, with a coastline of about 300 miles on the Atlantic and 200 miles on the Pacific. The population (census of 1920) was 668,119, including 311,613 males and 356,506 females. Estimated population in 1930, based on registration of voters, 750,000. This is the largest in area and most thinly populated of the Central American republics. At least 75 per cent. of the inhabitants live in the western half of the country. The two halves of the Republic differ greatly in many respects and there is little communication between them, the journey by trail and river being slow and difficult.

The people of the western half of the Republic are principally of mixed Spanish and Indian extraction, though there are a considerable number of pure Spanish descent and many Indians. The population of the eastern half is composed mainly of Mosquito and Zambo Indians and Negroes from Jamaica and other islands of the Caribbean, with some Americans and a comparatively small number of Nicaraguans from the western part of the Republic. Immigration has been severely restricted since 1930.

There are 105 municipalities of which 28 have from 2,000 to 30,000 inhabitants. The capital is Managua, situated on the lake of the same name, with (1926) 32,536 inhabitants; it was almost totally destroyed by earthquake on March 31, 1931, but is being rebuilt. León, formerly the capital, had a population of 23,565; Granada, 18,066; Matagalpa, 10,271; Masaya, 13,763; Jinotega, 6,990; Chinandega, 10,307; Rivas, 4,081; Esteli, 4,583; Matapa, 4,561; Somoto, 6,182; Boaco, 4,342; Jinotepe, 6,317; Diriamba, 6,151; Bluefields, 4,706. Other towns are Corinto, 2,307; Cabo-Gracias; and San Juan del Sur on the Pacific.

Religion, Education and Justice.

The prevailing form of religion is Roman Catholic. The Republic constitutes one archbishopric and ecclesiastical province (Nicaragua). The Seat of the Archbishop is Managua. There are three bishoprics, León, Granada and Matagalpa.

There were (1931) 187 state elementary schools, 12 secondary schools, 5 professional schools, 408 mixed (urban and rural) schools and 233 other schools. The total number of teachers is 1,856. After the earthquake in March, 1931, all schools were closed, to be opened (1934) as financial conditions permit. The number of illiterate persons, of all ages, is about 60 per cent. of the population. Secondary education is neither obligatory nor free, the secondary schools being carried on by private individuals. Nicaragua has three universities, in the cities of Managua, León, and Granada.

The judicial power is vested in a supreme Court of Justice at Managua, three chambers of second instance, and judges of inferior tribunals.

Finance.

Revenue and expenditure for 5 years in córdobas (4.86 córdobas = £1; 1 córdoba = 1 U.S. dollar):—

—	1929	1930[1]	1931[2]	1932[2]	1933[2]
	Córdobas	Córdobas	Córdobas	Córdobas	Córdobas
Revenue . .	6,553,094	4,623,419	3,934,184	2,770,574	2,843,579
Expenditure .	6,450,711	5,000,000	3,934,286	2,770,574	2,843,579

[1] Estimates, as actual records were destroyed by the earthquake of March, 1931.
[2] Budget estimate.

Customs duties provide from 50 to 62 per cent. of total revenues.

Total public debt on February 28, 1934, included Sterling bonds of 1909 outstanding, £479,240, equal at par to 2,332,221 córdobas; guaranteed customs bonds of 1918, 1,000,000 córdobas; floating debt, including claims arising out of the revolution, 6,673,473 córdobas. Service of internal and external debt took 608,626 córdobas in 1931.

Defence.

The National Guard numbers 178 officers and 2,140 other ranks. Period of enlistment, 3 years; during period of enlistment, soldiers cannot vote. American marines were withdrawn in January, 1933.

A coastguard boat patrols the east coast to prevent smuggling.

Production and Industry.

Of the total land area (about 30 million acres), about 10,000,000 acres are under timber, 600,000 acres are used for grazing and about 1,000,000 acres are cultivated.

Agriculture is the principal source of national wealth. The banana is the principal agricultural product of the eastern part of the Republic; exports, 1933, 3,698,024 stems. Cocoanuts are also of some importance, and plantains, oranges, pineapples, and yucca are raised for home consumption. The products of the western half are much more varied, the most important being coffee, sugar cane, cacao, corn, and beans. Sugar producers have a combine, under government control, which fixes the price for internal sales; profits are now made solely on domestic consumption; exports, 1933, 1,269 metric tons. Rice is grown to a small extent, and some wheat in the hilly Nueva Segovia district, while tobacco is cultivated round Masaya. The annual average coffee crop, from 104,000 acres, is estimated at 30,000,000 lbs. Exports (in quintals) were, in 1933, 297,911; 1932, 176,684; in value, coffee exports constitute from 30 to 46 per cent. of total exports. With the exception of bananas, plantains, and yucca or cassava, the greater part of the food supply of the eastern section is imported from the United States. The western half of the country produces much of its own food.

Timber production is declining, though the forests contain mahogany and cedar, which were formerly largely exported, three varieties of rosewoods, guayacan (*lignum vitæ*), dye-woods, gums, and medicinal plants. Wild rubber is abundant in the virgin forests on the Atlantic watershed, but there are very few rubber plantations owing to the labour shortage. Exports of dyewoods, 1933, 2,494,661 board feet; timber, 2,563,695 board feet.

There are several gold mines, worked by American and British companies,

one having also silver. Exports of gold, 1933, 414,554 dollars. Copper and precious stones are also found. Banditry has forced the closing down of several mines.

Commerce.

The foreign trade of Nicaragua, in córdobas, was as follows in 5 years (1 córdoba = 1 U.S. dollar):—

—	1929	1930	1931	1932	1933
	Córdobas	Córdobas	Córdobas	Córdobas	Córdobas
Imports . .	11,797,440	8,172,360	6,015,481	3,479,878	3,814,261
Exports . .	10,872,526	8,343,358	6,575,058	4,541,597	4,862,496

The customs collections in 1933 were 1,152,459 córdobas.

In 1933 the value of the principal imports (in córdobas or dollars) was:—Cotton goods, 1,005,142; iron and steel, 216,851; chemicals, drugs, and medicines, 276,617; flour, 200,042. The principal countries of import in 1933 were (values in dollars):—United States, 2,893,820 (63 per cent.); Great Britain, 492,061 (13 per cent.); and Germany, 269,675 (7 per cent.).

In 1933 the value of the principal exports (in córdobas or dollars) was:—Coffee, 2,214,411; bananas, 1,849,013. The principal countries of export, in values exported (in córdobas or dollars), were: United States, 2,437,328 (50 per cent.); France, 639,787 (13 per cent.); Germany, 685,623 (14 per cent.); Holland, 275,990; and Great Britain, 253,540 (7 per cent.).

Total trade between Nicaragua and United Kingdom (Board of Trade Returns) for 5 years:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Nicaragua to U.K. .	104,614	178,134	122,168	50,687	98,830
Exports to Nicaragua from U.K. .	145,709	107,607	86,363	104,893	104,689
Re-Exports to Nicaragua from U.K.	1,152	1,264	584	1,020	951

Shipping and Communications.

Western Nicaragua has two seaports, Corinto (the larger) and San Juan del Sur, through which pass approximately 70 per cent. of the imports and exports of the Republic. The eastern ports are Bluefields (the chief), Cabo Gracias, Puerto Cabezas, and San Juan del Norte (Greytown).

Most of the roads of the country are mere tracks over which ox-carts alone can travel in the wet season, but highways have been or are being constructed between the following places: Managua-Matagalpa-Jinotega, 104 miles; León-Matagalpa, 80 miles; Puerto Diaz-Juigalpa-La Libertad, 50 miles; Masaya to Tipitapa, 25 miles. There is a fairly good road from Managua to Granada via Masaya, with a branch to Diriamba. There are 150 miles of motor roads and 200 miles of cart roads, but the east coast is practically shut off from the west coast.

The Pacific Railroad of Nicaragua, owned by the Government and the principal line in the republic, has a total length of 159 miles, all single-track. The line runs from Corinto to León, Managua, Granada, and Diriamba, and from León to El Sauce, and from San Jorge to San Juan del Sur in the district of Rivas. There is a regular bi-weekly air service (Pan-American Airway) connecting Managua with the Central America republics and the United States.

There are (1934) 2,882 miles of telegraph wire, and 104 offices; also 918

miles of telephone wire and 64 telephone stations serving 1,173 instruments. Telephone service is good along the line of the Pacific Railway, but unreliable elsewhere. There are 116 post offices, and good service between the chief towns of the western section, but service into the interior and to the east coast is irregular and inadequate. All-America Cable Co. connects with New York.

The Tropical Radio Telegraph Company maintains a powerful station at Managua, and branch stations at Bluefields and Cabo Gracias. Other companies maintain stations at Bragman's Bluff, El Gallo and Rio Grande.

Money and Banking.

Since 1912 the monetary unit has been the gold *córdoba*, equivalent to the American dollar, containing 1·672 gr. of gold nine-tenths fine, and divided into 100 centavos. Banknotes based on the córdoba are issued by the National Bank of Nicaragua, the Issue Department of which maintains deposits in New York equal to 60 per cent. of the circulation above the fiduciary issue allowed of 1,500,000 córdobas. On January 31, 1934, note circulation was 2,164,808 córdobas; fiduciary circulation was 1,710,109 córdobas, and foreign exchange held abroad, 777,275 dollars; silver, nickel and copper coins in circulation, 509,500 córdobas. Other gold coins provided by law are 10, 5 and 2½ córdobas, but no gold coins have ever been struck. National banknotes form the great part of the currency. United States notes and silver also circulate.

The National Bank of Nicaragua at Managua was founded in 1912, and since 1924 has been owned by the Government though the directors meet in New York; they include Nicaraguans and Americans, the latter identified with the American International Acceptance Bank. It is the sole bank of issue and had (December 31, 1933) a capital of 300,000 dollars, surplus of 300,000 dollars, and special reserves of 249,374 dollars; deposits were 2,144,809 dollars. Other banks are the Anglo-South American Bank, Ltd., and the Anglo-Central American Commercial Bank, Ltd.

Since January 7, 1893, the metric system of weights and measures has been in use.

Diplomatic and Consular Representatives.

1. Of Nicaragua in Great Britain.

Chargé d'Affaires.—Constantino Herdocia.

Vice-Consul, in charge at London.—F. V. Cock.

There are Consular representatives in Liverpool, Manchester, Cardiff, and Nottingham.

2. Of Great Britain in Nicaragua.

Envoy Extraordinary, Minister Plenipotentiary, and Consul-General.—John Henry Stopford Birch. Appointed August 23, 1933. (Resident at Guatemala City.)

Chargé d'Affaires and Consul.—W. M. Gurney, O.B.E. (resident at Managua).

There are Vice-Consuls at Managua, Matagalpa, Corinto, León, and Puerto Cabezas.

NORWAY.

(Norge.)

Reigning King.

Haakon VII, born August 3, 1872; the second son, Carl, of Frederik VIII, King of Denmark, elected King of Norway by the Storting, November 18, 1905; accepted the crown through his grandfather, the late King Christian of Denmark, November 18, 1905; landed in Norway November 25, 1905; married, July 22, 1896, to Princess *Maud*, born November 26, 1869, the third daughter of the late Edward VII, King of Great Britain and Ireland.

Son.—Prince *Olav*, Crown Prince, born July 2, 1903, married on March 21, 1929, to Princess Märtha of Sweden. *Offspring:* Princess *Ragnhild Alexandra*, born June 9, 1930; Princess *Astrid Maud Ingeborg*, born February 12, 1932.

According to the Constitution, Norway is a constitutional and hereditary monarchy. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

By the Treaty of January 14, 1814, Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people declared themselves independent and elected Prince Christian Frederick of Denmark as their King. The foreign Powers refused to recognise this election, and on August 14 a convention was made proclaiming the independence of Norway in union with Sweden. This was followed on November 4 by the election of Karl XIII. as King of Norway. Norway declared this union dissolved, June 7, 1905, and after some months' negotiation, a mutual agreement for the repeal of the union was signed, October 26, 1905. The throne of Norway was offered to a prince of the reigning house of Sweden, but declined, and, after a *plébiscite*, Prince Carl of Denmark was formally elected King. In November, 1907, a treaty guaranteeing the integrity of Norwegian territory was signed at Kristiania (Oslo) by the representatives of Norway, Great Britain, France, Germany, and Russia, and on January 8, 1908, received the unanimous approval of the Storting. The treaty was denounced January 8, 1924.

The following is a list of the Sovereigns of Norway since the year 1204, with the date of their accession.

Inge Baardssøn	1204	Erik af Pommern	1389
Haakon Haakonssøn	1217	Kristofer af Bayern	1442
Magnus Lagabøter	1263	Karl Knutssøn	1449
Erik Magnussøn	1280	Same Sovereigns as in Denmark	1450–1814
Haakon V. Magnussøn	1299	Kristian Fredrik	1814
Magnus Erikssøn	1319	Same Sovereigns as in Sweden	1814–1905
Haakon VI. Magnussøn	1355	Haakon VII.	1905
Olav Haakonssøn	1381		
Margreta	1388		

The King has a civil list of 700,000 kroner, the Crown Prince 100,000 kroner.

Constitution and Government.

The Constitution of Norway, called the Grundlov, bears date May 17, 1814, with several modifications passed at various times. It vests the legislative power of the realm in the Storting, the representative of the sovereign people. Only the Storting can vote supplies and has the power of the purse. The royal veto may be exercised twice; but if the same Bill pass three Stortings formed by separate and subsequent elections, it becomes the law of the land without the assent of the sovereign. The King has the command of the land and sea forces, and makes all appointments, but except in a few cases, is not allowed to nominate any but Norwegians to public offices under the crown.

The Storting assembles every year. The meetings take place *suo jure*, and not by any writ from the King or the executive. They begin on the first weekday after January 10 each year, and the Storting remains assembled as long as it may find it necessary. Every Norwegian subject of twenty-three years of age (provided that he resides and has resided for five years in the country) is entitled to elect, unless he is disqualified from a special cause. Women are, since 1913, entitled to vote under the same conditions as men. The mode of election is direct, and the method of election is proportional. Every third year the people choose their representatives, the total number being 150. The country is divided into districts, each electing from three to eight representatives. Representatives must not be less than thirty years of age, must have resided in Norway for ten years, and be voters in the district from which they are chosen. Former members of the Cabinet can be elected representatives of any district of the Kingdom without regard to their residence.

At the elections for the Storting held in October, 1933, the following parties were elected for the period 1933–1935: Labour Party 69, Conservatives 31, Liberals 24, Agricultural Party 23, and 3 others.

The Storting, when assembled, divides itself into two sections, the 'Lagting' and the 'Odelsting.' The former is composed of one-fourth of the members of the Storting, and the other of the remaining three-fourths. The Ting nominates its own presidents. Questions relating to laws must be considered by each section separately. The inspection of public accounts and the revision of the Government, and impeachment before the Rigsret, belong exclusively to the Odelsting. All other matters are settled by both sections in common sitting. The Storting elects five delegates, whose duty it is to revise the public accounts. All new laws must first be laid before the Odelsting, from which they pass into the Lagting to be either accepted or rejected. If the Odelsting and Lagting do not agree, the two sections assemble in common sitting to deliberate, and the final decision is given by a majority of two-thirds of the voters. The same majority is required for alterations of the Constitution. The Lagting and the ordinary members

of the supreme court of justice (*Höiesteret*) form a High Court of the Realm (the *Rigsret*) for the impeachment and trial of Ministers, members of the Höiesteret, and members of the Storting. Every member of the Storting has a salary of 5,500 kroner per annum, besides travelling expenses.

The executive is represented by the King, who exercises his authority through a Cabinet called a Council of State (*Statsraad*), composed of a Prime Minister or Minister of State (*Statsminister*), and at least seven ministers (*Statsraader*). The ministers are entitled to be present in the Storting and to take part in the discussions, but without a vote. The following are the members of the Cabinet, appointed March 19, 1935:—

Prime Minister and Minister of Public Works.—Johan *Nygaardsvold.*
Minister of Foreign Affairs.—Professor Halvdan *Koht.*
Minister of Finance.—Adolf *Indreboe.*
Minister of Commerce.—Alfred *Madsen.*
Minister of Social Affairs.—Kornelius *Bergsvik.*
Minister of Ecclesiastical Affairs.—Nils *Hjelmtveit.*
Minister of Defence.—Fredrik *Monsen.*
Minister of Justice.—Trygve *Lie.*
Minister of Agriculture.—Hans *Ystgaard.*

II. Local Government.

The administrative division of the country is into twenty districts, each governed by a chief executive functionary (*Fylkesmann*), viz., the town of Oslo and Bergen, and 18 *Fylker* (counties). There are 43 towns, 24 'Ladesteder' (ports), and 682 rural communes (*Herreder*), mostly parishes or sub-parishes (wards). The government of the Herred is vested in a body of representatives (from 12 to 48), and a council (*Formannskap*), elected by and from among the representatives, who are four times the number of the 'Formannskap.' The representatives elect conjointly every third year from among the 'Formannskap' a chairman and a deputy chairman. All the chairmen of the rural communes of a Fylke form with the Fylkesmann the Fylkesting (county diet), which meets yearly to settle the budget of the Fylke. The towns and the ports form 65 communes, also governed by a council (5 to 21), and representatives (four times the size of the council). The members of the local governing bodies are elected under the same conditions as those of the Storting. Since 1910 women are entitled to vote and to be elected, under the same conditions as men.

Area and Population.

I. Progress and Present Condition.

Fylker	Area: English square miles	Census Population Dec. 1, 1920	Census Population Dec. 1, 1930	Pop. per square mile 1930
Oslo (town) . .	6·3	258,483	253,124	40,178·41
Akershus . .	2,063·9	179,962	236,939	114·80
Östfold . . .	1,613·4	160,128	167,030	103·53
Hedmark . .	10,621·3	149,619	157,942	14·87
Opland . . .	9,608·1	129,149	137,710	14·33
Buskerud . .	5,738·5	137,249	143,073	24·93
Vestfold . . .	903·2	124,060	134,107	148·48

Aust-Agder . .	3,606·8	74,700	73,816	20·47
Vest-Agder . .	2,793·8	82,807	81,233	29·08
Rogaland . .	3,545·7	166,423	173,258	48·86

Fylker	Area: English square miles	Census Population Dec. 1, 1920	Census Population Dec. 1, 1930	Pop. per square mile 1930
Hordaland . .	6,043·2	156,218	164,376	27·20
Bergen (town) .	13·9	91,443	98,303	7,072·16
Sogn og Fjordane .	7,135·1	90,114	91,808	12·87
Möre . . .	5,811·7	159,391	165,064	28·40
Sör-Tröndelag .	7,241·4	166,797	174,946	24·16
Nord Tröndelag .	8,659·1	89,221	96,016	11·09
Nordland . .	14,727·9	173,826	186,920	12·69
Troms . . .	10,005·5	90,750	97,467	9·74
Finnmark . .	18,580·5	44,190	53,308	2·87
Total . .	124,556·3	2,649,775	2,814,194	22·59

In 1930, 2,013,680 were domiciled in rural districts, and 800,514 in towns; there were 1,371,919 males, and 1,442,275 females.

Conjugal condition of the domiciled population, 1930:—

—	Unmarried	Married	Widowed and Divorced
Males	841,550	473,650	56,719
Females	847,088	476,248	118,939

The distribution of the population according to professions in 1930, showed 838,848 (29·8 per cent.) dependent on agriculture, forestry and gardening; 774,031 (27·6 per cent.) on industry; 285,555 (10·1 per cent.) on trading; 272,805 (9·7 per cent.) on transportation; 196,772 (7 per cent.) on fishery and whaling; 155,257 (5·5 per cent.) on public administration and liberal professions.

II. Movement of the Population.

Births, Deaths, and Marriages.

Year	Marriages	Births (exc. still-born)	Stillborn	Illegitimate, living	Deaths (exc. still-born)	Excess of Births
1929	17,795	48,372	1,293	3,459	32,023	16,349
1930	18,064	47,844	1,274	3,397	29,616	18,228
1931	17,666	45,989	1,238	3,208	30,674	15,315
1932	17,612	45,451	1,140	3,260	30,102	15,349
1933[1]	17,787	42,610	972	2,637	29,168	13,442

[1] Provisional figures.

Number of emigrants in 1933:—406 (299 to the United States and 21 to Canada).

III. Principal Towns.

At the census taken December 1, 1930, the number of towns with a population of above 100,000 was one, above 20,000 five, above 10,000 eighteen, above 5,000—twenty-eight in all. The population of the principal towns was:—

Oslo . .	253,124	Alesund . .	18,350	Tönsberg .	11,997
Bergen . .	98,303	Haugesund .	17,166	Horten . .	10,788
Trondheim .	54,458	Skien . .	15,596	Larvik . .	10,471
Stavanger .	46,780	Kristiansund .	14,646	Arendal . .	10,351
Drammen .	25,493	Fredrikstad .	14,053	Halden . .	10,337
Kristiansand .	18,781	Sarpsborg .	12,392	Tromsö . .	10,336

As from January 1, 1925, the name of the capital, Kristiania, was changed to Oslo.

Religion and Education.

The evangelical Lutheran religion is the national Church and the only one endowed by the State. Its clergy are nominated by the King. All religions (except Jesuits) are tolerated. Ecclesiastically Norway is divided into 7 *Bispedömmer* (bishoprics), 91 *Prostier* (provostships or archdeaconries), and 520 *Prestegjeld* (clerical districts). In 1930 there were 91,459 dissenters, including 2,827 Roman Catholics, 12,207 Methodists, 7,788 Baptists, 667 Mormons, 81 Quakers. The Roman Catholics are under a Vicar Apostolic resident at Oslo.

Education is compulsory, the school age being from six and a half in towns and seven in the country to fourteen. In 1931–32 (the latest date for which there are statistics) there were in the country 5,821 public elementary schools with 306,963 pupils, and in towns 95,576 pupils; the amount expended on both being 69,558,000 kroner, of which 31,654,000 kroner were granted by the State, the rest being provided locally. The 10 normal schools (Teachers' Seminaries) had in 1932–33 1,095 students. There were in 1931–32, 135 secondary schools—17 public, 89 communal, and 11 private entitled to give certificates and 18 private not having this right, with respectively 5,471, 16,976, 1,496, and 534 pupils in April, 1932. Most of the secondary schools are mixed. Norway has one University, viz. at Oslo (founded 1811), attended in 1933 by 3,879 students. There is a technical high school at Trondheim, attended in 1933 by 708 students, one agricultural high school in Aas, with 174 students, a Teachers' Training College at Lade with 50 students, a military high school with 24 students, a dentist high school with 148 students, and the State academy of arts with 40 students. There are also several special schools, particularly continuation schools for young people between 15 and 18, and industrial, crafts, technical, and arts schools for both sexes.

There are 25 schools for defective children, deaf, blind, feeble-minded children with defect of speech, and crippled, also 10 reformatory schools for neglected children. The number of children in reformatories in 1931–32 was 358 boys and 119 girls; in the schools for defective children in 1932–33, 977 boys and 871 girls. There are, besides, 6 communal compulsory schools, established mainly for children neglecting the ordinary school (82 boys, 26 girls in 1931–32).

Norwegian is an independent language side by side with Danish and Swedish. As to the written language, there exist two idioms ('bokmaal' and 'nynorsk') and both may be officially used.

Justice and Crime.

For civil justice Norway is divided into 104 districts, each with an inferior court. There are 3 superior courts, having each one chief justice and two other justices, and one supreme court for the whole kingdom (*Höiesteret*), consisting of 1 president and 22 other justices. There is a court of mediation (*Forliksraad*) in each town and *Herred* (district), consisting of three men chosen by the representatives (*see* above under *Local Government*), before which, as a rule, civil cases must first be brought.

According to the law of criminal procedure of July 1, 1887, all criminal cases (not military, or coming under the *Riksrett*—the court for impeachments) shall be tried either by jury (*Lagmannsrett*), or by the lower court. The *Lagmannsrett* consists of three judges and 10 jurors. The Kingdom is divided into 4 jury districts (*Lagdömmer*), each having its chief judge. Each district is divided into circuits, in which courts are held at fixed times. The lower courts consist of the judge and 2 assistant judges (not professional) summoned

for each case. The *Lagmannsrett* takes cognisance of the more serious classes of offences, and is also a court of appeal. The lower courts are for the trial of other offences as courts of first instance.

There are three convict prisons; inmates, June 30, 1934, 382 males and 17 females. There are 38 local prisons, in which were detained, June 30, 1934, 645 males and 44 females.

Pauperism.

The relief of the poor is mostly provided for by local taxation by the Communes. The number of persons receiving relief amounted to 152,850 in 1933.

Finance.

Revenue and expenditure for five years:—

Year ending June 30	Revenue		Expenditure	
	Total	Current	Total	Current
	1,000 kr.	1,000 kr.	1,000 kr.	1,000 kr.
1931–32	335,853	317,152	360,834	312,774
1932–33	339,061	314,481	363,836	308,008
1933–34	352,892	313,840	352,892	288,628
1934–35[1]	378,050	321,788	378,050	298,890
1935–36[1]	409,400	—	409,400	—

[1] Estimates.

Budget proposals for the financial year ending June 30, 1935:—

Sources of Revenue	1934–35	Branches of Expenditure	1934–35
Current revenue:	1,000 kr.	*Current expenditure:*	1,000 kr.
Income and fortune tax	69,920	Civil list, the Storting and Cabinet	3,846
Customs	102,750	Foreign affairs	3,711
Excise on spirits	22,750	Defence	37,096
,, ,, beer	12,500	Justice	12,828
,, ,, tobacco	5,400	Church, education, arts	50,172
Excise on chocolate and sugar	17,750	Social affairs	14,054
Tax on luxuries	3,500	Public health	12,175
Judicial fees	3,000	Public Building Enterprises	22,989
Other taxes and excises	58,078	Agriculture	23,141
Miscellaneous	26,140	Trade, navigation, industries	15,443
Total	321,788	Finance and customs	12,166
From State capital.		Pensions to public functionaries	7,964
Diminution of State capital	4,662	Balance of State undertakings	48,870[1]
Loans	51,600	Interest of debt	17,611[2]
		Miscellaneous	16,043
		Total	298,890
		For increase of State capital:	
		Construction of railways	20,780
		Telegraph and Telephones	8,330
		Water-power developments	5
		Redemption of debt	40,890
		Other capital items	9,155
Total	56,262	Total	79,160
Grand Total	378,050	Grand Total	378,050

[1] Incl. interest on capital invested.
[2] Excl. interest on capital invested in State undertakings, 64,953,000 kr.

The public debt of Norway has been incurred for the main part by railway undertakings and construction of telegraph lines and water-power developments. The following gives the national liabilities for six years:—

Year ending June 30	Total debt [1]	Year ending June 30	Total debt [1]
	Kroner		Kroner
1928	1,634,825,256	1931	1,518,054,000
1929	1,578,897,513	1932	1,461,990,000 [2]
1930	1,565,037,000	1933	1,496,027,000 [2]

[1] At the rate of par on foreign loans.
[2] Not comparable with preceding years. About 64 million kroner previously regarded as debt are no longer included in the figures.

Of the total on June 30, 1933, 726,207,000 kr. were foreign debt; 769,820,000 kr. internal debt.

Defence.

The most important fortresses of Norway are Oscarsborg, Tönsberg, Bergen, and Agdenes. (The fortress of Kristiansand is in reserve.)

Army.

The army of Norway is a *national militia*. Service is universal and compulsory, liability commencing at the age of 18, and continuing till the age of 55. The men are called out at 21, and for the first 12 years belong to the line. Men from 18 to 21 and from 45 to 55 belong to the landstorm, which can be called out in a national emergency, and from 33 to 45 to the landvaern. Military training lasts 84 days for all branches. Further, the young soldiers eventually can be assembled for field exercises. The strength of the permanent forces in 1934 was 893 officers and 5,731 other ranks; the numbers trained in that year were approximately 10,000, to be organized in 6 divisions.

The Norwegian infantry is armed with the Krag-Jörgensen rifle of 6·5 mm., machine guns: Madsen of 6·5 mm. and Colt of 7·92 mm. The field artillery has Erhardt Q.F. guns of 7·5 cm.

The budget for the army for 1934–35 is 24,277,000 kroner.

Navy.

The principal vessels are:—

Laid down	Name	Displacement	Armour		Principal Armament	H.P.	Max. Speed
			Belt	Big Guns			
1896	Harald Haarfagre, Tordenskjold	3,900	7	8	2 8in.; 6 4·7in.	4,500	17
1899	Norge, Eidsvold	4,200	6	8	2 8in.; 6 6in.	5,200	17

None of the above possesses any other than local value. The whole navy is designed for coast-defence duties.

There are also the mine-layer *Olaf Trygvason*, of 1,600 tons, 3 destroyers, 3 first-class torpedo boats and 14 others, 9 submarines, 3 fishery protection vessels, and about 12 other vessels. There are about 36 seaplanes and 20 other planes.

The navy numbers about 850 officers, warrant officers and men, on the

permanent establishment, and about 700 men conscripted annually. All seafaring men between the ages of 20 and 44 are enrolled on the lists of the active fleet, and are liable to the maritime conscription. The conscripts have to go through a training of at least 6 months.

The budget for naval expenditure (Navy and Coastal Artillery), 1934–35, amounted to 12,951,000 kroner.

Production and Industry.

In 1930, 30 per cent. of the population lived on agriculture and forestry, 28 per cent. on industry, 10 per cent. on navigation and other transportation, 10 per cent. on trading and 7 per cent. on fishery and whaling.

I. Agriculture.

Norway is a barren and mountainous country. The arable soil is found in comparatively narrow strips, gathered in deep and narrow valleys and around fjords and lakes. Large continuous tracts fit for cultivation do not exist. Of the total area, 72·2 per cent. is unproductive, 24·2 per cent. forest, and 3·6 per cent. under cultivation and other used soils.

The acreage and products of the principal crops for 3 years were as follows:

Crops	Acreage			Produce (quarters)		
	1932	1933	1934	1932	1933	1934 [3]
Wheat	27,831	28,109	46,397	91,017	91,695	141,864
Barley	136,810	141,784	146,982	625,540	529,211	631,891
Oats	234,677	242,306	226,112	1,335,245	1,290,517	1,263,607
Rye	16,313	15,695	14,509	63,286	58,132	50,726
Mixed Corn	13,772	14,369	12,446	75,451	71,970	60,684
Potatoes	123,228	119,923	120,132	41,959,747 [1]	39,599,016 [1]	33,713,949 [1]
Hay	1,651,289	1,652,674	1,654,072	2,453,161 [2]	2,037,921 [2]	2,592,509 [2]

[1] Bushels. [2] Tons. [3] Preliminary.

In 1934 the country possessed live-stock as follows:—Horses, 181,325; cattle, 1,294,497; sheep, 1,697,698; goats, 337,697; swine, 550,000.

II. Forestry.

The forests are one of the chief natural sources of wealth. The total area covered with forests is estimated at 29,455 square miles, of which 70 per cent. is under pine trees. The State forests occupy about 5,200 square miles. The value of unwrought or partly wrought timber exported from Norway in 1932 and 1933 was respectively 14,987,000 and 11,750,000 kroner, and of wood pulp and paper 146,771,000 kroner in 1932 and 128,076,000 kroner in 1933.

III. Minerals and Metals.

Pyrites is the most important mineral product for both its sulphur and copper content. Iron-ore deposits occur in many places.

The production and value of the chief ores, metals and alloys in 1933 are shown in the following table:—

Ores and Minerals	Tons	1,000 Kroner	Metals and Alloys	Tons	1,000 Kroner
Silver ore	14,653	251	Silver	7·5	397
Copper ore	22,093	1,926	Copper	6,694	3,878
Pyrites	864,576	11,341	Nickel	4,168	16,004
Nickel ore	23,614	1,134	Aluminium	15,384	27,526
Iron ore	473,863	6,507	Ferro-alloys	83,402	15,384

Ores and Minerals	Tons	1,000 Kroner	Metals and Alloys	Tons	1,000 Kroner
Zinc ore and lead ore	18,789	1,193	Pig iron . .	29,251	2,606
Titaniferous ore .	23,213	696	Zinc, lead and tin .	45,476	15,701
Rutile . . .	56	63	Other products .	—	21,188
Molybdenum ore .	414	1,658			
Crome ore . .	326	10			
Total . .	1,441,597	24,779	Total . .	—	102,674

IV. Fisheries.

The number of persons in 1932 engaged in cod fisheries was 67,763; in herring fisheries, 22,931.

The value of the sea fisheries (based on the prices paid at the fishing places) in kroner in 1932 was: Cod, 20,309,000; herring, 15,910,000; mackerel, 1,906,000; salmon and sea trout, 1,494,000; other fisheries, 19,447,000; lobsters, 2,133,000; total, 61,199,000.

Other fisheries are the whale, walrus, seal, and shark fisheries, which in 1932 produced a total of 3,629,000 kroner.

Whale-oil production: 845,800 barrels in 1928; 1,210,000 barrels in 1929; 1,796,000 barrels in 1930; 2,317,000 barrels in 1931; 29,000 barrels in 1932; and 1,317,000 barrels in 1933.

V. Manufactures.

Industry is chiefly based on raw materials produced within the country (wood, fish, etc.), and on water power of which the country possesses an enormous amount. The pulp and paper industry, timber, the canning industry and the electro-chemical industries are the most important export manufactures. In the following table are given figures for all industrial establishments in 1933 occupying more than 5 workers. Electrical plants, constructions and building industry are not included.

Industries	Establishments[1]	Number of		Gross value of production (1,000 kroner)	Value added by manufacture (1,000 kroner)
		Salaried Staff	Workers[2]		
Quarries and ceramics . . .	290	531	5,697	32,897	24,413
Machinery and metal work. . .	616	3,708	23,655	184,344	111,932
Chemical and electro-chemical industry	87	908	3,760	93,073	53,571
Oils, soaps, etc.	208	567	2,319	77,203	19,449
Gas works	15	187	651	8,705	6,394
Wood	551	721	8,220	71,589	27,911
Paper and pulp	195	1,393	14,153	192,329	77,087
Leather and rubber	60	266	2,274	25,339	11,302
Textiles	181	1,065	11,505	103,297	43,360
Clothing, etc.	261	1,091	9,518	70,569	35,229
Food products	620	2,647	13,976	301,599	170,157
Printing	263	518	4,914	41,854	29,290
Total	3,347	13,602	100,642	1,202,798	610,095

[1] Employing 5 workers or more. [2] Average number employed in the year.

The gross value of the production at the electrical plants was 131·8 million kroner, the value added 105 million kroner. The total power installed in 1930 in manufacturing industry was 2,310,645 h.p., of which water power to an amount of 2,164,172 h.p.

Commerce.

Total imports and exports in five years :—

—	1930	1931	1932	1933	1934
	Kroner	Kroner	Kroner	Kroner	Kroner
Imports (foreign) .	1,065,012,000	861,363,000	690,376,000	665,217,000	735,200,000
Exports (Norwegian) .	674,729,000	459,759,000	560,924,000	549,783,000	570,000,000
,, (foreign) .	9,272,000	6,908,000	7,667,000	8,101,000	8,000,000

Trade with different countries in 1932 and 1933, including indirect as well as direct trade, but not direct transit goods, was as follows :—

Country	1932		1933	
	Imports	Exports	Imports	Exports

Shipping and Navigation.

The total registered Norwegian mercantile marine on January 1, 1934, was as follows:—Sailing: 150 vessels, 9,000 net tons; steam: 1,874 vessels, 1,307,000 net tons; motor: 1,951 vessels, 1,073,000 net tons; total: 3,975 vessels, 2,389,000 net tons.

The gross earnings of the Norwegian mercantile marine engaged in foreign traffic in 1932 amounted to 377·5 million kroner.

The vessels entered from and cleared for foreign countries in 1933 were as follows:—

1933	With Cargoes No.	With Cargoes Net Tonnage	In Ballast No.	In Ballast Net Tonnage	Total No.	Total Net Tonnage
Entered						
Norwegian	3,366	2,777,101	1,241	721,952	4,607	3,499,053

Communications.

On June 30, 1933, the length of public roads in Norway was 24,106 miles.

The length of State Railways on June 30, 1933, was 2,178 miles; of private companies 229 miles; total 2,407 miles. 1,782 miles have a gauge of 4ft. 8½in; 557 miles, 3ft. 6in.; 16 miles, 3ft. 3½in.; 52 miles, 2ft. 5½in. Total receipts year ending June 30, 1933: State railways, 64,290,000 kroner; companies, 3,933,000 kroner. Total expenses: State railways, 71,683,000 kroner; companies, 2,682,000 kroner. Goods carried: State railways and companies, 5,692,000 tons (of 1,000 kilogs.). Passengers carried: State railways and companies, 18,701,000. On 121 miles of State and 26 miles of private railways electric power is installed.

The following are the postal statistics:—

—	1929	1930	1931	1932	1933
Letters[1]	109,813,000	112,484,000	111,616,000	111,556,000	111,448,000
Post-cards	10,580,000	10,843,000	9,434,000	9,404,000	9,282,000
Letters with declaration of value	3,835,000	3,594,000	3,396,000	3,193,000	3,033,000
Registered letters	4,350,000	4,369,000	4,370,000	4,262,000	4,141,000
Journals	155,128,000	161,684,000	154,406,000	145,247,000	145,905,000
Other printed matter and samples	25,474,000	26,080,000	24,182,000	23,390,000	23,401,000
Parcels	3,128,000	2,970,000	2,685,000	2,332,000	2,162,000
Other	5,612,000	5,796,000	5,655,000	5,485,000	5,598,000

[1] Included registered letters.

Length of telegraph and inter-urban telephone lines and wires, June 30, 1933: 35,670 miles of line, 623,280 miles of wires. (State, 22,747 and 446,620 miles respectively.) Number of paid messages on the State lines, 3,649,000. Number of telephone conversations on trunk lines, 13,444,000. State telegraph offices, 2,751; receipts, 31,905,000 kroner; expenses, 27,536,000 kroner.

The Government possesses 47 wireless telegraph and telephone stations in Norway, of which 3 are at Svalbard and jan Mayn.

Aviation.—The Deutsche Luft-Hansa started a regular air service on the route Oslo-Gothenburg-Copenhagen-Travemünde, on June 1, 1932. There is one daily flight each way on this route.

The following table gives statistics for the operating months in 1932 (4 months) and 1933 (5 months):—

—	1932	1933
Number of passengers carried	582	1,321
Goods carried (kilos)	859	2,097
Mails ,, ,,	807	1,555
Mileage flown	68,931	104,328

A Norwegian company, Det Norske Luftfartselkap Fred Olsen, has been formed for the operation of a direct route between Kristiandsand and Amsterdam.

Currency, Credit and Banking.

On December 31, 1933, the nominal value of the coin minted was: 19,495,000 kroner. Gold coin which is not in circulation excluded.

There is no Government paper money.

The 'Norges Bank' is a joint-stock bank, of which, however, a considerable part is owned by the State. The bank is, besides, governed by laws enacted by the State, and its directors are elected by the Storting except the president and vice-president of the head office, who are nominated by the King. It is the only bank in Norway that is authorised to issue bank notes for circulation. The balance-sheets of the bank for February 15, 1935, show the following figures: bullion, 118,482,000 kroner; gold abroad, 16,379,000 kroner; notes in circulation, 305,210,000 kroner (the issue of notes allowed was 368,369,000 kroner); deposits, 79,781,000 kroner; loans and discounts 230,806,000 kroner; foreign bonds and domestic securities, 36,168,000 kroner.

Several mortgage banks, for which the State provided a great part of their capital, are in operation. The principal are:—

Bank	Founded	Capital	Bonds issued Dec. 31, 1933	Loans on Mortgage
		1000 kroner	1000 kroner	1000 kroner
Kongeriget Norges Hypothekbank	1852	67,000	481,438	468,076
Arbeiderbruk og Boligbank [1]	1903	7,200	23,854 [2]	23,966
Norske Stats Smaabruk og Boligbank	1917	23,000	114,300 [2]	205,665
Den Norske Stats Fisherbank	1922	6,500	9,680 [2]	7,365
Norges Kommunalbank [3]	1926	45,951	241,500	219,500
6 Private Credit Associations	—	—	120,342	115,100

[1] In liquidation. [2] June 30, 1933. [3] For loans to municipalities.

At the end of 1933, there were 125 private joint-stock banks reported, of which, however, 20 were in liquidation. The total amount of capital and funds possessed by joint-stock banks was 241,622,000 kroner (capital 182,257,000, funds 59,365,000), of which 241,297,000 kroner belonged to banks in free operation. Deposits amounted to 1,137,180,000 kroner, of which 84,357,000 kroner were deposits on demand, and 1,052,823,000 kroner deposits on time; 801,452,000 kroner of the total amount of deposits were deposited at banks in free operation.

The number of savings-banks at the end of 1933 was 615, of which 6 were in liquidation. The total amount of the funds of the savings-banks amounted to 228,911,000 kroner, and total deposits 2,051,131,000 kroner, of which 16,620,000 kroner were on demand, and 2,034,511,000 kroner on time. The number of depositors was 2,207,448.

As from January 1, 1925, all private joint-stock banks must be chartered by royal licence. Their operations are regulated, to a considerable extent, by the law, and controlled by the Ministry of Finance.

Money, Weights, and Measures.

By a treaty signed October 16, 1875, Norway adopted the same monetary system as Sweden and Denmark. The Norwegian krone, of 100 öre, is of the value of 1*s.* 1½*d.* at par, or about 18 kroner to the pound sterling. The gold 20-kroner piece weighs 8·960572 grammes, ·900 fine containing 8·0645 grammes of fine gold. The standard of value is gold. National Bank notes of 5, 10, 50, 100, 500, and 1,000 kroner are legal means of payment, and the Bank is ordinarily bound to exchange them for gold on presentation. By a Royal Decree of September 27, 1931, the gold standard was suspended and there was placed an embargo on gold.

The metric system of weights and measures is obligatory.

SPITZBERGEN, BEAR ISLAND, AND ADJACENT ISLANDS (SVALBARD).

An archipelago situated between 10° and 35° longitude east of Greenwich and between 74° and 81° latitude north. The distance from Norway to Bear Island is 240 miles, and to Spitzbergen (South Cape) 360 miles.

It is claimed that in all probability the archipelago was discovered by Norwegians in 1194 and re-discovered by the Dutch navigator Barents in 1596. The English explorer Henry Hudson visited Spitzbergen in 1607. In the 17th century a very lucrative whale-hunting was started and for some time there were Dutch, British, and Norwegian claims to sovereignty and quarrels about the hunting-places. But when in the 18th century the whale-hunting ended, the question of the sovereignty of Spitzbergen lost its actuality, and it was not until the beginning of this century that the question was again raised, owing to the discovery and exploitation of rich coalfields. It was settled by a Treaty, signed on February 9, 1920, at Paris, in which Norway's sovereignty over the archipelago was recognised. On August 14, 1925, the archipelago was officially taken possession of by Norway.

Total area about 24,294 square miles. The chief islands are West Spitzbergen or Mainland, North East Land (about half the former), Prince Charles Foreland, Edge Island, Barents Land, King Karl's Land, Hope Island, and Bear Island (area, 8,616 sq. miles). The climate is essentially arctic, tempered by the Gulf Stream.

Coal is the principal product. There are six mining camps inhabited all the year round. The largest is Longyearbyen in Advent Bay, 550 inhabitants on December 1, 1930. In 1931, 206,345, in 1932, 257,120, and in 1933, 323,150 tons of coal were exported.

U.K. exports to Spitzbergen in 1934 (Board of Trade returns), 2,300*l.*

JAN MAYEN ISLAND.

This is a bleak and desolate island between Greenland and Northern Norway, and about 300 miles north of Iceland. It is 34 miles long and its greatest breadth is 9 miles. It is of volcanic origin and is mountainous, Beerenberg in the north reaching a height of 8,350 ft. It is uninhabited, but is occasionally visited by seal hunters, whalers, and fishermen. In 1921 the Norwegian Meteorological Institute established a weather forecast station there, and the decision of the Norwegian Government to annex the island was largely due to this action.

The island was discovered by Henry Hudson in 1607, and it was first named Hudson's Tutches (Touches). It was again and again rediscovered and renamed. Its present name was taken from that of a Dutch navigator of the early 17th century, whose claim to have visited the island cannot be substantiated. For the period of a year (1882–83) an Austrian station for scientific observations was maintained there. On May 8, 1929, Jan Mayen Island was officially proclaimed as incorporated in the Norwegian State, and at the same time the manager of the meteorological station on the island was invested with magisterial authority. The final relation to Norway was settled by law of February 27, 1930. Norwegian sovereignty over the island has been officially recognised by the British Government.

BOUVET ISLAND.

This uninhabited island in the Southern Atlantic was discovered in 1739 by a Frenchman, Pierre Bouvet, but no flag was hoisted till, in 1825, Captain

Norris raised the Union Jack. A neighbouring island, Thompson Island, has been reported but its existence is seriously doubted. In 1928 a diplomatic dispute arose between Great Britain and Norway as to the claim to Bouvet, particularly in connection with the occupation since December, 1927, by a Norwegian whaling expedition, and the Norwegian decision to erect a wireless station on the island, and Great Britain decided in November, 1928, to waive its claim. By law of February 27, 1930, it is stated that Bouvet Island belongs to Norway as a dependency.

PETER I. ISLAND.

This uninhabited island in the Antarctic Ocean was discovered in 1821 by the Russian explorer, Admiral von Bellinghousen, who got a sight of it at a distance. The first landing was made in 1929 by a Norwegian expedition which hoisted the Norwegian flag and took possession of the island. On April 23, 1931, Peter I. Island was proclaimed as incorporated in the Norwegian State.

Diplomatic Representatives.

1. Of Norway in Great Britain.

Envoy and Minister in London.—Erik Andreas Colban. (Appointed May 16, 1934.)
Counsellor.—Rolf Andvord.
Commercial Counsellor.—C. F. Smith.
Secretary.—R. Andersen.
Consul General.—G. K. Conradi.

2. Of Great Britain in Norway.

Envoy and Minister.—Cecil Francis Joseph Dormer, M.V.O. (Appointed May 22, 1934.)
First Secretary.—N. B. Ronald, C.M.G., M.V.O.
Commercial Secretary.—C. L. Paus, C.B.E.
Naval Attaché.—Captain G. C. Muirhead-Gould, D.S.O., R.N.
Military Attaché.—Lt.-Col. F. E. Hotblack, D.S.O.
Air Attaché.—Group Capt. F. P. Don, O.B.E.
Consul at Oslo.—N. Vorley, O.B.E.

There are consular representatives at Bergen, Trondheim, Stavanger, Skien, Tromsö, Larvik, and other places.

PANAMA.

(República de Panama.)

Government.—Panama, formerly a department of the Republic of Colombia, asserted its independence on November 3, 1903, and the *de facto* Government was on November 13 recognised by the Government of the United States, and soon afterwards by the other Powers. In 1914 Colombia,

in the Treaty of Bogota entered into with the United States, agreed to recognize the independence of Panama. This Treaty was ratified by the United States and Colombia in 1921. On May 8, 1924, a Protocol was signed at Washington by the Panama and Colombian Plenipotentiaries by which diplomatic relations between the two countries were established.

The Constitution, adopted February 13, 1904, and amended in 1918 and again in 1928, provides for a National Assembly of 32 members elected for four years (one for every 15,000 inhabitants), which meets biennially on September 1, and for a President of the Republic, elected by direct vote for 4 years, and not eligible for the succeeding term.

President of the Republic.—Dr. Harmodio *Arias*. Elected June 5, 1932. Assumed office, October 1, 1932.

There are three Vice-Presidents, chosen by the National Assembly, and a Cabinet of five Ministers.

Area and Population.—Extreme length is about 480 miles; breadth between 37 and 110 miles; coast line, 477 miles on the Atlantic and 767 on the Pacific; total area is 32,380 square miles; population according to the census of 1930 (excluding the Canal Zone), 467,459, of whom 78,813 were white, 69,583 Negroes, 42,897 Indians, 4,138 Orientals and 249,583 mestizos or mixed. There are approximately 40,000 British subjects on the Isthmus, chiefly coloured, from the West Indies. There are 9 provinces with populations (1930) as follows (the capitals in brackets):—Bocas del Toro (Bocas del Toro), 15,851; Coclé (Penonomé), 48,244; Colón (Colón), 57,161; Chiriquí (David), 76,918; Los Santos (Las Tablas), 41,218; Panama (Panama City), 114,103; Veraguas (Santiago), 69,543; Herrera (Chitré), 31,030; Darien (La Palma), 13,391. The capital, Panama City, founded in 1518, on the Pacific coast, had (1930) 74,409 inhabitants, and Colón on the Atlantic coast (1930), 29,769. Smaller ports on the Pacific are Aguadulce, Pedregal, Montijo, Puerto Mutis, and Puerto Armuelles; on the Atlantic, Bocas del Toro, Portobello, and Mandinga. Marriages in 1933, 1,414; births 13,444; deaths, 5,911.

Religion.—The religion of the country is Catholicism, but other denominations have a fair following. In the Canal Zone Protestantism chiefly prevails.

Education.—Elementary education is obligatory for all children from 7 to 15 years of age. The Government maintains 500 primary schools throughout the nine provinces and 51,992 children (excluding children enrolled in the Canal Zone public schools) received free instruction in 1933–34 from 1,481 teachers. Only 66 primary schools are in cities; the remaining 434 are in rural districts. The co-educational system has been adopted in all the schools of the Republic. Panama has a college for higher instruction (Instituto Nacional), with 1,718 students in 1933, a normal school for girls (435), a professional school for young women, and a school of arts and crafts or trades for boys from 14 years of age. Secondary, vocational and normal schools enrolled 3,129 students in 1933–34. In addition there are about 71 private institutions. Panama City is to be the site of the Bolivarian University, the formation of which was agreed upon on June 22, 1926, as an expression of Pan-American solidarity; it is to be supported by contributions from Colombia, Ecuador, Panama, Peru, and others.

Justice.—The laws were codified and promulgated in 1917 and 1918. These codes—civil, penal, commercial, judicial, administrative, fiscal, and

mining—are designed to meet modern conditions, and replace the old Colombian laws formerly in use. The death penalty has been abolished. The Supreme Court consists of 5 justices appointed by the executive for 10 years; magistrates are similarly appointed for similar terms.

Finance.—All the revenue collected on importations into the Republic belongs to the Panama Government, but the United States reserve the right to import supplies of all descriptions required for canal construction, maintenance and protection and for the use of their employees free of all taxes.

Expenditures and revenues are on a biennial basis, for two years ending June 30 through 1929–31, ending February 28 for 1931–33, and from January 1, 1933, to December 31, 1934. For recent years budget estimates have been as follows (1balboa = 1 dollar U.S.):—

—	1925–27	1927–29	1929–31	1931–33	1933–34
	Balboas	Balboas	Balboas	Balboas	Balboas
Revenue . . .	12,258,700	14,302,488	17,031,908	19,961,353	11,848,945
Expenditure . .	12,258,700	14,302,488	17,031,908	18,500,934	11,848,945

The revenue includes an annual subsidy of 250,000 dollars from the United States so long as the latter maintains and operates the canal; in 1934 Panama rejected the payment tendered of 250,000 "paper" dollars and demanded payment in gold.

The Public Debt on April 30, 1932, amounted to 18,076,706 balboas or dollars. The foreign debt consists of bonds to the value of 15,617,000 dollars issued in the United States (about 2,000,000 dollars in Canada) for railway, road construction, and public works. The internal debt amounted to 2,459,706 dollars. In addition the Government has a contingent liability for about 4,000,000 dollars borrowed in the United States and Canada by the Banco Nacional and lent out on the security of real property in the Republic. Debt service in 1931–33 required 3,840,000 dollars.

The Republic has no army or navy to support. The National Police Force numbers 60 officers and 630 men.

Production.—Of the whole area about five-eighths are unoccupied, and of the remainder only a small part is properly cultivated. Immigration of European settlers is discouraged. The most important product is bananas, the exports of which, chiefly to the United States, account for two-thirds of total exports; in 1933, 4,045,437 stems were exported. Other products are cocoa, coconuts, and ivory nuts. Caoutchouc (about 130 tons annually) is collected by the Indians of the Cordillera, or is obtained from trees planted by Europeans near the coast. Coffee (about 500,000 bushes) is grown in the province of Chiriqui, near the Costa Rican frontier. Exports, 1933, 62,866 kilos. Other products of the soil of Panama are mahogany and other woods, copaiba, sarsaparilla and ipecacuanha. The country has great timber resources. Sugar (about 90,000 bags of 100 lbs. each produced annually) and tobacco growing are assuming importance. Cattle rearing about 350,000 head in 1930) is carried on successfully, and hides form an important article of export.

Pearl fishing is carried on at the Pearl Islands in the Gulf of Panama. Turtle-shell is also exported to a considerable amount.

Commerce.—The imports and exports (excluding the Canal Zone) for 3 fiscal years ending June 30 and for the calendar years 1931, 1932 and 1933 are shown as follows (1 balboa = 1 dollar, U.S.):—

Year	Imports	Exports	Year	Imports	Exports
	Balboas	Balboas		Balboas	Balboas
1927–28	16,182,000	4,380,129	1931	13,492,459	2,721,435
1928–29	19,277,988	4,262,124	1932	8,852,610	2,061,275
1929–30	18,337,478	3,408,201	1933	9,296,320	2,559,634

Of the total imports about 64 per cent. come from the United States (exclusive of canal materials) and 8 per cent. from Great Britain. The principal exports in 1933 were bananas (1,707,779 dollars), cacao (85,383 dollars), coconuts (103,367 dollars), hides, mother of pearl, ivory, nuts, gum, and tortoise shell.

Total trade between Panama (including Canal Zone) and the United Kingdom (Board of Trade Returns) for 5 years :—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Panama to U.K. . . .	39,818	255,489	79,721	20,601	20,540
Exports to Panama from U.K. . . .	614,290	300,605	271,796	237,464	442,675
Re-exports to Panama from U.K. . .	14,029	13,891	12,727	9,978	8,766

Shipping, Communications.—All the international maritime traffic for Colón and Panama now runs through the Canal Zone ports of Cristobal and Balboa ; Bocas del Toro remains for the provincial trade. The port of Puerto Armuelles, opened in 1928, provides an outlet for bananas from plantations in the neighbourhood. Shipping under Panamanian registry totalled (1934) 72 vessels of 271,509 gross tons.

The Panama Railroad, which connects Panama City on the Pacific with Colón on the Atlantic, is the principal railway in the country. It is 47·61 miles long and, with the exception of the termini at Panama and Colón, passes through Canal Zone territory. As there is no road across the Isthmus, and as most vessels unload their cargo at Cristobal (Colón), the greater portion of the merchandise destined for Panama City is brought by the Panama Railroad. In the Province of Chiriqui there is a narrow gauge railway, 32 miles long, connecting the port of Pedregal with Boquete, and passing through David, the capital. Between David and Concepcion there is a line 18 miles long, which has now been extended to the Port of Puerto Armuelles.

A central highway system from the capital, Panama City, west to the Costa Rican frontier is under construction ; the 315-mile section connecting Panama City with David, the capital of the Province of Chiriqui, was opened in March, 1931. Road building is handicapped by the extraordinary number of bridges required by the contour of the country.

Commercial aviation rapidly developed in Panama during 1929. Daily air service, in both directions, connects Colón and Panama, and Panama, Aguadulce, Chitré, Santiago, Las Lagas and David ; air mail and passenger services exist between the Isthmus and countries of South, Central and North America.

There are telegraph cables from Panama to North American and South American ports, and from Colón to the United States and Europe. There are 189 Government telephone stations, 33 telegraph offices, and ten radio stations, seven of which are operated by the Navy Department of the United States.

Money and Credit.—In 1930, the old Panamanian silver currency to a value of approximately 272,000 dollars was withdrawn from circulation. A portion of these coins was used in minting new coins of half the weight and size of the old ones, but of twice the value. The present monetary unit is the *Balboa* which is of the same size and fineness as the United States silver dollar and is equivalent in value to that coin; 200,000 of these coins were minted and placed in circulation in 1931. Other silver coins are the half-balboa (of 12·5 grammes ·900 fine, and equal to 50 cents., U.S.); the quarter and tenth of a balboa pieces; and nickel coins of 5 and 2½ cents. There is no paper currency other than U.S. notes. Altogether 500,000 balboas of the new Panamanian silver currency had (1932) been placed in circulation.

Part of the 10,000,000 dollars (canal money) paid by the United States has been applied to the establishment of a real estate loan bank, part to public improvements in the several provinces, and 6,000,000 dollars have been invested in the United States, particularly in New York real estate.

English weights and measures are in general use as well as those of the metric system.

The Panama Canal and the Canal Zone.

On November 18, 1903, a treaty between the United States and Panama was signed, providing facilities for the construction and maintenance of the inter-oceanic Canal. In this treaty, Panama granted in perpetuity the use of a zone (Canal Zone) five miles wide on each side of the Canal route, and within this zone the exclusive control for police, judicial, sanitary and other purposes. For the needs of the Panama Canal other territory was ceded and, for defence, the coastline of the zone and the islands in Panama Bay were also ceded. The cities of Panama and Colón remain under the authority of Panama, but complete jurisdiction was granted to the United States in both the cities and in their harbours in all that relates to sanitation and quarantine. In return for these grants the United States paid 10,000,000 dollars and is paying 250,000 dollars yearly, beginning in 1913. The treaty was ratified on February 26, 1904, and in July, 1904, the agreement for the provisional delimitation of the boundaries of the United States territory on the Isthmus was signed. A treaty to cede further territory, particularly in Colón, to the Canal Zone, and to bind Panama to consider herself joint-belligerent with the United States in the event of war, was rejected by the National Assembly in 1927, but discussion of it has revived.

Governor of Canal Zone.—Lieut.-Col. J. L. Schley. Appointed October 21, 1932.

The area of the Canal Zone, including land and water, but not including the water area within the 3-mile limit from the Atlantic and Pacific ends, is 552·8 square miles. The area of Gatun Lake, when its surface is at its normal elevation of 85 feet above sea level, is 163·4 square miles.

The Canal has a summit elevation of 85 feet above the sea. It is 50·72 statute miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean. The distance from deep water to the shore line in Limon Bay is about 5 miles, and from the Pacific shore line to deep water is about 5½ miles; hence the length of the Canal from shore to shore is approximately 40½ miles. The channel ranges in width from 300 to 1,000 feet. The average bottom width of the channel in this project is 649 feet, and the minimum width is 300 feet. The Canal has a minimum depth of 41 feet. The average time of passage through the Canal is from 7 to 8 hours. The record passage

is 4 hours 10 minutes. The maximum traffic capacity of the Canal is estimated at 48 ships of usual size in a day or about 17,000 in a year.

The Gatun dam along the crest is 8,400 feet long, including the spillway, or over 1½ miles, and ½ mile wide at its greatest width. The crest of the dam is at an elevation of 105 feet above sea level, or 20 feet above the normal level of Gatun Lake, and 100 feet wide. The width of the dam at the normal water level of the lake, *i.e.*, 85 feet above sea level, is about 388 feet. The length of the cut through the Continental divide (Culebra, now Gaillard Cut) is 8 statute miles. The minimum bottom width of the cut is 300 feet. The bottom is 40 feet above sea level, giving a normal depth of 45 feet.

The civil population of the Canal Zone in June, 1934, was 29,964, of whom 8,630 were Americans. Of this population, 2,439 Americans and 4,799 of other nationalities (chiefly British West Indian negroes) were employed by The Panama Canal and Railroad. The total force employed July 1, 1934, was 2,939 Americans and 8,787 coloured aliens, many of whom did not reside in the Canal Zone. No land in the Zone is privately owned and the Zone is, in effect, a Government owned reservation dedicated to the operation, maintenance and protection of the Canal and its appurtenances. However, building sites and agricultural lands are licensed to responsible companies and individuals.

The total capital investment for the construction, operation and maintenance of the Canal to June 30, 1934, totalled 543,744,707 dollars, and the net revenues from tolls and other sources since it was opened to navigation have totalled 190,976,689 dollars. The current expenses of operation and maintenance, inclusive of depreciation and amortisations during the fiscal year 1933–34 were 7,351,834 dollars, and the gross Canal revenue was 24,161,732 dollars. Computing interest at 3 per cent. on the capital investment of 539,200,059 dollars (on July 1, 1933), there were net earnings of 2,001,101 dollars for Canal operations during the fiscal year ending June 30, 1934.

The Canal was informally opened to commerce by the passage of the 9,000 ton steamer *Ancon* on August 15, 1914, with specially invited guests. The journey was made without mishap in ten hours. It was formally opened to commerce by proclamation of the President of the United States on July 12, 1920. The Canal has been in use since 1914, except for various short periods in 1915, and from September 18, 1915, to April 15, 1916, when the channel was entirely blocked by slides in the banks of Gaillard Cut. There has been no interruption since January 11, 1917.

Particulars of the traffic through the Canal for the last 6 fiscal years are given as follows:—

Fiscal year ending June 30	Northbound (Pacific to Atlantic)		Southbound (Atlantic to Pacific)		Total		Tolls levied (in dollars)
	Vessels[1]	Cargo, tons	Vessels	Cargo, tons	Vessels	Cargo, tons	
1929	3,065	20,780,486	3,348	9,882,520	6,413	30,663,006	27,127,377
1930	3,050	20,554,507	3,135	9,475,725	6,185	30,030,232	27,076,890
1931	2,725	18,402,371	2,804	6,681,429	5,529	25,082,800	24,645,457
1932	2,162	14,172,640	2,344	5,635,358	4,506	19,807,998	20,707,377
1933	2,137	13,665,839	2,357	4,511,889	4,494	18,177,728	19,620,459
1934	2,625	18,551,323	2,908	6,167,328	5,533	24,718,651	24,063,789

[1] *i.e.* Ocean-going commercial vessels, excluding Canal vessels and launches, and U.S., Panamanian and Colombian Government vessels.

Of the total number of commercial transits of the Canal during the year ended June 30, 1934, 2,269 were American, 1,208 British, 450 Norwegian, 301 German, 258 Japanese, 92 French, 122 Swedish, 91 Dutch, 135 Danish, and the remaining 607 of 14 other nationalities. Total commercial transit, 5,533.

The postal address of the Canal administration is The Panama Canal, Balboa Heights, Canal Zone, or Washington, D.C.

Diplomatic and Consular Representatives.

1. Of Panama in Great Britain.

Envoy and Minister.—Dr. Belisario Porras. Appointed 1933. (Resident in Paris.)

Secretary.—E. J. de Roux.

Attaché.—Pedro de Obarrio.

Consul-General (in London).—I. de J. Valdes, Jr.

2. Of Great Britain in Panama.

Envoy Extraordinary and Minister Plenipotentiary.—Frederick Edward Fox Adams. (Appointed September 28, 1934). Is also Minister at Costa Rica.

Naval Attaché.—Capt. A. R. Dewar, R.N.

Military Attaché.—Brevet Lt.-Colonel W. W. T. Torr, D.S.O., M.C.

Consul for the Republic.—E. A. Cleugh, Colón.

Vice-Consul at Panama.—F. B. A. Rundall.

There are also Vice-Consuls at Bocas del Toro, and Colón.

PARAGUAY.

(REPÚBLICA DEL PARAGUAY.)

Constitution and Government.

THE Republic of Paraguay gained its independence from Spanish rule in 1811, and after a short government by two consuls, the supreme power was seized, in 1815, by Dr. José Gaspar Rodriguez Francia, who exercised autocratic sway as dictator till his death, September 20, 1840. Subsequently, in 1844, a new Constitution was adopted providing for the election of a President. President Lopez, in 1864, began a dispute with the Government of Brazil, which resulted in the entry of a Brazilian army, united with forces of the Argentine Confederation and Uruguay, into the Republic, June, 1865. After a struggle of five years, in which Paraguay lost probably 500,000 men, Lopez was killed at Cerro Corá, March 1, 1870, in the last battle of the war.

The Constitution of 1870 provides for a Congress of two Houses, a Senate (now of 20 members) elected for six years (one-third every two years), and a Chamber of Deputies (now of 40), elected for four years (one-half every two years). Both are elected directly by the people, the former in the ratio of one representative per 8,000 to 12,000 inhabitants, and the latter one to 6,000 inhabitants, though in the case of the sparsely populated divisions a greater ratio is permitted. Voters are all males 18 years of age or older. A Permanent Committee of two senators and four deputies sits when Congress is not in session.

The President is elected for four years; until 1910 he took office on November 25, but by legislative decree of August 8, 1912, the date was altered to August 15. The following is a list of Presidents since 1898, with the date on which each took office:—

Don Emilio Aceval—Nov. 25, 1898.[1]
Don Hector Carvallo—Jan 9, 1902.[2]
Don Juan Escurra—Nov. 25, 1902.
Don Juan Gaona—Oct. 18, 1904.[2]
Dr. Don Cecilio Baez—Dec. 8, 1905.[2]
Dr. Don Benigno Ferreira—Nov. 25, 1906.
Don Emiliano Gonzalez Navero—July 5, 1908.[2]
Don Manuel Gondra—Nov. 25, 1910.
Col. Don Albino Jara—Jan. 11, 1911.[2]
Don Liberato Marcial Rojas—July 6, 1911.[2]
Dr. Don Pedro Peña—Feb. 29, 1912.[2]
Don Emiliano Gonzalez Navero—Mar. 22, 1912.[2]
Don Eduardo Schaerer—Aug. 15, 1912.
Dr. Don Manuel Franco—Aug. 15, 1916.[4]
Dr. Don José Montero—June 7, 1916.[2]
Don Manuel Gondra—Aug. 15, 1920.
Dr. Don Felix Paiva—Oct. 31, 1921.[2]
Dr. Don Eusebio Ayala—Nov. 3, 1921.[2]
Dr. Don Eligio Ayala—April 1, 1923.[2]
Dr. Don Luis Riart—April 12, 1924.[2]
Dr. Don Eligio Ayala—Aug. 15, 1924.
Dr. Don José Guggiari—Aug. 15, 1928.
Don Emiliano Gonzalez Navero—Oct. 26, 1931.[2]
Dr. Don José Guggiari—Jan. 28, 1932.

[1] Died Jan. 9, 1902.
[2] Succeeded as Vice-President.
[3] Provisional, *i.e* following a coup d'etat.
[4] Died June 5, 1919.

The President has a cabinet of six ministers, presiding over the departments of the Interior; of Finance; of Public Instruction and Justice; of National Defence; of Economy; and of Foreign Affairs and Worship. The President receives a salary of 30,000 pesos per month, and each of the ministers 15,000 pesos.

President of the Republic.—Dr. Don Eusebio *Ayala.* Elected June 12, 1932; assumed office, August 15, 1932.

The country is divided into 2 sections: the 'Oriental,' east of Paraguay river, and the 'Occidental,' west of the same river. The Oriental section is divided into 12 departments, subdivided into 104 'partidos'; the Occidental section (the Chaco) is divided into 3 'comandancias militares.'

The 12 departments are: Concepción, San Pedro, Caraguatay, Villarrica, Yhú, Caazapá, Encarnación, San Ignacio, Quiyndy, Villeta, Paraguari and Pilar. The civil authority is exercised by a *comisario de policía* in each of the departments. The capital, Asunción, forms a district subdivided into 'secciones policiales.'

Area and Population.

The approximate area of Paraguay proper or 'oriental section,' which is situated between the rivers Paraguay and Alto Paraná, is estimated at 159,834 square kilometres, or 61,647 square miles. An area officially stated to be 100,000 square miles in extent, lying between the rivers Paraguay and Pilcomayo, known as the Chaco, is claimed by Paraguay, whose rights, however, are disputed by Bolivia. Serious friction developed in December, 1928, and the two countries broke off diplomatic relations, which were not fully resumed until May, 1930, only to be broken off again in July, 1931. Despite efforts of neutral countries to induce the parties to sign a pact of non-aggression, a state of open warfare developed in September, 1932, which lasted through 1934, interrupted by a brief truce ending January 8, 1934.

In 1932 the total population was estimated at 870,197 (including 67,500 in the Chaco, of whom Indians are roughly estimated at 15,000), with a density of 5 per square mile. The population of Paraguay (oriental section) consists of people of mestizo (mixed white and Indian), Indian, and European (chiefly Spanish), blood, the latter largely predominating. There are practically no negroes in Paraguay. On December 31, 1933, the urban population of the capital, Asunción (founded 1537), was 94,456, or about one-ninth of the total population; including the surrounding district, it was 228,600 or over one-fourth; other towns, as estimated in 1933, are Villarrica, 35,260; Carapeguà, 17,130; Luque, 15,967; San Pedro, 13,985; Concepción, 13,657; Encarnación, 11,991; Paraguarí, 11,632; Villa del

Pilar, 7,888. These figures include the surrounding districts in each case.

Paraguayans are bi-lingual, speaking both Spanish and Guaraní, the language of the now extinct Guaraní Indians, who held the country at the time of the Spanish conquest.

Immigration from 1905 up to January, 1934, totals 20,511, including 3,859 Mennonite farmers from Canada, Russia and Poland. Most of the immigrants settle in the 27 state-aided colonies. Only 361 immigrants arrived in 1933.

Religion, Education, and Justice.

The Roman Catholic Church is the established religion of the State, but the free exercise of other religions is permitted. The seat of the Paraguayan Archbishopric is Asunción; there are Bishoprics at Villarrica and Concepción. Roman Catholic and other religious marriage ceremonies are allowed, but the civil ceremony alone gives validity to a marriage.

Education is free and nominally compulsory, but schools are not everywhere available, and the system is being extensively revised (1935) to provide, *inter alia*, primary education for adults. In 1934 there were 1,630 Government and private primary schools with 104,994 pupils and 2,263 teachers; 9 secondary schools had (1934) 162 teachers and 2,111 pupils. The National University had in 1934, 528 students and 76 professors; complete autonomy in appropriate spheres of university affairs was granted in 1929 to a body including students, alumni and faculties. The 6 normal schools had (1934) 639 students and 85 teachers; 18 professional schools (all private) had 417 pupils and 28 teachers.

Justice is administered by a Supreme Court of 3 members, and two courts of appeal (one for civil causes and another for commercial and criminal causes). Subordinate tribunals are, for criminal matters: a court of jurymen, 9 judges of First Instance, 12 correctional judges, and 9 police magistrates; for civil cases: 6 judges of First Instance; and for commercial cases: 2 judges. The functions of magistrates are exercised in the provinces by 127 *jueces de paz* (all laymen), who are also Civil Registrars and Presidents of the local Electoral Committees.

Finance.

The estimated revenue and expenditure for six fiscal years, ending August 31, are given as follows (the gold peso, like the Argentine gold peso, equals 96·5 cents. (U.S.); roughly 5 gold pesos or 213 paper pesos = £1):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Gold pesos	Gold pesos		Gold pesos	Gold pesos
1928–29	5,950,181	5,950,135	1931–32	5,704,080	5,703,004
1929–30	6,306,227	7,082,944	1932–33[1]	5,677,755	4,775,773
1930–31	6,453,240	6,445,945	1933–34[1]	5,704,080	3,062,337

[1] Based on the budget of 1931–32.

Revenue, in the calendar year 1933, amounted to 3,835,227 gold pesos, of which customs receipts were 1,707,709 gold pesos.

On November 30, 1933, the external debt of Paraguay was 3,345,742 gold pesos; the consolidated internal debt was 3,381,477 gold pesos; the floating debt was 1,729,085 gold pesos. In September, 1924, Paraguay resumed

payment of interest on her sterling loan of 1871–72 (476,290*l.* in 1931), and of 4,315*l.* annually in reduction of the principal, and on that of 1915 (209,900*l.*), on which she paid annually 10,861*l.* in reduction of the principal until suspending payments on both in June, 1932.

Defence.

The military establishment is about 100 officers and 2,800 men, distributed at 5 centres. The permanent organisations comprise 4 regiments of infantry, 1 regiment of cavalry, and 2 batteries of artillery. In the event of war service is compulsory in the active army for 2 years between the ages of 18 and 20; between 20 and 29 in the reserve of active army; between 29 and 39 with national guard, and between 39 and 45 in the territorial guard.

The navy consists at present of a flotilla of 2 new armoured river gunboats of 835 tons (built in Italy) and 3 small converted merchant vessels, river craft armed with modern guns. The largest of the latter is about 200 tons gross register. The budget expenditure on national defence in 1930–31 amounted to 67,978,222 paper pesos.

Production and Industry.

The soil of Paraguay is productive and the climatic conditions favourable to the cultivation of many sub-tropical products. Much of the country is admirably suited to pastoral purposes. It is estimated that there are about 4,000,000 head of cattle in the country. There are four packing plants, encouraged by the Government; hides, jerked beef, corned beef and other animal products are exported. Annual output of hides is about 250,000 wet and 100,000 dry hides, plus about 120,000 hides from the packing plants. *Yerba maté*, or strong-flavoured Paraguay tea, which is a natural product of the virgin forests (covering from 25,000 to 30,000 square miles) as well as a plantation product, is one of the chief articles of export (1,390 metric tons in 1932). Tobacco is also grown (2,939 metric tons exported in 1933). Timber resources of excellent quality are enormous. Paraguay produces in the Chaco region quebracho logs, of which 322 tons were exported in 1933 and quebracho extract; exports, 48,234 tons in 1933. Fruit-growing, especially oranges, is general; exports in 1933, 28,299,750 oranges and 2,546,200 tangerines. Yaguaron is the chief source of petit-grain oil, distilled from the leaves of a bitter orange tree and used in the manufacture of many perfumes. About 80 metric tons are yearly exported (102 in 1933), chiefly to France and Germany. The total area devoted to sugar cultivation (largely for the manufacture of spirit) is about 25,000 acres; sugar production in 1933, 5,944 tons. There are 10 sugar factories in Paraguay, the most important of which is at Tebicuari. Some rice is grown—4,302 tons in 1933. Banana growing has started. Roots (chiefly mandioca, sweet potatoes, and ground-nuts), &c., are grown for local consumption, but agriculture is primitive. About 134,000 acres are planted to maize; output (1933) 76,432 tons. The cultivation of cotton of the American uplands type is encouraged by the authorities; it matures early and reaches the market when the American crop is scarce. Labour shortage is the main difficulty. In 1933 the acreage under cotton was 29,564 acres; production, 12,964 metric tons. Lace-making, of the 'spider-web' variety, is a thriving industry.

Iron, manganese, copper, and other minerals are encountered in abundance. The Ibicui iron mines were worked as early as 1863. The Quiquió and Ibicuí manganese mines contain ore deposits estimated at 60,000,000 tons. Copper has also been found at San Miguel and Quiquió.

Commerce.

The following is the value, in gold pesos, of the imports and exports at par 5 gold pesos = £1):—

—	1929	1930	1931	1932	1933
	Gold pesos	Gold pesos	Gold pesos	Gold pesos	Gold pesos
Imports	13,850,095	15,139,359	10,080,732	6,417,646	7,159,691
Exports	13,459,766	14 176,453	12,856,585	12,872,945	9,767,520

Exports in 1933 included hides (154,014), corned beef, meat extract, etc., (2,050 metric tons), and cotton (894 tons). The most important imports are cotton and woollen textiles, wheat, flour, and petrol. Of the total exports in 1933, goods to the value of 4,161,530 gold pesos, or about 44 per cent. of the total, went to Argentina; in addition, goods to the value of 4,776,666 gold pesos went there for re-export. Imports from Argentine, 1933, 4,391,095 gold pesos; United States, 377,366; United Kingdom. 651,345.

The trade between Paraguay and the United Kingdom (Board of Trade Returns) for 5 years :—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Paraguay to U.K. .	113,407	105,493	12,007	5,336	50,719
Exports to Paraguay from U.K .	148,257	108,125	84,679	155,865	124,021
Re-exports to Paraguay from U.K.	2,655	934	524	1,033	1,036

Communications.

Asunción, the chief port, is 950 miles from the sea; the Paraguay river is navigable up to Villa Concepción for vessels of 12-foot draft. Smaller vessels navigate its 1,800 miles. In 1933, 3,495 vessels, with an aggregate tonnage of 363,733 tons, entered at the port of Asunción, and 4,008 with a tonnage of 411,569 cleared. The principal company engaged in the river service on the Paraguay and the Alto Paraná is the Argentine Navigation Company, Ltd., the controlling interest in which is British.

There is a British-owned railway (the Paraguay Central Railway) from Asunción to Encarnación, on the Rio Alto Paraná. This railway has a total main-track length of 232 miles. There is now a through train service without break of bulk from Asunción to Buenos Aires. El Ferrocarril del Norte, owned by a Paraguayan company, runs from Concepción as far as Horqueta, a distance of 33 miles. This road is projected to run as far as Pedro Juan Caballero on the Brazilian border. The Azucarera Paraguaya, in the Department of Ibytymi, has 15 miles of its line open to the public. Total length of railways, 669 miles. The country roads are in general mere bullock tracks, and transport is difficult.

The national telegraph (110 offices) connects Asunción with Corrientes and Posadas in the Argentine Republic, and thus with the outside world; total, 2,944 miles. Telephone lines, 1932, 4,636 miles. Long-distance telephone communication with Posadas was established in 1932. Wireless telegraph stations have been erected at Asunción, Concepción, Paraguari, Bahia Negra, and Puerto Casado. Paraguay joined the postal union in 1881; the number of post offices is 257.

Money and Credit.

The unit of value is the gold peso, which is based on the Argentine gold peso; at par, it is equal to 96·5 cents. (U.S.). Actually there is no gold or

silver current, and the paper peso, which is roughly equivalent to one English penny, is the only circulating medium with the exception of nickel coins which, in the shape of one peso, two pesos and fifty cents pieces, form a small part of the currency. One gold peso = 42·61 paper pesos. Business and governmental transactions are frequently stated in both gold and paper pesos. The total paper currency in circulation on December 31, 1932, was 196,510,000 paper pesos, guaranteed by Conversion Fund and deposits in other banks; total stock of gold, 749,000 U.S. dollars.

From 1923, when finances were reorganized on the lines suggested by an American financial adviser, the State Bank's Exchange Office, with its separate capital of 1,000,000 gold pesos (Oficina de Cambios) maintained the exchange at 18·75 Paraguayan paper pesos to the Argentine paper peso and 42·61 Paraguayan pesos to the Argentine gold peso; the world-wide exchange difficulties of 1932 led to joint control with Argentine of the country's foreign exchange resources.

The principal banks in Paraguay are a branch of the Bank of London and South America, Ltd.; the Banco Germanico de la America del Sud, the Banco del Hogar Argentino, and the Banco Agricola. The last mentioned is practically a department of the Government, charged with agricultural development. Some contraction in banking facilities is taking place; commercial banks which reported on December 31, 1930, combined capital and reserves of 1,019,481 gold pesos, had on December 31, 1933, capital and reserves of 933,468 gold pesos.

Weights and Measures.

The metric system was officially adopted on January 1, 1901.

Diplomatic and Consular Representatives.

1. Of Paraguay in Great Britain.

Chargé d'Affaires.—Rogelio Espinoza.

There are Consuls at Glasgow, Birmingham, Manchester, Cardiff, Liverpool, Bradford, and Southampton.

2. Of Great Britain in Paraguay.

Consul and Chargé d'Affaires.—R. H. Tottenham Smith.

PERSIA.

(IRÂN.)

Reigning King (Shah).

ON October 31, 1925, the Majlis, 'in the name of the national welfare,' proclaimed the deposition of the Shah, Sultan Ahmad, and the overthrow of the Kajar dynasty. On December 13 the Constituent Assembly elected **Riza Khan Pahlevi** Shah of Persia, and made the Crown of Darius hereditary in his family. On December 15 the new Shah took the oath to defend the Constitution, and on December 16 he was publicly proclaimed. On Feb. 25, 1926, he appointed his eldest son, Shahpur Mohammed Riza, Valiahd (Crown Prince) of Persia. Riza Shah was crowned on April 25, 1926.

Constitution and Government.

The form of government in Persia up to the year 1906 was, in its most important features, similar to that of Turkey. The Shah, within the limitations imposed by the Moslem religion, was an absolute ruler, but had to reckon with the power of the leading doctors of law (*Mujtahid*), who resided at Najaf and Kerbela in Mesopotamia. Unlike the Sultan of Turkey he had no religious standing. In 1905, the Persian people demanded representative institutions, and in January, 1906, the Shah gave his consent to the establishment of a National Assembly, or 'Majlis,' which sat from October, 1906, to June, 1908, and drew up a Constitution which received the Shah's approval on December 30, 1906. Each term of the Majlis lasts 2 years. The new Majlis was opened by the Shah on March 15, 1933.

The government of the country is in the hands of the Cabinet, appointed as follows (September 17, 1933):—

Prime Minister.—Mirza Muhammad Ali Khan *Feroughi* (Zuka-ul-Mulk).
Minister for Foreign Affairs.—Mirza Seyyid Bagher Khan *Kazemi* (Muhazzeb-ud-Dowleh).
Minister of Interior.—Mirza Mahmud Khan *Jam* (Mudir-ul-Mulk).
Minister of Finance.—Mirza Ali Akbar Khan *Dawar*.
Minister of Roads and Communications.—Mirza Ali Khan *Mansur* (Mansur-ul-Mulk).
Minister of War.—Mahmud Khan Amir *Movassaghe*.
Minister of Justice.—Mirza Seyed Muhsen Khan *Sadr* (Sadr-ul-Ashráf).
Acting Minister of Education.—Mirza Ali Asghar Khan *Hekmat*.
Minister of Posts, Telegraphs, and Telephones.—Nezameddin Khan *Hekmat*.

Director General of the Department of Commerce.—Mirza Ali Akbar Khan *Bahman.*

Director General for Industry and Agriculture.—Mustafa Kuli Khan *Bayat* (Samsam-ul-Mulk).

The country is divided into twenty-six provinces, which are governed by governors-general (Wâlî) and governors (Hâkim), who are directly responsible to the central Government. Each quarter of a town or parish, and every village, has a chief who is called Katkhuda. These officers are generally appointed by the governors, but sometimes elected by the citizens. The chiefs of nomad tribes are called Ilkhânî, Ilbegi, Wâlî, Sirdâr, Sheikh.

Towns generally have a municipality, the director of which is nominated by the Central Government.

Area and Population.

Persia, which has an area of about 628,000 square miles, lies between 25° and 40° north latitude and between 44° and 63° 30′ east longitude. A vast portion of this area is an absolute desert, and the population is everywhere so scanty as to approximate, on the average, 16 inhabitants to the square mile.

The population is estimated at 10 millions, but all figures are largely conjectural. It is estimated that the country contains some three million nomads. Of these, 260,000 are Arabs; 720,000 Turks, 675,000 Kurds and Leks, 20,700 Baluchis and Gipsies, 234,000 Lurs. These figures, however, are merely round numbers, and estimates vary.

The principal cities of Persia are:—Teheran and district, with about 350,000 inhabitants; Tabriz, 180,000; Isfahan, 100,000; Meshed, 85,000; Resht, 80,000; Kerman, 30,000; Kermanshah, 40,000; Shiraz, 35,000; Yezd, 30,000; Barfurush, 30,000; Hamadan, 30,000; Kazvin, 30,000; Kum, 25,000; Sultanabad, 20,000; Kashan, 15,000; Muhammerah, 30,000; Ahwaz, 30,000; and Abadan, 40,000.

Religion.

Of the population about 7½ millions are Moslems of the Shî'a sect, and of that branch of it known as the *Ithná-'Ashariyya*, who recognize twelve Imâms or spiritual successors of the Prophet Mahomet; 850,000 are of the Sunnî sect; 10,000 are Parsîs (Gabrs), 40,000 Jews, 50,000 Armenians, and 30,000 Nestorians; there are also many 'Bahais' and some Christians, whose number cannot, however, be estimated.

The Moslems of the sect called Shî'a differ to some extent in religious doctrine (especially in their rejection of the *Sunna* or traditional body of rules, as distinct from the actual text of the Koran), from the Moslems of the Turkish Empire, who are called Sunnî. The Persian priesthood (ulemâ) is still powerful. The highest authority, the chief priest of all, is the leading mujtahid, who resides at Najaf or Kerbela, near Baghdad, and some consider him the vicegerent of the Prophet, the representative of the Imâm. The Shah and the Government have no voice in the matter of appointing the mujtahids, but the Imâm-i-Jama, chief of the great mosque (Masjid-i-Jama) of a city, are appointed by Government. Under the Imâm-i-Jama are the pish namâz or khatîb (leader of public prayers and reader of the Khutba, the Friday oration), the mu'azzin (crier for prayers), and sometimes the mutavali (guardian of the mosque); this latter, as well as the mu'azzin, need not necessarily be a priest. All mosques and shrines have some endowments (wakf), and out of the proceeds of these are provided the funds for the salaries of the priests attached to them. The shrines of some favourite saints

are so richly endowed as to be able to keep an immense staff of priests, servants, and dependants.

The Gregorian National Armenians form two dioceses, each under a bishop, the one residing at Tabriz, and the other at Isfahan. There are also a few thousand Roman Catholic Armenians in Persia who have a bishop of their own rite at Isfahan, the bishop of the Latin rite residing at Urumia. There is a wide tolerance exercised towards Armenians and Nestorians, Jews, and Parsis in cities where Europeans reside.

Education.

In recent years Public Instruction has made rapid strides; the old system of instruction, which was generally religious, has been practically entirely changed, and at present a tolerably adequate education can be obtained in general knowledge from native teachers who have studied abroad, although, of course, the purely religious schools are still maintained in the Mosques, and the old 'Maktab'—street schools for the very young at which the mere rudiments of reading and writing are taught—still abound. In 1932 there were said to be 3,642 schools of all categories with 182,000 pupils as compared with 612 schools with 55,000 pupils in 1921.

The Government pays the whole budget of Government Schools and grants are paid to the public, private and foreign schools. Religious Schools are maintained from endowments.

The Foreign Schools are maintained by funds from abroad supplied by The American Presbyterian Mission, The Church Missionary Society, The Alliance Israélite, and The French Roman Catholics Mission, and there are also schools run by the German and Soviet Governments; all the above have schools for boys and for girls, but children who are Persian subjects may not now attend foreign primary schools.

Justice.

The judicial system of Persia is modelled on that of France. There are justices of the peace in villages and small towns, higher courts in the larger towns, police magistrates in all important places, courts of appeal in Teheran, Tabriz, Shiraz, Kermanshah, Ispahan, Meshed, Kerman and Ahwaz, and a court of cassation, or supreme court, in Teheran. The courts are supervised by the Ministry of Justice. New Civil, Criminal and Commercial codes based on French and Swiss codes have been introduced into the Courts of Justice.

Finance.

The most productive items of revenue in order of importance are usually Customs Receipts, Anglo Persian Oil Co. royalties, Sugar and Tea monopoly, and Land Tax and Road Tax. The incidence of taxation, which is mainly indirect, weighs most heavily on the labouring classes.

Approximate gross Customs receipts for the last three years, according to the Customs Tableau Général, were:—March, 1930–March, 1931, 1,964,740*l.*; June, 1931–June, 1932, 1,406,977*l.*; June, 1932–June, 1933, 1,654,606*l.*; (The Persian Economic Year is now from June 21 to June 20, instead of March to March: the Customs figures are published for the economic year.)

The budget estimates for the year ending June, 1935, are:—revenue, 621,413,417 rials, exclusive of the Anglo-Persian Oil Company royalty, the revenue from the sugar and tea monopoly tax and part of the proceeds of the road tax; expenditure, 621,282,665 rials, exclusive of certain expenditure on railways and roads. The royalties from the A.P.O.C. are deposited in London and regarded as a treasury reserve. This reserve, which has

recently, as the result of the new agreement with the A.P.O.C., been increased by payments slightly exceeding 4,000,000*l.*, will probably be used to assist railway finances. The total revenue from the sugar and tea monopoly tax up to March 20, 1934, was recently shown as 677,035,196 rials (about 8,463,149*l.*) and expenditure from this fund, established for railway construction, 642,917,562 rials (8,036,469*l.*), leaving 34,117,634 rials, or about 426,470*l.* available.

On August 20, 1934, the recognised foreign debt of Persia was the 1911 Loan, the original amount of which was 1,250,000*l.*, and the amount outstanding, 1,035,215*l.*

The debt incurred to Great Britain during and immediately after the war, which has been placed at 2,000,000*l.*, has not yet been funded. The total floating debt at the same date was 6,661,428 rials.

Defence.

Little is known of the Persian fighting forces. No Navy, Army or Air Force Lists are published. The army is believed to consist (1934) of 1507 officers and 30,872 other ranks, together with 2,488 officers and 68,952 other ranks of the gendarmerie, frontier guards and local militia. The defence budget amounts to approximately 2¾ million pounds. The chief formations are the central garrison in Teheran, two divisions in Azerbaijan and one division in Meshed. Considerable sums have been spent in re-equipping the army with modern war material. Military service became compulsory under the Conscription Act of 1924.

The Persian Air Force is being equipped with modern aircraft, mostly of Hawker and De Havilland manufacture. It has 80 aircraft in the first line and 120 for civil aviation.

The Persian Navy consists of 2 sloops armed with 3 4-inch guns and 4 motor patrol vessels armed with 2 3-inch guns, all built in Italy.

Production and Industry.

Persia produces oil, wool, skins, casings, drugs, fruits, gums, rice, cotton, wheat, &c. : special attention is being paid to the textile industry. Production in 1931–32 was estimated by the Department of Agriculture as follows (in tons):—rice, 280,000 ; cotton, 25,000 ; tobacco, 10,000 ; raisins, 40,000; and wheat, 1,150,000. The wool of Khurasan is famous. Persian carpets, of which there are many kinds, are all made by hand. The principal centres of the industry are Tabriz, Hamadan, Sultanabad, and Kerman.

The mineral deposits of Persia are considerable but undeveloped. They include iron, coal, copper, lead, manganese, marble, borax, nickel, and cobalt. Oil is being developed with much success. The turquoise mines of Nishapur are worked in a most primitive fashion but with profit, as also are the iron oxide and rock salt in the Persian Gulf.

The production of the Anglo-Persian Oil Company, which holds a concession for a large area in S. Persia, was : 1931, 5,750,000 tons ; 1932, 6,500,000 tons; 1933, 7,087,000 tons ; 1934, 7,537,372 tons.

Commerce.

On February 25, 1931, the Government established a monopoly of foreign trade, operating through a system of Government permits.

The principal centres of commerce are Tabriz, Teheran, Hamadan, Meshed, and Isfahan ; the principal ports, Bandar Abbas, Mohammerah, Bushire and Bandar Shapour on the Persian Gulf, and Astara, Pahlavi (Enzeli), Meshed-i-Sar, Bandar Guez and Bandah Shah on the Caspian.

According to the statistics published by the Minister of Finance the values of the imports and exports for six years were as follows :—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1927–28	16 450,193	21,617,164	1930–31	12,784,363	23,088,643
1928–29	17,069,861	31,596,960	1931–32	7,887,102	20,459,320
1929–30	15,859,534	27,152,863	1932–33	6,691,549	17,045,338

The following table shows, in thousands of rials (84·85 rials = 1*l.* in 1931–32, and 98·27 rials = 1*l.* in 1932–33) the values of the chief imports into, and exports from Persia :—

Imports	1931-32	1932-33	Exports	1931-32	1932-33
Cotton textiles	231,204	168,727	Mineral oils	1,017,948	1,143,279
Sugar	73,435	61,260	Carpets and rugs	188,475	181,087
Machinery, etc.	33,599	50,436	Fruits, fresh and dried	117,990	57,913
Tea	38,332	35,286	Opium	20,907	33,088
Mineral oils and greases	52,460	41,400	Rice	33,265	16,439
Vehicles of all sorts and spares	45,530	60,765	Cotton, raw	10[illegible],451	44,879
Cotton yarns	32,729	34,360	Wool, raw	25,339	19,034
Haberdashery & household utensils	15,104	16,427	Gum tragacanth	35 609	14,652
Textiles, woollen	10,971	16,674	Sheep casings	17,230	14,776
Chemical products	8,715	16,051	Natural silk tissues	13,863	8,244
Paper (excepting cigarette paper)	8,123	12,210	Livestock	13,144	13,573
			Hides and furs	9,935	10,458
Total(including all others)	669,220	657,578		1,735,973	1,675,055

In the years ending June, 1932, and June, 1933, the distribution of the trade of Persia was as follows :—

From or to	Imports		Exports	
	1931–32	1932–33	1931–32	1932–33
	1,000 Rials	1,000 Rials	1,000 Rials	1,000 Rials
Soviet Union	273,982	207,894	266,883	126 483
United Kingdom	93,575	104,940	503,367	514,344
United States	44,129	54,324	79,715	88 560
British India	111,047	69,003	168,400	97,491
Germany	44,463	55,318	104,273	80,707
Japan	24 882	52,309	5,970	4,659
Iraq	2,070	3,140	70,433	46.442
France	14,860	19,[illegible]08	165,736	132,208
Sweden	968	19,698	3,153	5,483
Turkey	284	132	33,493	23,341
Italy	18,013	19,9 6	45,720	57,770
Belgium	16,062	21,469	49,323	33.242
China	1,329	1,014	1,921	19,850
Egypt	154	974	172,300	253,369
Czechoslovakia	12,695	10,539	130	669

The chief imports from Persia to United Kingdom in 1933 were, according to Board of Trade returns: Motor spirit, 3,106,694*l.*, and crude petroleum, 2,132,349*l.* The chief exports to Persia were iron and steel, 209,393*l.*; machinery, 190,754*l.*; and cotton piece goods, 190,296*l.*

Total trade between Persia and United Kingdom (Board of Trade returns) for 5 years :—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Persia to U.K. .	8,776,307	5,791,308	6,942,432	7,725,274	7,923,746
Exports to Persia from U.K. .	2,694,514	727,443	826,845	1,053,550	1,731,201
Re-exports to Persia from U.K. .	199,081	52,787	11,422	28,108	26,282

Banking and Credit.

The Shah in 1889 granted a concession to Baron Julius de Reuter for the formation of a State Bank of Persia, with head office at Teheran and branches in the chief cities. The bank was formed in the autumn of the same year, with the title 'The Imperial Bank of Persia,' and incorporated by Royal Charter, dated September 2, 1889. The bank has recently conceded its sole right of note issue to the Persian Government. There is also established at Teheran the Russian 'Banque d'Escompte,' formerly 'Banque des Prêts de Perse.' This Bank, with all its Concessions, was in March, 1921, handed over to the Persian Government by the Soviet authorities, and is now 'The Bank of Iran,' and forms part of the Ministry of Finance. The Ottoman Bank has also established branches in Teheran, Hamadan, and Kermanshah. Latterly the Russians started a bank, under the auspices of the Soviet Government, which has branches in both the northern and southern provinces. A Government Pawnbroking Establishment was founded in January, 1927, and a 'National Bank' in September, 1928. During the year 1929, the National Bank, of which Col. Riza Quli Khan is managing director, opened branches in all the chief provincial towns. There is also the Bank-i-Pahlevi with branches in the important towns in the north. The Agricultural Section of the National Bank was made a separate establishment with its own capital in May, 1933.

Communications.

Tonnage entered at Bushire, Lingah, Bandar Abbas, Mohammerah and other ports on the Persian Gulf between June 22, 1932, and June 21, 1933, was 5,756,025 tons, of which 5,086,847 tons were British, 279,430 tons German, and 102,336 tons Soviet; the Persian total was 55,305 tons. Tonnage entered at Caspian ports was 289,309 tons, of which 280,052 (steam) was Soviet and 6,234 (steam) was Persian; 2,225 tons (sail) was Soviet and 798 tons (sail) was Persian.

The total number of vessels entered and cleared at Persian ports during the year was 4,514 as compared with 14,117 during the preceding year.

The Government continues its programme of road construction, and the new road from Teheran to Chalus on the Caspian Sea, via Kerej, is completed. This is the shortest road, about 140 miles, from the capital to the Caspian. Work has been continued on the Tabriz–Rowanduz road and consignments have already been made from Baghdad to the Province of Azerbaijan by car over the new road, though it is far from being in a finished state as yet. Construction of the North to South Railway progresses, but so far trains only run on some 80 miles from Bandar Shah to Shahi (Aliabad) in the northern section, and on about 156 miles from Bandar Shapour to Salehabad, via Ahwaz, on the southern section.

Taking Teheran, the capital, as the centre, the following main routes are available for all forms of motor traffic:—(i) Teheran to the Caspian Sea (Port Pahlevi) via Kasvin and Resht; (ii) Teheran to Tabriz; (iii) Teheran to Baghdad via Kasvin, Hamadan and Kermanshah; (iv) Teheran to Basra via Sultanabad, Burujird, Khurramabad, Dizful Ahwaz, and Mohammerah;

(v) Teheran to Bushire via Isfahan and Shiraz; (vi) Teheran to Bander Abbas via Isfahan and Kerman; (vii) Teheran to Meshed; (viii) Teheran to the Caspian Sea (Bandar-i-Gaz) via Babul; (ix) Teheran to Zahedan and Quetta. Two routes: (*a*) via Meshed; (*b*) via Kerman. Several subsidiary roads exist, the most important being:—(i) The coastal road on the southern shore of the Caspian Sea from Pahlevi to Bandar-i-Gaz; (ii) Hamadan to Isfahan via Sultanabad; (iii) Kermanshah to Burujird; (iv) Shiraz to Kerman via Niriz; and (v) Meshed to Askabad; (vi) Tabriz to Rezaniyeh (Urumiah) (*a*) via Sauj-Bulag (south of Lake Urumiah); (*b*) via Julfa and Khoi (north of Lake Urumiah); (vii) Khoi to Maku and Trebizond. A road was opened in 1932 to connect Tabriz with Nisibin via Rowanduz. Several of the above roads are blocked by snow for 3 or 4 days at a time between December 15 and April 1.

Total length of railways 467 miles, as follows:—Tabriz–Julfa, 85 miles; Sofian–Sharifkhaneh, 30 miles; Mirjawa–Zahedan, 104 miles (not actually working now); Teheran–Shah Abdul Azim, 5 miles; Bandar Shahpur–Salahabad 156 miles; Aliabad–Bandar Shah, 80 miles. These last two sections are at the southern and northern ends respectively of the line which is projected between the Persian Gulf and the Caspian: work is continuing at each end, but progress is slow owing largely to the difficulty of the country which has now to be traversed.

Navigation on the Lake of Urumiah, from Sharafkhaneh to Golmankhaneh is served by some five tugs and 15 barges for the transport of goods and passengers. The service runs twice a week. On the River Karun likewise, from Mohammerah to Ahwaz (Nasseri), an irregular service for cargo only both ways is run by the Mesopotamia Persia Corp., Ltd., and some native firms run daily trips by motor boat, for passengers and merchandise. By changing into lighter draught boats at Ahwaz both can be taken up to Shallili near Shushtar.

The telegraph system attains a length of 9,588 miles with 16,265 miles of wire. In virtue of several conventions, dating from 1863, between the British and Persian Governments, the Indian Government constructed, and until March, 1931, maintained and worked with its own staffs: the Indo-European Telegraph Department line from Teheran–Kum–Kashan–Isfahan–Shiraz to Bushire, and thence to Fao and also Karachi; this line is 669 miles in length with 2,292 miles of wire and 7 stations; and the Central Persia Telegraphs from Teheran via Kashan–Yezd–Kerman–Bam to the Beluchistan frontier and thence to India with a mileage of 1,467 line and 4,183 wire and 10 stations. The Indo-European Telegraph Co. maintained communication between Teheran and Tabriz and on to Julfa, which connects with the European systems. Number of telegrams in 1929, 735,737 internal, 104,559 foreign.

The Indo-European Telegraph Company, as well as the Indo-European Telegraph Department, relinquished all their telegraph lines in Persia on February 28, 1931; thenceforward all these lines came under the direct control of the Persian Telegraph Administration with the exception of the land-line between Jask and the Indian frontier near Gwadur, which is exploited by the Imperial and International Communications Company.

Wireless has been installed at Teheran, Tabriz, Meshed, Kermanshah, Pahlevi, Kerman, Mohammerah, and Shiraz. Teheran is in wireless communication with Europe via Tiflis and Beyrout.

In 1932 the Government purchased the telephone system from the lessees, the "Société Anonyme des Téléphones Persans" for one million tomans, and it is now generally under Government control.

In 1929, 6,199,800 letters and 256,700 post-cards were handled in the

internal service; in the foreign service, 1,518,400 letters and 22,600 post-cards were received, and 1,197,400 letters and 124,200 post-cards despatched.

Money, Weights, and Measures.

Persia has a gold standard, the unit of which is the *rial*, containing 0·07322382 grammes of gold: one hundred *rials* make one *pahlevi*. The *rial* is sub-divided into 100 *dinars*.

The gold standard is not, however, in force, for, by a law passed on March 13, 1932, there is no obligation to pay out gold pending a return to more normal economic conditions.

The actual unit of currency is a *rial*, which contains 4·14 grammes of silver and is the equivalent of the *kran*, which is now obsolete, and is being withdrawn from circulation.

By a law passed on January 8, 1933, the official weights and measures of Persia correspond to those of the metric system. Arrangements are being made for the putting into effect of this law.

For the old Persian weights and measures, see THE STATESMAN'S YEAR-BOOK for 1933, p. 1191.

Diplomatic Representatives.

1. OF PERSIA IN GREAT BRITAIN.

Minister.—Mirza Hussein Khan Ala, C.M.G.
Counsellor.—Mohammad Khan Shayesteh.
First Secretary.—Ghulam Ali Khan Ardelan.
Attaché.—Haidar Ali Khan Ahmadi.
Honorary Commercial Attaché.—Nubar Sarkis Gulbenkian.

2. OF GREAT BRITAIN IN PERSIA.

Envoy Extraordinary and Minister Plenipotentiary.—H. M. Knatchbull-Hugessen, C.M.G. (Appointed November 7, 1934.)
Counsellor (acting).—V. A. L. Mallet, C.M.G.
Second Secretaries.—P. N. Loxley and D. L. Busk.
Oriental Secretary.—A. C. Trott.
Commercial Secretary.—S. Simmonds, M.B.E.
Military Attaché.—Major G. D. Pybus.

There are Consular representatives at Teheran, Tabriz (C.), Bushire (C.-G.), Bandar Abbas, Meshed (C.-G.), Seistan, (re-named in 1931, Zabul), Kerman, Mohammerah, Shiraz, Kermanshah, Ahwaz, Birjand and Duzdab (re-named in 1931, Zahedan).

PERU.

(REPUBLICA DEL PERÚ.)

Constitution and Government.

THE Republic of Peru, formerly the most important of the Spanish Viceroyalties in South America, issued its declaration of independence on July 28, 1821; but it was not till after a war, protracted till 1824, that the country gained its actual freedom from Spanish rule.

The following table gives a list of Presidents from 1899 to 1933:—

Don Eduardo Lopez de Romaña, Sept. 8, 1899—Sept 8, 1903.
Don Manuel Candamo, Sept. 8, 1903—May 7, 1904.[1]
Don Serapio Calderón (Acting), May 7, 1904—Sept 24, 1904.
Don José Pardo y Barreda, Sept. 24, 1904—Sept. 24, 1908.
Don Augusto Bernardino Leguia, Sept. 24, 1908—Sept. 24, 1912.
Dr. Don Guillermo Enrique Billinghurst, Sept. 24, 1912—Feb. 4, 1914.[2]
General Don Oscar Raimundo Benavides (Acting), Feb. 4, 1914—Sept. 24, 1915.
Don José Pardo y Barreda, Sept. 24, 1915—Oct. 12, 1919.[3]
Don Augusto Bernardino Leguia, Oct. 12, 1919—Aug. 24, 1930.[3]
General Don Manuel Ponce (Acting), Aug. 24, 1930—Aug. 28, 1930.[3]
Colonel Don Luis M. Sánchez Cerro (Acting), Aug. 28, 1930—March 1, 1931.[3]
Don Ricardo Leoncio Elías (Acting), March 1, 1931—March 5, 1931.[3]
Colonel Don Gustavo Jimenez (Acting), March 5, 1931—March 10, 1931.[3]
Don David Samanez Ocampo (Acting) March 10, 1931—Dec. 8, 1931.
General Don Luis M. Sánchez Cerro (Constitutional), Dec. 8, 1931—April 30, 1933.[4]

[1] Died [2] Deposed [3] Resigned [4] Assassinated.

According to the new Constitution of April 9, 1933, the legislative power is vested in a Senate and a Chamber of Deputies. The present constituent assembly, nominally 145 members, will form the Chamber of Deputies, but 25 of its members will be chosen for the Senate and 15 further members of the Senate will be elected by direct suffrage in 1935. The next legislative and presidential period will commence December 8, 1936, and last until July 28, 1941. Thereafter the President and the Chamber of Deputies will be renewed every 5 years; the Senate will be elected for 6 years, one-third renewable every two years. Both senators and deputies are to be elected by a direct vote. Congress normally sits for 120 days; it may be convened for a special session. Voters are males, at least 21 years old, who are able to read and write; in 1931 the number of registered voters was 392,263.

The executive power is entrusted to a President, elected for 5 years and not eligible for a consecutive term. He receives 25,500 soles a year, plus 12,000 soles for representation. Under the new Constitution he is advised by an Economic Advisory Council which (1935) has about 50 members who are specialists in various fields.

President.—General Don Oscar Raimundo *Benavides.* Elected by Constituent Assembly on April 30, 1933, on the assassination of President Sánchez Cerro. To serve until December 8, 1936.

The President exercises his executive functions through a Cabinet of nine ministers, holding office at his pleasure. The ministers are those of the Interior, War, Marine, Foreign Affairs, Justice and Worship, Education, Labour and Social Welfare, Finance, and Public Works. Each minister receives 14,280 soles a year.

The 23 departments are divided into provinces (115 in all), and these are subdivided into 1,013 districts. Each department is administered by a Prefect, and each province by a Sub-Prefect. Municipal councillors are elected by direct vote, and foreigners are eligible.

Area and Population.

There has been no enumeration of the population in recent years. The census returns of 1862 showed a total population of 2,487,916; that of 1876 put the number at 2,699,106, of whom about 13·8 per cent. were white, 1·9 per cent. negroes, 57·6 per cent. Indian, 24·8 per cent. mestizos (Cholos and Zambos), and 1·9 per cent. Asiatic, chiefly Chinese. It was estimated (1927) that the population approximated 6,147,000 of which 600,000 were white. The language is Spanish, but the Indian population has its own language, either Quechua or Aymara.

To promote the assimilation of the Indian population, estimated at 4,000,000, the Government in 1930 declared June 24 of each year to be a national holiday, 'day of the indigene,' to be celebrated with appropriate ceremonies. By a decree issued in 1927, the Indians were freed from the peonage system which existed in some regions.

The population of the Department of Lima, containing the capital, according to the official census in November, 1931, was 380,708, and of the Department of Callao 70,881. Lima city has 281,425 inhabitants; Callao City, 63,728. The estimated population in 1928 of other cities was: Arequipa 46,000; Cuzco 40,000; Chiclayo 35,000; Ica 20,000; Trujillo 30,000; Chincha 20,000; Huancayo 20,000; Ayacucho 20,000; Iquitos 10,000; Huaráz 20,000; Piura 15,000.

Revised estimates in 1930, allowing for the cession of 43,970 square miles to Colombia (Salomon–Lozano Treaty, 1927), and of 7,670 square miles to Chile in 1928, put the present area at 482,133 square miles. The areas of the 23 departments (and total area of the various islands)

are given below with the population, according to the census returns of 1876 (the latest official one) and an official estimate for 1927. The chief towns are shown in brackets:—

Departments	Area: English square miles 1932	Population		Pop. per square mile, 1927
		1876 (census)	1927 (estimated)	
Departments:				
Amazonas (Chachapoyas)	13,943	34,284	80,000	5·7
Ancash (Huaráz)	14,700	284,330	480,000	31·9
Apurimac (Huancarama)	8,187	118,525	280,000	34·3
Arequipa (Arequipa)	21,947	157,046	360,000	16·8
Ayacucho (Ayacucho)	18,185	142,215	320,000	17·5
Cajamarca (Cajamarca)	12,538	212,746	450,000	35·9
Callao (Callao)	14	34,492	75,000	5,357·0
Cuzco (Cuzco)	55,716	243,032	700,000	12·5
Huancavelica (Huancavelica)	8,297	103,069	230,000	27·7
Huanuco (Huanuco)	15,426	78,991	200,000	12·9
Ica (Ica)	9,796	60,255	120,000	12·2
Junin (Huancayo)	22,814	209,759	450,000	19·7
La Libertad (Trujillo)	10,206	147,336	380,000	37·2
Lambayeque (Chiclayo)	4,613	86,738	140,000	30·3
Lima (Lima)	15,048	225,800	550,000	36·5

[1] Created in 1912.

[2] Including 38,225 of the former Department of Tarapaca, ceded to Chile.

Efforts to encourage immigration of Europeans, including Germans, Austrians, Poles and Cossacks by opening up to them some 3,000,000 acres have been only partially successful, and many have had to be repatriated since 1929.

The long-standing dispute with Chile over the provinces of Tacna and Arica (see STATESMAN'S YEAR BOOK for 1928, page 1198) reached an amicable settlement on June 3, 1929, at Lima, Tacna going to Peru and Arica to Chile. Demarcation and joint policing of the boundary were accomplished in August, 1930.

The frontier line between Bolivia and Peru was fixed from the mouth of the Heath to that of the Yaverija (1912), and is being finally demarcated by a joint commission. Regarding those with Colombia and Ecuador (for the possession of over 100,000 square miles of land rich in rubber, timber, and probably gold, lying about the head waters of the Amazon) direct negotiations were initiated between Peru and Ecuador in 1934. The Salomon–Lozano Treaty, establishing the boundary between Peru and Colombia, was ratified by the former in 1927, and by Colombia in 1928, but on September 1, 1932, Peruvian civilians from Iquitos seized the Colombian town of Leticia, east of Iquitos, and demanded a revision of the treaty. A League of Nations Commission took over the administration of Leticia from June 23, 1933, until the dispute was amicably adjusted through negotiations at Rio de Janeiro. A definite arrangement

has been made with Brazil as to boundary, favourable, on the whole, to Peru, and this was finally demarcated in 1927 by a joint commission.

The region north of the Marañon from the Pongo de Manseriche is claimed by Ecuador and Peru.

Religion.

Religious liberty exists, but the Roman Catholic religion is protected by the State, and in 1929, a decree was issued permitting only Roman Catholic religious instruction in schools, State or private. There is a Roman Catholic archbishopric (Lima, dating from 1545), 16 bishops and vicars-general, 4 Apostolic Prefects, 641 intermediate officials, 1,123 priests and 1,790 monks. The 1,109 churches, 51 convents and 72 religious houses are the property of the State. The Junta of Government in October, 1930, decreed that all marriages must be civil, regardless of religion and preceded by medical examination; liberal divorce regulations, including divorce for 'absence without just cause for 50 days,' were also established; in 1934, divorce by mutual consent or for "incompatibility of temperaments" was legalized. Divorcees may re-marry immediately.

Education and Justice.

Elementary education is compulsory for both sexes between the ages of 7 and 14, and is free. The system is highly centralized; all teaching appointments are made by the Ministry of Education. In 1930, there were in Peru 3,562 primary schools with 6,476 teachers and 342,016 pupils; 36 secondary schools (excluding private schools under supervision) with 697 teachers and 11,826 pupils and 4 normal schools, with a registration of 1,610. Budget appropriations for education in 1932, 9,469,848 soles. Special schools for the Indians enroll about 1,780. There are also 30 travelling schools. Higher education is normally provided at the central university in Lima, called 'Universidad de San Marcos,' founded by Charles V. in 1551; its autonomy, previously limited in 1928, was restored by the Junta in 1930, but it was closed in 1932; the Medical School was reopened in 1934. It had in 1929, 169 professors and 1,531 students in five faculties and two institutes. There are small universities at Arequipa (founded in 1827), with (1932) 223 students, Cuzco with 106 students, Trujillo, 104 students, and the Catholic University (Lima) with 153 students. There are State Colleges of Agriculture, Arts and Trades, and Engineering in Lima.

Justice is administered in the Supreme Court at Lima composed of 11 judges and 3 fiscals, and in 13 Superior Courts throughout the Republic. There are 147 Courts of First Instance and 42 Minor Courts. The judges of the Supreme Court are chosen by Congress from lists of names presented by the Government; those of the Superior Courts and of the Minor Courts are chosen by the Government from lists of names presented by the Supreme and Superior Courts, respectively.

Finance.

The revenue and expenditure for 5 years were as follows in soles (10 soles = the old Peruvian pound):—

—	1930	1931	1932[1]	1933[1]	1934[1]
	Soles	Soles	Soles	Soles	Soles
Revenue . .	118,792,210	99,755,105	96,928,296	98,973,610	111,119,437
Expenditure . .	131,281,853	104,819,139	96,928,296	112,900,000	111,119,437

[1] Budget estimates.

Actual receipts in 1932 were 86,516,896 soles.

For account of the old foreign debt of Peru and the arrangements reached regarding it with the Peruvian Corporation, see THE STATESMAN'S YEAR-BOOK for 1931, p. 1183.

The total debt of Peru (December 31, 1933) amounted to 672,176.193 soles, of which the internal debt amounted to 66,879,062 soles, the floating debt to 129,320,861 soles, and the foreign debt to 475,976,270 soles. The latter included 88,104,440 dollars (U.S.), calculated at the rate of 4·506 soles for one dollar, U.S., and 3,436,800*l.* sterling, at 22·98 soles to *l.* External debt service in 1930 took Lp. 1,449,780, of which guano exploitation, railroads and docks furnished 85 per cent. But in May, 1931, Peru suspended interest and sinking fund payments on external debt until economic conditions improve. British investments (1932) amounted to about 40,000,000*l.* of which about 2,000,000*l.* was represented by the Peruvian Corporation. American investments total 200,000,000 dollars, of which (1931) holdings of Government bonds represented 75,000,000 dollars and direct interest in railways and industries represented 124,742,000 dollars.

Defence.

ARMY.

Military service is compulsory and universal, though only a limited number of the annual quota of conscripts is called up for active duty with the colours, the remainder being formed into local battalions, who receive instruction one day in the week (Sundays). The term of service is 2 years in the active army, 5 years in the first reserve, 5 in the second reserve, and 20 years in the National Guard.

The country is divided into 5 military districts, each furnishing a complete division. The division is made up of 2 regiments of infantry of 2 battalions each, with 1 machine gun company; 1 topographical section, 1 medical section, 1 commissariat section, 1 or 2 regiments of cavalry (2 squadrons), 1 regiment of mountain artillery.

The army in 1935 consists of 9 regiments of infantry, 6 corps of artillery, 5 regiments of cavalry, 4 battalions of sappers, 1 anti-aircraft battalion and 1 signalling battalion.

The authorized establishment of the army in 1933 was 1,305 officers and 8,135 other ranks. Police and gendarmerie amount also to about 8,000 including civil guards and mounted police. The civil guard has been reorganised into 11 cavalry regiments, 1 infantry regiment of 4 battalions, 1 independent battalion and 1 machine gun battalion. Rifle instruction is also given in Peruvian schools. There is a military academy and war college at Chorillos, near Lima. Considerable quantities of war material and aircraft were acquired in 1933 and 1934.

The infantry is armed with the 1912 Peruvian model of the Mauser rifle, cavalry with carbine of the same type and model, artillery with the Schneider-Canet gun and machine gun battalion with Danish light machine guns, 'Maatsan.'

Aviation, both military and civil, is controlled by a Director-General of Aviation, under the Ministry of Marine and Aviation.

Army, Navy and Aviation appropriations in the 1934 budget were: Army, 16,558,489 soles; Navy and Aviation, 8,502,011 soles.

NAVY.

The Peruvian Navy consists of the following units:—2 obsolete cruisers, *Almirante Grau* and *Coronel Bolognesi*, 3,200 tons, 24 knots speed, each with

2 6-inch and 8 3-inch guns, built in 1906, and re-boilered and adapted for oil 1 transport; 1 oiler; and a sailing training ship. In addition there are 3 fuel in 1923–25; 3 destroyers; 3 gunboats; 4 submarines and auxiliaries. Two river gunboats were purchased in 1934 for service on the Amazon. There is a naval school for cadets at La Punta, near Callao, and a submarine base on San Lorenzo Island, opposite Callao.

Agriculture and Industry.

The country may be divided into three zones: the coast strip, with an average width of 30 miles; the Sierra, or Uplands, lying between the coast range of mountains and the Andes proper; and the forest or wooded region, called the Montaña. In the arid coast region the government has brought under irrigation 62,400 acres during the last few years; large irrigation projects have been started in the Olmos desert near Pimentel in northern Peru, and near Arequipa in southern Peru.

About 80 per cent. of the population is dependent on agriculture, mainly with the help of irrigation. The chief agricultural productions of Peru are, in the order named: cotton, sugar, coffee, wool, hides, and skins. Cotton production for 1933 is estimated at 270,000 bales (of 480 lbs.); for 1932 it was 231,055 bales (52,573 metric tons); 1931, 232,515 bales; 1930, 250,685. Value of the 1933 crop is put at 67,000,000 soles; of 1932, at 37,000,000 soles. About 330,000 acres are devoted to cotton; exports in 1933, 54,833 metric tons. Exports of cotton seed, 1933, 21,024 metric tons. The sugar industry is carried on chiefly by irrigation in the river valleys of the coast region and by sinking wells (1 lb. of sugar is estimated to require 500 gallons of water). Peru is a low-cost producer. About 50 large estates covering 120,000 acres raise 95 per cent. of the crop; production is around 410,000 tons, of which 366,535 tons were exported in 1933. The chief coffee-growing districts are those of Chanchamayo, Perené and Paucartambo in Central Peru, where the Peruvian Corporation has done much useful colonising work on about 2,750,000 acres. Exports in 1933, 1,862,000 kilos. Cocoa cultivation is extending, especially in the Perené region. Wheat growing on theplateaus of the Andes is encouraged. Total area under wheat about 300,000 acres; large quantities are still imported (84,379 tons in 1933). Rice is extensively grown; output of about 170,000 tons, is sufficient to meet local wants. The gathering of wild rubber, once the most important industry in the Amazon region of Peru, has declined with the competition of plantation rubber. Exports of balata from this region have taken its place, but as the trees are felled, not tapped, this too is declining; exports, 1933, 212 metric tons. Tobacco (in Northern Peru), wines and spirits, olives, ramie, and maize are also produced. Silk culture is being tried in the coast region. Coca is grown for the Indian population which chews the leaf, but cocaine is manufactured in Lima, Otuzco, and several other towns, principally for export; exports about 3,000 pounds. In addition there are dyes, cinchona, and other medicinal plants. Alpaca, sheep, and llama wool are exported. Total exports of wool, 1933, 5,856 tons.

The guano deposits on Huanillos, Punta Lobos, and other islands, amounting to 40 or 50 thousand tons, which had been granted to the Peruvian Corporation, reverted to the Peruvian Government on February 2, 1901; remaining deposits reverted to the Government in 1928. Output in 1932–33, 144,069 metric tons, of which 47,357 tons were exported.

Copper and petroleum are the chief minerals exploited. Exports of petroleum and derivatives, 1933, 11,084,171 barrels. The chief copper mine, the Cerro de Pasco, has been operated for three centuries. Exports of copper,

1932, 26,587 metric tons; 1931, 48,529 tons. Peru has long been the world's largest source of vanadium (80 per cent. of world output) and perhaps the only country where vanadium was mined for itself alone but mines were closed down in 1931. Gold is widely found, even in the rivers, but transport and labour difficulties hinder mining; present gold output is chiefly a by-product of copper and other mining. A decree of October 20, 1930, nationalized all gold deposits not already allocated. Nationals have priority in concessions. Iron deposits are large; the Government-owned field at Marcona has about 500,000,000 tons, it is estimated.

The following table shows the mineral production for two years (value in soles, the new unit; 10 soles = the former Peruvian pound):—

		1932		1933	
		Quantity	Value	Quantity	Value
			Soles		Soles
Copper	Metric tons	21,515	12,353,341	24,853	20,400,214
Petroleum [1]	Barrels	9,827,958	———	13,070,141	———
Silver	Kilos.	210,976	8,866,964	210,281	12,457,059
Gold	,,	2,220	6,353,304	2,614	11,795,811
Bismuth	,,	79,681	617,334	292,433	4,441,314
Coal	Metric tons	27,000	120,000	30,000	131,000
Lead	,,	4,461	851,968	1,217	287,933
Zinc	,,	212	45,637,	57	26,749

[1] Including natural gasoline.

Total mineral production, which is largely controlled by foreign interests, in 1931 was valued at 126,839,359 soles. Mine concessions, 1931, numbered 6,672. Mine workers number, 1931, 16,209. Two smelters, both American-owned, and 2 petroleum refineries, 1 American and 1 Italian-Peruvian, are the largest industrial plants in Peru.

Commerce.

The value of the trade of Peru in five years (including the Department of Loreto) has been as follows:—

—	1929	1930	1931	1932	1933
	Soles	Soles	Soles	Soles	Soles
Imports	189,852,460	140,261,247	102,478,580	76,088,927	107,436,810
Exports	335,081,460	235,985,304	197,417,166	178,529,111	256,969,844

The values of the principal imports and exports for 2 years are shown by the following table:—

Imports	1933	1932	Exports	1933	1932
	Soles	Soles		Soles	Soles
Arms & munitions	6,404,514	1,127,249	Sugar	33,878,831	25,975,250
Cotton goods	12,155,059	8,718,959	Cotton	60,763,950	34.025,758
Wool goods	2,530,790	2,386,612	Copper	24,393,472	14,429,489
Jute, flax, hemp	5,140,765	2,869,200	Petroleum	94,864,863	77,187,558
Food and drink	19,203,409	16,325,758	Wool	10,4 9,754	5,062,576
Chemicals	6,867,945	5,165,527	Hides	2,796,912	1,292,080
Timber products	4,005,620	2,944,106			
Machinery and vehicles	16,827,661	8,851,735			
Metals	8,506,544	5,716,043			

The distribution of the trade was mainly as follows :—

From	Imports		To	Exports	
	1933	1932		1933	1932
	Soles	Soles		Soles	Soles
United States .	29,079,757	21,917,557	United States .	40,320,278	30,943,680
United Kingdom	18,662 779	13,196,195	United Kingdom	93,1 8.493	64,877,989
Germany . .	11,101.872	8,149,795	Chile . . .	16,070.167	1.,013.573
Canada . .	3,549,051	3,014,196	Argentina . .	6.876,560	7,732,421
Italy . . .	3,859,227	,160,104	Canada . .	17,700 247	13,013,573
Argentina . .	6,238,078	4,058,217	Germany . .	18.761,508	12,828,171
France . .	4,570,726	3,001,167	Holland . .	20,548,124	13,036,437

In 1933 the principal articles imported by the United Kingdom from Peru were (according to Board of Trade Returns): Sugar (unrefined), 1,219,063*l.*; cotton, 2,296,473*l.*; petroleum, 563,356*l.*; and the principal exports to Peru were : Cotton piece goods, 167,800*l.*; aeroplanes, 113,582*l.*; and iron and steel manufactures, 104,643*l.*

Total trade between Peru and United Kingdom in thousands of pounds for 5 years (Board of Trade returns) :—

—	1930	1931	1932	1933	1934
Imports from Peru to U.K. . .	4,494	3,510	4,405	4,706	4,897
Exports to Peru from U.K. . .	1,442	664	728	897	1,101
Re-Exports to Peru from U.K. . .	56	41	36	35	29

Shipping and Navigation.

In 1933, 9,692 vessels of 14,010,437 tons entered, and 9,665 of 13,961,292 tons cleared, the ports of the Republic. Since December, 1928, the coasting trade has been largely reserved for Peruvian-owned vessels with Peruvian crews ; they number (1934) 35 of 49,476 registered gross tons.

Internal Communications.

There are 11,200 miles of road suitable for motor traffic, including 53 miles of concrete, and 1,116 miles of macadam. There are now two paved concrete highways between Lima and the port of Callao, and others between Lima and Chosica, Chorrillos and Ancon. The Central Highway over the Andes from Lima to Oreja is due to be completed in 1935.

In 1931 there were 7,979 motor cars, 4,242 motor lorries, 365 omnibuses and 241 motor cycles in Peru, a total of 12,827 vehicles of which 7,764 were in Lima and Callao.

In 1932 the total working length of the Peruvian railways was 2,803 miles, including 2,163 miles privately owned and 640 miles retained by the State. These are standard gauge (4 ft. 8½ in.), with the exception of five small lines. Passengers carried in 1931, 5,399,065 ; goods, 2,341,974 tons ; gross revenue, 27,089,049 soles.

By an agreement between the Peruvian Government and the Marconi Company, the latter undertook the administration of the posts, telegraphs, and wireless services for a period of 21 years from May 1, 1921. In 1931, the Company through 1,104 offices handled 32,421,142 pieces of inland correspondence and 11,212,413 pieces of foreign mail. There were 383 telegraph and telephone stations in 1931, and about 11,813 miles of telegraph lines ; number of telegraphic and wireless messages 3,601,306.

The telephone system includes about 11,000 instruments. Three submarine telegraph cables connect Peru and Chile, and one connects Peru and the Republics to the north. There are 8 short-wave and 2 long-wave broadcasting stations in Peru. In 1928 an air mail and passenger service between Lima and different points in the Republic was introduced; bi-weekly mail and passenger service between Lima, New York and Buenos Aires has been established.

Money and Credit.

Peru's currency unit is the Peruvian gold *sol* (by law of April 18, 1931), equal to one-tenth of the old Peruvian *libra* or pound; the gold *sol* will not be minted but will contain, theoretically, 42·1264 centigrams of fine gold. Debts contracted in the old Peruvian *libra*, or pound, are payable in *soles* at the rate of 10 soles to the pound. The *sol*, formerly worth 40 cents, U.S. currency, was thus stabilized at 28 cents. Peru abandoned the gold standard on May 18, 1932, but refrained from attempting to control foreign exchange; in 1934 the exchange value of the sol on London ranged between 23.30 and 20.0 soles to the *l.* Eventually gold 10-soles and 50-soles pieces will be minted. Silver is legal tender up to 10 per cent. of the amount. Silver coins are the sol, and half-sol, 5/10ths fine. Copper coins are 2 and 1 cent; and nickel coins 20, 10, and 5 cents. Peru has a paper currency issued by the Banco Central of Lp. 10, Lp. 5, Lp. 1 and 5 soles denomination which still circulate; the new notes are in denominations of 100 soles, 50, 10, and 5. Stock of money on September 30, 1934, included gold coin, 39,670,089 soles (held chiefly by the Banco Central); subsidiary coins (silver and nickel), 21,392,676 soles; notes, 72,404,695 soles.

The Government bank of issue, known as the Banco Central de Reserva del Perú, was established March 9, 1922, and in September, 1931, was re-organized, on the advice of the Kemmerer Financial Mission, as the Central Reserve Bank with a thirty year charter and authorised capital of 30,000,000 soles (reduced to 10,000,000 soles in May, 1932, and to 4,757,700 soles in December, 1933). Normally it is bound to hold not less than 50 per cent. of cover in gold, first-class bankers' acceptances and silver for deposits and notes in circulation. Note circulation, including residue of war-time issue of 'cheques circulaire,' on September 17, 1934, was 72,404,695 soles; deposits, 27,018,049 soles; reserves, 5,244,153 soles.

Three mortgage banks had on June 30, 1934, a combined capital of 13,485,423 soles, loans of 53,489,389 soles and bonds of 42,571,000 soles. Banks, domestic and foreign, are supervised by the Superintendent of Banks. On June 30, 1934, the paid-up capital and reserves of all banks amounted to 39,812,934 soles, and sight deposits to 95,819,987 soles; time and savings deposits amounted to 59,661,625 soles.

Weights and Measures.

The metric system of weights and measures was established by law in 1869, and is in general use. It came into force in Lima and Callao on September 1, 1916. Spanish measures are still in use.

Diplomatic Representatives.

1. Of Peru in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Senor Alfredo Benavides.

First Secretary.—Carlos Holguín de Lavalle.

Third Secretary.—Manuel D. Sotil.
Consul-General in London.—Carlos A. Mackehenie.

There are Consular representatives at Belfast, Cardiff, Edinburgh, Glasgow, Liverpool, Manchester, Southampton, and other places.

2. Of Great Britain in Peru.

Envoy Extraordinary and Minister Plenipotentiary.—Victor Courtenay Walter Forbes. (Appointed October 9, 1933.)
Naval Attaché.—Capt. R. H. C. Hallifax, R.N.
Military Attaché.—Brevet Lt.-Col. R. H. Smith, O.B.E.
Commercial Secretary.—D. Wilson.

There are Consuls at Lima and Iquitos, and Vice-Consuls at Callao, Arequipa, Mollendo, Trujillo and Paita.

Statistical and other Books of Reference concerning Peru.

POLAND.

(RZECZPOSPOLITA POLSKA.)

POLAND became a State by the union of a number of Slavonic tribes settled in the basins of the Vistula, the Warta and the Oder. The earliest chronicled history goes back to the latter half of the tenth century when Mieszko I. together with the whole nation was converted to Christianity in A.D. 966. Poland reached the height of her power in the period between the fourteenth and the sixteenth centuries under the rule of the Jagiellon dynasty. On the extinction of that line, a system of elective successive Kings was introduced and this, leading to an overgrowth of special rights granted to the nobility and gentry, led to the weakening of the central authority.

During the seventeenth century the position of Poland rapidly declined, and eventually, by the three partitions of 1772, 1793, and 1795, the Polish Commonwealth, as it was then called, was divided between Prussia, Russia and Austria.

In 1807, Napoleon formed a part of the Old Commonwealth into a semi-independent State under the title of the Duchy of Warsaw and endowed it with a very liberal constitution, but in 1815, at the Congress of Vienna, this was undone, and Poland was re-partitioned between Prussia, Austria and Russia, except the small district of Cracow, which was constituted an independent republic and remained such until 1835, when it was annexed by Austria, despite a guarantee of neutrality by Prussia, Austria and Russia.

During the war Russian-Poland was invaded by the Germans and Austrians, and by the end of 1915 the whole country was occupied by the Austro-German forces.

On November 5, 1916, the German and Austrian Emperors, in a joint manifesto, proclaimed the independence of Poland, but neither the boundaries nor the constitution of the State were defined. Shortly afterwards a Provisional Council of State, consisting of 25 members, all Poles, was summoned in order to draft the constitution of the new State, but this body did not exist for long In September, 1917, a new Supreme Authority, the Regency Council, consisting of three members, was appointed, and under their auspices a Ministry was formed and a new Council of State summoned. It was composed partly of elected and partly of appointed members, 110 in all. In October, 1918, this Council of State was dissolved by the Regency Council and the convocation proclaimed a Constituent Assembly to determine the constitution of the Polish State and take over the supreme authority.

On November 9, 1918, the Independence of Poland was solemnly proclaimed. On November 14, Marshal Pilsudski returned to Poland, assumed

Supreme Power and convoked the Constituent Assembly (*Sejm Ustawodawczy*), which confirmed him in his office. On June 28, 1919, the Treaty of Versailles recognised the Independence of Poland. The same Treaty determined the western frontier of Poland from the sea to Upper Silesia. The fixing of the Polish-German frontier took place after the plebiscite in Upper Silesia and the territory east of the Vistula, according to the resolution of the Council of Ambassadors of August 12, 1920, and October 20, 1921. A resolution of the Council of Ambassadors has also fixed the Polish-Czechoslovakian frontier. Poland's eastern frontiers were determined by the Treaty of Riga, of March 18, 1921; the Allied Powers have acknowledged those frontiers, as also the frontiers with Lithuania fixed by the resolution of the Council of Ambassadors of March 15, 1923.

Presidents since the establishment of the Republic were :—

Marshal Joseph Pilsudski, Nov. 14, 1918—Dec. 11, 1922.
Gabriel Narutowicz, Dec. 11—Dec. 16, 1922.[1]
Stanislas Wojciechowski, Dec. 20, 1922—May 15, 1926.

[1] Assassinated.

President.—Ignace *Moscicki*, born on December 1, 1867, in Mierzanów, near Plock, elected President of the Polish Republic on June 1, 1926. Re-elected on May 8, 1933.

Constitution and Government.

The Constitution of the Polish Republic adopted by the Sejm (Parliament) on March 17, 1921, contains the following fundamental principles: The franchise is universal for both sexes, the voting age being 21 for the Sejm and 30 for the Senate. There are two chambers, a Diet (Sejm) and a Senate, both elected by general suffrage on the system of proportional representation. The President (*Prezydent Rzeczpospolitej*) convenes, opens, prorogues and closes the Sejm. By an amendment to the Constitution introduced in August, 1926, the President is empowered to dissolve the Sejm on the advice of the Cabinet, and to issue decrees with the force of law between the dissolution of one Parliament and the meeting of the next, the elections for which must be held within ninety days. It is the President's duty to convene the Sejm for an ordinary session each year before the month of November. By the revised Constitution of August, 1926, the Budget can only be discussed in the Sejm (Diet and Senate) from September to January, and if it is not passed by the latter date, the proposals of the Government come automatically into force. The President is the Supreme Commander of the army, except in time of war. He is elected for a term of seven years by the Diet and Senate united in a National Assembly. He can make treaties with foreign Powers. In the case of the President's death, his duties are to be assumed by the Speaker of the House. Any Polish citizen may be elected President. The President is not responsible either politically or personally, and therefore all his acts must be countersigned by a Minister. Freedom of conscience is granted to all citizens; and all citizens are equal before the law. Every citizen also has the right of preserving his nationality and developing his mother tongue.

The law of July 28, 1922, divides Poland into 64 electoral districts for the Sejm and 17 for the Senate, returning 444 deputies and 111 Senators. At the elections held on November 16 and 23, 1930, the following parties were returned:—Lower House: Government *bloc*, 247; National Club, 62; Peasants, 48; Socialists, 24; Christian Democrats, 15; National Workmen's Party, 10; Ukrainians, 18; Jews, 6; Germans, 5; Communists, 5; Lesser Groups, 5.

Senate: Government *bloc*, 74; National Club, 12; Peasants, 6; Socialists, 5; National Workmen's Party, 6; Ukrainians, 4; Germans, 3; Unclassified, 1.

The Executive, called the Council of Ministers (*Rada Ministrów*), was appointed on March 28, 1935, as follows:—

President of the Council of Ministers (Premier).—Colonel Valerian *Slawek.*
Minister of Military Affairs.—Joseph *Pilsudski*
Minister of Foreign Affairs.—Joseph *Beck.*
Minister of Finance.—Ladislas *Zawadzki.*
Minister of Justice.—Czeslaw *Michalowski.*
Minister of the Interior.—Marjan *Zyndram-Koscialkowski.*
Minister of Industry and Commerce.—Henri *Floyar-Rajchman.*
Minister of Agriculture.—Jules *Poniatowski.*
Minister of Communications.—Ing Michal *Budkiewicz.*
Minister of Social Welfare.—Gorges *Paciorkowski.*
Minister of Religion and Education.—Waclaw *Jedrzejewicz.*
Minister of Posts and Telegraphs.—Emil *Kalinski.*

Local Government.

The Polish Constitution provides for the granting of a wide measure of autonomy to County Councils. The County of Silesia received a large measure of autonomy by the constitutional law of July 15, 1920. The Silesian Sejm (Diet), elected in November, 1930, consists of 48 deputies, 41 Polish and 7 German. The autonomous rights of the Counties of Lwów, Tarnopol and Stanisławów, were formulated in the law of September 26, 1922. A uniform system for all the remaining Counties of Poland is in course of elaboration.

By a law of July 31, 1924, the language rights of the Ruthenian, White Ruthenian and Lithuanian minorities were guaranteed.

Area and Population.

The territory of Poland is made up of territories which after the three partitions of Poland in 1772, 1793 and 1795 belonged to Russia (262,166 sq. kilometres, or 101,196 sq. miles); to Prussia (17,808 sq. kilometres, or 6,973 sq. miles); and to Austria (80,089 sq. kilometres or 30,914 sq. miles).

The Republic is divided into the City of Warsaw and 16 counties (*województwo*), subdivided into 264 districts (*powiaty*), and self-governing cities (*miasta wydzielone*). It comprises an area of 149,274 sq. miles, and an estimated total population of 33,024,000 (January 1, 1934).

The second census was taken in Poland on December 9, 1931, and the following table shows the area and population of the counties:—

County	Area in sq. miles	Population (Census 1931)	County	Area in sq. miles	Population (Census 1931)
City of Warsaw	47	1,178,914	Poznan	10,243	2,114,251
Warsaw	11,316	2,530,675	Pomorze	6,327	1,086,259
Lodz	7,309	2,633,050	Silesia	1,629	1,298,352
Kielce	9,826	2,936,976	Cracow	6,676	2,296,842
Lublin	11,972	2,467,266	Lwow	10,911	3,127,811
Bialystok	12,457	1,643,485	Stanislawow	6,448	1,476,538
Wilno	11,140	1,275,269	Tarnopol	6,344	1,603,313
Nowogródek	8,819	1,056,780			
Polesie	14,080	1,131,455			
Wolyn	13,730	2.084,791	Total	149.274	31,948.027[1]

[1] With military in barracks.

Population of principal towns (Census, December 9, 1931) :—

Warsaw	1,178,914	Czestochowa	117,538	Kielce	58,397
Lodz	605,467	Bydgoszcz	117,528	Wloclawek	56,277
Lwow	316,177	Lublin	112,539	Kalisz	55,125
Poznan	246,698	Sosnowiec	109,454	Torun	54,280
Cracow	221,260	Bialystok	91,335	Przemysl	51,379
Wilno	196,383	Krolewska Huta	80,734	Piotrkow	51,294
Katowice	127,044	Radom	78,073	Grudziadz	50,405
		Stanislawow	60,256	Gdynia	30,210

The urban population at the census of December 9, 1931, represented 27·2 per cent. of the total population. Of the total population, 22,052,000 spoke Polish (69 per cent.) and 9,890,000 other languages as their mother tongue (31 per cent.).

Births, deaths and marriages for three years :—

Year	Marriages	Births (excluding still-born)	Deaths	Excess of Births
1931	273,332	965,795	494,893	470,902
1932	270,277	932,116	487,125	444,991
1933	273,874	868,675	466,210	402,465

Total emigration, 1934, 42,533 ; 1933, 35,525.

Religion.

The great majority of the population profess the Roman Catholic faith, but there is no established church in Poland and all denominations enjoy equal rights, though Article 114 of the Constitution declares Roman Catholicism to be the dominant religion.

According to estimates on January 1, 1932, there were in Poland 23,688,123 (74·9 per cent.) Catholics ; 3,954,529 (12·5 per cent.) Russian Orthodox ; 3,028,837 (9·6 per cent.) Jews ; 851,973 (2·7 per cent.) Protestants ; and other religions, 95,056 (0·3 per cent.).

According to the Concordat between Poland and the Vatican, concluded on February 10, 1925, three distinct rites of the Catholic Church are to be distinguished in Poland : (1) the Latin, with 2 Cardinals, 3 Archbishops, 16 Bishops and 19 suffragan bishops, 8,373 priests and 5,965 churches ; (2) the Greek-Catholic, with 1 Archbishop, 2 Bishops, 3 Suffragan Bishops, 2,144 priests and 3,275 churches ; and (3) the Armenian with 1 Archbishop and 12 churches. Poland is divided into 25 Catholic Dioceses.

The Autocephalous Orthodox Church in Poland, headed by a Metropolitan, forms an independent organisation in the frame of the General Orthodox Church, and is divided into 5 dioceses, with about 2,400 churches, 8 Bishops, and about 1,800 priests.

The Eastern Orthodox Church of Ancient rite without any ecclesiastical hierarchy, has 52 posts and 52 ministers.

The Evangelical Church in Poland is represented by its 5 principal branches, of which the Protestant Church possesses 147 posts and 154 ministers ; the Reformed Church in Warsaw, 13 posts and 7 ministers ; the Reformed Church in Wilno, 15 posts and 5 ministers ; the United Evangelic Church, 429 posts and 227 ministers, and the Evangelistic Church of South-Poland 25 posts and 60 ministers.

The Jewish Community comprises 818 congregations with 1,600 rabbis and ministers.

The Karaite Jewish Community, headed by the *Chacham*, has 4 posts and 9 ministers.

The Moslem Community headed by a Mufti, possesses 19 mosques and 41 ministers.

Education.

All education is free, while elementary education is compulsory. The figures for the whole of the Republic for the year 1933–34, are as follows:—27,270 Elementary schools, with 81,495 teachers and 4,628,421 pupils; 783 Secondary schools, with 13,218 teachers and 160,812 pupils; 198 Teachers' Colleges with 17,933 pupils, and 743 professional schools with 1,184 departments and 65,661 pupils.

The following table gives particulars as to the various Polish universities and high schools during the year 1933–34:—

University & year of foundation.	Number of Teachers	Number of Students (1933–34)		
		Men	Women	Total
University of Warsaw (1817)	225	5,791	3,771	9,562
University of Cracow (1364)	119	5,095	2,060	7,155
University of Lwow (1661)	213	4,581	2.122	6,703
University of Posnan (1903)	261	3,817	1,519	5,336
University of Wilno (1578)	184	2,633	1,247	3,880
University of Lublin (1919)	45	623	279	902
Polytechnic of Warsaw (1824)	170	7,088	255	7,343
Polytechnic of Lwow (1844)	82	2,678	129	2,777
Agricultural Academy in Warsaw (1909)	74	994	357	1,351

Total	1,967	35,628	14,099	49,727

Justice and Crime.

During the last five years the Republic of Poland completed an almost entire unification of the law concerning the organisation of justice and judicial procedure, and has also published and promulgated uniform legal regulations on many essential domains of civil and criminal law.

The organisation of the Courts is based on the Law of 1928 as amended on November 15, 1932. The organisation of the professional body of

solicitors and barristers was regulated by the Law of October 7, 1932, and that of the Notaries public by the Law of October 27, 1933. The regulations of the judicial procedure, uniform for the whole territory, were drawn up in the Code of Criminal Procedure of 1928, amended and promulgated on September 30, 1932, and in the Code of Civil Procedure of 1930, amended and promulgated on December 1, 1932. The costs of procedure are ruled by the Regulations on Law-Charges of October 24, 1934.

The criminal law is drawn up in the Penal Code of 1930 and in the Law on Torts.

In Commercial Law, after the unification of the Law of bills of exchange and cheques in 1924, the remaining sections of the Commercial Code were made uniform for the whole territory on June 27, 1934, whereas the Law on bankruptcy and that on the agreement-procedure were made uniform on October 24, 1934.

Finally, in Civil Law uniformity was attained in its essential branch, that of obligations, in the Code of Obligations dated October 27, 1933; the work of unification of the remaining branches of Civil Law is being completed.

Justice is administered by the following courts: 548 District-Courts (*Sady Grodzkie*) having jurisdiction in less important cases; 45 Circuit Courts (*Sady Okregowe*), having jurisdiction in more important matters and acting as Courts of Appeal from the judgments of District-Courts; 7 Courts of Appeal (*Sady Apelacyjne*)—at Katowice, Kracow, Lublin, Lwów, Poznan, Warszawa, and Wilno—which try cases on appeals from Circuit Courts; the Supreme-Court (*Sad Najwyzszy*) at Warszawa, as a Court of Cassation—it is composed of two chambers, one civil and one criminal.

For matters concerning relations arising out of labour agreements, there are established Labour-Courts, acting as first instance; torts, however, are punished by the administrative authorities, complaints against decisions of these authorities must be addressed to the Courts.

The prosecution of crimes is carried on by public prosecutors (*Prokuratorzy*) acting in the name of the State The gathering and preparation of evidence in more important criminal cases constitutes the duty of special magistrates-judges of inquiry.

The total number of judges and public prosecutors is 3,598; this number comprises 74 judges and 40 public prosecutors in the Supreme Court, 224 judges and public prosecutors in the Courts of Appeal, 1,045 judges, 164 justices of inquiry and 345 public prosecutors in the Circuit Courts, and 1,642 judges in the District-Courts.

Social Insurance.

A new comprehensive Act on Social Insurance of March 28, 1933, is in operation as from January 1, 1934. This Act has unified former legislation.

The types of Social Insurance in Poland are as follows:—

(1) Health, including maternity, Insurance for all industrial and office workers; (2) Invalidity, old age, widows and orphans insurance for manual workers in industry and trade; (3) Similar special insurance for miners; (4) Invalidity, old age, widows, orphans, and unemployment insurance for office workers; (5) Insurance against accidents whilst at work, compulsory for office, industrial and agricultural workers; (6) Insurance against unemployment of industrial workers.

The dues paid to social insurance institutions, under the supervision of the Ministry of Social Welfare amounted in 1933 to about 350 million zlotys, the total revenue to about 419·2 million zlotys, and the costs of benefits and allowances to about 269·9 million zlotys.

The excess of assets over liabilities amounted to 968·3 million zlotys at the end of 1933.

Finance.

Budget estimates for five years, in millions of zlotys.

—	1931-32 [1]	1932-33 [1]	1933-34 [1]	1934-35 [2]	1935-36 [2]
Revenue . .	2,261·4	2,001·7	1,869·0	2,126·3	1,983·7
Expenditure .	2,467·7	2,244·1	2,206·4	2,184·6	2,132·8

[1] Actual. [2] Estimates.

The principal items of expenditure for 1935–36 are (in thousand zlotys): Ministry of War, 761,700; education, 318,231; debt service, 202,000.

The national indebtedness of Poland consists of internal and external debts. On January 1, 1934, the total internal debt amounted to 759,301,000 zlotys, and the external debt to 3,544,372,000 zlotys. The external debt comprised (in zlotys): United States, 1,830,765,000; France, 808,164,000; England, 179,489,000. At the same date obligations due to the execution of the Protocol of Insbruck amounted to 324,678,000 zlotys.

Defence.

Every able-bodied Polish subject is, according to the law of May 23, 1924, liable to serve in the army between the ages of 21 and 50. The duration of service is twenty-nine years. Service in the active army is for two years. The men then pass to the reserve, in which they remain for 18 years. At the age of forty they join the territorial army, in which they remain for 10 years.

In times of peace the Chief Command of the armed forces is exercised by the President of the Republic through the Minister of Military Affairs. The permanent collaborator of the latter is, in conformity with the Law of August 6, 1926, the General Inspector of the armed forces, who in case of war takes over the Chief Command. General questions relating to preparations for the defence of the country are examined by the Committee of National Defence, which, in virtue of the Law of October 25, 1926, is presided over by the President of the Republic. Members of this Committee are, the Prime Minister, the Minister of Military Affairs, the Minister of the Interior, the Minister of Foreign Affairs, the Minister of Finances and the General Inspector of the armed force.

The country is divided into 10 General Military Districts: Warsaw, Lublin, Torun, Lodz, Cracow, Lwow, Poznań, Grodno, Brześć, and Przemysl. The strength of the army in 1934 was 17,905 officers and 248,110 other ranks, organised in 30 infantry divisions, 1 cavalry division and 12 independent cavalry brigades.

The air personnel consists of 7,919 officers and men, and comprises 6 aviation regiments, 1 naval aviation group, 1 balloon battalion, 1 meteorological company, 1 air service group. There are, in addition, police and customs forces amounting to 52.640 men. The mobilisable strength of the army is approximately 1,200,000 men. The defence estimates 1934–35 amounted to 768,000,000 zlotys.

There are the following fortresses in Poland: in the west, Thorn and Posen; in the south, Cracow and Przemysl and armed camps; in the east, Brest Litowsk, Grodno, Osowiec; in the interior, Warsaw, Modlin, Deblin.

Poland has a river flotilla of 6 small gunboats, and a fleet of two gunboats, *Pilsudski* and *Haller*, 500 tons, have been built in Finland. There are also 1 surveying vessel, 1 transport, 4 mine-sweepers, and 5 ex-German torpedo-boats. Two destroyers and 3 submarines were recently completed in French yards. 5 minelayers are building. It is also proposed to construct 2 new destroyers and 3 submarines.

Production and Industry.

Agriculture.—Poland is essentially an agricultural country. The following table shows the area and yield of the principal crops for two years :—

Crops.	Area (acres)		Yield (metric tons)	
	1931–32	1932–33	1931–32	1932–33
Wheat	4,265,482	4,187,001	1,346,428	2,174,086
Rye	13,951,060	14,270,781	6,110,461	7,073,289
Barley	2,981,874	2,882,.82	1,400,837	1,435,877
Oats	5,486,842	5,447,151	2,390.831	2,682,947
Potatoes	6,709,172	6,770.004	29,974,529	28,330,059
Sugar Beet	286,792	244,738	2,378,571	1,852,305

Other important crops are flax, hemp, hops and chicory.

On July 16, 1920, a law was passed by the Sejm limiting the size of the larger estates and of holdings situated in the neighbourhood of large towns. The maximum has been fixed at 60 hectares (about 150 acres) for estates situated in industrial districts, at 300 hectares (about 1,000 acres) for Posen, Podolia, Volhynia, &c., and at 180 hectares (about 450 acres) for the other parts of the Polish Republic. Since the beginning of parcellation, *i.e.* during the years 1919–33, 2,187,900 hectares (5,406,301 acres) were parcelled out and 584,700 new farm-holdings created.

The forest area of Poland (1931) is 8,322,433 hectares (20,563,853 acres), of which 3,033,174 hectares (7,494,973 acres) belong to the State, and 5,289,259 hectares (13,068,148 acres) to private owners.

On June 30, 1934, Poland possessed 3,760.000 horses, 9,237,000 cattle, 2,549,000 sheep, 7,082,000 pigs, and 320,000 goats.

Industry.—The principal industrial areas are: Silesia and Kielce (coal-mines and forges); Lodz, Binlystock and Bielsko (textiles); Warsaw, Lodz, Bydgoszcz and Posnan (metallurgical industry); the Carpathians (naphtha and oil-refining). In the textile industry on December 1, 1933, there were 1,816,631 spindles and 46,523 looms in the manufacture of cotton, and 822,518 spindles and 17,282 looms in the manufacture of wool. There were 1,377 sawing mills, employing 24,701 workpeople. In 1933, there were 35 refineries employing 3,395 workmen, and producing 521,000 tons of refined products, of which kerosene amounted to 174,000 tons, and lubricating oils to 91,000 tons. There were in 1932-33, 64 sugar refineries in Poland, producing 417,800 tons of sugar.

The output of the iron and steel industry in 1934 was as follows in metric tons (1933 figures in parentheses):—pig iron, 382,199 (305,625); raw steel, 844,418 (817,049); rolled steel, 605,000 (564,432).

Mining.—The following table shows the output of the more important minerals for three years (in metric tons):—

Product	1932	1933	1934
Bituminous coal	28,835,000	27,356,000	29,233,000
Lignite	33,400	33,000	26,000
Crude petroleum	557,000	551,000	530,000
Natural gas	437,000	462,000	469,000
Salt	491,000	450,000	506,000
Potassium salts	299,000	299,000	300,000
Iron ore	77,000	161,000	247,000
Zinc	85,000	83,000	72,000

Commerce.

Trade for five years (in 1,000 zlotvs):—

	1930	1931	1932	1933	1934
Imports	2,245,973	1,468,242	861,083	826,994	798,760
Exports	2,433,244	1,878,597	1,083,862	959,643	975,342

The principal articles of trade in 1934 were as follows:—

Imports	Metric tons	1,000 zlotys	Exports	Metric tons	1,000 zlotys
Rice	44,215	6,780	Wheat	76,134	14,483
Oil seeds and copra	100,957	23,891	Rye	454,476	44,337
Fruits	55,218	28,004	Barley	265,192	35,888
Tea, coffee and cocoa	15,111	21,716	Flour	115,449	10,974
Herrings	39,810	13,564	Peas and beans	22,152	7,523
Ores	355,840	15,197	Sugar	100,781	12,701
Oils and fats	27,005	15,528	Bacon	23,379	46,734
Tobacco	8,640	22,097	Butter	4,436	8,917
Chemicals	140,180	51,843	Eggs	21,230	23,453
Hides and leather	26,091	42,774	Hops	1,926	7,994
Furs	2,702	24,998	Seeds	24,361	24,071
Rubber	6,218	14,465	Pigs-heads	154,620	17,536
Cotton	67,608	112,821	Other animal heads	1,674,112	10,864
Jute	10,798	4,413	Timber	1,985,261	179,624
Wool	18,919	82,288	Coal and coke	10,242,596	169,114
Rags	19,848	11,170	Paraffin	18,595	10,906
Textile yarns	1,939	22,869	Benzol and naphtha	98,615	15,642
Piece goods	2,139	19,770	Chemicals	162,192	26,502
Metals and metal goods	361,338	83,800	Zinc and zinc sheets	71,533	29,050
Machinery, etc.	10,019	56,226	Other metals and metal goods	271,068	86,454
Vehicles	2,081	12,100	Textile yarns	2,696	15,888
			Piece goods	7,113	28,936

The trade was distributed in the main, in the 2 years shown, as follows (in 1,000 zlotys):—

Country	Imports from		Exports to	
	1933	1934	1933	1934
Germany	145,694	108,471	167,791	161,596
United States	109,863	121,085	15,901	22,842
United Kingdom	83,054	86,208	184,685	191,922
Irish Free State	263	274	8,824	15,030
Austria	35,170	36,683	55,643	57,216
Czechoslovakia	35,628	32,495	48,100	50,431
France	56,477	46,084	53,112	40,709
Italy	38,255	33,689	24,908	37,084
Belgium	29,313	25,348	47,160	58,284
Netherlands	28,698	29,425	54,379	41,496
Rumania	7,556	9,496	15,931	13,593
Sweden	16,937	19,841	47,814	45,087

Total trade between Poland (including Danzig) and the United Kingdom for five years (according to Board of Trade Returns) was :—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Poland into the United Kingdom .	7,948,583	8,612,175	6,184,424	6,551,059	7,437,269
Imports to Poland from the United Kingdom .	3,564,177	2,003,774	2,001,414	2,738,083	2,996,552
Re-exports to Poland .	616,528	573,577	668.193	1,107,951	1,261,508

Internal Communications.

In December, 1932, Poland had 29,411 miles of public highways and 18,743 miles of country roads and 8,919 miles of inland waterways, including 3,037 miles of navigable waterways and 115 miles of canals. On December 31, 1933, there were 12,685 miles of railways open for traffic in the Republic. Of this total, 11,206 miles were main line, and 1,479 miles narrow-gauge lines. Operating revenue (1933) was 881,248,000 zloty, and expenses 820,709,000 zloty. All the lines are property of the State.

Beside the State railway lines there are also in Poland private and communal light railway systems, the length of whose lines in 1933 was 909 miles ; the number of passengers carried on these lines amounted to 48·1 millions. The total length of tracks in the railway system of Poland was in 1933, 13,599 miles.

At the end of 1933 there were in Poland 4,021 post offices, including 1,272 postal agencies, 4,795 telegraph stations, and 4,618 telephone exchanges with 189,205 instruments. The length of telegraph lines was 16,022 miles, of telegraph wire 46,438 miles, of local telephone lines 17,615 miles, and of inter-urban telephone lines 19,356 miles.

In 1933 there were dispatched 676,694,000 letters, 10,218,000 parcels, 183,475,000 newspapers, and 25,686,000 money orders issued and paid. 3,144,000 telegrams were sent out, and 686,535,000 telephone calls recorded.

Air communication in Poland is maintained by the Polish 'Lot' Air Lines. The number of aeroplane-kilometres flown in Poland and abroad was in 1933, 1,572,000, whilst the number of passenger-kilometres was 4,301,000, and that of goods- and mail-kilometres was 426,000.

Shipping and Navigation.

In 1933, 4,355 vessels with a tonnage of 3,425,000 net registered tons and a cargo of 871,000 tons entered at the port of Gdynia, whilst the volume of goods exported through that port was 5,235,000 tons ; 4,278 vessels with a tonnage of 2,763,000 net registered tons and a cargo of 483,000 tons entered at the port of Danzig, whilst the volume of goods exported by vessels clearing from that port was 4,660,000 tons.

On December 31, 1934, the Polish mercantile marine numbered 55 vessels with a tonnage of 64,358 gross tons, and the Danzig mercantile marine, 52 vessels with a tonnage of 274,000 gross tons.

Currency and Banking.

The Polish national currency is the *zloty*, subdivided into 100 grosz. This currency was put into circulation on May 1, 1924, being then equivalent

to the gold franc. The monetary reform of October 13, 1927, changed the gold contents, defining 1 kg. fine gold = 5,924·44 zlotys. Silver coins of 10, 5 and 2 zloty; nickel coins of 1 zloty, 50, 20 and 10 grosz; and bronze coins of 5, 2 and 1 grosz.

The Bank of Poland, created by Act of Parliament, opened its doors on April 28, 1924. The Bank is a joint stock company with a capital of 150,000,000 zlotys. The Bank enjoys for a period, to Dec. 31, 1944, the sole privilege of note issue. Bank notes in denominations of 20, 50, 100 and 500 zlotys are in circulation. The notes issued by the Bank, and the deposits, minus 100,000,000 zlotys, must be covered by 30 per cent. In case of a lower cover, the Bank has to pay a special tax, which rises in proportion as the cover falls. At present the Bank is obliged to redeem banknotes in gold coin or in foreign currencies convertible into gold, where the sum presented for exchange exceeds 20,000 zlotys.

The amount of money in circulation (December 31, 1934) was 1,365,242,365 zlotys, consisting of 981,088,710 zlotys in Bank of Poland notes, 384,153,655 zlotys in metallic currency.

On November 30, 1934, there were in Poland 2 State banks—the National Economic Bank (with a capital of 150,000,000 zlotys) and the State Agrarian Bank (with a capital of 130,000,000 zlotys)—and 51 private banks (with a capital of 280,457,000 zlotys). Deposits in these banks amounted on November 30, 1934, to 590,930,000 zlotys.

The Post Office Savings Bank on December 1, 1934, had 1,445,311 depositors with 596,558,815 zlotys to their credit. On the same date, 363 other Savings Banks had deposits totalling 574,712,000 zlotys.

The weights and measures are those of the metric system.

Diplomatic and Consular Representatives.

1. Of Poland in Great Britain.

Ambassador.—Edouard Raczynski. (Appointed November 1, 1934.)
Counsellor.—Leon Orłowski.
First Secretary.—Roman Michalowski.
Secretary Attaché.—Paul Starzynski.
Commercial Counsellor.—Tadeusz Geppert.
Financial Counsellor.—Wieslaw Zbijewski.
Consul-General.—Charles Poznanski.
Consul Attaché.—Adam Stahl.

2. Of Great Britain in Poland.

Ambassador.—Sir Howard William Kennard, K.C.M.G., C.V.O. (Appointed January 7, 1935.)
First Secretary.—A. F. Aveling, C.B.E.
Second Secretary.—D. W. Lascelles.
Naval Attaché.—Capt. G. C. Muirhead-Gould, D.S.O., R.N.
Military Attaché.—Lt.-Col. G. F. Connal Rowan.
Commercial Secretary.—C. B. Jerram.
Consul at Warsaw.—F. Savery, O.B.E.

There are consular representatives at Lemberg, Katowice, Lodz, Posen and Gdynia.

PORTUGAL.

(REPÚBLICA PORTUGUESA.)

PORTUGAL has been an independent State since the twelfth century; until 1910 it was a monarchy. The last King was Manoel II. of the house of Braganza-Coburg, born November 15, 1889, younger son of King Carlos I. and Queen Mary Amélie, daughter of Philippe Count of Paris; he died July 2, 1932. On October 5, 1910, the republic was proclaimed, after a short revolution, and a provisional government established with Dr. Theophilo Braga as the Provisional President (October 5, 1910, to August 24, 1911). Thereafter there were duly elected Presidents, as follows:—

Dr. Manoel de Arriaga, 24 Aug., 1911—29 May, 1915.[1]
Dr. Joaquim Theophilo Braga, 29 May, 1915—5 Oct., 1915.
Dr. Bernardino Luiz Machado Guimarães, 5 Oct., 1915—11 Dec., 1917.[2]
Dr. Sidonio Bernardino Cardoso da Silva Paes, 11 Dec., 1917—14 Dec., 1919.[3]
Senhor João de Canto e Castro Silva Antunes, 16 Dec., 1919—5 Oct., 1919.
Dr. Antonio José de Almeida, 5 Oct., 1919—5 Oct., 1923.
Senhor Manoel Teixeira Gomes, 5 Oct. 1923—11 Dec., 1925.[1]
Dr. Bernardino Luiz Machado Guimarães, 11 Dec., 1925—1 June, 1926.[1]

A Provisional Government was in office from June 1–Nov. 29, 1926.

[1] Resigned. [2] Deposed. [3] Assassinated

The Powers formally recognised the Republic on September 11, 1911.

On March 19, 1933, the *Estado Novo* constitution (providing for a Dictatorship on a corporative basis) was voted upon and adopted. This Constitution provides for a President, to be elected for 7 years by direct suffrage by the heads of families; and for a National Assembly (one chamber) of 90 Deputies elected for 4 years by direct suffrage. The first Assembly is composed of nominees of the National Union, which supports the Dictatorship of Dr. Salazar. A Privy Council of 10 members assists the President. Capital punishment is abolished. A Corporative Chamber functions alongside the National Assembly.

President of the Republic.—General Antonio Oscar de Fragoso *Carmona.* (Elected November 29, 1926, re-elected, March 25, 1928, and February 17, 1935.)

The Cabinet, which was formed on October 23, 1934, is as follows:—

Prime Minister and Minister of Finance.—Dr. António de Oliveira *Salazar.*
Minister of the Interior.—Lieutenant-Colonel Henrique Linhares de *Lima.*
Minister of Public Works and Communications.—Dr. Duarte *Pacheco.*
Minister of Marine and Minister of Foreign Affairs.—Commander Aníbal de Mesquita *Guimarães.*
Minister of Justice.—Dr. Manuel *Rodrigues* Junior.
Minister of War.—Colonel Abilio Augusto Valdês de Passose *Sousa.*
Minister of Commerce.—Ing. Sebastião Garcia *Ramires.*
Minister of Education.—Dr. Eusébio *Tamagnini* de Matos Encarnação.
Minister of Colonies.—Dr. Armindo Rodrigues *Monteiro.*
Minister of Agriculture.—Dr. Rafael da Silva Neves *Duque.*

Area and Population.

Area and population at the Census of December 1, 1930 (revised figures) and the census of 1920 are as follows (the Azores (3 districts) and Madeira (1 district), are regarded as an integral part of the Republic):—

Provinces and Districts	Area in sq. miles	Population		Per sq. mile 1930
		1920 (Census)	1930 (Census)	
Entre Minho-e-Douro:—				
Viana do Castelo	857	226,046	240,261	280·3
Braga	1,040	376,141	414,784	398·7
Pôrto	893	702,166	810,253	907·3
	2,790	1,304,353	1,465,298	525·1
Tras-os-Montes:—				
Vila Real	1,650	235,499	253,904	153·9
Bragança	2,513	170,302	185,164	73·6
	4,163	405,801	439,158	105·4
Beiras:—				
Aveiro	1,065	344,178	381,694	358·3
Viseu	1,937	404,864	431,473	222·7
Coimbra	1,508	353,121	387,808	257·1
Guarda	2,116	256,243	267,614	126·4
Castelo Branco	2,582	239,167	265,573	102·8
	9,208	1,597,573	1,734,162	188·3
Estremadura:—				
Leiria	1,317	279,124	314,540	238·8
Santarém	2,555	332,012	378,517	148·1
Lisbon	1,062	933,568	906,582	853·7
Setúbal	2,003	—	233,668	116·6
	6,937	1,544,704	1,833,307	264·2
Alemtejo:—				
Portalegre	2,405	147,398	166,343	69·1
Évora	2,856	153,239	180,852	63·3
Beja	3,958	200,615	240,465	60·7
	9,219	501,252	587,660	63·7
Algarve (Faro)	1,937	268,294	300,762	155·2
Total Continent	34,254	5,621,977	6,360,347	185·6
Islands:—				
Azores	922	232,012	253,935	275·4
Madeira (Funchal)	314	179,002	211,601	673·8
Total Islands	1,236	411,014	465,536	376·6
Grand total	35,490	6,032,991	6,825,883	192·3

In 1930 the population of the Continent consisted of 3,034,532 males and 3,325,815 females, or 91 females to every hundred males. Of the total population in 1930, 27,502 were foreigners. In 1933, the movement of the population was: births, 204,315 (104,940 males and 99,375 females); marriages, 45,833; deaths, 120,996 (61,646 males and 59,350 females); still-born, 8,943. Divorces in 1933, 831 (881 in 1932).

At a special census on Dec. 1, 1930, the population of Lisbon was 594,390

and that of Oporto 232,280. Other principal towns with their population in 1930 (census) were: Coimbra, 27,333; Evora, 22,061; Covilhã, 15,640; Castelo Branco, 9,820.

The number of emigrants in 1933 was 8,905, of whom 7,202 went to Brazil, 424 to North America, 196 to Argentina, and 1,083 to other countries.

Religion

There is freedom of worship in Portugal; the predominant faith is the Roman Catholic. Portugal, including the Azores and Madeira, is divided into three ecclesiastical provinces, with their sees severally at Lisbon, Braga and Evora. The Archbishop of Lisbon (Patriarch since 1716) has seven suffragans, of whom only two are on the European mainland; while the Archbishop of Braga (the oldest see in Portugal) has five, and the Archbishop of Evora two. The Azores, Madeira, and the Portuguese colonial possessions of West Africa, continental and insular, with five episcopal sees, constitute part of the ecclesiastical province of Lisbon. In East Africa there is also the province of Mozambique. In Asia there is a province of Goa with four suffragan sees (Macao included).

Education.

According to the census of 1920, 54·7 per cent. of the Portuguese nation are still unable to read or write. Primary education is compulsory, and is rigorously enforced by a decree of the Provisional Government of March 29, 1911. In 1931–32 there were 65 infant schools with 100 teachers and 4,134 pupils; 8,247 public elementary schools with 441,812 pupils and 9,697 teachers; 37 secondary schools with 17,371 pupils and 808 teachers, and 5 primary normal schools with 1,086 pupils and 50 teachers. For higher education there are 3 Universities: at Lisbon (founded in 1911), Coimbra (founded 1290), and Oporto (founded 1911). In 1931–32 the number of students at the universities was: Lisbon, 2,761; Coimbra, 1,797; and Oporto, 1,426. There is also the Technical University at Lisbon (founded in 1930). There are also special colleges for music and art (Lisbon and Oporto), commercial, industrial and agricultural schools, and a military school and a naval school at Lisbon.

In 1932 there were 675 newspapers and periodicals published in Portugal.

Justice and Crime.

The Republic is divided for judicial purposes into 157 comarcas; in every comarca there is a court of first instance. There are three courts of appeal (Tribunaes de Relação) at Lisbon, Coimbra, and Oporto, and a Supreme Court in Lisbon. There are also 7 municipal and 936 district courts.

Finance.

The estimated revenue and expenditure for five years, ended June 30, are shown as follows (in escudos):—

	1930–31	1931–32	1932–33	1933–34	1934–35
Revenue . .	2,104,242,000	1,947,960,289	2,135,097,000	2,213,987,000	2,177,670,000
Expenditure .	2,098,465,000	1,946,047,425	2,133,424,000	2,212,001,000	2,176,020,000

The items of revenue and expenditure for 1933–34 and 1934–35 were as follows:—

Revenue	1933-34	1934-35	Expenditure	1933-34	1934-35
	1,000 Escudos	1,000 Escudos		1,000 Escudos	1,000 Escudos
Ordinary:			Ordinary:

			Commerce, industry and agriculture .	49,357	51,887
			Total ordinary .	1,934,801	1,933,030
			Extraordinary (trade public works and communications)	277,200	242,990
Grand total . .	2,213,987	2,177,670	Grand total . .	2,212,001	2,176,020

On May 31, 1934, the external funded debt of Portugal was as follows:—External 3 per cent. converted debt of 1902, 27,337,586*l.*; non-interest bearing debt, 2,766,557*l.*; total external funded debt, 30,104,143*l.* Internal funded debt: Consolidated, 1,933,921,000 escudos (paper), redeemable, 736,886,540 escudos (paper), a total at par of 24,280,068*l.*; internal funded debt in gold, 4½ per cent. 1912, 572,860*l.*; 7 per cent. Timor, 88,700*l.*; 4 per cent. Municipal Loan 1886, 2,196,667*l.*, a total of 2,858,227*l.* Debt to the Bank of Portugal, 9,618,414*l.* Total public debt, less floating debt surplus of 4,187,354*l.*, 62,673,498*l.*

Defence.

Army.

Military service is compulsory for every citizen from 17 years of age to 45. The terms of service are 4 years in the Active Service, 16 years in the Active Reserve, 5 years in the Territorial Reserve and 3 years in the recruiting Reserve. The recruits are enlisted from March 1 to March 5.

Portugal and the adjacent islands are divided into 4 Military Regions: Porto, Coimbra, Tomar and Evora, and 3 Military Governments: Lisbon, Azores and Madeira, including 22 recruiting and reserve districts.

The total peace strength in June, 1934, was 4,136 officers and 26,918 other ranks. The overseas garrisons comprise 382 officers and 10,286 other ranks.

The Republican Guard consists of 8 Infantry Battalions and 1 Cavalry Regiment, with a total of 215 officers and 5,479 other ranks.

The Fiscal Guard consists of 3 Battalions in the Continent and 4 Companies in the Islands, and its strength at the end of December, 1931, was 5,165 officers and men.

The Portuguese Army is armed with rifles, Mauser-Vergueiro, 6·5 mm. and Lee-Enfield; Cavalry, Mannelicher, 6·5 mm. carbine; Artillery, 7·5 cm. Schneider-Canet gun, 9 cm. Krupps gun, 7 cm. Mountain Schneider-Canet gun, 11·4 cm. English howitzer, 15·2 cm. Vickers howitzer and 15 cm. Schneider-Canet du Bocage, 7·5 cm. anti-aircraft guns, ·303 Berthier machine guns, ·303 Vickers machine guns, ·303 Madsen machine guns, and medium tanks. The military flying service had in 1932, 129 machines.

The military estimates for 1934–5 amounted to 254,000,000 escudos.

Navy.

The Portuguese navy comprises:—1 cruiser (*Vasco da Gama*, 3,000 tons); 7 sloops (*República*, *Carvalho Araújo*, *Afonso de Albuquerque*, *Bartolomeu Dias*, *Pedro Nunes*, *Gonçalo Velho*, and *Gonçalves Zarco*, all built in England); 5 destroyers (*Vouga*, *Dão*, and *Lima*, 1,600 tons, *Tâmega* and *Guadiana*, 600 tons); 3 torpedo boats (*Sado*, *Ave* and *Mondego*, 250 tons); 8 gunboats (type *Beira*, 400 tons); 3 submarines (850 tons); 1 sailing training ship (*Sagres*, 3,500 tons); 1 hydrographic survey ship (*5 de Outubro*, 1,365 tons) and 10 auxiliary service ships. Under construction there are 1 sloop (*Infante Dom Henrique*) and 2 destroyers (*Tejo* and *Douro*, 1,600 tons). A naval flying service was established in September, 1917. On December 31, 1931, there were 21 machines. The naval personnel on December 31, 1934, included 689 officers and N.C.O's and 5,670 other ranks.

Production and Industry.

According to an estimate of the Ministry of Agriculture the cultivated area of Portugal (not including the islands) in 1931 was 15,917,654 acres (70 per cent.). Of the whole area of continental Portugal 37·4 per cent. is annually cultivated under cereals, pulse, pasture, etc.; 5·4 per cent. is under vineyards; 6·2 per cent. under fruit trees; 26 per cent. under forest; 25 per cent. is waste.

In 1933 the wheat crop was 437,400 metric tons; maize, 312,000 tons; oats, 73,000 tons; barley, 52,000 tons; broad beans and French beans are also cultivated. Other products in 1933 were rice (46,500 tons) and potatoes (620,000 tons). Wine (135,359,000 gallons in 1932) and olive oil (836,630 hectolitres or 18,405,860 gallons in 1933) are also produced. Wool production in 1931 was 2,793 metric tons.

The forests cover 26 per cent. of the total area of the country; pine extending to 2,795,020 acres; oak, 1,205,148 acres; cork, 1,382,373 acres; chestnut, 210,513 acres; other trees, 165,532 acres: total, 5,758,586 acres. Cork is an important product; production was 84,283 metric tons in 1930, and 74,288 tons in 1931. Most of the product is exported in the crude condition; in 1933 exports were 123,257 metric tons of unmanufactured cork and 18,612 tons of cork stoppers. The production of resin and turpentine is an important industry. The output in 1933 was 19,669 and 14,700 metric tons respectively.

Portugal possesses considerable mineral wealth, but for want of electric power, valuable mines remain unworked. The mineral production in 1933 included coal, 16,155 metric tons; cupriferous pyrites, 210,660 metric tons; lead, 69 metric tons; copper (precipitated), 637 metric tons; tin, 706 metric tons, and wolfram 303 metric tons.

The fishing industry is of importance. In 1932 there were 54,175 men and boys employed, with 14,273 boats of 55,598 tons. In 1932, the sardine catch was 111,916 metric tons, valued at 69,010,284 escudos. Exports of tinned sardines amounted to 29,274 tons in 1933, valued at 105,943,500 escudos. The centre of the sardine industry is at Setubal, about 10 miles south of Lisbon. It is the second principal industry in the country.

The principal manufacturing industry is the production of textiles, which employs some 48,000 operatives—25,000 in cottons, and the remainder in woollens, silks and linen goods.

A characteristic industry of Portugal is the manufacture of *azulejos* or porcelain tiles. This was inherited from the Moors, and tiles are used extensively for interior and exterior decoration of public and private buildings. At Sacavem, near Lisbon, a large factory makes tiles and china-ware. There are porcelain factories at Vista Alegre, Gaya and Coimbra. The output of cement in 1933 was 165,000 tons. In Peniche, an old fishing village on the north coast of Lisbon, there is a local pillow lace industry, and at Guimaraes famous embroidery is made.

Commerce

Imports for consumption and exports (exclusive of coin and bullion and re-exports) for six years :—

Year	Imports	Exports	Year	Imports	Exports
	Escudos	Escudos		Escudos	Escudos
1928	2,679,069,600	1,029,405,035	1931	1,673,582,900	811,729,700
1929	2,528,606,600	1,073,239,600	1932	1,707,849,900	791,780,400
1930	2,405,722,100	945,274,200	1933	1,905,347,600	802,453,400

The principal articles of import and export in 1932 and 1933 were :—

Article	Imports		Article	Exports	
	1932	1933		1932	1933
	1000 Escudos	1000 Escudos		1000 Escudos	1000 Escudos

Wine is the staple article of import from Portugal into the United Kingdom, the quantity amounting in 1933 to 3,943,160 gallons, valued at 1,234,128*l.* The other principal imports were canned fish, 181,769*l.*; cork, unmanufactured, 149,353*l.*, and manufactured, 208,193*l.* The chief exports of the United Kingdom to Portugal in 1933 were (Board of Trade Returns): Coal, 745,503*l.*; cotton piece goods, 173,841*l.*; iron, wrought and unwrought, 365,942*l*; machinery 391,199*l.*

Total trade between Portugal and the United Kingdom in thousands of pounds for five years (Board of Trade Returns):—

—	1930	1931	1932	1933	1934
Imports from Portugal into U.K.	3,655	3,309	2,586	2,724	3,183
Exports to Portugal from U.K.	3,263	2,454	2,585	3,926	3,634
Re-exports to Portugal from U.K.	428	204	183	120	157

Shipping, Navigation, and Internal Communications.

In 1931, 7,217 vessels of 24,688,340 tons entered, and 7,037 vessels of 23,334,152 tons cleared the ports of Portugal (continental and islands). Of those entering, 3,048 (4,535,432 tons) were Portuguese, 1,354 (8,486,085 tons) British, and 739 (3,889,160 tons) German. In 1934 the merchant marine of Portugal consisted of 181 steam vessels and 81 sailing vessels of 240,674 tons and 22,497 tons respectively.

Portugal has 824 miles of State-owned railway, 735 miles being normal gauge and 89 miles narrow gauge. According to an agreement dated March 11, 1927, the Companhia dos Caminhos de Ferro Portugueses, to which a number of private lines already belong, took over two sections of the State railways in return for an annual contribution of a fixed percentage of earnings. There are also six privately owned lines 1,177 miles in length, 882 miles normal and 295 miles narrow gauge. On January 1, 1933, total railway mileage was 2,106 miles. In 1933, 23,000,000 passengers were carried, and 4,372,000 tons of merchandise transported. There were in 1931, 14,304 km. (8,882 miles) of road. Length of telegraph lines in 1931 was 9,022 km. (5,603 miles). Number of offices, 744; of telegrams, 2,217,062 sent and 2,590,136 received. There are 13 wireless stations. The State owned 263 km. (163 miles) of telephone line in 1931, and the Anglo-Portuguese Telephone Co. Ltd. owned 137,329 km. (85,281 miles) of inter-urban lines, and 100,690 km. (62,528 miles) in Lisbon, and 43,128 km. (26,782 miles) in Oporto.

Banking, Money, Weights and Measures.

The Government financial institution is the Bank of Portugal, with a capital of 100,000,000 escudos. By a Decree of June 29, 1931, the term of the Bank as the bank of emission was extended for a period of thirty years as from July 1, 1931. The privilege of note issue then ceases. The limit of fiduciary circulation is 2,200,000 contos. The cash on hand of the bank on December 26, 1934, was: gold, 902,018,000 escudos. The notes in circulation amounted to 2,120,784,000 escudos.

There are 37 other banks registered on the mainland and 18 in the Islands with a capital of 1,731,492,288 and 58,392,167 escudos respectively, and total deposits on August 31, 1933, of 3,452,506,361 and 252,870,825 escudos respectively.

The Decree of the Provisional Government of May 22, 1911, which established a new monetary system, was altered in the middle of 1931. The unit is the gold *escudo*, of 100 *centavos*, which is the standard coin with the weight of 0·0739 grams, and the fineness of 900/1000. The British sovereign and half-sovereign of 7·98805 and 3·99402 grams of gold respectively and fineness of 916–2/3 per 1,000 will continue to be a legal coin in the country with the value of 110 and 55 gold escudos respectively. 1,000 escudos are called a *conto*. The Bank of Portugal paper notes of 2·5, 5 and 10 escudos will be taken out of circulation before the 31 December, 1933, and they will be replaced by silver coins of the same denominations. The gold coins are of 250, 100 and 50 escudos; the silver coins, 10, 5 and 2½ escudos; Alpaca coins, 1 escudo and ½ escudo; bronze coins, 20, 10 and 5 centavos.

The metric system of weights and measures is the legal standard. The chief old measures still in use are:—

The *Almude*	of Lisbon = 3·7	imperial gallons.	
	,, Oporto = 5·6	,,	,,
,, *Alqueire* . . .	= 0·36	,,	bushel.
,, *Moio* . . .	= 2·78	,,	quarters.

Diplomatic Representatives.

1. Of Portugal in Great Britain.

Ambassador Extraordinary and Plenipotentiary.—Dr. Ruy Ennes Ulrich (appointed June, 1933).

First Secretary.—Luis E. Fernandez.

Second Secretary.—João de Barros Ferreira da Fonseca.

Attaché.—Antonio Potier.

Commercial Counsellor and Consul-General.—Luiz de Sousa Monteiro Ferreira de Castro.

There are Consular representatives at London, Cardiff, Newcastle, Liverpool, Aberdeen, Dundee, Leith, Glasgow, Hull, Southampton, Bristol, Dartmouth, Falmouth, Plymouth, Port Talbot, Swansea, Barrow-in-Furness, Manchester, Birmingham, Dover, Middlesbrough, and Leeds.

2. Of Great Britain in Portugal.

Ambassador.—Sir Claud Russell, K.C.M.G. (appointed February 11, 1931).

First Secretary.—K. T. Gurney.

Second Secretary.—P. W. S. Y. Scarlett.

Commercial Secretary and Consul at Lisbon.—A. H. W. King, O.B.E

Naval Attaché.—Capt. C. F. Hammill, R.N.
Military Attaché.—Major the Hon. W. Fraser, D.S.O., M.C.
Air Attaché.—Group Captain R. M. Field.

There are Consular representatives at Lisbon (C.), Portimao, Villa Real, Faro, Setubal, Oporto, &c.; Funchal (Madeira), St. Michael's (Azores), St. Vincent (Cape Verde).

Consul-General at Lourenço Marques.—S. E. Kay, M.B.E. (Nov. 1, 1933).

There are Consuls or Vice-Consuls at Mozambique and Lobito, Consul at Marmagao (Gôa).

Dependencies.

The colonial possessions of Portugal, situated in Africa and Asia, are as follows:—

Colonial Possessions	Area: English sq. miles	Population	Colonial Possessions	Area: English sq. miles	Population
Possessions in Africa:			Possessions in Asia:		
Cape Verde Islands (1932)	1,557	150,553	In India (1931)	1,637	579,969
Guinea (1930)	13,944	364,929	Timor (1930)	7,330	474,363
Principe and S. Tomé Islands (1921)	372	59,060	China: Macao, &c. (1927)	5	157,175
Angola (1931)	487,788	3,093,281			
Mozambique (1934)	299,978	4,028,746	Total, Asia	8,972	1,211,507
Total Africa	803,634	7,701,569	Total, Colonies	812,606	8,913,076

On August 15, 1914, partial autonomy was granted by the Home Government to all Portuguese colonies, giving each the right to establish its own code of laws for civil and financial Government.

The **Cape Verde Islands** consist of ten islands and four islets which are administered by a Governor, whose seat is at Praia, the capital. The islands are divided into two groups, named Barlavento (windward) and Sotavento (leeward); the prevailing wind being north-east. The former is constituted by the islands of São Vicente, Santo Antaõ, São Nicolau, Santa Luzia, Sal and Bôa Vista, and the small islands named Branco and Raso. The latter is constituted by the islands of Sant' Iago, Maio, Fogo and Brava, and the small islands named Rei and Rombo. São Vicente is a coaling station which supplies all navigation to South America. The total area is 4,033 square kilometres (1,557 square miles). The population is estimated at 150,553. There are 157 primary schools, one secondary school and one Lycée in the Island of São Vicente. Military force consists of 4 officers and 84 men. The chief products are sisal, castor oil, coffee, mustard, brandy, oranges and hides. Other products are maize, manioc, beans, tobacco, cane sugar, sweet potatoes. The coffee is of excellent quality; exports in 1931 were 28,345 kilos. The total number of animals in 1931 was 143,386. The estimated public revenue in 1933–34 is 20,927,570 escudos, and the expenditure 20,715,050 escudos. The imports in 1932, 64,959,522 escudos; exports, 1,728,934 escudos. The metric system of weights and measures is used. The currency is Portuguese. In 1932, 3,991 ships of 4,644,932 tons entered the ports of the colony, and 3,958 ships of 4,648,715 tons cleared.

Portuguese **Guinea**, on the coast of Senegambia, is bounded by the limits fixed by the convention of May 12, 1886, with France, and is entirely enclosed on the land side by French possessions. It includes the adjacent archipelago of Bijagoz, with the island of Bolama, in which the capital of the same name is situated. Area is 36,125 square km. (13,944 square miles). Population (1930), 364,929. There are 14 schools, 2 central, 2 mixed, and 10 rural. The chief commercial products are rice, wax, oil, seeds, hides. Estimated public revenue in 1932–33 is 21,583,863 escudos, and expenditure 21,417,962 escudos. Military force 287 (8 officers and 279 other ranks, including 264 natives). Imports in 1932, 26,246,609 escudos; exports, 36,023,892 escudos. The chief port is Bissau. Other ports: Bolama, Cacheu and Bubaque. In 1932, 91 steamers of 169,313 tons entered and 91 of 170,784 tons cleared the ports of the colony. In the coasting trade, 3,065 steamers of 71,702 tons entered and 3,095 of 72,644 tons cleared. There are 592 miles of telegraph lines and 1,740 miles of roads.

The islands of **S. Tomé** and **Principe**, which are about 125 miles off the coast of Africa, in the Gulf of Guinea, were discovered in 1471, and now constitute a province under a Governor. Area of the islands 372 square miles. According to the census of 1921 the population of the two islands was 59,055; 52,150 in S. Tomé and 6,905 in Principe, and the distribution was as follows: whites, 1,115; natives, 57,123; others, 817. The chief commercial products are cacao, coffee, coconut and copra, palm oil and cinchona. On January 1, 1930, there were 17,953 animals in the colony. Revenue, 1931–32, 10,729,842 escudos; expenditure, 10,700,698 escudos. Military force consists of 145 men (135 natives). Imports at S. Tomé and Principe (1932), 19,165,250 escudos; exports, 33,186,334 escudos. On S. Tomé a railway of 10 miles is open for traffic. There are 28 miles in course of construction. There are 124 miles of roads. In 1931, 177 vessels of 731,911 tons entered and cleared the ports.

Angola (Portuguese West Africa), with a coast-line of over 1,000 miles, is separated from French Congo by the boundaries assigned by the convention of May 12, 1886; from the Belgian Congo by those fixed by the convention of July 27, 1927; from British South Africa in accordance with the convention of June 11, 1891, and from South-west Africa in accordance with that of December 30, 1886. The area is 1,263,700 square km. (487,788 square miles). The colony has belonged to the Portuguese since 1575, with the exception of the years 1641 to 1648, when it was held by the Dutch. It is under a High Commissioner, who resides at Luanda, and is vested with large powers. By a decree of July 24, 1930, and a ministerial order of June 28, 1932, it is divided into 8 administrative districts and 1 Intendencia. The important towns are S. Paulo de Loanda (capital), Benguela, Mossámedes, Lobito, Sa da Bandeira, Malange and Huambo (Nova Lisbôa), the future capital. The population numbered 3,098,281 in 1934.

For primary education there are 70 schools (2 infant schools and 68 elementary schools); for secondary education, 3 schools, viz. 1 higher-grade school, a Central College at Loanda and a National College at Lubango (Huila). There are also 106 professional schools.

The military force is composed of 122 officers and 4,497 other ranks (4,200 natives and 297 Europeans).

The ordinary budget for 1933–34 balanced at 147,232,000 angolares and the extraordinary budget at 5,546,000 angolares. The public debt of

Angola on January 1, 1934, stood at 930,284 contos (8,457,000*l.*). This included the colony's debt to Portugal amounting to 611,706 contos.

The principal crops are coffee, maize, sugar, palm oil and palm kernels. Other crops are cotton, wheat, tobacco, cocoa and sisal. Wax is also an important product. In 1931 there were 1,569,849 cattle, 150,485 sheep, 363,252 goats and 286,784 swine. The country possesses valuable diamond deposits. Copper and lignite exist but are not worked. Salt is also found.

Imports, 1933, 175,970,000 angolares; exports, 246,864,000 angolares. The chief imports of the province are textiles (58,878,000 angolares in 1933), coal, 16,886,000 angolares, and foodstuffs, 20,204,000 angolares, and the chief exports in 1933 were coffee (11,998 metric tons, 37,874,000 angolares), maize (90,968 metric tons, 50,011,000 angolares), diamonds (483,448 carats, 70,425,000 angolares), sugar (21,095 metric tons, 27,188,000 angolares), wax (1,093 metric tons, 8,152,000 angolares), and coconut (6,185 metric tons, 5,495,000 angolares). The trade is largely with Portugal. Exports to United Kingdom (Board of Trade figures), 4,164*l.* in 1933, 7,579*l.* in 1934; imports from United Kingdom, 241,441*l.* in 1933, 187,724*l.* in 1934. Re-exports to Angola from U.K. were 8,666*l.* in 1933 and 6,130*l.* in 1934.

The Portuguese National Navigation Company has most of the carrying trade to and from Europe; the steamers of 3 British lines and one German line visit ports of the Colony regularly. The length of railways open for traffic is 1,425 miles, made up as follows: Loanda–Malanje line, 261 miles (metre gauge); Canhoca–Golungo Alto, 19 miles; Bengo–Cunga branch, 56 miles; Calumbo branch, 32 miles; Amboim line, 66 miles; Mossámedes–Chela Mountains, 155 miles, and the Benguela railway, from Lobito to the Luoa River, the new Angola–Belgian Congo frontier, 836 miles. In July, 1918, the Government purchased the Trans-African railway. There are 17,215 miles of good roads, and 20,713 miles of secondary roads. Angola is connected by cable with East, West, and South African telegraph systems. There are 5,790 miles of telegraph lines, 259 miles of telephone line, and 19 wireless stations.

As from July 1, 1928, the Angolan escudo has been superseded by a new unit the 'angolar,' of 100 centavos, 80 angolares being the equivalent of 100 Angolan escudos. The angolar is equal to the Portuguese escudo. A new coin has also been introduced, called a 'macuta,' equal to 5 centavos.

Governor-General.—Colonel Eduardo Ferreira *Viana.*

Mozambique (Portuguese East Africa) is separated from British Central and South Africa by the limits of the arrangement between Great Britain and Portugal in June, 1891. It is separated from Tanganyika Territory, according to agreements of October and December, 1886, and July, 1890, by a line running from Cape Delgado at 10° 40′ S. lat. till it meets the course of the Rovuma, which it follows to the point of its confluence with the 'Msinje, the boundary thence to Lake Nyasa being the parallel of latitude of this point. In accordance with the Treaty of Versailles the Peace Conference on September 23, 1919, allotted to Portugal 'as the original and rightful owner' the territory south of the Rovuma, known as the 'Kionga Triangle' (formerly part of German East Africa).

Portuguese East Africa, with an area of 299,973 square miles, comprises two distinct entities: (1) the territory administered by the State (245,776 square miles), and (2) the territory of Manica and Sofala under the Companhia de Moçambique (51,881 square miles). Lourenço Marques (population 42,779 in 1931) is the capital of the Province. There is a Government

Council composed of officials and elected representatives of the commercial, industrial and agricultural classes, and also an Executive Council. The existing organization of the Province is that which was established by decree of May 23, 1907, with some modifications introduced by the Law of October 9, 1922. The population of the colony (1934), including the chartered company, was 4,028,746. Elementary education is provided by 28 primary schools, 60 intermediate schools, and 6 private schools in the area administered by the state, and by 8 primary schools, and 43 intermediate schools in the company's area. There is also 1 central high school, and 7 state professional schools. There are also 240 missionary schools.

The military force of the Colony consists of 177 officers and 2,637 other ranks (395 Europeans and 2,242 natives).

Revenue and expenditure for 1932–33 were estimated at 356,402,149 escudos paper, and 340,933,897 escudos paper respectively. The chief products of the Province are sugar, maize, cotton, copra, sisal and mining products. In 1929 there were 490,749 oxen, 277,504 goats, 100,614 sheep, and 105,157 pigs. The principal ports are Mozambique, Beira, Porto Amelia, Quelimane, Chinde, Inhambane and Lourenço Marques. Imports in 1933 amounted to 12,582,789 gold escudos, and exports to 8,385,006 gold escudos. At the ports of the Colony there entered, in 1932, 2,623 vessels of 8,975,237 tons; and cleared 2,613 vessels of 8,993,305 tons. Trade with United Kingdom (Board of Trade figures): exports to United Kingdom, 86,624*l.* in 1934 85,768*l.* in 1933; imports from United Kingdom, 1,504,622*l.* in 1934, 1,582,739*l.* in 1933; re-exports from U.K., 42,926*l.* in 1934, 42,297*l.* in 1933. There are in the area administered by the Government 516 miles of 3ft. 6in. gauge railway owned by the State.

The Manica and Sofala region is administered by the Mozambique Company, which has a royal charter granting sovereign rights for 50 years from 1891. The seat of the administration is Beira (population 23,694). Under the Company's administration the country on either side of the Beira Railway has become settled, there is convenient transport by rail and river, and facilities are granted for securing titles and working mines. The census population of the Mozambique Company's territory (1928–29) was 3,616 Europeans, 3,552 non-natives, and 306,759 natives, total 313,927. On August 1, 1931, there were 3,960,261 natives (1,896,981 males and 2,063,280 females). Imports into this territory amounted in 1930 to 80,250,344 escudos; exports, to 75,209,406 escudos. Exports in 1928 included maize (19,162 metric tons), sugar (33,697 metric tons), and gold and silver (184,738 escudos in 1927). There entered at Beira in 1930, 644 vessels with a tonnage of 3,172,592; and cleared, 643 vessels with a tonnage of 3,180,695. 2,500 miles of roads are now available for motor traffic in the Company's territory.

The Delagoa Bay Railway has a length of 57 miles in Portuguese territory, and is continued for 290 miles to Pretoria. Till recently the commercial relations and transit of goods by this railway between the Portuguese and British possessions were regulated by the agreement signed April 1, 1909. A new agreement has been negotiated recently. A railway was constructed before the war to a point near the Swaziland border, 40 miles being open for traffic, but the linking up of this section with the South African Railways to provide a direct route from Lourenço Marques to Johannesburg has not yet been arranged. The Gaza Railway (2 ft. 6 in. gauge) from João Belo to Chikomo has 61 miles open for traffic.

The Beira Railway has a length of 200 miles in the territory administered by the Mozambique Co., and links up at the frontier with the

Rhodesian Railway system. The Trans-Zambesia Railway, 175 miles in length, from Dondo, on the Beira Junction Railway, to Murraça, on the southern bank of the Zambesi, was opened for traffic on July 1, 1922. On the northern bank of the Zambesi, the Central Africa Railway (61 miles long, of which 45 miles are in Portuguese territory) connects at Port Herald with the Shiré Highlands Railway. When a bridge is constructed over the Zambesi these three railways will give a continuous connection between British Nyasaland and the port of Beira.

The Government has been working on a definite plan, and the finished scheme for the Province south of parallel 22, the southern boundary of the Mozambique Co.'s territories, embraces the following lines: Moamba to Xinavane, 55 miles (completed); Xinavane via Chissane to Chai-Chai, or via Chibuto to Chigomo, 70 miles (not yet begun); Chai-Chai via Manjacasse to Chigomo, 51 miles (completed); Chigomo via Jinagai to Inharrime, 51 miles (projected); Inharrime to Inhambane, 55 miles (completed). Activities north of the Mozambique Co. are represented by two lines of penetration, one from the port of Quelimane, which taps what is said to be the richest region on the whole coast and now extends to Mocuba on the river Lujella, and the other from Lumbo, on the mainland opposite the island and port of Mozambique, capital of the district of that name and formerly capital of the Province, to Meonta.

Beira is connected by telegraph with Salisbury in Mashonaland, and Lourenço Marques with the Transvaal system. Quelimane has telegraphic communication with Chiromo. In 1925 there were 7,452 miles of telegraph line. There are 12,400 miles of roads.

Since September 1, 1922, the escudo currency has been in vogue in Portuguese East Africa, but at Lourenço Marques and Beira, *libra esterlina* (sterling) notes used still to be issued by the local banks. This right was rescinded in 1926, and the sterling notes are to be withdrawn from circulation within ten years.

The metric system is used. Certain English weights and measures are also in current use.

Governor-General.—Colonel José Ricardo Pereira *Cabral.*

Governor of Mozambique Company's Territory.—Captain Carlos de Almeida *Pereira.*

Portuguese India consists of **Gôa**, containing the capital, Pangin, or Nova-Gôa, on the Malabar coast; Damão, on the coast about 100 miles north of Bombay; and Diu, a small island about 140 miles west of Damão. The total area of the colony is 4,240 square km. (1,637 square miles), with a population in 1934 of 579,969. In 1930–31 there were 90 elementary schools, 3 secondary schools, also a medical school and a teachers' training college. In Gôa there are 501 salt works employing 1,968 men, the annual production amounting to about 12,200 tons. In Damão there are 11 salt works, and in Diu 5. In 1906 deposits of manganese were discovered near Mormugão and 6 concerns with 21 mines are at work. The military force consists of 41 officers and 1,391 other ranks. The Mormugão railway (51 miles) connects this port with the lines of British India. The estimated revenue of Gôa, &c., in 1931–32 balanced at 6,991,281 rupees. The trade is largely transit. In 1932 the imports by sea and land amounted to 16,209,239 rupees, the exports to 2,923,150 rupees. Chief exports are: coconuts, fish (fresh and salted), spices, caju-nuts, salt, and copra. There are in Portuguese India 46 telegraph offices and 262 miles of telegraph line and 75 miles of telephone line.

Governor-General.—General Graveiro *Lopes.*

Macao, in China, situated on an island of the same name at the mouth of the Canton River, forms with the two small adjacent islands of Taipa and Colôane a province, the city being divided into two wards, one inhabited by Chinese and the other by non-Chinese, each having its own administrator. The population, according to the census of 1927, is 157,175 (3,846 Portuguese, 152,738 Chinese and 591 of various nationalities). Estimated revenue in 1932–33, 5,254,040 patacas, and expenditure 5,222,413 patacas. The military force consists of 30 officers and 854 men. For education there are the Seminary of S. José, the Central College of Macao, and about 200 elementary schools. The trade, mostly transit, is in the hands of Chinese. Imports in 1932, 34,124,944 patacas (approximate value of the pataca is 2*s.*); exports, 15,012,421 patacas. The colony has 118 miles of telephone line and a wireless station. It is served by various British, Japanese and Dutch steamship lines. In 1932, 2,493 steamers of 1,582,106 tons entered and 2,495 of 1,554,740 tons cleared.

Portuguese **Timor** consists of the eastern portion of the island of that name in the Malay Archipelago, with the territory of Ambeno and the neighbouring islands of Pulo Cambing and Pulo Jako, a total area of 7,300 square miles. By treaty of April, 1859, ratified August 18, 1860, the island was divided between Portugal and Holland; by convention of October 1, 1904, ratified in 1908, a boundary arrangement was made between the two Governments, certain *enclaves* being exchanged and the possession of other territories settled. This possession, formerly administratively joined to Macao, was in 1896, confirmed in 1926, made an independent province. Population in 1931, 474,363. There are 12 schools, and 5 colleges directed by the Missions. In 1929, there were 1,022 students. Estimated public revenue and expenditure for 1931–32 were 1,310,769 and 1,309,531 escudos respectively. Military force not less than 323 men (212 natives). Imports (1932) 1,403,563 patacas; exports, 691,269 patacas. Chief exports are: coffee, sandal-wood, sandal-root, copra, and wax. The port is Dilly, the capital. There is a good road system of 250 miles, telephone lines of 1,656 miles and a wireless station at Dilly.

ROME, SEE AND CHURCH OF.

(CITTÀ DEL VATICANO)

FOR many ages until Pius IX.'s reign, with some comparatively short breaks, the Popes or Roman Pontiffs bore temporal sway over a territory stretching across Mid-Italy from sea to sea and comprising an area of some 16,000 square miles, with a population finally of some 3,125,000 souls. Of this dominion the whole has been incorporated with the Italian Kingdom. Furthermore, by an Italian law dated May 13, 1871, there was guaranteed to His Holiness and his successors for ever, besides possession of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire, but this allowance remained unclaimed and unpaid until February 11, 1929, when a settlement of the 'Roman question' was arrived at by three treaties between the Italian Government and the Vatican. On that day there was signed (1) a Political Treaty, which recognized the full and independent sovereignty of the Holy See in the city of the Vatican; (2) a Concordat, to regulate the condition of religion and of the Church in Italy; and (3) a Financial Convention, in accordance with which the Holy See shall receive 750,000,000 lire in cash and 1,000,000,000 lire in Italian 5 per cent. State bonds. This sum is to be a definitive settlement of all the financial claims of the Holy See against Italy in consequence of the loss of its temporal power in 1870. The treaties were ratified and the sum of 750,000,000 lire paid on June 7, 1929.

The Pope exercises the Sovereignty and has full legal, executive and judicial powers. A Governor, directly and exclusively responsible to the Pope, exercises executive powers. The Judicial power is delegated to a tribunal in first instance, to the *Sacra Romana Rota* in appeal and to the Supreme Tribunal of the *Segnatura*, which is the ultimate authority where there is an appeal.

In its diplomatic relations with foreign countries, Città del Vaticano is represented by the Segreteria di Stato del Sommo Pontefice.

The area of the Vatican City is 44 hectares (108·7 acres). It includes the Piazza di San Pietro (St. Peter's Square), which is to remain normally open to the public and subject to the powers of the Italian police. It has its own railway station (opened November, 1932), postal facilities, coins and radio. The official journal is the *Acta Apostolicae Sedis*. Thirteen buildings in Rome, although outside the Vatican City, enjoy extra-territorial rights. The new building of the Pontificial Gregorian University in Rome, under the direction of the Jesuits, was formally opened in November, 1930.

The census of the population of the Vatican City on December 31, 1932, showed 1,025 inhabitants, including: Italians, 853 (578 men and 275 women); Swiss, 121 (4 women).

Supreme Pontiff.—**Pius XI.** (**Achilles Ratti**), born at Desio, May 31, 1857; Archbishop of Milan and Cardinal, June 13, 1921; elected Supreme Pontiff, as successor of Benedict XV., February 6, 1922.

Secretary of State.—Cardinal Pacelli. (Appointed February 10, 1930.)

The election of a Pope ordinarily is by *scrutiny*. Each Cardinal in conclave writes on a ticket his own name with that of the Cardinal whom he chooses. These tickets, folded and sealed, are laid in a chalice which stands on the conclave altar; and each elector approaching the altar repeats a prescribed form of oath. Thereupon the tickets are taken from the chalice by scrutators appointed *ad hoc* from the electing body; the tickets are compared with the number of Cardinals present, and when it is found that any Cardinal has two-thirds of the votes in his favour he is declared elected.

From the accession of Innocent IX., 232nd in the usual list of Roman Pontiffs, to Pius XI., 261st, the Popes (all Italian) have been as follows:—

Name and Family of Pontiff	Year of Election	Name and Family of Pontiff	Year of Election
Innocent IX. (*Facchinetti*) .	1591	Benedict XIII. (*Orsini*) .	1724
Clement VIII. (*Aldobrandini*)	1592	Clement XII. (*Corsini*) .	1730
Leo XI. (*Medici*) . .	1605	Benedict XIV. (*Lambertini*)	1740
Paul V. (*Borghese*) . .	1605	Clement XIII. (*Rezzonico*) .	1758
Gregory XV. (*Ludovisi*) .	1621	Clement XIV. (*Ganganelli*)	1769
Urban VIII. (*Barberini*) .	1623	Pius VI. (*Braschi*) . .	1775
Innocent X. (*Pamphily*) .	1644	Pius VII. (*Chiaramonti*) .	1800
Alexander VII. (*Chigi*) .	1655	Leo XII. (*della Genga*) .	1823
Clement IX. (*Rospigliosi*) .	1667	Pius VIII. (*Castiglioni*) .	1829
Clement X. (*Altieri*) .	1670	Gregory XVI. (*Cappellari*) .	1831
Innocent XI. (*Odescalchi*) .	1676	Pius IX. (*Mastai-Ferretti*) .	1846
Alexander VIII. (*Ottoboni*) .	1689	Leo XIII. (*Pecci*) . .	1878
Innocent XII. (*Pignatelli*) .	1691	Pius X. (*Sarto*) . . .	1903
Clement XI. (*Albani*) .	1700	Benedict XV. (*della Chiesa*)	1914
Innocent XIII. (*Conti*) .	1721	Pius XI. (*Ratti*) . .	1922

The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting, when complete, of 70 members, namely, 6 Cardinal-Bishops (holders of the suburbicary sees), 50 Cardinal-Priests, and 14 Cardinal-Deacons. In practice, however, while the total number of Cardinals is never allowed to exceed 70, the number of Cardinal-Priests frequently exceeds 50, while there are usually many vacancies among the Cardinal-Deacons. In March, 1935, the Sacred College consisted of 5 Cardinal-Bishops, 45 Cardinal-Priests, and 2 Cardinal-Deacons.[1] The following list gives the names, dates, and offices of these 52 Cardinals:—

Name	Office or Dignity	Nationality	Year of Birth	Year of Creation
Cardinal-Bishops:—				
Gennaro Granito Pignatelli di Belmonte	Bishop of Albano	Italian	1851	1911
Michele Lega	Bishop of Frascati. Prefect of the Holy Congregation of the *Sacraments*	,,	1860	1914
Donato Sbarretti	Bishop of Sabina; Secretary of the Holy Office	,,	1856	1916
Tommaso Pio Boggiani	Bishop of Porto	,,	1863	1916
Luigi Sincero	Secretary of the Holy Congregation for the Oriental Church	,,	1870	1923
Cardinal-Priests:—				
Leo von Skrbensky	—	Austrian	1863	1901
Paulin Pierre Andrieu	Archbishop of Bordeaux	French	1849	1907
William O'Connell	,, Boston	American.	1859	1911
Gaetano Bisleti	Commendatory Grand Prior of the Sovereign Order of Malta in Rome and Prefect of the Holy Congregation of the *Seminarii* and of the *Università degli Studi*	Italian	1856	1911
Pietro Lafontaine	Patriarch of Venice	,,	1860	1916
Alessio Ascalesi	Archbishop of Naples	,,	1872	1916
Louis Joseph Maurin	Archbishop of Lyons	French	1859	1916
Adolph Bertram	Bishop of Breslau	German	1859	1919
Alexander Kakowski	Archbishop of Warsaw	Polish	1863	1919
Michael Faulhaber	Archbishop of Munich	German	1869	1921
Dennis Dougherty	Archbishop of Philadelphia	American.	1865	1921
Francisco de Assis Vidal y Barraquer	Archbishop of Tarragona	Spanish	1868	1921
Karl Josef Schulte	Archbishop of Cologne	German	1871	1921
Achille Locatelli	—	Italian	1856	1922
Giovanni Baptist Nasalli Rocca	Archbishop of Bologna	,,	1872	1923
George William Mundelein	Archbishop of Chicago	American.	1872	1924
Patrick Joseph Hayes	Archbishop of New York	,,	1867	1924
Eustachio Ilundain y Esteban	Archbishop of Seville	Spanish	1862	1925
Enrico Gasparri	—	Italian	1871	1925
Luigi Capotosti	—	,,	1863	1926
Lorenzo Lauri	Penitenziere Maggiore	,,	1864	1926

[1] The terms Cardinal-Priest and Cardinal-Deacon have for centuries ceased to imply severally the particular orders of priest or deacon. Nowadays in the Sacred College a presbyteral title is freely given to one in episcopal or diaconal orders, and a deaconry to a priest or even to a simple clerk.

Cardinal-Deacons:—				
Camillo Laurenti	Prefect of the Holy Congregation of the *Religiosi*	Italian	1862	1921
Alessandro Verde	—	Italian	1865	1925

Though primarily belonging to the local Roman Church, the Cardinals, drawn from every nation of Christendom, are now regarded as Princes of the Church at large. Originally they were simply the parish rectors of Rome, or the deacons of Roman deaconries. In 1586 their number was finally settled by Sixtus V. at seventy. The Cardinals compose the Pope's Senate or Council and the various Sacred Congregations, govern the Church while the Apostolic See is vacant, and elect the deceased Pontiff's successor They received the distinction of the red hat under Innocent IV., during the first General Council of Lyons, in 1246; and the title of Eminence from Urban VIII., in 1630. In 1930 all Archbishops and Bishops of the Catholic Church had conferred upon them by the Pope the title of 'Excellency.'

The central administration of the Roman Catholic Church is carried on

by a number of permanent committees called Sacred Congregations, composed of Cardinals, with Consultors and Officials. There are now twelve Sacred Congregations, viz., Holy Office, Consistorial, Discipline of the Sacraments, Council, Religious, Propaganda Fide, Rites, Ceremonial, Extraordinary Ecclesiastical Affairs, Seminaries and Universities, the Basilica of St. Peter's, and for the Oriental Church. Besides these there are several permanent Commissions, for example, one for Biblical Studies, another for Historical Studies, another for Preservation of the Faith in Rome, another for Codification of Canon Law. Furthermore, the Roman Curia contains three tribunals, to wit, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature, and the Sacred Roman Rota; and, lastly, various offices, as the Apostolic Chancery, the Apostolic Datary, the Apostolic Chamber, the Secretariate of State, etc.

The States wherewith the Holy See maintains diplomatic relations are Austria, Belgium, Czechoslovakia, Estonia, France, Germany, Hungary, Irish Free State (1929), Lithuania, Yugoslavia, Monaco, the Netherlands, Poland, Portugal, Rumania, Spain, and the United Kingdom (1914), together with most of the American Republics, except the United States and Mexico.

In December, 1930, the issue of Papal coinage was resumed, after a lapse of 60 years. The new coins are eight in number, and will have the same fineness and value as the corresponding Italian coins. Two are of bronze and worth 5 and 10 centesimi respectively. There are two other coins in nickel, worth 20 and 50 centesimi, and three silver coins worth respectively 1, 5 and 10 lire. In addition, there is a gold piece of 100 lire. In virtue of a special convention between the Vatican City and the Italian Government (to remain in force for 10 years), each State allows the currency of the other to circulate in its territory. The Vatican City has, however, given an undertaking that the total value of the bronze, nickel and silver coins issued by it in any year will not exceed 1,000,000 lire.

Within the British Empire the present number of Roman Catholic residential sees is 262, viz., 39 archbishoprics and 122 bishoprics, besides 75 apostolic vicariates (mostly held by Bishops of titular sees), and 26 apostolic prefectures: while the Roman Catholic population subject to King George V. is estimated at 17,218,788 souls, of whom 6,350,266 are in Europe; 3,253,204 in Asia; 1,383,444 in Africa; 4,782,300 in British America; and 1,449,574 in Australasia. In the United States (including possessions) there were in 1933 29,693,915 Roman Catholics. Throughout the world the Roman Catholic population is reckoned at 366,185,084 souls (*Catholic Directory*, London).

Envoy and Minister.—Sir Charles John FitzRoy Rhys Wingfield, K.C.M.G. (Appointed February 24, 1934.)

RUMANIA.

(ROMÂNIA.)

Reigning King.

Carol II, born October 16, 1893, son of the late King Ferdinand and Queen Marie, married March 10, 1921, Princess Helen daughter of the late Constantine, King of the Helenes (this marriage was dissolved June 21, 1928, when the Princess received the title of Princess of Rumania).

On December 28, 1925, Prince Carol renounced his right of succession to the Throne; this was confirmed by Act of Parliament on January 4, 1926, when his son, Prince Mihai, was declared Heir to the Throne. On June 7, 1930, Prince Carol returned to Rumania and was proclaimed King in virtue of an Act of Parliament on June 8, 1930.

Son of the King.—Prince Mihai (Michael), born October 25, 1921, proclaimed King in virtue of his father's renunciation of the succession on the death of his grandfather, King Ferdinand, July 20, 1927, under a Regency. Ceased to be King on his father's accession, June 8, 1930, when he received the title of Prince of Alba Julia.

Sisters and brother of the King:—(1) Elisabeth, born October 11, 1894, married February 27, 1921, to the Diadoch, afterwards George II., King of the Hellenes; (2) Marie, born January 8, 1900, married to Alexander, King of the Serb, Croat, and Slovene State, June 8, 1922: (3) Nicholas, born August 18, 1903; (4) Ileana, born January 5, 1909, married July 26, 1931, to the Archduke Anton of Austria-Tuscany.

The union of the two Principalities of Wallachia and Moldavia was publicly proclaimed at Bucharest and Jassy on Dec. 23, 1861, the present name being given to the united provinces. The first ruler of Rumania was Colonel Cuza, who had been elected 'Hospodar,' or Lord, of Wallachia and of Moldavia in 1859, and who assumed the government under the title of Prince Alexandru Joan I. A Palace conspiracy in February, 1866, forced Prince Alexandru Joan to abdicate, and led to the election of Prince Carol I. The representatives of the people, assembled at Bucharest, proclaimed Rumania's independence from Turkey, May 10, 1877, which was confirmed by Art. 43 of the Congress of Berlin, signed July 13, 1878. This Congress also recognised the annexation of the Dobrondja, whose territory has been lately completed by a rectification stipulated in the Peace of Bucharest of 1913. King Carol I. of Hohenzollern-Sigmaringen reigned as Prince from 1866 to 1881, and as King from 1881 to 1914. On April 9, 1918, Bessarabia was joined to Rumania; the Bukovina on November 28, 1918; and Transylvania on December 1, 1918.

Constitution and Government.

The Constitution of Rumania was adopted on March 28, 1923. According to this the subsoil and the forests are nationalized. The Senate consists of 231 members including 4 for the Universities, the Patriarch, the Metropolitan and the Bishops of the Graeco-Orthodox and Graeco-Catholic Church, the representatives of the other Churches and Religions, and the President of the Rumanian Academy. The Heir to the Throne is also a Senator. There are also life senators, former Premiers, Cabinet Ministers and Deputies, former Presidents of the High Court of Justice, and former Commanders-in-Chief of the army. The Chamber of Deputies consists of 387 members. A Senator must be 40 years of age, and a Deputy 25. All citizens of 21 years, paying taxes, are electors. Both Senators and Deputies receive 500 leï per each day of actual attendance, besides 6000 leï per month and free railway passes. The King has a suspensive veto over all laws passed by the Chamber of Deputies and the Senate. The executive is vested in a council of Ministers

The elections held on December 20-22, 1933, resulted in the return of the following parties :—Lower House : Government (Old Liberals), 300 ; National Peasants, 29 ; Young Liberals (Professor Bratianu), 10 ; Peasant Party (M. Lupu), 11 ; Anti-Semites (M. Cuza), 9 ; National Agrarians (M. Goga), 8 ; Radical Peasants (M. Iunian), 6 ; Agrarian Union (M. Argetoianu), 5 ; and Hungarian Party, 9 ; total, 387. Senate (excluding the Professional Chambers, the Universities, the Clergy and the Senators *ex-officio*): Old Liberals, 173 ; other parties, 9 ; total, 182 (general total, 255).

The Cabinet (appointed October 4, 1934), is now composed as follows :—

Prime Minister.—George *Tatarescu.*
Minister of Interior.—I. *Inculetz.*
Minister of Foreign Affairs.—Nicholas *Titulescu* (October 10, 1934).
Minister of Finance.—Victor *Antonescu* (February 1, 1935).
Minister of Justice.—Dr. Valerian *Popp* (February 1, 1935).
Minister of Domains and Agriculture.—Basil *Sassu.*
Minister of Education.—Constantine *Angelescu.*
Minister of Communications.—R. *Franasovici.*
Minister of Defence.—General Paul *Angelescu.*
Minister of Labour.—I. *Nistor.*
Minister of Public Health.—Dr. *Costinescu.*
Minister of Industry and Commerce.—I. *Manolescu-Strunga.*

Local Government.

For purposes of local government Wallachia is divided into 17 districts, Moldavia into 13, the Dobruja into 4, Bessarabia into 9, the Bukovina into 5, and Transylvania (with the Banat, Crisana and Maramuresh) into 23 districts, each of which has a prefect, a receiver of taxes, and a civil tribunal. In Rumania (1919) there are 71 districts and 8,854 communes, 165 urban and 8,689 rural. In the rural communes there are 11,522 villages and 1,048 hamlets. The appellations 'urban' and 'rural' do not depend on the number of inhabitants, but are given by law. The most important towns, called *municipii* ('municipalities') have autonomous communal organisations.

Area and Population.

As a result of the Treaties of Peace of 1919 Rumania was enlarged, and the area and the estimated population of the New Kingdom, on January 1, 1934, are shown as follows :—

Country	Area in sq. miles	Population
Old Rumania	53,489	9,223,822
Bessarabia	17,146	3,001,472
The Bukovina	4,030	883,429
Transylvania	22,312	3,316,300
Crisana-Maramuresh	14,296	1,423,682
The Banat	11,009	942,940
Total	122,282	18,791,645

The number of births, deaths, and marriages, with surplus of births over deaths, was as follows for four years:—

Years	Births	Deaths	Marriages	Surplus of Births over Deaths
1930	625,341	346,714	166,824	278,627
1931	604,982	378,507	166,966	226,475
1932	662,049	399,346	175,137	267,703
1933	507,621	348,085	155,049	159,536

The populations of the principal towns in Rumania (according to the census of December 29, 1930) were as follows:—

Bucharest	631,288	Ploësti	77,325
Chishinau	117,016	Arad	77,225
Cernautzi	111,122	Brafli	68,310
Yassy	102,595	Craiova	63,063
Galatz	101,148	Brasov	59,234
Cluj	98,550	Constantza	58,258
Timişoara	91,866	Satu Mare	49,914
Oradea	82,325	Sibiu	48,013

Religion, Education, Justice, &c.

Of the total population of Rumania (in 1934) about 13,300,000 belonged to the Orthodox Church, 1,800,000 were Greek Catholics, 1,200,000 were Roman Catholics, 720,000 Reformists, 400,000 Lutherans, 75,000 Unitarians, about 900,000 Jews, 260,000 Moslems and 140,000 others. The National Orthodox Church of Rumania is administered by a Holy Synod under the presidency of Mgr. Miron Cristea, who was enthroned as first Patriarch of Rumania on November 1, 1925. To the Holy Synod belong all the Metropolitans of) Yassy, Chishinău, Cernăuţzi, and Sibiu), all the Bishops (of Râmnicul-Vâlcea, Galatz, Constantza, Curtea de Argeş, Buzău, Roman, Ismail, Cetatea-Albă, Bălţi, Arad, Caransebeş, Oradea) and all the Archimandrites (one for each Metropolitan and Bishopric).

There is a Uniat (Greek-Catholic) Rumanian Metropolitan at Blaj, with diocesan bishops at Lugosh, Cluj, Oradea, and Baia-Mare. There is a Latin archbishop in Bucharest, with diocesan bishops at Alba Julia, Oradea Mare, and Yassy. There are Reformed bishops at Cluj and Oradea Mare; a German Lutheran bishop at Sibiu; a Magyar Lutheran superintendent at Arad; and a Unitarian bishop at Cluj. The clergy of the National Orthodox Church and of the Uniat Rumanian Church are paid by the State. The clergy of the other denominations receive subventions from the State. Full liberty of religion is assured to every creed or sect.

Education is free and compulsory 'wherever there are schools.' In 1931–32 there were 14,875 elementary schools with 37,635 teachers and 2,054,334 pupils.

There were in 1931–32, 754 secondary schools with 136,473 pupils and

10,895 teachers and 22 higher educational institutions having 8,753 students and 474 professors.

There are 2 commercial academies, one in Bucharest and the other in Cluj; 2 agricultural academies, in Bucharest and in Cluj; 2 polytechnic institutes, one in Bucharest and the other in Timişoara; 1 academy of architecture and a school for designers for construction in Bucharest; 4 music academies in Bucharest, Yassy, Cluj, and Cernăuţzi; 3 plastic academies; 8 theological seminaries (not including the Faculties of Theology at the Universities in Bucharest, Cernăutzi and Yassy).

There are besides 4 universities: in Bucharest, founded in 1864 (732 professors and 17,419 students); in Yassy, founded in 1860 (365 professors and 5,549 students); in Cluj, in Transylvania, founded in 1919 (350 professors and 3,839 students); in Cernăuţzi (Czernowitz), in Bukovina, founded in 1920 (105 professors and 2,717 students). The Faculty of Theology, of the University of Yassy, has its seat in Chisinau, in Bessarabia. Besides the 4 Faculties of Law comprised in each university, there is also an Academy of Law at Oradea dependent of the Cluj University, until it is definitely becoming a part of the respective faculty of Cluj.

Justice is administered by a court of cassation, 12 appeal courts, 72 tribunals, and 465 justices of the peace. Assistance is given to the sick in 530 hospitals and *hospices* (departmental, communal, rural, and private).

Finance.

The following table shows (in thousands of leï) the estimated ordinary revenue and expenditure for years ending March 31 (old style):—

—	1931	1932	1933	1934	1935
	1000 Lei	1000 Lei	1000 Lei	1000 Lei	1000 Lei

,, ,, Foreign Affairs .	40	,, ,, Presidency of the Council of Ministers .	20
,, ,, Agriculture .	415	Funds for credits . .	324
,, ,, Labour and Public Health .	17		
,, ,, Commerce and Industry .	479		
,, ,, National Defence	579		
,, ,, Public Works and Communications . .	70		
,, ,, Education .	21		
Total ordinary . . .	20,451	Total ordinary . . .	21,252
Total extraordinary . .	13,808	Extraordinary Expenditure	14,745
Total	34,259	Total	35,997

The public debt of Rumania amounted on Jan. 1, 1934, to 125,654,548,000 leï, of which 72,976,627,000 leï were external debt, 13,532,239,000 leï internal debt, and 39,145,682,000 leï for War debt.

Defence.

Military service in Rumania is compulsory and universal from the ages of 21 to 50. The normal terms of service are 2 years in the active army (excepting the Frontierguards, the gendarmery and the naval and air forces, where the service is 3 years), 18 years in the regular army reserve, and 9 years in the militia. Young men exempted from service in the ranks, and those surplus to the annual contingent, are posted to a supplementary reserve.

The peace establishment of the army in 1934 was 16,596 officers and 124,789 other ranks organised in 22 divisions (one of which is the Royal guard), 1 corps of mountain light infantry of 2 divisions, 4 cavalry divisions. The air personnel (1934) amounted to 12,540 all ranks, with 800 aeroplanes.

The infantry is armed with 8-mm. French, Russian and Austrian rifles; the Rumanian artillery is still largely armed with guns of the Krupp type, and with Russian armament of 76·2, but a considerable number of batteries have the French type of 75-mm. field guns and Austrian, Rumanian and Russian howitzers of various types.

In the Black Sea are 4 destroyers, 3 ex-Austrian torpedo boats and 4 motor gunboats and a depôt ship (*Constantza*). The Danube force comprises 7 monitors (600 tons), armed with 4·7-in. guns, 3 vedettes and some small craft. The naval school is in Constantza. The expenditure for 1933 amounted to: land forces, 5,403,177,400 leï; naval forces, 62,925,259 leï; air forces, 168,599,411 leï.

Production and Industry.

According to a statistical estimate, the distribution of the soil of Rumania in 1933 was as follows:—Ploughed land, 32,974,117 acres; meadows and pasture, 9,951,397 acres; vineyards and fruit trees, 1,312,747 acres; forests, 18,060,177 acres; and other lands, 11,443,310 acres; making a total of 73,741,748 acres.

For 2 years the chief agricultural crops for Greater Rumania were as follows:—

Crop	Area cultivated		Production	
	1932	1933	1932	1933
	Acres	Acres	Metric Tons	Metric Tons
Wheat . . .	7,087,991	7,696,520	1,511,476	3,240,634
Rye	860,296	958,360	267,053	445,919
Barley . . .	4,413,566	4,488,050	1,467,147	1,884,268
Oats . . .	1,955,627	2,050,100	642,672	806,424
Maize . . .	11,787,357	11,922,690	5,992,970	4,554,419

In 1932, Rumania had 2,034,000 horses, 4,189,000 cattle, 12,294,000 sheep, 421,000 goats, and 2,964,000 swine.

The catch of fish in 1933 from State properties amounted to 18,255 metric tons.

The principal minerals are salt, lignite, iron and copper ores, petroleum and natural gas. Petroleum wells, both government and private, are worked at Prahova, Dambovitza, Bacau, and Buzau. The total output of crude oil in 1932 was 7,336,664 metric tons; in 1933, 7,375,617 metric tons; and in 1934,

8,468,857 metric tons. The salt mines are situated in the region of the lower Carpathians, from Bukovina to the west of Oltenic, an area of over 250 square miles. Salt mining has been a state monopoly since 1863 (production in 1933 was 262,428 metric tons, as compared with 288,070 metric tons in 1932). Output of lignite in 1931, 1,631,861 metric tons; in 1932, 1,463,928 metric tons; in 1933, 1,534,488 metric tons. The output of natural gas in 1932 was 1,456,036,131 cubic metres; in 1933, 1,589,270,000 cubic metres; iron ore, 8,051 metric tons in 1932, 13,831 metric tons in 1933; pyrites, 12,112 metric tons in 1933.

Industries of some importance are flour milling, brewing, and distilling. In 1932 there were 3,524 industrial establishments employing 132,389 workmen, 19,920 technical and administrative employees, with an invested capital of 40,549,182,000 leï.

Commerce.

The values of the imports into and exports from Rumania exclusive of gold and silver (in 1000 leï) were:—

Years	Imports	Exports	Years	Imports	Exports
1931	15,754,569	10,047,002	1933	11,741,850	14,170,828
1932	12,011,325	16,721,593	1934	13,095,971	13,612,988

The principal items in the Rumanian foreign trade in 1932 and 1933 were as follows (in million leï):—

Imports	1932	1933	Exports	1932	1933
	Million Leï	Million Leï		Million Leï	Million Leï
Wool, hair and manufactures of	708	1,014	Cereals	5,586	3,263
Textile materials, etc.	3,934	3,905	Petroleum products	7,109	7,838
Iron and steel	1,268	1,250	Live animals	657	404
Leather goods	304	255	Wood products	1,112	1,117
Non-ferrous metals	864	329	Animal products (edible)	449	361
Machinery	1,028	1,096	Seeds, etc.	442	547
Automobiles	233	238			

The trade in 1934 was distributed as follows:—

Country	Imports into Rumania	Exports from Rumania
	Thousand leï	Thousand leï
United Kingdom	2,116,318	1,366,693
Austria	1,311,569	1,221,887
Czechoslovakia	1,291,431	738,595
France	1,463,821	1,321,590
Germany	2,031,195	2,256,730
Italy	960,641	1,055,540

The chief imports into the United Kingdom from Rumania in 1933 were (according to the Board of Trade Returns): Barley, 619,111*l.*; maize, 709,623*l.*; petroleum, 2,508,691*l.* The chief exports from the United King-

dom to Rumania were, cotton piece goods, 387,614*l.*; cotton yarns, 739,313*l.*; woollen and worsted yarns, 230,391*l.*

Total trade between Rumania and United Kingdom for five years (Board of Trade Returns) in sterling :—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Rumania to U. Kingdom .	4,726,165	3,412,441	3,449,755	4,159,577	3,424,664
Exports to Rumania from U. Kingdom .	1,946,963	1,333,342	1,757,028	2,385.194	2,679 055
Re-exports to Rumania from U.K. .	38,757	29,066	32,198	57,022	80,207

Shipping and Communications.

The European Commission of the Danube, called into being in 1856, consisted before the war of 8 delegates, one representing each of the following Powers : Austria-Hungary, France, Germany, Great Britain, Italy, Rumania, Russia, and Turkey. By Article 346 of the Treaty of Versailles, only representatives of Great Britain, France, Italy and Rumania constitute the Commission at present. It has its seat at Galatz. Since November 24, 1904, it has existed, or will exist, for successive periods of 3 years unless denounced by one of the contracting Powers a year before the conclusion of any such period. By the operations of the Commission the Danube below Braila and along the Sulina branch has been deepened and corrected, so that at Sulina the depth has been increased from 9 ft. to 24 ft., and of the Sulina branch the minimum depth has been increased from 8 ft. to 18½ ft., while by canalisation and other works the navigation has been shortened from 45½ to 33¾ nautical miles. The income of the Commission is derived entirely from taxes levied on shipping leaving the river. Receipts in 1932, 7,759,478 gold francs ; expenditure 6,296,634 gold francs. The Commission has its own flag.

The tonnage cleared from the Danube ports in 1933 was 1,445,484 tons, and at Constanza, 1,349 vessels of 3,812,169 tons.

Railway history in Rumania commenced in 1860. All the main railway lines are owned and operated by the State, but there are also several privately owned lines, mainly in Transylvania. The length of Rumanian State Railways in 1933 was 6,947 miles. The quantity of freight carried in 1933 was 20,442,419 metric tons ; number of passengers, 24,217,674 ; gross receipts, 7,737,124,000 leï. The State has a commercial navigation service on the Danube and Black Sea.

Within Rumania there were 8,101 miles of national roads in 1933, 19,279 miles of departmental roads, 51,796 miles of commercial roads, making a total of 79,176 miles of roads.

The Compagnie Internationale de Navigation Aerienne runs a daily air service from April to October between Paris, Bucharest and Constantinople.

The reorganisation of the post-office under an autonomous regime took place on August 3, 1929, in accordance with the Law for the Commercialisation of State Enterprises. In 1933, 304,741,954 ordinary letters were handled by the post-office, of which 260,844,687 were inland letters and 43,897,267 foreign. In 1933 there were 42,373 miles of telegraph wire and cable. The number of telegrams sent was 4,033,242. In 1933 Rumania had 117,197 miles of urban system telephone lines in Bucharest only, and 45,137 miles of inter-urban system. The number of urban telephone conversations was 183,000,000, and the inter-urban ones, 3,645,818. Number of international conversations, 292,555. A concession of the public telephone system for a minimum period of 20 years was granted to the International Telephone and Telegraph Corporation of New York in July, 1930, and a Rumanian company called S. A. de Telefoane was formed and took over the whole of the system on January 1, 1931.

A radio station at Baneasa was completed in 1929.

Banking, Money, Weights, and Measures.

The National Bank of Rumania on December 31, 1934, had, gold and gold exchange 10,376,137,000 leï, notes in circulation 22,306,939,000 leï, discounts 5,960,895,000 leï. The privilege of the National Bank to issue currency notes was prolonged to December 31, 1960, according to a convention signed in May, 1925. The capital of the bank was at the same time raised to 600 million leï. Other public credit institutions are a Savings Bank, a Deposit and Consignment Bank, an Agricultural Loan Bank, a Rural *Crédit Foncier*, 2 Urban *Crédit Fonciers* (at Bucharest and Jassi), an Agricultural Bank, and a *Cassa Rurala*, an institution whose purpose is to buy properties and sell them in lots to peasants. There are also three private banking institutions. On December 31, 1929, there were 1,097 banks in Rumania with a paid-up capital of 11,180,000,000 leï; their assets and liabilities balanced at 122,835,000,000 leï.

A unified paper currency came into use for the whole of Rumania on August 1, 1920.

The metric system for weights and measures was introduced into Rumania in 1876. The unit of the monetary system was made the *leu* (of 100 *bani*), equivalent to the franc. Silver is legal tender up to 50 leï only. The gold coins of 20-, 10-, and 5-leï which were formerly in circulation have been withdrawn since the stabilization of the currency on February 8, 1929. The value of the leu was fixed at 10 milligrammes gold (·900 fine), which is equal to 813·588 to the £ sterling. Nickel is coined in 5-, 10-, and 20-centime (bani) pieces.

Diplomatic and Consular Representatives.

1. Of Rumania in Great Britain.

Minister Plenipotentiary.—C. M. Laptew.
Counsellors.—Grégoire G. Constantinescu and D. Buzdugan.
Military and Naval Attaché.—Commander Gheorghe Niculescu.
Air Attaché.—Major Ermil Gheorghiu.

2. Of Great Britain in Rumania.

Envoy and Minister.—Sir R. H. Hoare, K.C.M.G. (appointed February 1, 1935).
First Secretary.—J. D. Greenway.
Third Secretary.—J. E. Coulson.
Commercial Secretary.—A. A. Adams.
Naval Attaché.—Capt. H. Pott, M.V.O., R.N.
Military Attaché.—Lt.-Col. G. F. Connal-Rowan.
Consul-General at Galatz.—C. H. A. Marriott.

There are consular representatives at Galatz (Consul-General), Cluj and Temisoara (Consuls), Bucharest, Braila, Galatz, Sulina and Constanza (Vice-Consuls). There are Rumanian Consuls at Birmingham, Bradford, Cardiff, Newport, Hull, Liverpool, London, Manchester, Newcastle, Cork and Glasgow.

UNION OF SOCIALIST SOVIET REPUBLICS

(RUSSIA.)

ON March 12, 1917, a revolution broke out in Russia, as a result of which the Emperor Nicholas II abdicated. A Provisional Government under Prince George Lvoff was set up by the Duma, which held office until May 16, 1917, when it was reorganised. On August 6, 1917, a new Cabinet under M. Alexander Kerensky was formed. This too was reorganised on October 8, 1917, and maintained itself until November 7, 1917, when the Military Revolutionary Committee of the Petrograd Soviet seized the government authority, and handed it over the next day to the All-Russian Congress of Soviets.

The Constitution of the new State was adopted at the fifth All-Russian Congress of Soviets, on July 10, 1918, and additions or alterations were made at subsequent Soviet Congresses (December, 1920–23). On December 30, 1922, delegates from the four principal Soviet Republics met at Moscow and concluded a Treaty of Union, setting up a Union of Socialist Soviet Republics, covering Russia (R.S.F.S.R.), Ukraine (U.S.S.R.), White Russia (W.R.S.S.R.), and the Transcaucasian Federation (T.S.F.S.R.). In September, 1924, the Uzbek S.S.R. and the Turkoman S.S.R. were formed and joined the Union. On December 5, 1929, the seventh Republic, that of Tajikistan was formed. The Constitution of the Union was ratified by the Second Union Congress of Soviets, which met in January and February, 1924.

The Government of the Union consists of a Union Central Executive Committee and a Union Council of People's Commissars. The former is elected by the Union Congress of Soviets, the supreme authority of the Union, and between Congresses is the sovereign legislative, administrative, and judicial authority of the Union. It is convened three times a year, and consists of two chambers—the Union Council, since March, 1931, consisting of 472 members elected on the principle of proportional representation of the seven constituent Republics, and the Council of Nationalities, since March, 1931, of 138 members, elected on the basis of 5 members for every independent and autonomous republic, and 1 member for every autonomous region. All legislation must be adopted by both chambers. The Presidium, or Standing Committee, which transacts current business, is composed of 27 members, 9 from each chamber and 9 elected at a joint meeting.

Chairmen of the Union Central Executive Committee.—MM. Kalinin (R.S.F.S.R.), Petrovsky (Ukraine), Cherviakov (White Russia), Musabekov (Transcaucasia), Aitakov (Turkoman S.S.R.), Faizula-Khodzhaev (Uzbek S.S.R.), Rakhimbaev (Tajik S.S.R.).

Subordinate legislative and executive authority is vested in the Union Council of People's Commissars, or Cabinet. Each People's Commissary is, since March, 1934, assisted by a maximum of two deputies and a council which meets at intervals. Decisions of the Union Council of People's Commissars may be revised by the Presidium of the Union Central Executive Committee. During the periods between the Sessions of the Central Executive Committee and those of the Congresses of the Soviets, the Presidium of the Central Executive Committee is the sovereign authority of the Union and, in accordance with Article 1 of the Constitution, it has among other rights the prerogative of carrying on diplomatic negotiations, of concluding political and other treaties with other Powers, of altering the external frontiers of the Union, of declaring war and concluding peace, and

of ratifying international treaties. The Council of People's Commissars is also responsible to the full Central Executive Committee and to the Union Congress of Soviets, to which it makes a report as a whole, in addition to the departmental reports.

The following is the constitution of the Union Council of People's Commissars (March, 1935):—

President.—V. M. *Molotov.*
Vice-Presidents.—J. E. *Rudzutak*, V. J. *Chubar.*
Foreign Affairs.—M. M. *Litvinov.*
Defence.—K. E. *Voroshilov.*
Local Industries.—A. I. *Mikoyan.*
Food Industry.—A. I. *Mikoyan.*
Food Distribution.—I. *Wartzer.*
Foreign Trade.—A. *Rosenholz.*
Agriculture.—M. A. *Chernov.*
Land Transport.—L. M. *Kaganovitch.*
Water Transport.—P. I. *Pakhomov.*
Communications.—A. I. *Rykov.*
Heavy Industry.—G. K. *Ordjonikidse.*
Light Industry.—I. E. *Liubimov.*
Timber Industry.—S. *Lobov.*
State Farms.—M. I. *Kolmanovich.*
Finance.—G. F. *Grinko.*
President of the State Planning Commission.—V. I. *Mezhlauk.*
Home Affairs.—G. G. *Jagooda.*

In addition, the Procureur-General of the Republic enters the Council with a consultative voice.

In 1934 the Workers' and Peasants' Inspection was abolished, and in its place were instituted two commissions—the Commission of Soviet Control (under the Council of People's Commissars of the U.S.S.R.), and the Commission of Party Control (under the Central Committee of the Communist Party of the U.S.S.R.).

The Commission of Execution was abolished with the institution of the Commission of Soviet Control. As a step towards decentralization the Supreme Economic Council was reorganized in January, 1932, into the three commissariats of Heavy Industry, Light Industry, and Timber Industry.

Each of the seven constituent States of the Union—R.S.F.S.R., Ukraine, White Russia, Transcaucasia, Uzbekistan, Turkmenistan, and Tajikistan—retains its own Central Executive Committee and Council of People's Commissars. Certain of the departments mentioned above are the exclusive prerogative of the Union Government. Others exist both in the Union Government and in the individual Republics, and a number exist only in the individual Republics.

The British Government recognised the Government of the U.S.S.R. *de jure* on February 1, 1924.

Sovereignty in the Soviet Union derives from the Communist Party. The divisions of the Party correspond to the territorial divisions of the State. Local Conferences of the Party Members elect delegates to Provincial Conferences and the Provincial Conferences send delegates to the Soviet Union Party Conference, which elects the Central Executive Committee of the Party. The Central Executive Committee is not in permanent session, but elects for the general management of its affairs a Secretariat consisting of 4 members, of which one is the General Secretary. This General Secretary is actually the leader of the Communist Party.

The Central Executive Committee elects sub-committee (bureaux) which deal with the various aspects of Party work, *e.g.* Political Bureau (Politbureau), the Organization Bureau (Orgbureau) and other bureaux. These bureaux work under the direction of the Secretariat. All appointments to the posts of People's Commissars or posts of equal importance are settled by the Politbureau.

The Secretariat is organized in sections corresponding to the Commissariats, every section of the Party Secretariat directing the corresponding Soviet State Commissariat. All legislation and all foreign negotiations, though formally carried through by the State administration (Soviet line), is either initiated or preliminarily passed by the Secretariat of the Party (Party line). Every organ of State Administration is practically always headed by a Party Member, but it also contains a nucleus of Party Members who receive instructions not only from their Soviet Chief (the official head of the organ), but also from their Party Chiefs.

The local administration is carried on by the local Soviets, but in every locality there is also a Communist Group, whose secretary controls the Soviet administration and who receives his own instructions from the superior organs of the Party.

In every factory, in every *colkhoz* (collective farm), there is a Communist cell which watches the technical administration of the factory or the *colkhoz*, and which is in contact with the other organs of the Communist Party. In this way the members of the Party distributed over the whole mechanism of the State system represent the controlling power which drives the State machine in the direction required by the General Secretary of the Communist Party along the so-called 'General Party Line.' The purity of the Party policy and strict discipline are maintained by means of a special Party Code of Regulations and by systematic purges.

General Secretary of the Party.—Joseph Vissarionovitch Stalin.

The three other members.—A. A. Andriev, Postyshev and Zhdanov.

Politbureau.—Stalin, Molotov, Kaganovitch, Voroshilov, Kalinin, Orjonikidze, Andreiev, Kossior. Candidates: Mikoian, Tshubarj, Petrovsky, Postyshev, Rudzutak.

Orgbureau.—Stalin, Zhdanov, Yezhov, Shvernik, Kossarev, Stezky, Gamarnik. Candidates: Krinitsky, M. Kaganovitch.

Constitution and Government of the R.S.F.S.R. (Russia Proper).

The greater part of the former Russian Empire is under the rule of the Soviet Government. But a number of States have gradually evolved and are maintaining themselves on the borders of the old Empire. Five have received formal recognition by the Western Powers, viz., Finland, Poland, Estonia, Latvia, and Lithuania. A number of other independent Republics, which have adopted the Soviet form of Government, are federated with the Government of Russia. These include: White Russia, the Ukraine, the Uzbek, Turcoman and Tajik S.S. Republics, Armenia, Georgia, Azerbaijan. (The last three constitute the Transcaucasian Federal Soviet Republic.) All the remaining territory of the former Russian Empire constitutes the Russian Socialist Federal Soviet Republic (R.S.F.S.R.). This contains the provinces of Russia proper, autonomous republics (Kirghiz, Tartar, Bashkir, Dagestan, Yakutsk, Crimean, Karelian, German on the Volga, Chuvash, Buriat-Mongol, Kazak, Mordvinian (1935), and the Kara-Kalpak), and autonomous regions or areas (Komi, Mariiskaia, Votiak, Kalmyk, Karatchayev, Kabardino-Balkarsk, Northern Osetian, Checheno-Ingushsk, Adygeisk, Oiratsk,

etc.). The autonomous republics are governed by their own Central Executive Committee and Council of People's Commissaries: the regions and areas are governed by executive committees elected by the local Congress of Soviets.

So far as the Russian Socialist Federal Soviet Republic is concerned, a Constitution was adopted by the fifth All-Russian Soviet Congress, the text of which was published on July 19, 1918, and subsequently amplified, 1919–1925, and this remains the constitutional model for the other States of the Union. According to the Constitution, which has been declared a 'fundamental law' of the Republic, Russia is a Republic of Soviets (Councils) of Workers', Soldiers', and Peasants' Deputies; and all central and local authority is vested in these Soviets. Private property in land is abolished, all land being the common property of the people; all forests, mines, waters having a national importance and all livestock and fixtures, model estates and agricultural concerns are national property. The State owns all factories, mines, railways, and other means of production and transport, but may lease them to private individuals, corporations, or State trusts.

The R.S.F.S.R. is a free Socialist community of all the labouring masses of Russia. Freedom of conscience, of opinion, of the Press, and of meeting is provided by the Constitution. In order to protect the conquests of the Revolution, universal military service is incumbent on all citizens. The privilege of defending the Revolution with arms is, however, reserved for the labouring classes only; the non-labouring sections of the population will discharge other military duties. The political rights of Russian citizenship will be granted without any formalities to foreigners residing on the territory of the Russian Republic for purposes of labour.

The highest authority in the State is the All-Russian Congress of Soviets, which consists of representatives of town Soviets on the basis of one delegate for every 25,000 electors, and of Regional Congresses of Soviets on the basis of one delegate for every 125,000 inhabitants. The Congress elects an All-Russian Central Executive Committee, consisting of 400 members, which constitute the supreme legislative, administrative, and controlling body in the Republic, and meets not less frequently than once in four months, current affairs being administered by a Standing Committee (Presidium). The Central Executive Committee also forms a Council of People's Commissars for the general administration of the affairs of the Republic, to consist of 11 People's Commissariats and the Chairman of the Council of People's Commissars.

At the seventh All-Russian Congress of Soviets, on February 6, 1935, it was decided to appoint a Constitutional Commission to work out a scheme for certain constitutional changes, including the introduction of secret ballot (instead of voting by show of hands), introducing direct election and removing the disparity between the representation of town and country in the All-Russian Congress.

The franchise is enjoyed irrespective of religion, nationality, residence, sex, etc., by all citizens over 18 years of age who earn their livelihood by productive labour, and soldiers and sailors (including the commanders) in the Red Army and Navy.

The following classes are deprived of the franchise: Those employing others for profit, or living on unearned income, monks and priests of all religions, agents and employees of the former police, secret service, etc., members of the former reigning dynasty, imbeciles and wards, and persons deprived of civic rights by the criminal courts.

In accordance with the latest decrees, however, persons employing hired labour, or enjoying unearned incomes or engaged in trade, may be granted the right to vote by the regional election commissions, providing they can

present a certificate from the local factory workshop committee, a local working peasant organisation, or local trade union committee, testifying that at the time of the election the given individual lives on an income derived from his own labour and does not exploit the labour of others.

Individuals engaged in agriculture and employing hired labour within the limits specified in the agricultural codes of the Constituent Republics of the Union are not deprived of their vote if they are otherwise eligible. Similarly the vote is enjoyed by people who are in receipt of interest from deposits in workers' savings banks, or from Government or municipal loan scrip, providing they are otherwise eligible.

Provision is also made in the Constitution for local government by means of local Soviets in villages and towns, with district and regional Congresses, which meet annually. Each Congress elects an Executive Committee, which administers the territory under its control until the next Congress.

Chairman of A.R.C.E.C.—M. *Kalinin.*
Secretary.—A. *Kiselev.*
R.S.F.S.R. Council of People's Commissars.

Chairman.—D. *Sulimov.*
Agriculture.—N. V. *Lisitzyn.*
Finance.—V. N. *Yakovlev.*
Justice.—N. *Krylenko.*
Education.—A. S. *Bubnov.*
Health.—Gregor *Kaminski.*
Social Welfare.—I. A. *Nagovitzyn.*
Light Industry.—K. K. *Stryevsky.*
Municipal Economy.—N. P. *Komarov.*
State Planning Commission.—M. I. *Rogoff.*
Home Trade.—L. M. *Khinchuk.*
Local Industry.—K. *Ukhanov.*

Attached to the Government of the R.S.F.S.R. is a delegate from the Commissariat of Home Affairs of the U.S.S.R.

Area and Population

Progress and Present Condition.

The total area of the Soviet Union in 1927 was given as 21,352,572 sq. kilometres, or 8,241,921 square miles. On January 1, 1933, the population of the U.S.S.R. was estimated at 165,778,400. Figures of population and area are as follows (capitals in brackets) :—

Constituent Republics of the Union	Area in Sq. Miles (Jan. 1, 1927)	Total Population (Jan. 1, 1933)
R.S.F.S.R. (Moscow)	7,626,717	113,650,900
Ukrainian S.S.R. (Kiev)	174,201	31,901,400
White Russian S.S.R (Minsk)	48,751	5,439,400
Transcaucasian S.F.S.R (Tiflis)	71,255	7,110,800
Uzbek S.S.R. (Tashkent)	74,786	5,044,800
Turkoman S.S.R. (Ashkhabad)	189,603	1,268,900
Tajik S.S.R. (Stalinabad)	56,608	1,332,700
Total	8,241,921	165,778,400

On January 1, 1933, the populations of the Transcaucasian S.F.S.R. were estimated as follows:—Georgia, 3,110,600; Armenia, 1,109,200; and Azerbaijan, 2,891,000.

The following table shows the growth of the population in the U.S.S.R. during the last 35 years :—

Year	Population	Year	Population
1897	106,432,300	1928	150,426,800
1914	139,312,700	1931	160,430,300
1918	142,579,900	1932	163,166,100
1926	147,027,900		

The R.S.F.S.R. contains 13 autonomous Republics and 14 autonomous regions. The Ukraine contains 1 autonomous Republic (Moldavia). The 12 autonomous Republics of the R.S.F.S.R. are shown as follows (the capitals are in brackets):—

Autonomous Republics

Bashkir (Ufa), March 24, 1919
Tartar (Kazan), May 27, 1920
Kirghiz (Frunze), February, 1926
Dagestan (Makhach-Kala), Jan. 20, 1921
Crimean (Simferopol), October 18, 1921
Yakutsk (Yakutsk), April 20, 1922
Karelian (Petrozavodsk), July 27, 1923
Chuvash (Cheboksara), April 21, 1925
German Republic on the Volga (Engels), J'ly 19, 1923
Buriat-Mongol (Verkhneudinsk), June 4, 1923
Kazak (Alma-Ata), October 14, 1924
Kara-Kalpak (Turtkul), 1933
Mordvinian (February, 1935)

The principal towns of the U.S.S.R. with their estimated population on January 1, 1933 (within the limits of the town boundaries), are:—

Moscow	3,663,300	Nikolaiev	141,400	Chita	81,900
Leningrad[1]	2,776,400	Tomsk	128,400	Sebastopol	78,300
Baku	709,500	Izhevsk	127,700	Kramotorskaya	78,000
Kharkov	654,300	Vitebsk	127,300	Orekhovo-zuyevo	77,700
Kiev	538,600	Nizhny Tagil	126,000	Serpukhov	77,500
Rostov-on-Don	520,700	Gomel	121,200	Ulyanovsk	73,700
Odessa	497,000	Semipalatinsk	120,200	Zhitomir	73,300
Tashkent	491,000	Lugansk	119,400	Vinnitza	72,800
Gorky[2]	451,500	Penza	119,000	Vologda	72 400
Tiflis	405,900	Prokopievsk	117,000	Kutais	70,100
Sverdlovsk	400,800	Kamenskoye	115,000	Krivoi Rog	70,000
Stalingrad	388,000	Ordjonikidze	113,200	Molotovo	68,900
Dnieperpetrovsk	379,200	Erivan	111,500	Kremenchug	68,700
Saratov	327,500	Barnaul	109,200	Briansk	67,000
Stalino (Yuzovka)	285,500	Kemerovo	106,500	Kerch	66,700
Novosibirsk	278,000	Smolensk	104,100	Leninsk-Kuznetski	66,300
Kuibishev (Samara)	259,100	Kursk	102,500	Michurinsk (formerly Kozlov)	65,900
Kazan	258,700	Tambov	101,700	Leninakan	65,800
Omsk	227,000	Krasnoyarsk	101,500	Kadievka	65,700
Astrakhan	225,400	Novorossisk	100,100	Noginsk	64,800
Krasnodar	218,900	Anjero-Sudjensk	100,000	Bobruisk	64,800
Voronezh	212,400	Makeevka	99,500	Syzran	64,400
Cheliabinsk	210,000	Poltava	98,600	Blagoveshchensk	63,500
Grozny	201,000	Simferopol	98,600	Kabakovsk	62,400
Stalinsk	199,800	Andijan	97,700	Voroshilov	61,500
Tula	199,500	Zlatoust	94,100	Stavropol-Kavkazky	61,400
Archangel	194,300	Rykovo (formerly Enakievo)	91,900	Kaluga	60,600
Zaporozhie	192,400	Orel	91,300	Nikolsk-Ussuriisk	60,000
Vladivostok	190,000	Hamangan	90,900	Piatigorsk	60,000
Ivanova-Voznesensk	188,500	Kostroma	90,700	Margelan	58,800
Minsk	180,900	Zinovievsk	90,600	Volsk	57,000
Perm	170,500	Shakhty	90,500	Gorlovka	57,000
Ufa	167,900	Armavir	90,200	Krasni Luch	55,000
Yaroslavl	167,300	Rybinsk	86,700	Maikop	53,100
Irkutsk	158,500	Novocherkassk	86,200	Berdichev	53,100
Magnitogorsk	155,000	Viatka	85,600	Pskov	52,600
Samarkand	154,600	Kokand	84,700	Chistiakovo	52,400
Marinpol	152,800	Konstantinovka	84,200	Eletz	52,300
Torganrog	149,500	Gandja	84,000	Artemovsk	52,000
Kalinin[3]	145,000	Kherson	82,900		
Orenburg	144,600				

[1] The new designation of Petrograd (March, 1924).
[2] Formerly Nizhni Novgorod. [3] Formerly Tver.

During the period of the first five year plan a number of new towns came into existence in the new industrial regions. These include Magnitogorsk, Berezniki, Krasnouralsk (in the Urals), Novoye Zaporozhe (in the Ukraine), Anjero-Sudjeansk, Stalinsk, Prokopievsk, Kemerevo (in West Siberia), Cheremkhovo, Igarka (in East Siberia), Karaganda, Kaunrad (in Kazakstan), Khibinogorsk (in the Leningrad region, in the arctic circle), Kandalaksha (in Karelia), Stalinogorsk (in the Moscow region) and others. Some of them, *e.g.*, Magnitogorsk, Prokopievsk, Novoye Zaporozhe have populations numbering over 100,000.

Religion.

By decree of Jan. 23, 1918, the Soviet Government disestablished the Church and appropriated certain categories of its property. From the time of the Revolution of March, 1917, till May, 1929, all religions might be freely professed in the Union. In May, 1929, a decree was issued which altered several paragraphs of the Constitution of the R.S.F.S.R. Paragraph 4 of the constitution of the R.S.F.S.R. in the new text reads as follows: 'With the aim of ensuring real freedom of conscience for the workers, the church is separated from the State and the school from the church, and freedom of religious worship and anti-religious propaganda is permitted to all citizens.' Before the revolution the prevailing religion of the country was the Græco-Russian, officially called the Orthodox Faith.

It is estimated that there are more than 12,000,000 dissenters in Great Russia alone. Roman Catholics are most numerous in the former Polish Provinces, Lutherans in those of the Baltic, and Mohammedans in Eastern and Southern Russia, while the Jews are almost entirely settled in the towns and larger villages of the western and south-western provinces. The Soviet authorities are now endeavouring to settle Jews who have lost their business or occupation as a result of the wars and revolution on the land—particularly in the Crimea and in the Ukraine. For colonizing Jews in the Far East the Soviet Government in 1928 allotted an area of 20,000 sq. kilometres in the district of Byro-Bidjan (the Jewish Autonomous Territory of the Far East). In 1924, 76,000 Jews were engaged in agriculture; in 1927, 165,000; in 1931, 300,000.

Education.

Education in the Union of Socialist Soviet Republics is conducted by the Commissariats for Education of the constituent and autonomous Republics of the Union. With regard to the autonomous republics, the higher educational institutions and also the scientific institutions situated in their territory are subordinated to the Commissariat for Education of the particular Federal Republic of which they form an autonomous part.

Education is obligatory, and certain classes of private schools (under State control) are permitted. In the school year 1932–33, 98 per cent. of the children in the U.S.S.R. (from 8 to 17) were educated in the primary schools. Co-education has been adopted in all schools. Since January, 1934, three types of schools are in existence—these with a four-year, a seven-year and a ten-year curriculum respectively. Technical work is conducted as a part of the general industrial life of the country. School education is becoming increasingly technical in the U.S.S.R.

At the beginning of 1933, instruction in the U.S.S.R. was being given as follows:—In the primary schools, to 18,754,000 children; in the secondary schools, to 4,359,000 children; in the technical schools, to 949,000 children; in the factory schools, to 1,177,000 children; in the workers' faculties, to

444,000 students; and in the higher educational institutions (universities, technical colleges, etc.), to 501,000 students.

Previous to the Revolution universities existed in the following places in the territory now included in the R.S.F.S.R. and administered by the People's Commissariat for Education: Moscow (2), Leningrad, Kazan, Saratov, Tomsk, Perm, Irkutsk. The Universities of Dorpat and Warsaw, evacuated during the war, were reorganised in 1918 as the Voronezh and Don Universities, and in the same year another was set up at Nizhni-novgorod (Gorky). Other universities are at Vladivostok, Sverdlovsk, Kazakstan (Alma-Ata), Kiev, Dniepropetrovsk, Kharkov, Odessa, Stalinsk (in the town of Stalin in the Ukraine), Georgian State University (in Tiflis), the Central Asiatic State University (in Tashkent), and the White Russian State University (in Minsk).

Justice and Crime.

The basis of the Judiciary System is the same throughout the whole of the Soviet Union, but the Constituent Republics have the right to introduce modifications and to make their own rules for the application of the code of laws. The Supreme Court of the U.S.S.R. is the chief Court and supervising organ for all Constituent Republics.

In accordance with the declaration by the Central Executive Committee of the U.S.S.R. on October 29, 1924, the fundamental objects of the judiciary system of the U.S.S.R. are to safeguard the conquest of the proletarian revolution and to protect the workers' and peasants' government and the laws laid down by the latter.

In the main, there is very little difference between the code of laws and their application in the separate republics. The legal system of the R.S.F.S.R., therefore, can be taken as an example of that in force in all the other Republics of the Union.

The Law Courts of the R.S.F.S.R. are divided into People's Courts and Special Courts. The People's Courts consist of the People's Judge and two Assessors, and their function is to examine as the First Instance, most of the civil and criminal cases, except the more important ones, some of which are tried at the Regional Court, and those of the highest importance at the Supreme Court. The Regional Courts supervise the activities of the People's Courts and also act as Courts of Appeal from the decisions of the People's Court. The Supreme Court exercises supervision over all the Courts of the Republic, and forms an Appeal Court from the Regional Court.

The Judges of the People's Courts and the Presidents and Members of the Regional Courts are selected for one year by the Regional Executive Committee, from individuals who enjoy electoral rights and who have the necessary qualifications with regard to their public or legal work.

The People's Assessors are called upon for duty for six days in a year from lists of electors drawn up in the rural districts, industrial enterprises and army corps. The People's Assessors for the Regional Court must have had at least two years' experience in public or trade union work. The list of Assessors for the Supreme Court is drawn up by the Central Executive Committee of the Republic.

In addition to the People's Courts there are the following Special Courts:—(1) the Labour Section of the People's Court, whose duty it is to supervise the regulations relating to the working conditions and the protection of labour as well as to give decisions on conflicts arising between employers and employees, the violation of regulations; (2) Rural Commissions, which settle disputes concerning agrarian matters, such as claims relating to

the use of the land, etc.; (3) Arbitration Committees, which settle disputes arising between separate State organs concerning property rights, with certain exceptions; (4) Military Tribunals, which deal with military offences, espionage, and other classes of crime, when there is no other Law Court on the spot but a military tribunal; (5) Disciplinary Courts, which deal with offences and neglect of official duties committed by members of the Central Executive Committee and similar State organs.

The People's Commissary for Justice is the State Chief Prosecutor, and in every region and district there is a Regional Prosecutor who is immediately subordinate to the Chief Public Prosecutor of the Republics. The duties of the Public Prosecutors are the supervision of the correct application of the law by all State organs.

Finance.

The revenue and expenditure for five years are shown as follows (in millions of roubles):—

	1931	1932	1933	1934[1]	1935[1]
Revenue . . .	21,425·6	31,031·0	39,074·6	48,879·4	65,900·5
Expenditure . .	20,710·3	30,740·4	38,959·2	48,879·4	65,400·5

[1] Estimates.

The budget estimates for 1935 were as follows:—

Revenue	Millions of roubles	Expenditure	Millions of roubles
Turnover Tax	52,025·7	Investments in National Economy	35,156·8
Deductions from Profits . .	1,725·7	Education	3,734·2
Income Tax and other Revenue from Enterprises . . .	699·1	Health	996·0
Revenue from State Social and Health Insurance . . .	1,758·3	Physical Culture . . .	19·6
Interest on Investments . .	865·0	Social and Labour Insurance .	54·4
Other Revenue from Socialised Economy	16·3	National Defence . . .	6,500·0
Resources of the Population .	5,732·7	People's Commissariat for Internal Affairs . .	1,652·5
Other Income	777·5	Administration of National Economy, Social and Cultural Work	886·1
Revaluation of Raw Materials on January 1st, 1935 . . .	2,300·0	Expenditure on State Loans .	1,815·0
		Advance to Republican and Local Budgets . . .	8,977·2
		State Bank	922·0
		State Insurance . . .	33·0
		Government Reserve Fund .	1,962·5
		Other Funds	225·9
		Advance to the Agricultural Bank for Loans to Collective Farms	95·0
		Advance to the State Bank to Increase its Reserves . .	2,300·0
Grand Total . . .	65,900·5	Total . . .	65,400·5

On September 1, 1917, the total indebtedness of Russia amounted to 32,300 million roubles, made up as follows:—Pre-war debt, 8,800 million roubles; seven internal war loans, 10,500 million roubles; loans contracted abroad, 8,000 million roubles; short-dated loans, 5,000 million roubles. According to an estimate made in 1924 the foreign loan was then reckoned at 15,853 million roubles. On March 31, 1933, the indebtedness of Russia

to Great Britain was £1,058,973,000 (including interest since December 31, 1918). All these debts were cancelled by decree of January 28, 1918. The debt to the United States is 800 million dollars—250 million for war purchases, 150 million for former private loans, and 400 million advances by private American industrialists to the Soviet Government.

On January 1, 1933, the internal debt was 10,088,900,000 roubles.

Defence.

I. Army.

The military system of the Union of Socialist Soviet Republics was reorganized in 1925.

The Red Army is now organized on a basis of universal military service. Service is divided into (a) preparatory; (b) service with the colours; (c) reserve service. Preparatory training is on a militia basis and begins at the age of 19: it consists of a preliminary course of 96 hours, lasting 1½ months, and a supplementary course of 280 hours, lasting 28 days, the whole spread over 2 years. The average number of men called up each year is 1,200,000. Of these 400,000 are freed from military service. Of the remaining 800,000, 260,000 go to regimental cadres; 200,000 are trained for territorial formations; and 340,000 are given extra-military training.

The whole territory of the U.S.S.R. is divided, for the purposes of the Army, into 11 military districts.

The Red Army is organized in 23 infantry and 4 cavalry corps, comprising 26 infantry and 9 cavalry divisions. The infantry is composed of 83 regiments of 252 battalions and the cavalry of 61 regiments of 305 squadrons. There are besides 47 infantry territorial divisions and 5 cavalry territorial divisions.

On January 1, 1934, the total number of effectives was given as 562,000 (including 37,700 commanding *personnel* of middle and higher rank). Of these, 504,303 (including 30,354 of middle and higher rank) belonged to the land forces; 28,658 (including 4,946 of middle and higher rank) to the air forces; and 29,039 (including 2,397 of middle and higher rank) to the naval forces.

The formations organized on a military basis consisted of 28,150 Ogpu frontier guards, 17,240 Ogpu frontier troops stationed in the home country, and 13,200 escort troops. The land, sea and air forces possessed 1,100 aeroplanes.

Those on active service both in the Standing Army and the Territorial Forces, in the Navy, etc., whilst subject to the Rules and Regulations and Military Discipline, at the same time enjoy all the civic rights of Soviet citizens. The National Defence Budget for 1934 was 1,665,000,000 roubles.

II. Navy.

The proposed reconstruction of the Soviet Navy proceeds slowly, though it has been officially stated on more than one occasion that a complete reconstitution of the forces is contemplated. There are four battleships, the *Parizhskaia-Kommuna*, *Marat*, *Krasni Leningrad* and *Oktiabrskaia-Revolutsia*. All have been refitted or are in hand for that purpose. Last year it was reported that four 7,000-ton cruisers and four destroyers were to be ordered in France, but so far no contracts appear to have been signed.

State dockyards are at Nevsky, New Admiralty and Galernyi Ostrov, Leningrad; Kronstadt, Sevastopol, and Vladivostok. Guns were made at

the Putiloff steel works; 3 or 4 submarines are reported to be under construction at Leningrad, but otherwise very little work appears to be in hand.

The following table gives the principal ships at present in service. The former division into Baltic and Black Sea fleets may be considered to have lapsed, as ships now pass freely through the Dardanelles from one station to the other.

Date of Launch	Name	Displacement	Horse-power	Speed	Officers and Men	Main Armament
			Battleships.			
1911	*Oktiabrskaia-Revolutsia*, *Parizhskaia-Kommuna*, *Marat*, *Krasni Leningrad*	23,000	42,000	23	59—1,066	12 12in.; 16 4·7in.
	These ships are the former *Gangut*, *Sevastopol*, *Petropavlovsk*, and *Poltava*.					
			Cruisers.

There remain not more than 26 destroyers of any fighting value. The modern submarines are about 18 in number. More submarines have been reported to be building. There are also 3 gunboats, several mine-layers and mine-sweeping trawlers, motor-boats, and surveying and training ships. The flying service includes 50 or 60 planes. A small force is at Vladivostok. There is a flotilla on the Dnieper, and a small force is in the Caspian. There are no naval vessels of any importance in the White Sea.

The total budgetary expenditure for the Red Forces (land, naval, and air) in 1931 was estimated at 1,290,000,000 roubles. Naval personnel numbers 29,039 officers and men.

Production and Industry.

The Soviet Union, not long since predominantly agricultural in character, is becoming an industrial-agricultural country. In 1913 industrial production was 42·1 per cent. of the total, and agricultural production 57·9 per cent. In 1933 industrial production was 70 per cent., and agricultural production 30 per cent.

Forest land occupies 950,000,000 hectares (44 per cent. of total territory); pasture, 241,084,000 hectares (11 per cent.); arable land, 197,611,000 hectares (9 per cent.); grassland, 46,415,000 hectares (2 per cent.); gardens and orchards, 11,461,000 hectares (0·5 per cent.): non-agricultural land, 675,000,000 hectares (31 per cent.).

The total area under cultivation (including single-owner peasant farms, State farms and collective farms) was 128,000,000 hectares in 1930; 136,407,000 hectares in 1931, 134,400,000 hectares in 1932, and 129,700,000 hectares in 1933. The total area of the single-owner peasant farms (excluding the State farms and collective farms) was, for the years mentioned, in hectares, as follows:—1930, 86,000,000; 1931, 45,800,000; 1932, 29,400,000; 1933, 22,000,000 hectares.

The area cultivated by the collective farms in 1930–31 was 80,900,000 hectares, in 1932, 91,570,000 hectares, in 1933, 93,858,000 hectares.

The following table shows the acreage and yield of the principal crops for two years :—

Crop	Area (thousand hectares)		Harvest (decatons[2])	
	1932	1933	1932	1933
Rye	26,200	25,382·1	2,202,000	2,419,000
Wheat	34,600	33,270·9	2,025,000	2,773,000
Barley	6,800	7,256·8	503,000	785,000
Oats	15,400	16,632·7	1,124,000	1,541,000
Buckwheat	1,661·8	2,038 0	92,000	112,000
Millet	7,677·6	8,850·1	433,000	482,000
Maize	3,680·8	3,956·7	343,000	480,000
Potatoes[1]	6,111·4	—	7,312,000	5,080,000

[1] Excluding perished crops. [2] Decaton = 10 metric tons.

Principal industrial crops were as follows :—

Crop	Area (thousand hectares)		Harvest (decatons[2])	
	1932	1933	1932	1933
Flax	3,152·1	2,399	127,000	132,000
Hemp	944·3			
Sunflower	5,306·0	3,897	227,000	235,000
Sugar beet	1,535·9	1,321	656,000[1]	900,000[1]
Cotton	2,348·2	2,052	127,000[3]	132,000[3]

[1] Beet. [2] Decaton = 10 metric tons. [3] Raw cotton.

Tobacco was planted in 1932 on 98,800 acres, and makhorka (coarse tobacco) on 147,500 acres.

The number of animals (million heads) in the Soviet Union is shown as follows for five years :—

—	1930	1931	1932	1933	1934
Horses, of all kinds	30·2	26·2	19·6	16·6	15·6
Cattle	52·5	47·9	40·7	38·6	42·4
Sheep and Goats	108·3	77·7	52·1	50·6	51·9
Pigs	13·6	14·4	11·6	12·2	17·3

Of the whole of the forest land of the U.S.S.R., a large portion is administered and worked, or let out as concessions, by the State, and the other is granted for use to the peasantry free of charge, the latter being 72,900,000 acres in extent.

The Forest Lands of the U.S.S.R. are estimated to cover 2,310,000,000 acres, of which 1,984,547,500 acres are situated in the R.S.F.S.R. and 55,782,500 in the other constituent Republics of the Union. Of the total forest area, however, some 780,000,000 acres are in swamps or marshes. In European Russia there are 405 million acres of forest land, most of it being in the North, some in the Centre, but very little in the South.

A large proportion of the forest lands of the U.S.S.R. lies in Asiatic Russia (some 300,000,000 acres in extent) where, owing to the absence of roads, it is not accessible for working. But the exploitation of the timber resources of the Asiatic parts of the U.S.S.R. has been commenced in recent years, and the output is increasing from year to year. The forests of the Caucasus, on the other hand, are capable of furnishing the world's market with an inexhaustible supply of many valuable varieties of timber. A total of 18,600,000 acres in the Caucasus is covered by forest lands.

The Soviet Union is rich in minerals. The output of some of the principal ores was as follows:—Iron, 1932, 12,076,100 metric tons; 1933, 15,100,000 metric tons; manganese, 1933, 1,040,000 metric tons; copper, 1932, 1,210,000 metric tons; 1931, 1,168,400 metric tons.

The total gross output of coal in 1934 was 92,200,000 metric tons; in 1933, 76,335,000 tons. The output of pig-iron in 1934 was 10,400,000 tons, in 1933, 7,133,000 metric tons; of steel, 9,600,000 metric tons in 1934 and 6,852,000 metric tons in 1933.

The output of the State oil industry was as follows (in metric tons):—1932, 22,290,000; 1933, 22,501,000; 1934, 24,000,000. The quantities of oil refined in the country were (in metric tons):—1933, 18,511,700; 1932, 20,215,000, and exports, 1932, 6,010,000; 1933, 4,894,452.

The organization of industry in Soviet Russia is based on State ownership and control, and is administered in accordance with the Decree of April 10, 1923, and subsequent slight modifications, by State Trusts and Combines. The Trusts in the large scale and middle sized State industries number over 600, but there are 291 big Trusts and these cover about 80 per cent. of the total State industries. A small number of Trusts, called Monopoly Trusts, combine all the enterprises of a given branch of industry in the whole Union. Such are, for instance, the Rubber Trust, Silk Trust, Urals Asbestos Trust, etc. In some industries there are several trusts. Thus the Oil, Cement and a few other industries have four trusts each, but in the vast majority of industries in the Soviet Union there are a number of separate Trusts in the various parts of the Union.

The number of employees in the U.S.S.R. in 1932 was 22,804,000; in 1933, 22,009,000.

Commerce.

The foreign trade of the U.S.S.R. is organized as a state monopoly. Importation and exportation of goods are effected by special licences issued by the Commissariat for Foreign Trade and its respective departments in pursuance of a plan annually sanctioned by the Government. The right of purchasing goods for importation, and that of selling Russian exports abroad is vested in the Trade Delegations of the U.S.S.R. in foreign countries. By special decrees respective Government Departments select those State and co-operative organizations which are authorized, under the control of the Trade Delegation, to engage in foreign trade.

For the purpose of encouraging the participation of foreign capital in the foreign trade of the country there have been formed in the U.S.S.R. 'Mixed Companies' in which shares are held by the Soviet Government and foreign concerns. There are 18 export organizations, 12 import organizations, and 7 export and import organizations. The Co-operative Organizations which are granted the right of 'exit to the foreign markets' are Centrosoyus (Central Union of Co-operative Societies), Selskosoyus and several other organizations.

The following table gives the value of imports and exports for five years:—

Fiscal year[1]	Imports		Exports	
	Quantity (thousands of metric tons)	Value (millions of roubles)[1]	Quantity (thousands of metric tons)	Value (millions of roubles)
1929–30	2,762	1,068·7	18,870	1,002·2
1931	3,564·3	1,105	21,778·9	811·2
1932	2,322·1	704 4	17,967·9	574·9
1933	1,236·1	348·2	17,916·5	495·6
1934	—	232·4	—	420·2

[1] Fiscal year begins October 1.

Imports and exports in 1933 were as follows :—

Imports	Metric tons	1,000 roubles	Exports	Metric tons	1,000 roubles
Foodstuffs	93,099	15,642	I. Agricultural Exports :—		
Animals and animal products	81,103	28,598	1. Foodstuffs	1,937,118	70,338
Timber, plants, seeds	14,774	1,125	2. Animal products	74,418	28,207
Building materials of mineral origin	9,750	1,545	3. Produce of trappers and fisheries	39,942	44,683
Fuels, asphalt, tar, resin	48,510	6,915	Total	2,051,478	143,228
Chemicals	16,362	5,833			
Ores, metals, machinery	862,043	223,094	II. Industrial Exports :—		
Electrical and precision machinery	21,989	25,437	1. Timber and wood spirit	6,296,191	78,317
Paper, stationery, books	2,959	870	2. Food products	595,340	38,660
Textiles	85,487	38,823	3. Metallurgical products	8,468,682	101,636
Miscellaneous	42	334	4. Products of other industries	504,834	133,817
			Total	15,865,047	352,430
Total	1,236,118	348,216	Grand Total	17,916,525	495,658

Soviet foreign trade in 1933 was distributed by countries as follows (in thousands of roubles) :—

Country	Imports	Exports	Country	Imports	Exports
Afghanistan	5,623	7,066	India	2,935	3,421
Argentina	223	889	Italy	16,901	22,226
Australia	—	—	Japan	7,349	9,124
Austria	1,280	876	Latvia	336	2,395
Belgium	1,538	27,340	Lithuania	546	2,728
China	21,461	18,027	Luxemburg	1,026	296
China (Western)	—	—	Mongolia	17,269	38,562
Czechoslovakia	4,868	1,095	Norway	8,510	3,830
Denmark	1,725	9,350	Persia	8,359	12,008
Egypt	—	4,044	Poland	12,973	5,056
Estonia	373	1,959	Spain	1,192	5,581
Finland	2,888	5,426	Sweden	4,591	5,920
France	5,237	22,895	Switzerland	3,414	241
Germany	148,061	85,747	Tannu-Tuva	1,727	5,495
Great Britain	30,590	86,933	Turkey	4,657	3,798
Greece	517	6,545	United States	16,580	13,965
Holland	5,974	25,890	Uruguay	1,032	1,741

The chief articles of import from Russia into the United Kingdom and of export (domestic produce and manufactures) from the United Kingdom to Russia in 1933 were, according to the Board of Trade Returns:—Imports: Hides and skins, 1,145,757*l.*; butter, 1,618,077*l.*; flax, 837,237*l.*; wheat, 1,359,187*l.*; petroleum, 1,116,051*l.*; sawn timber, 3,703,288*l.*; pit props, 875,183*l.*: fish, 1,198,531*l.*; barley, 720,489*l.* Exports to Russia: Machinery, 1,832,930*l.*; rail vehicles and parts, 260,122*l.*; iron and steel, 432,728*l.*

Total trade between Russia and the United Kingdom in thousands of pounds for 5 years (Board of Trade Returns):—

—	1930	1931	1932	1933	1934
Imports from Russia into U. Kingdom . .	34,235	32,285	19,645	17,491	17,277
Exports to Russia from U. Kingdom . .	6,772	7,291	9,223	3,341	3,657
Re-exports to Russia from U. Kingdom . .	2,519	1,911	1,397	957	3,906

Shipping.

During the period of the Five Year Plan (1929–32) 81 ships of a total capacity of 249,000 tons were built in the U.S.S.R. and handed over for exploitation. The goods turnover at the seaports of the U.S.S.R. in 1932 was 50 million tons. Total of the merchant marine, July 1, 1934, 491 vessels of 942,259 gross tons.

During the first Five Year Plan (1929–32) there were built and handed over for exploitation to the river transport system of the U.S.S.R. 211 automatically propelled vessels of a total capacity of 48,505 H.P., and 227 vessels not automatically propelled of a total tonnage of 80 million tons.

Internal Communications.

There are 110,000 kilometres of navigable inland waterway in the Soviet Union. In 1931 a People's Commissariat of Water Transport was established to control sea and river transport.

The length of exploited railways of the U.S.S.R. in 1930 was 77,046 kilometres; in 1931, 80,900 kilometres; in 1932, 83,400 kilometres. At the end of 1933 the length of the electrified railways in the U.S.S.R. was 350 kilometres. The goods traffic on the Soviet railways was as follows: 1932, 267,000,000 tons; 1933, 271,000,000 tons; passenger traffic, 1932, 900,000,000 tons; 1933, 953,000,000 tons.

An agreement was reached in June, 1930, regarding a through railway freight service connecting Europe and Asia via the railways of the Soviet Union.

Civil Aviation only started in the U.S.S.R. in 1922. In 1933 the total length of the air lines in the U.S.S.R. was approximately 37,000 kilometres, as against 32,000 kilometres in 1932, the distance flown approximately 9,000,000 kilometres, the number of passengers transported 42,500, goods and mail carried over 3,400 tons.

Total number of letters and postcards handled (in millions):—

—	1931	1932
Letters of all kinds	1,213·7	1,392·1
Postcards	182·8	185·9
Including:—		
(*a*) Inland:		
Letters of all kinds	1,201·9	1,379·7
Postcards	181·1	184·0
(*b*) Foreign:		
Letters of all kinds sent abroad	11·8	12·4
Postcards	1·7	1·9
Received from abroad:		
Letters of all kinds	16·0	15·3
Postcards	1·4	1·0

The length of the telegraph and telephone lines in the U.S.S.R. in 1932 was 1,322·4 thousand kilometres; in 1933 it was 1,490·0 thousand kilometres. The number of telegrams handled was as follows: Inland, in 1932, 76 million; international, 0·4 million. The number of telephone calls in international communication in 1932 was 36 million.

Banking.

The State Bank began operations on November 16, 1921. The following is the statement of accounts of the Note Issuing Department of the State Bank on January 1, 1934:—

Assets.	Chervontsi	Liabilities.	Chervontsi
Metallic securities:—		Notes transferred to State	343,250,200
Gold (coin and bullion)	80,770,800	Balance to which notes can still be issued	20,249,600
Other precious metals (coin and bullion)	919,000		
Foreign currency	4,277,900		
Foreign drafts	286,400		
State Bank short-term bills	277,295,700		
Total	363,499,800	Total	363,499,800

Money, Weights and Measures

Money.

The monetary unit is the *Chervonetz*, equal to 10 roubles of the pre-revolution gold coinage. It contains 7·74234 grammes of fine gold. Up to November, 1931, the par of exchange with the pound sterling was officially fixed at 9·458 roubles. Thereafter, owing to the abandonment of the gold standard by Great Britain, it was fixed at from 7 r. 30 k. to 7 r. 40 k.

The currency in circulation is (1) Chervontsi notes in denominations of 1, 2, 3, 5, 10, 25 and 50, issued by the State Bank against gold cover, but inconvertible at present; (2) Treasury Notes in denominations of 1, 3, and 5 gold roubles; (3) silver coins: either bank silver (90 per cent. silver and 10 per cent. copper) in denominations of 1 rouble and 50 kopecks; or change silver (50 per cent. silver and 50 per cent. copper) in denominations of 20, 15, and 10 kopecks; (4) copper coins in denominations of 1, 2, 3, and 5 kopecks and half kopecks; (5) bronze coins in denominations of 1, 2, 3, and 5 kopecks. Owing to the scarcity of silver, nickel pieces (the first ever to be used in Russia) of 10, 15 and 20 kopecks were introduced in 1932.

Weights and Measures.

The metric system of weights and measures has been in use since January 1, 1927.

The old Russian weights and measures were as follows:—

1 *Verst* (500 *sazhens*) . .	= 3,500 ft., or two-thirds of a statute mile (0·662879).
1 *Sazhen* (3 *arshins*) . .	= 7 feet English.
1 *Arshin* (16 *vershoks*) . .	= 28 inches.
1 *Square verst* . . .	= 0·439408 square mile = 281·221 acres.
1 *Dessiatin*	= 2·69972 English acres.
1 *Pound* (96 *zolotniks* = 32 *lots*)	= $\frac{9}{10}$ of a pound English (0·90283 lb.).
1 *Pood* (40 *pounds*) . . .	= 36 lbs. English. = 0·32243578 cwt. = 0·016121789 ton.
1 *Vedro* (10 *shtoffs*) . .	= $2\frac{3}{4}$ imperial gallons (2·7056).
1 *Chetvert* (8 *chetveriks*) . .	= 5·7719 imperial bushels.

The Soviet Government issued a decree adopting the Gregorian Calendar as from February 14, 1918. A six-day week (five working days and one holiday for all) was adopted at the end of 1931.

Diplomatic Representatives.

1. Of Soviet Russia in Great Britain.

Ambassador.—Jean Maisky (appointed November 8, 1932).
Counsellors.—Samuel B. Cahan and George Astakhoff.
Military Attaché.—General Putna.
Press Attaché.—Serge Vinogradoff.
Attachés.—Dmitri Kotlov and Alex. Volchcoff.
Trade Representative.—Alexander Ozersky.

2. Of Great Britain in Soviet Russia.

Ambassador.—Lord Chilston, K.C.M.G. (appointed October 24, 1933).
Counsellor.—N. H. H. Charles, M.C.
Secretaries.—E. O. Coote and W. G. Hayter.
Military Attaché.—Colonel E. O. Skaife, O.B.E.
Air Attaché.—Wing-Commander A. C. Collier.
Commercial Secretary (*First Grade*).—G. P. Paton, C.B.E.

SOVIET CENTRAL ASIA.

Soviet Central Asia embraces the Uzbek Socialist Soviet Republic, the Turkoman Socialist Soviet Republic, the Tazhik Socialist Soviet Republic, the Kara-Kalpak Autonomous Socialist Soviet Republic, the Autonomous Republic of Kirghizia (Kara-Kirghizia) as well as the regions to the north of Tashkent, which are now included in the Autonomous Kazak Republic.

Turkestan was conquered by the Russians about 60 years ago. In 1866 Tashkent was occupied and in 1868 Samarkand, and subsequently further territory was conquered and united with Russian Turkestan. In the '70's Bokhara was subjugated, the Emir, by the agreement of 1873 recognizing the suzerainty of Russia. In the same year Khiva became a Vassal State to Russia. Until 1917, Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara, and the Governor-Generalship of Turkestan.

After the outbreak of the Revolution various political parties contended for power in Turkestan. In the summer of 1919 the authority of the Soviet Government became definitely established in these regions, and subsequently the native dynasties in Khiva and Bokhara were expelled. The Khan of Khiva was deposed in February, 1920, and a People's Soviet Republic was set up, the mediæval name of Khorezm being revived. In August, 1920, the Emir of Bokhara suffered the same fate, and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was formally constituted an Autonomous Socialist Soviet Republic within the R.S.F.S.R. on April 11, 1921.

In the autumn, 1924, a decision was accepted by the Congresses of the Soviets of Turkestan, Bokhara and Khiva Republics to redistribute the territories of these Republics on a national basis; at the same time Bokhara and Khiva became Socialist Republics. As a result of the redistribution completed in May, 1925, the New States of Uzbekistan, Turkmenistan and Tajikistan and several Autonomous Regions were established. The remaining districts of Turkestan populated by Kazaks (Kirghiz) were reunited to Kazakstan.

The Autonomous Kazak Socialist Soviet Republic, comprising the Governments of Uralsk, Turgai, Akmolinsk and Semipalatinsk, had already

been created within the R.S.F.S.R. (August 26, 1920). To this Republic were added the parts of the former Governorship of Turkestan inhabited by a majority of Kirghiz, and comprising the greater parts of the old Provinces of Sir-Darya and Semirechinsk, together with the eastern part of Ferghana and the foothills of the Pamirs. The area of the Kazak U.S.S.R. at the present time is 2,853,300 sq. kilometres (1,101,373 sq. miles). Within the Kazak Autonomous Republic, two Autonomous Regions were established, in the interests of distinct sub-groups of Kirghiz tribesmen, that of Kara-Kalpakia, extending south-east of the Sea of Aral, and Kirghizia, covering most of the old Semirechinsk Province. On March 7, 1927, Kirghizia was reorganized into an Autonomous Republic, formerly part of the R.S.F.S.R. The area of the Kirghis A.S.S.R. is 196,700 sq. kilometres (75,926 sq. miles). In 1933 the Kara-Kalpak Autonomous region was reorganised into an Autonomous Socialist Soviet Republic, forming part of the R.S.F.S.R. Area 125,700 sq. kilometres (48,520 sq. miles). The remaining parts of Russian Turkestan, with the territories of the old native states of Khiva and Bokhara and the Trans-Caspian Province, constitute the two Socialist Soviet Republics of Uzbekistan and Turkmenistan. In October, 1924, the Central Executive Committee of the U.S.S.R. decided to admit these two Republics to membership of the Union, a decision which was confirmed by the Third Union Congress of Soviets in May, 1925. In October 1929, Tadjikistan was admitted to the Union as a Soviet Republic. Until then it had been an Autonomous Soviet Socialist Republic included in the Uzbekistan S.S.R.

On May 1, 1930, the completed line of the Turkestan-Siberian railway was opened. The railway is 906 miles long.

TURKMENISTAN.

(TURKOMAN SOCIALIST SOVIET REPUBLIC.)

The Turkoman Socialist Soviet Republic was formed on October 27, 1924, and covers the territory of the former Trans-Caspian Region of Turkestan, the Charjiui vilayet of Bokhara, and a part of Khiva situated on the right bank of the Oxus. In May, 1925, the Turkoman Republic entered the Soviet Union as one of its Constituent Republics. It is bounded on the north by the Autonomous Kazak Republic (Kazakstan), by Persia and Afghanistan on the south, by the Uzbek Republic on the east and the Caspian Sea on the west.

Area and Population.—The principal Turkoman tribes are the Tekkés of Merv, and the Tekkés of the Attok, the Ersaris, Yomuds and Goklans. All speak closely related varieties of a Turkoman language (of the South-Western group of Turkish), and they are Sunni Mohammedans. The country passed under Russian control in 1881, after the fall of the Turkoman stronghold of Gök-Tépé.

The area of Turkmenistan is 491,216 square kilometres (189,603 sq. miles), and its population on January 1, 1933, was 1,268,900.

The capital is Ashkhabad (Polterask), and other large towns are Merv, Leninsk, Kerki, Tashauz.

Production.—The main occupation of the people is agriculture, based on irrigation. Turkmenistan produces cotton, wool, Astrakan fur, etc. It is also famous for its carpets, and produces a certain special breed of Turkoman horses. It is fairly rich in mineral resources, producing ozokerite, oil, sulphates, common salt, sulphur, etc.

Motor communication has been established between Ashkhabad and

Meshed (Persia), and an air line runs between Leninsk and Tashauz. Turkmenistan (particularly the territory along the railway line) is connected by telegraph with the rest of the Union.

In 1933 the area under cotton was 160,000 hectares; the cotton crop amounted to 119,000 tons, as against 103,000 tons in 1932.

Education.—In 1932–33 the public educational system comprised 2,039 primary and secondary schools with 103,200 pupils; 5 higher educational institutions with 2,000 students; 30 higher technical schools with 30,000 students; and 3,846 institutions for the liquidation of illiteracy with 150,000 pupils. The new alphabet, based on Latin characters, has been made compulsory in all schools and government offices.

UZBEKISTAN.

(Uzbek Socialist Soviet Republic.)

The Uzbek Socialist Soviet Republic was formed on December 5, 1924, from lands formerly included in Turkestan, Bokhara and Khorezm. It includes a large part of the Samarkand region, the southern part of the Sir-Darya, Western Fhergana, the Western Plains of Bokhara, and the Uzbek regions of Khorezm. In May, 1925, Uzbekistan, by the decision of the Congress of Soviets of the U.S.S.R., was accepted as an equal member into the Soviet Union.

Uzbekistan lies between 36° 40 N. latitude and 59° 50–75° E. longitude. It is bordered on the north by the Kazak Autonomous Republic, on the east by the Kirghiz Autonomous Republic and Chinese Turkestan, on the south by Afghanistan, and on the west by the Turkoman Socialist Soviet Republic.

Area and Population.—The Uzbeks, who form the majority of the population over the area of the old States of Khiva and Bokhara, and the Provinces of Samarkand and Ferghana, were the ruling race in Central Asia, until the arrival of the Russians during the third quarter of the nineteenth century. The several native States over which Uzbek dynasties formerly ruled were founded in the fifteenth century upon the ruins of Tamerlane's empire. The Uzbeks speak Jagatai Turkish, which is clearly related to Osmanli and Azerbaijan Turkish, and are Sunni Mohammedans.

The area of Uzbekistan is 172,000 square kilometres (66,392 sq. miles). The population on January 1, 1933, of Uzbekistan was 5,044,300, of whom 1,279,400 lived in towns. The capital of the Republic is Tashkent; other important cities are Bokhara, Khiva, Andijan, Kokand, Namanghan, Samarkand.

Production.—Uzbekistan is a land of intensive farming, based on artificial irrigation. By the middle of 1933, 73·2 per cent. of the peasant farms had been collectivized. Cotton growing has been developed. In 1933 the area under cotton was 916,200 hectares; the gross cotton crop over 802,000 tons, as against 760,400 tons in 1932. Uzbekistan also produces fruits, wool, and silk. Its industry consists of cotton spinning (51 factories), oil and coal-mining. In addition, during recent years there have been built a large works for the manufacture of agricultural machinery (in Tashkent), a cement factory, a sulphur mine, an oxygen factory, a paper mill, a leather factory, a number of textile mills and clothing factories.

Education.—In 1932 there were in elementary schools 531,000 pupils; in secondary schools 130,000 pupils; in six-year schools 25,300 pupils; in schools for peasant youth 11,300 pupils; and in institutions for the liquidation of

illiteracy 710,000 pupils. There are also higher educational establishments and technical schools.

The total length of railway in 1930 was 1,789 kilometres, of which 734 kilometres (455 miles) form that part of the line which connects central Asia with Russia. From this main line branches lead to Karshe-Kitab, Kerki-Termez, Jalalabad, Namanchan, Andijan and other centres. On the territory of the Republic there are 113 postal telegraph institutions, an air-line which serves all of Central Asia, and this air-line is most developed in Uzbekistan.

TAJIKISTAN.

(TAJIK SOCIALIST SOVIET REPUBLIC.)

The Tajik Socialist Soviet Republic was formed from the former regions of Bokhara and Turkestan where the population consisted mainly of Tajiks. Its equality with the other six republics of the Soviet Union was established on October 17, 1929.

Tajikistan is situated between 39° 40 and 36° 40 N. latitude and 67° 20 and 75° E. longitude, north of the Oxus. On the west and north it is bordered by Uzbekistan and by the autonomous Republic of the Kirghiz; on the east by Chinese Turkestan and on the south by Afghanistan.

Area and Population.—The Tajiks speak an Iranian dialect, little different from Persian, and they are considered to be the descendants of the original Aryan population of Turkestan. Unlike the Persians, the Tajiks are mostly Sunnis.

The area of the territory is 143,900 square kilometres (55,545 sq. miles), and the population on January 1, 1933, was 1,332,700. The capital is Stalinobad (formerly Dushambe).

Production.—The occupations of the population are mainly farming and cattle-breeding. Gold, oil and coal are being produced. Irrigation is being developed and cotton growing extended by the latest technical methods. In 1932 the area under cultivation was 1,008,000 hectares, of which 135,000 hectares were under cotton.

At the end of 1933 Tajikistan had 12,000 kilometres of roads suitable for vehicular traffic, out of which 4,800 kilometres were automobile roads; the building of a number of big motor roads is nearing completion, such as the Osh–Khorog of 700 kilometres, Yausi–Bazar–Charñ of 107 kilometres and others. Stalinobad is connected by air communication with the mountainous regions of the Republic. A railway line has been completed between Termez and Stalinobad (about 200 kilometres—124 miles). A steamship line on the Oxus runs between Termez Saraya and Jilikulam on the river Vakhsh. Stalinobad is connected by an air line with Termez and Kagan.

In 1933 there were 125,000 pupils in elementary and secondary schools. The republic has 5 higher educational institutions. In Stalinobad a base has been organized for the All-Union Academy of Science. Literacy among the population has increased from 0·5 per cent. in pre-revolutionary times to 60 per cent. in 1933.

OTHER ASIATIC TERRITORY OF THE SOVIET UNION.

The remainder of the Asiatic territory of the U.S.S.R. is divided as follows:—

Region	Area in sq. km.	Population, Jan. 1931	Region	Area in sq. km.	Population, Jan. 1931
Far Eastern Region	2,333,500	1,593,400	Western Siberian Region . . .	1,304,800	8,767,200
Yakutsk Autonomous Republic	4,023,300	308,400	Eastern Siberian Region (exc. the Buriat-Mongol Republic) . .	3,179,400	2,568,400
Buriat-Mongol Autonomous Republic . . .	389,100	575,000			

Habarovsk is the principal city of the Far Eastern Region. The Kamchatka region (the Peninsula) occupies an area of 180,600 sq. kilometres (69,711 sq. miles). The population of Kamchatka, which is very sparse, derives its income mainly from fishing and hunting. Agriculture and cattle-breeding are being developed in Kamchatka. There are three big State farms, with over a thousand head of cattle, and of an area of some hundreds of hectares, and collective farms are being organized. The majority of the population in the Vladivostok area is engaged in agriculture, industry and transport. The forests constitute one of the most important of the natural resources. The total forested area of the Far Eastern Region is 900,000 square kilometres, of which at least one-half can be exploited. The sown area of the Far-Eastern Region in 1933 was 982,700 hectares (including the sown area of the State farms—194,000 hectares, and the collective farms—689,900 hectares). The country is rich in fur-bearing animals of many varieties, and is an important fish-producing centre, being practically the only one in Siberia. Of the other industries of importance are wood-working and flour-milling. In addition to the vast mineral, timber, fur and fish resources, there is a comparatively good transport system, with a fairly well-developed railway system, and navigable rivers flowing into ice-free waters.

YAKUTSK REPUBLIC

The two principal industries of the Yakutsk Republic are hunting and gold mining. The gold mining industry of the republic has shown steady development. The Soviet Trust Soyus-Zoloto and a number of individual prospectors are working the fields. Silver- and lead-bearing ores are worked, and coal. There is also some trade in salt. During the period of the Five Year Plan (1929–32) a sum of 166 million roubles was invested in the industries of Yakutia. In 1933 the sown area of the Yakutsk A.S.S.R. was

75,200 hectares (including State farms—4,700 hectares, collective farms—47,800 hectares. A severe climate and lack of railways are serious obstacles to the economic development of the republic. There is an air service between Irkutsk and the town Yakutsk, the capital of the republic, which is being used to an increasing extent for the transportation of gold and valuable furs.

In 1932 there were 442 schools, with 39,000 pupils or 86 per cent. of the children of school age. There were also 50 higher schools, with about 9,000 pupils. The literate proportion of the population before the revolution was 2 per cent.; in 1932 it was 70 per cent.

BURIAT-MONGOL REPUBLIC

The Buriat-Mongol Republic is situated to the south of the Yakutsk Republic. There are a number of enterprises, principally in the leather and glass industries. Cattle breeding is, however, the principal occupation of the population. The sown area in 1932 was 376,300 hectares and 60·9 per cent. of all the peasant holdings were collectivized.

The number of pupils in the primary schools in 1932–33, was 67,200 and in the secondary schools, 4,900. Buriat Mongolia has 3 higher educational institutions and 87 per cent. of the population is literate.

SIBERIAN REGIONS

Siberia is now divided into the Western Siberian Region, with its capital at Novo-Sibirsk; and the Eastern Siberian Region, with its capital at Irkutsk. Other large cities in this area are Omsk with a population (on January 1, 1933) of 227,000, Tomsk, 128,400; Irkutsk, 158,500: Barnaul, 109,200; Krasnoyarsk, 101,500; and Buisk, 46,000. The Siberian Region extends from the Arctic Ocean to the Mongolian border, and includes fertile agricultural districts and industrial sections in the south, while most of the northern territory is an unsettled forest and similar to the Yakutsk Republic. In 1933 the total sown area of Siberia was 10,008,000 hectares (including an area of 8,902,400 hectares under cereals). The Siberian Region possesses some of the largest coal resources known. The Kuznetsk Basin is estimated to contain 400,000 million metric tons. There are other rich coal areas in Siberia, particularly the Cheremkhov and Minusinsk Basins. Within the Kuznetsk Basin lie also the extensive iron ore deposits of Telbes. Siberia is rich in non-ferrous metal ores, especially copper, the resources of which are estimated to exceed 100 million metric tons.

THE TRANS-CAUCASIAN SOCIALIST FEDERAL SOVIET REPUBLIC.

The natural boundaries of Trans-Caucasia are—on the north, the Caucasus Mountains, separating it from Northern Caucasia; on the west, the Black Sea; on the south, mountains, steppes and rivers which divide it from Persia; and on the east the Caspian Sea. The area of the Trans-Caucasian Republic is 184,492 square kilometres (71,255 sq. miles), or 0·8 per cent. of the whole Soviet territory. After the November revolution Trans-Caucasia became separated from the rest of Russia and split up into three separate Republics: Georgia, Armenia and Azerbaijan. In April, 1920, Azerbaijan became a Soviet Republic. Towards the end of the same year, Armenia also became a Soviet Republic, and in 1921 a Soviet Government was established in Georgia. The three Republics, on March 12, 1922, concluded an agreement whereby they formed a Trans-Caucasian Federation,

thus establishing the Trans-Caucasian Socialist Federal Soviet Republic. Its population on January 1, 1933, was 7,110,800.

In 1930 the total length of railway lines (not counting lines being built) was over 2,300 kilometres. The main lines run from Batoum, through Tiflis to Baku and along the Caspian Sea through Derbent to the R.S.F.S.R. There is also a railway running from Tiflis to the south in Armenia. This line passes through the Allaverd copper mines and through Leninkan and Erivan to Persia. The railways in Trans-Caucasia, as in the rest of the Union, belong to the State.

The area under cotton in Trans-Caucasia in 1933 was 236,000 hectares, and the gross yield, 140,000 tons, as against 125,000 tons in 1932.

The production of Trans-Caucasian industry in 1932 was valued at 1,386,200,000 roubles.

ARMENIA.

(ARMENIAN SOCIALIST SOVIET REPUBLIC.)

On April 2, 1921, Armenia was proclaimed a Soviet Republic. The Armenian Soviet Government, with the Russian Soviet Government, was a party to the Treaty of Kars (March, 1921) which confirmed the Turkish possession of the former Government of Kars and of the Surmali District of the Government of Erivan.

Area and Population.—Armenia (capital Erivan), which covers an area of 30,948 square kilometres (11,945 sq. miles), adopted the Soviet Constitution in November, 1920. On January 1, 1933, the population was 1,109,200. The population of Erivan on January 1, 1933, was about 111,500.

Agriculture.—In 1933 the aggregate cultivated area of Armenia amounted to 424,000 hectares, in 1932 over 30,000 hectares were under cotton. During the twelve years that Soviet Armenia has been in existence a number of canals have been built, also irrigation systems, watering about 125,000 hectares of land, mostly under cotton crops. At the beginning of 1934, over 50 per cent. of peasant farms had been collectivized. Irrigation works have been constructed to a total length of 350 kilometres (187 miles). The principal of these is the Shirak Lenin Canal, 22 kilometres (13 miles) long, commenced in 1922 and completed in 1925. During the first ten years of the existence of Soviet Armenia 6 large canals have been constructed, which have given to the peasants 40,000 hectares of new arable land.

In 1926 a new electric station was erected at Erivan and the construction of a number of powerful electric stations was started. In November, 1928, work was started on another powerful electric station in Leninakan. There are now hydro-electric stations in Armenia, the latest of which, Dzorages, was opened in November, 1932. The Kanakirskaya hydro-electric station, which will have a capacity of 88,000 kw., is in course of erection.

The number of pupils in the primary and secondary schools in 1933 was 202,000. Armenia has 9 higher educational institutions, 64 technical schools and 10 workers' faculties. The population was 95 per cent. literate in 1933. In 1933 23 newspapers were published in Armenia.

AZERBAIJAN.

(AZERBAIJAN SOCIALIST SOVIET REPUBLIC.)

The 'Mussavet' (Nationalist) party which dominated the National Council or Constituent Assembly of the Tartars, declared the independence of Azerbaijan on May 28, 1918, with a capital, first at Ganja (Elizavetopol) and later at Baku. A Government of 12 ministers was formed, which the British Government recognized as a *de facto* administration in February, 1920. On April 28, 1920, the 'Hummet' or Bolshevik Party overthrew the existing Government. On September 30, 1920, a military and economic treaty was concluded between Azerbaijan and Russia, and in the following year Azerbaijan was declared a Soviet Republic.

Area and Population.—Azerbaijan covers an area of 84,679 square kilometres (32,686 sq. miles) and has a population (1933) of 2,891,000, including a population of 970,000 in the urban areas. Its capital is Baku, population 709,500 (1933). Azerbaijan includes the Nakhichevan Socialist Soviet Republic and the Nagorni Karabakh Autonomous Region. It has a temperate climate throughout the year.

Agriculture and Industry.—Azerbaijan is an agricultural and industrial country. The chief products are grain, cotton, vine, kitchen and garden produce, and to some extent also tobacco and silk. In the mountain regions the occupation of the people is cattle-breeding. The area under cultivation in 1929–30 was over 1,100,000 hectares (as compared to 961,000 hectares in 1913). In 1932 the area under cotton was 229,000 hectares. On January 1, 1933, 51·3 per cent. of peasant farms had been collectivized.

The most important industry is the oil industry, especially in the Baku Region. The total output of oil was: in 1931, 13,443,000 tons; in 1932, 12,000,000 tons; in 1933, 15,300,000 tons; in 1934, 19,019,956 tons. All the oilfields have been electrified and are now connected with the town of Baku and, for the most part, with the new workers' settlements which have been constructed more or less on the American type. Amongst the other industries in Azerbaijan are copper, salt, textiles, and fishing industries. The total production of State industries in 1932 was valued at 1,002,177,000 roubles.

In 1933 there were 428,000 pupils in elementary and secondary schools, there were also 17 higher educational institutions with 12,000 students.

GEORGIA.

(GEORGIAN SOCIALIST SOVIET REPUBLIC.)

The independence of the Georgian Social Democratic Republic was declared at Tiflis on May 26, 1918, by the representative body, the National

Council, elected by the National Assembly of Georgia on November 22, 1917. The Act of Independence of Georgia was confirmed on March 12, 1919, by the Constituent Assembly, which had been elected on a basis of universal suffrage.

The Government, which was controlled by the Menshevik Party, received *de jure* recognition by the Allies on January 27, 1921. In February, 1921, however, a Soviet Government was set up.

Area and Population.—Georgia occupies the whole of the western part of Trans-Caucasia and covers an area of 69,900 square kilometres. Its population on January 1, 1933, was 3,110,600. Georgia embraces the Abkhasian Socialist Soviet Republic, the Ajaristan Autonomous Soviet Republic and the Autonomous Region of Southern Ossetia.

Education.—In 1933 there were 448,570 children in elementary schools; 142,600 children in the seven-year schools; and 24,760 pupils in the technical schools; in the higher educational institutions there were 16,460 students; in the workers' faculties, 8,180 students. Georgia has a total of 17 higher educational institutions.

Tiflis (population 405,900 in 1933) is not only the capital of Georgia, it is also the capital of Trans-Caucasia. It is one of the oldest towns of Georgia, but it is now being to a certain extent rebuilt and modernized.

Agriculture and Industry.—Agriculture is important; area cultivated, 920,500 hectares; 35,000 hectares under tea. The gross crop of green tea leaves has increased from 843,000 kilogs in 1926 to 3,166,000 kilogs in 1933. The total annual output of tea of all the tea factories in Georgia has increased from 196,000 kilogs in 1926 to 748,000 kilogs in 1933. On January 1, 1933, 36·6 per cent. of peasant farms had been collectivized. The gross production of Georgian industry in 1933 was valued at 250,000,000 roubles. Georgia is very rich in forest lands where fine varieties of timber are grown. The most important mining industry of Georgia is the exploitation of the manganese deposits, the richest of which lie in the Chiatura region. Manganese deposits in Georgia are calculated at 250,000,000 tons, distributed over an area of 140 square kilometres. There are also coal seams, the most important of which are at Tkvargelskoe (deposits estimated at 250,000,000 tons), and Tkvibulskoe (deposits of 80,000.000 tons) The most powerful electric station in Trans-Caucasia is in Georgia on the River Kura, the Zemo-Avchal hydro-electric station of 36,000 h.p. The second most powerful station is the Abash hydro-electric station; a number of other stations are either in the course of construction or are to be constructed shortly. In 1933 the first section of the Krim hydro-electric power station of a capacity of 35,000 kw. was put into operation. The building of the second section is nearing completion.

The railway system of Georgia extends to 570 miles. The trunk line leading from Batum through Tiflis to Baku on the Caspian Sea has several narrow gauge branches on Georgian territory to the coal mines of Tkhibuli, to the port of Poti, to the manganese mines of Chiaturi, to the mineral springs of Borjom and the health resort Bakuriani, to the towns Signakh and Telavi, in Kakhetia, and to the Armenian frontier, across the coal mine district of Alverdi. The last branch divides in Armenia, going on the one side to Tabriz in Persia, and on the other to Erzerum in Anatolia. All the railway lines on the territory of Georgia belong to the State.

A railway line from Akhal-Senaki along the Black Sea coast, through Sukhum to Tuapse, is being constructed.

UKRAINE.

(UKRAINIAN SOCIALIST SOVIET REPUBLIC.)

The Ukrainian Socialist Soviet Republic was proclaimed on December 27, 1917, that is, soon after the Soviet Revolution of November 7, 1917, and was finally established in December, 1919. In December, 1920, the Ukrainian Socialist Soviet Republic concluded a military and economic alliance with the Russian Socialist Federal Soviet Republic and the following united People's Commissariats were formed:—For military and naval affairs, the Supreme Economic Council, Foreign Trade, Finance, Labour, Transport and Posts and Telegraphs.

On July 6, 1923, the Ukrainian Socialist Soviet Republic formed, together with the other Socialist Soviet Republics in Russia, the Union of Socialist Soviet Republics.

Area and Population.—The Ukrainian S.S.R. covers an area of 451,731 sq. kilometres (166,368 sq. miles), *i.e.* 2·3 per cent. of the whole Soviet Union, and includes the Autonomous Moldavian Republic (*see* below).

The population of the Ukraine on January 1, 1933, was 31,901,400, of whom 80 per cent. were Ukrainians, 9·2 per cent. Russians, 5·4 per cent. Jews, and 5·4 per cent. of other origins.

The principal towns (with their populations on January 1, 1933) are the capital, Kiev (538,600), Kharkov (population 654,300), Odessa (497,000), Dniepropetrovsk (379,200), Stalin and Nikolaev (141,400). In accordance with the Government decision to erect fourteen Socialist towns in the Donetz basin, the construction of the first town, to be known as 'Gorlovka,' was commenced in April, 1930. The total cost of construction of these towns will amount to 634 million roubles.

The population of the Ukraine belongs to a variety of churches, the chief being the Orthodox Greek Church, and the Catholic church. There are also some Protestants, and adherents of other Christian Sects, as well as Jews and others.

Education.—In 1933 the number of pupils in the elementary and secondary schools was about 5,000,000, *i.e.* 100 per cent. of the children of school age. The number of students in the technical schools, workers' faculties and higher educational institutions was 350,000 (including 116,000 in the Universities). The Ukraine has 7 academies and over 260 scientific research institutes. The number of newspapers published in the Ukraine is 440.

Finance.—The budget of the Ukrainian S.S.R. in 1934 balanced at 1,450,000,000 roubles.

Agriculture.—Before the war nine-tenths of the grain exported from Russia came from the Ukraine. In 1933 the sown area of the Ukraine was 26,373,000 hectares; 1,240,000 hectares were under sugar-beet in 1932. In 1934, 73·2 per cent. of all the peasant holdings had been collectivized; the tractors in use in agriculture aggregated 685,000 h.p.; 85·5 per cent. of the total sown area was cultivated by the collective farms; the sown area of the state farms in 1932 was over 3 million hectares.

Industry.—Some of the industries of the Ukraine are amongst the most important in the whole of the U.S.S.R. The Ukraine accounts for 80 per cent. of the coal output of the Union, 70 per cent. of the pig iron, 50 per cent. steel, 60 per cent. of the iron ores, 85 per cent. of sugar, 66 per cent. to 70 per cent. of agricultural machinery, 95 per cent. of manganese ores. In 1933 the value of State industrial production in the Ukraine was 5,100 million roubles, and the number of workers employed in census industry was 1,400,000 (1932). Big electrification works are being carried on in the Ukraine. In 1932 the total of electricity supplied was 1,600,000 kwh. The most important industries are metal, coal-mining, sugar, and flour-milling.

Railways.—The total length of railways of the Ukrainian S.S.R. on January 1, 1931, was 13,780 kilometres (over 7,000 miles), and the navigable rivers 2,851 kilometres (1,782 miles).

MOLDAVIA.

(MOLDAVIAN AUTONOMOUS SOCIALIST SOVIET REPUBLIC.)

Moldavia was formed as a separate republic on October 12, 1924, from an area of 8,288 square km. on the left bank of the Dnestr River. On January 1, 1933, the population of Moldavia was 615,000. The capital is

Tiraspol. Agriculture is the principal industry. There are 240 km. of railways and about 1,600 km. of roads.

In 1933 the total area under cultivation was 523,000 hectares. By the end of 1933 over 70 per cent. of peasant farms had been collectivized. Industrial production in 1931 was valued at 67,400,000 roubles.

In 1933 there were 84,000 pupils in the elementary and secondary schools. In 1933 Moldavia introduced the system of universal compulsory instruction in secondary ten-year schools. Illiteracy among the adult population was practically abolished in 1934. Moldavia publishes 36 newspapers.

WHITE RUSSIA.

(White Russian Socialist Soviet Republic.)

The White Russian Socialist Soviet Republic was formed on January 1, 1919. At present, its territory covers 126,790 sq. kilometres (48,940 sq. miles), and includes the former provinces of Minsk, Vitepsk, Mogilov, and a section of the Grodno provinces as well as the Gomel province. The most important towns of White Russia are Minsk, Vitepsk and Gomel. On January 1, 1933, the population numbered 5,439,400. In 1933 the urban population numbered 890,100. White Russia forms one of the constituent Republics of the U.S.S.R. Its constitution is similar to that of the R.S.F.S.R.

Education.—In 1931–32 there were 1,002,590 pupils in schools. There were 32 higher educational institutions, with 15,130 pupils; 130 technical high schools, with 32,200 pupils; 61 workers' faculties, with 15,760 pupils; 1,600 secondary schools, with 189,500 pupils; and 7,027 elementary schools, with 750,000 pupils. There are also 39 scientific institutions and an Academy of Sciences. There are 3 institutions of university rank—the White Russian State University, the Communist University, and the Agricultural Academy with 4,418 students. Over 200 newspapers are issued in the republic.

Finance.—The budget in 1933 amounted to 250,000,000 roubles.

Agriculture.—The area under cultivation (in hectares) in 1933 was 3,710,000, including 232,000 flax and 608,000 potatoes. The total number of heads of farm stock was 9,030,900 in peasant farms, including 1,091,800 horses, 2,096,200 cattle, 3,449,600 sheep and goats, and 2,293,300 pigs. In 1931 the total area under cultivation was 3,754,000 hectares, of which 2,519,000 hectares was under grain. On January 1, 1934, 65 per cent. of the peasant farms had been collectivized.

Industry.—The gross production of the State industries of the White Russian Socialist Soviet Republic in 1932 was valued at 1,100,000,000 roubles. In 1933, 95,200 workers were employed in State industries. Capital investments in the White Russian industries during all the years of the First Five Year Plan amounted to 840 million roubles.

SALVADOR.

(Republica de El Salvador.)

Constitution and Government.—In 1839 the Central American Federation, which had comprised the States of Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica, was dissolved, and Salvador became

an independent Republic. Its Constitution, proclaimed in 1824 under the Federation, and frequently modified down to 1886, vests the legislative power in a single Chamber of 42 Deputies, 3 for each department, elected for one year by universal suffrage.

The President is elected for four years. He has a Cabinet of four members in charge of the departments of:—Foreign Relations, Justice, and Instruction; War, Marine, and Aviation; Interior, Government, Agriculture, Charities, Sanitation, and Public Works; Finance, Public Credit, Industry, and Commerce.

President.—General Maximiliano Hernández *Martínez.* Appointed December 4, 1931, confirmed by Congress February 7, 1932; to serve until February 28, 1935.

Area and Population.—Salvador is the smallest and most densely populated of the Central American States. Its area is 34,126 square kilometres, or 13,176 square miles, divided into 14 departments, each under a governor appointed for 4 years. Population, based on the census of May 1, 1930, was 1,459,578; estimated, December 31, 1932, 1,522,186. Aboriginal and mixed races, Ladinos or Mestizos, constitute the bulk of the population. The language of the country is Spanish. The capital is San Salvador, with (1932) 98,555 inhabitants. Other towns are Santa Ana, population 78,321; San Miguel, 41,453; Zatatecoluca, 24,572; Ahuachapán, 29,520; San Vicente, 26,131; Sonsonate, 20,532.

The number of births in 1932 was 61,133, of which 41·16 per cent. were legitimate and 58·84 per cent. were illegitimate; the number of deaths, 32,773.

Religion, Education and Justice.—The dominant religion is Roman Catholicism. There is an archbishop in San Salvador and a bishop at Santa Ana and San Miguel respectively. Education is free and obligatory; in 1929 the State took over control of all schools, public and private. There were in 1932 1,145 primary schools (state, municipal and private), with 1,700 teachers and about 52,465 pupils. There are 10 travelling teachers for the rural districts. Secondary education is given (1932) at the National Institute (378 pupils) and at 17 recognized private Lyceums, of whom 11 furnish commercial instruction. Two normal schools, one for men and one for women, have a total enrolment of 119. There is a National University with 491 students and 68 professors in 1932. Expenditure on public instruction in 1932, 1,490,000 colones.

Justice is administered by the Supreme Court of Justice, one court of third instance (in the capital) and several courts of first and second instance, besides a number of minor courts. All judges of second and third instance are elected by the National Assembly for a term of 2 years, while the judges of first instance are appointed by the Supreme Court for a similar period.

Finance.—Revenue and expenditure for five fiscal years (2 colones = 1 dollar U.S.; 9·72 colones = 1*l.* sterling at par):—

	1929-30	1930-31[1]	1931-32[2]	1932-33	1933-34
	Colones	Colones	Colones	Colones	Colones
Revenue	24,617,963	20,487,137	15,298,603	18,392,000	17,715,000
Expenditure . . .	27,071,388	27,612,191	17,900,296	17,932,000	18,632,000

[1] Thirteen months. [2] Eleven months.

The most important items of expenditure in 1933–34 were as follows (in thousands of colones): interior, 2,291; public works, 924; education, 1,442; finance, 1,172; public credit, 3,860; war, navy and aviation, 3,057; special funds, 2,785; others, 3,101; total, 18,632.

The total outstanding debt on June 30, 1934, was 48,519,000 colones, of which 38,317,000 colones were external debt, and 10,202,000 colones internal debt.

Defence.—The army is organized in 3 divisions of 12 infantry, 1 cavalry and 3 artillery regiments. In case of war, military service is compulsory from 18 to 50 years of age. The permanent armed force for 1932 was 3,000 men.

Production.—Salvador is predominantly agricultural; eighty per cent. of its total area is under cultivation. But it is a one-crop country, coffee alone furnishing, in value, more than 80 per cent. of its exports. On July 28, 1933, a Coffee Defence Law placed the entire industry, from cultivation to marketing, under the protection of a Commission jointly controlled by the coffee growers and the Government. Total area devoted to coffee is about 203,600 acres, with some 118,800,000 trees; average output is 1,435,000 quintals, though the output varies considerably from year to year. Germany is the principal buyer (34·8 per cent. of the crop in 1932). Exports in 1932, 105,792,000 lbs. Other agricultural products are maize (averaging about 4,400,000 quintals), cacao, balsam (43,698 kilos exported in 1932), tobacco, indigo, henequén (538 metric tons exported in 1932), and sugar (exports, 1932, 277 tons). Livestock census of 1932, showed 122,554 horses, asses and mules, 454,190 cattle, 8,270 sheep, 12,136 goats and 230,410 pigs. A little rubber is exported. In the national forests are found dye woods and such hard woods as mahogany, cedar, and walnut. Balsam trees also abound; Salvador is the world's principal source of this medicinal gum. The mineral wealth of the Republic includes gold, silver, coal, copper, iron, lead, zinc, sulphur and mercury.

Commerce.—The imports (including parcels post) and exports have been as follows in five years (2 colones = 1 dollar, U.S.; 9·72 colones = 1*l.*):—

—	1929	1930	1931	1932	1933
	Colones	Colones	Colones	Colones	Colones
Imports	35,712,420	23,905,302	14,911,074	12,484,000	15,263,428
Exports	36,830,990	27,314,591	22,725,996	13,962,000	20,296,455

The trade is chiefly with Germany, the United States, the United Kingdom, and Scandinavia. Import figures include usually about 2,000,000 colones in coined gold from the United States. The chief imports are cottons, hardware, flour, drugs and chemical products. The chief exports are coffee, henequén, and balsam.

Total trade between Salvador and the U.K. (Board of Trade Returns) for 5 years:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Salvador to U.K. .	12,231	14,784	9,340	2,093	2,140
Exports to Salvador from U.K. .	340,573	226,857	154,085	203,891	218,084
Re-exports to Salvador from U.K.	3,044	1,428	918	1,543	971

Shipping and Communications.—Cutuco is the principal port, handling 69 per cent. of imports and 44 per cent. of the exports.

A British-owned railway connects the port of Acajutla with Santa Ana, Sonsonate, and San Salvador, the capital. Another line (the American-owned International Railways of Central America) runs from the eastern to the western boundary of Salvador, and extends into Guatemala to Guatemala City and Puerto Barrios on the north coast. The line from Cutuco to the capital with its extension has a total length of 156 miles. Another short railway formerly connected the capital with Santa Tecla, but the popularity of a well-paved motor highway alongside forced its abandonment. Total length of railway open, about 378 miles, all of narrow gauge. There are 1,476 miles of national road in the Republic, including a fine highway completed in 1926 between San Salvador and La Libertad and one from Santa Ana to the Guatemalan frontier. Of these, 353 miles are suitable for motors. In 1928 an airplane service was established between San Salvador, Guatemala City and other Central American points.

In 1932, there were 215 post offices, which dispatched 2,698,454 pieces of mail for the public and 847,663 pieces of official mail, and received 4,824,860 private pieces of mail and 1,031,197 official pieces; there were 224 telegraph offices, 275 telephone-exchanges and 3,754 instruments. A radio transmitting and receiving station at San Salvador maintains communications with Latin America. The All-America Cables maintain a station at San Salvador.

Money, Weights and Measures.

Money.

There are 2 banks, the Banco Salvaedoreño (paid-up capital, 4,000,000 colones), and the Banco Occidental (paid-up capital, 6,000,000 colones). A third bank, the Banco Agricola Commercial (paid-up capital, 1,560,000 colones), was on May 13, 1933, taken over by the Government and re-named, in June 1934, the Central Reserve Bank of Salvador; it will have eventually a capital of 25,000,000 colones, and will be a central reserve bank on the usual lines. The "A" shares are held by the public and by the Salvadorean Coffee Association; the "B" shares by the 2 domestic banks and the Anglo-South American Bank. Note issue of 15½ million colones, June 30, 1934, was backed by reserves of 3⅓ million dollars, U.S. Its initial funds, amounting to 6,000,000 colones, are derived from a temporary issue of a new silver colon weighing 25 grams, 900/1000 fine, based on part of the Government's receipts from the coffee export tax not ear-marked for foreign debt service.

According to the law of July 16, 1920, the monetary unit of Salvador is the *colon*, a coin containing 836 milligrams of gold ·900 fine, and equal in value to 50 cents (United States currency). The colon, which represents 100 centavos, is issued in denominations of 5, 10, 25, and 50 colones. The country left the gold standard on October 7, 1931. Auxiliary silver coins are minted in small denominations up to 12½, 20, 50, and 100 centavos each; the popular 12½ centavo piece is known as the 'real'; nickel coins in denominations of 1, 3, 5, and 10 centavos each are also issued. The coinage of silver is limited to 10 per cent. of the total fiduciary circulation, and that of nickel to 5 per cent.

National gold coins and gold coins of the United States of all denominations are unlimited legal tender, the United States coins having a fixed value of 2 colones to the dollar. Other foreign money is not legal tender.

National and United States silver coins are legal tender up to 10 per cent. of each payment, and national nickel coins in amounts up to 2 per cent. of each payment.

Weights and Measures.

On January 1, 1886, the metric system of weights and measures was made obligatory. But other units are still commonly in use, of which the principal are as follows:—

Libra . .	= 1·043 lbs. av.	*Arroba* . .	= 25·35 lbs. av.
Quintal .	= 104·3 lbs. av.	*Fanega* . .	= 1·5745 bushels.

Diplomatic Representatives.

1. Of Salvador in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Vacant (March, 1935).

Consul-General in London.—Samuel G. Dawson.

There are consular agents at London, Liverpool, Glasgow, Southampton, Newport, Brighton, Birmingham, and Aberdeen.

2. Of Great Britain in Salvador.

Minister Plenipotentiary.—John Henry Stopford Birch (appointed August 23, 1933). Resident at Guatemala City.

Consul.—R. G. Goldie.

SAN MARINO.

The independent Republic of San Marino, which claims to be the oldest State in Europe, is embraced in the area of Italy. A new treaty of friendship with the Kingdom of Italy was concluded June 28, 1907, revised in 1908 and in 1914. The Republic has extradition treaties with England, Belgium, Holland, and United States. The legislative power of the Republic is vested in the Grand Council of 60 members elected by popular vote, a third of whom are renewable every three years, and two of whom are appointed every six months to act as Regents (Capitani reggenti). The regents exercise executive power, assisted by various nominated congresses, viz., *Congresso Economico di Stato, Congresso dei Legali, Congresso degli Studi. Congresso militare.* The administration of justice is under magistrates,

who are Italian citizens. There are several elementary schools and one high school, the diplomas of which are recognized by Italian universities.

The frontier line is 24 miles in length, area is 38 square miles, and population (September, 1932) 13,948.

The revenue and expenditure for 1933–34 balanced at 4,410,150 lire, and the Financial Estimates for 1934–35 at 3,957,499 lire. There is no public debt. The militia consists of all able-bodied citizens between the ages of 16 and 55, with the exception of teachers and students. The chief exports are wine, cattle, and the building stone quarried on Mount Titano. Italian and Vatican City currency is in general use, but the Republic issues silver coinage, values 5, 10 and 20 lire, and separate postage stamps. An electric railway from Rimini to the city of San Marino was completed in June, 1932. Length, 20 miles.

Consul-General of San Marino in London.—Commendatore Melvill Allan Jamieson, 42 Pall Mall, S.W. 1.

Consul-General of Great Britain in San Marino.—D. F. S. Filliter (Resides at Leghorn).

SIAM.

(Sayam, or Muang-Thaï.)

Siam is called by its inhabitants Thaï, which means 'free,' or Muang-Thaï, 'the land of the free.' The word Siam is probably identical with Shan, applied in Burma to the Lao race, as well as to the Shan proper and the Siamese.

Reigning King.

Ananda (Mahidol), born in 1926, succeeded to the throne on the abdication of his uncle, Prajadhipok, on March 2, 1935.

During the King's minority a Council of Regency has been appointed consisting of Prince Anuvatana, the ex-King's cousin; Prince Aditya, another nephew of the ex-King; and Chowphya Yomaraj, a former Minister of the Interior.

Government.

Until June 24, 1932, the Constitution of Siam was an absolute monarchy. On the date mentioned a *coup d'état* was effected and a Siam Temporary Con-

stitution Act was promulgated on June 27. The temporary constitution was later replaced by a permanent constitution, which was signed by the late King on December 10, 1932. Under this constitution supreme power belongs to the nation, and the King, who is the head of the nation, exercises the legislative power by and with the advice and consent of the Assembly of the People's Representatives, and the executive power through the State Council, which is composed of 14 to 24 members. The president and 14 members of this Council shall be selected from the Assembly. Of the Assembly one-half will be nominated by the King and the other half elected by popular vote for four years. This system of election will last for not more than ten years, after which all the members will be elected by the people. Men and women over 20 years of age enjoy the franchise.

The State Council, appointed by the King, is charged with the duty of conducting the government of the State. The Ministries are under the charge of State Councillors, whose names are as follows (November, 1934):—

President of the State Council and Minister of Foreign Affairs.—Colonel Phya Phahol Pholphayuha *Sena.*
Minister of Defence.—Colonel Luang Bipul *Songgram.*
Minister of Finance.—Phya Manavaraj *Sevi.*
Minister of Public Instruction.—Phya Sarasasna *Prabandh.*
Minister of Interior.—Luang Pradit *Manudharm.*
Minister of Justice.—Phya Nitisastr *Baisalya.*
Minister of Royal Household.—Chao Phya Vorabongs *Bibadhna.*
Minister of Economic Affairs.—Phya Sorayudh *Seni.*

The local administration of Siam has been considerably modified by recent enactments, the old division of the kingdom into 10 Circles or *Monthons*, each under a Lord-Lieutenant, having been abolished, and the Commissioners of the 70 Provinces or *Changwads* being now directly responsible to the Minister of the Interior. The *Changwads* are subdivided into 406 Districts (*Amphurs*) and 4,966 Communes (*Tambols*). It is intended that local legislative and executive bodies with limited powers shall be established with functions, procedure, and method of election closely modelled on those of the central People's Assembly.

A treaty for a modification of British extra-territorial rights in Siam and for the cession of the Siamese tributary States of Kelantan, Trengannu and Kedah to Great Britain was signed at Bangkok on March 10, 1909. All the old commercial treaties which granted extra-territorial rights and imposed limitations upon customs tariffs have been revised. Siam now possesses full jurisdictional and fiscal autonomy, subject to certain temporary limitations. The list of these new treaties and the date of the ratifications are as follows: United States of America, September 1, 1921; Japan, December 29, 1924; France, January 12, 1926; Denmark, March 28, 1926; Great Britain, March 30, 1926; Spain, July 28, 1926; The Netherlands, August 24, 1926; Portugal, August 30, 1926; Sweden, October 25, 1926; Norway, February 9, 1927; Italy, March 18, 1927; Belgium-Luxemburg, March 25, 1927; Switzerland, December 16, 1931. A treaty of friendship and commerce between Germany and Siam was ratified on October 24, 1928.

Area and Population.

The area of Siam is 513,443 square kilometres, or 198,188 square miles, about 32,810 square miles being in the Malay Peninsula. The first detailed census in Siam was taken in 1905, but included only 12 of the circles or Monthons. The first census of the whole country was taken in 1909.

The census taken on July 15, 1929, gave a population of 11,506,207 (as

compared with 9,207,355 at the census taken on April 1, 1919), of whom 5,795,065 were males, and 5,711,142 females. Of the former, 2,909,750 were under 21 years of age. The estimated population on October 1, 1934, was 12,699,000.

The population of Siam, according to the census for 1929, was made up as follows: Siamese, 10,493,304; Chinese, 445,274; Indians and Malays, 379,618; Cambodians, 60,668; Annamites, 5,321; Shans, 27,505; Burmese, 4,880; Europeans and Americans, 1,920; Japanese, 295; others, 87,422.

Religion and Education.

The prevailing religion is Buddhism. In 1929–30 there were 10,958,426 Buddhists, 498,311 Mohammedans, and 49,462 Christians. On March 31, 1933, there were 17,075 Buddhist temples and 137,287 priests.

Elementary education is compulsory, and in the local elementary schools, free.

On March 31, 1933, Government schools numbered 250, with 43,037 pupils and 2,031 teachers. There were also 25 Government Teachers' Training Schools, with 2,072 pupils and 106 teachers. Local elementary schools numbered in 1933 6,081, with 695,954 pupils (of whom over 40 per cent. were girls) and 12,559 teachers. Private schools numbered 1,307, with 59,135 pupils and 2,653 teachers, including schools connected with American, French, and English Missions. Over 84 per cent. of local schools and 46 per cent. of the Government schools are situated in the monasteries.

The Chulalankarana University, founded at Bangkok in 1917, is organized in four faculties, Medicine, Arts and Sciences. Engineering, Nursing and Midwifery. A new University of Moral and Political Sciences was established in June 1934, for the teaching of Law, Politics and Economics, and the creation of a trained body of Civil servants.

The estimated expenditure for 1934–35 of the Education Department of the Ministry of Public Instruction amounts to 259,650*l.*

Finance.

Revenue and expenditure for four years (£1 = 11 ticals):—

Year.[1]	Revenue.	Expenditure.	Year.[1]	Revenue.	Expenditure.
	£	£		£	£
1931–32[2]	7,177,112	7,952,920[4]	1933–34[3]	6,384,815	6,583,219[6]
1932–33[3]	7,241,034	6,768,651[5]	1934–35[3]	6,769,735	6,768,475[7]

[1] Years end on March 31. [2] Actual figures. [3] Budget estimates.
[4] Includes a provision of 297,486*l.* for redemption and avoidance of debt.
[5] Includes provision of 563,636*l.* for redemption and avoidance of debt.
[6] Includes provision of 727,014*l.* for redemption and avoidance of debt.
[7] Excluding capital expenditure of 463,636*l.*

The principal sources of revenue and expenditure were as follows:—

Revenue	1933–34[1]	1934–35[1]	Expenditure	1933–34[1]	1934–35[1]
	1000 Ticals	1000 Ticals		1000 Ticals	1000 Ticals
Land Revenue .	5,546	5,859	Civil List . .	600	600
Capitation Tax .	7,300	6,837	Revenue Dept. .	2,5[illegible]0	2,462
Opium . .	7,009	7,009	Service & Debt .	8,497	8,476
Customs . .	21,724	22,046	Defence . .	17,985	16,971
Excise . .	6,584	6,092	Education . .	6,631	8,379
Railways . .	3,000	2,633	Capital Expenditure . .	5,996	5,183
Fees and Licences	8,375	8,155			

[1] Estimates.

On March 31, 1934, the National Debt amounted to 9,134,232*l.*, of which 909,090*l.* or Baht 10,000,000 is accounted for by a 4½% Internal Loan. The remainder of the debt is divided as follows:—

	£
4½% Loan of 1905	= 488,420
,, ,, 1907	= 1,663,621
4% Loan (F.M.S.) 1909	= 3,220,851
6% Loan (F.M.S.) 1924	= 2,832,250
Total Sterling Loan	= 8,225,142

The estimate of capital expenditure for 1934–35 is 471,209*l.*, which includes the following items: construction of railways, 140,640*l.*; irrigation works, 139,073*l.*; state highways, 106,000*l.*

The above capital expenditure will be financed from the unexpended portion of the Internal Loan, from the earnings of the Currency Reserve and from various Treasury balances.

Defence.

Under the Military Service Act of 1933 every able-bodied man is liable to serve two years with the colours; seven years in the first reserve, with a maximum service of two months per annum; ten years in the second reserve, with a maximum service of 30 days per annum; six years in the third reserve.

The army is organized in 21 battalions of infantry, 12 squadrons of cavalry, 9 groups of artillery, 2 battalions of engineers, and 2 battalions of signallers.

The Air Force consists of 3 wings, and one aviation school, one gunnery school, one central repair shop and one chief workshop for aeroplane and motor construction.

The average effectives in 1933 were 1,933 officers and 24,486 other ranks in the army, and 98 officers and 2,486 other ranks in the air force.

Siam maintains a small naval force, which consists of five gunboats, three destroyers, three torpedo-boats, the royal yacht *Maha Chakri*, and various small craft, including five modern coastal motor-boats; the ex-British sloop *Havant*, renamed *Chow Phraya*, serves as a sea-going training ship. Two new destroyers are being built in Italy. There are 4,800 officers and men on the active list, besides a reserve of 20,000.

At the mouth of the Mënam River are the Paknam forts. The bar prevents ships of more than 13 feet draught from ascending to Bangkok, though a project for dredging the bar is under discussion. The naval arsenal dock has recently been reconstructed.

Expenditure on Defence for 1934–35 is estimated at 1,396,537*l.*, made up as follows:—the army, 925,992*l.*; the navy, 404,310; other departments, 66,236*l.* No separate figures are shown for the air force.

Production and Industry.

According to the 1929 census 83·05 per cent. of the occupied persons (7,519,757) were engaged in agriculture, 1·10 per cent. in fishery, 2·19 per cent. in industrial pursuits.

The chief produce of the country is rice, which forms the national food and the staple article of export. The figures of the rice crop for the past three years are as follows: 1931–32, area, 6,453,040 acres, yield, 4,036,238 tons; 1932–33, area, 8,034,476 acres, yield, 5,329,588 tons; 1933–34, area, 8,113,276 acres, yield, 4,938,452 tons. For 1934–35 the area under rice is estimated at 8,457,280 acres, and the yield 5,184,000 tons.

The harvested area and yield of certain other crops in 1933–34 was as follows:—para-rubber, 275,909 acres, 206,339 piculs; coconuts, 156,637 acres, 164,187,828 nuts; tobacco, 34,963 acres, 171,292 piculs; pepper, 3,003 acres, 28,116 piculs; cotton, 6,660 acres, 31,974 piculs.

The live-stock on March 31, 1934, consisted of 10,632 elephants, 331,388 horses and ponies, 5,461,957 bullocks, and 5,154,134 buffaloes.

Much of Upper Siam is dense forest, and the cutting of teak is an important industry, almost entirely in British hands. Siam teak wood is mainly produced in the north of Siam, the dry logs being floated by river to Bangkok during the rainy months of the year. The price of teak has fallen considerably during the past 2 years: the value of teak exported in 1933–34 amounting to only 388,589*l.* (45,860 tons), as compared with over 1,000,000*l.* in 1929–1930. Rubber-planting in Southern Siam continues to progress; in 1933–34, 11,535,464 kilogrammes of rubber and rubber waste, valued at 214,497*l.*, were exported from Siam.

The mineral resources of Siam are extensive and varied, including cassiterite (tin ore), wolfram, scheelite, antimony, bismuth, coal, copper, gold, gypsum, iron, lead, manganese, mica, molybdenum, rubies, sapphires, silver, zinc and zircons. Among these, however, only tin, wolfram, scheelite and sapphires are now being mined on a commercial basis. The total output of metallic tin in 1929–30 was 184,948 piculs; in 1930–31, 262,583 piculs; in 1931–32, 156,168 piculs; in 1932–33, 163,112 piculs, and in 1933–34, 178,394 piculs.

Commerce.

The foreign trade of the Kingdom for the past four years is as follows:—

Year.	Imports.	Exports.	Year.	Imports.	Exports.
	£	£		£	£
1930–31 . .	14,091,717	14,683,536	1932–33 . .	8,136,129	13,865,681
1931–32 . .	9,082,622	12,200,622	1933–34 . .	8,451,216	13,098,092

The distribution of trade by principal countries was as follows:—

Countries.	Imports.		Exports.	
	1932–33	1933–34	1932–33	1933–34
	£	£	£	£
Australia	67,899	69,941	4,063	1,322
Belgium	27,397	18,517	14,632	8,331
Burma	18,045	10,765	11,468	1,388

Shipping and Communications.

In 1933–34, 1,028 vessels of 1,226,730 tons entered, and 1,026 of 1,229,607 tons cleared the port of Bangkok. Of those entering 260 (340,381 tons), and of those clearing 260 (344,357) tons were British. On July 1, 1934, Siam had 14 vessels with a gross tonnage of 9,186.

On March 31, 1933, there were 2,967 kilometres (1,857 miles) of State Railways open to traffic and 167 kilometres (104 miles) were under construction. The Northern Line runs from Ban Paji to Chiengmai (410 miles), the extreme northern terminus. The Southern Line (748 miles) runs from Bangkok down the Peninsula to the frontier station of Padang Besar, where it connects with the Federated Malay States Railway from Penang, and to Singapore. Another line branching off from Haad Yai runs along the East Coast of the Peninsula to Sungei Golok, where it connects with the Federated Malay States Line. There are branches to Singora, Nakorn-Sritamaraj and Kantang. The extension of the North-Eastern Line 164 miles) from Korat to Khonkaen has now been completed (1935) and is open to traffic (186 kilometres), while an extension of 153 kilometres from Khonkaen to Nonkai is under construction. The Korat-Ubol Line (312 kilometres) has now been completed and opened to traffic to Warindra, the station for Ubol. The extension from Krabinburi, the present terminus of the Eastern Line, to Aranya Pradesa on the Cambodian frontier (93 kilometres) was completed in 1927, making a total length of 255 kilometres. In January, 1922, a through express service between Bangkok and Penang was introduced; the distance is now traversed in 26 hours, using Diesel electric locomotives. A similar service between Bangkok and Chiengmai on the Northern Line was inaugurated in November, 1922, the journey being accomplished in 20 hours. The Northern and Southern Railway systems are linked together by means of a railway bridge over the Menam Chao Phya (opened January 1, 1927), and both systems terminate in the central railway station of Hua Lampong. All State Railways are under one management. Gross earnings of the State Railways in 1933–34 (April–March) were baht 10,785,357; working expenses, baht 5,940,737, and net receipts, baht 4,844,620. The number of passengers carried was 3,259,442, and the total amount of goods carried was 1,053,342 tons (not including packages traffic).

Private lines of an aggregate length of 66 miles include those (worked by companies) from Bangkok to Paknam at the mouth of the Menam, and from Bangkok to Tachin and Meklong on the coast to the west of the Menam, also from Thonburi to Bang Bua Thong, together with a tramway connecting the Northern Line (Northern branch) with Phrabat.

According to the report of Department of Ways for the year 1930–31, the length of state highways on March 31, 1929, was 1,423 miles, of which 871 miles were under maintenance, 54 miles under improvement, and 498 miles under construction. In addition there were 731 miles of provincial highways, particularly in the North-Eastern provinces. Of the above state highways, only 66 miles were classified as first-class road, the bulk being third-class road.

The following figures relate to civil aviation in 1933–34: mileage flown, 67,400; mail carried, 23,340 lbs.; goods carried, 4,595 lbs.; passengers carried, 21. Carrying of mails by military planes was superseded on August 24, 1931, by a civil air transport company.

In 1933–34 there were 761 post offices of which 300 were licensed or contract post offices, and 335 railway station offices. The volume of mail matter dealt with during the year aggregated 13,716,681 pieces. The value of inland money orders issued was 7,965,987 baht: foreign money orders issued, 49,758 baht; foreign money orders paid, 2,953 baht.

There were (1933–34) 649 telegraph offices. Number of inland telegrams was 276,184; foreign messages sent, 107,338; foreign messages received, 58,148; length of line, 9,345,598 kms.

In 1934 there were 24 telephone exchanges, 19 of which were in the provinces. Subscribers numbered 2,615. Number of calls was 17,363,200.

Three wireless stations on the Telefunken system have been erected, one at Bangkok, one at Singora, and one at Koh-Khan. The two former are under the control of the Siamese naval authorities, the third under that of the Post and Telegraph Department.

A new high-powered station, also on the Telefunken system, has been erected at Bangkok, and was opened on Jan. 15, 1929.

Direct wireless communication on a commercial basis was established with Germany, England, France, Java, Philippine Islands, Hong Kong, Japan and India.

Additional radio facilities for direct traffic with Europe consist of a beam transmitting station in Bangkok with a receiving station in Laksi.

Money, Weights and Measures.

In Bangkok there are branches of the Hong Kong and Shanghai Bank, the Chartered Bank of India, Australia and China, the Banque de l'Indo-Chine, the Mercantile Bank of India, and the Bank of Canton. A number of Chinese Banks have established branches here during recent years. There is also a branch of the Chartered Bank of India, Australia and China at Bhuket. A Siamese bank, with a British manager, was established under Royal Charter in 1906, with the name of the Siam Commercial Bank, Limited. It now has branches at Chiengmai and Nakawn Lampang in Northern Siam.

On April 1, 1913, the Siamese Treasury Savings Bank was opened with 529 depositors. By March 31, 1931, the number was 23,576, with a total deposit of 268,139*l.*; March 31, 1932, 344,209*l.*

Under the Currency Act of May, 1928, the unit of currency is the *baht*, divided into one hundred *satang*. The *baht* is a silver coin like the *tical* (a word of foreign origin) which it replaces. It weighs 15 grammes 900 fine, and is equivalent to 0·66567 grammes of fine gold, corresponding to a rate

of 11 *bahts* for 1*l.* sterling. Siam departed from the gold standard on May 11, 1932, and the circulation medium is almost entirely paper. Other silver coins are 50 *satang* and 25 *satang* pieces. The 10 and 5 *satang* pieces are nickel, and the 1 *satang* piece, bronze. Notes and *baht* coins are legal tender without limit as to amount; 5 and 25 *satang* pieces legal tender up to 5 *baht*, and nickel and bronze coins legal tender up to 1 *baht*.

The Government in 1902 began to issue currency notes (5, 10, 20, 100 and 1,000 bahts, and since October, 1918, 1 baht notes). On March 31, 1934, there were 10,139,318*l.* worth of currency notes in circulation; against these there was a reserve of 11,922,971*l.*, composed as follows:—sterling securities, 3,762,705*l.*; cash at call or seven days, 4,217,351*l.*; silver baht coins at face value, 3,942,915*l.*

The metric system was made compulsory, by a decree published on March 12, 1933, in the four metropolitan provinces of Bangkok, Ayuthia, Rajburi and Prachin, as from April 1, 1933. The actual weights and measures prescribed by law are: units of weight:—1 *Standard Picul* = 60 kilograms; 1 *Standard Catty* (1/100 Picul) = 600 grammes; 1 *Standard Carat* = 20 centigrammes. Units of length:—1 *Sen* = 40 metres; 1 *Wah* (1/20 Sen) = 2 metres; 1 *Sawk* (1/4 Wah) = 0·50 metre; 1 *Keup* (½ Sawk) = 0·25 metre. Units of square measure:—1 *Rai* (1 square Sen) = 1,600 sq. metres; 1 *Ngan* (1/4 Rai) = 400 sq. metres; 1 *Sq. Wah* (1/100 Ngan) = 4 sq. metres. Units of capacity:—1 *Standard Kwien* = 2,000 litres; 1 *Standard Ban* (1/2 Kwien) = 1,000 litres; 1 *Standard Sat* (1/50 Ban) = 20 litres; 1 *Standard Tanan* (1/20 Sat) = 1 litre.

Diplomatic and Consular Representatives.

1. Of Siam in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Phra Subarn Sompati (appointed March 5, 1933).

First Secretary.—Luang Siri Rajmaitri.

Third Secretaries.—Luang Chamnong Dithakar, Luang Bhadravadi, Khun Bibidh Virajjakar, Luang Dithakar Bhakdi and Luang Binich Akshara.

Attaché.—Khun Prakob Santisukh.

Consul-General.—R. D. Craig.

2. Of Great Britain in Siam.

Envoy Extraordinary and Minister Plenipotentiary.—Sir Josiah Crosby, K.B.E., C.I.E. (Appointed August 8, 1934.)

Consul-General at Bangkok.—John Bailey.

There are consular representatives at Chiengmai, Songkhla, and Nakawn-Lampang.

SPAIN.

(ESPAÑA.)

A REPUBLIC was proclaimed in Spain on April 14, 1931. (The first Republic continued from 1873 to 1875.)

General elections took place on June 28, 1931, to summon 'a Constituent Cortes' for the drafting of a Constitution and electing a President. The one-Chamber Parliament (Congress) sat for the first time on July 14, 1931. This Parliament was dissolved October 9, 1933, and new elections were held on November 19, 1933. The new Parliament is composed of 473 members, including four women, divided among the following parties:—Right Wing: Agrarians, 150; Monarchists, 38; Independents, 20. Centre: Republican Radicals, 104; Republican Conservatives, 17; Republican Democrats, 10; Catalonian League, 26. Left Wing: Socialists, 62; Republicans, 11; Catalonians, 24; Communist, 1. Unclassified, 10.

The Constitution of the Republic was voted on December 9, 1931.

President of the Republic.—Niceto *Alcala Zamora y Torres*; born July 6, 1877; elected December 10, 1931. Salary and allowance, 2,250,000 pesetas per annum.

For a list of the sovereigns and rulers of Spain, with dates of their accession, since the foundation of the Spanish Monarchy by the union of the crowns of Aragon and Castile, see the STATESMAN'S YEAR-BOOK, 1932, p. 1286.

Government and Constitution.

I. CENTRAL GOVERNMENT.

The Constitution of the second Spanish Republic contains the following fundamental principles:—That Spain is a democratic Republic of workers of all classes, organized in a régime of Liberty and Justice; that the Republic constitutes an integral State consistent with the autonomy of the Municipalities and Regions; that it has no official religion, and that freedom of conscience is granted to all citizens; that all citizens are equal before the law; that Castilian (Spanish) is the official language, and that no citizen can be compelled to know or make use of a provincial language, except with the limitations set forth on the Statutes of the Regions. Spain renounces

warfare as an instrument of national politics. The colours of the Republic are red, yellow and purple. The capital of the Republic is Madrid.

The legislative power rests with the people who exercise it by means of the *Cortes* (single chamber) or Congress of Deputies, who are elected for 4 years by universal suffrage, equal, direct and secret, on the system of proportional representation. All citizens over 23, without distinction of sex or civil status are eligible. Deputies, who are re-eligible indefinitely, are paid a salary of 1,000 pesetas per month besides travelling expenses. Electors, male or female, must be over 23.

Sixty days after the expiration of the mandate of the Cortes, or of its dissolution, new elections must take place, and the new Cortes shall sit thirty days as a maximum after the general elections are held. The Cortes will assemble without previous notification on the first law-day of February and October each year, and will sit at least during three months in the first period and two months in the latter. The Government and the Cortes have the initiative to make laws. The Cortes may authorize the Government to enact laws by decrees, on the recommendation of the Council of Ministers, on matters pertaining to the legislative power; with the limitation that such decrees can in no way refer to an increase of expenditures. The Cortes appoints from its own body a Permanent Committee, composed of 21 representatives elected proportionately from the different parties and presided over by the Speaker, which is entrusted with the suspension of public guarantees, the enacting of laws by decrees and the prosecution of members. The Cortes may propose a vote of censure on the Government or any of its Ministers, on the request of fifty of its members, but the Cabinet or the Minister in question is not obliged to resign in consequence unless the vote of censure is passed by an absolute majority of the Chamber. International agreements sanctioned by Spain and filed in the League of Nations, bearing on international law, are to be considered as constituting part of Spanish legislation; the government to produce before the Cortes in such cases the proper law for its adoption. The sanctioning of the laws voted by the Cortes can be submitted to a referendum, constituted by not less than 15 per cent. of the electors; but a referendum cannot affect the Constitution, the complementary laws, the ratification of International Agreements filed in the League of Nations, the Statutes of the Regions and the taxation laws. The people may also exercise their right of initiative in proposing laws to the Cortes, provided that the petition is made by 15 per cent. of the electors.

The President of the Republic is the Head of the State and personifies the Nation. He is elected conjointly by the Cortes and a number of 'compromisers' equal to that of Deputies. The 'compromisers' are elected by universal suffrage, equal, direct and secret. An additional clause in the Constitution prescribes that the Constituent Cortes shall elect the first President of the Republic by secret voting; an absolute majority of votes of all the Deputies in office being required for the proclamation.

The President of the Republic must be a Spanish citizen, over forty years, in full possession of his civil and political rights; the exceptions being military men in active service or on the retired list for not less than ten years, clergymen and ministers of the various churches and religions, members of reigning or ex-reigning families of any country whatsoever no matter how related to the head of such family. The President holds office for six years, and he cannot be re-elected until six years after the termination of his last mandate. The elections take place thirty days previous to the expiration of the presidential mandate. In case of absence or other causes his duties are to be assumed by the Speaker of the House, who in turn will be substituted in his duties by the Deputy-Speaker. Likewise, the

Speaker of the House assumes office as President of the Republic in case of vacancy, and the election of the new President is to be convoked not beyond eight days, the elections to take place within the thirty succeeding days. The Cortes will maintain its powers, even if dissolved, for the exclusive purpose of the election of President.

The President appoints and dismisses the Premier and, upon the latter's recommendation, his Ministers. The President is empowered to declare War, but he can only sign the declaration under the conditions prescribed in the Covenant of the League of Nations, and after being authorised by a special law. He also issues decrees countersigned by his Ministers; ordains measures of urgency to safeguard the integrity of the Nation, upon immediate notification of his action to the Cortes, negotiates, signs and ratifies International Agreements, political and commercial treaties, as well as those bearing on the public treasury. In general, any Agreement calling for legislation unless sanctioned by the Cortes shall not bind the Nation in any way. The agreements entered with the International Labour Bureau are to be submitted to the Cortes within limited time, and after approval the President's ratification is to be communicated to the League of Nations for its proper filing. Other International Treaties and Covenants ratified by Spain shall also be filed in the League of Nations. Secret Treaties and clauses of a similar nature are not binding. In case of Spain's withdrawal from the League of Nations the President must be authorised by the Cortes before passing the notification of retirement. The President has the faculty of enacting laws by decree when the Cortes are not assembled, on the recommendation and by unanimous accord of the government and with the approval of two-thirds of the Permanent Committee, on momentous matters in defence of the Republic; such decrees to be only of a provisional character until such time as the Cortes have sanctioned them. The President may at all times convoke extraordinary Cortes. He can suspend the ordinary sessions during one month in the first period (February) and fifteen days in the second period (October). He can dissolve the Cortes not more than twice during his tenure of office, either by a justified decree or by convoking new elections within sixty days; a second dissolution must be examined by the new Cortes in its first sitting and an adverse voting by an absolute majority implies dismissal of the President.

The President can be dismissed at any time; sixty per cent. of the members constituting the Cortes are required for filing the demand, and from that moment the President ceases his functions until after the demand has been examined and voted upon.

The Constitution allows to all citizens freedom of opinions and ideas, but may hold these rights in suspense by a government decree in cases of impending danger to the Nation. If the Cortes are not assembled at the time, they are to be convoked within eight days. The suspension of constitutional rights cannot exceed thirty days; any extension of time must be previously authorized by the Cortes or the Permanent Committee.

A Tribunal of Constitutional Guaranty is created with jurisdiction over the entire Nation, whose duty it will be to decide on the unconstitutionality of the laws; the protection of individual rights; discrepancies arising in legislation between the State and the autonomous regions and among one another; the examination and approval of powers of the 'compromisers' chosen for the election of President; the responsibility incurred by the President of the Republic, the Premier and Ministers, the President and Magistrates of the Supreme Court and the Attorney-General. The Cortes will appoint the President of the Guaranty Tribunal, whether a deputy or not, and among other members there will be a representative for each region.

The Constitution may be reformed either on the recommendation of the Government, or when proposed by a quarter of the members of the Chamber; in both cases the proposal must determine the changes at issue, and to take in consideration the reform requires the vote of two-thirds of the Deputies during the first four years of constitutional régime and an absolute majority hereafter; the Cortes then automatically become dissolved and new elections must be convoked within sixty days. The new Parliament thus elected will act as Constituent Cortes to decide on the reform, and thereafter as ordinary Cortes.

Other main points incorporated in the new Constitution is the establishment of divorce; the legitimacy of the offspring of unmarried couples, and the rural problem affecting land and property.

The Government was constituted as follows on October 4, 1934:—

Prime Minister.—Don Alejandro *Lerroux Garcia.*
Minister of Foreign Affairs.—Don Juan José *Rocha Garcia.*
Minister of Justice.—Don Rafael *Aizpùn Santafé.*
Minister of War.—Don Alejandro *Lerroux Garcia.*
Minister of Marine.—Don Gerardo *Abad Conde.*
Minister of Finance.—Don Manuel *Marraco Ramon.*
Minister of the Interior.—Don Eloy *Vaquero Cantillo.*
Minister of Education.—Don Joaquin *Dualde.*
Minister of Public Works.—Don José Maria *Cid Ruiz Zorrilla.*
Minister of Labour.—Don José *Oriol y Anguera de Sojo.*
Minister of Agriculture.—Don Manuel *Jimenez Fernandez.*
Ministry of Industry and Commerce.—Don Andres *Orozco Batista.*
Minister of Communications.—Don César *Jalon Aragon.*

II. Local Government.

The provinces are constituted by the association of Municipalities; Spanish dominions in Northern Africa will be organized under the autonomous principle in direct relation with the central government. All Municipalities will be autonomous in their respective spheres, and they will elect their *Ayuntamiento*, by universal suffrage, equal, direct and secret, which will be presided over by the *Alcalde*, elected from its own body, at whose side stand, in the larger towns, several *Tenientes de Alcalde.* Each island of the Canaries will have a corporation known as *Cabildo Insular*, to rule their special interests; the Balearic Islands may adopt a similar régime. Each province of Spain has its own Assembly, the *Diputacion Provincial*, the members of which are elected by the constituencies; the administration of the *Diputaciones Provinciales* is being radically reformed with the Republic.

The several regions in Spain have submitted to the Republican Government the autonomous principle, which the Constitution has embodied as follows: If one or more neighbouring provinces possessing similar historical and economical characteristics decide to form an autonomous region, consistent with the Spanish Nation, they will file their petition to the central government by means of a Statute, which must be passed for its proposal by the majority of Municipalities in the area. The approval of a Regional Statute requires the votes of at least two-thirds of the electors inscribed in the Census; in case of an adverse plebiscite five years must elapse before renewing the proposal of autonomy. The Statute can only come in force when approved by the Cortes. The federation of autonomous regions is in no way admitted. The Constitution excludes from the domain of the autonomous regions the following matters which the Central Government

alone may deal with: the nationalisation of citizens and adherence to constitutional rights; Church legislation; diplomatic and consular representation; declaration of war, treaties of peace and in general international intercourse; defence of public surety; national debt; army, navy and national defence; tariff reform and commercial treaties; nationalisation of ships; extradition laws; jurisdiction of the Supreme Tribunal; finance laws regulated by the State; system of communications controlled by the State, post and telegraphs, airways, etc.

Any province forming part of an autonomous region may renounce its autonomous régime and return to the provincial régime by a similar plebiscite as that required when soliciting the autonomy.

Catalonia.

The Catalan Statute was approved by the Cortes on Sept. 15, 1932, thus granting the autonomy to the region of Catalonia, composed of the four provinces of Barcelona, Gerona, Lerida and Tarragona, with an area of 12,000 square miles and inhabited by a population of approximately 3,000,000. The representative organ is vested on the *Generalitat*, which will be integrated by a Parliament, a President and the Executive Council. The President of the *Generalitat* is elected by the Catalonian Parliament, which consists of 85 members.

The official language is both Castilian (Spanish) and Catalan, but for official intercourse of Catalonia with the rest of Spain, and communication between the State authorities and those of Catalonia, Spanish is to be the only official language. By a decree of November 8, 1933, Catalan is the official language in all judicial matters. The first elections to Parliament were held on November 20. 1932, and Parliament was opened on December 6, 1932.

As a result of the rebellion of the 'Generalitat' on October 6, 1934, the Cortes voted on December 14, 1934, the indefinite suspension of the Catalan Statute, and approved a provisional régime in Catalonia, with the appointment of a Governor-General by the Central Government, until such a time when the Statute can be revised by the Cortes.

Governor-General of Catalonia.—Don Manuel *Portela-Valladares.* Appointed December 27, 1934.

Two other regions—the Basques and Galicia—have announced their statutes to the Cortes. On December 21, 1933, the Basques formally delivered their statute to the Cortes.

Area and Population.

Continental Spain has an area of 190,050 square miles, but including the Balearic and Canary Islands, the total area is 196,607 square miles. The growth of the population has been as follows:—

Census year	Population	Increase	Rate of annual increase
1857	15,464,340	—	—
1860	15,655,467	191,127	0·42
1877	16,631,869	976,402	0·37
1887	17,560,352	928,483	0·56
1897	18,065,635	505,283	0·29
1900	18,594,405	528,770	0·97
1910	19,927,150	1,332,745	0·74
1920	21,303,162	1,376,012	0·69
1930	23,563,867	2,260,705	1·06

Area and population of the fifty provinces :—

Province	Area in square miles	Estimated Population, Dec. 31, 1933	Pop. per sq. mile	Province	Area in square miles	Estimated Population, Dec. 31, 1933	Pop. per sq. mile
Alava	1,175	105,833	90·0	Lugo	3,814	468,295	122·7

The population of Ceuta (39,870) is included in that of Cádiz. Besides Ceuta, Spain has, on the African Coast, the Alhucema isles (pop. 1,190), the Chafarinas (390), Melilla (62,835), Peñon de la Gomera (260), Rio de Oro (386), and Nador (2,495). The North African possessions are no longer used as convict stations.

By Decree of September 21, 1927, the islands which form the Canary Archipelago were divided into two provinces, under the name of their respective capitals: Santa Cruz de Tenerife and Las Palmas. The province of Santa Cruz de Tenerife is constituted by the islands of Tenerife, Palma, Gomera and Hierro; and that of Las Palmas by Gran Canaria, Lanzarote and Fuerteventura, with the small barren islands of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara y Lobos.

The following were the estimated populations of the principal towns on December 31, 1933, viz. :—

Town	Pop.	Town	Pop.	Town	Pop.
Barcelona	1,060,504	San Sebastian	83,533	Huelva	48,074
Madrid	1,014,704	Las Palmas	81,858	Badajoz	45,473
Valencia	341,322	Oviedo	77,302	Pamplona	45,211
Sevilla	235,761	Cádiz	75,487	Albacete	44,931
Málaga	199,021	Coruña	77,825	Vitoria	41,550
Zaragoza	183,960	Lorca[1]	74,696	Mieres[1]	40,560
Bilbao	171,204	Alicante	77,039	Jaén	41,719
Murcia	164,044	Jerez[1]	67,076	Linares[1]	40,168
Granada	122,679	La Linea[1]	63,236	Burgos	41,174
Córdoba	112,177	S. Cruz (Canaries)	65,027	Lerida	39,078
Cartagena[1]	96,981	Gijon[1]	57,573	Sabadell[1]	37,529
Valladolid	95,448	Almeria	55,120	Castellon	37,480
Palma	91,553	Vigo[1]	53,091	Alcoy[1]	36,463
Santander	88,966	Salamanca	51,336	Logroño	36,634

[1] Population Census 1920.

The movement of population for 3 years was as follows:—

Years	Marriages	Births	Deaths	Surplus of births
1930	173,954	660,860	394,488	266,372
1931	175,233	649,276	408,977	240,299
1932	158,693	670,525	388,895	281,630

Emigration figures for 4 years as follows :—

Year	Male	Female	Total	Year	Male	Female	Total
1930	59,415	35,533	94,948	1932	40,612	25,009	65,621
1931	43,076	24,638	67,714	1933[1]	43,149	26,181	69,330

[1] Provisional figures.

Emigration from Spain is chiefly to Argentina, Cuba, Brazil, Uruguay, and Mexico.

Religion.

The new Republican Constitution in force (Dec. 9, 1931) declares that Spain has no official religion. The great majority of the population adhere to the Roman Catholic Faith. The Constitution guarantees liberty of worship and freedom of conscience. Religious bodies are now treated as Associations, to be governed by a special law. Cemeteries are placed under exclusive civil jurisdiction. The State will no longer support the clergy and the buildings, etc. of the Church. Religious orders who take the papal vote become dissolved and their properties and estates subject to nationalisation. The remaining orders are to be inscribed in a special register in charge of the Ministry of Justice; they are prohibited from buying property other than that intended for living and the practice of religion; prohibition of exercising industry, commerce or education; submission to taxation; obligation to render an annual account of their investments.

Within the Peninsula, apart from Portugal, there are 9 metropolitan sees, and 61 suffragan sees, the chief being Toledo, where the Primate resides. In 1930 there were in Spain 66 cathedrals, 22 collegiate churches, 20,612 parish churches, and 17,157 chapels and sanctuaries.

Education.

The latest census returns (1930) show that 47·22 per cent. of the population could read and write, of which 0·94 could read only; and 45·46 per cent. could neither read nor write. The remaining 7·32 per cent. corresponds to the infant population under 6 years.

The Constitution of the Republic ordains that primary education is to be compulsory and free. Education is to be lay, but the churches are authorized, under State inspection, to teach their respective doctrines in their own schools.

The country is divided into eleven educational districts, with the universities as centres. The total sum spent in 1932 was 198,847,205 pesetas.

In 1932, there were 36,398 public schools attended by 3,411,651 boys and

girls. Secondary education is conducted in 'institutions,' or middle-class schools, and there must be at least one of them in every province. There were in the year 1932, 101 institutions with 112,629 pupils (25,718 girls). These institutions prepare for the universities, of which there are eleven, attended by 33,633 students (2,026 women). The universities are at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Sevilla, Valencia, Valladolid, and Zaragoza. There are, besides, a medical and science faculty at Cádiz in connection with the University of Seville, and in the Canary Islands an educational establishment dependent on the University of Seville. In 1932 the total sum expended on education and the fine arts was 255,375,000 pesetas.

Justice and Crime.

Justice is administered by *Tribunales* and *Juzgados* (Tribunals and Courts), which conjointly form the *Poder Judicial* (Judicial Power). Judges and Magistrates cannot be removed, suspended or transferred except as set forth by law.

The Judicature is composed of:—1 *Tribunal Supremo* (Supreme High Court); 16 *Audiencias Territoriales* (Divisional High Courts); 50 *Audiencias Provinciales* (Provincial High Courts); 547 *Juzgados de Primera Instancia* (Courts of First Instance); and 9,359 *Juzgados Municipales* (District Court, or Court of Lowest Jurisdiction held by Justices of the Peace).

The *Tribunal Supremo* consists of a President (the new Constitution enacts that the appointment is to be made by the President of the Republic), three Courts of Justice, one for administrative purposes, and one for trying military cases (formerly under military jurisdiction); it is empowered with disciplinary faculties; is Court of Cassation in civil and criminal trials; decides in first and second instance disputes arising between private individuals and the State.

The *Audiencias Territoriales* have power to try in second instance sentences passed by judges in civil matters, and in first instance all criminal trials of the province.

The *Audiencias Provinciales* are Courts competent to try and pass sentence in first instance on all cases filed for delinquency. The Republic has re-instated the jury system, which was suppressed during the Dictatorship.

The *Juzgados Municipales* are constituted of a Judge and two Deputy Judges. This Court is competent to try small civil cases not exceeding 20,000 pesetas (£800) in value, and petty offences.

On July 1, 1925, the 'Court of Minors' (*Tribunal de Niños*) was established for trying cases of delinquency of boys and girls from 9 to 18 years of age. There is also the '*Tribunal Industrial*,' for deciding labour disputes. The new penal code, approved by the Cortes on September 6, 1932, abolished the death penalty (but this was re-established by the Cortes by decree of October 11, 1934) and also imprisonment for life. The maximum penalty (apart from the death penalty) for any offence is 30 years' imprisonment.

Old Age Pensions and Social Insurance.

By a law dated February 27th, 1908, the 'Instituto Nacional de Prevision' was created for the purpose of granting Old Age Pensions, and administering a system of social insurance. The funds of the Institution are made up of an endowment, annual State subsidy, and private and public donations. The maximum annual pension obtainable is 1,500 pesetas (£60).

Finance.

Revenue and expenditure for five years, in thousands of pesetas :—

—	1931	1932	1933 [1]	1934 [1]	1935 [1]
	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas
Revenue	3,778,827	4,546,233	4,722,157	4,653,890	4,237,640
Expenditure	3,967,993	4,430,364	4,727,283	4,697,510	4,507,620

[1] Estimates.

The budget for the fiscal year 1934 [1] is made up as follows :—

Revenue	Pesetas	Expenditure	Pesetas
Direct taxes	1,463,328,300	President of the Republic.	2,250,000
Indirect Taxes	1,383,708,756	Legislature	10,000,000
Monopolies	1,062,875,000	Public Debt	973,012,935
State properties—		Pensions	284,320,671
Income	49,383,500	High Court of Finance	1,630,400
Sales	505,000	Presidency of the Council of Ministers	37,415,549
Resources of the Treasury	762,356,321	Ministry of Foreign Affairs	22,294,052
		Ministry of Justice	50,541,213
		,, ,, Army	433,594,361
		,, ,, Marine	260,693,753
		,, ,, the Interior	416,681,584
		,, ,, Public Works	873,298,723
		,, ,, Public Instruction & Fine Arts	310,789,204
		,, ,, Labour	84,025,485
		,, ,, Agriculture	123,997,250
		,, ,, Finance	70,628,024
		Cost of collecting Revenue	155,432,676
		Spanish Possessions	2,271,693
		Expenditure in Morocco	157,687,479
		Special Expenditures	456,718,241
Total	4,722,156,871 (188,886,275*l.*)	Grand Total	4,727,283,293 (189,091,332*l.*)

[1] The budget has been extended for the first quarter of 1935.

The Public Debt of Spain on July 1, 1932, amounted to 20,451,314,719 pesetas, composed as follows :—

	Pesetas, nominal.
Internal 4 per cent.	5,244,391,519
External 4 per cent.	910,881,200
Redeemable 4 per cent. (1908)	119,482,500
Redeemable 5 per cent. (1917)	925,137,500
Redeemable 5 per cent. (1920)	1,113,600,000
Redeemable 5 per cent. (1926) without tax	225,000,000
Redeemable 5 per cent. (1927) without tax	3,546,550,000
Redeemable 5 per cent. (1927) taxed	2,024,237,500
Redeemable 4½ per cent. (1928) without tax	500,000,000
Redeemable 4 per cent. (1928) without tax	1,086,610,000
Redeemable 3 per cent. (1928) without tax	1,992,787,500
Redeemable 5 per cent. (1929) without tax	500,000,000
Redeemable 5 per cent. Railway Loan (1st)	494,575,000
Redeemable 4½ per cent. Railway Loan (2nd)	296,325,000

	Pesetas, nominal.
Redeemable 4½ per cent. Railway Loan (3rd)	500,000,000
Treasury Bonds for Development of Industry	131,095,000
Redeemable 5 per cent. Morocco Loan	35,500,000
Treasury Bonds, 6 per cent.	305,142,000
Treasury Debentures, 5½ per cent.	500,000,000

Defence.

Army.

Military service in Spain is compulsory. The total term of service is for 18 years. The law in force (Decree of February 20, 1925) provides for active service in the army to be normally for 2 years. At present the term of service with the Regular Army is 1 year, and 5 years in the First Reserve. Conscripts are called up in two contingents.

The army has undergone a radical change under the Republic. Thirty-seven infantry regiments have been suppressed, the rank of captain-general has been abolished and all lieutenant-generals, with one or two exceptions, have been placed on the retired list.

The new organization consists of three High Inspections, under Major-Generals, stationed at Madrid. The army in times of peace will comprise eight divisions distributed over the different provinces, a division of Cavalry in Madrid, and the forces in the Balearic and Canary Islands, besides the Military Command in Africa.

A division consists of two infantry brigades, each comprising two regiments of two battalions; a squadron of cavalry; a brigade of artillery, with two regiments; a battalion of engineers (sappers), with two technical sections; a squadron of aviation with an observation unit; artillery park; sanitary, veterinary and administrative groups.

A division of cavalry consists of three cavalry brigades, each of three regiments; a regiment of artillery, an aviation squadron for observation; cyclist and automobile groups; sanitary and veterinary sections.

The forces in Baleares are composed of two infantry regiments, a regiment of coast artillery and a mixed group; two mixed groups of sappers and telegraphy; sanitary and administrative sections.

In the Canary Islands there are two regiments of infantry; two mixed groups of artillery; two mixed groups of sappers and telegraphy; sanitary and administrative sections.

Morocco is divided into two military districts, each formed of two infantry regiments, two sections of cyclists; the Foreign Legion; two sections of cavalry; a battalion of engineers, with radiotelegraphy and automobile groups; two groups of aviation; two marine companies; three groups of native troops with three infantry 'tabors,' and one of cavalry.

The total number of generals in active service is 84; chiefs and officers, 7,665; non-commissioned officers, 1,338; sergeants, 5,811; corporals, 12,262; musicians, 1,275; soldiers, 105,450. In Africa there are 3 generals; 1,821 chiefs and officers (of which 65 are Moors), and 44,350 of other ranks and soldiers, of which 9,600 are natives and 6,000 belong to the Foreign Legion.

There are also the Guardia Civil and the Carabineros. The former is a constabulary, and the latter a military police used as Customs guard on the frontier. Both are recruited from the army and under military discipline. The actual strength of the Guardia Civil is 22,499; cavalry, 5,318. Carabineros: infantry, 14,530; cavalry, 333.

In 1934–35, 145,000 recruits were called to the colours.

Spain has several fortresses which guard the frontiers and the coast. On the Western Pyrenees, Oyarzun and Pamplona; on the central Pyrenees, Jaca; and on the eastern Pyrenees, Gerona; on the Portuguese side, Badajoz (an old fortification); and finally on the coast, Ferrol, Cádiz, Cartagena, Mahon (Balearic Islands) and Ceuta (Africa). The military estimates for 1933 amounted to 433,594,361 pesetas.

NAVY.

Launched	Name	Displacement	Armour		Main Armament	Torpedo Tubes	Indicated Horse-Power	Designed Speed
			Water-line	On Guns				
					Battleships.			
1914	Jaime I.	15,700	8	10	8 12-in.; 20 4-in.	—	15,500	19·5
1913	España							
					Cruisers.			
1920	Republica	5,550	3	—	9 6-in.	4	25,500	25·5
1923	Mendez Nuñez	4,725	3	—	6 6-in.	4	45,000	29
1925	Libertad	7,850	3	—	8 6-in.; 4 4-in. A.A.	12	80,000	33
1925	Almirante Cervera							
1928	Miguel de Cervantes							
1931	Canarias	10,000	2	1	8 8-in.; 8 4·7-in. A.A.	12	90,000	33
1932	Baleares							

There are 14 flotilla leaders, 3 destroyers, 12 torpedo boats, 5 gunboats and 13 submarines. The construction of 12 more submarines and 2 minelayers has been authorized. Of these, both the minelayers and 3 submarines are in hand, the former at the dockyard at Ferrol, which is worked by a British syndicate, employing Spanish workmen.

A naval wireless telegraphic station, Telefunken system, with a range of 300 miles, is situated at San Fernando (Cadiz). There are also wireless stations at Cartagena and Ferrol. The naval air service is manned by personnel seconded from the navy. The cruisers *Canarias* and *Baleares* are each equipped with a catapult and 2 seaplanes.

For 1934 the strength of the navy was fixed at 18,000 sailors. Total number of officers in active service in the navy, including all departmental corps: 1,407. Reserve: 196.

Production and Industry.

Spain is a preponderatingly agricultural country. The General Land Reform Bill, voted by the Republican Cortes on September 15, 1932, provides for expropriation of land on a large scale. Uncultivated land and other land capable of a better yield under proper cultivation are to be expropriated; likewise, estates belonging to the extinguished aristocracy not made productive for agriculture and only used for hunting and pleasure. Lands within 2 kilometres of villages having less than 25,000 inhabitants are also liable to expropriation if the proprietors own estates in the village producing an income over 1,000 pesetas and are not directly cultivating them. The

indemnity agreed ranges from 5 per cent. on lands producing a revenue of 15,000 pesetas to 20 per cent. for revenues of 200,000 pesetas and over.

The productive area was calculated (1932) at 44,274,790 hectares (109,358,731 acres) or 87·7 per cent., and the remainder, 6,176,898 hectares (15,256,938 acres) or 12·3 per cent., as being unproductive. A large part of the productive area is not under direct cultivation, but modern methods and up-to-date machinery are now being employed.

Of the total area of Spain (50,451,688 hectares, or 124,615,669 acres), in 1932, 2,061,893 hectares (5,092,876 acres) were devoted to olive culture (4·08 per cent.); 1,539,716 hectares (3,803,098 acres) to vineyards (3·05 per cent.); 503,844 hectares (1,244,495 acres) to fruit (0·99 per cent.); 16,526,823 hectares (40,821,253 acres) to agriculture and gardens (32·2 per cent.); and 23,642,514 hectares (58,397,009 acres) to pasture and mountains (46·8 per cent.). The value of the agricultural production in 1932 was estimated at 10.414,797,917 pesetas.

In 1921 Spain started the cultivation of tobacco; in 1932, 10,233 acres planted yielded 150,636 cwts., of a total value of 12,650,103 pesetas (Canary Islands included).

The area under the principal crops and the yield (for 3 years) were as follows:—

	Area.			Yield.		
	1931	1932	1933	1931	1932	1933
	Acres	Acres	Acres	Cwts.	Cwts.	Cwts.
Wheat . . .	11,240,113	11,243,773	11,187,500	73,170,660	100,267,102	75,244,000
Barley . . .	4,641,950	4,834,603	4,652,500	39,505,966	57,725,948	43,548,000
Oats . . .	1,984,781	1,924,868	1,617,500	12,096,904	16,609,432	11,894,000
Rye . .	1,515,296	1,513,352	1,475,000	10,720,586	13,160,304	10,518,000

In 1932, 3,539,636 acres were under vines (3,524,443 acres in 1931) and produced 7,160,353,629 pounds of grapes (6,331,249,205 pounds in 1931), yielding ordinary red and white wines to the extent of 559,354,356 gallons (503,555,580 gallons in 1931). In 1932 there were 26,361,317 orange trees planted and 815,102 lemon trees, yielding 23,420,950 cwts. of oranges and 1,181,888 cwts. of lemons, showing an aggregate value of 235,220,888 pesetas (oranges) and 17,082,845 pesetas (lemons). In 1932, 209,332 acres of beet root sugar planted yielded 40,695,550 cwts., and 8,415 acres of cane sugar planted yielded 4,034,564 cwts. In 1932, 1,032,126 acres of potatoes planted yielded 100,515,116 cwts., producing a value of 848,649,317 pesetas. In 1932, 66,218 acres of onions planted yielded 12,810,720 cwts., producing a value of 85,426,755 pesetas. In 1932–33, olive trees planted covered an area of 4,638,912 acres, yielding 36,197,166 cwts. of olives and 6,976,436 cwts. of oil. 29,297,130 almond trees planted in 1932, covering an area of 349,801 acres, produced 1,998,894 cwts. of almonds of a total value of 97,946,914 pesetas. Hazel nut trees planted in 1932 amounted to 2,991,641 covering an area of 27,718 acres, and produced 397,070 cwts. of nuts of a total value of 17,131,165 pesetas. Other products are esparto, flax, hemp, pulse; and Spain has important industries connected with the preparation of wine and fruits. Silk culture is carried on in Valencia, Murcia, and other provinces (523,176 kilos were produced in 1932). Spain produces yearly some 3,000 tons of honey and 750 tons of beeswax. The number of hives is approximately 619,000. There are 14 cane sugar factories and 48 beet-sugar factories in Spain; in 1932, 17,500

tons were produced of the former and 114,300 tons of the latter. In 1932, the total number of resinous pine-trees amounted to 6,716,700. The total number of alcohol factories in 1932 was 3,237, producing brandy and spirituous liquors to the extent of 98,150,420 litres. Beer factories in operation amounted to 43; yielding 71,921,200 litres.

The number of farm animals in 1931 was estimated as follows:—Horses, 562,877; mules, 1,174,508; asses, 1,002,578; cows, 3,653,667; sheep, 20,046,532; goats, 4,607,946; pigs, 5,102,165; camels (Canary Islands), 4,327.

Spain is rich in minerals. Iron is abundant in the provinces of Vizcaya, Santander, Oviedo, Navarra, Huelva, and Seville; copper in the provinces of Seville, Córdoba, and Huelva; coal is found in Oviedo, Leon, Gerona, Valencia, and Córdoba; zinc in Santander, Murcia, Guipúzcoa, and Vizcaya; cobalt in Oviedo; lead in Murcia, Jaen, and Almería; manganese in Oviedo, Huelva, and Seville; quicksilver in Ciudad Real and Oviedo; silver in Guadalajara; sulphate of soda in Burgos; salt in Guadalajara; sulphur in Murcia and Almería; phosphates in Cáceres and Huelva. Vanadium was reported to have been discovered in Asturias in 1929.

In 1933 workers employed in connection with the mining industries were as follows: 132,674 men, 4,253 women, and 8,660 boys and girls under 18. The total value of the mineral output in 1933 was 469,438,376 pesetas at the pit mouth, there being 2,393 productive mining concessions covering an area of 305,722 hectares. Mining accidents caused 138 deaths. The number of factories engaged in the mining and metallurgical industries amounted to 1,881 in 1933, with a total output of 940,706,436 pesetas. The quantities and values of the more important minerals in 1933 were as follows:—

Minerals	Metric tons	Value, Pesetas	Minerals	Metric tons	Value, Pesetas
Anthracite . .	572,440	26,455,175	Iron pyrites .	1,571,940	43,757,921
Asphalt . .	6,830	228,640	Coal . . .	5,426,560	215,621,067
Mercury . .	10,037	1,586,926	Lignite . .	301,014	10,042,657
Sulphur . .	54,037	2,522,700	Manganese .	2,834	92,335
Zinc . . .	94,537	12,758,438	Silver . .	—	—
Copper. . .	696,514	14,540,381	Lead Ore . .	114,528	21,754,493
Tin . . .	262	46,285	Salt . . .	156,756	1,414,159
Phosphorite. .	14,507	496,490	Wolfram . .	42	72,600
Iron . . .	1,815,484	25,433,704			

In 1933 the pig iron production was 340,000 metric tons, and steel 455,000 metric tons, compared with 296,481 metric tons and 532,403 metric tons in 1932 respectively.

The total production of cement in 1933 amounted to 1,156,050 metric tons. There are 30 important cement factories. The superphosphate output was 1,200,000 metric tons in 1933. Potash production in 1933, 95,000 tons of K_2O (65,000 tons in 1932).

Spain has considerable manufactures of cotton goods, principally in Catalonia. In 1930 there were 60,083 looms, including 5,820 automatic, and 19,489 lace and knitting looms; in woollen manufactures there are 6,700 looms with 274,800 spindles. There are in Spain about 165 paper mills, making writing, printing, packing and cigarette paper. There are 29 glass-making factories.

In the Spanish fisheries the most important catches are those of sardines, tunny fish, and cod. The total production of the fishing industry amounted in 1932 to 319,763 tons, representing a value of 264,482,753 pesetas.

Commerce.

Imports and exports (in thousands of pesetas, gold) :—

Year	Imports	Exports	Year	Imports	Exports
1927	2,585,521	1,895,281	1931	1,175,899	990,309
1928	3,004,991	2,183,478	1932	975,712	742,314
1929	2,737,048	2,112,949	1933	836,635	673,042
1930	2,447,533	2,456,754	1934	860,824	612,511

The foreign trade was distributed as follows in regard to classes of commodities :—

	Imports		Exports	
	1933	1934	1933	1934
	Pesetas (gold)	Pesetas (gold)	Pesetas (gold)	Pesetas (gold)
Raw material . . .	309,466,007	303,042,098	108,979,617	98,089,023
Manufactured goods . .	375,546,609	411,993.398	114,651,180	113,822,201
Foodstuffs	147,472,755	142.125,233	444,365,608	398 299,860
All other	4,147,238	3,663 350	5,045,172	2,299,952
Total . . .	836,635,209	860,824,079	673,041,577	612,511,036

The following table shows the various classes of imports and exports for two years :—

Description	Imports		Exports	
	1932	1933	1932	1933
	Pesetas (gold)	Pesetas (gold)	Pesetas (gold)	Pesetas (gold)
Stone, minerals, glassware and pottery	120,512,278	100,560,978	44,986,316	44,617,588
Metals and their manufactures .	44,567.953	41,253,090	38,276,891	38,418,120
Drugs and chemical products . .	136,814,435	119,728,4 5	38,150,293	44,712,596
Cotton and its manufactures . .	113,615,077	99.309,155	24,375,341	17,172,541
Other vegetable fibres and manufactures (*including Packing*) .	24,457,580	17,827,715	3,549,985	3,193,738
Wool & hair & their manufactures	13,9 8,641	9.789,135	5,438,7 5	5,278,388

Animals and their products . .	34,490,541	31,618,797	19,959,864	23.049.016
Machinery, vehicles and vessels .	123,351,167	131,389,232	3,038,464	4,206,113
Alimentary substances, including grain, sugar, wine, &c. . .	194,276.170	147,472,755	514,542.584	444,365,608
Various	27,972.583	24.234,635	1,796,248	1,899,620
Gold (bar and coin) . . .	70,800	—	227,874	1,275,887
Silver	19 ,913	1,225,075	3,704,481	3,200,709
Tobacco (special)	37,472,367	27,707,044	95,826	10,554
Totals	975,711,62	836,633,209	742,313,671	673,041,577

In 1933 the total value of wine exported was Pts. (gold) 59,580,000.

The following table shows the distribution of the commerce of Spain (general and special imports, and general exports) in 1932 and 1933, in thousands of pesetas :—

Country	Imports from		Exports to	
	1932	1933	1932	1933
	1,000 Pesetas (gold)	1,000 Pesetas (gold)	1,000 Pesetas (gold)	1,000 Pesetas (gold)
United States	161,116	137,395	52,272	53,794
United Kingdom	104,217	87,497	191,820	158,198
Germany	100,908	97,096	66,379	59,684
France	75,094	64,460	136,367	135,555
Argentine Republic	59,304	20,362	38,975	26,924
Italy	33,976	24,344	29,082	23,105
India	29,774	28,949	180	407
Russia	27,850	20,039	385	2,538
Sweden	26,692	26,884	11,089	8,695
Philippine Islands	24,519	18,707	2,847	2,699
Egypt	23,346	18,435	313	264
Holland	23,195	25,181	32,373	34,948
Belgium	21,626	30,602	30,935	33,722
Switzerland	—	17,261	—	13,635
Cuba	—	9,372	—	11,742
Other countries	264,095	219,118	149,297	107,132

The customs receipts and post dues in 1932 amounted to 655,418,401 pesetas, and in 1933 to 613,062,042 pesetas.

The quantity and value of wine imported into the United Kingdom from Spain were as follows for five years (Board of Trade Returns):—

—	1929	1930	1931	1932	1933
Quantity (gallons)	2,684,160	2,604,113	2,976,949	2,399,046	3,186,589
Value (£)	786,617	777,165	925,255	690,281	985,103

Besides wine, the following were the leading imports from Spain into the United Kingdom in the two years (Board of Trade Returns):—

—	1932	1933	—	1932	1933
	£	£		£	£
Iron ore	667,389	722,554	Oranges	3,441,361	3,605,637
Pyrites	245,877	212,923	Grapes	663,192	488,205
Copper ore	159,226	189,886	Raisins	243,114	193,352
Mercury	134,708	113,025	Almonds	724,547	773,670
Esparto, &c.	188,955	157,906	Potatoes	1,683,702	878,898
Lemons	146,222	202,030	Onions	763,191	517,445

The chief British exports to Spain in 1933 were machinery, of the value of 405,418*l.*; iron and steel manufactures, 257,816*l.*; coal, 948,755*l.*, ammonium sulphate, 326,779*l.*; cotton piece goods, 32,753*l.*; motor vehicles, 659,787*l.*

Total trade between Spain and the United Kingdom in thousands of pounds for five years (Board of Trade Returns):—

	1930	1931	1932	1933	1934
Imports from Spain into U. Kingdom	16,638	14,248	12,501	11,166	11,504
Exports to Spain from U. Kingdom	9,335	5,294	5,224	4,493	4,797
Re-exports to Spain from U. Kingdom	527	222	354	214	272

Shipping and Navigation.

The merchant navy of the Republic contained on July 1, 1934, 782 steamers and motorships of 1,164,489 tons gross, and 58 sailing vessels of 13,138 tons gross—a total of 1,177,627 tons gross.

Barcelona, Bilbao and Cadiz are the chief maritime centres.

The foreign shipping entered and cleared at Spanish ports in two years was as follows:—Entered, 1931: 19,402 vessels with a tonnage of 31,431,473; 1932: 18,068 vessels with a tonnage of 30,495,624 Cleared, 1931: 18,060 vessels with a tonnage of 28,725,210; 1932: 18,412 vessels with a tonnage of 28,346,269. Of the vessels in 1932, 7,689 of 10,851,870 tons (entered) were Spanish and 8,608 vessels of 11,375,310 tons (cleared) were Spanish.

Communications.

In 1932 the total length of highways and roads in Spain was 92,798 kilometres (57,627 miles). In 1932, 3,215 kilometres of new motor roads were completed.

The total length of the railways in Spain in 1932 (adhered to the Supreme Counsel of Railways) was 13,619 kilometres (8,458 miles), of which 11,526 kilometres (7,158 miles) are of normal gauge (1·67 metres, or 5·48 feet), and 2,093 kilometres (1,300 miles) are of varying gauges, chiefly 1 metre (3·28 feet). The official gauge of the principal Spanish railways has hitherto, for strategic reasons, been purposely kept different from that of France, and in consequence of this passengers are obliged to change trains at the frontier stations. The attempt made in 1882 to remedy this state of affairs was not successful.

In 1931 the total length of tramways in Spain was 2,000 kilometres (1,242 miles).

The whole of the Spanish railways belongs to private companies, but nearly all have obtained guarantees or subventions from the Government. The State tax on tickets and merchandise for the year 1932 amounted to 60,647,815 pesetas. There are 22 companies of normal gauge and 55 of narrow gauge, the most important being those in the North, with 3,803 kilometres (2,362 miles); Madrid-Saragossa-Alicante (system Antigua and Catalana), 3,670 kilometres (2,279 miles); Andaluces, 1,644 kilometres (1,021 miles); Madrid-Caceres-Portugal and West, 1,587 kilometres (985 miles); South of Spain, 397 kilometres (246 miles); La Robla to Valmaseda and Luchana (narrow gauge), 312 kilometres (194 miles); and Calatayud-Teruel-Valencia (Central de Aragon), 299 kilometres (186 miles). A scheme was approved by the Government in July, 1929, for the electrification of the main lines of Spanish railways. In 1932 the construction of a subway was started in the city of Madrid to link the various lines within the town.

The Post Office carried in 1932, in the inland service, 716,082,360 correspondence of all classes; in the international service, 168,518,712 correspondence in general. There were 9,578 post-offices. Receipts, 104,384,650 pesetas; expenses, 78,971,720 pesetas.

The length of lines of telegraphs in Spain in 1932 was 54,010 kms.; the total number of interior messages sent and received (1932) was 25,565,312. International messages sent 1,291,558, received 1,441,170, transit 207,034. The number of telegraph offices was 2,892.

In October, 1924, the entire telephone system of Spain was taken over by the 'International Telephone and Telegraph Corporation' of New York, and a Spanish Company constituted 'Compañia Telefonica Nacional de

España,' whose purpose is to provide an automatic service throughout the urban system. On December 29, 1926, this service was inaugurated in Madrid, and the system is being rapidly installed all over the country. In 1932 there were in service 2,815 exchanges, with 270,542 telephones. Number of interurban and international calls, 16,785,612; number of telephone messages, 5,921,895.

The 'Compañía Nacional de Telegrafía sin Hilos' holds the Government concession for the Public Service with ships, and between the Peninsula and the Canary Islands, and the International Service with England, Italy, Austria, France, Switzerland, America and Germany, as well as various special Press Services. They have 10 wireless stations of the Marconi system.

The republican Government has cancelled the airway concession, and the State operates at present the two lines: Madrid–Barcelona and Madrid–Seville; in 1932, 1,322 flights were made, carrying 6,374 passengers, 24 tons of goods and 90 tons of mail. Barcelona–Cadiz or Huelva–Canaries Air Mail Service is in course of inauguration. From the Canary Islands the mails will be taken by steamer to Pernambuco and thence to Rio and Buenos Aires by aeroplane. The formation of a new company is also announced, called Lineas Aereas Interinsulares Canarias, which will run a service between Las Palmas and Santa Cruz de Tenerife. Two services will run daily in each direction. The capacity will be 12 passengers and 2 tons of cargo. There is also the French line from Toulouse to Casa-blanca, which touches Spain at Alicante.

Banking and Credit.

On January 1, 1922, a contract between the Bank of Spain and the Government came into force, according to which the Government participates in the net profits of the Bank, up to certain limits. The note issue was prorogued for another 25 years, up to December 31, 1946. The capital of the Bank was increased from 150,000,000 pesetas to 177,000,000 pesetas. The Bank is now authorized further to increase the capital, up to the limit of 250,000,000 pesetas.

On January 26, 1935, the position of the Bank was as follows:—

	1,000 Pesetas		1,000 Pesetas
Cash in hand: gold	2,268,048	Property	72,442
Cash in hand: silver	687,549	Capital and reserve	249,800
Cash in hand: bronze	2,282	Notes in circulation	4,591,476
Public Treasury gold account	75,023	Deposits and Accounts current	971,782
Advances to Treasury	150,000	Discounts	997,605

Savings bank deposits (Popular Savings Banks) in Spain, December 31, 1932, amounted to 2,157,811,762 pesetas, distributed over 2,174,735 accounts. Post Office Savings Banks, which were created under the law of June 4, 1909, were opened on March 12, 1916. On December 31, 1932, there were 951,625 current accounts, representing 298,546,308 pesetas. Savings Departments of ordinary banks had 580,557 depositors with 1,020,163,840 pesetas to their credit. The total number of depositors on December 31, 1932, was 3,706,919, and the amount standing to their credit, 3,476,521,650 pesetas.

The nominal value of the money coined in Spain from 1868 to 1907 was: gold, 1,103,705,030 pesetas; silver, 1,330,589,807 pesetas. In 1905–07 no gold was coined; in 1906–07, no silver was coined. No coinage was struck during the years 1908 and 1909. In 1910, money coined to the value of 1,976,180 pesetas in 50 centimo pieces (silver) to replace money retired from circulation. In 1911, 286,843 pesetas of 50 centimo pieces were coined, as well as 60,286 pesetas of bronze centimo pieces. In 1913, 1,429,149 pieces

of 1 centimo and 1,639,500 pieces of 2 centimos were coined. A new coin was put into circulation in 1925, consisting of a nickel piece representing 25 centimos; 5,000,000 pesetas were struck during the years 1925–29, and 2,000,000 pesetas in 50 centimo pieces (silver) during 1926–27 to replace money withdrawn from circulation. In 1927 the 2 pesetas coin was withdrawn from circulation.

Money, Weights, and Measures.

The *Peseta* of 100 *Centesimos* is of the nominal value of a pre-war franc, 9½*d.*, or 25·22 pesetas to the pound sterling. The exchange value of the peseta has not been restored to parity since the war.

Gold coins in use are 25, 20, 10, and 5-peseta pieces. Silver coins are 5-peseta, 2-peseta, 1-peseta, and 50-centime pieces.

Both gold and silver coins are of the same weight and fineness as the corresponding pre-war French coins. Under a law of July 29, 1908, the Government is withdrawing from circulation the spurious 5-peseta pieces which had become common. Gold coinage is not in general circulation.

Theoretically, there is a double standard of value, gold and silver, the ratio being 15½ to 1. But of silver coins only the 5-peseta piece is legal tender, and the coinage of this is restricted.

On January 1, 1859, the metric system of weights and measures was introduced in Spain. But, besides these, the old weights and measures are still largely used. They are:—The *Quintal* = 220·4 lbs. avoirdupois; the *Libra* = 1·014 lbs. avoirdupois; the *Arroba*, for wine = 3½ imperial gallons; for oil = 2¾ imperial gallons; the *Square Vara* = 1·09 vara = 1 yard; the *fanega* = 1½ imperial bushel.

Diplomatic and Consular Representatives.

1. Of Spain in Great Britain.

Ambassador.—Señor Don Ramón Pérez de Ayala (appointed April 16, 1931).

Counsellor.—Don Pedro Garcia Conde.

First Secretary.—Don Fernando Valdés.

Second Secretary.—Don Jose F. Villarverde.

Military Attaché.—Lieutenant-Colonel Don Felix Riaño.

Naval Attaché.—Captain Don Manuel Medina Morris.

Military Air Attaché.—Commander Don José Legorburu.

Agricultural Attaché.—Don José Da Casa Calzada.

Commercial Attaché.—Don Manuel Orbea.

There are Consular representatives at Cardiff, Glasgow, Liverpool, Newcastle, and Southampton; and Consular agents in all the principal towns.

2. Of Great Britain in Spain.

Ambassador.—The Rt. Hon. Sir George Dixon Grahame, G.C.M.G., G.C.V.O. (appointed July 31, 1928).

Secretaries.—O. A. Scott, D.S.O., and P. J. Dixon.

Military Attaché.—Major the Hon. W. Fraser, D.S.O., M.C.

Naval Attaché.—Capt. C. F. Hammill, R.N.

Consul-General (at Barcelona).—N. King, C.M.G.

There are Consular representatives at Bilbao, Cadiz, Coruña, Madrid, Seville, Malaga, Almeria, Valencia, and other places.

Colonies.

The area and population of the colonial possessions of Spain are approximately as follows:—

Colonial Possessions	Area: English square miles	Population
Possessions in Africa:		
Rio de Oro and Adrar	109,200	840 [2]
Ifni	965	20,000
Spanish Guinea	10,036	140,000
Fernando Po, Annobon, Corisco, Great Elobey, Little Elobey	795	28,846
Spanish Morocco [1]	7,700	750,000
Total, Africa	128,696	934,686

[1] *See* Morocco. [2] White population.

For administrative purposes the Canary Islands are considered part of Spain. The area of the islands is 2,807 square miles, and their population (1931) 564,873.

Rio de Oro and Adrar stretch from the Wadi Draa 29° N. and 11° 4′ W. to Cape Blanco 20° 46′ N. and 17° 3′ W. Politically there are three zones:—(1) Colony of Rio de Oro, 26° N. to 20° 46′ N., an area of 65,500 square miles; (2) the Protectorate, between 27° 40′ N. and 26° N. bordered on the east by 8° 40′ W., an area of 34,700 square miles; (3) the occupied territory, between 27° 40′ N. and the Wadi Draa, an area of about 9,000 square miles, settled by various treaties, 1900 to 1912. The capital of this colony is Villa Cisneros. There is no town called Rio de Oro, the name being applied to the arm of the sea and the colony generally. The budget for 1929 amounted to 6,947,274 pesetas. There is little or no agriculture. Fishing is the principal occupation of the inhabitants.

Ifni was ceded to Spain by Morocco in 1860. By the Franco-Spanish agreement of 1912 it extends along the West Coast of Morocco to the north of Wadi Draa, from Wad Nun on the south to Wad Bu Sedra on the north, and a distance of 15 miles inland from the coast. Until April 6, 1934, the occupation was purely nominal; on that date the Spanish flag was hoisted for the first time. Area, 965 square miles, population, 20,000. There are several small harbours and villages; the population is engaged in fishing, and in cultivating dates and garden produce.

The Spanish territory on the Gulf of Guinea extends from the Muni to the Campo river and the Cameroons, its eastern boundary being on the meridian of 11° 20′ E. of Greenwich. The capital is Santa Isabel, in the Island of Fernando Po, with a population of 8,345. The principal mountain is known as the Pico de Santa Isabel, or Clarence Peak (9,185 feet). The island is considered one of the most fertile spots on the West Coast of Africa. The other possessions of Spain in the Gulf of Guinea comprise the Islands of Annobon (7½ square miles), Little Elobey (22 acres), Great Elobey (¾ square mile) and Corisco (5½ square miles), and the district of Rio Muni on the mainland (9,470 square miles), the principal town of which is Bata. The coast region is low and marshy and contains vast forests. The vegetation is luxuriant and at places along the coast there are Spanish, French, and English factories. But there are no harbours and the rivers are all inaccessible to vessels. The population of Fernando Poo is 20,873. There are about 250 to 300 Europeans in the island, about 30 of these being British. The population of Little Elobey is 222. Great Elobey is covered with bush; its population is 123. Corisco has a

population of 1,438 and Annobon of 1,204, while the population of Rio Muni territory is estimated at 130 whites and 89,000 natives. All the colonies are under the control of a Governor-General, resident at Santa Isabel. A Sub-Governor is appointed to the district of Bata and another to the district of Elobey, which includes the Islands of Corisco and Annobon. The aborigines of Fernando Poo are called Bubis. Those of Elobey and Corisco are mostly of the Benga tribe, but like the people of Annobon they take the names of their respective islands. In Bata the Pamwes are the principal tribe. There are Catholic and American Presbyterian missions at work among the natives.

SWEDEN.

(SVERIGE.)

Reigning King.

Gustaf V., born June 16, 1858. Succeeded to the throne on the death of his father, Oscar II., December 8, 1907. Married, Sept. 20, 1881, to Princess Victoria, born August 7, 1862, died April 4, 1930, daughter of Friedrich, Grand Duke of Baden.

Children of the King.

I. The Crown Prince *Gustaf Adolf*, Duke of Skåne, born Nov. 11, 1882, married: 1. June 15, 1905, to Princess Margaret Victoria, born January 15, 1882, died May 1, 1920, daughter of Prince Arthur, Duke of Connaught; 2. November 3, 1923, to Louise, Princess of Battenberg, born July 13, 1889. Offspring (of the 1st marriage): Prince Gustaf Adolf, born April 22, 1906; married, October 19, 1932, to Sibylle, Princess of Saxe-Coburg-and-Gotha, born January 18, 1908; issue Princess Mugaretha Désirée Victoria, born October 31, 1934; Prince Sigvard (Sigvard Oscar Bernadotte), born June 7, 1907; married, March 8, 1934, to Erika Patzek (has lost his right to succession to the throne); Princess Ingrid, born March 28, 1910; Prince Bertil, born Feb. 28, 1912; Prince Carl Johan, born October 31, 1916.

II. Prince Wilhelm, Duke of Södermanland, born June 17, 1884, married, May 3, 1908, to Grand Duchess Maria Pavlovna, born April 19, 1890, daughter of Grand Duke Paul Alexandrovitch of Russia, divorced March 17, 1914. Issue, Lennart Bernadotte, born May 8, 1909 (has lost his right to succession to the throne); married, March 11, 1932, to Karin Nissvandt.

Brothers of the King.

I. Prince *Oscar* Bernadotte, Count of Wisborg, born Nov. 15, 1859. Renounced his succession to the throne and married, March 15, 1888, Ebba Munck of Fulkila, born Oct. 24, 1858.

II. Prince *Carl*, Duke of Västergötland, born Feb. 27, 1861. Married August 27, 1897, to Princess Ingeborg, born Aug. 2, 1878, daughter of King Frederik VIII. of Denmark. Issue, Princess Margaretha, born June 25, 1899, married May 22, 1919, to Prince Axel of Denmark; Princess Märtha, born March 28, 1901, married March 21, 1929, to the Crown Prince Olaf, of Norway; Astrid, Queen of the Belgians, born Nov. 17, 1905, married Nov. 4, 1926, to King Leopold III. of Belgium; and Prince Carl, born Jan. 10, 1911.

III. Prince *Eugen*, Duke of Närke, born Aug. 1, 1865.

King Gustaf V. is the fifth sovereign of the House of Ponte Corvo and great-grandson of Marshal Bernadotte, Prince of Ponte Corvo, who was elected heir-apparent of the crown of Sweden by the Parliament of the Kingdom, Aug. 21, 1810, and ascended the throne Feb. 5, 1818, under the name of Carl XIV. Johan. He was succeeded at his death, March 8, 1844, by his only son Oscar. The latter died July 8, 1859, and was succeeded by his eldest son Carl XV., at whose premature death without male children, the crown fell to his next surviving brother, the late King.

The royal family of Sweden have a civil list of 1,302,650 kronor. The sovereign, besides, has an annuity of 300,000 kronor, voted to King Carl XIV. Johan and his successors on the throne of Sweden.

As to the dissolution of the Union with Norway, *see* under *Norway*.

The following is a list of the kings and queens of Sweden, with the dates of their accession, from the accession of the House of Vasa:—

House of Vasa.	
Gustaf I.	1521
Eric XIV.	1560
Johan III.	1568
Sigismund	1592
Carl IX.	1599
Gustaf. II. Adolf	1611
Christina	1632
House of Pfaltz.	
Carl X.	1654
Carl XI.	1660
Carl XII.	1697
Ulrika Eleonora	1718
House of Hesse.	
Fredrik I.	1720
House of Holstein-Gottorp.	
Adolf Fredrik	1751
Gustaf III.	1771
Gustaf IV. Adolf	1792
Carl XIII.	1809
House of Bernadotte.	
Carl XIV. Johan.	1818
Oscar I.	1844
Carl XV.	1859
Oscar II.	1872
Gustaf V.	1907

Constitution and Government.

The fundamental laws of the Kingdom of Sweden are:—1. The Constitution or *Regerings-formen* of June 6, 1809; 2. The amended regulations for the formation of the Diet of June 22, 1866 (modified by Acts passed in 1909–1933); 3. The law of royal succession of September 26, 1810; and 4. The law on the liberty of the Press of July 16, 1812. The King must be a member of the Lutheran Church. His Constitutional power is exercised in conjunction with the Council of State or (in legislation) in concert with the Diet, and every new law must have the assent of the crown. The right of imposing taxes is, however, vested in the Diet. This Diet, or Parliament of the realm, consists of two Chambers, both elected by the people. The First Chamber consists of 150 members. Their election takes place by the members of the 'Landstings,' or provincial representations, and electors of six towns, not represented in the 'Lands-

tings.' The constituencies are 19, arranged in 8 groups, in one of which an election takes place in September every year. All members of the First Chamber must be above 35 years of age, and must have the right to vote in municipal affairs. They are elected for the term of eight years. The Second Chamber consists of 230 members elected for 4 years by universal suffrage, every man and woman over 23 years of age, and not under legal disability, having the right to vote. The country is divided into 28 constituencies, in each of which one member is elected for every 230th part of the population of the Kingdom it contains. All men and women who are entitled to vote have the right to stand for election, but only in their own election areas. The manner of election to both Chambers is proportional, and regulated by a special election law. The places to be given to the different groups of voting papers are decided according to the d'Hondt rule. The members of both Chambers obtain salaries for their services, at the rate of 3,000 kr. and 4,000 kr. for members living in or outside the capital, for each ordinary session, besides travelling expenses. The salaries and travelling expenses of the deputies are paid out of the public purse.

The executive power is in the hands of the King, who acts under the advice of a Council of State, the head of which is the Prime Minister. The Ministry (Socialist), appointed on September 24, 1932, is composed as follows:—

Prime Minister.—P. A. *Hansson.*
Minister of Foreign Affairs.—Richard J. *Sandler.*
Minister of Justice.—Justice Karl J. D. *Schlyter.*
Minister of Defence.—Ivar T. *Vennerström.*
Minister for Social Affairs.—F. Gustav *Möller.*
Minister of Communications.—Henning V. *Leo.*
Minister of Finance.—Dr. Ernst J. *Wigforss.*
Minister of Education and Ecclesiastical Affairs.—J. Arthur *Engberg.*
Minister of Agriculture.—P. Edvin *Sköld.*
Minister of Commerce.—J. Fritjof *Ekman.*
Ministers without Portfolio.—Professor B. Östen *Undén*, Karl S. *Levinson.*

All the members of the Council of State are responsible for the acts of the Government.

The second chamber, elected September, 1932: 58 Moderates, 36 of the Agrarian Party, 24 Liberals and members of the Liberal Democratic Party, 104 Socialists and 8 Communists. The upper chamber: 48 Moderates, 20 of the Agrarian Party, 19 Liberals and members of the Liberal Democratic Party, 62 Socialists, and 1 Communist.

The provincial administration is entrusted in Stockholm to a Governor, and in each of the 24 counties to a prefect, who is nominated by the King. As executive officers of the prefects there are 489 sub-bailiffs. The right of the people to regulate their own local affairs is based on the municipal laws of June 6, 1930. Each rural parish, and each town, forms a commune or municipality in which all men and women over 23 years of age, and not under legal disability, who have paid the local taxes for at least one of the preceding three years, are voters. In small communes and towns the parish or town assembly may itself decide on all questions of administration, police and communal economy. It may, however, elect a parish or town council to decide on the questions, and all communes with more than 1,500 inhabitants have to do so. These councils are named *Kommunalfullmäktige* in the country, and *Stadsfullmäktige* in the towns. Ecclesiastical affairs are in all communes with more than 5,000 inhabitants, dealt with by councils,

named '*Kyrkofullmäktige.*' Each county has a county council (Landsting) elected by men and women who enjoy municipal suffrage, and have completed their 27th year. Towns having a population of at least 50,000 are in their right to separate from the 'Landstings.' Towns which are administered separately by their municipal councils are Stockholm, Göteborg, Malmö, Norrköping, Hälsingborg and Gävle. As in elections for the Diet, so in the elections of municipal representatives, of members of the 'Landstings,' &c., the method of election is proportional. Women are eligible for communal offices.

Area and Population.

I. Progress and Present Condition.

The first census took place in 1749, and it was repeated at first every third year, and subsequently, after 1775, every fifth year. At present, a general census is taken every ten years, besides which there are annual calculations of the people.

The area and population of Sweden, according to estimates for December 31, 1932, and 1933, are as follows:—

Governments (Län)	Area: English square miles	Population Dec. 31, 1932	Population Dec. 31, 1933	Pop. per square mile 1933
Stockholm (city)	55	519,711	521,618	9,841·8
Stockholm (rural district)	2,986	268,219	270,526	94·9
Uppsala	2,059	138,222	138,482	69·9
Södermanland	2,630	187,967	187,934	78·0
Östergötland	4,266	310,605	311,284	80·8
Jönköping	4,449	233,335	234,288	57·2
Kronoberg	3,826	155,293	155,320	45·2
Kalmar	4,456	231,679	31,924	54·8
Gotland	1,220	57,738	57,873	48·1
Blekinge	1,173	145,646	146,188	130·2
Kristianstad	2,488	247,220	248,223	103·8
Malmöhus	1,871	514,131	515,456	282·0
Halland	1,901	151,208	151,840	82·8
Göteborg and Bohus	1,948	463,232	465,638	246·4
Älvsborg	4,919	315,492	317,052	70·3
Skaraborg	3,269	242,517	242,287	77·8
Värmland	7,427	271,666	272,719	40·4
Örebro	3,561	218,511	218 783	67·2
Västmanland	2,609	161,155	161,290	64·9
Kopparberg	11,649	249,937	250,237	23·0
Gävleborg	7,609	277,729	280,285	39·9
Västernorrland	9,924	280,873	281,501	30·2
Jämtland	19,967	135,677	136,086	7·4
Västerbotten	22,838	207,820	210,381	9·8
Norrbotten	40,742	202,281	204,351	5·4
Lakes Vänern, Vättern, Mälaren, Hjälmaren	3,505	—	—	—
Total	173,347	6,190,364	6,211,566	39·2

In 1933 there were 3,066,888 males and 3,144,678 females.

The growth of the population has been as follows:—

Census year	Population	Increase per ct. per annum	Census year	Population	Increase per ct. per annum
1880	4,565,668	0·91	1920	5,904,489	0·67
1910	5,522,403	0·72	1930	6,141,571	0·39

With the exception of 30,247 Finns, 7,162 Lapps, and some thousands others, the Swedish population (1920) is entirely of the Scandinavian branch of the Aryan family.

On December 31, 1920, there were 22,811 foreigners in Sweden, including subjects of Finland 5,897, Germany 4,532, Norway 2,996, Denmark 2,730, Russia 1,885, the United States 1,072, the United Kingdom and Ireland 487, other states 3,212.

For occupational census, *see* THE STATESMAN'S YEAR-BOOK, 1928, p. 1319.

MOVEMENT OF THE POPULATION.

1. *Births, Deaths, and Marriages.*

Year	Total living Births	Of which Illegitimate	Stillborn	Marriages	Deaths exclusive of Stillborn	Surplus of Births over Deaths

1929	6,336	11,019	6,951	1933	7,276	2,417	682

II. PRINCIPAL TOWNS.

In 1860 the town population numbered only 434,519, in 1900 1,103,951, and at the beginning of 1932, 2,038,774, showing an increase of from 11 per cent. of the whole population of Sweden (in 1860) to 33 per cent. (in 1932).

Towns over 10,000 inhabitants at the beginning of 1934 :—

Stockholm	521,618	Karlskrona	28,482	Luleå	13,428
Göteborg	252,721	Karlstad	25,666	Falun	13,415
Malmö	132,090	Lund	25,500	Trälleborg	13,254
Norrköping	62,266	Halmstad	24,844	Kristinehamn	12,868
Hälsingborg	57,872	Kalmar	20,410	Västervik	12,666
Borås	40,580	Landskrona	18,901	Umeå	11,981
Gävle	39,099	Sundsvall	18,457	Härnösand	11,941
Orebro	38,483	Mölndal	16,935	Nyköping	11,926
Eskilstuna	33,368	Uddevalla	15,517	Söderhamn	11,435
Jönköping	32,069	Östersund	15,085	Ystad	11,378

Uppsala	31,560	Södertälje	14,442	Skövde	11,009
Västerås	31,229	Kristianstad	14,269	Visby	10,835

Religion and Education.

The mass of the population belong to the Lutheran Protestant Church, recognized as the State religion. There are 12 bishoprics (Uppsala being the

metropolitan see) and 2,564 parishes at the beginning of 1934. At the census of 1920, the number of 'Evangelical Lutherans' was returned at 5,880,941, the Protestant Dissenters numbering, Baptists, 7,265, and Methodists, 5,452. Of other creeds, there were 3,425 Roman Catholics (under a Vicar Apostolic resident at Stockholm), 6,469 Jews, and 937 others. A few civil disabilities attach to those not of the national religion. The clergy are chiefly supported from the parishes and the proceeds of the Church lands.

The Kingdom has two universities, at Uppsala (founded in 1477) and Lund (founded in 1668), the former having 3,180 and the latter 2,860 students in the autumn of 1934. There are also a State faculty of medicine in Stockholm (founded in 1810), with 841 students, and private universities in Stockholm (founded in 1877), philosophical and law faculties, with 1,566 students, and Göteborg (founded in 1889), philosophical faculty, with 365 students. In Stockholm and Göteborg there are also academies of commerce. In 1933 there were 136 public secondary schools, with 42,518 pupils; 55 people's high schools, 5,564 pupils; 2 high and 8 elementary technical schools, about 4,000 pupils; military schools, navigation schools, agricultural schools, veterinary and other special schools; besides institutions and schools for the deaf mutes and the blind. Public elementary instruction is gratuitous and compulsory (since 1842), and children not attending schools under the supervision of the Government must furnish proofs of having been privately educated. The school age is 7 to 14 years. In 1933 there were in the elementary schools, 28,351 teachers and 662,698 pupils.

Justice and Crime.

The administration of justice is entirely independent of the Government. Two functionaries, the Justitie-Kansler, or Chancellor of Justice, and the Justitie-Ombudsman, or Attorney-General, exercise a control over the administration. The former, appointed by the King, acts also as a counsel for the Crown; while the latter, who is appointed by the Diet, has to extend a general supervision over all the courts of law. Since 1915 there is a Militie-Ombudsman, also appointed by the Diet, exercising a control over the military laws. The Kingdom, which possesses one Supreme Court of Judicature, is divided (beginning of 1933) into 3 high court districts and 205 district courts divisions, of which 88 are urban districts and 117 country districts.

In town these district courts (or courts of first instance) are held by the burgomaster and his assessors; in the country by a judge and 12 jurors—mostly peasant proprietors—the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. In Sweden trial by jury only exists for affairs of the liberty of the Press.

Finance.

Revenue and Expenditure for six years are shown as follows (18·16 kronor = 1*l.*):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1929/30	45,047,709	44,662,532	1932/33	58,835,492	58,758,286
1930/31	46,278,991	45,072,116	1933/34	58,040,903	53,565,041
1931/32	48,387,698	49,386,662	1934/35[1]	60,922,700	60,922,700

[1] Estimates.

The budget of revenue and expenditure for the budget year July 1, 1934–June 30, 1935, was as follows:—

Revenue		Expenditure	Ordinary expenses	Extra-ordinary expenses	Total
(a) *State revenues:*	Kronor	(a) *Actual Expenses:*	Kronor	Kronor	Kronor
Taxes:					
Capitation tax	1,050,000	Royal Household.	1,304,650	329,350	1,634,000
Tax on incomes and property, &c.	154,050,000	Justice	10,367,192	3,110 908	13,478,100
Succession duty and other stamp-duties	55,000,000	Foreign Affairs	3,879,600	4.308,600	8,188,200
Motor-car duty	75,000,000	Defence	97,926,615	13,877,885	111,804,500
Customs	121,000,000	Interior	48,362,180	88,497,320	136,859,500
Excise on spirits, malt and tobacco	241,500,000	Communications.	21,803,100	66,324,000	88,127,100
Miscellaneous.	45,975,985	Finance	41,005,500	13,592,500	54,598,000
(b) *Net receipts from productive funds of the State:*		Education and Ecclesiastical Affairs	93.530,959	46,369,341	139,900,300
Business of the State:		Agriculture	14,307,120	53,362,280	67,669,400
Railways	12,000,000	Commerce	9,479,700	1,868,400	11,348,100
Posts, telegraphs and telephones	48,500,000	Pensions	9,454,554	23,063,546	32,518,100
Waterfall works	17,500,000	Expenses for the Diet, &c.	—	—	4,222,600
Domains	10,000,000	Interest on the national debt	—	—	98,623,000
Others	30,000	Unexpected expenses	—	—	1,000,050
Interest on shares in the Luossavaara-Kiirunavaara Co., Ltd.	100		To be paid with loans	To be paid with other revenues	
Interest on shares in the Swedish Tobacco Monopoly Co., Ltd.	1,595,000	(b) *Improvement of State property and reduction of debt:*	Kronor	Kronor	
Interest on outstanding loans	14,751,600	Business of the State	62,336,000	4,000,000	66,336,000
Interest on fund of excise duty on spirits	900,000	Loan Funds of the State	18,535,000	7,490,000	26,025,000
(c) *Shares in the profits of Bank of Sweden*	7,000,000	Amortization of the national debt	—	42,774,400	42,774,400
Revenues of the Swedish National Debt Office	17,800,000	Fund for share subscription	5,000,000	—	5,000,000
(d) *Capital assets taken into use.*	582,665	Fund for advances to the Public Treasury	196,250,250	—	196,250,250
(e) *Loans*	282,121,250				
Total revenue	1,106,356,600	Total expenditure	—	—	1,106,356,600

On December 31, 1934, the public liabilities of the Kingdom, contracted principally for productive purposes (railways, &c.), were as follows:—

	Kronor		Kronor
Funded loan of 1886 with 3½ int.	41,992,000	Funded loan of 1890 with 3½ int.	8,077,333
,, ,, 1887[1] ,, 3⅚ ,,	65,667,000	,, ,, 1894 ,, 3 ,,	16,878,600
,, ,, 1888 ,, 3 ,,	24,183,111	,, ,, 1899 ,, 3½ ,,	20,887,920

[1] These bonds may be redeemed by the National Debt Board at six months' notice.

	Kronor

Total (Jan. 1, 1934)	2,360,564,382

Defence.

Army.

The military forces are recruited on the principle of universal service, but aided by a voluntarily enlisted *personnel* which forms the permanent cadres for training purposes. In June, 1925, the latest defence scheme was accepted by the Diet.

Liability to service commences at the age of 20, and lasts till the end of the 42nd year. The men belong to the active army or Beväring for 15 years; and then for 8 years to the Landstorm. The initial period of training for the main part of the infantry is 90 days (150 days for 20 per cent. of the annual quota), 140 days for cavalry, artillery, and engineers. The infantry is called up for regimental training periods twice for 25 days each time (3 times for 20 per cent. of the annual quota). The cavalry, artillery and engineers have 2 training periods of 30 days.

The army is organized in 4 divisions, 1 brigade, the troops of Upper Norrland and of Gotland. There are 22 infantry, 4 cavalry and 9 artillery regiments (corps). The establishment in 1933 was 2,296 officers and 25,954 other ranks.

The total number on the rolls of the "Beväring" amounts to about 575,000.

The strength of the reserve of officers and N.C.O.s of the reserve were 3,236 and 2,482 respectively.

The Landstorm amounts to about 240,000 of all ranks.

The infantry is armed with the Mauser rifle (calibre 6·5 mm.), heavy machine-gun, model 14 (calibre 6·5 mm.), light machine-gun, model 21 (calibre 6·5 mm.) and mortar m/29 (calibre 8 cm.); the cavalry is armed with short rifle (Mauser, calibre 6·5 mm.), sword, heavy machine-gun, model 14 (calibre 6·5 mm.), light machine-gun, model 21 (calibre 6·5 mm.), and mortar m/29 (calibre 8 cm.); the field artillery have the Krupp 7·5 cm. Q.F. gun. The field artillery has also 10·5 cm. and 15 cm. howitzers. The heavy artillery is armed with 10 cm. gun and 15 resp. 21 cm. howitzers.

The military budget for 1934-35 amounts to 66,612,912 kronor for the army.

Air Force.

The Swedish Air Force consists of a chief, an air staff, four flying corps, and several aviation training schools, bases, depôts, and factories. The Air Force, in 1933–34, numbered 1,140 all ranks, with 91 active and 76 instructional aeroplanes.

Navy.

The Swedish Navy is maintained principally as a coast-defence force.

The following is a list of the principal ships:—

Laid down	Name	Displacement (standard tons)	Maximum armour: On belt	Maximum armour: On guns	Armament	Torpedo tubes	Indicated horse power	Maximum speed knots
1894 1896	Oden . . . . Thor	3,350	10	8	2 10-in.; 6 4·7-in. .	—	5,000	16
1900 1902	Åran . . . . Vasa . . . . Tapperheten . Manligheten .	3,715	7	7½	2 8·2-in.; 6 6-in. .	2	7,400	17
1904	Oscar II. . .	4,150	6	7½	2 8·2-in.; 8 6-in. .	2	9,000	18
1930	Gotland. . .	4,600	—	1	6 6-in.; 4 3-in. A.A	6	33,000	27
1903	Fylgia . . .	4,125	4	5	8 6-in.	2	13,000	22
1913	Sverige . .	7,010	8	8	4 11-in.; 8 6-in; 4 3-in. A.A. . . .		20,000	22·5
1915	Gustaf V. . . Drottning Victoria . . .	7,010	8	8	4 11-in.; 8 6-in.; 4 3-in A.A. . . .		22,000	22·5

There are 12 destroyers, 3 old torpedo-gunboats, 43 torpedo and vedette boats, one mining vessel, and 16 submarines, besides sundry depôt ships and small craft. Building: *Gotland* (see above), 2 destroyers, 4 submarines, 4 vedettes.

The personnel of the Royal Navy is divided into three classes, viz.: 1. The Active List; 2. The Reserve; 3. The *Beväring* (Conscripts). On the active list are 5 flag-officers, 8 commodores, 35 captains, 111 commanders and lt.-commanders, 100 lieutenants, 46 sub-lieutenants, 528 warrant officers, and 3,239 petty officers and men, while about 360 officers belong to the Reserve.

On the active list of the Royal Coast Artillery are 1 general, 2 colonels, 4 lieut.-colonels, 7 majors, 32 captains, 34 lieutenants, 16 sub-lieutenants, 107 warrant officers, and 624 petty officers and men.

Production and Industry.

I. Agriculture.

Sweden has always been an agricultural country. In 1751 only 9·5 per cent. of the population depended for a livelihood on the various industries and commerce; in 1870 the percentage had advanced to 12·5, in 1900 to 29·1, in 1910 to 37·8, and in 1920 to about 44·2 per cent., so that to-day the population of Sweden is about equally divided in the pursuit of agriculture on the one hand and commerce and industries on the other.

According to the census of agriculture taken in the autumn of 1932, the number of farms in cultivation was 428,614; of these there were of 2 hectares and under, 121,238; 2 to 20 hectares, 271,887; 20 to 100 hectares, 33,097; above 100, 2,392. Of the total land area of Sweden (41,024,000 hectares), 3,756,000 hectares were under cultivation, 1,091,000 hectares under natural meadows, and 22,243,000 hectares under forests, the products of which form a staple export. The estimated forest area is given as 23,181,200 hectares, and the total amount of wood as 1,417 million cubic metres.

The following table shows the area and yield of the chief crops for 2 years:—

Crop	Area (hectares)		Produce (tons)	
	1933	1934	1933	1934
Wheat	323,434	290,446	794,799	772,276
Rye	221,080	235,248	460,471	525,129
Barley	113,089	99,899	216,018	215,708
Oats	623,783	658,992	1,062,521	1,221,384
Mixed corn	262,975	239,444	531,170	552,418
Leguminous crops[1]	23,981	24,767	40,984	41,508
Potatoes	132,274	131,498	1,977,498	1,942,411
Sugar beet	50,574	50,616	1,838,914	1,861,929
Fodder-roots	87,970	74,855	3,075,447	3,019,362
Hay	1,640,948	1,666,099	4,789,275	4,961,323

[1] Peas, beans, and vetches.

The value of all crops was estimated in 1932 at 920 million kronor; in 1933 at 945 million kronor, and in 1934 at 1,040 million kronor. In 1933, the live-stock was estimated as follows: Horses, 659,000; head of cattle, 3,086,000; sheep and lambs, 575,000; pigs, 1,583,000.

II. Mines and Minerals.

Mining has been from time immemorial the leading industry of Sweden, which was the biggest producer of iron in Europe until the use of coal for the manufacture of pig-iron revolutionized that industry. The lack of fossil fuel is the reason why at present mining in Lappland merely concerns itself with the raw products, though experiments made in recent years have carried the problem of electric production of iron ore a good step forward. There were raised in 1933, throughout the Kingdom, 2,698,750 tons of iron ore. The pig-iron produced amounted in 1933 to 323,073 tons, and in 1934 to 522,600 tons. Of iron ore, in 1933, 3,150,636 tons, and of pig-iron 65,065 tons were exported. There were also raised in 1933, 12,190 tons of silver and lead ore, 3,080 tons of copper ore, 46,340 tons of zinc ore, 6,220 tons of manganese ore, 366,360 tons of auriferous arsenic ore, and 86,300 tons of sulphur pyrites. The lead produced amounted to 3,000 kilograms, the copper to 6,767,000, the zinc to 206,000, the tin to 22,000. There are not inconsiderable veins of coal in the southern parts of Sweden, giving 348,921 tons of coal in 1933. The most important produce of the Swedish quarries is paving stone; the amount produced for sale in 1933 had a value of 5,135,106 kronor. In 1933 there were 45,765 persons (1,191 young people under 18) engaged in the mining and metallurgical industries.

III. Industries.

The industries of Sweden are spread fairly well over the whole country. The mining of iron ore has reached its highest development north of the Polar circle, and the most important sawmills are located along the shores of the Gulf of Bothnia. The production of iron and steel has taken place in central Sweden since the earliest times in Swedish history; pig iron is produced chiefly in Sandviken, Domnarvet, Uddeholm, and Fagersta. Cream separators, ball-bearings, lighthouse apparatus, telephone supplies, motors, and many kinds of electrical machinery are among the highly specialised products of the metallurgical industries. The porcelain factory of Gustavsberg and the glass factories of Kosta and Orrefors produce wares that have achieved a high reputation in the markets of the world. Innumerable

factories for the production of finished products are scattered all over the countryside.

The timber and wood-work industries of Sweden are of great importance. The public forests have an area of 7,865,618 hectares, of which crown and ecclesiastical forests extend to 6,095,000 hectares. The latter yielded, in 1931, 6,051,313 cubic metres of timber. In 1933 there were in Sweden 1,012 sawmills and planing mills with 30,268 workers who turned out sawn or planed timber to the value of 196,668,000 kronor; 1,085 factories for joinery and furniture with 14,688 workers, the output for the year being valued at 69,111,000 kronor; 100 factories for wood-pulp with 17,215 workers, output 240,483,000 kronor; and 77 paper and pasteboard mills with 16,321 workers, output 165,701,000 kronor.

The following are some data for the most important Swedish industries :—

Branch of Industry	No. of establishments		Average No. of workers		Value of output (1,000 Kronor)	
	1932	1933	1932	1933	1932	1933
Wood and paper industry .	2,794	2,681	91,222	86 719	689,560	736,642
Iron and steel works . .	60	65	19,014	19,597	138,157	161,511
Iron, steel, and metal goods factories	847	858	23,831	23,936	175,046	183,527
Mechanical workshops . .	1,543	1,563	46,588	45,075	389,667	376,498
Brick, porcelain, & glass factrs.	326	311	14,414	13,879	54,723	52,674
Flour and grain mills . .	1,023	1,032	3,465	3,439	141,376	130,954
Sugar refineries . . .	5	5	1,982	2,008	66,644	74,610
Tobacco factories . . .	9	9	2,364	2,146	130,509	121,933
Dairies	1,401	1,368	4,962	4,886	129,395	138,622
Textiles	767	808	61,089	61,975	454,501	466,012
Tanneries and shoe factories.	277	282	12,428	12,359	102,592	103,591
Match factories . . .	12	11	4,151	3,470	20,704	15,913
Other chemicals . . .	375	392	8,326	8,861	165,356	187,266
Electric power and gas works	679	684	5,776	5,793	171,537	179,057

The total number of industrial factories (including mines and quarries) was in 1933, 14,175, and in 1932, 14,296. The total power used in industry amounted to 4,499,000 effective h.p. in 1933 and 4,373,000 effective h.p. in 1932.

In 1933, 293,113 men, 72,302 women, 19,254 boys, and 8,512 girls (under 18 years of age) were employed in factories.

IV. Fisheries.

The total value of the Göteborg and Bohus fishing industry in 1932 was estimated at 14,363,559 kronor.

Commerce.

The total customs-duties levied in 1929 amounted to 161,189,000 kronor, in 1930 to 156,843,000 kronor, in 1931 to 153,346,000 kronor, in 1932 to 124,508,000 kronor, and in 1933 to 109,156,000 kronor.

The imports and exports of Sweden, unwrought gold and silver and coin not included, have been as follows (in 1000 kronor):—

	1930	1931	1932	1933	1934
	1000 Kr.	1000 Kr.	1000 Kr.	1000 Kr.	1000 Kr.
Imports	1,662,175	1,427,541	1,154,864	1,095,889	1,298,546
Exports	1,550,351	1,122,408	947,398	1,078.668	1,293,896

The following were the values of the leading imports and exports for two years (in thousands of kronor), unwrought gold and silver and coin not included :—

—	Imports 1933	Exports 1933	Imports 1934[1]	Exports 1934[1]
	1000 Kronor	1000 Kronor	1000 Kronor	1000 Kronor
Live animals and animal substances	27,326	70,541	29,150	72,781
Vegetable products	173,383	5,370	157,815	22,428

Products of the foodstuffs industry: beverages, tobacco, fodder	60,133	9,541	58,531	10,598
Mineral and mineral manufactures	188,182	51,765	208,629	95,581
Chemical products, colours, etc	104,530	40,389	121,889	39,950
Hides, skins and fur skins; also manufactures thereof	30,903	25,741	35,162	24,215
Wood and cork; also manufactures of such materials	10,477	186,007	14,077	217,497
Paper pulp, cardboard and paper; also manufactures thereof	12,722	354,700	13,802	387,469
Textile materials and manufactures thereof	198,636	20,599	252,484	25,408
Non-precious metals, and manufactures thereof	102,010	159,110	155,910	196,997
Machines, apparatus and electric plant	63,432	87,623	90,289	108,493
Means of conveyance	21,382	21,703	44,411	40,765
Other articles	79,407	40,571	98,501	45,923
Total	1,095,889	1,078,668	1,298,546	1,293,896

[1] Preliminary figures.

A national Swedish trade-mark was introduced (1911) by Sveriges Allmänna Handelsförening (General Commercial Association of Sweden). The upper half of the mark shows the three royal Swedish crowns, on a light-blue ground, and the words 'Svensk Tillverkning' (Swedish manufacture) are shown on a light-yellow ground below.

The following table shows the value of the trade with the principal countries with which Sweden deals :—

Country	Imports[1] from (1933)	Exports[1] to (1933)	Imports[1] from (1934)	Exports[1] to (1934)
	1000 Kronor	1000 Kronor	1000 Kronor	1000 Kronor
Great Britain and Ireland	197,685	290,299	254,474	332,280
Germany	319,760	115,267	340,014	180,006
Denmark	63,004	72,136	75,705	86,566
Norway	37,149	55,364	48,728	83,661
Finland	10,084	29,972	13,476	39,181
Russia	23,642	13,253	23,817	14,800
France	29,637	67,703	38,203	67,229
Spain	12,443	25,824	14,157	30,503
Italy	16,906	24,976	18,844	30,903
Netherlands	47,547	41,599	63,511	46 497
Belgium	25,477	30,623	34,590	32,755
United States	112,710	131,335	152,539	128,647
Argentine	33,265	13,998	26.521	12,983
Brazil	30,574	8,542	27,564	9,147
Japan	4,882	16,144	8,486	22,831
Australia	2,996	13,894	5,642	15,800
Other countries	128,128	127,739	152,500	159,897
Total	1,095,889	1,078,668	1,298,771	1,293,691

[1] Preliminary figures.

The following table shows (according to the Board of Trade Returns) the chief articles of import and export in the trade of the United Kingdom and Sweden for 2 years.

Imports	1932	1933	Exports	1932	1933

Communications.

On January 1, 1934, there were 49,440 miles of roads in Sweden.

At the end of 1933 the total length of railways in Sweden was 16,812 kilometres, of which 7,427 kilometres belonged to the State. The receipts of the State railways in 1934 were 183 million kronor, and expenses 155 million kronor. The total cost of construction for the State railways to the end of 1933 was 1,244 million kronor, and for private railways, 652 million kronor. The total number of passengers on the State railways was, in 1932, 31,321,000, and in 1933, 32,855,000; weight of goods, 9,977,000 tons and 10,071,000 tons; private railways, 33,288,000 passengers in 1932 and 31,833,000 in 1933; goods, 14,453,000 tons and 14,884,000 tons. The line between Luleå and Riksgränsen (the Lapland iron ore line) is run by electric power, as is also, since summer, 1926, the line between Göteborg and Stockholm.

The length of the circuits of the telegraph at the end of 1933 was 52,638 km., 22,644 km. of which belonged to the railways. The circuits of the State telephone had a length of 1,169,277 km., 41,479 of which belonged to the railways; the circuits of the private telephone lines had a length of only 11,118 km. The number of taxed telegraph messages sent in the year 1933 was 5,012,010, including 724,163 in transit. In 1933 there were 590,914 instruments (in Stockholm 153,623) employed in the telephone service, including 12,620 railways' and 1,520 private telephones.

The Swedish Post Office carried 806,014,000 letters, post-cards, journals, &c., in the year 1933. The number of post-offices at the end of the year was 3,914. The total receipts of the Post Office in 1932 amounted to 80,755,944 kronor, and the total expenditure to 64,211,042 kronor.

Commercial aviation is carried on by the A/B Aerotransport with the help of a government subsidy (650,000 kronor annually). A daily service is maintained in each direction, jointly with foreign companies, between Malmö and Amsterdam, and between Stockholm and Helsingfors. In 1934, planes of the company flew 560,000 miles and carried 18,072 passengers in the traffic routes.

Banking and Credit.

The Riksbank, or National Bank of Sweden, belongs entirely to the State and is managed by directors elected for three years by the Diet, except one, the president, who is designated by the King. The Bank is under the guarantee of the Diet, its capital and reserve capital are fixed by its constitution, and its note circulation is limited by the value of its metallic stock and its assets in current accounts at home and abroad; but its actual circulation is kept far within this limit.

There are 9 conjointly responsible private banks and 20 joint-stock banks (December, 1933). Since December 31, 1903, only the Riksbank has the right to issue notes.

The following table gives statistics of the National Bank, and private banks (joint-stock banks included) in Sweden for December 31, 1934:—

Assets	The Riksbank	Other Banks	Total
	Kronor	Kronor	Kronor
Real estate and furniture	—	95,649,106	95,649,106
Cash[1]	354,355,409	287,134,301	641,489,710
Bills, etc., payable at sight	13,881,416	61,528,969	75,360,385
Bonds and Government securities	195,248,500	298,799,014	494,047,514
Shares	—	341,288,722	341,288,722

[1] Gold, silver, and for the private banks notes of the Riksbank, &c. (Gold in coin and bullion: Riksbank 370,338,847; other banks 571,176; total, 370,910,023 kronor.)

Assets	The Riksbank	Other Banks	Total

Current accounts	405,525,784	696,558,155	1,102,083,939
Deposit accounts	—	2,200,508,133	2,200,508,133
Deposits in savings account	—	655,655,832	655,655,832
Liabilities to Swedish banks	—	248,808,758	248,808,758
Liabilities to Foreign banks	1,889,563	59,918,348	61,807,911
Loans raised	—	428,284,906	428,284,906
Sundries	36,673,446	331,116,393	367,789,839
Total	1,223,506,523	5,387,002,565	6,610,509,088

The savings-banks statistics (exclusive of Post Office) are as follows :—

—	1930	1931	1932	1933
Number of depositors at end of year	2,987,221	3,090,639	3,176,994	3,270,962
Deposits at end of year, kronor	2,961,405,100	3,051,029,229	3,141,712,486	3,206,398,000
Capital and reserve funds, kronor	247,810,918	260,870,422	272,458,287	288,775,000

At the end of 1933 the Post Office Savings Bank had 1,701,761 depositors and 440,306,102 kronor of deposits, and at the end of 1934, 1,808,604 depositors and 473,196,467 kronor of deposits.

The Private and Joint-Stock Banks also act as Savings Banks. Their statistics of depositors and deposits are as follows :—

—	1931	1932	1933	1934
Number of depositors at end of year	2,039,179	2,005,667	1,978,602	1,917.264
Deposits at end of year, kronor	686,158,475	648,161,986	642,694,663	655,655,832

Money, Weights, and Measures.

The Swedish Krona, of 100 öre, is of the value of 1*s.* 1½*d.*, or about 18 kronor 16 öre to the pound sterling.

The gold 20-kronor piece weighs 8·960572 grammes, ·900 fine, containing 8·0645 grammes of fine gold, and the silver krona weighs 7·5 grammes, ·800 fine, containing 6 grammes of fine silver. Nickel coins have been issued since 1920.

The standard of value is gold. Gold coins, however, practically do not

exist as a currency. National Bank notes for 5, 10, 50, 100, and 1,000 kronor are legal means of payment, and the Bank is bound to exchange them for gold on presentation, but the obligation to redemption is for the present suspended.

The metric system of weights and measures is obligatory.

Diplomatic Representatives.

1. Of Sweden in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Baron E. K. Palmstierna, G.C.V.O. (appointed November, 1920).

Counsellor.—Baron A. W. C. E.-son Leijonhufvud.

Attaché.—T. E. T. Göransson.

Military Attaché.—Lieut.-Colonel C. J. M. Björnstjerna.

Naval Attaché.—Captain E. D. Torén.

Secretary (specially attached).—O. U. K. Thorsing.

Agricultural Counsellor.—M. W. F. von Wachenfelt.

Consul-General in London.—E. G. Sahlin.

There are Consular representatives at the following places:—Aberdeen, Belfast, Birmingham, Bradford, Bristol, Cardiff, Cork, Dublin, Dundee, Glasgow, Hartlepool, Hull, Leith, Liverpool, Manchester, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton, Sunderland, and many other places.

2. Of Great Britain in Sweden.

Envoy and Minister.—Charles Michael Palairet, C.M.G. (appointed February 13, 1935).

First Secretary.—G. G. M. Vereker, M.C.

Naval Attaché.—Capt. G. C. Muirhead-Gould, D.S.O., R.N.

Military Attaché.—Lt.-Col. F. E. Hotblack, D.S.O. (lives in Berlin).

Air Attaché.—Group-Captain F. P. Don, O.B.E.

There are also Consular representatives at Borås, Gävle, Hälsingborg, Kalmar, Karlskrona, Luleå, Malmö, Norrköping, Sundsvall, Visby, &c.

Books of Reference concerning Sweden.

1. Official Publications.

Statistisk årsbok för Sverige (Annuaire statistique de la Suède), published by Statistiska Centralbyrån. Annual. (First Year 1914.) Stockholm.

Bidrag till Sveriges officiella statistik: *See* Statesman's Year-Book for 1915. The series 'Bidrag' ends with the year 1910 (except the publications with the letter U, which ends with the year 1917. It has been replaced by the new series, 'Sveriges officiella statistik,' mentioned below). Stockholm, 1857-1920.

Arbetsstatistik. Stockholm, 1899-1911. Replaced by the Social Statistics of the new series, mentioned below.

SWITZERLAND.

(Schweiz.—Suisse.—Svizzera.)

Constitution and Government.

I. Central.

On August 1, 1291, the men of Uri, Schwyz, and Lower Unterwalden entered into a defensive League. In 1353 the League included eight members, and in 1513 thirteen. Various allied and subject territories were acquired either by single cantons or by several in common, and in 1648 the League became formally independent of the Holy Roman Empire, but no addition was made to the number of cantons till 1798. In that year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss, and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new constitution and out of the lands formerly allied or subject increased the number of cantons to nineteen. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, Great Britain, Portugal, Prussia, and Russia, and the Federal Pact which had been drawn up at Zürich, and which included three new cantons, was accepted by the

Congress of Vienna. The Pact remained in force till 1848, when a new constitution, prepared without foreign interference, was accepted by general consent. This, in turn, was, on May 29, 1874, superseded by the constitution which is now in force.

The constitution of the Swiss Confederation may be revised either in the ordinary forms of Federal legislation with compulsory *referendum*, or by direct popular vote (*popular initiative*) a majority both of the citizens voting and of the cantons being required, and the latter method may be adopted on the demand of 50,000 citizens with the right to vote. The Federal Government (*i.e.*, the Parliament and the Federal Council) is supreme in matters of peace, war, and treaties; it regulates the army, the railway, postal and telegraph systems, the coining of money, the issue and repayment of bank notes, and the weights and measures of the Republic. The Federal Parliament legislates on matters of copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidise, besides the Polytechnic School at Zürich, a Federal University and other educational institutions. There has also been entrusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests, and the construction of railways. By referendum of November 13, 1898, it is also the authority in the entire sphere of common law.

The supreme legislative authority is vested in a parliament of two chambers, a 'Ständerat,' or Council of States, and a 'Nationalrat,' or National Council. The first is composed of forty-four members, chosen and paid by the twenty-two cantons of the Confederation, two for each canton. Their remuneration depends on the wealth and liberality of the cantons, the average being about 20 francs per day; representatives from the canton of Geneva receive 30 francs, from Uri and from Unterwalden 15 francs per day. The mode of their election and the term of membership depend entirely on the canton. Three of the cantons are politically divided —Basel into Stadt and Land; Appenzell into Ausser Rhoden and Inner Rhoden; and Unterwald into Obwald and Nidwald. Each of these parts of cantons sends one member to the State Council, so that there are two members to the divided as well as to the undivided cantons. The 'Nationalrat' consists (according to a law passed in August of 1930) of 187 representatives of the Swiss people, chosen in direct election for 4 years, at the rate of one deputy for every 22,000 souls. The members are paid from Federal funds at the rate of 40 francs for each day on which they are present, with travelling expenses, at the rate of 20 centimes per kilometre, to and from the capital. Members employed on commissions receive additional pay at the same rate. The members are distributed amongst the various cantons as follows :—

Canton [1]	Number of Representatives	Canton [1]	Number of Representatives
Zürich (Zurich) . .	28	Schwyz	3
Bern (Berne) . . .	31	Unterwald—Upper and Lower	2
Luzern (Lucerne) . .	9	Glarus (Glaris) . .	2
Uri	1	Aargau (Argovie) . .	12
Zug (Zoug) . . .	2	Thurgau (Thurgovie) .	6
Fribourg (Freiburg) . .	7		

[1] The name of the canton is given in German, French or Italian according to the language most spoken in it, and the name in the other language is given in brackets.

Canton[1]	Number of Representatives	Canton[1]	Number of Representatives
Solothurn (Soleure) . .	7	Ticino (Tessin) . .	7
Basel (Bâle)—town and country . . .	11	Vaud (Waadt) . . .	15
Schaffhausen (Schaffhouse)	2	Valais (Wallis) . .	6
Appenzell—Outer and Inner	3	Neuchâtel (Neuenburg) .	6
St. Gallen (St. Gall) .	13	Genève (Genf) . . .	8
Graubünden (Grisons) .	6	Total . . .	187

[1] The name of the canton is given in German, French or Italian, according to the language most spoken in it, and the name in the other language is given in brackets.

At the elections held on October 25, 1931, the following parties were returned :—National Council : Radicals, 52 ; Catholics, 44 ; Social Democrats, 49 ; Agrarians, 30 ; Liberal Conservatives, 6 ; Communists, 3 ; other parties, 3. Council of States : Radicals, 19 ; Catholic Conservatives, 18 ; Liberal Conservative, 1 ; Peasant Party, 3 ; Socialist, 1.

A general election of representatives takes place by ballot every four years. Every citizen of the Republic who has entered on his twenty-first year is entitled to a vote ; and any voter, not a clergyman, may be elected a deputy. Both chambers united are called the 'Bundes-Versammlung,' or Federal Assembly, and as such represent the supreme government of the Republic. Laws passed by the Federal Assembly may be vetoed by the popular voice, which means in effect that 30,000 citizens or eight cantons may demand that the law in question should be submitted to the direct vote of the nation, which can only say 'Yes' or 'No.' For the decision of the question submitted a majority both of the cantons and of the voters is required. This principle, called the *referendum*, is frequently acted on.

The chief executive authority is deputed to a 'Bundesrat,' or Federal Council, consisting of seven members, elected for three years by the Federal Assembly. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. In the Federal Parliament legislation may be introduced either by a member, or by either House, or by the Federal Council (but not by the people). Every citizen who has a vote for the National Council is eligible for becoming a member of the executive.

The President of the Confederation and the Vice-President of the Federal Council are the first magistrates of the Confederation. Both are elected by the Federal Assembly in joint session of the National and State councils for the term of one year, January 1 to December 31, and are not re-eligible to the same offices till after the expiration of another year. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

President of the Confederation for 1935.—Rudolf *Minger* (Berne).

Vice-President of the Federal Council for 1935.—Dr. Albert *Meyer* (Zurich).

The seven members of the Federal Council—each of whom has a salary of 1,280*l.* per annum, while the President has 1,400*l.*—act as ministers, or chiefs of the seven administrative departments of the Republic. The city of Bern is the seat of the Federal Council and the central administrative authorities.

The Federal Council is composed as follows:—

Foreign Affairs.—Dr. Giuseppe *Motta* (Tessin).
Interior.—Dr. Philipp *Etter* (Zoug).
Justice and Police.—Dr. Johannes *Baumann* (Appenzell Rh. Ext.).
Military.—Rudolf *Minger* (Berne).
Finance.—Dr. Albert *Meyer* (Zurich).
Agriculture and Industry.—Edmund *Schulthess* (Argovie). Resigned May 1, 1935.
Posts and Railways.—Dr. Marcel *Pilet-Golaz* (Vaud).

II. Local Government.

Each of the cantons and demi-cantons of Switzerland is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; each has its local government, different in its organisation in most instances, but all based on the principle of absolute sovereignty of the people. In a few of the smallest cantons the people exercise their powers direct, without the intervention of any parliamentary machinery, all male citizens of full age assembling together in the open air, at stated periods, making laws and appointing their administrators. Such assemblies, known as the Landsgemeinden, exist in Appenzell, Glarus and Unterwald. In all the larger cantons there is a body chosen by universal suffrage, usually called der Grosse Rat, or Kantons Rat, which exercises all the functions of the Landsgemeinden. In all the cantonal constitutions, however, except those of the cantons which have a Landsgemeinde, the *referendum* has a place. By this principle, where it is most fully developed, as in Zurich, all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revision of the constitution, must be submitted to the popular vote. In all the cantons, the *popular initiative* for constitutional affairs, as well as for legislation, has been introduced, except in Lucerne, where the *initiative* exists only for constitutional affairs. The members of the cantonal councils, as well as most of the magistrates, are either honorary servants of their fellow-citizens, or receive a merely nominal salary. In most cantons there are districts (Amtsbezirke) consisting of a number of communes grouped together, each district having a Prefect (Regierungstatthalter) representing the cantonal government. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, maire or syndic, and not less than 4 other members. In the smaller communes there is a council only, with its proper officials.

Area and Population.

I. Progress and Present Condition.

Area and population, according to the census held on December 1, 1920, and the census held on December 1, 1930, are shown in the following table. The cantons are given in the official order and the year of the entrance of each into the league or confederation is stated:—

Canton	Area: sq. miles	Population		Pop. per square mile, 1930
		Dec. 1, 1920 (census)	Dec. 1, 1930 (census)	
Zürich (Zurich) (1351) . .	667	538,602	617,706	926
Bern (Berne) (1353) . . .	2,657	674,394	688,774	259
Luzern (Lucerne) (1332) . .	575	177,073	189,391	329
Uri (1291)	415	23,973	22,968	55
Schwyz (1291)	348	59,731	62,337	179

Canton	Area: sq. miles	Population		Pop. per square mile, 1930
		Dec. 1, 1920 (census)	Dec. 1, 1930 (census)	
Obwalden (Obwald) (1291)	189	17,567	19,401	103
Nidwalden (Nidwald) (1291)	106	13,956	15,055	142
Glarus (Glaris) (1352)	264	33,834	35,653	135
Zug (Zoug) (1352)	92	31,569	34,395	374
Fribourg (Freiburg) (1481)	644	143,055	143,230	222
Solothurn (Soleure) (1481)	305	130,617	144,198	473
Basel-Stadt (Bâle-V.) (1501)	14	140,708	155,030	11,074
Basel-Land (Bâle-C.) (1501)	163	82,390	92,541	568
Schaffhausen (Schaffhouse) (1501)	114	50,428	51,187	449
Appenzell A.-Rh. (Ext.) (1513)	93	55,354	48,977	527
Appenzell I.-Rh. (Int.) (1513)	72	14,614	13,988	194
St. Gallen (St. Gall) (1803)	785	295,543	286,362	365
Graubünden (Grisons) (1803)	2,746	119,854	126,340	46
Aargau (Argovie) (1803)	548	240,776	259,644	474
Thurgau (Thurgovie) (1803)	386	135,933	136,063	352
Ticino (Tessin) (1803)	1,085	152,256	159,223	147
Vaud (Waadt) (1803)	1,238	317,498	331,853	268
Valais (Wallis) (1815)	2,020	128,246	136,394	68
Neuchâtel (Neuenburg) (1815)	305	131,349	124,324	408
Genève (Genf) (1815)	108	171,000	171,366	1,587
Total	15,940	3,880,320	4,066,400	255

The German language is spoken by the majority of inhabitants in 19 of the 25 cantons (French names given in brackets), the French in five—Fribourg, Vaud, Valais, Neuchâtel and Genève—(for which the German names are given in brackets), the Italian in one (Ticino). In 1930, 2,924,314 spoke German, 831,100 French, 241,985 Italian, 44,204 Romansch, and 24,797 other languages.

The number of foreigners resident in Switzerland in 1930 was 355,522.

II. Movement of Population.

Years	Total Births	Stillbirths	Marriages	Deaths and Stillbirths	Surplus of Births over Deaths
1929	70,715	1,709	31,238	52,147	18,568
1930	71,550	1,695	32,132	48,634	22,916
1931	69,351	1,602	32,269	51,016	18,335
1932	70,254	1,610	31,959	51,521	18,739
1933	67,567	—	31,969	47,179	20,328

In 1933 the illegitimate births numbered 2,814. The number of divorces was 2,992 in 1933.

The number of emigrants in five years was: 1929, 4,608; 1930, 3,636; 1931, 1,707; 1932, 1,301; 1933, 1,167.

III. Principal Towns.

On December 1, 1930, the population of the principal towns was as follows (census figures):—Zürich, 249,820 (1933, 312,600); Bâle, 148,063; Geneva, 142,812; Bern, 111,783; Lausanne, 75,915; St. Gallen, 63,947; Winterthur, 53,925; Luzern, 47,066; Biel, 37,726; La Chaux-de-Fond,

35,252; Neuchâtel, 22,668; Fribourg, 21,557; Schaffhausen, 21,118; Montreux, 18,506; Thun, 16,524; Chur, 15,574; Lugano, 15,184; Solothurn, 13,734; Herisau, 13,599; Olten, 13,484; Vevey, 13,036; Le Locle, 12,001; Aarau, 11,666; Rorschach, 11,005; Bellinzona, 10,706.

Religion.

There is complete and absolute liberty of conscience and of creed. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed to which he does not belong. No bishoprics can be created on Swiss territory without the approbation of the Confederation. The order of Jesuits and its affiliated societies cannot be received in any part of Switzerland; all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious orders whose action is dangerous to the State, or interferes with the peace of different creeds. The foundation of new convents or religious orders is forbidden.

According to the census of December 1, 1930, the number of Protestants amounted to 2,230,336 (57 per cent. of the population), of Roman Catholics to 1,666,317 (41 per cent.), and of Jews to 17,973 (0·4 per cent.). Protestants are in a majority in twelve of the cantons, and Catholics in ten. Of the more populous cantons, Zürich, Bern, Vaud, Neuchâtel, and Basel (town and land) are mainly Protestant, while Luzern, Fribourg, Ticino, Valais and the Forest Cantons are mainly Catholic. The Roman Catholic priests are much more numerous than the Protestant clergy, the former comprising more than 6,000 regular and secular priests. They are under five bishops, viz., of Basel and Lugano (resident at Solothurn), Chur, St. Gallen, Lausanne and Geneva (resident at Freiburg), and Sitten (Sion), all of them immediately subject to the Holy See.

Education.

In the educational administration of Switzerland there is no centralization. Before the year 1848 most of the cantons had organised a system of primary schools, and since that year elementary education has steadily advanced. In 1874 it was made obligatory (the school age varying in the different cantons), and placed under the civil authority. In some cantons the cost falls almost entirely on the communes, in others it is divided between the canton and communes. In all the cantons primary instruction is free. In every district there are primary schools, and secondary schools for youths of from twelve to fifteen.

The following are the statistics of the various classes of educational institutions for 1932–33:—primary schools 4,363, with 16,333 teachers (8,104 men and 8,229 women), and 472,573 pupils (237,658 boys and 234,915 girls); the 663 secondary schools and lower middle schools had 31,803 boys and 28,965 girls, with 2,414 men and 614 women teachers. There are also cantonal schools, gymnasia, higher schools for girls, complementary schools, teachers' seminaries, commercial and administrative schools, trade schools, art schools, technical schools, schools for the instruction of girls in domestic economy and other subjects; agricultural schools, schools for horticulture, for viticulture, for arboriculture, and for dairy management. There are also institutions for the blind, the deaf and dumb, and the feeble-minded.

There are seven universities in Switzerland. These universities are organised on the model of those of Germany, governed by a rector and a senate, and divided into four 'faculties' of theology, jurisprudence, philosophy, and medicine. There is a Technical High School, maintained by the

Federal Government, at Zürich, with 1,780 matriculated students in 1932–33. The academy of Neuchâtel was transformed into a university in May, 1909, but without the faculty of medicine. The following table shows the year of foundation of each university, the number of teaching staff and of matriculated students in the various branches of study in each of the seven universities in the winter of 1933–34 :—

—	Theology	Law	Medicine	Philosophy and Science	Total	Teaching Staff
Basel (1460) . . .	61	197	532	671	1,461	169
Zürich (1832). . .	101	628	695	672	2,096	208
Bern (1834) . . .	44	666	513	512	1,735	201
Genève (1559[1] & 1873[2])	45	417	417	240	1,119	186
Lausanne (1537[1] & 1890[2])	49	229	205	313	796	132
Fribourg (1889) . .	203	110	—	299	712	88
Neuchâtel (1866[1] & 1909[2])	21	112	—	121	254	75

[1] As an Academy. [2] As a University.

These numbers are exclusive of 'visitors,' but inclusive of 1,361 women students.

A University Institute for International Studies was opened at Geneva in October, 1927.

Justice and Crime.

The 'Bundes-Gericht,' or Federal Tribunal, which sits at Lausanne, consists of 24 members, with 9 supplementary judges, appointed by the Federal Assembly for six years and are eligible for re-election ; the President and Vice-President, as such, for two years and cannot be re-elected. The President has a salary of 27,000 francs a year, and the other members 25,000 francs. The Tribunal has three sections, to each of which is assigned the trial of suits in accordance with regulations framed by the Tribunal itself. It has original and final jurisdiction in suits between the Confederation and cantons ; between cantons and cantons ; between the Confederation or cantons and corporations or individuals, the value in dispute being not less than 3,000 francs ; between parties who refer their case to it, the value in dispute being at least 3,000 francs ; and also in such suits as the constitution or legislation of cantons places within its authority. There are also many classes of railway suits which it is called on to decide. It is a Court of Appeal against decisions of other Federal authorities, and of cantonal authorities applying Federal laws. The Tribunal also tries persons accused of treason or other offences against the Confederation. For this purpose it is divided into four chambers : the Chamber of Accusation, the Criminal Chamber (Cour d'Assises), the Federal Penal Court, and the Court of Cassation. The jurors who serve in the Assize Courts are elected by the people, and are paid ten francs a day when serving.

Each canton has its own judicial system for ordinary civil and criminal trials.

On December 31, 1933, the prison population of Switzerland consisted of 4,279.

Capital punishment exists in Appenzell-I.-Rh., Obwalden, Uri, Schwyz, Zug, St. Gallen, Luzern, Valais, Schaffhausen, and Fribourg.

Social Insurance.

The Swiss Federal Insurance Law (insurance against illness and accident), as passed by both Chambers on June 13, 1911, was accepted by the electors of the Republic

with a small majority. The total number of votes cast was 529,001, of which 287,583 were for and 241,418 against the measure.

All Swiss citizens are entitled to insurance against illness, and foreigners also may be admitted to the benefits of the law. Compulsory insurance against illness does not exist as yet, but cantons and communities are entitled under the act to declare obligatory insurance for certain classes or, in general, to establish public benefit (sick fund) associations, and to make employers responsible for the payment of the premiums of their employees.

Insurance against accident is compulsory for all officials, employees, and workmen of all the factories, trades, &c., which are under the Federal liability law. Every person above the age of 14 can insure voluntarily at the Federal insurance administration (or at any insurance corporation). The Swiss Accident Insurance Institution commenced operations on April 1, 1918. In 1932 the 1,154 societies insuring against illness had 1,789,038 members.

Finance.

The entire proceeds of the Federal alcohol monopoly (amounting to 6,110,000 francs in 1933) are divided among the cantons, and they have to expend one-tenth of the amount received in combating alcoholism in its causes and effects. Of the proceeds of the tax for exemption from military service, levied through the cantons, one-half goes to the Confederation and the other to the cantons.

Revenue and expenditure for six years :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Francs	Francs		Francs	Francs
1930	433,106,233	426,374,014	1933	409,780,098	482,061,122
1931	428,399,843	426,145,035	1934	453,580,000	480,240,000
1932	419,908,766	441,081,849	1935 [1]	436,300,000	477,900,000

[1] Estimates.

The following table gives the budget estimates for 1934 :—

Source of Revenue	Francs	Branch of Expenditure	Francs
Capital invested	24,409,900	Debt, Total Charge	105,172,350
General administration	540,860	General administration	5,256,881
Departments :—		Departments :—	
Political	342,000	Political	7,057,859
Interior	1,907,830	Interior	42,250,222
Justice and Police	2,775,000	Justice and Police	6,628,070
Military	391,623	Military	91,223,521
Finance and Customs	377,360,982	Finance and Customs	23,993,874
Commerce, Industry, and Agriculture	5,458,600	Commerce, Industry, and Agriculture	103,667,734
Posts and Railways	9,022,700	Posts and Railways	6,513,050
Miscellaneous	190,505	Miscellaneous	38,936,489
Total	422,400,000	Total	430,700,000

The public debt of the Confederation (exclusive of the railway debt) amounted, on January 1, 1934, to 1,722,543,000 francs. The floating debt (January 1, 1934) was 459,301,000 francs. The total debt was thus 2,181,844,000 francs, or including the railway debt, 5,215,273,000 francs.

Defence.

There are fortifications on the south frontier for the defence of the St. Gothard pass; others have been constructed at St. Maurice and Martigny in the Rhone Valley.

Switzerland depends for defence upon a *national militia*. Service in this force is compulsory and universal, with few exemptions except for physical disability. Those excused or rejected pay certain taxes in lieu. Liability extends from the 20th to the end of the 48th year. The first 12 years are spent in the first line, called the 'Auszug,' or '*Élite*'; the next 8 in the Landwehr; and the remaining 8 in the Landsturm. For cavalry, however, service is 11 years in the Auszug, and 12 in the Landwehr. The Landsturm only includes men who have undergone some training. The unarmed Landsturm comprises all other males between 20 and 50 whose services can be made available for non-combatant duties of any description.

The initial training of the Swiss militia soldier is carried out in recruits' schools, and the periods are 65 days for infantry, engineers, and foot artillery, 75 days for field artillery, and 90 days for cavalry. The subsequent trainings, called 'repetition courses,' are 11 days *annually*; but after going through seven courses (8 in the case of the cavalry) further attendance is excused for all under the rank of sergeant. The Landwehr men are only called out once for training, also for 11 days.

The country is divided into 6 divisional districts. There is a staff organisation for three army corps. There are the usual departmental troops, pontoon and railway corps, telegraph troops, and an air force of 10 squadrons with 125 aeroplanes. The peace establishment normally under training is 46,200.

The fortress troops, mostly Landwehr, man the fortifications which close the St. Gothard Pass and the Rhone Valley to a possible invader from the south. They amount to about 21,000 men. The Landwehr is organised in 56 battalions and 36 squadrons. Altogether Switzerland can mobilise nearly 200,000 men (combatants), irrespective of the organised Landsturm, who may amount to another 60,000.

The administration of the Swiss army is partly in the hands of the Cantonal authorities, who promote officers up to the rank of captain. But the Federal Government is concerned with all general questions, and makes all the higher appointments.

The Swiss infantry are armed with the Swiss repeating rifle. The field artillery is armed with a Q.F. shielded Krupp 7·5 cm. calibre. The 'position' artillery has batteries of 8·4 and 12 cm. guns.

Military expenditure, 1934, 92,200,000 francs.

Production and Industry.

About 20·8 per cent. of the population are engaged in agricultural pursuits. Of the total area 931,180 hectares, or 2,301,027 acres, being 22·4 per cent., is unproductive; of the productive area 982,540 hectares, or 2,427,943 acres, being 23·8 per cent., is forest; and of the rest about 1,115,070 hectares, or 2,755,436 acres (27·0 per cent.) is under grass, and about 902,590 hectares, or 2,230,379 acres (21·9 per cent.) is pasturage.

In 1934 the value of the results of agricultural activities was (in million francs), milk 431 (35 per cent. of total); cattle, 194 (15 per cent.): pigs, 147 (91 per cent.); fruit 93 (7 per cent.); poultry keeping 64 (5 per cent.). The total value of the produce of Swiss agriculture in 1934 was 1,227,850,000 francs.

The total fruit production in 1934 was 8,585,000 quintals, of which apples amounted to 5,100,000 quintals, and pears, 2,800,000 quintals.

Wine is produced in eighteen of the cantons. In 1933 Swiss vineyards yielded 5,280,490 gallons of wine, valued at 28,895,000 francs, as

compared with 10,248,479 gallons valued at 33,778,000 francs in 1932. Tobacco is produced in three cantons. On April 21, 1931 (last census), there were in Switzerland, 140,300 horses, 3,710 mules, 833 donkeys, 184,754 sheep, 237,995 goats. On April 21, 1934, there were 1,658,687 cattle (including 919,804 cows) and 1,002,450 pigs.

The Swiss Confederation has the right of supervision over the police of the forests, and of framing regulations for their maintenance. The entire forest area of Switzerland on January 1, 1932, was 2,447,266 acres in extent (comprising 113,060 acres of cantonal forest, 1,651,314 acres belonging to municipalities and other corporations, and 682,892 acres of private forests). The district over which the Federal supervision extends lies to the south and east of a tolerably straight line from the eastern end of the Lake of Geneva to the northern end of the Lake of Constance. It comprises about 1,828,382 acres, and the Federal forest laws apply to all cantonal, communal, and municipal forests within this area, those belonging to private persons being exempt, except when from their position they are necessary for protection against climatic influences. In 1876 it was enacted that this forest area should never be reduced; servitudes over it, such as rights of way, of gathering firewood, &c., should be bought up; public forests should be surveyed, and new wood planted where required, subventions for the purpose being sanctioned. In the year 1932, 14,705,000 trees (chiefly coniferous) were planted.

There were, in 1932–33, 249 establishments for pisciculture with 220,270,000 fry of various species, produced from the incubation of 274,069,000 eggs.

Many industries flourish in Switzerland. The chief agricultural industries are the manufacture of cheese and condensed milk. There are 2 salt-mining districts; that at Bex (Vaud) belongs to the Canton, but is worked by a private company, and those at Schweizerhalle, Rheinfelden and Ryburg are worked by a joint-stock company formed by the Cantons interested. The output of salt of all kinds in 1933 reached 784,960 quintals, and in 1932, 804,585 quintals. In the province of St. Gall (Gonzen mine) iron ore and manganese ore are mined. In 1929 there were 8,514 factories in Switzerland. Watch and clock making is an important branch of manufacture; number of clocks exported in 1933, 11,878,000; in 1932, 9,173,000; in 1931, 13,177,000. The number of persons employed in factories (1929) was 409,083; the motive machinery had 688,610 horse-power. In 1933, 58 breweries produced 53,212,082 gallons of beer (55,567,162 gallons in 1932).

In 1933 the Swiss embroidery establishments operated 1,294 shuttle-machines as against 3,489 in 1926, and 1,692 hand-embroidery machines as compared with 3,670 in 1926.

Commerce.

The special commerce, not including precious metals, was as follows for five years:—

—	1930	1931	1932	1933	1934
	1000 Francs	1000 Francs	1000 Francs	1000 Francs	1000 Francs
Imports . . .	2,664,202	2,251,204	1,762,679	1,594,454	1,434,506
Exports . . .	1,767,502	1,348,798	801,008	852,784	844,332

The following table (in thousands of francs) shows the value of special commerce in 1933 and 1934:—

Merchandise	Imports		Exports	
	1933	1934	1933	1934
	1,000 Francs	1,000 Francs	1,000 Francs	1,000 Francs
Cereals	128,423	115,153	2,072	1,993
Fruits and vegetables	80,115	65,968	2,722	4,826
Colonial produce	59,412	54,739	2,901	3,451
Animal food substances	57,130	51,293	53,912	41,991
Beverages	51,543	42,573	489	1,092
Animals, living	6,198	5,511	5,590	11,511
Hides and skins	52,181	41,660	25,615	25,175
Timber	45,443	41,276	3,081	2,403
Cotton goods	87,676	81,911	101,311	105,212
Linen, hemp, &c., goods	17,823	15,336	3,362	2,779
Silk goods	68,130	66,851	100,341	91,606
Woollen goods	83,011	79,246	19,020	21,169
Clothing, ready made	44,918	37,625	14,113	12,427
Mineral substances	127,755	117,486	8,303	8,037
Iron work	96,459	96,196	24,088	24,369
Copper work	24,905	22,129	11,552	11,624
Machinery	61,811	58,636	90,198	93,368
Clocks and Watches	4,739	4,857	96,014	109,081
Chemicals	68,421	65,571	23,944	20,729
Dyes	16,247	14,925	65,039	65,970
Grease, oils, &c.	24,546	21,992	1,726	2,440
Total (incl. other merchandise)	1,594,454	1,434,506	852,784	844,332

The following table, in thousands of francs, shows the distribution of the special trade of Switzerland (including bullion but not coin) among the principal countries. Much of the trade with the frontier countries is really of the nature of transit trade :—

—	Imports		Exports	
	1933	1934	1933	1934
	1,000 Francs	1,000 Francs	1,000 Francs	1,000 Francs
Germany	460,740	388,527	138,772	182,493

Customs receipts : 1932, 290,031,893 francs ; 1933, 274,770,573 francs.

According to Board of Trade returns the staple articles of import into the United Kingdom from Switzerland in 1933 were :—Silk goods, 435,909*l.* ; watches, 718,443*l.* ; embroidery, 195,199*l.* ; artificial silk goods, 741,850*l.* ; coal tar dyes, 340,394*l.* ; electrical goods, 162,822*l.* Exports to Switzerland were chiefly cotton piece goods, 945,456*l.*, cotton yarns, 322,532*l.*, woollen and worsted tissues, 484,217*l.*

Total trade between Switzerland and the United Kingdom (in thousands of pounds) for five years (Board of Trade returns) :—

—	1930	1931	1932	1933	1934
Imports from Switzerland into U.K.	12,640	11,365	5,178	5,224	5,482
Exports to Switzerland from U.K.	5,187	4,138	3,706	3,946	4,648
Re-exports to Switzerland from U.K.	1,096	854	737	634	790

Internal Communications.

The railways of Switzerland (excluding tramways and funiculars) have a length of 3,218 miles. The net operating receipts from traffic of the Swiss Federal railways in 1934 amounted to 332,581,488 francs, and to 336,615,946 francs in 1933. Operating expenses in 1934 amounted to 235,866,060 francs, 247,074,848 francs in 1933. The State railways are gradually being electrified; by the beginning of 1934, 1,181 miles of electrified normal gauge lines were being operated by the Federal Railways. The traffic on the Swiss waters (not including Lago Maggiore) in 1933 was carried on by 101 boats or barges belonging to 13 companies. There are about 10,200 miles of main road.

State aerial service is being gradually developed. In 1933 there were 11,843 flights, and 37,403 passengers were carried.

In 1933 there were in Switzerland 4,008 post-offices. By the internal service there were forwarded 229,700,000 letters, 73,500,000 post-cards, 203,200,000 packets of printed matter and samples, 400,100,000 newspapers. In the international service there were forwarded 33,900,000 letters, 12,000,000 post-cards, 20,200,000 packets of printed matter and samples, 5,735,000 newspapers. Internal post-office orders were sent to the value of 323,082,000 francs. Receipts, 1933, 144,390,000 francs; expenditure, 128,157,000 francs.

Switzerland has a very complete system of telegraphs and telephones, consisting (1933) of 1,277,880 miles of wire. There were transmitted 635,000 inland telegrams, 2,533,000 international (of which 1,278,000 were despatched and 1,255,000 were received), and 567,000 transit through Switzerland. Number of offices, 3,599. There were 363,655 telephones installed; conversations, 268,445,000. The telegraph and telephone gross receipts in 1933 amounted to 94,656,000 francs; the expenditure to 43,761,000 francs, the net profits to 500,000 francs.

Wireless communication is furnished by three main and three local stations.

Banking and Credit.

On December 31, 1933, the coin minted in Switzerland was as follows:—23,655,000 gold coins of the nominal value of 447,009,000 francs; 100,722,000 silver coins of the nominal value of 195,398,000 francs; 242,939,000 nickel coins of the nominal value of 23,650,000 francs; and 153,070,000 copper coins of the nominal value of 1,969,000 francs; total, 520,386,000 coins of the nominal value of 668,026,000 francs.

The National Bank, with headquarters divided between Bern and Zurich, opened its doors on June 20, 1907. It has the exclusive right to issue bank-notes in Switzerland. On February 15, 1935, the condition of the bank was as follows:—

	Francs		Francs
Gold	1,813,376,000	Securities	54,581,000
Gold exchange	6,166,000	Notes in circulation	1,277,407,000
Discounts	22,709,000	Deposits	621,053,000
Advances	67,465,000		

Money, Weights, and Measures.

The international metric system is the sole legal standard of weights and measures in Switzerland. It was made compulsory in the country by the

Federal law of July 3, 1875, and since January 1, 1887, no other units than the metric units have been legal. By the Federal law of June 24, 1909, the international electric units were also adopted. By that law, copies of the French standards, deposited at the International Office for Weights and Measures at Sèvres (France), were adopted as the legal standards for Switzerland.

The *Franc* of 100 *Rappen* or *Centimes*, is the monetary unit and is equal to 0·2903225 gramme of fine gold. The par rate of exchange is 25·2215 francs = £1 sterling. Gold coins are the 20 and 10 franc pieces. Silver coins in circulation are 5, 2, 1 and ½ franc; nickel coins, 20, 10 and 5 centimes; bronze, 2 and 1 centime.

As a result of the dissolution of the Latin Monetary Union in 1926, the gold currencies of other countries of the Union are, after April 1, 1927, no longer legal tender in Switzerland, where they have circulated since 1860.

National Bank 20-franc notes are also in circulation (by law of July 30, 1914), 5-franc notes (August 3, 1914), and 25-franc notes (September 9, 1914).

The *Centner*, of 50 *Kilogrammes* and 100 *Pfund* = 110 lbs. avoirdupois. The *Quintal* = 100 *Kilogrammes* = 220 lbs. avoirdupois. The *Arpent* (Land) = 8-9ths of an acre.

The *Pfund*, or pound, chief unit of weight, is legally divided into decimal *Grammes*, but the people generally prefer the use of the old halves and quarters, named *Halbpfund* and *Viertelpfund*.

Diplomatic and Consular Representatives.

1. Of Switzerland in Great Britain.

Envoy and Minister.—Charles R. Paravicini, appointed October 13, 1919.
Counsellors.—Charles de Jenner and Walter de Bourg.
Secretary.—Walter H. Rüfenacht.
Consul-General in London.—Henri Martin.

2. Of Great Britain in Switzerland.

Envoy and Minister.—Sir G. R. Warner, K.C.V.O., C.M.G. (Appointed January 14, 1935.)
First Secretary.—T. A. Shone.
Commercial Secretary.—H. L. Setchell.
Military Attaché.—Major K. V. B. Benfield, D.S.O., M.C.

There are Consuls at Bâle, Berne, Geneva, Lausanne, Davos and Zurich (C.G.); Vice-Consuls at Zürich, Montreux, Lugano, St. Moritz and Neuchâtel.

TURKEY

(Türkiye Cümhuriyeti.)

In November, 1922, a change of capital importance took place in the internal economy of Turkey. Up to that time Constantinople (now called Istanbul) continued to be the residence of the Sultan, and a Government deriving its authority from him still existed there. This Government, however, exerted no effective power outside Constantinople, together with a small adjacent area and another small area adjoining Çanakkale on the Dardanelles. Except for the small areas mentioned above, the whole of Asia Minor was under the authority of the *de facto* Government set up at Angora (now called Ankara) in April, 1920, under the name of the 'Government of the Grand National Assembly of Turkey.' On November 1, 1922, the Grand National Assembly voted a resolution declaring that the office of Sultan had ceased to exist and providing that the office of Caliph, which had hitherto been vested in the person of the Sultan, should be filled by election from among the Princes of the House of Osman. Previous to this the Angora Government had made preparations not only to take delivery of Eastern Thrace from the Greek occupying authorities in accordance with the military Convention concluded at Mudanya on October 11, 1922, but also to take over the administration of Constantinople whenever an opportunity offered. On November 4, 1922, the administration of Constantinople passed into the hands of the Angora Government. The same day the Grand Vizier, Tewfik Pasha, presented the resignation of the Constantinople Cabinet to the Sultan. The Sultan himself, on November 17, left Constantinople in secret. Nearly a whole year was, however, to elapse before the decisive step of proclaiming a Republic was taken. On October 29, 1923, the national leader, Gazi Mustafa Kemal Pasha, who had been born

at Salonica in 1881, was elected first President of the Turkish Republic, and the revolution was complete when, on March 2, 1924, the Grand National Assembly decided upon the abolition of the Turkish Caliphate, a decision which was immediately followed by the expulsion from Turkey of all the members of the House of Osman, at the same time depriving them of their Turkish citizenship. On November 1, 1927, Mustafa Kemal Pasha (Kemal Atatürk) was re-elected President of the Republic by the unanimous vote of the new Assembly which met on that day.

President of the Republic.—Kemal *Atatürk*, re-elected March 2, 1935.

In December, 1934, a law was passed giving the President of the Republic the family name of Atatürk. The titles Pasha, Bey, Effendi, Hazretleri (Excellency), etc., were abolished about the same time. Every Turkish citizen is now obliged by law to adopt a family name.

By a decision of the Grand National Assembly on October 13, 1923, Angora was declared to be the capital of Turkey. All central departments of state are now established there.

Constitution and Government.

For a list of the former sovereigns of Turkey and an account of the older constitutions of the country, *see* THE STATESMAN'S YEAR-BOOK for 1923, p. 1380.

The Grand National Assembly of Angora voted, on January 20, 1921, a Fundamental Law which introduced constitutional changes of the most radical kind. It declared that all sovereignty belonged to the people, and that all power, both executive and legislative, was vested in the Grand National Assembly as being the sole representative of the people. The old name 'Ottoman Empire' was discarded in favour of the designation 'Turkey.' No provision was made for a Senate. It was laid down that the members of the Grand National Assembly should be elected for a period of two years, and that the Assembly should delegate its executive powers to a certain number of Vekils or Commissioners. The mode of effecting this delegation of power varied somewhat, and ultimately at the beginning of 1924 circumstances necessitated a further revision of the Constitution. This was effected by the law of April 20, 1924, in the first articles of which the Turkish State was declared to be a Republic, the religion of which was Islam, the official language Turkish and the capital Angora. The new law provided for the election of the Assembly every four years, while according to article 7 'the Assembly exercises the executive power through the President of the Republic elected by itself and through the Council of Ministers chosen by him,' with the proviso that the Assembly may at any time control the actions of the Government and at any time dismiss it.

On December 6, 1934, the Grand National Assembly in Angora altered Articles X and XI of the Constitution so as to permit all Turkish men and women to vote in legislative elections at the age of 23 and to become Deputies at the age of 31.

The new law also provided that the President of the Republic should be chosen from among the deputies constituting the National Assembly, and that his term of office should be identical with the life of each Assembly.

The present Cabinet, which was formed in May, 1931, and modified in March, 1935, is now constituted as follows :—

President of the Council.—General Ismet *Inönü*.
Minister of Interior.—Şükrü *Kaya*.
Minister of Finance.—Fuad *Agrah*.

Minister of Public Works.—Ali *Çetinkaya.*
Minister of Foreign Affairs.—Dr. Tevfik Rüştü *Aras.*
Minister of Justice.—Şükrü *Saracoğlu.*
Minister of Education.—Abidin *Özmen.*
Minister of Public Health.—Dr. Refik *Saydam.*
Minister of National Economy.—Celal *Bayar.*
Minister of National Defence.—General Kiazím *Ozalp.*
Minister of Agriculture.—Muhlis *Erkmen.*
Minister of Customs and Monopolies.—Ali Rana *Tarhan.*

The Grand National Assembly which was elected on February 8, 1935, consist of 383 deputies of the Popular Party (including 17 women) and 16 deputies of the Independent Party.

Local Government.

The Fundamental Law, voted at Angora in January, 1921 (see above), altered the system in force up to 1920 by providing that the country should be divided into Vilâyets (now fifty-seven in number) divided into Kazas, subdivided in their turn into Nahiyes. At the head of each Vilâyet is a Vali representing the Government. The system aimed at is one of centralisation. Each Vilâyet has an elective council of its own. The *Kaza* is regarded as a mere grouping of Nahiyes for certain purposes of general administration. The Nahiye or commune is an autonomous entity and possesses an elective council charged with the administration of such matters as are not reserved to the State.

According to the municipal law passed in 1930 Turkish women have the right to be electors and to be elected at municipal elections.

Area and Population

The Treaty of Peace between the Allied Powers and Turkey which was signed at Lausanne on July 24, 1923, defined the European frontier of the new Turkey and to some extent her Asiatic frontiers. This Treaty was ratified by the Grand National Assembly on August 23, 1923, and entered into force August 6, 1924, on its ratification by three of the four Allied Powers.

For the delimitation of the present territories of Turkey, *see* The Statesman's Year-Book for 1930, pp. 1323–4.

The Treaty of Lausanne and the Conventions attached to it provided for the demilitarisation of zones adjoining the European frontier, the Dardanelles and the Bosporus, subject to the right to maintain a garrison at Constantinople, for the demilitarisation of Imbros, Tenedos and Rabbit Islands as well as the islands in the Sea of Marmara with one exception, and for a special administrative régime in Imbros and Tenedos. Otherwise Turkey holds unrestricted sovereignty.

The area of the Republic of Turkey is estimated at 762,736 square kilometres or 294,416 square miles excluding marshes (1,170 square km.) and lakes (8,434 square km.). About 9,257 square miles are in Europe.

For the first time in its history a general census was taken in Turkey on October 28, 1927, and showed the total population of the Republic to be 13,648,270, of whom 6,563,879 were men (48·1 per cent.) and 7,084,391 women (51·9 per cent.).

The population of the vilayets according to revised figures was given as follows:—

Adana	227,718	Erzincan	132,325	Manisa	374,013
Afyonkarahisar	259,377	Erzurum	270,426	Maraş	186,855
*Aksaray	127,021	Eskişehir	154,382	Mardin	183,471
Amasya	114,884	Gazi Antep (Aintab)	215,762	*Mersin	119,107
Ankara (Angora)	404,720	Giresun	165,033	Muğla	175,390
Antalya	204,372	Gümüşane	122,231	Muş	90,319
*Artvin	90,066	*Hakâri	24,980	Niğde	166,056
Aydin	212,541	Içel	90,940	Ordu	202,354
Balikesir	421,066	Isparta	144,437	Rize	171,657
Bayazit	104,586	Istanbul (Constantinople)	794,444	Samsun	274,065
Bilecik	113,660	Izmir (Smyrna)	526,005	Siirt	102,433
Bolu	218,246	Kars	204,846	Sinop	169,965
Burdur	83,614	Kastamonu	336,501	Sivas	329,551
Bursa (Brusa)	401,595	Kayseri	251,370	*Şebinkarahisar	108,735
Çanakkale	181,735	Kirklareli	108,989	Tekirdağ	181,446
Çankiri	157,219	Kirşehir	126,901	Tokat	263,063
Çorum	247,926	Kocaeli	286,600	Trabzon (Trebizond)	290,303
Denizli	245,048	Konya	504,384	Urfa	203,595
Diyarbekir	194,316	Kütahya	302,426	Van	21,605
Edirne (Adrianople)	159,840	Malatya	306,882	Yozgat	209,497
Elâziz	213,777			Zonguldak	268,909

The vilayets marked * no longer exist, having been merged in neighbouring vilayets. Mersin and Içel vilayets have been united as the vilayets of Içel, the capital of which is Mersin.

The populations of the principal towns was given as follows:—

Constantinople[1] (Istanbul)	690,857	Gazi-Antep	39,998	Samsun	30,372
Smyrna (Izmir)	153,924	Caesarea (Kayseri)	39,134	Urfa	29,098
Angora (Ankara)[2]	74,553	Adrianople (Edirne)	34,528	Manisa	28,684
Adana	72,577	Eskishehir (Eskişehir)	32,341	Sivas	28,498
Brusa (Bursa)	61,690	Erzurum	31,457	Maraş	25,982
Konia (Konya)	47,495	Diyarbekir	30,709	Balikesir	25,740

[1] Üsküdar (Scutari), 124,356; Beyoğlu (Pera), 294,790; Stambul, 245,982; Adalar (Princes' Islands), 12,310; Bakirköy, 13,419.
[2] The population of Angora in 1934 was 84,423.

According to the census of 1927, the foreign population was as follows:—German, 2,306; Albanian, 1,652; British, 3,413; Austrian, 1,435; Belgian, 258; Bulgarian, 7,448; French, 3,427; Greek, 26,431; Hungarian, 1,830; Italian, 11,573; Polish, 613; Rumanian, 1,530; Russian, 6,206; Serbian, 3,883.

The Moslem population of Turkey has suffered greatly from the effects of the War. It comprises besides the Turks of Asia Minor a considerable number of Kurds in the Eastern provinces, Lazes in the Eastern section of the Pontic coast, and a few Circassians. There is a fairly considerable but diminishing Jewish element in the towns.

Religion.

Although Islam is no longer recognised as the religion of the State, Moslems form the vast majority of the population of the new Turkey. Turkish has been to some extent substituted for Arabic as the liturgical language in all mosques. Under the old imperial system the non-Moslem communities were recognised as organised communities or *millets*, the heads of which exercised not only spiritual but civil functions. The scope of these civil functions varied. They were in some cases, and more especially in that of the Œcumenical Patriarch, of considerable importance. The Treaty of Lausanne has deprived the spiritual heads of the communities of their administrative prerogatives, and their authority is now purely ecclesiastical.

Constantinople is the seat of the Œcumenical Patriarchate, who is the head of the Orthodox Church in Turkey. The Armenian Church (Gregorian) is ruled by a Patriarch in Constantinople, who is subordinate to the

Katholikos of Etchmiadzin. The Uniat Armenian Church is ruled by the Patriarch of Cilicia. The Chaldaeans (Nestorian Uniats) have one Bishop at Mardin. The Syrian Uniats have a See of Mardin and Amida, but it is united with their Patriarchate of Antioch, whose incumbent resides in Damascus. The Greek Uniats (Byzantine Rite) have as their Ordinary in Constantinople the Titular Bishop of Gratianopolis. The Latins have an Apostolic Delegate in Constantinople and an Archbishop in Smyrna, but their Patriarch of Constantinople is titular and non-resident. There is a Grand Rabbi (Hahambaşi) in Constantinople for the Jews, who are nearly all Sephardim.

According to the census of October 28, 1927, there were in Turkey 13,269,606 Moslems, 39,511 Roman Catholics, 6,658 Protestants, 109,905 Orthodox, 77,433 Armenian, 24,307 other Christians, 81,872 Jews, 17,494 adherents of other religions, and 2,702 undeclared.

On April 10, 1928, the Grand National Assembly passed a law amending the Organic Statute in such a way that Islam ceased to be the State religion of the Republic. An oath of allegiance to the Republic, taken by the President and Deputies, took the place of the former religious formula.

A law passed in December, 1934, forbids the wearing of clerical garb except in places of worship and during Divine service. An exception is made for one representative of each religion or sect. This law applies to foreigners as well as to Turkish citizens.

Education.

According to the census of October 28, 1927, only 1,111,496 of the population were literate in Arabic characters.

In Turkey, elementary education is nominally obligatory for all children of both sexes. According to the Provisional Law of October 6, 1913, all children from 7 to 16 are to receive primary instruction, which may, however, be given in State schools, schools maintained by communities, or private schools, or, subject to certain tests, at home. The State schools are under the direct control of the Ministry of Public Instruction. They include not only primary schools, but also secondary schools, 'preparatory' schools (for students intending to enter higher schools), and a certain number of lycées or secondary schools of a superior kind. There are also training schools for male and female teachers, and a certain number of higher technical schools, besides the University of Istanbul, founded in 1900 and completely reorganised in 1933. Number of students, 1932: men, 2,266; women, 512. Towards the end of 1925 a School of Law was founded at Ankara. The important non-Moslem communities in Istanbul maintain their own schools, which, like all 'private' schools, are subject to the supervision of the Ministry of Public Instruction.

The following table gives statistics of Education for 1932–33 :—

—	Number	Teachers		Students	
		Male	Female	Male	Female
Primary Schools	6,733	10,440	4,624	366,344	201,619
Secondary Schools	109	942	448	26,039	9,619
Lycées	62	404	423	5,999	1,854
Normal Schools	18	230	89	1,052	1,007
Professional Schools	39	505	100	3,806	1,170
The University and Higher Education Institutions	12	501	1	4,621	876
Total	6,973	13,022	5,685	407,861	216,145

Total expenditure on education in 1932–33, £T22,831,714.

A general tendency has been manifested since 1926 to introduce the use of the Latin alphabet in Turkey. A Commission was formed to study the question, and on November 1, 1928, the Grand National Assembly voted a law for the adoption of Latin characters in Turkey. This law decreed the use of Latin characters obligatory in the case of all correspondence in Public Departments as well as all companies, societies and private offices, newspapers, cinemas and advertisements as from December 1, 1928. The publication of books in Arabic characters was forbidden after January 1, 1929, and the employment of the new alphabet became general throughout Turkey in 1930. The number of people who can read and write the new Turkish alphabet (Latin characters) is estimated at 3,000,000.

Previous to this important reform the Grand National Assembly had also adopted the bill introducing the numeral system as used in European countries.

Justice.

Since the beginning of the work of secularisation two years ago, nothing now remains of the old Ottoman laws based on the religious principles. The Turkish Government began by suppressing the religious Courts (Sheri) in 1924, in order to obtain this result. The system which was thus unified consists of (1) *juges de paix* (single judges with limited but summary penal and civil jurisdiction); (2) *tribunaux de base* (a president and two assistant judges with wider powers); (3) assize courts (a president and four assistant judges who hear serious penal cases). Appeal has been abolished. The Court of Cassation sits at Eskişehir.

The laws applied by these Courts have been recently drawn up and adopted. The Turkish Civil Code is, with the exception of a few modifications, a reproduction of the Swiss Civil Code, as also the Code of Obligations, and both entered into force towards the end of 1926. The new Penal Code is based in great measure upon the Italian Penal Code, and the Code of Civil Procedure, without being identical, nevertheless closely resembles that of the Canton of Neuchâtel. The new Commercial Code is based on the German.

On January 1, 1932, the prison population consisted of 51,698 men and 1,489 women awaiting trial, and 62,064 men and 5,318 women under sentence, a total of 120,569.

Finance.

The revenue is derived from land, property, income and profits taxes, Customs, consumption taxes, sheep and cattle tax, monopolies, and other sources. The principal monopolies are, tobacco, alcohol, matches, explosives, cartridges and salt.

Estimates of revenue and expenditure for five financial years were as follows:—

—	1930–31	1931–32	1932–33	1933–34	1934–35
	£T	£T	£T	£T	£T
Revenue . .	222,732,000	186,705,549	169,354,800	170,477,000	184,081,000
Expenditure .	222,646,523	186,582,005	169,146,747	170,474,794	184,075,636

The approved Budget Estimates for the financial year ending May 31, 1935, are as follows:—

Revenue	£T	Expenditure	£T
Direct taxes	35,500,000	Grand National Assembly	2,713,369
Indirect taxes	68,085,000	Customs and Monopolies	4,978,186
Monopolies	34,430,000	Bureau of cadastre (title deeds)	1,094,112
State-operated organizations	375,000	Presidency of religious affairs	611,986
Government share of revenues of companies (railway concession, reinsurance Central Bank)	1,164,000	Public debt	45,268,846
Miscellaneous receipts	5,120,000	Ministry of finance	13,793,747
Arrears of abolished taxes	486,000	Ministry of interior	4,314,452
Extraordinary revenues	25,530,000	Ministry of foreign affairs	3,164,740
State property (lands and buildings)	3,110,000	Ministry of public health and social assistance	4,746,884
Special taxes for purposes of defence	10,281,000	Ministry of justice	8,013,478
		Ministry of public education	6,333,327
		Ministry of economy	2,415,263
		Ministry of public works	14,401,993
Total	184,081,000	Bureau of public security	4,107,499
		Gendarmerie	8,679,379
		Ministry of national defence:	
		Army	32,383,640
		Air Force	943,000
		Navy	3,815,560
		Military factories	3,405,800
		Ministry of agriculture	4,987,611
		Special budget, Ministry of national defence	10,281,000
		Miscellaneous	3,107,855
		Total (all items)	184,075,636

By the Treaty of Lausanne the foreign debt of Turkey was to be distributed among the succession States, of which the new Turkey is one. The Turkish debt has been apportioned as follows (the first figure refers to the loans prior to October 17, 1912, the second to those between October 17, 1912 and November 1, 1924): Turkey, 62·25 per cent. and 76·54 per cent.; Greece, 10·57 per cent. and 0·55 per cent.; Yugoslavia, 5·25 per cent,; Bulgaria, 1·63 per cent. and 0·16 per cent; Albania, 1·57 per cent.; Syria, 8·15 per cent. and 10·02 per cent.; Iraq, 3·96 per cent. and 4·87 per cent.; Palestine, 2·49 per cent. and 3·06 per cent.; and the Arab States, 4·13 per cent. and 4·80 per cent. (Palestine has paid off the whole of her share.) The total debt of Turkey is £T87,316,000.

The agreement reached between the bondholders and the Turkish Government for the resumption of the services of the Ottoman Public debt was ratified by the Grand National Assembly on November 30, 1928. In the latter part of the year 1932 and the earlier part of 1933 negotiations took place with a view to the reduction of the annuities to be paid by the Turkish Government. These negotiations resulted in the conclusion of a new agreement which was signed by representatives of the Turkish Government and delegates of the bond holders on April 22, 1933. The new agreement provides for creation of new debt bonds for the capital amount of francs 962,636,000. The new bonds will be of francs 500 each bearing interest at 7½ per cent.

Defence.

ARMY.

Under the law of June 21, 1927, military service is for 18 months in the infantry and for two years in the cavalry, artillery and air service, while

naval service is for 3 years. Men are called up at the age of 20, and liability for service lasts 26 years. The annual contingent of men liable to service does not at present exceed 60,000. The strength of the active army in 1934 was approximately 10,000 officers and 90,000 men, organised in 3 armies of 9 army corps, each army corps comprises 2 divisions, and there are 5 cavalry divisions, 3 active and 2 reserve. The Air Force numbers 3,410, with 370 aeroplanes.

The infantry is equipped with Mauser rifles. The artillery with 75 mm. Krupp field guns and 10·5 and 12 c.m. Schneider howitzers. The army estimates for 1933–34 amount to 32,383,640 pounds Turkish.

Navy.

The Turkish Navy has for some time past been undergoing reorganisation, all vessels of any fighting value being taken in hand for refit as money for this purpose can be spared. The effective fleet at present includes the battle cruiser *Yavuz*, formerly the German *Goeben*, launched in 1911, displacing 22,500 tons, and armed with ten 11-inch guns; the light cruisers *Hamidiye*, 3,830 tons, and *Mecidiye*, 3,300 tons, both dating from 1903; 2 gunboats; 3 minesweepers; 4 new destroyers; 3 old destroyers, 4 submarines, and a surveying vessel.

The *Yavuz* has undergone an extensive refit at Izmit under a contract made with a group of French shipbuilding yards. A sum of 7,500,000*l.* was provisionally allocated to new construction in 1934. It is proposed to build two 10,000 ton cruisers and a number of destroyers, minesweepers, etc.

A new naval base at Izmit has replaced the former dockyard in the Golden Horn.

The future strength of the personnel does not appear to have been fixed, but no difficulty is anticipated in manning the ships at present ready for sea. Effective strength at present is about 800 officers and 4,000 men.

Naval estimates for 1933–4 amount to 3,765,560 pounds Turkish, and air force estimates to 943,000 pounds Turkish.

Production and Industry.

Agriculture.—Agriculture is primitive, but modern methods are now being adopted. In 1929 the sum of £T100,000,000 was voted for irrigation work, and some progress is manifest in this direction. Number of people engaged in agriculture (census of 1927) was 4,368,061, being 81·6 per cent. of total of those engaged in economic activities. The soil for the most part is very fertile; the principal products are tobacco, mohair, cereals, figs, silk, olives and olive oil, dried fruits, nuts and almonds, skins and hides, furs, licorice root, wool, gums, canary seed, linseed, sesame and cotton. Opium is an important crop in Konya and Afyon Karahisar. Tobacco is grown both in European and Asiatic Turkey. The principal tobacco districts are Samsun (the most important), Bafra, Izmit, Charshamba and Izmir (Smyrna). In 1929, tobacco was grown by 79,965 cultivators on 19,520 acres. The principal centre for silk production is Bursa. The production of olive oil, mainly confined to the Vilayet of Aydin, is very important. The following table gives the estimated yields of the principal products for three years:—

Product	1931	1932	1933
Tobacco (Tons)	51,000	20,000	36,000
Olive Oil ,,	11,000	35,000	15,000
Figs ,,	28.000	33.000	32,000
Raisins ,,	26.000	65,000	55,000
Cotton (Bales[1])	168,000	70,000	75,000
Opium (Cases[2])	3,750	1,540	3,500
Valonea (Tons)	—	55,000	—

[1] Of 500 lbs. [2] Of 75 kilogs.

The forest laws of the empire are modelled on those of France, but restrictive regulations are not enforced, and the country is being rapidly deprived of its timber. About 8,816,299 hectares (21,776,261 acres) are under forest. The most-wooded vilâyets are Kastamonu, Aydin, Bursa, Bolu, Trabzon, Konya and Karesi. Of the forest land, about 88 per cent. belongs to the State, 6 per cent. to private persons, and the rest to communes and wakfs (pious foundations).

In 1934 there were in Turkey 10,719,000 sheep, 6,362,000 ordinary goats, 2,636,000 mohair goats, 5,169.000 cattle, 955,000 asses, 563,000 horses, 88,000 camels, 46,000 mules, 539,000 buffaloes.

The wool clip in 1932 was 12,000 metric tons, and the mohair clip, 4,000 metric tons.

Mining.—The Turkish provinces, especially those in Asia, are reported rich in minerals, which are little worked. Production of principal minerals in 1932 and 1933 was as follows:—

Mineral	1932 Metric tons	1933 Metric tons	Mineral	1932 Metric tons	1933 Metric tons
Chrome	55,216	79,379	Emery	6,323	7,016
Silver-lead	—	—	Coal	1,178,255	1,323,220
Zinc ore	3,250	1,500	Lignite	13,559	29,561
Manganese ore	2,800	7,700	Mercury[2]	—	23
Antimony	—	667	Arsenic	3	1,906
Borax	4,884	7,553	Clay	—	4,925
Meerschaum[1]	107	241	Cement	108,163	1,172,993

[1] Cases. [2] Flasks.

Industry.—Industries were relatively unimportant, but under cover of the new protective tariffs, which came into force on October 1, 1929, an impetus has been given to industrial development. The vilayet of Aydin was before the war one of Turkey's industrial centres. An attempt is being made by the Government to revive industry in Smyrna, and a fair amount of machinery has been imported. Carpet weaving represents approximately 60 per cent. of pre-war capacity. The textile industry is being developed under Government auspices and a scheme has been drawn up for the creation of more than one Government textile factory to supplement existing ones, under a 5-year plan. The number of fig-packing establishments has been reduced. Cotton ginneries are being rebuilt, and in June, 1926, an oilcake factory was established at Adana. A further recent development has been the opening in December, 1926, of sugar factories at Uşak, near Izmir (Smyrna), at Alpullu in Thrace and another in December, 1933, at Eskişehir; their total production in 1933 was 60,000 tons. Many small factories have

been established in recent years, including saw-mills constructed near Bozüyük, and cement works at Ankara and Kartal. The latter was erected in 1929 by a Belgian group on the Anatolian railway, a few miles from Istanbul, and will produce 70,000 tons annually. A German group has constructed a factory at Bakirköy, which will have a similar capacity. The total productive capacity of present factories in Turkey is 235,000 tons. In 1929, the Ford Company established important assembly works at Tophané in Istanbul. The plant can assemble 80 cars per 8-hour day. There are now 1,473 industrial establishments in Turkey, employing 50,579 hands. These figures do not include small workshops and handicrafts.

Commerce.

Imports and exports for five years :—

	1928	1929	1930	1931	1932
	£T	£T	£T	£T	£T
Imports .	223,531,775	256,296,379	147,553,703	126,659,613	85,983,723
Exports .	173,537,489	155,214,071	151,454,371	127,274,807	101,301,355

Turkish trade for 2 years was distributed among the principal countries as follows :—

Country	Imports		Exports	
	1931	1932	1931	1932
	£T	£T	£T	£T
United Kingdom . . .	14,361,401	10,640,466	10,850,161	9,974,613
Italy	18,450,042	11,074,200	30,752,262	16,358,814
Germany	27,048,541	19,982,621	13,649,033	13,722,374
France	12,787,611	7,189,840	12,156,188	7,820,185
United States . . .	4,117,612	2,266 546	12,678,299	12,092,927
Russia	7,243,326	5,942,269	4,688,045	5,437,163
Japan	5,561,425	3,969,495	42,581	275,076

The principal articles of import and export in 1931 and 1932 were as follows :—

Imports	1931	1932	Exports	1931	1932
	£T	£T		£T	£T
Cotton piece-goods.	27,740,702	16,357,191	Tobacco (leaf) .	28,752,180	26,939,906

Machinery . .	10,951,799	8,207,283	Hazlenuts (shelled)	8,691,424	6,549,873
Woollen goods .	6,557,764	2,797,998	Raisins (dried) .	10,768,706	10,574,305
Mineral oils & coal.	4,989,439	4,277,850	Figs (dried) . .	5,354,930	3,510,142
Sugar	4,872,608	—	Olive oil . .	6,111,476	772,477
Cotton yarns and thread . . .	4,298,954	3,816,241	Barley . . .	3,472,258	3,458,328
Hides and skins .	3,943,607	2,045,139	Eggs . . .	9,651,555	8,026,093
Paper and paper manufactures .	3,694,048	3,085,230	Wool . . .	1,814,946	1,284,132
Tea, coffee & cocoa.	3,641,591	3,038,879	Mohair . . .	1,597,046	1,634,480
Rubber manufactures . . .	2,478,499	1,549,099	Coal . . .	1,661,026	3,783,959
Chemicals . .	2,405,612	2,563,702	Carpets . . .	2,403,607	1,137,438
Woollen yarns. .	2,326,775	2,927,411	Opium . . .	2,817,924	1,616,506

The principal imports from Turkey into the United Kingdom and exports to Turkey from the United Kingdom (according to Board of Trade Returns) in two years were:—

Imports from Turkey	1932	1933	Exports to Turkey	1932	1933
	£	£		£	£
Figs and fig cake.	131,435	180,145	Coal . . .	39,799	11,265
Nuts . . .	121,301	53,574	Iron and Steel.	92,908	105,165
Wool (Mohair) .	67,536	183,198	Cottons . .	408,348	520,811
Carpets . . .	51,811	29,641	Woollens . .	141,027	166,170
Tobacco . . .	9,259	3,301	Motor vehicles	64,533	48,500
Raisins . . .	753,587	261,530	Machinery .	109,665	84,120

The value of the commercial intercourse between Turkey and Great Britain during the last five years (according to the Board of Trade Returns) is shown in the following table:—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports into U.K. from Turkey	1,869,725	1,475,144	1,616,942	1,149,636	921,255
Exports of British produce to Turkey	1,868,285	1,714,922	1,482,311	1,459,060	1,172,293
Re-exports to Turkey from U.K.	72,585	66,348	51,044	63,332	57,516

Shipping and Navigation.

On July 1, 1934, 183 vessels under the Turkish flag had a tonnage of 192,683 gross tons.

In 1933, 9,988 vessels of 11,118,356 tons called at the port of Istanbul, inclusive of those in transit.

Air routes.—Compagnie Internationale de Navigation Aerienne maintains aerial services between Istanbul and many European centres. An air service between Istanbul and Ankara has been established.

Internal Communications.

Turkey has approximately 9,867 miles of roads and about 9,300 miles of unsurveyed tracks.

The length of railway line in Turkey in May, 1931, was 3,619 miles broad gauge and 225 miles narrow gauge. In 1932 a further 233 miles were opened to traffic. Since 1924, 1,273 miles of line have been constructed, of which 1,180 miles have been opened to traffic, 574 miles are in course of construction, and 205 miles remain to be adjudicated.

In 1929 58,493,622 letters, 1,367,756 postcards, 10,906,704 printed papers were handled internally, 2,211,673 letters were received from and 631,786 letters sent abroad. In 1929 there were 31,551 kilometres of telegraph lines with 61,886 kilometres of wire; 641 offices, 7,407,491 internal telegrams and 1,024,033 foreign telegrams sent.

Banking and Credit.

In January, 1917, the Turkish Government issued a Charter for a new National Bank, to be styled the Central Bank of the Turkish Republic.

Its capital is 15 million Turkish pounds, which has been fully subscribed, and up to the present 7,300,000 Turkish pounds has been called up. The future status of this bank was determined by a law passed by the Grand National Assembly on June 11, 1930. It began its activities on October 3, 1931, following the approval of the Statutes by the Government. The bank has a concession for thirty years, renewable during the last five years of this period, and is the sole bank of issue in the country. Amongst the more important Turkish banks may be mentioned the Banque Agricole (Ziraat Bankasi), the oldest of the Turkish institutions, with a paid-up capital of 27,000,000 Turkish pounds. The other banks are the Banque d'Affaires (Iş Bankasi), the business of which is increasing rapidly, Banque Industrielle et Minière (Sanayi ve Maadin Bankasi), and Emlâk ve Eytam Bankasi (Crédit Foncier). The principal foreign Bank in Turkey is the Ottoman Bank, founded in 1863. It has a Branch in every important town of Turkey. The concession of the Ottoman Bank, extended in August, 1925, by the Turkish Government, for a further period of 10 years, was prolonged (June 5, 1933) until March, 1952.

The total amount of paper currency in circulation on February 14, 1935, was £T164,315,000, gold coin and bullion, £T19,628,000.

Money, Weights, and Measures.

On April 17, 1916, an order was issued reforming the currency. A gold standard, with the piastre as the unit, was thenceforth to be general all over Turkey, and the piastre to equal 40 para. The piastre, as well as the half piastre (20 para), quarter piastre (10 para) and eighth piastre (5 para) pieces were to be of nickel. Silver coins were 2, 5, 10, and 20 piastres; and gold coins 25, 50, 100, 250, and 500 piastres. Silver was legal tender up to 300 piastres, and nickel up to 50 piastres.

The only money in general circulation, apart from nickel coins for 10 and 20 paras and for 1 piastre and coins for 2½, 5, 10 and 25 piastres, is paper money issued during the war. This forced currency is depreciated, the Turkish paper lira being worth about one-ninth of the gold coin of the same denomination. At the beginning of 1929 the Government stabilized the exchange at about 1,030 piastres to the £1 (sterling). In 1931 the Turkish Government pegged the lira to the French franc at 12·06 francs to the lira.

The metric system of weights and measures came into force on January 1, 1934.

For the old weights and measures, *see* THE STATESMAN'S YEAR-BOOK for 1933, p. 1349.

On May 24, 1928, the Grand National Assembly passed a law making the employment of European numerals obligatory as from June 1, 1929.

On March 1, 1917, the Gregorian calendar was introduced into Turkey, to be used side by side with the Hegira calendar, while as from January 1, 1926, it was decided finally to adopt the Gregorian calendar alone, the Turkish civil year 1342 becoming 1926.

Diplomatic and Consular Representatives.

1. OF TURKEY IN GREAT BRITAIN.

Ambassador.—Ali Fethi Okyar (April 12, 1934).
Counsellor.—Sedat Zeki.
First Secretary.—Muzaffer Kâmil.
Third Secretary.—Hasan Nurettin.

Commercial Counsellor.—Nizamettin Ali.
Archivist.—Galip Mübarek.
Consul.—Talat Rauf (July 31, 1934).

2. OF GREAT BRITAIN IN TURKEY.

Ambassador.—The Right Hon. Sir Percy L. Loraine, Bart., K.C.M.G. (appointed December 16, 1933).
Counsellor.—J. Morgan, C.M.G.
Naval Attaché.—Capt. H. Pott, M.V.O., R.N.
Military Attaché.—Major F. A. Sampson.
Commercial Secretary.—Col. H. Woods, O.B.E.
First Secretary.—W. L. C. Knight.
Second Secretary.—R. J. Bowker.
Third Secretary.—R. G. Dundas.
Archivist.—H. W. Gunningham, O.B.E.
Consuls-General.—(Istanbul) W. Hough, (Smyrna) C. A. Greig.

There is a Consul at Trabzon (Trebizond) and Mersin (joint post).

URUGUAY.

(República Oriental del Uruguay.)

Constitution and Government.

The Republic of Uruguay, formerly a part of the Spanish Viceroyalty of Rio de la Plata, and subsequently a province of Brazil, declared its independence August 25, 1825, which was recognised by the Treaty between

Argentina, Brazil and Uruguay, signed at Rio de Janeiro August 27, 1828. The first Constitution was adopted July 18, 1830.

In 1919 a new Constitution was adopted in which elaborate precautions were taken to prevent the conversion of the presidency into a dictatorship. Borrowing the idea from the Venetian Council of Ten, the executive power was divided between the President of the Republic and a National Administrative Council, consisting of nine members, elected by popular vote for six years. For description of that constitution and its overthrow in 1934, see the THE STATEMAN'S YEAR-BOOK for 1934, p. 1359.

Under the new Constitution adopted at a general election on April 19, 1934, the system of a dual executive is abolished, and the executive power is discharged by the President of the Republic, assisted by a Council of Ministers. The President is elected by the legislature for a term of four years. The Council of Ministers is composed of nine members, chosen from the two political parties which have obtained the highest number of votes in Presidential elections, the majority party being represented on the Council by six members.

The Constitution of 1919 separated Church and State, and introduced universal male suffrage for all, over 18 years of age, who are able to read and write. In 1921 the Constitution was amended, granting votes to women. Voting is secret, and the principle of proportional representation operates. Voters participating in the National Election of 1931 numbered 317,294; in that of 1934, 242,000.

Parliament, under the new Constitution, consists of two Houses, the Senate, whose 30 members are elected at large for four years, and the Chamber of Representatives of 99 members, elected from districts for four years. The 30 seats in the Senate are divided equally between the two political parties obtaining the highest number of votes, providing that the two together poll an absolute majority in presidential elections; failing this, proportional representation is granted.

The following is a list of the Presidents since 1899:

Don Juan Lindolfo Cuestas, March 1, 1899—1903.
Don José Batlle y Ordoñez, March 1, 1903—1907
Dr. Claudio Williman, March 1, 1907—1911.
Don José Batlle y Ordoñez, March 1, 1911—1915.
Dr. Feliciano Viera, March 1, 1915—1919.
Dr. Baltasar Brum, March 1, 1919—1923.
Don José Serrato, March 1, 1923—1927.
Dr. Juan Campisteguy, March 1, 1927—1931.
Dr. Gabriel Terra, March 1, 1931.

President of the Republic.—Señor Dr. Gabriel *Terra* (first elected March 1, 1931, and again on April 19, 1934; assumed office May 19, 1934, to serve until 1938). Salary, 24,000 pesos per annum.

Area and Population.

The following table shows the area and the estimated population of the 19 departments (capitals in brackets) on January 1, 1934:—

Departments	Area, square miles	Population Jan. 1, 1934	Pop. per square mile
Artigas (Artigas)	4,394	49,486	11·2
Canelones (Canelones)	1,834	183,495	100·0
Cerro-Largo (Melo)	5,763	87,228	15·1
Colonia (Colonia)	2,193	117,109	53·4
Durazno (Durazno)	5,525	84,948	15·3
Flores (Trinidad)	1,744	32,231	18·4
Florida (Florida)	4,673	96,476	20·6

Departments	Area, square miles	Population Jan. 1, 1934	Pop. per square mile
Lavalleja (Minas)	4,819	105,701	21·9
Maldonado (Maldonado)	1,587	60,434	38·0
Montevideo (Montevideo City)	256	500,877	1,976·0
Paysandú (Paysandú)	5,115	74,534	14·5
Rio Negro (Fray Bentos)	3,269	42,084	12·8
Rivera (Rivera)	3,793	67,372	17·7
Rocha (Rocha)	4,280	73,911	17·2
Salto (Salto)	4,865	89,657	18·4
San José (San José)	2,688	90,176	33·5
Soriano (Mercedes)	3,561	82,378	23·1
Tacuarembó (Tacuarembó)	8,112	94,090	11·5
Treinta y Tres (Treinta y Tres)	3,682	61,047	16·5
Total	72,153	1,993,234	27·6

The last census was taken in 1908, when the total population numbered 1,042,686, divided into 861,464 native-born and 181,222 immigrants.

The population of Montevideo City (the capital) on December 31, 1933, was estimated at 667,212. Of the other cities, Paysandu had 26,000 inhabitants; Salto, 30,000; Mercedes, 23,000.

Births, deaths, and marriages for three years:—

Years	Living Births	Still-Births	Marriages	Deaths	Surplus of Living Births over Deaths
1931	44,854	1,560	11,168	21,163	23,691
1932	44,036	1,506	9,900	19,825	24,211
1933	41,650	1,294	9,520	20,358	21,292

Of the living births in 1933, 11,898 were illegitimate. Divorces: 191 in 1933; 380 in 1932. Immigration 1933, 138,639; emigration, 136,952. The language of the country is Spanish.

Religion and Education.

State and church are separated; and there is complete religious liberty. The religion professed by the majority of the inhabitants is Roman Catholic. The archbishopric of Montevideo has 2 suffragan bishops in Salto and Melo. The 1908 census showed 430,095 Catholics, 12,232 Protestants, 45,470 unspecified and 126,425 Liberals.

Primary education is obligatory; both primary and superior education are free. In 1933 there were 1,548 public and private schools with 186,435 enrolled pupils and 4,828 teachers; of these 1,386 schools with 4,069 teachers and 165,810 pupils were public. Secondary schools had 11,856 pupils. There were also 62 evening courses for adults with 7,535 pupils and 159 teachers. State expenditures on education in 1933 amounted to 6,452,741 pesos.

The University of the Republic at Montevideo, inaugurated in 1849, had 13,766 students in 1932. There are five normal schools for males and females, and a school of arts and trades supported by the State where 1,100 pupils receive instruction gratuitously. There are also many religious seminaries throughout the Republic with a considerable number of pupils, a school for the blind, two for the deaf and dumb, and a school of domestic science.

Justice.

The Supreme Court of Justice consists of 5 judges elected by the two Chambers sitting as a National Assembly. The President is chosen annually by the members of the Court from amongst themselves. This court has original jurisdiction in constitutional, international, and admiralty cases, and will hear appeals in cases in which the decision has been modified or altered in other appeal courts, of which there are 3 each with 3 judges. In Montevideo there are also 3 courts for ordinary civil cases, 7 for commercial cases, 2 for Government (*Juzgado de Hacienda*), as well as criminal and correctional courts. Each departmental capital has a departmental court, and each of the 220 judicial sections into which the Republic is divided has a justice of peace court; further, each section is divided into districts, in which deputy judges (alcaldes) try cases involving small amounts.

In September, 1907, the death penalty was abolished, penal servitude for a period of 30 to 40 years being put in its place.

Finance.

The receipts and expenditure for recent fiscal years (ending June 30) are stated as follows (at par 4·7 gold pesos = £1; 1 gold peso = 1·03 dollars U.S.):—

—	Receipts	Expenditure	—	Receipts	Expenditure
	Gold pesos	Gold pesos		Gold pesos	Gold pesos
1929–30	58,916,879	59,702,624	1933	57,504 388	60,995,026
1930–31 [1]	55,735 890	62,166,926	1934 [2]	59,044,045	58,181,533
1931–32 [2]	57,910,884	62,456,902	1935 [2]	84,162,974	83,898,420

[1] Based on budget of 1929–30. [2] Budget estimate.

The public debt of Uruguay on December 31, 1934, stood at 313,604,623 pesos, of which 141,669,766 was external (of which 3,500,000 pesos had been repatriated); in addition the municipal external debt was 13,110,742 pesos, internal 53,264,284 pesos. Total indebtedness, National and Municipal, was 379,979,649 pesos. A decree of December 13, 1933, resumed full interest payment (which had been suspended in July) on the 3½ per cent. sterling bonds, and proffered foreign exchange on the 5 per cent. bonds at a rate equivalent to 3½ per cent. interest. British capital invested in Uruguay stood at 39,598,525*l.* in 1933.

Defence.

The army of Uruguay consists of a small standing army, and the National Guard. Service in the standing army is voluntary, lasting from 2 to 5 years, with re-engagement up to the age of 44. It consists of 19 line battalions, 4 rifle companies, 9 cavalry regiments, 3 field artillery regiments of 3 batteries each, a fortress artillery company and machine gun company, 1 engineers' battalion, and 1 bearer company with a peace strength in 1932 of 5,751, and a nominal war strength of 50,000.

The National Guard is a militia, service in which is compulsory in the event of war. It is divided into three classes, or 'bans.' The first 'ban,' or 'mobile' national guard contains all the young men fit for military duty between the ages of 17 and 30, who would take the field with the standing

army. The second ban, consisting of men fit for service between 30 and 45, is the 'departmental,' or provincial, national guard. Its units do not move out of their own departments, but the men can be drafted to make good the losses of the mobile units in time of war. The third ban, containing all the men between 19 and 45, is the 'territorial' force, and is only liable to garrison duty in its own districts. The total strength of the National Guard (all three bans) is, nominally, about 100,000 men and 120 guns.

There is also a police force, with an establishment of 5,000, and a force of mounted police ('Guardia Republicana') of 400. The Fire Brigade, which also undertakes police duties, numbers 360.

The infantry of the active army is armed with the Mauser rifle; the field batteries have either Schneider or Krupp 7·5 cm. guns. The National Guard is mainly armed with the Remington rifle and old de Bange guns.

The Military Aviation School possessed, at the end of 1934, some 15 machines in active service. The School has its own workshops and staff of mechanics, and an establishment of 8 instructors and 320 officers and men. A naval aeronautical service is also being organized; 3 flying boats were bought in Italy in 1930, but little progress has been made.

The fleet consists of the torpedo gunboat *Uruguay*, 1,150 tons; the surveying vessel *Miranda*, of 500 tons, built in Spain in 1930; and a few smaller craft.

Production and Industry.

Uruguay is primarily a pastoral country, 60 per cent. (27,573,919 acres) of the total area being devoted to the stock-raising industry, 20 per cent. (10,002,126 acres) to mixed farms and ranches, and only 7 per cent. (3,120,000 acres) to agriculture. The remaining 13 per cent. of the country's area is unproductive. Animals and animal products constitute 95 per cent. of the country's exports. Four leading frigorificos have a daily capacity of 4,000 cattle and 7,000 sheep carcases. Total meat exports (1933), 106,136 tons. Exports, 1934, of sheepskins, 3,153 tons; of hides, 19,715 tons. Wool shipments for recent seasons have been: 1931–32, 92,656 bales; 1932–33, 112,653 bales; 1933–34, 94,019 bales. Nutria skins are exported at the rate of 50,000 a year. A livestock census, 1930, showed 7,127,912 cattle, 20,558,124 sheep, 600,000 horses, and 307,924 pigs.

Agricultural products are raised chiefly in the Departments of Canelones, Colonia, San José, Minas, and Florida. The average farm is about 250 acres. In 1932, 15·5 per cent. of the farms were run by managers, 40 per cent. by tenant farmers, and 44·5 per cent. by their proprietors. The principal crops and their yield for two years were as follows:—1933–34: wheat, 399,354 tons; maize, 106,302 tons; linseed, 73,060 tons; oats, 65,559 tons. Exports, 1934: wheat, 69,383 tons; linseed, 68,192 tons; flour, 12,874 tons.

Wine is produced chiefly in the departments of Montevideo, Canelones, Salto, Colonia, and Paysandú. In 1933 there were 4,260 properties of 33,799 acres, producing 78,359,861 kilos. of grapes, and 11,823,687 gallons of wine. Annual fruit crop, exclusive of grapes, about 153,000 tons, principally peaches, oranges and pears. Tobacco (694,885 kilos in 1933) and olives are also cultivated.

In the northern departments silver, copper, lead, manganese, and lignite coal are found, but are not greatly worked. The supply of electricity for light, power, and traction has been a State monopoly since 1912; as 20 per cent. of total imports, in value, consists of coal and other fuels, exploitation of hydro-electric resources is considered important.

Commerce.

The foreign trade (imports in 'official values' and exports in 'real values') was as follows (at par 1 gold peso = 1·03 dollars, U.S.; 4·7 gold pesos = £1):—

—	1929	1930	1931	1932 [2]	1933
	Pesos	Pesos	Pesos	Pesos	Pesos
Imports [1]	93,284,012	91,300,346	88,781,906	55,047,534	60,643,955
Exports	92,952,246	100,934,583	78,303,227	58,285,626	66,637,590

[1] Comparison of import figures for different years is difficult, because the system of calculating "official values" of imports has been several times modified since 1923. Furthermore, as "official values" are stated to be, in many cases, below real values, the balance of trade is not as favourable as the figures suggest. Real value of 1931 imports was 114,127,575 pesos, and of 1932 imports, 66,517,590 pesos.

[2] Figures of the Finance Minister. The Administrative Council on March 15, 1933, gave imports as 66,517,574 pesos, and exports as 59,950,300 pesos.

The principal exports in 1933 were as follows:—Live animals, 27,854; meat and extracts, 106,136,502 kilos; wool, 52,092,758 kilos; sheepskins, 7,339,677 kilos; hides, 22,912,899 kilos; flax, 60,523 metric tons. The cattle industry furnished, in value, 84·0 per cent. of total exports.

The imports (official values) and exports (real values) for 1932 and 1933 were distributed as follows (in pesos):—

Countries	Imports from		Exports to	
	1932	1933	1932	1933
	Pesos	Pesos	Pesos	Pesos
Argentina	9,111,653	9,956,941	5,096,171	4,024,246
Brazil	4,623,304	4,815,352	691,107	1,200,204
Belgium	1,915,909	2,249,720	8,326,908	4,133,150
France	5,439,514	1,715,207	9,098,313	6,565,328
Germany	2,233 326	5,446,594	6,329,148	9,888,318
Italy	2,210,731	3,106,940	586,860	4,342,784
Great Britain	10,329,348	12,149,338	16,114,884	22,244,148
United States	5,349,636	5,571,960	2,417,833	5,549,576

In 1933 the principal articles imported into the United Kingdom from Uruguay (according to Board of Trade Returns) were: chilled beef, 953,839*l.*; frozen beef, 221,071*l.*; tinned beef, etc., 490,626*l.*; frozen mutton, 369,155*l.*; wool, 1,069,085*l.* The principal articles exported to Uruguay were cotton piece goods, 321,114*l.*, and iron and steel manufactures, 194,663*l.*; coal, 224,223*l.*

Total trade between Uruguay and the U.K. for 5 years (Board of Trade Returns):—

—	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Uruguay into U.K.	7,387,283	5,229,628	3,003,258	3,465,513	3,177,251
Exports to Uruguay from U.K.	3,578,035	1,984,604	1,501,361	1,751,856	1,694,617
Re-exports to Uruguay from U.K.	55,771	32,937	26,250	24,508	25,263

Shipping and Communications.

In 1933, 7,437 vessels of 10,397,419 tons entered and cleared the ports of Uruguay.

On July 1, 1934, there were 49 vessels under the Uruguayan flag with a gross tonnage of 30,562.

The National roads of Uruguay have a total length of 2,760 miles, and there are about 5,903 miles of departmental roads, of which about 323 miles are macadamised. River transport is also very extensive.

The four principal railway systems are the Central (Combined System, 980 miles), the Midland (320 miles), North Western (113 miles), Northern (73 miles), all British owned. The East Coast Railway (78 miles) and 3 minor lines are controlled by the State. The total railway system open for traffic is about 1,729 miles of standard gauge, of which 205 miles are State lines.

The telegraph lines in operation have a total length of 7,508 miles; in 1932, 249 offices through which 1,219,570 telegrams passed. The telephone system in Montevideo is controlled by the State; 19 companies in the interior (1933) had 61,596 miles of wire. Wireless telephone communications with Spain and Argentine were established in 1929, followed by connections with United States, France and Great Britain in 1930. Uruguay (1935) has 35 long-wave broadcasting stations. Four cable companies connect Montevideo with the United States and Europe.

There are 995 post offices. The movement of mail in 1933 (internal) comprised 97,617,385 letters, packets, &c., and external, 8,579,868. Air mail and passenger service connects Montevideo with Buenos Aires, Rio de Janeiro, Central America, and the United States.

Banking and Credit.

The Bank of the Republic, whose president and directors are appointed by the Government, had a paid-up capital on June 30, 1934, of 27,821,685 gold pesos. This bank has the exclusive right to issue notes, but the privilege is unprofitable owing to the heavy gold reserves required. On June 30, 1934, notes to the value of 73,637,144 pesos, including 59,853,300 of large denominations (convertible into gold whenever the gold standard is resumed) and 13,783,844 pesos (convertible to silver) were in circulation, and sight deposits were 34,253,588 pesos. Stock of gold amounted to 48,423,405 pesos, and bonds of external debt held, 1,400,744 pesos.

In 1912 the Government created a National Insurance Bank (Banco de Seguros del Estado) with a monopoly of new insurance business of all kinds. No new insurance companies may now be established. In 1932 the premiums collected amounted to 5,472,341 pesos. This bank's capital and reserves on March 31, 1933, amounted to 19,619,054 pesos. The Post Office Savings Bank reported October 31, 1933, deposits of 14,500,000 gold pesos.

Of the 21 banks in Uruguay two are British: Bank of London and South America, and Royal Bank of Canada. All the banks reported June 30, 1934, paid-up capital and reserves of 94,016,478 pesos; deposits of 170,872,059 pesos and loans of 237,058,177 pesos.

Money, Weights, and Measures.

Save for a small issue of gold coins, weighing 8 grammes, ·485 fine, issued in 1930 in commemoration of the centenary of the Uruguayan constitution, there is no Uruguayan gold coin in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso oro*, weighing 1·697 grammes, ·917 fine. It is equal to 100 *centesimos*. The actual circulating medium consists of paper notes issued by the Bank of the Republic in

denominations of 500, 100, 50, 10, 5, and 1 pesos. Silver coins of 50 and 20 *centesimos*; and nickel coins of 5, 2, and 1 *centesimos* are also in circulation.

At par, 1 gold peso = 1·03 dollars U.S. = 51*d.* sterling; £1 = 4·7 gold pesos. The exchange value of the peso in London in 1934 ranged between 22*d.* and 18*d.*; in New York, between 81·15 cents and 75·80 cents.

The metric system of weights and measures was adopted in 1862.

Diplomatic and Consular Representatives

1. Of Uruguay in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Pedro Cosio.
Counsellor.—Roberto E. MacEachen.
Second Secretary.—Gustavo Alberto Rey Alvarez.

VENEZUELA.

(Estados Unidos de Venezuela.)

Constitution and Government.

The Republic of Venezuela was formed in 1830 after amicable secession from the other members of the Republic of Colombia. The vigorous efforts of General Juan Vicente Gómez have given Venezuela considerable freedom

from factional strife. He was President from 1909 to 1915 and again from 1922 to 1929, when he retired, but, as Commander-in-Chief of the Army, retained a firm control. A military uprising in April, 1931, led General Gómez to resume the reins; Congress demanded the resignation of President Pérez on June 14, 1931, and unanimously elected General Gómez President and Commander-in-Chief of the Army. The Constitution in force is that of May 29, 1929, modified July 7, 1931.

Congress consists of two chambers, the Senate of 40 members, and the Chamber of Deputies of 85 members. Senators, who are elected for 3 years, 2 for each State, must be Venezuelans by birth and over 30 years of age. Deputies must be native Venezuelans over 21 years of age. They are elected for three years; there is one for every 35,000 inhabitants, and one more for an excess of 15,000. A State with fewer than 35,000 of population has one deputy. The Territories, on reaching the population fixed by law, also elect deputies.

The President is elected by Congress for 7 years, must be a Venezuelan by birth and over 30 years of age. He exercises executive power in conjunction with the Cabinet Ministers through whom he acts.

President of the Republic.—General Juan Vicente *Gómez*, elected June 19, 1931; assumed office, July 13, 1931.

The seat of Government is at the City of Caracas, but, when any unforeseen circumstance requires, the Executive Power may fix its residence at any other point of the Federal District.

The States are autonomous and politically equal. Each has a Legislative Assembly, whose members are chosen in accordance with their respective Constitutions, and a President. The States are divided into 150 districts and 598 municipalities. Each district has a municipal council, and each municipio a communal junta. The Federal District and the Territories are administered by the President of the Republic through Governors.

The following is a list of Presidents since 1892:—

	Took Office.		Took Office.
General Joaquín Crespo .	Oct. 10, 1892	Dr. Victorino Márquez Bustillos	May 3, 1915 [3]
General Ignacio Andrade .	Mar. 1, 1898 [1]	General Juan Vicente Gómez	May 3, 1922
General Cipriano Castro .	Oct. 24, 1899 [1]	Dr. Juan Bautista Pérez .	May 3, 1929 [2]
General Juan Vicente Gómez . . .	Dec. 19, 1908 [4]	Dr. Pedro Hriago Chacín .	June 24, 1931 [3]

[1] Deposed. [2] Resigned. [3] Provisional.
[4] Re-elected for period 1915–1922, but declined to take office, and as President-elect served as Provisional President while his successor acted as Provisional President.

Area and Population.

Venezuela, once regarded as having an area of 393,874 square miles, is now officially considered to embrace 912,050 square kilometres, or 352,051 square miles. Bolivar, the largest state, has an area of 91,868 square miles; the other states are far smaller. The Federal District embraces 745 square miles. According to the census of January, 1926, the population was 3,026,878, not including 10,520 Venezuelans known to be residing abroad. Estimated population on December 31, 1932, was 3,261,734; of the Federal Districts, 208,579; of the city of Caracas, 141,349. The language of the country is Spanish.

The country is now divided into a Federal District, 20 States and two Territories, as follows:—

State	Capital	Pop. January, 1926	State	Capital	Pop. January, 1926
Anzoátegui .	Barcelona	129,792	Portuguesa .	Guanare	58,721
Apure . .	San Fernando	58,499	Sucre . .	Cumaná	216,476
Aragua .	Maracay	105,839	Táchira .	San Cristóbal	172,900
Bolívar .	Ciudad Bolivar	98,258	Trujillo .	Trujillo	218,780
Carabobo .	Valencia	147,204	Yaracuy .	San Felipe	122,886
Cojedes .	San Carlos	82,152	Zamora .	Barinas	57,341
Falcón . .	Coro	178,642	Zulia . .	Maracaibo	222,613
Guárico .	Calabozo	125,282	Ter. Amazonas	Atures	60,276
Lara . .	Barquisimeto	271,369	,, Delta Amacuro	Tucupita	26,582
Mérida . .	Mérida	150.128	Federal Dist.	Caracas	195,460
Miranda .	Ocumare	189,572			
Monagas .	Maturin	68,765		Total .	3,026,878
Nueva Esparta	La Asuncion	69,392			

Some of the more important cities with their population according to the census of 1926, are:

Caracas . .	135,253	San Cristóbal .	15,295	Carúpano . .	25,679
Maracaibo . .	74,767	Ciudad Bolivar .	16,762	Rio Caribe . .	25,428
Valencia .	36,804	Cumaná . .	18,737	Nirgua . .	36,836
Barquisimeto	23,109	Duaca . .	28,719	Bocono . .	21,775

Religion and Education.

The Roman Catholic is the prevailing religion, but there is toleration of all others. There are two archbishops, one at Caracas, who is Primate of Venezuela, and one at Merida. There are six suffragan bishops. In the primary schools religious instruction is given only to those children whose parents expressly request it.

Elementary instruction is free, and from the age of 7 to the completion of the primary grade, compulsory. In 1933 Venezuela had 2,180 public primary schools with 3,342 teachers and, including a few private schools with a total enrolment of 121,035 pupils; there are 47 secondary schools, public and private, with 360 teachers and 2,040 pupils. For superior education there are four colleges, two maintained by the State at Caracas and two private institutions at Maracaibo and Mérida. Superior instruction is divided into schools, viz.: Philosophy and Letters; Physical, Mathematical, and Natural Sciences; Medical Science; Political Science; Ecclesiastical Science; Dentistry and Pharmacy. The most important are the University of Los Andes at Mérida, with seven schools, and in Caracas the Central University with 1,096 students in 1932. The Government also supports various Institutes for special instruction.

Justice.

The supreme tribunal is the 'Federal and Cassation Court,' whose 7 members are elected by Congress for 7 years, one for each of seven groups of States into which the Republic is divided for this purpose. They select their own President, Vice-President, and Chancellor. The Federal Procurator-General is appointed for 3 years. There are lower Federal courts.

The States have each a Supreme Court with 3 members called respectively President, Relator, and Chancellor. Each State has also a superior court, or superior tribunal, courts of first instance, district courts, and municipal courts. The States' judicial officers hold their posts for 3 years. In the Territories there are civil and military judges of first instance, and also judges in the municipios.

Finance.

The revenue and expenditure for five fiscal years ending June 30 were as follows (25·25 bolivars = £1 ; 1 bolivar = 19 cents, U.S.) :—

—	1929-30	1930-31	1931-32	1932-33	1933-34[1]
	Bolivars	Bolivars	Bolivars	Bolivars	Bolivars
Revenue . .	193,189,750	188,932,746	175,166,378	169,642,512	150,000,000
Expenditure .	192,450,000	172,398,887	160,015,851	158,089,705	141,596,120

[1] Budget estimates.

The following table shows (in bolivars) the principal items of the budget for the fiscal year ending June 30, 1934 :—

Revenue	Bolivars	Expenditure	Bolivars
Import duties . . .	51,000,000	Department of Interior .	29,373,128
Cigarette revenue . .	15,000,000	Foreign Affairs . . .	4,813,667
Liquors	12,000,000	Department of Finance .	16,971,945
Revenue stamps . . .	10,300,000	Ministry of War and Marine	30.451,788
Minerals	40,200,000	Internal Development .	12,384,450
Other sources . . .	21,500,000	Ministry of Public Works .	30,000,000
		,, ,, Education .	9,256,805
		Health	6,942,394
		Budget adjustments . .	1,401,915
Total	150,000,000	Total (all items) .	141,596,120

On June 30, 1930, as a token of homage to Simon Bolívar, the Liberator, the external debt of 23,757,634 bolivars was completely paid off in gold. The internal debt stood on December 31, 1932, at 22,700,460 bolivars.

Under the Constitution 12 per cent. of the Federal Revenue is assigned to the States and Territories from the appropriation of the Ministry of the Interior ; 1933-34, 20,471,745 bolivars.

Defence.

In July, 1933, a law was promulgated according to which all Venezuelans, 21 years of age or older, have to serve three years with the active forces of the army, and to remain in the reserve until the age of 45. The active army consists of 9 infantry brigades, 1 cavalry regiment, 1 mountain artillery regiment, 6 groups of coast artillery, and the technical staff auxiliary to these. The naval force consists of 2 cruisers, 4 gunboats, 1 transport, 1 hospital ship, 1 tugboat, 1 dispatch boat and 1 sailing vessel. The naval fortifications are of steel and timber. There is a military and naval college, a school for military aviation, a training school for troops, and special courses for artillery and cavalry regiments.

Production and Industry.

The surface of Venezuela is divided into 3 distinct zones—the agricultural, the pastoral, and the forest zone. In the first are grown coffee, cocoa, sugar-cane, wheat, rice, tobacco, maize, cotton, beans, &c.; the second affords runs for more than 3,000,000 cattle and numerous horses ; and in the third, which covers a very large portion of the country, tropical products, such as caoutchouc, balatá (a gum resembling rubber), tonka beans, divi-divi, copaiba, vanilla, growing wild, are worked by the inhabitants. Forest re-

sources have been barely tapped; 600 species of wood have been identified. The coffee plantations number about 30,000, covering 543,400 acres with 135,000,000 bushes. Output, 1932–33, 1,450,000 bags; 1931–32, 1,000,000 bags. Exports of coffee, chiefly to Europe, 1932, were 108,276,471 pounds; of cocoa, 35,036,518 pounds. There are about 5,000 cocoa plantations and 600 sugar plantations. Production of sugar in 1932–33, 23,300 tons (of which 6,000 tons are exported), and of cotton about 7,500,000 kilos, all locally consumed. Silkworm cultivation has begun.

One-fifth of the population is engaged in agriculture. The live-stock in Venezuela is estimated as follows:—2,077,684 oxen, 113,439 sheep, 2,154,716 goats, 167,708 horses, 54,565 mules, 200,439 asses, 512,086 pigs. Shipments of hides (1932) amounted to 1,689 metric tons.

Venezuela is rich in metals and other minerals and is to-day the second petroleum producing country in the world; the production in 1932 amounted to 119,596,513 barrels (exports, 113,201,361 barrels); in 1933, output was 119,003,714 barrels (exports, 116,297,100 barrels). Oil tankers able to cross the sand bar into Lake Maracaibo have to be specially built. Asphalt from Lake Bermudez (output, 1931, 28,985 tons) is exported to the United States. There are important gold mines in the region to the south-east of Ciudad Bolívar. Output, 1932, amounted to 91,488 ounces; exported, 1932, 40,038 ounces. Copper ore is also produced (output, 1930, 3,294 metric tons). An American company is exploiting the magnesite deposits on Margarita Island. Coal is worked at Coro, in Falcón State, and at Naricual. Salt mines in various States are now worked by the Government. Round the island of Margarita and neighbouring islets off the north coast of Venezuela, pearl fishing is carried on by the government. Margarita pearls are distinguished by their delicate rose tints.

Venezuela has few industries, most manufactured materials required being imported. There are cotton mills at Valencia, Caracas, Maracay, and Cumaná, producing textiles which compete with imported Manchester goods in the cheaper qualities. There is also a cement and a glass factory at Caracas. Electric power is available in most of the larger towns.

Commerce.

The value of the imports into and exports from Venezuela for 5 years was [1 bolivar = 19 cents, U.S.; 25·25 bolivars = £1):—

—	1929	1930	1931	1932	1933
	Bolivars	Bolivars	Bolivars	Bolivars	Bolivars
Imports . . .	452,851,990	363,858,456	210,758,492	153,458,091	143,587,574
Exports . . .	778,360,088	762,494,232	651,618,047	628,260,172	617,546,684

Petroleum (crude) furnishes about 75 per cent. of total exports; coffee, 17 per cent.

Total trade between Venezuela and the United Kingdom (according to the Board of Trade returns) for 5 years:—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Venezuela to U.K. . .	798,312	641,857	382,735	277,344	136,839
Exports to Venezuela from U.K. . .	1,643,930	942,801	968,590	1,007,284	1,093,226
Re-exports to Venezuela from U.K. .	24,831	14,556	11,802	11,775	10,391

Shipping and Communications.

Foreign vessels are not permitted to engage in the coasting trade, except by special concessions or by contract with the Government. La Guaira is the chief port, but facilities for ocean-going vessels are inadequate. On July 1, 1934, there were 45 vessels under the Venezuelan flag with a gross tonnage of 64,501.

Road-building has greatly increased since 1909. There are about 3,100 miles of road fit for traffic the year round and 1,860 miles fit for summer motor traffic. Motor vehicles (1933) totalled 15,050, including 9,730 automobiles, 550 motor buses and 3,799 motor lorries.

In Venezuela there are 12 main lines of railway (6 national and 6 foreign—the latter, by far the most important, including 5 British and 1 Spanish) with a total length of (January 1st, 1933) 608 miles. In addition, the oil companies have about 62 miles of railroads. The Great Railway of Venezuela, 112 miles in extent, is one of the longest lines in the Republic, running between Caracas and Valencia. The Bolivar Railway, 136 miles, the oldest line in operation in the country, runs from the port of Tucucas to Barquisimeto. In Caracas electric tramways are worked by a British Company.

In summer there are 51 rivers and 20 channels navigable for about 12,000 miles; about 4,460 miles are navigable for canoes and small launches. The Orinoco is navigable for ships of 12 feet draught for part of its length. The Compañia Venezolana de Navegacion has a virtual monopoly of the navigation of the river and its tributaries and the Lake of Maracaibo.

The telegraph system, though still inadequate, had a network (1932) of 6,584 miles with 247 telegraph offices. There are 11 telephone systems in the principal towns, but not all are interconnected. There were 447 post-offices in 1932; mail handled, internal and abroad: 21,371,080 letters, 939,305 post-cards, 16,402,798 printed packets, and 2,153,274 other classifications; total, 40,866,457 pieces. Weekly air mail services, domestic and international, were established in 1930.

There are wireless stations at Caracas, Maracaibo, Maracay, Maiquetiá, San Cristóbal, Porlamar, Puerto Cabello, Maturín, and Puerto Ayacucho; the one at Maracay reaches New York and Berlin. There are 6 long-wave and 5 short-wave broadcasting stations.

Banking and Currency.

The official monetary unit is the *Bolivar* (equivalent to 0·290323 gramme fine gold). It is divided into 100 céntimos. The bolivar equals at par 9½*d.* or 19·3 cents (U.S.) at par. £1 = 25·25 bolivars. But prohibition of the export of gold in 1930 depreciated the bolivar from 5·17 to the dollar (U.S.) to 7 (1932). Average value of the bolivar in 1934 was 17·6 bolivars = £1. The following are the coins in current circulation: Gold, 100 (pachanos) 20 and 10 bolivars; silver, 5, 2·50, 2, 1, 0·50 (real) bolivars, and 0·25 (medio) bolivars; nickel, 0·125 (locha), 0·05 (centavo) bolivars.

The bank notes in circulation are as follows (the figures in brackets showing their values at par): 1,000 bolivars (£39 11*s.* 8*d.*); 800 bolivars (£31 13*s.* 4*d.*); 500 bolivars (£19 15*s.* 10*d.*); 100 bolivars (£3 19*s.* 2*d.*); 50 bolivars (£1 19*s.* 7*d.*); 20 bolivars (15*s.* 10*d.*); and 10 bolivars (7*s.* 11*d.*). The circulation of foreign banknotes is forbidden.

The Bank of Venezuela (paid-up capital 18,000,000 bolivars) had on June 30, 1932, surplus and undivided profits of 13,330,697 bolivars; it is the sole depository of government funds. Power to control the circulation of the currency was granted in 1930. The Bank of Caracas has a paid-up capital of 4,500,000 bolivars and (June 30, 1929) surplus and undivided

profits of 2,919,549 bolivars. There are four other national banks, including the Bank of Maracaibo with a capital of 1,250,000 bolivars, and the Commercial Bank of Maracaibo with a capital of 400,000 bolivars, as well as local branches of 4 British, American and Dutch banks. Issuance of notes is restricted to the six national banks which have power to issue notes to bearer convertible on presentation up to twice their paid-up capital. They must publish monthly balance sheets, and keep 30 per cent. of their reserves against note issues in gold. Two small mortgage banks under quasi-governmental auspices were started in 1929.

Decrees of 1875 and 1912 provided that the official system of weights and measures shall be the metric system.

Diplomatic and Consular Representatives.

1. Of Venezuela in Great Britain.

Envoy Extraordinary and Minister Plenipotentiary.—Dr. Diógenes Escalante.

Counsellor.—Dr. Oscar Aguilar.

Second Secretary.—Jorge Arrillaga.

Attaché.—José Rafael Falcón.

Consul General in Liverpool.—Alirio Parra Márquez.

Special Commercial Attaché.—Rafael José Cayama.

Vice-Consul in London.—Camilo Gurtubay.

There are Consular representatives at Cardiff, Liverpool, Glasgow, Hull, Newcastle-on-Tyne, and Birmingham.

2. Of Great Britain in Venezuela.

Envoy Extraordinary and Minister Plenipotentiary.—E. A. Keeling. Appointed December 1, 1932.

Chargé d'Affaires ad interim and Consul at Caracas.—J. P. McGregor.

There are Vice-Consuls at Caracas, Maracaibo, La Guaira, Puerto Cabello, Irapa, and Carúpano.

YUGOSLAVIA.

(KRALJEVINA YUGOSLAVIA.)

Reigning King.

Peter II., born September 6, 1923, son of the late King Alexander I. and Queen Mary, daughter of the late King Ferdinand of Rumania, born January 9, 1899, succeeded to the throne on October 9, 1934, after the assassination of his father, King Alexander I. at Marseilles on the same date.

Brothers of the King.—Prince Tomislav, born January 19, 1928; Prince Andrey, born June 28, 1929.

Uncle of the King.—Prince George, born September 8, 1887; on March 27, 1909, he renounced his right of succession to the Throne.

Aunt of the King.—Princess Hélène, born November 4, 1884; married, September 9, 1911 to Prince Ivan Constantinovitch (died July 18, 1918), son of the Grand Duke Constantine Constantinovitch of Russia.

Great-Uncle of the King.—Prince Arsène, born April 4, 1859; married April 19, 1892, Aurora Demidoff, Princess of San Donato (died June 15, 1904), whose son, Prince Paul, born April 15, 1893 (o. s.), now First Regent of Yugoslavia; married October 22, 1923, Princess Olga of Greece, and has two sons, Prince Alexander, born August 12, 1924, and Prince Nicholas, born June 22, 1928.

The founder of the dynasty was Kara-George (*i.e.* Black George) Petrovitch, who, in 1804, raised the first Serbian revolt against Turkish rule. He was murdered in 1817, leaving two sons—Alexis, born 1801, and Alexander, born 1806. In 1842 Alexander was chosen reigning Prince by the Skupshtina or National Assembly, and the title was confirmed by the Porte, but the dignity was not hereditary. In 1858 Alexander had to abdicate and was banished, and in 1885 he died in exile. King Peter Karageorgevitch was the third of his house who have ruled in Serbia. He succeeded to the throne on the murder of King Alexander of the Obrenovitch dynasty; was elected King by the Skupshtina June 15, and assumed royal rights and duties June 2, 1903.

The independence of Serbia from Turkey was established by Article 34 of the Treaty of Berlin, signed July 13, 1878, and was proclaimed by Prince Milan Obrenovitch in Belgrade. On March 6, 1882, the same Prince proclaimed himself King.

After the Revolution in Austria-Hungary, Slovenia, Croatia, Dalmatia,

and Bosnia declared their independence, and their union with Serbia, together with that of Montenegro, which had been voted on November 13, 1918, was proclaimed on December 1, 1918, when the official name of the State was announced as being the Triune kingdom of the Serbs, Croats and Slovenes.

By the Treaty of Rapallo the boundaries of the new State on the side of Italy were definitely determined, except as regards Fiume, an agreement on which was not reached till January, 1924, when Fiume was awarded to Italy and Barosh to Yugoslavia. On December 5, 1923, Yugoslavia obtained from Greece a free zone in the harbour of Salonika, which by the end of 1928 covered an area of 351,000 square metres (193,000 square metres land and 158,000 square metres water). During 1931, the total traffic handled consisted of 443,209 tons of imports and 355,765 tons of exports.

By the law of October 3, 1929, the name of the State was changed to Kingdom of Yugoslavia. It consists of nine *banovinas* (counties) and Belgrade (see map in THE STATESMAN'S YEAR BOOK for 1931).

The King's civil list amounts to 24,000,000 dinars, plus 24,886,328 as difference for payment in foreign exchange.

Owing to the minority of the present king, a Regency Council consisting of H.R.H. Prince Paul of Yugoslavia, Dr. Radenko Stankovitch, senator and an ex-Minister, and Dr. Ivo Perovitch, Banus of Sava (Croatia), were appointed Regents by the late King to govern the country during the King's minority.

Constitution and Government.

Yugoslavia is a constitutional parliamentary and hereditary monarchy according to the provisions of the Constitution of September 3, 1931, when the non-parliamentary régime introduced as an emergency in January, 1929, was ended. The legislative power is vested in the King, the Senate, and the Chamber of Deputies. The royal succession is in the direct male line in the order of primogeniture. In default of male heirs the King may nominate his successor. If he does not the Senate and the Chamber meet together to elect the king from among the members of the ruling house. If the successor be under eighteen years of age the King will make nominations in his testament or in a special document. Failing this provision both Houses meet together for the purpose of nominating a regent during the minority.

The Senate consists of members elected for six years, half of whom is re-elected every three years. The King may nominate as many senators as the number elected. The minimum age of electors is fixed at twenty-one years. The right of election to the Senate is reserved to the members of the Chamber of Deputies and to Provincial Chambers and burgomasters. The right of presentation for election is reserved to citizens of over 40 years of age. One senator is elected to every 300,000 inhabitants. Senators receive from the State an indemnity of 200 dinars per day while the session lasts.

The members of the Chamber of Deputies (*Skupshtina*) are elected directly by the electoral body which votes publicly and verbally. All the male inhabitants over 21 years of age have the right to vote. All the electors over 30 years of age have the right of presenting themselves for election. The number of deputies is fixed at present at 305, corresponding to one member to every 50,000 inhabitants. Deputies are elected for a period of four years. Each deputy receives an indemnity of 200 dinars per day and a free pass over the State rail and waterways.

The Senate and the Chamber meet annually on October 20 and are obliged to sit till the new budget is passed. The King has the power of convoking, proroguing and dissolving the Parliament.

The electoral law provides that all candidates for election to Parliament must attach themselves to a national list with representatives in each single electoral division. Elections to the new Parliament were held on May 5, 1935, and the Parliament was to be opened on June 3, 1935.

The Cabinet, appointed on December 21, 1934, is composed as follows:—

Prime Minister and Minister of Foreign Affairs.—Bogoljub *Yevtitch.*
Minister of the Interior.—Dr. Velya *Popovitch.*
Minister of Transport and Communications.—M. *Vuyitch.*
Minister of Defence.—General Peter *Zhivkovitch.*
Minister of Finance.—Milan *Stoyadinovitch.*
Minister of Commerce and Industry.—Dr. *Verbanitch.*
Minister of Education.—M. *Chiritch.*
Minister of Justice.—Dr. Dragutin *Koyitch.*
Minister of Social Affairs and Health.—Dr. *Marushitch.*
Minister of Mines and Forests.—Dr. Svetislav *Popovitch.*
Minister of Agriculture.—Dr. Dragutin *Yankovitch.*
Minister of Public Works.—Dr. *Kozhul.*
Minister of Physical Education.—Dr. *Auer.*
Minister without Portfolio.—M. *Hasanbegovitch.*

Area and Population.

According to the census taken March 31, 1931, the area and population of Yugoslavia are shown as follows:—

Banovinas	Capital	Area in sq. miles	Males	Females	Total	Per sq. mile
Dravska	Lyublyana	6,123	551,211	593,087	1,144,298	186·9
Savska	Zagreb	15,647	1,315,973	1,388,410	2,704,383	172·8
Vrbaska	Banyaluka	7,302	529,695	508 687	1,037,382	142·1
Primorska	Split	7,586	442,455	459,205	901,660	118·9
Drinska	Sarayevo	10,750	773.001	761,738	1,534,739	142·8
Zetska	Cetynye	11,965	464,210	461,306	925,516	77·4
Dunavska	Novi Sad	12,054	1,169,215	1,218,080	2,387,295	198·1
Moravska	Nish	9,830	706,126	729,458	1,435,584	146·0
Vardarska	Skoplye	14,155	785,902	788,341	1,574,243	111·2
Belgrade	—	146	154,889	134,099	288,988	1,979·0
	Total	95,558	6,891,627	7,042,411	13,934,038	145·8

The principal towns with their latest census figures (March 31, 1931) are as follows:—

Town	Population	Town	Population
Belgrade (capital)	238,775	Zagreb	185,581
Soubotitza	100,058	Skoplye	68,616
Sarayevo	78,173	Lyublyana	59,765
Novi Sad	63,985	Nich	35,465
Bitolj	33,024	Ossyek	40,337
Sombor	32,334	Senta	31,969
Maribor	33,131	Split	43,711
Vel Betchkerek	32,831	Vrchatz	29,411
Vel. Kikinda	28,400	Zemoun	28,074
Kragouyevatz	27,208	Leskovatz	17,682

Movement of population is shown as follows for 4 years:—

—	Births	Marriages	Deaths	Surplus of Births over Deaths
1929	452,544	128,120	286,249	166,295
1930	489,173	138,319	261,487	227,686
1931	470,094	126,069	276,827	193,267
1932	465,327	110,992	271,976	193,351

Religion.

All religions recognised by law enjoy the same rights. According to the results of the census of March 31, 1931, there were of the total population:—Serbian-Orthodox, 6,785,501 (48·70 per cent.); Roman Catholics, 5,217,847 (37·45 per cent.); Greek Catholics, 44,608 (0·32 per cent); Protestants, 231,169 (1·66 per cent.); Moslem, 1,561,166 (11·20 per cent.); Jews, 68,405 (0·49 per cent.); others, 25,342 (0·18 per cent.).

The Serbian Orthodox, or Serb Pravoslav, Church is ruled by a Patriarch and a Holy Synod. On September 12, 1920, the Patriarchate of the Serbs, originally established by King Stephen VII Dushan on April 9, 1346, and suppressed by Sultan Mustafa III on September 13, 1766, was reconstituted. The Serbian Orthodox Church is organised in 6 Metropolitical Sees, Petch, Belgrade, and Karlovce (held by the Patriarch), and Skoplye, Cetinye and Dalmatia-Bosnia (Shibenik), and 20 other dioceses. There are 2,866 Parishes and 166 Monasteries. According to the provisions of the Constitution of the Serbian Church, which was published in November, 1931, the Church is to be governed in the future on an autonomous basis and have the right to organise its own life according to its needs. The Government will transfer to the Church the sums in the Budget which they have allotted to ecclesiastical affairs.

The Latin Church in Yugoslavia is governed in its relations with the State by the Concordats of 1855 in the territories which used to form part of Austria or Hungary; of 1866 for Montenegro; of 1881 for Bosnia and the Herzegovina; and of 1914 for Serbia. It is divided into two complete Provinces, of Sarayevo with 4 Suffragan Sees, and Zagreb with 4 Suffragan Sees and jurisdiction over the Byzantine Uniat Bishop of Krizhevce. In addition to these there are 2 Archbishoprics, Belgrade and Antivari, and 2 Bishoprics which depend immediately upon the Holy See in Rome, and 7 other Bishoprics under the metropolitan jurisdiction of Archbishops outside the kingdom. There is an Apostolic Administrator for those parts of the diocese of Zara which are in Yugoslavia. The Church is organised in 1,971 Parishes, and there are 349 Monasteries and Convents.

The Protestants are chiefly in the territories which used to form part of Hungary. Their principal communities are the Evangelical Church (Helvetian and Augsburg Confessions), and the Evangelical Brotherhood. The Mennonites, and the Baptist and Methodist Churches are less numerously represented.

The Moslems who were under two autonomous jurisdictions, that of the Grand Mufti of Belgrade, and that of the Reis-ul-Ulema of Sarayevo for Bosnia and the Herzegovina, are now joined together.

The Jews, who are divided between the Sephardim and the Ashkenazim, have a Grand Rabbi in Belgrade for Serbia, and Rabbinates for Croatia and Slavonia, for Bosnia and the Herzegovina, for Dalmatia, and for the Voyvodina.

Education.

Elementary education is compulsory, and, in all the primary schools under the Ministry of Education, it is free. It lasts 8 years and the schools are divided into elementary and middle-class schools. Children intending to continue their education in secondary or technical schools are exempted from attendance in continuation schools. In the year 1932–33 there were 8,619 elementary schools with 27,334 teachers and 1,308,902 pupils. There were 1,955 teachers and 30,261 pupils in the middle-class schools. There were 163 secondary schools with 83,192 pupils and 4,349 teachers, and 37 training colleges for teachers, with 7,150 pupils and 677 teachers. There were 531 primary professional and industrial schools with 3,859 teachers and 63,735 pupils, and 36 secondary professional schools with 494 teachers and 6,165 pupils; 38 agricultural schools with 251 teachers and 1,891 pupils; 3 higher art schools and 19 theological colleges. The latter had 1,588 students in 1932–33.

There are three Universities in the Kingdom: At Belgrade, founded in 1838; at Zagreb (Agram); and at Lyublyana, founded in 1920. In 1932–33 the total number of students attending the Universities was 13,606, with 664 professors. There is a Law School at Subotitsa with 13 professors and 426 students; a Philosophical Faculty at Skoplye with 22 professors and 163 students; and an Economic-commercial Academy at Zagreb with 27 professors and 179 students.

Justice and Crime.

Justice is administered by independent State courts. Courts of first instance are county and district courts. There are 8 courts of appeal as courts of second instance. The highest court is the court of cassation.

There are special courts for administrative legislature. The State Council is the supreme administrative court.

Finance.

Estimates of receipts and expenditure for 6 years were as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	1000 dinars	1000 dinars		1000 dinars	1000 dinars
1929-30	14,643,851	12,778,087	1932-33	11,323,200	11,396,808
1930-31	13,776,458	13,751,934	1933-34	10,973,579	10,438,327
1931-32	13,692,022	13,492,573	1934-35	10,171,250	10,171,250

The principal items of the budget estimates for 1933–34 are shown as follows in thousands of dinars:—

Revenue.	Dinars. (thousands)	Expenditure.	Dinars. (thousands)
Direct taxes	1,808,000	Department of Education	786,109
Indirect taxes	2,880,000	Finance	303,208
State undertakings	3,448,430	Army and Navy	2,000,300
Monopolies	1,606,731	Public works	164,571
Government enterprise surplus	535,252	Communications	152,531
Miscellaneous	159,914	Agriculture	65,587
		Pensions	915,738
		Public health	152,270

On July 1, 1932, the public external debt of Yugoslavia amounted to 32,763,242,636 dinars, internal to 6,020,315,000 dinars, making a total of 38,783,557,636 dinars.

Defence.

Army.

The organisation of the army of the Kingdom of Yugoslavia is based on the law of 1923. Compulsory service is in force for men between the ages of 21 and 45, and, as a last defence, men can be taken as fit to carry arms from the ages of 18 to 21 years and from 45 to 50 years. Service in the active army is for 10 years, of which 18 months are with the colours, the remainder of the service being spent on leave subject to recall for training. From 31 to 38, service is with the 2nd base of the reserve, from 38 to 45 with the 3rd base.

The kingdom is divided into five army commands which comprises 2 cavalry divisions, 16 infantry divisions and 16 artillery brigades.

In 1933-34, the peace strength of the active army was 8,150 officers and 99,501 men. The Gendarmerie consists of 19,848 officers and men. The military air force numbers 10,810 all ranks with 568 aeroplanes, organised in 6 air regiments of 18 flights.

The strength on mobilisation is approximately 1,000,000. Military education is provided by the Military Academy at Belgrade for the training of cadets for officers of all arms and by the superior course of the Academy for the training of staff officers and commanders.

The infantry is armed with quick-firing rifles of French pattern and those taken as booty from Austria-Hungary; the artillery with French quick-firing guns (Schneider-Canet system) and those taken as booty from Austria-Hungary, which are of various models.

Navy.

The Royal Yugoslav Navy is under the command of a Vice-Admiral, a special Naval Department being maintained at the War Office for technical and administrative purposes. The organisation comprises the seagoing squadron; the river flotilla; the air service. The seagoing squadron, composed of the flotilla leader *Dubrovnik*, of 1,880 tons and mounting four 5·5 inch guns, built in Great Britain in 1931–32, 8 torpedo-boats, 6 mine-layers, 6 mine-sweepers, 4 submarines, an aircraft tender, and a number of smaller vessels, is used mainly for training purposes. A small ex-German cruiser, *Dalmaciya*, has been refitted and re-armed to serve as a training ship. A new programme of naval construction, to include 2 flotilla leaders, 6 destroyers, 2 submarines, and 6 coastal motor-boats, has been approved. The main base is at Kotor (Cattaro), where there are facilities for repairs and docking, and a naval engineering college. There are training establishments at Gruz (Gravosa) (for officers) and Shibenik (Sebenico) (for warrant and petty officers). The river flotilla includes 4 monitors, armed with 4·7 inch guns, besides patrol vessels, motor-boats, mining launches, and other small craft. The air service consists of sea-plane detachments attached to the seagoing squadron and to the river flotilla. The total active service personnel of the navy comprises 487 officers and 5,500 men, with a further 700 in reserve.

Production and Industry.

Yugoslavia, with a total area of 24,754,200 hectares, has a cultivated area of 14,162,195 hectares (56·3 per cent.) (1933).

The area and production of the principal crops for 2 years were :—

Crop	Acreage		Yield	
	1932	1933	1932	1933
			tons	tons
Wheat . . .	4,817,797	5,134,498	1,454,582	2,628,558
Barley . . .	1,005,807	1,058,911	391,514	463,047
Rye . . .	600,114	622,814	211.534	245,349
Oats . . .	809,219	928,999	269,228	371,052
Maize . . .	6,225,773	6,269,211	4,792,965	3,578 070
Vines . . .	473,568	481,405	—	—

On January, 1, 1934, there were in Yugoslavia 1,186,894 horses ; 17,236 mules ; 117,496 asses ; 3,876,309 head of cattle ; 8,600,418 sheep ; 2,656,345 pigs ; and 1,871,158 goats.

The forest area of Yugoslavia is 19,216,046 acres (1932). The largest forest area is in Bosnia and the Herzegovina (9,388,944 acres). The forests consist largely of beech, oak, and fir, but are less profitable than, with proper management, they might be. The normal timber cut is about 530 million cubic feet per annum. Hemp is an important crop The area under cultivation in 1933, was 75,073 acres (67,840 in 1932), and the yield 27,863 metric tons (21,280 metric tons in 1932).

Yugoslavia has considerable mineral resources, including coal (chiefly lignite), iron, copper ore, gold, lead, chrome, antimony and cement. The total output of coal and lignite was 4,856,458 metric tons in 1931 ; 4,476,095 metric tons in 1932 ; and 4,155,199 metric tons in 1933. The most important iron mines are at Varesh and Lyubiya in Bosnia and there are also considerable siderite and limonite iron ores between Prizhedor and Sanski Most. In 1933 the output of iron ore was 52,465 metric tons ; 26,635 metric tons in 1932. Copper ore is exploited chiefly at Bor (Serbia) ; output in 1933, 437,470 metric tons ; in 1934, 486,195 metric tons. The principal lead mines are at Mezhitsa (Slovenia); production of lead ore in 1932, 554,504 metric tons; in 1933, 685,762 metric tons. Chrome mines are found in the southern part of Serbia and more especially in the neighbourhood of Skoplye (Uskub) ; output of chrome ore in 1933, 20,279 metric tons ; in 1934, 33,606 metric tons. There are 2 antimony mines in western Serbia (Podrinye) which produced 1,191 metric tons in 1931. Production of salt in 1931, 52,745 metric tons ; in 1932, 52,846 metric tons ; in 1933, 45,115 metric tons. Bauxite in 1931, 64,842 metric tons ; in 1932, 67,086 metric tons ; in 1933, 80,855 metric tons ; manganese, 2,454 metric tons in 1931 ; 156 metric tons in 1932 ; 535 metric tons in 1933 ; pyrites, in 1931, 29,495 metric tons ; in 1932, 15,718 metric tons ; in 1933, 20,077 metric tons.

Of the industries, flour milling is one of the most important, especially in Batchka ; there are 50 large flour mills in the country ; brewing and distilling are extensively carried on, as are also cotton spinning and weaving, tanning, boot-making, pottery, and iron-working. Carpet weaving is one of the oldest industries in Serbia. The product is manufactured principally at Pirot, in south-eastern Serbia, and the carpets are named after that place. The chief characteristics of these carpets are that they are made of pure wool, dyed with natural colours by local dyers, who pride themselves that the process of dyeing and colour mixing is a secret transmitted by father to son, and is known only to the inhabitants of Pirot. Meat-packing is also becoming

important, and there is also an important cardboard and paper-making industry.

Commerce.

Commerce for 5 years :—

	1930	1931	1932	1933	1934

United States .	126,591	148,309	France . . .	82,192	74,841
Greece . . .	25,205	40,152	Great Britain .	64,536	90,406

In 1933 the chief imports from Yugoslavia into the United Kingdom (according to Board of Trade Returns) were: chemicals, 61,981*l.*; poultry, 136,502*l.*; sawn hard wood, 155,021*l.* The chief exports from the United Kingdom to Yugoslavia were cotton piece goods, 108,978*l.*; cotton yarns, 106,329*l.*

Total trade between Yugoslavia and the United Kingdom for five years (Board of Trade Returns) :—

	1930	1931	1932	1933	1934
	£	£	£	£	£
Imports from Yugoslavia into U. K.	707,715	564,020	437,159	602,467	849,555
Exports to Yugoslavia from U. K.	1,158,557	940,185	1,219,824	599,603	824,393
Re-exports to Yugoslavia from U.K.	30,431	32,749	13,035	17,024	17,215

Shipping and Communications.

On July 1, 1934, Yugoslavia possessed 174 steamers of 356,831 (gross) tons, besides 396 motor ships of 5,380 (net) tons, and 11,191 sailing boats of 30,531 (net) tons.

In 1933, 91,958 vessels of 16,390,884 net tons entered the ports of the kingdom, of these, 85,889 vessels of 12,778,975 tons were Yugoslav.

Yugoslavia has (1932) 5,792 miles of railway, of which 4,343 miles are of normal gauge, and 1,449 miles of narrow gauge. Of the whole length of railway 4,019 miles are under the State's administration.

The first Yugoslav air-line for passengers between Belgrade and Zagreb was opened in February, 1928. There is now a service between Belgrade and Skoplye. Regular international services connect Belgrade with Paris, Sofia, Bucharest, and Constantinople.

Of highways there are (1933) 25,158 miles. A five-year programme of road construction was formulated in 1931. It is intended to build a further 450 miles of roads at a cost of 600,000,000 dinars. Total length of waterways, principally the Danube, the Save, the Drave, the Tisa, the Kupa, the Tamish and 3 canals is 1,182 miles. On these waterways there were in 1933, 372 steamships and motorships engaged in river navigation, of which 66 per cent. are State owned, the remainder belonging to private companies. Passenger traffic amounted to 6,645,932 and freights to 2,064,589 tons.

There were (1933) 12,616 miles of telegraph line and 10,097 miles of telephone line.

In 1933 there were 3,996 post-offices, 1,919 telegraph offices, 1,236 central telephone stations, 5 central automatic telephone stations with a total number of telephone subscribers of 42,606. There were also 1,286 public telephone call-offices.

Banking and Credit.

The principal bank is the National Bank of Yugoslavia, in Belgrade, with a capital of dinars 180,000,000 paid up. Notes in circulation on February 15, 1935, 4,313,084,000 dinars; note cover in gold and foreign exchange, 1,310,090,000 dinars; bills and advances (State and private), 3,832,302,000 dinars. The Export Bank, with agencies abroad, assists in the exportation of Yugoslav produce. The Drżavna Hipotekarna Banka or State Mortgage Bank, the only large State institution of the kind in Yugoslavia, makes advances to a large amount for agricultural operations. The Privileged Agrarian Bank was founded in 1929 with a capital of 700 million dinars for the benefit of farmers. Savings deposits at the banks totalled 9,837,000,000 dinars on June 1, 1934, as compared with 10,226,000,000 dinars at the end of 1932. Postal savings accounts numbered 312,852 with 718,492,000 dinars balance at the end of 1934, as against 264,515 with 564,103,000 dinars balance at the end of 1933, and 216,957 with 449,674,000 dinars balance at the end of 1932.

Money, Weights and Measures.

Yugoslavia has the decimal system for its weights and measures. On May 8, 1931, a stabilisation loan was concluded in Paris to the amount of 1,025,000,000 francs for the purposes of the legal stabilisation of the dinar. On May 12 a law for the stabilisation of the dinar was promulgated to take effect on June 28. The dinar was stabilised at a value corresponding to 26·5 milligrams of pure gold, *i.e.*, 11 dinars equals one gold dinar, or 100 dinars equal 9·13 Swiss francs (approximately 276 to the pound sterling). The

National Bank as the bank of issue is bound by law to maintain a cover of gold or foreign currencies of equivalent value, amounting to not less than 35 per cent., and at least 25 per cent. only in gold, of the total amount of the Bank's outstanding obligations. In circulation are bank-notes of 10, 100, and 1,000 dinars; 100 paras = 1 dinar; metallic coins of 0·25, and 0·50 dinar, 1 dinar, and 2 dinars, and silver coins of 10 and 20 dinars with a 50 per cent. silver content and weighing 7 and 14 grammes respectively. According to a law published on August 13, 1932, there is to be an issue of new silver coins of 50 dinars with 75 per cent. silver content and weighing 22 grammes; the value of the issue of all silver coins is to be 1,000,000,000 dinars.

The metric weights and measures have been in practical use since the commencement of 1883. The *wagon* of 10 metric tons is frequently used as a unit of measure for coal, roots and corn.

Diplomatic and Consular Representatives.

1. Of Yugoslavia in Great Britain.

Envoy and Minister.—Vacant (March, 1935).
Counsellor.—Dr. Voyislav M. Yovanovitch.
Secretary.—Dr. Voyslav M. Radovanovitch.
Military Attaché.—Brigadier-General Marko Mihailowitch.

There are Consular representatives in Manchester, Bristol, Bradford, and Glasgow.

2. Of Great Britain in Yugoslavia.

Envoy and Minister.—Ronald Hugh Campbell, C.M.G. (Appointed March 6, 1935.)
First Secretary.—D. J. Cowan, O.B.E., M.C.
Military Attaché.—Lt.-Col. T. D. Daly, M.C.
Naval Attaché.—Capt H. Pott, M.V.O., R.N.
Commercial Secretary.—H. N. Sturrock, O.B.E.

There are consular officers at Belgrade, Zagreb, Sarayevo, Dubrovnik (Ragusa), Split, Vis (Lissa), and Sushak.

Statistical and other Books of Reference concerning Yugoslavia.

1. Official Publications.

Statistique Générale d'Etat. Annuaire statistique No. 1, 1929, Belgrade, 1932; No. 2, 1930 Belgrade, 1933; No. 3, 1931, Belgrade, 1934; No. 4, 1932, Belgrade, 1934.

PRINTED IN GREAT BRITAIN BY RICHARD CLAY & SONS, LIMITED, BUNGAY, SUFFOLK.

AGRICULTURAL CO-OPERATION IN FASCIST ITALY. With a Full Account of the General Organisation of Co-operation.

By FREPPEL COTTA, Honours Diploma in Co-operation and Social Science. With a Preface by C. R. FAY, M.A., D.Sc., Chairman, The Horace Plunkett Foundation. **7s. 6d.**

INSURANCE AGAINST CREDIT RISKS IN INTERNATIONAL TRADE.

By ELIA M. SHENKMAN, Ph.D.(Econ.). **15s.**

The first systematic study of this important subject published in the English language. The author deals fully with the theoretical principles and business organisation of private and State insurance against credit risks in the foreign trade of seventeen countries in Europe and overseas.

GREAT BRITAIN AND THE LAW OF NATIONS: A Selection of Documents Illustrating the Views of the Government in the United Kingdom upon Matters of International Law. Volume Two: Territory (Part I).

Edited by HERBERT ARTHUR SMITH, D.C.L., Professor of International Law in the University of London. **16s.**

THE INTERNATIONAL BANKS

By A. S. J. BASTER, M.Com., B.Sc. **12s. 6d.**

A short study of the history and present position of the important and well-defined group of London banks operating mainly in foreign countries. The investigation is specially concerned with the past activities of these banks as a channel for British capital exports, both on long and short term, and it considers the prospects for international banking in the future, in face of the growth of economic nationalism since the War.

STANFORDS for Maps

Stanford's Library and Commercial Maps of the Continents.

Engraved on copper plates in the finest style of the art. Mounted to fold in case 63/-; mounted on rollers and varnished, 55/-; mounted on spring roller, 120/-. Size of each map, 58 × 65 inches.

Stanford's Library and Commercial Chart of the World, on Mercator's Projection.

The latitude embraced on this chart includes the whole of the known land area on the North and extends to the Magnetic Pole on the South. The British Isles lie near the centre, and both the Eastern and Western Routes to the Antipodes are included. This chart shows the principal shipping routes, ports and harbours of the world. Equatorial scale of 360 nautical miles to an inch. Prices: mounted to fold in case, 45/-; C.R.V. 45/-.

Stanford's Map of the Middle East.

The map includes the whole of Asiatic Turkey, Cyprus, Palestine, Trans-Jordan, the Levant States mandated to France (Syria, etc.) Iraq, Armenia and Azerbaijan, with parts of the adjoining territories of Georgia, Persia, Egypt, Saudit (Hedjaz and Nejd) etc. An entirely new production, compiled from the latest Government Surveys, Political boundaries and railways in operation or proposed are clearly shown, and civil and military aerodromes and landing grounds are printed in red. Prices: On linen in case, 12/6. On linen rollers and varnished, 18/-. One sheet coloured, size 40 × 30 inches. Scale 40 miles to 1 inch.

EDWARD STANFORD LTD.

12, 13 and 14, Long Acre, W.C.2., and Whitehall House, 43, Whitehall, S.W.1.
